When Heine first entered the service, the boss gave him a carboy and told him to "wash the inside out." Heine looked at the big bottle ruefully and then said: "Yah, I vash der inside out ven I get der outside in; but how der teufel vill I get der outside inside to vash der inside outside."

## Prize Paper Treats of Drug Clerks.

In Contest No. 4, of the ERA'S series of Cash Prize Competitions, the judges this week have awarded the cash prize of \$5 to Harry G. Frame, of 39 Spark street, Ottawa, Canada. This contest is for papers calculated to benefit retail drug clerks. Full details of this competition, which is open to all, will be found on advertising page 31 of this issue of the ERA. Mr. Frame's winning paper is as follows:

There are four qualifications every drug clerk must have if he expects to amount to anything in his profession, or be anything in this world.

**FIRST—Ambition.**—This is a quality born in every one of us. We are all ambitious to be or do something. When a clerk goes into a store as an employee, it should be his ambition to rise to the very highest point attainable, that of manager or perhaps employer. He should be ambitious to see his store do a little more than the other man's. Be ambitious to sell more this month than last month; be ambitious to be the best salesman. Don't let the "silent salesman" do all your work as some clerks do; sell as much as it does if not more.

**SECOND—Push.**—This is the age of push. Every drug clerk has it in him to push. Take an interest in your employer's business. You are a part of that business, push it, boost it in every way you can. If you are dispensing, dispense the very best you know how; have everything exactly correct; labels on straight; corks in tight; packages neatly wrapped; your dispensing case clean, neat and in order. Doctors notice this, so do customers. Your reputation as a neat, skilful dispenser depends on it. If you are in the store keep things in order. Don't have to look five minutes for anything that you should be able to lay in your hands in two seconds. Keep your leaders well to the front in neat array with a sign calling the attention of the customers to them. Don't have a big pile on the display stands like potatoes in a sack with a big dusty sign stuck crossways in it. Push your leaders; call attention to them. Boost your store; it is the best in the city and you are proud you are a part of it.

**THIRD—Ability.**—Every clerk must have ability. A clerk without ability is like a ship without a compass, and is taking up a lot of valuable space that might be put to some good use. Find out what a customer wants; have the ability to sell him that article in the shortest possible time. Size your customer up; by the time he is through telling you what he wants, you should know whether he is a crank on any particular line of goods or not. If he is, give him that line of goods. Don't try to sell him something else just as good, *sell him something better*. That old "just as good gag" died years ago. Anyway, he won't believe you and remember a satisfied crank is a better advertisement than a half page in a newspaper.

For instance? You have a call for a cold cure and are pushing a certain kind. Here is your chance to show your ability as a salesman. Tell your customer what you know it will do; if it is your leader you can't recommend it too strongly.

**FOURTH—Knowledge.**—Have a thorough knowledge of drugs. New drugs are coming on the market all the time—*keep yourself posted*. THE PHARMACEUTICAL ERA will help you wonderfully in keeping up to date on all the new drugs, as well as he subjects important to the drug business. Have a knowledge of the stock; know where it is; how much it costs and what it sells for. Know your customers. Study their ways and wants. Know enough to treat the little old woman who has faded dress with the same polite courtesy you do the lady with the silk dress and diamonds. I have seen clerks who certainly forget this. The little old woman may not notice any lack of courtesy on your part, but other customers in the store may and put you down as a cad and take their trade somewhere else. I have known this to be done more than once. Last but not least, *know* that your employer *knows* just about how much ambition, push, ability and knowledge you have and are giving to his business and will judge you accordingly.

### No Mystery.

Mistress (severely)—How did this fire happen to go out?  
New Girl (innocently)—I guess you forgot to tell me to put coal on.

## Thoughts for Easter.

By Emma Gary Wallace.

In making plans for the extra business of any special day, the goods offered and the decorations planned should be thoroughly suggestive of the time and spirit of the occasion.

Easter symbolizes the renewal of joyous, happy life in all the purity and beauty of a new birth, hence we have as its emblems the blossoms of early spring time, the egg, the butterfly, the dove of peace, the cross of the atonement, and the rabbit of legendary origin.

There is no holiday upon the calendar of Christian nations which stands so completely for joy and hope; for the triumph of light over darkness, warmth over cold, sunshine over shadow. It is the particular season of the optimist, who stands with smiling expectancy, face front toward the goal of his ambition.

To prosper in a legitimate business is a worthy ambition and it is eminently fitting that the business as well as the business-head should show forth the spirit of Easter-tide.

### Timely Offerings.

The goods offered for sale should be suitable to the occasion. That may seem like a point too self-evident to need even passing mention, and yet a canvass of drug-store windows on previous Easters revealed such articles of merchandise as chest-protectors, hot-water bags, cough remedies galore, plasters, surgical and school supplies, and corn exfoliators. These goods are all excellent and necessary but scarcely timely or suitable for an Easter Sale.

Spring medicines, even sulphur and molasses in modern palatable form, tonics, stomach and liver regulators, toilet preparations and accessories which will help soften the traces of boisterous March winds and erase the evidences of that untiring worker, Father Time; cleansing agents of all kinds, shampoos, soaps, lenshes, bath supplies and sponges; medicine cases fitted up for the summer outing or displayed empty and to be filled at the customer's orders; articles which may be used as Easter gifts, as perfumes, confectionery, stationery and novelties, are more in line with the season's needs.

### Suitable Window Trims.

There is some misapprehension concerning the use of window decorations. The materials so used are for the sole purpose of increasing general attractiveness and emphasizing the selling points of the goods displayed. A window so decorated that the selling points are lost in the elaborateness of the trimmings is over-dressed. It is a case of the showiness of the frame detracting from the sterling qualities of the picture.

The possibilities for beautiful Easter windows are unlimited. A good spring tonic which has been proved to possess undoubted merit might be the leading idea. The decorations should suggest spring. At any novelty store obtain a supply of small toy clothes-pins, which are to serve as the bodies of butterflies. Different shades of crepe paper cut in the shape of wings and drawn tightly between the prongs of the little pins, simulate the shapes of butterflies almost perfectly. Rings and brilliant markings may be added by the use of the cheap water-color paints or even colored chalk, and touches of gold paint especially on the head will increase the life-like appearance.

### Fascinating Work For Women Folk.

The women-folk at home will find this a most fascinating evening's work. Enough of the brilliant insects may be suspended by tiny wires or elastic to look like a flight of butterflies, and when a slight breeze or draft stirs them the effect will be excellent. Perch others where they appear to have alighted.

A puffy ground-work of pale green cheesecloth or paper,

and a background of early woody things carry out the thought of renewed life.

Among the flowers and foliage which would be suitable for an Easter window might be mentioned Easter lilies, snowball, wisteria sprays, violets, apple blossoms, dogwood branches, tulips, lilacs, pussy willows, roses, maiden hair ferns, morning glories, tiger lilies, shamrock, and butterfly garlands. These last may be made by procuring the tissue garlands in pale shades, testoning them attractively and attaching a butterfly at each point where the garland is fastened, and at the lowest point of each loop of the festoon.

These flowers and many others may be procured at a reasonable cost already cut and tinted in assorted colors, ready to mount—leaves, wiring and everything necessary to work with, coming with them. Preparing these for active service is another delightful task for willing feminine fingers.

Stout, dust-proof boxes may be had for the asking and a written label placed on the end of each describing the contents. These will serve to protect and preserve the decorations not in use, and if they are cared for they may be used again and again in different combinations.

#### Clinching Your Selling Argument.

To go back to the butterfly window, however, the tonic in ample quantity and attractive arrangement should have the center of the window stage, and if it possesses such a name as Queen of Spring, or Waltman's Spring Tonic, a couple of show cards should tell what it is, for what recommended, and the price. Guarantee in. Money back if not satisfactory clinches many a selling argument. It eliminates the idea of risk, and makes the customer feel that you are pretty sure of the article recommended. The two or three who will take advantage of the offer will give double the value of the refund in free advertising, and are usually gained for steady customers.

The show cards are the salesmen, and should be concise and to the point, and easily read both as to style of lettering and size of type.

<i>Queen of Spring brings to you Health and Vigor from the heart of the Woodland</i>	<i>Why be so pale when Queen of Spring will make you rosy?</i>
<i>GUARANTEED. You are the judge. 50c. and \$1.00.</i>	<i>Why be listless when here is bottled courage?</i>
	<i>GUARANTEED. 50c. and \$1.00.</i>

As Easter egg dyes have but one season of usefulness it is well to give them a place in the Easter window. Papier-mache rabbits in various positions and from 12 to 24 inches high may be obtained, but if there is any one about the store who is handy with a brush or even a pen, handsome pasteboard rabbits with easel backs, long ears and shy pink eyes may be quickly made in any desired number or size. Near them place nests of colored eggs, resting in beds of Irish moss, or slippery elm sticks, and scatter the dye packages suggestively about, giving the connection between the rabbits and a cash sale.

#### Avoid Hideous Combinations of Colors.

The eggs ought to be but lightly tinted or the shades softly blended upon the shells with a brush. The nests of colored eggs usually displayed are simply hideous—deep purple, spotty crimson ones, and rank green. They are neither pretty to see nor appetizing to think about. The softer colors of dainty confections may be successfully followed. The spring tonic and Easter dyes are ample for a profitable window, rendered attractive by butterflies, flowers and rabbits. The outlay of money for decorations is comparatively little, and all of them may be used again and again if properly cared for.

Doves with wings which may be bent as if in the act of flying, can be purchased and a few of these in conjunction with tall, stately lilies and exquisite toilet accessories against a lavender background would appeal in an aristocratic neighborhood.

Owing to differences of size, shape and location, each window calls for individual consideration, which is well, for it encourages individuality. It is said that the time to write a Christmas story is Christmas day, and the time to market it is the day after Christmas. This is because the real spirit of the season is felt by the writer and not forced, and this quality is correspondingly recognized and appreciated by the literary purchaser. It is difficult to call up the true Christmas

spirit when the thermometer hovers in the vicinity of 100 in the shade, and the purchasing editor's interest is much more likely to be centered in fishing rod and reel than in poor little shivering children and generous Santa Claus.

The same thing is true of other business ideas. To be successful to their full limit of possibilities plans must be made ahead, and it is often difficult to feel the real enthusiasm of a distant holiday season.

#### A Stock-Book of Ideas.

An expenditure of 25 cents for a stout note-book in which are entered the new ideas of each season will prove a veritable treasure-trove when it comes to making arrangements for the same occasion next year.

Beginning with Easter, enter briefly all the bright business getting ideas which are observed first-hand or read about. I may be a catchy window display—consisting of a pasteboard automobile filled with beautiful flowers and rare perfume in handsome bottles; a particular style of show-card which pulled; the firm name of some especially salable line of Easter novelties—that firm is sure to have something equally good next year, etc.

Thanksgiving, Christmas, summer, winter, and so on through the calendar will all prove rich in suggestions for future use. The idea may be gleaned from a magazine cover, an inconspicuous article in a technical journal, the careful thought out success of a dry goods merchant or a wide-awake grocer, which principle can be equally well applied elsewhere. The inspiration for making a success of every season is constantly being stored up, in advance of the demand.

One soon learns the pleasure of being constantly on the alert for ideas and a practical means of applying them. A single idea has often meant a fortune. The compensations are many not only in the development of analytical observation, constructive ingenuity, and financial results, but in the habit of seeing the beautiful and the useful everywhere.

Although Easter is a somewhat movable feast, yet custom has decreed that it is the social dividing line between winter and spring. The wind-swept hillside is clothed in tender green, and the withered stalk sends forth new promises of beauty, why should not man pause and reflect what this renewal of life means for the individual ego?

There is one elixir not mentioned in our accepted authorities, and that is the elixir of life. It is composed of obedience to natural laws, faith in the future and each other, hope of ultimate victory, and charity for those who have never realized the beauty of the Easter of life—all these brewed in the crucible of an understanding heart.

#### University of Michigan School of Pharmacy.

ANN ARBOR, March 20.—Charles R. Eckler, B.S., formerly of the University of Michigan School of Pharmacy and who is now in charge of the physiological assaying in the Lilly laboratories in Indianapolis, has presented for competition to the students in microbiology during the present semester the choice of one of the following two sets of Eli Lilly & Co.'s products: Their set of authentic powdered drugs, authentic spices and condiments, and authentic starches; or their crude drug set, which includes 170 crude drugs and Lilly's drug cabinet.

—W. D. Munz, president of the '09 senior class, and Jorda, were awarded the nominations to membership in the A.Ph.A. and the first year's fees of \$5 which are given annually by Prof. J. O. Schlatterbeck and Walter H. Blome, of Detroit Mich., to the two seniors showing the most consistently proficient scholarship in pharmacology.

—W. E. Forsythe, Ph.C., '08, has been appointed assistant in physiological chemistry in the chemistry department of the College of Medicine and Surgery.

—Joseph A. Wolf, Ph.C., '07, has been made assistant in the hygienic laboratory and is now in charge of the municipal water analysis department in the College of Medicine and Surgery.

—E. A. Schmidt, special student in pharmacy, has been made assistant in the pathological technique department of the College of Medicine and Surgery.

—Fred W. Henderschott, Ph.C., '08, has accepted a position in the analytical laboratory of Merck & Co., New York City.

—William Francis Gidley, B.S., '08, is research chemist in the hygienic department of the College of Medicine and Surgery.

## The Short Bottle.

By Joel Blanc.

Before me upon my desk there rests a little time-stained book. Its leaves have taken on the tone of old ivory, its red leather binding is frayed at the edges and the corners have been worn by the fingers of Time. Seventy years ago a struggling young apothecary dotted down upon the pages of that book many of his passing thoughts, little dreaming that those notes within, yes, even the blank pages of that book would, nearly three-quarters of a century later, bring inspiration to me, his son.

In turning the pages of the book, one of the links which binds me in loving thought to the father who passed away before I was old enough to have his voice and image impressed upon my memory, I read the following: "Always test the capacity of a prescription bottle before filling. There are many short bottles."

Today, through improvements in the machinery used in glass manufacturing, there are few bottles of short measure; but many men are themselves surrounded by environments which are for them "short bottles." They are men who are confined, restrained, within unyielding, transparent and yet shackling environment. They are bottled up.

Although we cannot put a pound into a bottle which will only hold fifteen ounces, we can and we often do either put ourselves or permit others to surround us with an environment of less mental capacity than our own heads. The real boundaries of this environment are the men, or rather, the brains of the men who would hem us in. And let us not conclude that these men are of a necessity our superiors, for we must remember that a man may be held down from below as well as pressed down from above. Moreover, while we are all prone to blame others for that which we are ourselves alone responsible, it is a fact that many a man has gone from birth to death with his mental capacity left unmeasured solely because of the narrowness, the ignorance of others.

Now and then we learn of a case where the sudden death or other unforeseen event in the life of some man of position has fairly thrown his responsibilities upon the shoulders of a subordinate and, to our amazement, that subordinate, that unknown, that mere hireling, has not only risen to the demands of the moment and fulfilled them, but he has risen higher and done better than his former superior ever did. Such cases are those of bottled-up men being suddenly freed by breakage from without. It may sound well to say that the bottled-up man should have broken his prison from within, but let us not forget that the necessities of those dependent upon him may have deprived him of sufficient elbow room to strike a blow. Again, he may reason, and who can blame him, that his superiors will at last awaken to the fact that the prison in which they would keep him deprives them of the service which he is competent and willing to give.

Nothing creates so many of these mental "short bottles" in the drug business or in any other activity as the fear on the part of employers that the least encouragement of a servant will prompt that servant to demand more pay. What weak, what idiotic reasoning! Will any man acknowledge that he is going to pay a servant more than that servant earns? or that he desires to pay his servants less than they earn? Can one have confidence in a clerk who will knowingly work for less than he is worth? Is it possible for one who is such a fool as not to know what he is earning to earn what he is receiving? Not unless he is a mere plodder, a mere machine depending for every initiative upon the brains of others. That would you think of an engineer who would refuse to supply sufficient oil to his locomotive because it did not squeak for more or because the oil might make it wear too long? Would you not say that the engine would either fail

to make its schedule or run away with its engineer?

How often I have heard business men say: "He was a good clerk, but he wanted more money than I could afford to pay, so I had to let him go." No man ever gets too big for his business. No clerk ever gets too big for his employer's business unless he is bigger than his employer. If the business does not grow as fast as the clerk grows it is because the employer cannot or will not develop. In the majority of cases if the employer would realize the clerk's capacity and let him use it for the sake of the business instead of trying to keep him in a "short bottle," he would never have to make the shameful confession that the clerk was worth more than himself, for such the above quotation virtually is.

One of the greatest faults of employers is that, while declaring the employed overrate their capacity, they, the employers, overtax their own abilities. How common it is for us to hear a druggist complain that he has to see to everything and do almost everything. He may be, probably is far superior to his clerk in general ability, but his method, his self-confidence leads him to a lack of confidence in his clerk. As a result, he not merely tries to keep his clerk in a short bottle, but much of the time he uses to do things he believes the clerk cannot do, is actually wasted or spent in a vain effort to hammer the cork into the short bottle from which a part of the clerk is still sticking out.

What would you think of a druggist who accepted fifteen and sold eighteen ounces to the pound? You would say that he was either short-sighted or foolish. Well, in a similar manner many druggists fail to realize the capacity of their clerks. A druggist has an eighteen-dollar clerk and a three-dollar boy. There is only three dollars' worth of three-dollar work for the three-dollar boy to do, and there is twenty-five dollars' worth of twenty-five-dollar work for the eighteen-dollar clerk to do. But the druggist, instead of being a sixty-dollar man and making and doing sixty dollars' worth of sixty-dollar work for himself, gives twenty-five dollars' worth of his own sixty-dollar time to do twelve dollars' worth of the twenty-five-dollar work, thereby leaving only thirteen dollars' worth of the twenty-five-dollar work for the eight-dollar clerk to do. As a result of such methods and because the druggist fails to appreciate the capacity of his eighteen-dollar clerk to become a twenty-five-dollar man doing twenty-five dollars' worth of twenty-five-dollar work, he lets the three-dollar boy do two dollars' worth of three-dollar work and pays the eighteen-dollar clerk nine dollars to do one dollar's worth of three-dollar work, "just to keep him busy." As a mathematical problem you might take the figures and calculate just how much it costs such a druggist to keep his clerk in a "short bottle." It also explains why so many drug businesses never grow larger than they were when first started.

Now for the other side, for the men in short bottles who do not try or do not know how to help themselves. Much of man's capacity is a latent force and for two reasons. The first is lack of self-confidence and the other is over-confidence. The man who is in a short bottle and does not know it is guilty of a lack of self-confidence. He may be conscious of the fact that he is capable of better performances, but he lacks the self-confidence which would spur him to dare and to do. His conscience tells him that he can do higher things and yet, there is within him a negative voice which whispers of possible failure. Oftentimes this inward voice is but the echo of discouragement from those around him. For such a man there is little hope for help from without. Self-confidence will never come to him until he can look straight at possible failure and see himself passing through it to the heights above. The history of the most successful men of every age, the men whose capacity has startled the world, is, in nearly every case, the history of a man who failed, once at least.

As for the over-confident man; he merely misuses his capacity. He dares and does, but he keeps himself in the short bottle by attempting to do things which are beyond his capacity and in this neglecting to do the things which would utilize his real power to the limit, he jumps to things far above him, only to repeatedly fall back to those which should be far beneath him.

Are your boundary lines of usefulness and duty circumscribed? The answer to the question may be supplied by attempting to find out your own capacity through analysis of your environment and yourself.

No woman would buy "invisible face powder" if it was.

## Seasonable Hints for Druggists.

### Easter Ideas.

As the world grows kinder, so also do many people grow narrower. During the last few Easter seasons there has been considerable unfavorable newspaper comment upon the exhibition of young live chickens and rabbits in store windows. As these expressed opinions must be the echo of the words of the people, it would appear to be wisdom for druggists to abstain from making such exhibits in the future. On the other hand, the world has never shown greater extremes between the religious and the non-religious than at the present time and window trimming of a character relating to religious subjects has evoked much critical and unfavorable comment. To such an extent has this criticism been carried that it would seem wise to omit the direct display of religious pictures and emblems in the arrangement of Easter windows. In making displays calling attention to this church festival, however, a distinct and yet conservative line may be drawn. To the majority of people a cross entwined with Easter lilies would prove unobjectionable in a display, where they would criticize the use of a crucifix for a similar purpose.

### A Window of Dyes.

Make crepe paper ribbons of a half dozen or more brilliant, contrasting colors. (See recent issue of ERA for instructions for making ribbons.) Bunch the ends of these ribbons and tack to the center of the window ceiling. Take each ribbon in hand separately and twist to a spiral. When each one is twisted tack its hanging end to the floor at either back or side of window, the object being to form a brilliant tent or

canopy. From the same center of the window ceiling suspend, by a thin red ribbon, a large white egg, so that it will hang within the canopy.

### How to Make the Egg.

Take two disks of thin wood, one six inches, the other three inches in diameter. Next take pieces of light barrel hoop and make three hoops of six, eight and twelve inches in diameter. Now take a number of strips of very thin, pliable wood or heavy, springy cardboard, each strip being about 20 inches long. Tack the ends of these strips around the wood disks so that they form a cylindrical cage. Slip the six inch hoop between the slats of this cage, turn the hoop to a horizontal position so as to extend the slats, and force it downward toward the three inch disk of wood. Then take the eight inch hoop, place it within the cage and force it towards the six inch disk, following in a similar manner with the 12 inch hoop which is to form the largest circumference of the egg. It will be seen that the adjustment of the hoops is a matter of judgment and that when all are in place the cage will have taken the form and proportions of an egg. When all hoops are in place assure permanency by gluing them in position, which may be done by running a glue brush over the hoops where the strips touch them. Cover the form thus made with crepe or other white paper. Bunch or mold the paper at each end so as to avoid showing the flatness of the disks. Egg forms of this nature may be used for various decorative purposes during the Easter season. Beneath the suspended egg arrange dyes, as taste may suggest.

### The Resurrection.

This display was thus called by the druggist who used it, although the name is but partly expressive. The ceiling,

back and sides of the window were heavily draped with black crepe paper and the floor was covered with crimson paper. Crimson tissue curtains fell over the glass from the top of the window and were looped aside with wide ribbons of black paper, at about one-third their length from the floor. Silver paper stars were fastened thickly over the black ceiling drapery and they extended, in gradually decreasing number, about half way down the sides and back.

A heavy, smooth, wooden cross four feet high and thickly covered with clear white paint, stood in the center of the window floor. Around the cross were twined in spirals artificial leaves and Easter lilies.

This simple display attracted much favorable comment from the intelligent and artistic observer and its impressiveness was probably increased by the fact that no merchandise or signs were in the window. It was simply an artistic tribute to the sentiment of the season—and none the less, a good advertisement. With such displays a little merchandise may be used without great disadvantage, if care is taken in the selection of it. A few pieces of cut glass, white candies in dainty dishes or paperettes in white or light boxes would not be inappropriate.

### Humpty Dumpty Circus.

About three dozen eggs were selected, the shells pricked and their contents blown out. The eggs were those of the bantam, ordinary hen and goose, the collection representing various sizes. The shells were treated with cold, brush dyes and pen drawing. Some humpty figures were produced by marking legs, trunk and face on some of the shells. Other figures were made by fastening on long, match-like legs joined to clumsy, big, wooden feet, while still others were made by using a small shell for a head and a large one for a trunk. The lightness of these shell acrobats permitted them to be placed and fastened in all sorts of outlandish "circus act" positions. The result was remarkably and ludicrously amusing. Dyes were exhibited in connection with the "circus."

### Easter Postal Show.

Six perfect barrel heads were procured. Four of these were nailed to a light board to form the upright of a cross, the two remaining heads being so attached as to form the arms. After the cross was made, each head or disk was covered with light blue crepe paper. Easter postals were then fastened to each disk so as to radiate from its center. Other postals were displayed upon the floor of the window.

### Easter Candies.

A Wisconsin druggist borrowed an incubator and placed it in his window. It was filled with chocolate and other candy eggs and the door left open so that the contents were visible. Over the incubator hung a sign reading: "They won't hatch, although they are all pure and fresh. Quality and price considered, our Easter candies are beyond competition with other goods." A general candy display was made in connection with the above.

### Beating Columbus.

In the center of a general display of dyes, candies and Easter gifts, stood the following display: A pencil was fixed firmly in an upright position to the floor of the window, on the upper end of it was a penny and upon the penny, balanced upon its small end, was an egg which tremulously rocked back and forth. The penny was glued to the pencil, the egg had been blown, some mercury dropped in and the perforations closed with plaster of Paris. The vibrations of the building kept the egg trembling. Above this hung a sign lettered thus: "We have Columbus beaten to a frazzle."

The year before, the same druggist displayed a bottle containing an egg of which the circumference was much larger than the opening in the bottle. The egg had been boiled very hard and then soaked in vinegar until it became so elastic that it could be elongated and forced into the bottle, when it at once returned to its original shape.

### "Purely Vegetable Dyes."

A unique exhibit consisted of a collection of natural vegetables, such as potatoes, turnips, carrots and so on, which had been first coated with glue sizing and then fancifully colored with egg dyes. A sign informed the observer that: "Our Easter egg dyes are non-poisonous, purely vegetable dyes, and this display proves it."

Like likes like. If you would be prosperous, look so.

# Original and Selected

## ANALYTICAL WORK BY RETAIL DRUGGISTS.\*

By John Coleman, of Wheeling, W. Va., Treasurer of the N.A.R.D.

Aside from a full realization of the great honor conferred on me in an invitation to speak to the students of the Pittsburg College of Pharmacy, there is a degree of pleasure in my being here that I surely would not care to miss.

I have been invited to speak to you on the chemical and bacteriological laboratory which became a part of the retail drug establishment of John Coleman Company, Wheeling, W. Va., but a few years ago.

Some years ago the thought occurred to me that aside from a monetary standpoint a chemical and bacteriological laboratory should furnish means of an interesting study of the drugs and chemicals that were bought and dispensed in our store

complete in its appointment for the purpose.

The next step was to inform the physicians of this innovation, and so notice was sent to every physician in Ohio County as well as in some of the adjoining counties, explaining our new idea, and inviting their inspection of the laboratory. Of course, solicitations were made for their work when requiring thorough and dependable examination of urine, qualitative, quantitative or microscopic, the examination of the blood, sputum for bacilli of tubercle, pus for gonococci, etc.

The response was gratifying, proving the soundness of our judgment in the establishment of this laboratory and the desire of physicians to recognize its advantages in their profession. Compliments we received galore, and business, too.

Though this department is considered a side line in our pharmacy, it has quickly become a leading feature. The laboratory represents an investment of \$500 and has paid us a handsome interest on this amount. It has done more than this, it has gained a prestige and a renown for our store among physicians and public alike of a value to our business not to be reckoned in dollars and cents.

Food, water and milk are brought to us by the laity for a chemical and bacteriological examination, which proves the

*John Coleman, Wheeling, W. Va., Bacteriological and Chemical Laboratory in the Pharmacy of John Coleman Company.*

I also knew that there was a demand for analytical and chemical work from the medical profession as well as the general public. Boards of health were having the city water analyzed, private people were having their well water analyzed, hospitals and physicians were having urine analyzed, etc. I thought that such a department would be, perhaps, profitable, and put our pharmacy on a very much higher plane.

Of course, I won't deny that the thought of profit entered into the calculation, and the success of the venture proves the value of our foresight in the establishment of this department in connection with our other various departments.

Our intimate association with physicians for many years told us how greatly they would appreciate the value of competent, positive and exhaustive analysis of urine, sputum, blood and pus, in the intelligent diagnosis of obscure diseases; work which the busy practitioner does not find the time to perform, nor have the costly apparatus with which to work.

A room was provided expressly for this purpose of suitable size, 14x16 feet, light, bright and protected, and fitted completely with every new and necessary appliance for the plainest or most complex work. Here are located the incubator, steam sterilizer, hot air sterilizer, delicate analytical balance, centrifuge, stills, condensers, a modern powerful microscope, and a complete list of U.S.P. reagents. Nothing was overlooked, and no expense was spared, and no opportunity missed to make it

public benefit of this work in the absolute proofs that are not physically discernable.

In relation to our pharmacy itself the laboratory is of vital importance in the examination of drugs and chemicals. Standards of purity demand freedom in drugs from adulteration, and the agencies of the U.S.P. reagents, the microtome, and microscope provide an easy and absolute method of determining if drugs and chemicals come up to the U.S.P. standard. The fact that we are fitted for this work gives a guarantee of purity and results to physicians and patient that redounds to our professional credit and with profit.

There are physicians, some in our own town, who do their own urine, sputum and pus analysis, also the staining of pathological specimens. To these doctors we sell the necessary stain, culture mediums, reagents, test tubes, etc. The busy physician finds this a convenience and he appreciates the dependable, fresh quality of the stains or culture mediums, which are made according to his views, if he expresses any in the matter.

The manufacture of culture media of every kind is an important feature in our laboratory, and in connection with a big stock of sterilized test tubes, and other paraphernalia we can provide the physician with means to conduct his own examination very acceptably. These are additional sources of income directly from this new laboratory.

We supply gratis to physicians a sterilized cotton swab sealed in a test tube for procuring a culture of diphtheria

\*Read before Pittsburg College of Pharmacy students.

bacilli in suspected cases. With the return of this swab to our laboratory we inoculate the blood serum media, place it in our incubator, and in 18 to 20 hours the specimen is ready to examine to determine the growth of this bacillus.

In many large cities, and I believe in your city, where the work is done by the Board of Health, this convenience is not always at hand, and the appreciation of such a laboratory, as we have connected with a pharmacy, called for the practitioner's best efforts toward its support.

Our chemical laboratory is not, of course, to be confounded with our fully equipped and completely stocked and supplied pharmaceutical laboratory, where all U.S.P. and N.F. preparations are made, with the exceptions of some fluid extracts. We make our own pharmaceutical preparations; we do not buy them except in the case of the fluid extracts before mentioned. We know how to make them, what they are made of, and the physicians accept them with a guarantee of ethical perfection.

Thorough investigation has divulged a remarkable state of affairs in this country, in that the average pharmacist, spending time, money and energy in his acquirement of pharmaceutical education, receiving that through instruction in operative pharmacy for which our colleges are noted, then going into business only to overlook the wonders of the profession they have learned, and content themselves with buying—not making—the preparations they use in their stores. Ask any druggist why they do this and they say, "Oh, I can buy cheaper," where, in truth, a druggist's knowledge of medicines and method of manufacture, with mighty little experience in a commercial sense, should tell him he cannot buy such preparations as cheaply as they can be made by himself.

At the present time, over this entire country, physicians and pharmacists are getting together for the purpose of correcting certain evils that have come between the two professions. One of these evils that has received more attention than any other is the prescribing by physicians of patent nostrums for their patients instead of the ethical preparations of the U.S.P. and N.F., to the detriment of the patient as well as the pharmacist.

In the city of Wheeling we have had several such meetings of the two professions with good and telling results. At one of the meetings I read a paper on this very subject and stated that I had carefully gone over our prescription file twenty years ago and found that only 8 per cent of the prescriptions written called for proprietary articles, the average cost being 40 cents. In contrast with this at the present time 23 per cent of the prescriptions call for proprietary articles at the average cost of 65 cents each. Some called for two and three and even four proprietary articles.

What does this mean? First of all, in the eyes of the public it means that they are paying 65 cents for each prescription instead of 40 cents. The second notable fact is that doctors are getting out of the habit of writing real prescriptions. The third remarkable fact was that the druggist himself was not being called upon to prepare very many real prescriptions, in other words, real prescriptions were becoming obsolete.

When these facts were given to the medical profession at the meeting the doctors were astounded; they were so much wrought up about it, that the character of their prescriptions was greatly changed. They are going back more and more to real prescription writing.

They are not prescribing as much as they were of the proprietary article which they happen to know about. They are back to first principles, and are prescribing regular drugs and are depending upon the druggist to properly compound them.

Let the druggist exert himself to co-operate with, to stand by and back the doctor and the breach at present upon will be closed. Let the druggist enter to the doctor, to give him the medicine he wants for the results he expects. Let the druggist at the start look rather to the ethical condition than the commercial prospect. However the latter will follow.

I can well imagine how some druggists would so quickly say: "Oh, yes, your theory is fine, but if I followed it I'd wind up in a failure." Now let me say that the John Coleman Company is not a failure. We know it. We did not accomplish this to the detriment of our ethical intentions, but by the simple process of reaching out—expansion—if you wish. We cry "quality" continually and then maintain it.

When we want more business, truthfully more money, we add another line of goods to our stock, or another department to our establishment, and if our judgment is good, as in the case of the chemical laboratory, why, we win.

## BOOK REVIEWS

**NEW AND NON OFFICIAL REMEDIES.** Articles which have been accepted by the Council on Pharmacy and Chemistry of the American Medical Association, prior to January, 1909. Chicago: Trustees of the American Medical Association. Paper, 25¢; cloth, 50¢.

This is the first regular edition of the Annual New and Non-official Remedies, and it contains a list of over 200 of the remedial preparations approved by the Council on Pharmacy and Chemistry of the American Medical Association. Instead of adhering strictly to an alphabetic arrangement a classification has been adopted which permits an easy comparison of remedies of similar origin and properties. Mixtures are to be found in the appendix and a number of non-proprietary preparations have been added which, for various reasons, have not been admitted to the Pharmacopoeia. The descriptions in the appendix have been made as brief as possible and the articles are classified under the names of the manufacturers. Therapeutic indications are not given, as it is assumed that the physician is able to apply his knowledge of the pharmacologic properties of the ingredients without aids from either the Council or the manufacturer. The non-proprietary remedies admitted to the body of the book appear accurately described.

The descriptions of processes of preparations, chemical and physical, and of the physiologic action contain much information which cannot fail to be of value both to physicians and to pharmacists.

**REVENUE LAW INFORMATIONER.** A handy book for ready reference for dealers operating under the revenue laws of the United States, wholesale and retail liquor dealers, brewers, cigar dealers, druggists, etc. By Charles O. Walden and Don E. Mowry. Dealers' edition, 16mo. 152 pages; full cloth, \$1. Milwaukee: Walden & Mowry.

This book will stand the most critical scrutiny and its brevity will appeal to the average business man who has neither time nor opportunity to peruse the Revenue Laws and Regulations for the information he actually needs to safely and properly carry on his business. The essential facts are stated, however, and the druggist will find this a most useful book. The subject matter is presented in six chapters under the following titles: Liquor Dealers, Wholesale Liquor Dealers, Brewers, Dealers in Cigars and Tobacco, Druggists, Miscellaneous Information.

**"BACKBONE."** Hints for the Prevention of Jelly Spine Curvature and Mental Squint. A straight-up antidote for the blues and a straight-ahead sure cure for grouch. Collected from various sources and arranged by S. De Witt Clough, Ravenswood, Chicago. Published by the author; price, 50¢.

This is a collection of trite sayings and expressions of sentiment on various phases and views of human life, mostly in a humorous strain and of just the character to restore the mental equilibrium when one has an attack of the blues. A wide field of literature has been drawn upon to supply these epigrammatic sayings and if some of them do not cause the pessimist to sit up and take notice then we shall miss our guess.

**ANNUAL REPORT OF LEHN & FINK'S Analytical Department for 1908.**

This report bears all of the internal evidences of careful scientific work and this wide-awake and progressive firm will lose nothing by putting before its patrons and others the results which have been obtained by its chemists in testing so many of the products sold through the jobbing trade. Material of this character should prove serviceable to the Revision Committee of the Pharmacopoeia in its efforts to establish standards for that work.

### New Books.

**NAGEL, OSKAR.** The mechanical appliances of the chemical and metallurgical industries; a complete description of the machines and apparatus used in chemical and metallurgical processes for chemists, metallurgists engineers, manufacturers, superintendents and students; with 252 illustrations. New York: Oskar Nagel, c. 7-331 p. diags. 8°, cl. 82.

**OWEN, F. A., and Standage, H. C.** The dyeing and clearing of textile fabrics; a hand-book for the amateur and the professional. New York: John Wiley & Sons, c. 6-253 p. 12°, cl. 82.

## SNAPSHOT OF PRESCOTT CLUB, COMPOSED OF PHARMACY STUDENTS IN UNIVERSITY OF MICHIGAN.

ANN ARBOR, March 20.—Only members took part in the last meeting of the Prescott Club. A. W. Linton presented a very interesting paper on acetyl salicylic acid. He endeavored to prove that aspirin and acetyl salicylic acid, although prepared by different processes, were identical. A. L. Turner, assistant in mineralogy to Prof. E. H. Krause, added some valuable substantiating evidence by comparing the measurements of the crystals of each preparation and showing that they belonged to the same class.

F. L. Shannon presented a biographical sketch of the life of William Beaumont and touched most particularly on Dr. Beaumont's study of the gastric juice of man. A. N. Banerjee spoke on "Pharmacy in India." According to Mr. Banerjee, two schools of pharmacy and medicine prevail in his native land: the old school, which has existed as long as India itself and whose followers are only taught by apprenticeship, and the new school, which uses the British Pharmacopoeia and is only a modification of present European methods.

Joseph A. Wolf outlined the "Michigan Method of Water Analysis." E. F. Ingram, Jr., enumerated the current events of the past month, and C. M. Krebs treated the subject of scientific progress. The next meeting of the club will be held April 2, when J. W. T. Knox, of Frederick Stearns & Co., Detroit, will present an address, "Wanted a Man." Mr. Knox intends to tell what kind of young men are wanted in the manufacturing business and what is wanted of them.

### BRILLIANT FUNCTION OF BOSTON CHAPTER.

#### Literary and Musical Programme Followed by Reception and Tea in Honor of Women's Club Guests.

Boston, March 19.—The most brilliant and successful meeting of Boston Chapter No. 1, W.O.N.A.R.D., was held yesterday afternoon at the Hotel Vendome. The special guests of the day were the officers of the Massachusetts Federation of Women's Clubs, with which Boston Chapter is allied, and also the presidents and secretaries of other federated clubs in Boston and vicinity. In addition to these guests, the programme included literary and musical numbers, in which Mrs. George A. Hibbard, wife of Boston's mayor, took part.

Mrs. Adelaide M. Godding, the president, presided. One of her novel features of the programme was a paper by Mrs. Charles L. Cottrell on "The Bells in Music, Verse and History," which gave opportunity for readings by Mrs. Hibbard, and songs by Miss Alice Lancaster and Mrs. H. A. Austin. eo Andrews, the accompanist, also played a piano solo.

A reception and tea followed. Mrs. McIntire, chairman of the hospital committee, was assisted by Mrs. Arrington in the general arrangements. At the tea table, which was decorated with pink roses and white lilacs, Mrs. W. D. Wheeler, Mrs. Charles H. Davis, Mrs. W. H. Henderson and Mrs. A. W. idder poured, while Mrs. Charles Hubbard and Mrs. L. W. riffin served frappé. Mrs. Charles A. Stover had charge of the entertainment. The ushers were Mrs. James F. Finneran, Mrs. Frank F. Ernst, Mrs. E. H. La Pierre, Mrs. J. A. Moore and Mrs. R. A. Richardson.

#### Arranging to Entertain Visitors From Washington.

PHILADELPHIA, March 20.—The Philadelphia Branch of the Ph.A. has practically completed its plans for the entertainment of Washington Branch April 6 at the College of Physicians. The regular meeting will be followed by a reception and luncheon at the Hotel Walton and it is expected that there

will be a large number in attendance. Among the visitors who are expected to speak will be Dr. Lyman L. Kelder, whose topic will be "Some Work of the Drug Division of the Bureau of Chemistry"; George W. Hoover, Chief of the Drug Inspection Laboratory, who will discuss "Supervising the Importation of Drugs"; Dr. Murray Galt Motter, whose address will be upon the organization and work of the Hygienic Laboratory at Washington. Martin I. Wilbert will also participate in the discussion, as will C. S. Brinton, C. H. La Wall and C. H. Kimberly.

#### Shorter Hours Campaign Not Within Their Province.

St. Louis, March 20.—The St. Louis Chapter of the W.O.N.A.R.D. has decided that the campaign for shorter hours in drug stores is not within the regular scope of social work and as their organization is primarily social, that campaign will be dropped. As substitutes for the energy that had been accumulated for that work, there will be a encheir at Martin's Hall, 922 Manchester avenue, the owner of which is a druggist, and Mrs. Martin is quite active in the association, and a dance in April, the further arrangements for which will be completed at a later meeting. The only settled facts about the dance are that it will be in the evening and will include luncheon and the admission will be \$1. It will be the first bid of the ladies to the druggists for support. Mrs. A. R. Schen and Mrs. C. M. Streeter are new members and the prospects are for an excellent increase of membership by the end of the fiscal year.

#### Busy Week for Chicago Members of the W.O.N.A.R.D.

Chicago, March 22.—Chicago Chapter, W.O.N.A.R.D., was particularly active last week. The monthly meeting had a long programme of recitals, songs and readings by members, and this was followed by a short business meeting. Plans for the yearly election were made. Over 75 members and guests gathered at Northwestern University building Friday for a card party. Executive board will meet March 23.

# QUESTION BOX

THE OBJECT of this department is to furnish our subscribers and their clerks with reliable and tried formulas, and to discuss questions relating to practical pharmacy, prescription work, dispensing difficulties, etc. Requests for information are not acknowledged by mail, and ANONYMOUS COMMUNICATIONS RECEIVE NO ATTENTION; neither do we answer questions in this department from non-subscribers.

In this department frequent reference is necessarily made to information published in previous issues of *The Era*. Copies of these may be obtained at 10 cents each, except a few issues which are out of print, for which we charge 25 cents each.

## Kidney and Liver Pills

(R. F. L.)—Many of the remedies for liver complaints are also recommended for derangements of the kidneys. Here are some formulas:

(1)

Grind to a coarse powder.	
Liverwort .....	4 ounces.
Jamaica dogwood .....	1 ounce.
Conch grass .....	4 ounces.
Gaultheria .....	2 ounces.
Mix and percolate with a mixture of.	
Alcohol .....	32 fl. ounces.
Glycerin .....	12 ounces.
Water .....	32 fl. ounces.

When the menstruum has ceased to pass through add enough hot water to make one gallon of mixture, in which dissolve one ounce of potassium nitrate.

(2)

Fluid extract of buchu .....	3 fl. ounces.
Fluid extract of dandelion .....	3 fl. ounces.
Fluid extract of juniper berries .....	2 fl. ounces.
Fluid extract of pareira .....	2 fl. ounces.
Fluid extract of stone-root .....	2 fl. ounces.
Potassium acetate .....	3 ounces.
Simple elixir .....	to 32 fl. ounces.

(3)

Hepatica .....	1 ounce.
Hydrangea .....	1 ounce.
Scoparius .....	1 ounce.
Apocynum cannabinum .....	1 ounce.
Triticum .....	1 ounce.
Hot water to make .....	10 ounces.

When cold add,

Potassium nitrate .....	320 grains.
Alcohol .....	3 ounces.
Dextrose syrup .....	3 ounces.

Fluid extracts may be substituted for the crude drugs in this mixture, in which case the alcohol should be omitted, and the proportion of water reduced to 5 ounces, instead of 10 as above, the remaining ingredients being left the same.

## Ichthylol Ointment.

(Subscriber).—“Recently I filled a prescription for unguentum ichthyolus, 10 per cent; about three weeks later the prescription was renewed. On receiving the new supply the patient noticed the difference in its color and that of the balance of the original lot. He took it to his physician who claimed that the ointment was mixed improperly. If you will kindly publish in your columns any information regarding the above question that will be of benefit to me I will greatly appreciate the same.”

We cannot account for the criticism made by the physician on the appearance of the second batch of ointment unless it may be that by undue exposure to the action of light the ichthylol assumed a different tint. On exposure to the atmosphere ichthylol will thicken and set like varnish; this may be noticed when a drop is left on the side of a stock bottle. This thickening is usually accompanied by a slight change in color and it may be that a similar change has caused the appearance of the ointment criticized by the physician. We have no knowledge of the formula used in making the ointment, but a number of years ago considerable difficulty was reported by

compounders in that they were unable to secure a non-separable ointment. One formula which has been recommended as overcoming this difficulty is the following:

Ichthylol .....	8 ounces.
Water .....	8 fl. ounces.
Adeps lanae .....	16 ounces.
Petrolatum .....	20 ounces.

Mix the ichthylol and water and then incorporate the wool fat, the petrolatum being added last. Heat is best avoided in making the ointment. If used at all it should be very slight, and the ointment should be rubbed up until it is perfectly cool and smooth. As a general proposition ichthylol should only be prescribed in neutral solutions or mixtures for it is decomposed in the presence of acids or alkalis.

## Mimeograph Ink.

(F. V. K.).—“Does any reader of *THE PHARMACEUTICAL ERA* know of a practical working formula for ink for mimeograph machines? An answer to this request will be of value to hundreds of your readers and if replies are received you will be giving the trade a great service by publishing them.”

We publish F. V. K.'s request and trust that some of our readers may be able to supply the information.

## Cooper's Alum Ointment.

(S. F. H.).—“Can you furnish an approximate formula for Cooper's alum ointment, credited to Sir Astley Cooper, of Norwich, Eng.? A stated formula gives ‘alum comp. (?)’, phenol, ichthylol, zinc oxide, aromatic and antiseptic oils, petrolatum and animal fat.’ This enters the market as the proprietary ‘ungentine.’”

We are unable to find a formula of the character outlined in any of the literature and reference works at our command. The only information we have concerning the composition of the proprietary ointment is that given in the literature sent to physicians by the manufacturers to the effect that it is “an ointment composed of alum, with the irritating properties of the drug eliminated, carbolic acid (2 per cent), and ichthylol (5 per cent), combined with pure petroleum bases.”

## Driving Ants Away.

(Dr. J. M. W.).—A most efficacious means of getting rid of ants is spraying their resorts with crude petroleum. Two thorough sprayings usually suffice. To destroy ants' nests on lawns the use of carbon disulphide is recommended. A little of the disulphide is poured into the openings, which are then closed up by stepping on them with the feet. The volatile vapors of the disulphide will penetrate the chambers of the nest and if sufficient has been used will kill not only the adult insects but the larvae as well. Of course, this treatment is not suitable for indoors.

For spraying around a house where ants infect, the following solution has been recommended:

Cape aloes .....	½ pound.
Water .....	4 pints.
Boil together and add,	
Camphor gum .....	4 ounces.

We know of no better authority on entomology than the experts connected with the Bureau of Entomology, U. S. Agricultural Department, Washington, D. C.

## Dissolving Argyrol.

G. W. Burrington, Detroit, Mich., writes as follows: “I have an idea which I think will be of considerable interest to the prescription department and that is, how to make the most efficient and quickest solution of argyrol. The method mostly used is that by trituration, but the greatest objection to it is that the argyrol gums to the mortar and pestle and takes time to dissolve. A still slower process is by shaking the bottle until the substance is dissolved.

“My method is to rub the argyrol until it is a powder, then pour the desired amount of water in a graduate and gradually stir the powder in the water until dissolved. With this method the argyrol does not gum up and dissolves in an incredibly short time.”

## Wasted No Time.

“The manager says he engaged forty chorus girls in twenty minutes.”

“Gracious, but he's quick at figures.”

## PERSONAL MENTION

—F. B. ROSS, of Chariton, Iowa, has gone to Lethbridge, Canada, where he has accepted a position.

—PROF. JOHN URI LLOYD, of Cincinnati, was a visitor in New York City for several days last week.

—LOUIS DOHME, president of Sharp & Dohme, Baltimore, was a visitor in New York City for several days last week.

—A. H. SEELEY, of Canon City, Colo., who recently made an assignment, has resigned the office of mayor and will move to Denver.

—L. A. ENGLE, of Eleventh and Brooklyn streets, St. Louis, has gone to Mexico and the Pacific Coast for a six weeks' health trip.

—F. T. DUDLEY, proprietor of the Red Cross Pharmacy, Ithaca, N. Y., is preparing to move into a new home which he has purchased.

—MAILTON N. KLINE, of Philadelphia, head of the Smith, Kline & French Co., was a caller in the New York wholesale trade last week.

—H. T. MILLER, of Philadelphia, announces that he will leave Shoemaker & Busch, of the same city, after a service of 15 years with that firm.

—G. W. BENNETT, of Tallahassee, Fla., has gone to Selma, Ala., to take charge of the prescription department of the V. D. Young Drug Company.

—DR. WILLIAM GALE, of Westfield, N. J., this month completed 40 years in the drug business. After leaving the Navy in 1869 he settled in Westfield.

—NATHAN A. COZENS, secretary of the Philadelphia Association of Retail Druggists, is confined to his home on account of illness following a heavy cold.

—FRANK J. HOEY, of the Gazzallo Drug & Chemical Co., Chicago, has bought an automobile and is now calling on his trade in a new Maxwell car.

—PHIL J. HARTLEY, of the Red Lilly sales force in Massachusetts, recently returned to his territory from a week's visit to the home offices in Indianapolis.

—H. R. SAUNDERS, head of the promulgation department of Parke, Davis & Co., has returned to the New York branch of the firm after a week's trip to Detroit.

—W. B. KAUFMAN, of the importing department of Parke, Davis & Co., has returned to the New York branch after enjoying a few weeks' vacation in Florida.

—LOUIS MAY, of Yonkers, N. Y., is planning an extensive trip abroad to include a large portion of central and northern Europe, and visits to Paris, London and Berlin.

—GEORGE P. BERTSCH, of the Bertsch-Shurtz Drug Company, Oskaloosa, is prominently mentioned for appointment to the vacancy on the Iowa State Board of Pharmacy.

—NORMAN JOHNSON, who has been employed in Brown & Hooft's drug store, Charlottesville, W. Va., will probably pitch for the Winchester base ball club during the coming season.

—E. C. TRACY, of Waverly, N. Y., has decided to accept the nomination of the Citizens' Committee for president of the village. The local papers speak in high terms of his candidacy.

—DR. A. R. L. DOHME, of Sharp & Dohme, Baltimore, has returned home from his recent cruise in southern waters. Dr. Dohme reports a very pleasant time and feels greatly benefited by the rest.

—J. W. OHLMAN, representative of Parke, Davis & Co. at Sioux Falls and vicinity, slipped on the ice last week and was laid up for nearly a week with a broken wrist and severe body bruises.

—G. JOST, a sundry salesman for Bruen, Ritchey & Co., of New York, is preparing for his spring trip to the South and will leave for those parts this week. Mr. Jost expects to return about July.

—JOHN SULLIVAN, who had been engaged in the drug business for several years in Chatsworth, Ill., recently moved to Missoula, Mont., for the purpose of engaging in the occupation of fruit raising.

—C. M. PEACOCK, who recently sold his drug business in Owosso, Mich., to E. P. Roberts, of Bannister, claims to be the oldest druggist, in point of service, in the county. Mr. Peacock had been 40 years behind the drug counter and was

obliged to retire only on account of ill-health. He may enter some other business.

—FRED L. CARTER, of Boston, president of the National Wholesale Druggists' Association, was a caller in New York City last week while en route to Florida, where he will spend a few weeks' vacation.

—DR. W. H. MARTIN, of Amarillo, Tex., who represents the Red Lilly in northwestern Texas and southern New Mexico, recently returned from a week's visit to the home office of Eli Lilly & Co., Indianapolis.

—JOSEPH JACOBS, of Atlanta, Ga., last week visited his son, S. S. Jacobs, who is a member of the senior class of the Philadelphia College of Pharmacy. The father was graduated in 1879 from the same institution.

—CLARENCE T. ARBOTT, formerly of Boston and a graduate of the Massachusetts College of Pharmacy, but more recently in California, has become the manager of the pharmacy of E. Schneider & Co., in San Diego.

—WILLIAM G. FRAZER, manager of the post card department of the American News Company, New York, is away on a five weeks' trip, during which time he expects to visit 15 of the company's important branches.

—E. O. CRISWELL, formerly manager for Samuel B. Davis, at Thirtieth and Ritter streets, Philadelphia, has decided to start in business for himself and has purchased the store of W. H. House, at 29th and Wharton streets, that city.

—SCOTT R. LINGENFELTER, of Danville, Ind., with a party of friends, while duck hunting recently on the White River, almost lost their lives through the capsize of a boat. All were drenched, their shotguns were lost and \$50 in the druggist's pocket disappeared.

—J. H. BARLOW, formerly Pennsylvania representative of the N.A.R.D., but now acting in that capacity for the Philadelphia Association of Retail Druggists, with his wife, is receiving the congratulations of their friends upon the arrival in the family of a little girl.

D. M. PENICK, president and general manager of the Strother Drug Company, of Lynchburg, Va., is slowly recovering from the injuries which he received some time ago by being crushed in an elevator, as reported in the ERA. At one time it was feared he would not recover.

—WILLIAM A. PERKINS, proprietor of the Prattville Pharmacy, in Chelsea, Mass., has been drawn on the Suffolk jury which is trying the "craft" case of ex-Alderman George H. Battis, of Boston, one of the notable cases growing out of the investigations by the finance commission.

—F. D. FULLER, chief chemist for the Department of Agriculture of Pennsylvania, is being congratulated by his friends upon his appointment by Secretary of Agriculture Wilson to the position of chief of the cattle-feed and grain investigation laboratory of the National Department of Agriculture.

—G. M. HIPPEE, of Des Moines, Iowa, who recently celebrated his golden wedding, went to that city from Camden, N. J., in 1859 and engaged in the drug business. He prospered and became a banker, later identifying himself with various corporations. Mr. Hippee is now 78 years old and his wife, who also was born in New Jersey, is 70.

—ALBERT FLAUT, head of Lehn & Fink, New York City, presided at a farewell dinner given to Oscar Straus, the retired Secretary of Commerce and Labor, by the Fremdschaft Club last Thursday evening. Governor Hughes was a speaker at the feast and received an enthusiastic ovation. Dr. William J. Schieffelin, president of the Citizens' Union, also delivered an address.

—ADOLPH ZIEFLE, former assistant in pharmacy under Prof. A. B. Stevens in the University of Michigan School of Pharmacy, and who for the past two years has been assistant professor in pharmacy at the University of Kansas School of Pharmacy, has resigned to accept a similar advanced position at the School of Pharmacy of the North Dakota Agricultural College. Mr. Zieffle was employed as State Food and Drug Chemist in Kansas and will continue this work in his new field.

—EDWARD MOHLER, who looks after the store of Charles Rehfuess, of Philadelphia, while the latter is absent in the interests of the various pharmaceutical organizations of which he is either an officer or a committeeman, was obliged to give up work for several weeks on account of his health. His condition showed marked improvement after a visit to Atlantic City and he expects to be able to return to duty in the course of a few days. Mr. Rehfuess finds 17 hours day after day a bit too strenuous.

## PRESIDENT DIAMOND ON PHARMACY BILLS.

Head of New York State Pharmaceutical Association Criticizes the Action of Manhattan Ph.A. for Not Participating in Conference of Locals and Then Endorsing Another Measure.

Peter Diamond, president New York State Ph.A., writes as follows about Manhattan Ph.A.'s recent meeting:  
*Editor The Pharmaceutical Era:*

I have watched with keen interest the attitude of the pharmaceutical press toward legislative agitation within the past few months and am glad to see the clear, precise and proper stand your paper has taken in the controversy. From all over the State I have received assurances that the pharmaceutical associations will support the State association in the position that body is taking in legislative matters, particularly since we have discussed these matters fully at a conference at Albany early in January, to which all local pharmaceutical associations were invited and in which most participated, and at which conference we have received the unanimous consent of all present to proceed with such amendments to the pharmacy law as the legislative committee of the State association will deem wise, but, by all proper means to keep pharmacy from all political and party influences, and to oppose all legislation that might tend to make the board partisan, dominated by district leaders and office holders.

In view of all this, the action taken by the Manhattan Association, or, better, by the six out of the eleven members at the meeting of that association last Monday, is unwise, improper and not for the best interests of the retail pharmacists or of the people at large in this State.

Particularly do I take issue with Mr. Diner for urging the Manhattan Association to support the Conklin Bill, knowing full well that our bill is before the Governor and being fully aware of the provisions of our bill, with which I have taken care to acquaint him.

The interest Mr. Diner is exhibiting in the Conklin measure, coupled with his various communications to me with reference to the same, almost from the day of its inception, leads me to believe that Mr. Diner is really the father of the measure, and if he were only to acknowledge it frankly the mystery of the situation in which the Manhattan Association finds itself would be cleared. Mr. Diner, or any one else, has a full right to act as he desires, but frankness in the premises is the least the Manhattan and all other associations may expect at his hands. His anxiety to bring some association or somebody to the support of the bill is something he may owe Mr. Conklin for introducing it. At an interview I had with Mr. Conklin soon after the bill was introduced he assured me his bill would receive the support of a pharmaceutical organization. Perhaps he referred to the Manhattan! Surely the officers and members of that association knew nothing of it, nor have they instructed the chairman of their legislative committee to draft and introduce a new pharmacy bill.

The Conklin Bill of today is a weak effort of one entirely unfamiliar with pharmacy, its history, progress and requirements and to ask an association to endorse it on a plea that it will be amended, vouching for its then correct shape and completeness, is, in my opinion, *prima facie* evidence that the bill originates with Mr. Diner and properly should be styled "The Diner Bill."

I shall not attempt now to draw comparisons between the Conklin measure and the one drafted by the New York State Pharmaceutical Association, for it seems to me premature to discuss our bill before our final conference with the Governor. Suffice it to say that it meets the views of our executive in as far as it is consistent with the dignity of our profession and is a safeguard against becoming another source of political patronage under the motto that "to the victor belongs the spoils."

I invoke the aid and confidence of the pharmaceutical press and of every pharmacist in this State in this most eventful struggle to retain the prestige it took us years to establish. The State association, to which we have for years entrusted the guarding of our interests in this State, has proven worthy of the confidence and I assure every one today this association is as proud of that faith and as jealous of its prestige as ever.  
New York, March 18.

PETER DIAMOND.

A hearing on the Conklin Bill is set for March 30.

## INDIANA'S SANITARY FOOD LAW STRINGENT.

New Provisions Bars Diseased Persons From Being Employed in the Preparation of Food—Soda Fountains Are Included and Practical Tests Will Be Made by Experts.

INDIANAPOLIS, March 20.—Dr. H. E. Barnard, State Food and Drug Commissioner, in a heart-to-heart talk with the *ERA* correspondent, spoke of the legislation of the Indiana General Assembly which has just adjourned.

"The new sanitary food law," said Dr. Barnard, "is the most far-reaching and valuable piece of food legislation passed since the Federal law."

"It provides for the sanitation of all food-producing establishments, all vehicles used in transporting foods, and that the food distributing agencies, such as the grocery store, the meat market and the confectionery. The soda fountain is included under the operation of the law."

"The bill provides that every person who has anything to do with the production, preservation or distribution of food products must himself be healthy. The old laws have said that an employer of labor should not knowingly engage a diseased person. The new law says that he shall not allow, permit or suffer any person to work in any way in connection with the production, distribution or transportation of food who is tainted with any contagious or infectious disease."

"No legislation has been enacted that would class tobacco with either foods or drugs, so this department will have no control of the manufacture or sale of tobacco or cigars. The bill provides that all persons who handle material from which food is prepared or the finished product shall before beginning work and after visiting the toilet wash their hands and arms thoroughly in clean water."

"It is provided that where cuspidors are used they shall be thoroughly emptied and washed daily with disinfectant solution and that five ounces of such solution shall be in the cuspidor while in use. We thus make the cuspidor an agent for destroying bacteria instead of spreading it. Persons are prohibited from sleeping in rooms where food is prepared or sold. This also applies to restaurants."

"In order to determine whether or not there is any truth in the statement of soda fountain proprietors that it is absolutely necessary for them to use preservatives in their crushed fruits and fruit juices, we are now installing in this department here in the State House a modern soda fountain of the iceless type manufactured here in Indianapolis by the Marietta Glass Company, by which we shall conduct an exhaustive series of experiments with every kind of soda fountain supplies."

"We propose to determine how long crushed fruits and fruit juices will keep without preservatives, under sanitary conditions of handling and refrigeration."

"In the East the highest priced man in the drug store is in the soda water department. In Indiana, with few exceptions, the fountain is in charge of young boys, poorly paid. So far as I know, this fountain will be the first put up in a State Health Department for the scientific study of soda water in its relation to the public health. We shall determine questions of temperature best adapted to the keeping of crushed fruits and syrups; the density of sugar syrups best adapted to fountain uses; the best methods of protecting crushed fruits from dust, flies and dirt while on the dispensing counter. We shall put a competent chemist in charge of the work and associated with him a practical soda fountain man."

### New Store for Uptown Apartment District.

A. G. Yeomans, president of Reid, Yeomans & Cubit, and W. L. Snow, until recently manager of the Riker store at 456 Fulton street, Brooklyn, have leased for 12 years the corner store in the Washington Irving apartment at Broadway and 151st street, New York City. They will use the premises for a drug store, which it is intended to open about May 1, pending the completion of the building. All fixtures will be the latest in design and no expense, it was said by Mr. Yeomans, will be spared in making the store as up-to-date and in keeping with the location as possible. There are over 200 apartments in the block, which is in a strictly residential district. A feature will be a handsome soda fountain. Mr. Snow will be the manager of the new store, while Mr. Yeomans will devote his efforts chiefly to the store of Reid, Yeomans & Cubit in Nassau street.

## SENIOR CLASS AND MEMBERS OF THE FACULTY OF THE PHILADELPHIA COLLEGE OF PHARMACY.

PHILADELPHIA, March 22. The senior class of the Philadelphia College of Pharmacy, numbering 128, of whom seven are young women, is the first class to enter the college and complete the course since the prerequisite law went into effect in Pennsylvania. The class has elected the following officers: President, J. H. Allan, Baltimore; vice-president, H. W. Eakle, Hagerstown, Md.; secretary, Miss Helen F. Loughlin, Norwood, Pa.; treasurer, Ralph T. Hunter, Altoona, Pa.; executive committee, Clarence Stoner, Lock Haven, Pa.; William Ferron, Salt Lake City, Utah; Frederick J. Kehn, Dubois, Pa.; John A. Gory, London, Ohio; Mitchell Bernstein, Philadelphia; reporters, F. Gannon Ebner, Sandusky, Ohio; C. E. Hoffman, Philadelphia.

Examinations in the regular course are now over for the senior class and the members are beginning the supplementary course in technical microscopy, commercial training, food and drug adulterations, dispensing and prescription work.

The work on the annual publication of the senior class, *The Graduate*, is well under way and reflects credit upon J. H. Allan, ex officio chairman and treasurer of the publication, and the editor-in-chief, Charles S. Herron, of Dubois, Pa. Associate editors are E. L. Kelly, Elmira, N. Y.; F. G. Ebner and Miss Helen F. Loughlin; business manager, D. L. Honok, Indiana, Pa.; assistants, D. L. Haler, Chambersburg, Md.; J. A. McCann, Greenwich, N. Y. The book is dedicated to Prof. Henry Kraemer and a unique feature is its description of the various members of the class according to the manner of describing botanical specimens and drugs. It will contain 250 pages, the pictures of the individuals, college and class organizations as well as the history of the class throughout the course.

Under the auspices of the senior class, a permanent Southern Club has been organized which promises to become an even more important factor in years to come. J. H. Allan is president; J. E. F. Hicks, Goldsboro, N. C., is vice-president; J. H. Allen, Savannah, Ga., secretary, and S. S. Jacobs, Atlanta, Ga., treasurer. At a banquet at the Hotel Majestic, the famous old Confederate colors were a prominent feature

in the decorations. Prof. Alfred E. Heinberg, who is an honorary member, acted as toastmaster, and the embryo pharmacists proved themselves most efficient after-dinner speakers.

The Whitall Tatum Company entertained the senior class at its glass factories at Millville, N. J. The trip was made in a special train from Camden and was highly enjoyable and instructive. After the visitors had been shown through the various departments, a luncheon was served. Prof. J. P. Remington presided, others also made short addresses and by no means the smallest feature of the occasion were songs by the class. Several other trips of this character to nearby manufacturing establishments are scheduled.

The Athletic Association gave a highly successful play and dance at Mercantile Hall March 18 for the benefit of the organization. Under the direction of its president, Henry S. Godshall, the association has enjoyed the most successful year from the standpoint of activity and support in the history of the college. On March 20 a largely attended inter-class athletic meet was held at the Central Y.M.C.A. gymnasium.

The inter-class dance given at Lulu Temple was an important factor in encouraging the social spirit in the college as well as in bringing the classes in closer touch with each other. It marked an epoch in college history. More than 200 students and their friends attended.

Early in April the weekly botanical classes for the senior class will commence under the direction of Professor Kraemer.

#### Sold Laudanum for Toothache, Charged With Homicide.

J. Jacobellis, a druggist at 38th street and Ninth avenue, Borough of Manhattan, New York City, was arrested recently on the charge of homicide, and held in \$1000 bail for examination before Coroner Acritelli. Mr. Jacobellis, it is alleged, sold a few doses of tincture of opium in a cup to a woman who wanted it for toothache. The woman died the day following the sale from pulmonary congestion and oedema, which, according to the coroner's physician, were produced by the laudanum. The hearing is scheduled for next Monday morning.

## SIMON N. JONES PRESIDENT LOUISVILLE R.D.A.

**Chosen at Annual Meeting of Association in Convention City—Physicians Invite Joint Meeting.**

LOUISVILLE, March 20.—The annual meeting of the Louisville Retail Druggists' Association was held at Bruen's Hotel on Wednesday night. While the attendance was not as large as usual, this can be accounted for because the notices for the meeting were not delivered until the morning of the appointed time. The following officers were elected for the ensuing year: Simon N. Jones, president; F. V. Simms, vice-president; Ben F. Sauter, secretary; William Voteler, treasurer.

The report of the secretary showed that about 80 per cent of the retail druggists in the city had paid both local and National dues. The treasury is in a flourishing condition.

An invitation was received from the Jefferson County Medical Association (composed of almost the entire medical profession in this city and county) requesting the druggists' association to use its rooms for a meeting place in the future and referred to a committee. A request was also received from the same organization requesting the association to prepare and place on permanent exhibition in its room a line of U.S.P. and N.F. preparations. This proposal was readily acted upon and will be promptly complied with. There exists the utmost harmony between the doctors and druggists and this will be productive of great benefit to the retailers in pushing the N.F. propaganda in this city.

## Big Whisky Dealer Enters Drug Business.

CHATTANOOGA, March 20.—Randolph M. Rose, W. L. Friereson, Lewis M. Coleman, C. Manasse and F. Manning have filed an application asking a charter for the Rose Drug Company. The capital stock of the corporation is set out as \$100,000 and by the terms of the charter application the business of wholesale and retail drug dealers and manufacturers will be carried on. The principal offices and factories will be located in Chattanooga.

Randolph Rose is one of the best-known business men of Chattanooga. He is at the head of the immense whisky business which bears his name and has its principal office in this city with branches in New York City, Jacksonville and elsewhere. Mr. Rose was one of the first men engaged in this business to announce, following the passage by the Tennessee Legislature of a State-wide prohibition bill, that he would not leave Tennessee, but that he would remain here, placing his capital and abilities in other channels.

## To Sell Human Hair and Electric Cooking Utensils.

BOSTON, March 20.—The Riker-Jaynes Company, already operators of eight drug stores in Boston, and planning to open another on April 1, have just made an enlargement to the store at the corner of Washington and Bedford streets. The entire second floor, with an area of 2600 square feet, has been added. The space will be used for new departments, including human hair goods, the truss department, with a room for fitting, and a complete line of electric cooking utensils. This one store of the Riker-Jaynes Company carries 53 names on its pay roll, not including bookkeepers, as all of that work is done at the head office at Washington and Hanover streets.

## The Era's Classified Buyers' Directory.

One of the most important features of the ERA's Advertising Columns is the CLASSIFIED BUYERS' DIRECTORY. It offers to the druggist, jobber and manufacturer an unequalled opportunity to keep in touch with manufacturers of all lines of high class goods. Buyers of the drug trade are readily showing their appreciation of the value of this medium, and all manufacturers and jobbers should use these little, live liners for letting the buyers know that they are in business and the kind of goods they are selling. You cannot afford to miss the many good special offers that these advertisers are making.

## Druggists Invited by Rockland County Doctors.

The members of the Rockland County Medical Society are to hold their quarterly meeting at Suffern, N. Y., on April 7. They have invited the druggists of the county to meet with them and discuss the U.S.P. and N.F. propaganda campaign. Arrangements are under way to have several prominent speakers on the subject give views from each of the professions.

## TO PUSH PROPAGANDA WORK IN ST. LOUIS.

**President Renner Appoints New Committees for the Ensuing Year for Local Retail Druggists' Association.**

ST. LOUIS, March 20.—The first meeting of the S.L.R.D.A. under the new officers was held at the Southern Hotel March 16 with a good attendance, and a large proportion remained for the luncheon. At the adjournment, it was announced that in an effort to give some members an opportunity to attend for whom morning meetings were not convenient, the April meeting would be held at Mauger's Cafe, Washington avenue and Third street, where a private dining room had been promised with a Dutch lunch for the session.

President Renner announced the following committees:

Price Schedule: Executive committee and officers.  
Telephone: E. A. Bernius, chairman; Robert Thebus, George Hausen.

Entertainment: L. A. Seitz, chairman; J. C. Thumser, Charles Hahn, A. S. Ludwig and Frank Cloughly.

Grievance: Ernest Winkelman, Carondelet; Charles Hahn and J. Hasselbrock, North Side; Richard Kring and Henry O. A. Huegel, South Side; Martin Noll and E. M. Pirner, West End; L. A. Seitz and A. G. Enderle, Central.

Secretary William Busch has undertaken to push the propaganda for U.S.P. preparations and announcements were made as to the method of handling the correspondence to physicians whose names were supplied by druggists. Without special effort the collection of dues was surprising.

## Simple Appliances Used in Lecture on Assaying.

PHILADELPHIA, March 20.—An unusually large audience on Tuesday evening attended the lecture and demonstration in the post-graduate course arranged by the Philadelphia Branch of the American Pharmaceutical Association, which was held at Temple University. Dr. H. Evert Kendig, professor of the theory and practice of pharmacy at Temple University, was the lecturer and his subject was "Assay Processes, Their Uses and Practical Value." He introduced the actual work of assaying by telling of the original meaning of the word and the methods to which assaying was applied in ancient times, and the drugs which it was possible to assay and thereby determine their alkaloidal values, using in demonstration the simple appliances to be found in the stock or laboratory of nearly every drug store. He then took up the assaying of opium, belladonna, mercurial ointment and puerarin according to the methods given in the U.S. Pharmacopoeia. Concisely and clearly he showed each step and the results of each, the possibilities and the liabilities of failure. Upon motion put by Henry C. Blair, president of the local branch, a vote of thanks was tendered Dr. Kendig.

## Pi Theta Sigma of B.C.P. Holds Successful Dance.

The Gamma Chapter of the Pi Theta Sigma Fraternity of the Brooklyn College of Pharmacy held its second annual dance on March 16, at Pough Mansion, Brooklyn, N. Y. There was an unusually large number of members and guests present and over 100 couples were on the floor the greater part of the evening. After the first half of the programme, consisting of nine numbers of the latest popular dance music, refreshments were served. Shortly after midnight dancing was resumed and continued until 2 a. m. The music was furnished by an orchestra and the hall was decorated with pennants of the fraternity and the college, besides other flags and bunting.

A number of out-of-town people were present and the officers are delighted over the interest displayed by the members in turning out in such numbers and the enthusiasm that prevailed during the entire evening. The arrangements committee: Joseph A. Burman, chairman; Harvey O. Dietrich, Andrew H. Philip, Joseph F. Genaro and Edward Troy.

## Marriage Mentions.

R. E. NEWCOM and Miss Cora D. Shiffer, both of Coffeen, Ill., who were recently married at Hillsboro, went on a bridal trip to Philadelphia.

GABRIEL CRICAN, of Jenkins' Drug Store, Dayton, Ohio, was recently married by a minister at Covington. The happy bride was Miss Maud Waterhouse.

—WILLIAM NESSBAUM, well-known druggist, formerly located at Merrill, Wis., now at Elk Mound, Wis., was married on March 17 to Miss Via Du Fano. The wedding took place at Oconto.

**U. A. BROWN PRESIDENT OF LOUISIANA CLERKS.**

**Association to Establish Sick Benefits and Aid the Orleans Ph.A. in Pushing Propaganda Work.**

NEW ORLEANS, March 20.—Because of his having purchased the Audubon Drug Store, at 5214 Laurel street, W. J. Gagnet, who at the January meeting was elected president of the Retail Drug Clerks' Association of Louisiana, has resigned the position. Under the constitution of the association a member becoming a proprietor ipso facto ceases to be an active member of the association, but is eligible to honorary membership. It was under these circumstances that Mr. Gagnet, much to the regret of the members, relinquished the office which he had held only a short time.

U. A. Brown, prescription chemist of the Williams Pharmacy, was selected as the best man to succeed to the position of president. Mr. Brown has been a member of the association since its foundation, and is one of the most prominent prescription men in the city. He is a graduate of the Tulane Medical Department and was with the Orpheum Drug Store, formerly situated in St. Charles street. He was formerly secretary of the association and was also at one time its treasurer.

On account of the uncertainty of Mr. Gagnet holding office, several important movements which the association started at its annual meeting have been delayed, but now that the full corps of officers has been chosen and it is known that they will hold permanently, these matters will be taken up. One of the most important of these is the plan to establish a benevolent feature. At the present time there is a death benefit paid, but no sick benefit. At the annual meeting it was proposed to have a vote on the proposition of paying a weekly sick benefit of \$5. This matter has been well canvassed, but no final vote has been taken. It will come up at the next meeting.

Another movement started was at the March meeting, when it was proposed that the R.D.C.A. of La. assist the Orleans Pharmaceutical Association in its propaganda work. The plan tentatively proposed is that the local association undertake this work of education itself, and conduct a vigorous campaign among the physicians of the city to begin with, and later probably among the physicians of the whole State.

**A Druggist 42 Years.**

SAGINAW, Mich., March 20.—One of the most important business changes to take place here in years was the sale of the Prall Drug Company to Harry Dolson, of St. Charles, and his brother, John A. Dolson, of Saginaw. D. E. Prall, who retires from the retail business to devote his time to his other interests here, has been in the drug business for 42 years, starting as clerk for A. A. Funk. He is a graduate of Philadelphia College. John A. Dolson is a well-known pharmacist and is deputy county clerk. Calvin A. Wadsworth will remain with Mr. Prall in his other business interests.

**Damages for Burns Caused by Cleaning Fluid.**

BUFFALO, N. Y., March 20.—A verdict of \$504 damages has been awarded to T. P. Mulloney, who sued Edward A. Kingston for \$20,000. Mulloney claimed that the druggist failed to warn him of the inflammable nature of a glove cleaner and that when he tried to light a cigar the substance caught fire and severely burned his hands. A stay has been granted and Mr. Kingston will probably appeal.

**Bill to Make Manufacturers Pay \$1000 License.**

MADISON, March 20.—Wisconsin druggists are fighting with manufacturing druggists to prevent the passage of the bill in the State Legislature which provides that manufacturing pharmacists must pay a license of \$1000, which would be prohibitory. Little fear is entertained, however, that the bill will get through both houses of the Legislature, judging from the opposition which it is meeting.

**EASTERN PENNSYLVANIA DRUG MEN ORGANIZE**

**Berks County A.D.S. Club Organized After Enthusiastic Meeting With R. W. Dentler President.**

READING, Pa., March 20.—An enthusiastic and interesting meeting of the A.D.S. druggists of Eastern Pennsylvania was held at the Board of Trade rooms recently, when the Berks County A.D.S. Club was organized. Fifty persons were in attendance, including visitors from Pittsburg, Wilkes-Barre, Lebanon, Lancaster, Allentown, Shenandoah, Mahanoy City, New Holland and other cities.

Roy W. Dentler was chosen acting chairman. Speeches were made by the following leading druggists: Mr. Otis, Binghamton, N. Y.; Mr. White, Wilkes-Barre; Mr. Frailey, Lancaster; Mr. Morrill, Plains; Mr. Kazamas, Shenandoah; Mr. Timme, Mahanoy City; Mr. Bergey, Reading; Mr. Crutcher, Shenandoah, and Harry Kline, Reading.

After the speeches, setting forth the benefits derived from the A.D.S., the Berks County Club was formed, with these officers: President, R. W. Dentler, 633 Penn street, Reading; secretary, C. M. Hain, Fifth and Bingham streets; treasurer, M. Feather, 1018 Chestnut street. The club is organized to promote the best interests of the A.D.S. members and to be a help fraternally and socially.

JOHN V. EITEL,  
Re-elected President of the Columbus,  
O. Retail Druggists' Association.

**MUSIC, LECTURE AND FEAST.**

**Enjoyable Function for Pharmacists and Physicians in Capital City.**

WASHINGTON, March 20.—The District of Columbia R.D.A. gave an original get-together function on March 15. It was held in Carroll Hall and consisted of musical numbers and an illustrated lecture on Yellowstone Park.

Three musical numbers were rendered by Mesdames Weller and Mullen and Mr. Eaton. Their services had been courteously given at the solicitation of Druggist F. P. Weller. E. B. Thompson, who gave the lecture on Yellowstone Park, is a skilled photographer in the Government service. The truly beautiful pictures were of Mr. Thompson's taking and coloring and his descriptive talk proved that he was thoroughly familiar with the wonders of nature which the screen so vividly pictured.

On behalf of the W.R.D.A., W. P. Herbst, of the entertainment committee, presented Mr. Thompson with a handsome umbrella. After the regular programme President A. C. Taylor invited those present to adjourn to the parlors, where refreshments were served by the ladies of Washington Chapter, W.O.N.A.R.D. Many physicians and their ladies were present and all expressed their pleasure with the treatment received from their druggist hosts and hostesses.

**Mr. Eitel Re-elected President of Columbus R.D.A.**

COLUMBUS, O., March 20.—At the recent annual meeting of the Columbus Retail Druggists' Association John V. Eitel was unanimously re-elected president. Other officers chosen were: B. F. Lentz, first vice-president; C. P. Elder, second vice-president; Charles McElroy, secretary, and J. P. Michael, treasurer. The board of directors chosen is as follows: A. W. Kiler, J. L. Herpich, Alma Hatton, F. H. Umbenhaur and T. C. Haney.

A report was received from the committee having in charge the installation of telephones in the drug stores as pay stations. It was to the effect that over one-half of the retail stores are now supplied with pay booths and others are being rapidly installed.

**Tennessee Valley R.D.A. is Organized.**

DECATUR, Ala., March 20.—The Tennessee Valley Retail Druggists' Association was organized here recently and the following officers were elected: President, F. R. Beason, of this city; secretary and treasurer, D. Roger, of Hartselle.

## JACOB DINER'S VIEWS OF "INDEPENDENCE."

**Would Not Aid Secession From State Association, But is Opposed to "Boss Rule" in Legislation.**

In an interview at the request of Jacob Diner, following the recent meeting of the Manhattan Pharmaceutical Association, at which there was a hot debate over the Conklin and the All-State pharmacy bills, Mr. Diner declares that in the account of the meeting as published in the ERA of March 18, he was misquoted in the statement that "the association stand independent and not be governed by the State or any other association."

Mr. Diner dictated the following as representing essentially the meaning of what he said at the meeting:

"I am not advocating secession from the State Pharmaceutical Association, I am merely desirous of having the expression of the members on the vital points of the bill before us, namely: appointment by the Governor, examination by the regents and limiting eligibility to membership on the board to retail pharmacists. If the Manhattan Association instructs me to fight for these points I will do so, likewise will I oppose them if the instructions are to that effect. If the bill proposed or about to be introduced by the State Association embodies these points, provided the Manhattan indorses these points, I will stand for the All-State Bill or any other bill containing these provisions. I take it for granted that all should be independent enough to declare their views and be independent to define their position; on several occasions the Manhattan has stood alone and independent. The time has come to declare our independence from the boss rule of Dr. William Muir."

"I am a strong adherer of the State Association and consider that I have given sufficient proof of that fact on numerous occasions, and that I also believe in harmony, when in 1907, as a candidate for the Board of Pharmacy, at which time it was conceded by all sides that I was reasonably sure of winning, I called a meeting of the three candidates in the New York College of Pharmacy and there for the sake of harmony withdrew from the race and induced the other contestant also to do so, leaving Mr. C. O. Bigelow alone in the field."

"I maintain that too much stress has been laid on so-called harmony for the purpose of permitting one or two men to run matters pharmaceutical to suit themselves, rather than the large majority of retailers, and it is to be deplored that men who are on the board today will utilize their position for the purpose of influencing votes on important questions coming up before pharmaceutical associations."

## NEW BY-LAWS FOR N.Y. COLLEGE OF PHARMACY.

**Old Officers Re-elected With One Exception, Besides the Filling of a Vacancy in the Board.**

The annual meeting of the New York College of Pharmacy, Columbia University, was held at the college March 16. The chief business transacted was the election of officers, the regular ticket as prepared by the nominating committee being unanimously adopted, as follows: President, Nicholas Murray Butler; first vice-president, Charles F. Chandler; second vice-president, Herbert D. Robbins; third vice-president, William Jay Schiffelin; treasurer, Clarence O. Bigelow; secretary, Thomas F. Main; assistant secretary, Edward W. Ranyon; for trustees to serve three years, Thomas P. Cook, Arthur H. Elliott, Heinrich A. Harold, Albert Plant, George H. Hitchcock; trustee to serve one year, F. W. Schoonmaker. All were re-elected with the exception of Mr. Ranyon, who takes the place of Harry B. Foranson, and Mr. Schoonmaker, who will serve in place of Dudley T. Larimore.

The by-laws, as amended and revised by a special committee to make them conform to the charter and the regulations governing Columbia University, were adopted. Several communications were read and the death of several members announced, besides other business of a purely routine character. There was a large attendance and Professor Chandler presided.

## Flags Fly in Honor of Daughter's Arrival.

DETROIT, March 20.—Every flag on the laboratories of Frederick Stearns & Co. waved from the top masts all day recently in honor of a baby girl born to F. C. McLaughlin, president and treasurer of the big plant. The tale is his eleventh child, the rest of whom are boys.

## FIRST N.Y.R.D.A. BALL A BIG SUCCESS.

**Pharmacists Present From All Boroughs in the City. May Hold Similar Event Every Year.**

Over nine hundred people attended the recent entertainment and ball given by the New York Retail Druggists' Association at Palm Garden. There were present representatives of the trade and profession from all the boroughs of the city and the occasion provided a means for bringing together a large number of pharmacists, both socially and professionally.

The dance programme was preceded by an entertainment consisting of selections of instrumental music, singing and recitations, all the numbers being rendered in a most accomplished manner by professional talent. There were several encores and it was nearly midnight before the dancing commenced.

The grand march was led by the son and daughter of Jacob Goldblatt, president of the association, and following the first couple were the officers, members and friends of the organization. Music for the dancing was furnished by an orchestra of 12 pieces and dancing was enjoyed until after 5 a. m., with an unusually large number remaining until the last dance.

The stage was beautifully decorated with flags and flowers, and a feature that attracted considerable attention was the letters N.Y.R.D.A. hung over the stage and illuminated with electric lights. The affair was a success financially as well as socially and the members of the committee were all unanimous in their declaration that the success certainly warranted the holding of a similar event next year. The committee in charge consisted of the following members: Peter Diamond, chairman; Joseph Weinstein, Sol. Rosenthal and M. Levy.

## DEMANDS RESTORATION OF BUYING RIGHTS.

**Retail Association of Columbus Passes Strong Resolutions Regarding Relations With Proprietors.**

COLUMBUS, O., March 20.—At a meeting of the Columbus Druggists' Association, held on March 9, 1909, the following resolutions, read by A. W. Kiler, were unanimously adopted:

Whereas, The tripartite agreement was entered into about ten years ago for the purpose of protecting all three branches of the drug trade against aggressive price cutting on proprietaries; and, Whereas, The retailers on entering into the said agreement surrendered certain valuable direct buying privileges in the hope that the benefits accruing from this agreement would more than offset the values thus surrendered; and,

Whereas, The said tripartite agreement proved disappointing in that the principal benefits were absorbed by others than retailers; and,

Whereas, The courts have declared the said agreement in restraint of trade and enjoined the same under penalty, be it therefore, by the Columbus Retail Druggists' Association, in annual meeting assembled,

Resolved, That we demand a return of all the buying privileges surrendered by us when we entered into the tripartite agreement as a fair proposition, and as necessary if the letter and spirit of the Indianapolis injunction decree be lived up to in good faith by the parties to said agreement.

Resolved, That it is the sense of this body that proprietors should not in any manner discriminate against retailers by refusing to sell them, singly or collectively, at identical prices and on identical terms with any other buyers.

Resolved, That members of this association shall hereafter give preferential treatment to the goods of ALL manufacturers who not only protect the retail selling prices thereof, but who shall also accord to the retailers' interests the just buying rights that have reverted to them on the dissolution of the tripartite agreement by the Federal courts.

## Manufacturing Perfumers to Meet April 13-15.

The 15th annual meeting of the Manufacturing Perfumers' Association will be held on April 13, 14 and 15 in New York. The rooms of the Drug and Chemical Club have been selected for business sessions, while the banquet will take place at the Plaza Hotel. The president's reception will be held at Hotel Astor on the evening of the 13th, following an entertainment at the Astor Theater, where members and their friends will witness "The Man From Home."

## Gimbel Brothers Will Soon Have Store in New York.

Gimbel Brothers, the large department store concern, operating stores in Philadelphia and Milwaukee, have closed negotiations for the lease for a long term of a new \$4,000,000 building, which will be erected at once, in New York City. The store will be located on the west side of Broadway, between 32d and 33d streets, in what is known as the Pennsylvania Tunnel zone.

## UNITED DRUG CO.'S BOWLING TEAM WINS BOSTON WHOLESALE DRUG LEAGUE CHAMPIONSHIP.

Winning team: Left to right (standing), W. J. Snider, R. E. Hadley, J. A. Galvin; (sitting), C. W. Harrington, A. E. Smith (Captain), R. F. Haidin.

Boston, March 22.—The United Drug Company's bowling team won the championship of the Wholesale Drug League of Boston on Wednesday evening, and a big gallery of rooters saw the finish of the series. Between 200 and 300 persons crowded the spectators' space, more than two-thirds of whom were fellow workers of the winners from the Roxbury factory of the United Drug Company. The victory was secured by a lead of eight strings over the second competitor.

The series in the wholesale drug trade have proven among the most popular of all the leagues. The games started October 21, and have continued, with but a single interruption, every week. Wednesday evening has been the date, and the new Boston Alleys, at 167 Washington street, has been the place. Eight teams composed the league, as follows: United Drug Company, Eastern Drug Company, Gilman Brothers, Carter, Carter & Meigs Co., E. L. Patch Company, Hoagland-Curtis Drug Company, all wholesale drug houses, and Dean, Foster & Co., and Fox, Fultz & Co., dealers in druggists' glassware.

Rivalry has been strong throughout the series, especially between the United Drug and Eastern Drug Company, yet an omen of the victory for the former appeared at the opening rolls of the series, when the two teams met for the first time, and the former won two of the three strings. Carter, Carter & Meigs Co.'s team was a strong team during the first three months of the series, when it rapidly dropped behind.

United Drug won first prize, \$25, taking 65 strings and losing only 19. Gilman Brothers and Eastern Drug Company tied for second prize, \$10, each having won 57 strings and lost 27, and a roll off is to be arranged later to decide this point.

There is also a tie for third prize, \$5 for the highest individual string, Joseph Ryan, of the Carter, Carter & Meigs Co., and Mr. Brown, of Fox, Fultz & Co., being tied at 128. Richard Dick, of Carter, Carter & Meigs Co., wins fourth prize, \$5, for highest three-string total, with a record of 324 pins. He also holds the record for the highest single string, but under the rules preventing a member from taking two prizes, he elected to take this prize. How the tie between Ryan and Brown will be settled has not yet been determined. The fifth prize, \$5, for the highest average for the season was won by Frank J. Rostrom, of the E. L. Patch Company, with an average of 94. It is probable that the prizes will be awarded at a banquet which it is proposed to hold in the near future.

United Drug Company not only wins the championship, but on the night that the matter was settled H. J. Purple, retail advertising manager for the company, read a letter from the treasurer of the company, J. C. McCormick, in which the great pleasure of the company was expressed at the team's

success, and then as a further expression of this satisfaction each member of the team and the captain was presented with a \$10 gold piece as a souvenir. A further note was read from President Louis K. Liggett, expressing his appreciation. Great cheering greeted the letters.

The final standing of the teams was as follows:

Teams.	Won.	Lost.	Total Pinfall.
United Drug Company .....	65	19	27,764
Gilman Brothers .....	57	27	26,805
Eastern Drug Company .....	57	27	26,960
Carter, Carter & Meigs Co. ....	50	34	27,914
E. L. Patch Company .....	49	35	27,041
Dean, Foster & Co. ....	27	57	25,522
Hoagland-Curtis Drug Co. ....	18	66	24,963
Fox, Fultz & Co. ....	13	71	24,714

The officers of the league are: William H. Forbes, of the E. L. Patch Company, president; George W. West, of the Eastern Drug Company, treasurer; Lewis D. Thomas, of the Carter, Carter & Meigs Co., secretary.

Another drug league, composed of teams from the six Riker-Jaynes stores, and taking their name from the street number of the store, has held a series which has been running since late in November.

#### Mr. Laseoff to Have New Store on Opposite Corner.

Following a dispute over the amount of rent with his landlord, J. Leon Laseoff has shown his resourcefulness by leasing for a long term of years the property directly across from his present location. Mr. Laseoff will occupy the entire building. The location is on the northeast corner of Lexington avenue and 83d street, Manhattan Borough, New York City. There is hardly a store to be had in this neighborhood, which fact led his landlord, Mr. Laseoff asserts, to take an entirely too magnified view of values, so that it was swiftly becoming a matter of having to pay out all his profit as rent. On the new premises he will save 33 per cent on rent, with twice the amount of room. Alterations are now going on, so that the drug store can appear in a new dress about May 1. A liquid fountain will be installed. The laboratory and prescription department will be features.

#### Professor Bernius Will Erect a New Building.

St. Louis, March 20. Prof. E. A. Bernius, of Barnes College of Pharmacy, has bought the lot at Easton and Simple avenues, across the street from his pharmacy, and will at once build a \$12,000 brick building. He will provide a 40-foot front for his store and have another to rent, in addition to flats upstairs.

# LETTER BOX

## KENTUCKY DRUGGISTS DICTATE APPOINTMENTS

Governor Must Act on Recommendations of State Ph.A.  
As a Result of Active Organization Work.

Editor *The Pharmaceutical Era*:

In a recent issue of one of the pharmaceutical journals an entire page is devoted to an editorial upon "Legislative assaults upon the drug trade." The article gives in detail a number of bills that have been introduced in the legislatures of several States that if they should become laws, will surely add to the trials and tribulations of the retail druggists in those States. This article urges that the druggists should be on the *qui vive* and scan carefully the proposed laws. But the natural question is: What can the retail druggist do?

For five or six years the N.A.R.D. at its annual meetings and through reports of its executive and legislative committees have been urging the retail druggists to be more active in politics to take a more aggressive position in legislation. But this cannot be done without organization. Where the retail drug trade is organized as a fighting body—you might call it—no troubles arise, but unfortunately the States that have taken up the question of *thorough* organization are few in number, yet these few demonstrate the fact that they can secure favorable legislation or defeat inimical legislation, when they summon their forces to the fight.

Let us take some figures to show what can be accomplished by organization. The annual report of Secretary Wooten at Atlantic City showed that Illinois had the greatest number of associations affiliated with the N.A.R.D., then came Indiana and then Kentucky, and it is the work of the retail druggists in this State that this article will refer to particularly.

Kentucky, with its 67 associations (a greater number than exists in either of the much more populous States of New York, Pennsylvania or Ohio), can confidently assert that it has shaped legislation affecting the retail drug trade almost to their entire satisfaction. For years we labored under the same difficulties that some of the States are experiencing, but we confidently believe that there is no danger in the future.

We not only have the organization but we have the *system* for enforcing our just and reasonable demands. At each annual meeting of the Kentucky Pharmaceutical Association a legislative committee is chosen, one member of which resides at the capital, Frankfort. But this is not the end but only the fountain head of the system. As an auxiliary committee, one prominent and influential retail druggist is selected from each State Senatorial district as a member. Politics does not enter into this arrangement. The prosperity of the retail druggist and the freedom from unfair and unjust laws is the sole aim of this joint committee.

Results have shown conclusively that each member of this great committee can be depended upon for work when the occasion requires. The individual member knows his Senator, is on good terms with his representatives in the Legislature, and when he is advised that a letter to these important personages must be forthcoming, it comes, and is supplemented by as many other communications from other retail druggists in his section as may be deemed necessary. This is what organization can accomplish, what it has accomplished.

Our pharmacy laws are as nearly perfect as we could ask—the fee for registration enables the Board of Pharmacy to send inspectors throughout the State, protecting the licensed pharmacists and punishing those who are practicing pharmacy unlawfully. The fund supplies the means for punishing cocaine sellers as well as all other violators of the laws. The Board of Pharmacy is dictated by the Kentucky State Pharmaceutical Association, as this is a provision of the law, the members of the board *must* be recommended by the association and it is *obligatory* upon the Governor to appoint from the names thus furnished.

Our Pure Food and Drug Law is a model as far as permitting unjust prosecution of the retail druggist is concerned. No druggist can be prosecuted for the first offense, but after that, beware. We have one representative on the board that is appointed by the Governor to formulate the rules and regulations for administering the law and it is *obligatory* upon the

Governor to appoint the person selected by the Kentucky Pharmaceutical Association.

Let the druggists in other States get in line in this way. Let them not be continually looking for the immediate dollar but form themselves into associations, have an active retail druggist in each Senatorial district, and their troubles will not only be overcome but they can by their influence and by pulling together defeat any legislation that might, if enacted, prove injurious to their interests. The individual druggist is helpless, but combined the druggists are irresistible in State affairs. This is not theory. Any person who knows anything regarding pharmacy legislation in Kentucky can vouch for these statements.

Organization is the only protection, but organizations and associations cannot be maintained and made influential through good wishes and sympathy—it takes money—and just as soon as the retail druggists of the different States wake up to these facts and determine to support and be members of their National, State and local associations, pay their dues, then they will have a force and power in all legislation at their command and unwise and unjust laws can be prevented or defeated.

Louisville, Ky.

S. N. J.

## Drug Stores in Small Communities.

Editor *The Pharmaceutical Era*:

In regard to the questions submitted in the ERA, page 198, March 4, I wish to state as follows:

First: "Can you tell what size room would be necessary for a drug department in a store having a country trade of 3000 people?"

Country towns and villages in the United States in the majority of States are inhabited by foreign people. In order to decide what kind of a drug store to open in a small community one must be guided by the following: Owing to the fact that of recent years manufacturers of patent medicines advertise their medicines in the newspapers and periodicals in the United States in villages or towns of 400, as well as cities of 4,000,000 people, you will be asked for most of them. One old druggist who has been in business for over 40 years stated that to his knowledge there are 35,000 patent medicines on the market and you must choose from among them. In a farming town you will have to carry a stock of horse and other animal remedies, better colors, crude drugs, oils, etc.

In a suburb or factory town where people have lived in large cities you will have to carry a supply of many of the leading "heavily advertised articles," also the never advertised remedies known as "newspaper remedies," such as kargon, toris, mamola, etc.

In a town where foreign population predominates you will have to carry many of the remedies to which they have been used to, such as "Anchor Pain Expeller," Severa's Remedies," etc.

Second: "Would it be necessary to use more than one room?"

It is not necessary to use more than one room, unless one wishes to open what is known as a "general country store," but if it is to be used for a drug store, one room about 25x40 feet is sufficient. The room should not be less than 18x30 feet. In furnishing the store much depends on the following: If in a farming community or a factory town the furnishings need not be very elaborate, but if in a suburb of a large city one must furnish the store very much like they do in the city.

From practical experience the following method of furnishing small drug stores has been found sufficient: One 16-foot patent wall case; one 16-foot tincture case and drawers; one 5-foot clear case; one 5-foot waiting case or counter; one counter scale and weights, show globes, paper-rack, etc.; a 10-foot prescription section with working board, shelves and drawers is placed in the rear of the store; and about \$200 worth of prescription or laboratory appliances, such as mortars, funnels, graduates, spatulas, etc.

Third: "What is the usual salary of a registered druggist in the country?"

The ERA states that salaries vary a great deal from \$10 to \$35 per week. I wish to state that it would be advisable to employ a young man at a salary not less than \$20 per week, for one who works for \$10 is not competent to manage a drug store successfully. Start the clerk at \$20 and increase his salary in proportion to the increase in your business.

Pittsburg, Pa.

D. N. ROBIN.

## ETHICS OF SELLING ADVERTISED REMEDIES.

**Interesting Discussion of Dr. Wiley's Declaration Regarding Ambulant Druggists and Stationary Doctors.**

PHILADELPHIA, March 20.—One of the most interesting pharmaceutical meetings of the series was that on Tuesday at the Philadelphia College of Pharmacy, when the principal topic discussed was that introduced by the presiding officer, George M. Beringer: "Formulas for Medicines Which May Be Dispensed by Pharmacists." In the course of a recent address, Dr. Harvey W. Wiley declared in this connection that the physician should be an ambulant pharmacist and that the pharmacist should be a stationary physician, and it was on this statement that the discussion hinged.

"There are several difficulties," said Mr. Beringer, which confront the pharmacist along the lines of his acting as a physician and vice versa. The practical application must be extremely limited, in my opinion. In the first place, who is going to decide what is a minor ailment to which the pharmacist might administer, as has been suggested?

"Patrons will come in and ask for advertised remedies or patented articles as the result of their own diagnosis. To supply this demand, I do not believe is counter prescribing. It is a question whether or not the pharmacist is doing right when in case of calls of this character, he sells the cure-alls and other patent remedies of the nostrum class. I hope to see some way of controlling the sale of the latter by legislation either State or National. There should be some official who would not only pass upon the formula of these patented articles before they are advertised but upon the wording of their advertisements about to be published."

In the opinion of Franklin M. Apple, the druggist should confine his recommendations to the simple remedies on the labels of which the formula is given, supplementing this with the advice that if this remedy is not effective, the patient should return. Then, according to Mr. Apple, it would be apparent that the trouble was such as would not respond to simple remedies and the patient would be most likely to follow the advice of the conscientious pharmacist that a physician be consulted.

In the opinion of Harry C. Blair, the physician can stop this self-medication, but the druggist cannot. He said: "When our physicians take the patient and properly diagnose and then treat the case, then the condition will be met with, but when the medical man guesses, as he often does, the patient soon finds it out and is as willing to let the druggist do the guessing at perhaps less cost."

William E. Lee declared that he never recommended patent medicines of the secret formula class. "I tell them," he said, "when they ask what I think of the value of such articles, that I do not know anything about them, that I have them for sale and that the price is reasonable."

William L. Cliffe said that if the druggist would square himself with his own conscience, use good judgment and upright principles, he would not go far wrong in this line of work. He said that the only remedies sold in his store were those of the open formula.

Prof. Henry Kraemer expressed the belief that it was a mistake on the part of the Federal Government to give serial numbers to manufacturers of nostrums for their preparations.

Joseph W. England read a paper in which he gave a synopsis of the recent literature pertaining to "The Enzymes in Milk" and Prof. Henry Kraemer gave a talk and demonstration on methods of disinfection and the technique employed in the examination of sputum for tubercle bacilli.

The woman who wants "the cheapest you have" generally implies that it is for a poor relation.

## POSTAGE STAMP SALES BENEFIT DRUGGISTS.

**Students of Northwestern University Vote in Affirmative in Interesting Debate on the Subject.**

CHICAGO, March 22.—The Northwestern School of Pharmacy Association, at its meeting on Friday night, debated the propriety and the profit of druggists in selling postage stamps at their drug stores, with special stress on the question of whether these sales are of any benefit to the store. The subject was treated with a great deal of interest and the final decision was adopted: "Resolved, That under existing conditions the selling of postage stamps by drug stores is a benefit to the store."

A sharp running duel was made by the positive side of the question. One of the most valuable, and one that has not been brought into the picture, is that a stamp trade gives just what patrons to the store and gives a great impetus to that store. The advertising merits of having the druggist's name printed on the envelopes which enclose the stamps were brought out. This, it was stated, is of great value in keeping the names of toilet articles before the public. The final statement in defense of the stamp selling drug store was that it keeps the people in the neighborhood. The people who come into the store to buy stamps are more liable to have the place in mind when they need other articles in the drug stock.

Heldar Holderson, a wide-awake student from North Dakota, made the speech of the evening. He said that the greatest fault with the average druggist is that he sits down and waits for business. "If he would keep busy, perpetually at it, even if it was only at selling postage stamps he could be happy," said the speaker. "He would bring more people into his store. Let the people know that there is a drug store around the corner."

The graduation exercises of the Northwestern School of Pharmacy will be held on April 14. Those of the pharmaceutical chemistry class will be held June 9. Mr. Wooten says that both of these classes are exceptionally large this year.

## New Members for Phila. R.D.A.

PHILADELPHIA, March 20. The executive committee of the Philadelphia Association of Retail Druggists yesterday had the pleasant duty of acting favorably upon 22 applications for membership. This large number was the subject of considerable discussion and the cause for congratulation and much credit was given Chairman William A. Carpenter and F. J. Arstine, J. H. Bailey, Harry Swain, Nelson Fry, R. C. Hines, C. L. Danson, A. R. Hessle, H. C. Chapman, H. J. Schaeffer, J. B. Reynolds, Russell T. Blackwood, R. T. Knef, E. P. Stricker, of the membership committee, and also the designated Representative J. H. Barclay through their personal deliberations and called upon and urged their fellow retail druggists to join the organization.

Another important action was the passing of a resolution of endorsement of the one-board medical bill now before the Pennsylvania Legislature. It was decided to hold the next meeting of the association on the evening of April 2 at the Drug Club. A large attendance is expected. Recording Secretary N. A. Criss was confined to his home on account of illness and the duties of his position were attended to by Treasurer George W. Fahn.

## Leeches Imported From Sweden by the Peck.

MILWAUKEE, March 20.—Milwaukee still has use for leeches in the old-fashioned art of blood-letting, and to supply this demand Peters & Peck are importing the leeches by the pallet-ful from Sweden. A half thousand of these blood-sucking little worms are packed in about a peck of black dirt and it takes them an hour for about six months.

## Will Help Entertain at Quincy.

CHARLES A. BOEHME

President of the hotel committee of the Kansas Pharmacy and Druggists Association is Representative of Hartz & Halstead, of Topeka, Kan. He is secretary of the Quincy board in June pharmacists in its territory should come to him.

Sen. Fry, R. C. Hines, C. L. Danson, A. R. Hessle, H. C. Chapman, H. J. Schaeffer, J. B. Reynolds, Russell T. Blackwood, R. T. Knef, E. P. Stricker, of the membership committee, and also the designated Representative J. H. Barclay through their personal deliberations and called upon and urged their fellow retail druggists to join the organization.

Another important action was the passing of a resolution of endorsement of the one-board medical bill now before the Pennsylvania Legislature. It was decided to hold the next meeting of the association on the evening of April 2 at the Drug Club. A large attendance is expected. Recording Secretary N. A. Criss was confined to his home on account of illness and the duties of his position were attended to by Treasurer George W. Fahn.

## TARIFF BILL DEBATE BEGUN IN CONGRESS.

Drugs and Chemicals Schedules Show Reductions, But the Average Does Not Make Material Difference.

WASHINGTON, March 22.—Debate upon the Payne Tariff Bill has begun and will continue for several weeks in all probability. Now that printed copies of the bill are available it is found that there has been a great deal of averaging. Luxuries have been increased, necessities lowered and the result with reasonably normal trade is expected to be an increase in the customs revenues of \$11,666,748 annually. The average ad valorem proposed in the Payne Bill is 1.56 per cent greater than the present average under the Dingley Law. Schedule A, drugs, chemicals, oils and paints, shows the slight reduction in average of .34, practically one-third of one per cent.

It is considered here that as at present revised the drug schedules will make no material difference. The course of Congress will be watched with a view to action in case it becomes necessary to protect the drug trade interests. It is realized that the present bill is merely a draft which the House is likely to alter and amend before it goes to the Senate, where further alteration and amendment are certain to be made. Then there will have to be concessions by both branches of Congress before the measure is finally passed and sent to the President.

Among the more important of the proposed changes of interest to the drug trade are the following:

Perfumeries and toilet articles are advanced from 50 to 60 per cent ad valorem. Fancy soap is advanced from 15 to 20 cents per pound.

Oxalic acid has been transferred from the free list and a duty of 1 cent a pound imposed.

Coal tar dyes or colors now bearing a duty of 30 per cent are advanced to 35 per cent ad valorem.

## Proposed Reductions in Duty.

Boric acid, borax, from 5 cents to 2 cents per pound; reductions of 2 cents per pound are made on gallic and tartaric acids, borate of lime. Reductions of 50 per cent are made in the duty on salicylic acid, chloroform, fruit ethers, oils, or essences; peppermint oil, whitening and paris white, dry; lithiumate and chromate of potash and santolin.

Borate of lime and other borate material is reduced from 4 cents to 1½ cents per pound and from 3 cents to 1 cent per pound, according to the percentage of anhydrous boric acid contained.

Sulphuric ethers are reduced to 8 cents per pound; spirits of nitrous ether to 20 cents per pound.

Iodoform from 81 to 75 cents per pound.

Potash Chlorate of, from 2½ cents to 2 cents per pound.

Plasters—Healing, etc., from 35 per centum to 25 per centum ad valorem.

Sulphate of soda, or salt cake, or niter cake, from 81.25 per ton to 81.

Strychnia, or strychnine, from 30 cents to 15 cents per ounce.

Sulphur, refined or sublimed, or flowers of, from 88 per ton to 86 per ton.

Sulphate of ammonia, copperas, licorice, and cottonseed oil and croton oil are placed on free list.

Tannic acid or tannin, from 50 cents to 35 cents per pound.

Sponges, from 40 per cent to 30 per cent ad valorem.

Spices, which are now largely on the free list, are assessed an average duty of 30 per centum ad valorem.

## Contingent Tariff and Revenue Clause for Cocaine.

Contingent upon the speedy position of cocaine as regards Government regulation of some kind expected in the near future, one New York manufacturer has issued the following tariff and revenue clause which applies to the cocaine contracts which are now being made:

"In case of any change in, or construction of the tariff, or the imposition of an internal revenue tax, or other governmental action which will affect the price at which this contract is taken, the buyers to pay or receive any difference brought about by these changes."

## Seventh Term for Popular Up-State Druggist.

SARATOGA, N. Y., March 22.—George H. Whitney was nominated for member of the Assembly by the Republicans of Saratoga County, in convention here, today. Mr. Whitney is now serving his sixth term in the Assembly.

## CHARLES H. WOODARD CALLED BY DEATH.

Was Prominent as a Pioneer in the Wholesale and Retail Drug Trade on the Pacific Coast.

PORTLAND, ORE., March 20.—Charles H. Woodard, long and well known in Portland and prominently connected with the wholesale and retail drug business, died recently of apoplexy.

Mr. Woodard was born in western New York and came to this city in 1865. He was first employed with Hodge Califf & Co., a retail drug firm. When he started in business for himself he opened a retail drug store under the name of C. H. Woodard & Co., at Front and Alder streets, which at the time of the big fire was destroyed. He then opened a store at First and Alder streets and took into partnership Mr. Quiver, now deceased. His partnership with Lewis G. Clarke under the firm name of Woodward, Clarke & Co. was formed in 1880.

From 1885 to 1895 he was also engaged in the wholesale drug business under the names of Reddington, Woodard & Co., and later the Snell, Heitsch & Woodard Co. During this time he disposed of his holdings in the retail business and later sold his wholesale interests also and opened a surgical instrument store, which he afterward sold. During the past few years he had been giving his time to private ventures.

Mr. Woodard is survived by his second wife and a daughter by his first marriage, Mrs. F. O. Downing. The funeral was held from the Masonic cathedral.

## Herman H. Hackendahl.

MILWAUKEE, March 20.—Herman H. Hackendahl, secretary-treasurer of the Hackendahl Drug Company and president of the Milwaukee Druggists' Association, died suddenly of heart failure on March 16, aged 53. His sudden demise came as a great shock to druggists all over Wisconsin. He had left his store at 11 o'clock, apparently in good health. Fifteen minutes later he reached his home and was stricken soon after he had entered the house.

Mr. Hackendahl was a pioneer in the Milwaukee drug business. He established a pharmacy at Third and National avenues 35 years ago and has been in active business ever since. The present store at 607 Jackson street was opened shortly after and two years ago the first establishment was sold. He was born in Milwaukee and is survived by his widow, two daughters, three brothers and two sisters.

At the funeral the pallbearers were members of the Milwaukee Retail Druggists' Association, as well as personal friends of the deceased. They were Robert Dadd, William H. Barr, H. L. Schulz, Edward Schulz, George Kesten and Louis H. Kressin. Members of the association attended in a body and druggists from all over Wisconsin were present.

## Obituary Notes.

DR. J. A. ROGERS, retired physician and druggist, died recently of paralysis at Kenton, Ohio, aged 89.

C. A. TAYLOR, owner of the Taylor & Co. drug store at North Collins, N. Y., is dead, aged 60. He is survived by a wife, two daughters and one son, Eugene Taylor.

PAUL H. MALOCHEE, a well-known druggist of New Orleans, died recently of acute Bright's disease after a brief illness. He was 40 years old and leaves a widow and three children.

JOHN T. FLAVAN died suddenly of apoplexy at Phenix, Ariz., recently. For the last 20 years Mr. Flavan has represented Meyer Brothers Drug Company, of St. Louis, and the Richardson Drug Company, of Omaha, visiting practically every hamlet in the Rocky Mountains and making friends everywhere. He was 46 years old and leaves a wife.

## Boston Interests Busy in Detroit.

DETROIT, March 20.—That Louis K. Liggett, president of the United Drug Company, and his Boston associates will not be content, as far as their Detroit activities are concerned, with securing control of the Gray & Worcester drug store, is evident from the announcement made that they have purchased control of the Lorraine, in the Majestic Building.

The Lorraine is the city's most pretentious establishment in the way of a refreshment parlor and candy store. By the middle of April it will be transformed into a general drug store with candy, luncheon and soda features, such as characterize the other Gray & Worcester store.

## PATENTS.

Granted March 16, 1909.

- 915,116—Frank Rumrill, Boston, Mass. Bottle stopper.  
 915,273—Frank R. Daley, Parkersburg, W. Va. Domestic still.  
 915,349—Jesse L. Hitz, Chicago, Ill. Tooth brush.  
 915,400—Homer T. Yaryan, Toledo, Ohio. Process for removing turpentine and rosin from resinous woods.  
 915,401—Homer T. Yaryan, Toledo, Ohio. Process for purifying rosin.  
 915,402—Homer T. Yaryan, Toledo, Ohio. Process for the treatment of rosin.  
 915,435—Julius Heè and Olga Heè, Greenpoint, N. Y. Non-refillable bottle.  
 915,441—Arthur A. Johnson, New York, N. Y. Non-refillable bottle.  
 915,561—Thomas P. Curry, Danville, Ky. Capsule-filling machine.  
 915,581—Amos L. Forman, Philadelphia, Pa. Bottle crate.  
 915,633—Emerson R. Strickler, White Plains, N. Y., assignor to the General Chemical Company, New York, N. Y., a corporation of New York. Sodium sulfid.  
 915,646—Elmore J. Worst, Ashland, Ohio, assignor by mesne assignments to Frank C. Dormont, Detroit, Mich. Atomizer.  
 915,680—Oscar A. H. H. Kösters, Hemelingen, and Louis Otteman, Bremen, Germany. Process for the manufacture of amids of higher fatty acids.

The druggist who starts off by saying: "I don't know anything about it" sometimes takes an hour to tell what he does not know about it.

Copy of any PATENT or TRADE MARK, 10 cents.  
 Author of copyrighted work on Protective Trade Marks,  
 Food and Drugs Act, and Valid Patents.  
 G. H. DAVIS, Attorney, 908 G St., Washington, D. C.

## TRADE MARKS.

Published March 16, 1909.

- 33,058—Henry Solomon Wellcome, London, Eng. Class 6. Pharmaceutical preparations in which extract from pinus pumilio is the principal ingredient, for use as a stimulant and disinfectant for affections of respiratory organs.  
 34,906—Knoll & Co., Ludwigshafen-on-the-Rhine, Germany, Class 6. Medicine for effecting and increasing birth-throes and for use as a hemostatic.  
 38,154—Julia Colton, Newark, N. J. Class 6. Hair tonic.  
 38,345—Voigt & Co., Chattanooga, Tenn. Class 6. A laxative preparation.  
 38,517—Harry Matusow, Philadelphia, Pa. Class 6. A remedy for the relief of rheumatism, neuralgia, pleurisy, toothache, sprains, bruises, stiff joints, all local inflammations in any part of the body, skin affections, etc.  
 39,188—The Grasselli Chemical Company, Cleveland, Ohio, Class 6. Arsenate of lead.  
 40,317—Joseph T. La Baume, Lake Charles, La. Class 6. Remedy for skin diseases.

## Fierce Blaze in Stoddart Store in Buffalo.

BUFFALO, N. Y., March 20.—Stoddart Brothers' big drug store in Seneca street narrowly escaped total destruction by fire at 6:30 a. m. Tuesday. An explosion in the drying kiln of the laboratory is believed to have been the cause. The flames were confined to the upper floors and the retail business was not interrupted. Thomas Stoddart estimated the damage at \$25,000, fully insured. The Stoddart Brothers received many congratulations on the comparatively small damage.

## Where is John Casimir Wright?

Fred J. Balzer, of 74 Broadway, this city, desires information regarding the present whereabouts of John Casimir Wright, of St. Thomas, West Indies, who was a student of pharmacy at Jena in 1865 and after that proprietor of a pharmacy in New York.

# THE DRUG MARKETS

## TARIFF LEADING MARKET FEATURE.

Prices Advanced on Several Articles on Which It is Proposed to Raise Duty—Demand Generally Slow.

**NEW YORK, March 22.**—There is no noticeable improvement in the demand for drugs and chemicals and while the jobbing demand is fairly good in some lines, slow trade is reported. The market, however, has a steady undertone, and there is a number of articles the prices of which have been advanced on account of proposed tariff changes. These articles are also only offered in small quantities, the trade not having had as yet an opportunity to digest the new tariff bill. Opium is higher and firmly held, while quinine remains active but steady. Among the essential oils firmer prices are quoted for anise, citronella, clove, bergamot, lemon, lavender, orange and rose. Spices also have a tendency toward higher prices.

**OPTIMUM.**—The new tariff proposes a duty of \$1.50 per pound on natural or crude opium, an increase of 50c. per pound to the present rate. Dried opium, which under the present tariff pays \$1.00 per pound duty, is advanced to \$2.00 in the proposed tariff bill. This advance is already reflected in the prices of granulated and powdered opium, which are now quoted at \$4.75-5.00 per pound for natural, \$5.00-5.50 per pound for granulated and U.S.P. powdered. Offers or quotations for case lots are not being made.

**QUININE SULPHATE.**—The new tariff measure does not make any changes in this article, which remains on the free list. A fairly good consuming demand is felt without any changes in value. The shipments of cinchona bark to Europe for the first half of the month are only 180,000 pounds, a very small quantity, and should the shipments for the second half also be small, it will not be surprising to see an advance in the price of this article. The last auction sale of bark in London was on March 16, but it developed no material change in prices. A sale of Amsterdam brand of quinine will take place at Amsterdam on March 23, at which 50,000 ounces will be offered.

**ESSENTIAL OILS.**—Under the present tariff, oils of anise, bergamot, citronella, lemon, lavender, orange and rose are admitted free of duty, but under the new tariff a rate of 25 per cent ad valorem is proposed, which will, if the bill becomes a law, very materially advance the prices asked for these articles.

**SPICES.**—All spices are now on the free list, but under the new tariff 30 per cent duty is proposed, and this will affect the price of oil of cloves. Manufacturers have not as yet made any changes, but offer only in moderate quantities.

**NORWEGIAN COD LIVER OIL.**—The reports from primary markets are very unfavorable and several of the manufacturers have advanced their prices still further, and oil at their quoted prices would make the lay down cost in our market \$24 per barrel. Prices on the different brands have been marked up as follows: Barrels, each, \$24-27; half-barrels, each, \$13.50-15.00. Cable reports of the fishing up to March 15 are as follows: In Lofoten, 6,000,000 fish, yielding 6720 barrels of oil; in all other districts, 16,500,000 fish, yielding 16,850 barrels of oil. For the year 1908 during the same period the statistics were: In Lofoten, 5,600,000 fish, yielding 5540 barrels of oil; in all other districts, 15,200,000 fish, yielding 20,640 barrels of oil.

**BUCHU LEAVES.**—The short leaves are still quoted at 30-32c. per pound, as to quantity, but the market has a decidedly firm undertone and only small lots are available at the inside figure. Cables received from Cape Town on March 17 report the season now at an end.

**SODIUM BENZOATE.**—Only a limited consuming outlet exists for this article, and the tone of the market is again easier, with quotations further reduced to 28-29c. per pound in large quantities. Even these figures are said to be somewhat nominal with some sellers.

**SANTOXIN.**—The stock in foreign markets is reported to be very small, and the works in central Asia have wired instructions not to enter into any contracts for future delivery, as they are unable to make any shipments at present prices and have not been able to do so for some time past. The new

tariff bill proposes a change in the duty from \$1.00 to 50c. per pound; but even such a reduction will probably not have any effect on the price of santoin for some time to come.

**CANNARIS INDICA.**—True East India tops are firm at \$1.15-1.20, as to seller and quantity. These figures are said to be below present import cost.

**ANGOSTURA TONKA BEANS.**—The new crop, which is due here in May, is said to be of large proportions and of excellent quality. There is only a limited inquiry and the stock in this market is held at \$1.00-1.25 per pound, as to quantity and seller.

**LYCOPodium.**—The inside quotation has been marked up to 32c. per pound on larger quantities, while the market is strong in sympathy with corresponding conditions abroad. The consuming demand, however, is light and unimportant. London reports that the market is firmer at 1s. 8d. for treble-sifted.

**BLESWAN.**—The market is firmer under an improved demand, which is principally from bleachers, ruling quotations being well sustained at 31-32c. per pound for ordinary pure, and 33-35c. per pound for selected, as to quantity.

**SASSAPARILLA BARK.**—A good consuming demand exists and values are maintained at 11-15c. per pound, as to quantity and quality.

## London Drug Market

**LONDON, March 13.**—Business continues very quiet and a larger proportion than usual of the drugs offered at the public sales were withdrawn without attracting bids. The supplies catalogued were fairly heavy and well assorted, but the demand was extremely slack. In some instances, however, higher values were recorded. For instance, Buchu Leaves were fully 2d. per pound dearer, fair green round selling with good competition at 11-12d. to 1s. 1d. per pound, the demand being from buyers for the United States. Long leaves realized up to 5-7d. per pound. Cape Aloes was also dearer, but few buyers were willing to pay the prices wanted by the selling brokers; only a few cases sold, the highest price being 31s. 6d. per cwt. for fair and a bid of 32s. 6d. being refused for bright hard.

Considerable interest was attaching to an offering of 38 bags of Cubebbs which sold at 70s. per cwt. for rather stinky, being cheaper. Three cases of Japanese refined Camphor sold at 1s. 9d. for 1/2 ounce tablets. Two cases of cloudy Balsam Capilla sold at 1s. 8d. per pound. No Sumatra Gum Benzoin sold, but for Siam, bean and pea size, part shivery block, £12 10s. to £12 15s. per cwt. was paid. Cascarilla Sagrada was bought in at 37s. 6d. per cwt. Ceylon Coca Leaves were steady at 8d. to 8-1/2d. for fair green. Cardamoms were easier. Cascarilla sold up to 75s. per cwt. for fair quill. A few cases of Dragon's Blood offered without reserve realized £6 7s. 6d. for dull lump. The small supply of new crop Jamaica Honey realized higher prices up to 29s. 6d. per cwt. for fair brown syrup. Guaiacum was irregular, but glassy block realized 7d. per pound. Sarsaparilla was in small supply and only a few bales sold, gray Jamaica at 1s. 4d. per pound and native red at 1s. 1d. per pound. Iperacantha was not wanted and only a few bales of Carthagenia sold at 4s. 3d. to 4s. 4d. per pound. The Sena which was to be offered did not arrive in time for the sale. Three bales of Senega sold at 1s. 10-11d. per pound for rather lean bright.

Privately there has been no improvement in business in drugs and chemicals. The principal price-alteration of the week has been in morphine, which somewhat unexpectedly has been reduced 3d. per ounce. The price of Codeine remains unchanged, but a reduction is expected. Cod Liver Oil is firm. Glycerin is steady. Citric Acid is easier and obtainable from second hands at 1s. 1d. per pound. Camphor is firmer and in addition to that which sold at the auction, sales have also been made privately at the same price. China Crude is quoted at 148s. per cwt. Quinine is very quiet but steady. American Peppermint Oil is quiet but unchanged in price.

### Druggist Will Manage High-class Hotel.

**CINCINNATI, March 20.**—Druggist Louis C. Widrig, of Fifth and Columbia streets, Newport, Ky., has bought the Altamont Hotel, in the Highlands, near Fort Thomas, Ky., for \$54,450. This includes hotel, fixtures and land. Mr. Widrig says he will manage the hotel and in a few days will open it to the public. It is the classiest suburban hotel in the city.

# THE PHARMACEUTICAL ERA

PUBLISHED EVERY THURSDAY

VOL. XLI.

NEW YORK, APRIL 1, 1909

No. 13

D. O. HAYNES & CO. - Publishers

90 WILLIAM STREET, NEW YORK

Telephone, 2457 John Cable Address: "Era, New York"

Western Office:

Room 500, Dickey Building, 40 Dearborn St., Chicago

Telephone, Central 5888

## SUBSCRIPTION RATES.

United States, Cuba, Hawaii, Porto Rico, the Philippines, and Mexico	\$2.50 a Year
To Canada, postpaid	3.00 a Year
To Foreign Countries in Postal Union	4.00 a Year
Single Copies	10 CENTS.

ALL SUBSCRIPTIONS ARE PAYABLE STRICTLY IN ADVANCE

Published every Thursday at 90 William Street, Borough of Manhattan, New York, by D. O. Haynes & Co., a corporation; President and treasurer, David O. Haynes; vice-president, Ezra J. Kennedy; secretary, Edward W. Drew. The address of the officers is the office of this publication, and the title is registered in the United States Patent Office.

Entered at the New York Post-Office as Second Class Matter

## Re Photographs for "Era Album"

### Illustrated Section

Each subscriber to The Pharmaceutical Era is entitled to representation in this work, and is invited to send us his photograph. We do not require a subscription from each partner and clerk. If the firm or proprietor is a subscriber, the other partners and clerks may have their portraits included for \$1.50 each. To secure all of the Album sections one must be a subscriber to The Era in his own name.

In sending photographs be sure that each one is distinctly labeled with the name, address, business, profession or occupation of the person, written clearly on the back of your photograph. A good plan is to write it on a printed label and stick it on the center of the back of your photograph. Here is a good specimen:

FOR ERA ALBUM.

Fred S. Rogers, Middletown, N. Y.

McMonagle & Rogers,

Ex-Pres. N. Y. State Phar. Assn.

When additional photographs of partners and clerks are sent, each one should have written on it the name of the subscriber who sends it, as well as the name of the person in the photograph.

### Cabinet Photographs Only

The style of photograph we require is the so-called "cabinet" size, with the head about two inches long. If other sizes are furnished they interfere with our plans for keeping the faces uniform, also prevent us from classifying the cuts by localities.

In view of the great amount of work we are assuming, to have each of our subscribers properly represented in this Album, we feel that we are not asking too much when we request each subscriber to supply us with the size and kind of a photograph which will facilitate our work and best enable us to do him credit.

In forwarding photographs for the Album, see that they are distinctly addressed as follows:

THE PHARMACEUTICAL ERA,

For Era Album 90 WILLIAM ST., NEW YORK.

## CONTROLLING THE SALE OF OPIUM.

In England doubt has been raised regarding the practicability of the recommendation of the International Opium Congress that drastic measures be taken to control the manufacture, sale and distribution of this drug and its noxious derivatives. The *Chemist and Druggist* considers this the most important of the various proposals adopted, as indeed it is, but quotes the opinion prevalent in Britain that "no matter what the restrictions are, China will have morphine and what is not imported through legitimate channels will be smuggled."

This opinion is based upon the understanding that already the importation of opium into China, except for medicinal purposes, is prohibited. The same condition is now effective in the United States and in our Far Eastern possessions. There should be no trouble in controlling the proper distribution of the narcotic and there is no reason why the Chinese authorities, if they are sincere, cannot control the situation in the same effective manner as the Americans have done in the Philippines and will do in this country under the new prohibitory law passed by the recent Congress.

We do not agree with the British view that protective hedging of the sources of production will "seriously prejudice the legitimate output and uses of the alkaloid." Prohibition, effectively enforced, will reduce the output and official observation and control will be necessary to prevent the misuse of the surplus over the legitimate supply for a long time to come, especially until the ends of legitimate supply and demand are closer together than they will be until the new conditions have had time to adjust the discrepancy.

## TAXING CIGAR SELLERS IN NEW YORK.

So many druggists in New York State sell cigars that it would be well for the legislative committee of the State Pharmaceutical Association to look into the conditions and merits of the bill recently introduced at Albany by Assemblyman John R. Yale, of Putnam County, which in its original form would impose an extra and unnecessary tax upon druggists in the State who operate cigar stands. The druggists are only indirectly concerned with the attempt to tax manufacturers of cigars, but in the matter of imposing a tax on retailers the cigar-selling druggists would suffer more than the retail tobacco men, for the latter buy larger quantities and have a wider margin of profit.

According to the bill every dealer in a city or borough of 1,500,000 inhabitants or more must pay an annual tax of \$100; in a city or borough of be-

ween 500,000 and 1,500,000, \$75; between 50,000 and 500,000, \$50; between 10,000 and 50,000, \$25; between 5000 and 10,000, \$15; between 1200 and 000, \$10, and in any other place, \$5.

In the City of New York this would mean a loss of \$1 to \$2 a week, whether the druggist did a thriving cigar side-line business in the center of the Borough of Manhattan or had a limited call for cigars away out in the bucolic edges of Queens and Richmond Boroughs, or in some of the equally small settlements in sections of Brooklyn Borough. The bill is calculated to drive a lot of the small cigar retailers out of business, just as it would cause a large number of small retail druggists to close their cigar cases.

The cigar industry is now sufficiently taxed without adding anything more to the burdens of the small retailers, the margins of profit for those who sell good goods to their patrons is altogether too close and the bill is a good one to be beaten. There is no necessity for it, it is not a fair measure and ought to go to the legislative graveyard.

#### NOT MUCH DANGER OF A STAMP TAX.

One of the rumors growing out of the tariff situation at Washington is that concerning the possible imposition of a stamp tax upon proprietary medicines and other articles, following in a way the revenue-raising method adopted during the Spanish war. The tariff bill is still in the House and it is doubtful if it will go to the Senate in its present form, for in the drug and chemical schedules there are some inconsistencies and incongruities which will no doubt be corrected. Aside from these alterations the bill will be passed along, in all likelihood, essentially as it is, so far as the drug trade is concerned. If that is done there will be no great dissatisfaction.

In the Senate the entire subject will be threshed out. Senator Aldrich has given unofficial notice that he will oppose any stamp tax, inheritance tax, or resort to war measures. He has an influential following and will no doubt be able to defeat any effort to vary from what he considers a proper course in dealing with the tariff, but that is no reason why the legislative committees of the druggists should cease to keep watchful eyes upon the progress of the Payne bill.

#### THE GENESIS OF COUNTER-DISPENSING.

President Blair, of the Philadelphia Branch of the A.P.A., in a recent address remarked: "When the medical man guesses, as he often does, the patient soon finds it out and is as willing to let the druggist do the guessing at perhaps less cost."

Guessing is not the only way in which medical men have given the incentive to the public to practice self-medication and seek the counters of the drug stores for remedies for their ills. Medical societies have taken action and the medical press as a unit has been decrying the original cause of all the trouble, which is the unfortunate existence of some black sheep in an otherwise distinguished profession. In so saying pharmacists do not pretend to be immune from incompetents, but in practical work the

profession of pharmacy is better able to protect itself and the public from the mistakes of incompetents than is the medical profession.

There are few druggists who have not some time encountered graduates of medical colleges who were in every way utterly unable to fulfill their selected mission in life. There has undoubtedly been tens of thousands of patients who have measured the same sort of men in the same way. With a majority the inevitable conclusion must have been that it was foolish to pay money to a medical man of that type. Nobody ever hears of a physician who is "on his job" suffering through lack of practice, nor do his patients become self-medicants or seekers for advice at the drug stores where counter dispensing is permitted.

The average citizen will go first to the physician with his ailments and continue to do so if he finds he is treated right—if not he will cut out the extra expense and go direct to the drug store. It almost always depends on the doctor and it is doubtful if there ever would have been any of the professional ills now complained of if all medical men had been for years back up to the standard of the majority of the physicians of the Twentieth Century. Getting right down to the crux of the trouble, the origin of the evils complained of by the physicians is directly traceable to members of their own profession. This is not said in the spirit of hostile criticism, but in all fairness and with the knowledge that the leaders in the medical world are doing all they can, with energy and diligence, to eliminate the cause.

#### POLITICS IN APPOINTING BOARDS.

No better illustration of the perniciousness of entrusting the appointment of boards of pharmacy to politicians can be found than the exemplification just now being given in Iowa, where the Governor has demanded and obtained the resignation of one member and is seeking to dislodge another member on the ground that they charged for services not rendered to the State. According to the Iowa papers the board members have been very active in practical politics and the Ames *Times* sums up the situation as follows: "The larger part of the duties of this commission in the past has been to work politics. The celebrated flying squadron of the past few campaigns has been headed by members of the commission."

As if to substantiate this allegation it is stated that one of the commissioners charged full pay for four days to the State of Iowa while he was at the Chicago convention which nominated Taft, in addition to his traveling expenses. Other charges of the same sort are made and they are inevitable where the board drifts away from pharmacy and its members enter the realm of practical politics. All pharmacy bills hereafter presented should make it mandatory on the appointing power to obey the dictum of the State pharmaceutical associations. While most Governors would be likely to make good appointments on their own account, it is wise to guard against the exceptional Governors. No high-minded Governor, having in mind his own immunity from temptation

to appoint undesirables, would be justified in refusing to protect pharmacy and the public from the machinations of some unscrupulous man who might succeed him in the executive chair.

It is understood that the bill introduced in the Massachusetts Legislature to prohibit the dispensing of medicines by physicians has been withdrawn on account of the great opposition offered by the medical profession. The bill was almost too drastic to have a reasonable chance of passage. This is really a matter that ought to be regulated by common sense fairness exercised in consonance with circumstances when individual cases are presented to the doctors.

Druggist, to sleepy clerk: "You should not gape in a customer's face in that manner."

Clerk: "I was not gaping. I was only advertising our new tooth powder."

When President Taft next visits California, which he is expected to do later on in the current year, chief among his hosts will be a former resident of the President's home State who went West years ago to become one of the prominent druggists of the Golden Gate. Edward L. Baldwin will do the honors by virtue of his recent election as the president of the Ohio Society of California, one of the strongest social organizations of the State, there being more than thirty thousand natives of the Buckeye State in the region which many of them have called the Paradise of the Pacific. Among previous guests of the Ohio Society were President McKinley, Vice-President Fairbanks and General Funston, with scores of lesser lights in the firmament of fame.

In promoting the growth and advancing the influence of the Ohio Society of California Mr. Baldwin has been actively assiduous and to his efforts are in a considerable measure due the high standing of the organization. Born in Geneva, Ohio, Mr. Baldwin began the struggle with the world on his own account when only 17 years of age. He worked his way through the Spencerian Business College of Ohio and taught penmanship for two years. His first acquaintance with drugs was made in the employ of Frank Hibbard, Ludington, Mich., and after five years he was prepared to go into business for himself, his first field of operations being at Free Soil, in the same State. Failing health forced Mr. Baldwin to abandon the indoor work of a pharmacy and he went on the road, traveling in the West for several years for various drug houses of Detroit.

Settling finally in San Francisco, in 1894, Mr. Baldwin purchased control of the Ferry Drug Company and has since built up not only a very satisfactory retail trade, but an extensive business in the manufacturing and wholesale branches, with an additional retail store at 233 Devisadero street, and headquarters at 22 Market street for the firm of Edward L. Baldwin & Co. The Ferry Drug Store, which is at 20 Market street, as its name implies, is close to the ferries and available for the patronage of the thousands of commuters who daily use the boats that ply upon the waters of the bay.

Mr. Baldwin has been an active organization man, has held various offices in the San Francisco Retail Druggists' Association and represented it in the convention of the National Association of Retail Druggists. He was active in the formation of the San Francisco Drug Exchange, a buying club which achieved considerable success but which afterwards was disbanded, as the discordant relations between the wholesalers and retailers were satisfactorily adjusted. At the time of the earthquake and fire Mr. Baldwin was prominent in aiding his fellow druggists and giving relief to the public. The Ferry Drug Store was one of the first to be ready for business and the co-operation of its employees in the work of treating the afflicted was of great value. Taken altogether, Mr. Baldwin

win is a live, active, progressive man, a worker rather than a talker, just the type of man to win success, as his fellow Ohioans have declared through their action in electing him to the presidency of the Ohio Society of California.

The bookseller displayed a kind of muzzle—a contrivance of silk and wire to fit over the mouth and nostrils, says the *Philadelphia Bulletin*.

"Reading masks," he said. "Latest thing from Paris. It is worn at the Bibliothèque Nationale by the students of old books and manuscripts to prevent the inhalation of disease germs. Those aged volumes are nests of germs. In the great French library masked readers are as common as masked motorists in the boulevards."

To secure the patronage of the dear girls always advertise your face lotion as being good for "chapped" lips.

George J. Charpiot, of Denver, has invented a phonographic safe lock which he says can be opened only by the owner. Tests in the presence of experts seem to substantiate the inventor's claims. Instead of a knob on the door there is the mouthpiece of a telephone. A delicate needle is attached to the diaphragm, the end of the needle resting in a groove of a sound record made on a phonograph cylinder. The word which the safe is locked on is thus recorded and the one who uttered it must repeat it before the safe will open. In the tests a dozen men tried to imitate the voice of the man who locked the safe, but the lock would respond only to the right man.

HER EASTER HAT.

He smiles to see her don it.

And he is happy still;

For though he's seen the bonnet,

He hasn't seen the bill.

—April Lippincott's.

The poisons mentioned in Shakespeare's works are the subject of an article by Dr. Cartaz in the *Revue Scientifique*. The extensive medical knowledge which Shakespeare is supposed to have possessed and which has been advanced by the Bacon theorists as a proof in support of their contentions has often attracted the attention of investigators, but Dr. Cartaz seeks to prove that Shakespeare knew no more than his contemporaries, and was under the same misapprehensions as they were regarding the potency of certain philtres and poisons.

When, for example, the ghost of Hamlet's father says that Claudius poured "the juice of cursed hemlock [henbane] into the porches of his ears" it should be pointed out that this juice could not possibly penetrate the drum of the ear. But the belief in the deadliness of poison thus introduced into the system was so general at the time that Ambrose Paré was accused of killing in this manner King Francis II of France, although it is now certain that the King died of meningitis caused by inflammation of the internal ear.

Then again when Friar Laurence in "Romeo and Juliet" gives Juliet the potion that "shall make her body stiff, stark and cold, appear like death," it can only have been, Dr. Cartaz considers, *Datura stramonium* (thorn apple), or mandragora root. The latter enjoyed during the Renaissance a great vogue, but experiments have shown that the awakening from its effects is accompanied by violent nausea, so that Juliet would have met her lover in a far from poetical condition.

Also the duration of sleep induced by narcotics never approaches 42 hours. Dr. Cartaz thinks that Friar Laurence added hypnotic influence to his potion. As for Romeo's poison, of which the apothecary says that "if he had the strength of twenty men it would despatch him straight," the only solution is that it was aconite, as Shakespeare elsewhere calls the

EDWARD L. BALDWIN  
of San Francisco

son of jealousy as powerful as aconite. Or perhaps it was of the mixed poisons resorted to by the Borgias.

lubby: "What! You paid fifty dollars for that Easter It's monstrous—it's a sin!"

Wife (sweetly): "No matter; the sin will be on my own head"—April Lippincott's.

The burning of sugar in the sick room has long been practiced, though many of our physicians smile when it is done, regardless of scientific tests which have proved its efficacy, says *Harper's Bazar*. The tests made by Professor Trilbert, of the Pasteur Institute in Paris, prove that burning sugar develops formic acetylene hydrogen, a most powerful antiseptic gas. Five grains of sugar were burned under a glass bell holding ten quarts.

When the vapor had cooled bacilli of typhus, tuberculosis, cholera, smallpox, etc., were placed in open glass tubes, and within half an hour all the microbes were dead. Is it a wonder that our grandmothers found the application of sugar smoke to cuts and wounds a marvellous curative agent?

One way to please a woman patron is to listen to her tell a lot of commonplace facts and make believe that you never heard them before.

Dr. Howe, president of Case School, Cleveland, never fails to express his vexation when he has a student call the zero of mathematics nothing. One of the students, Morgenthaler by name, would almost invariably read an equation like this,  $x+y=0$ , as follows: "X plus y equals nothing." One day Dr. Howe lost his long-endured patience. "See here, Morgenthaler, let me show you the difference between zero and nothing."

With this, Dr. Howe wrote a big 0 on the blackboard. "This," he said, "is zero." Then erasing the 0, he added: "And this is nothing."—April Lippincott's.

"Did you find it hard to think of something to say when you went to see her father?"

"Well, at first I did, but it wasn't long before I was saying earnestly, 'Ouch, quit kicking!'"

An indolent journalist, strolling into a well-known drug store in the lower part of the city recently, says the *Richmond Times-Dispatch*, observed a large square jar upon the show case, bearing the interesting label, "Genuine dog teeth." His curiosity aroused, he made a close inspection. It needed no Cuvier, no profound student of comparative anatomy, to see that the articles in the jar were indeed the molars of canines. Very perfect they were, very white and polished.

"Are these kept as curiosities," asked the I. J. of the polite pharmacist, "or as articles of commerce?"

"As articles of commerce," replied the P. P., blandly.

"Are they used medicinally, or how?"

The P. P. gave a pitying smile.

"People hang them around their babies' necks, when they are teething to make them cut their teeth white and regular."

The I. J. whistled. Thus was one of the occult pages of commerce unrolled before his gaze.

The druggist's small boy had a boil which was inconveniently located and which had not been relieved by the treatment directed by his father. The boy's mother, looking from a window, was surprised to see her hopeful seated upon a can of ashes. "Willie, Willie, what are you doing?" she called.

"Well, papa's ethics don't do no good, so I thought I'd try old Job's sawniron on this blained boil."

One of the last things in the world which one would expect the glassworker to create would be a cannon, yet Messrs. Thomas Webb & Sons, of Stourbridge, England, recently built two cannons out of the finest cut glass, says the *Strand Magazine*. The guns weigh, with their timber, 40 pounds each and measure 24 inches in length. They wheel easily and move on their trunnions like ordinary cannon. The axletree and bearings are of ornamental brass.

The creations may claim to be of some historic interest in that they are exact models of the famous ordnance with which Major-General Baden-Powell successfully defended Mafeking. The old cannon was dug up in that place during

the siege, and investigation has since shown that this old cannon was cast in Staffordshire at an iron works within ten minutes' walk of the glassmaker's establishment. During the siege the gun was known as the "Lord Nelson" and "Skipping Sally," the officers using the former name and the men the latter.

Dr. W. B. Parks, of Atlanta, told the American Society for the Study of Alcohol and Other Drug Narcotics in Washington recently of the different effects of alcohol on the different races. To the Englishman, he said, alcohol brought repose and comfort; to the Frenchman it created excitement and interest; to the German it was anesthetic; to the Italian it was courage and force; to the Irishman it was sense enjoyment; to the American alcohol simply gives a feeling of power and capacity without any pronounced types.

The negro, he continued, is not an inebriate as a race. He drinks to quiet excitement and to give relief. The Jew is not a race drinker; alcohol to him is simply a sedative. The Russian takes alcohol in the place of food, and his drinking is a very marked characteristic.

Elsie—Helen says she'll never forgive her mother for marrying again.

Ethel—And why not?

Elsie—Because her stepfather can't help giving her age away. Everybody knows he isn't as old as she is.

Talking post cards have been spoken of for some time past, says the *Lady's Pictorial*. They have now become an accomplished fact in Europe, though they are hardly likely to come within reach of the million just yet. Happily they have not reached such perfection that on coming down in the morning one's correspondence will hail one in various voices. It is ghastly to think of everybody's post cards shouting around the table. So far the photographic message card can only be made to "speak" by taking it to a postal center, where it is placed in a machine which sets it in motion.

"Each of my hens lays an egg a day."

"They must be professionals."

"No; lay men."

"An earthquake," writes Mr. Frank A. Perret, formerly honorary assistant at the Royal Vesuvian Observatory, in an article on "The Messina Earthquake" in the *April Century*, "is an undulating vibration of the ground resulting from some sudden movement of the underlying strata. This may be produced by a volcanic explosion, the breaking of a stratum of rock under strain, or the sudden intrusion of lava between the strata or into a fracture, the types respectively known as volcanic, tectonic and inter-volcanic. My own impression in experiencing these shocks was that of a rubbing together of masses under pressure, which throws the adjoining material into vibration. If you put a little water into a thin, wide-mouthed crystal goblet, wet the finger tip and rub it around the rim, a sound will be produced, and the water will be set in vibration, like the ground waves of an earthquake."

The fiancé of a Louisville girl has been spending the winter in Florida in connection with his father's business interests in that quarter.

"Marie," said the girl to a friend the other day, "Walter has just sent me the dearest little alligator from Florida!"

"Dear me!" rejoined Marie, with affected enthusiasm. "And how shall you keep him?"

"I'm not quite certain," was the reply, "but I've put him in Florida water till I can hear further from Walter."—*Harper's Weekly*.

"How is he getting along?"

"Pretty fair."

"Holding his own, I suppose?"

"No, not as much as he used to. He is married to her now."

It is reported that there is an alarming increase of snakes in the prohibition States. Some enterprising "physicians" (?) have trained rattlers which bite the patient just before the prescription for a "quart" is written. There is no fee charged for the bite.

## Wisconsin Window Display Wins Era Cash Prize of \$5 This Week.

In the ERA'S Prize Competition this week the \$5 Cash Prize is awarded in Contest No. 2 to F. A. Loetz, with W. R. Downer's Pharmacy, 802 College avenue, Appleton, Wis., for the best window display. Mr. Loetz's identity was not known to the judges, for in these contests every precaution is taken to obtain unbiased judgment as to the relative merits of articles or photographs offered in competition for the various prizes. Full details regarding the Competition will be found on advertising page 37 of this issue of the ERA and it should be remembered that the contests are open to everybody. Mr. Loetz writes as follows about the window:

"This was a display we made last Labor Day and consists of all home-made cigars and also all union made. The tobacco in the display we got from the different manufacturers of cigars and shows the tobacco of which the different cigars are made. Each bundle was labeled as to grade or kind, whether filler, binder or wrapper. The cigars themselves needed no label to tell what they were, as they were well-known brands, locally.

"I send you an extra photo—printed dark—to show you the wording on the cards attached to the tobacco. At the time of this display we got a very nice letter from the local Cigar Makers' Union, congratulating us on our nice display. Some time after this we made another display of cigars, similar to this one, but not all union cigars, and again we received a congratulating letter from the Cigar Makers' Union, saying that we had a fine display and that there was only one thing that did not look good and that was that the cigars were not all union made.

"The pictures on the wall show parts of our past card display rack. The stands on which the cigars and tobacco are supported we had made specially for window displays. The stands are of different heights and the shelves are movable, with hinges, so that we can raise or lower them or put them on any angle by using a bolt. We also can put in more or fewer as we see fit, in order to make our display attractive."

### Scientific Section of Philadelphia Branch Organized.

PHILADELPHIA, March 27.—Manufacturing and retail interests as well as the colleges of the city were represented on the 11th at a meeting at the Drug Club called by President Harry C. Blair, of the Philadelphia Branch of the American Pharmaceutical Association, for the purpose of organizing a scientific section of that branch. Joseph L. Turner, connected with the laboratories of the H. K. Mulford Company, was elected chairman of the new section and W. A. Pearson, of the laboratories of the Smith, Kline & French Co., was chosen secretary. It was decided to meet the second Thursday of each month to discuss topics to be suggested by the executive committee, which comprises the chairman and the secretary.

The aim is to stimulate work in scientific pharmacy and allied branches. Any one is eligible to membership who is a member of the A.P.A. and of the Philadelphia Branch. The new organization will not interfere in any way with the workings of the branch. Meetings will be held from October to May, inclusive.

### Montana Ph.A. Will Meet at Bozeman May 17.

The Montana Pharmaceutical Association will hold its 19th annual session May 17 in Bozeman and the druggists of that city are planning some social features for the members, their wives and friends, hoping to make the meeting one of the most enjoyable held in Montana.

## A Chance Acquaintance.

By Emma Gary Wallace.

When old Dr. Patholm's only son bought out the "Kirkwood Pharmacy," his family and his intimate friends prophesied all kinds of success for him, and to be perfectly frank—it was no more than he expected for himself.

He had married the most popular girl in his set, had good financial backing, a thorough knowledge of his chosen profession, and a business stand which had been a successfully managed drug store for twenty-five years. There seemed to be no reason why he should not succeed.

Perhaps Ned Patholm's greatest failing was his extremely retiring disposition, and the difficulty with which he made new friends and acquaintances. He rather prided himself on his conservatism, but he never for a moment suspected what an all-enveloping mantle he had made out of that virtue. If any one had ventured to hint at the fact that he was bawly on speaking terms with himself, the nicely balanced chip would have tumbled right off his shoulder.

### Human Nature Not in Evidence.

As time went on his wife suspected it and the clerks became absolutely certain of it. Even the old customers of the store were conscious of a curious sense of disappointment. There was a sort of mechanical nickel-in-the-slot air about everything and everybody. You indicated your want, put down the coin, pushed the button, took the goods and departed. There was no one who seemed glad because you came or

anxious to have you return. *The personal element was entirely lacking.*

Young Patholm could not understand why his sales were steadily falling off. He carefully reviewed the situation and the more he studied it the gloomier he became. It was like spending a week of valuable time going over and over endless columns of figures to find the hateful two cents which was preventing a balance. If he could have put his finger on the trouble, he would have felt almost gay. He was exceptionally cautious in his buying, and only asked a fair living profit on his sales. His laboratory equipment was fully adequate to all demands and the people of the neighborhood were prosperous. He attended to business personally, seven days in the week and from twelve to fifteen hours a day. It surely was not neglect of his interests. He fully believed that every man must work out his own business salvation, and so he never wasted time attending the local association meetings of his brother druggists or spent good working hours reading what others of his calling were about. He always preserved a dignity of demeanor and insisted on his clerk's doing the same.

It was the Patholm's third wedding anniversary, and Ned reluctantly consented to take little Mrs. Patholm to the theater. She had urged it almost appealingly, and argued that good dollar seats would do plenty well enough now that they were old married people, in fact that she preferred to go several times in a modest way rather than to have one "swell time" in the midst of a regular Sahara of pleasureless months. Either Patholm did not hear, or the ideas failed to percolate, for he gloomily proceeded to secure a box.

"We go so seldom," he replied to his wife's protest, "that when we do, I propose to go in good shape." Patholm was quite right. It was the best investment of his whole life.

The entertainment was a musical comedy, requiring considerable change in the scenery and there were lengthy between-the-act waits. The young druggist and his wife were so quiet that the occupants of the next box must have thought it empty, or it may have been that the acoustic properties of that part of the building were exceptionally fine, for the attention of both was suddenly arrested by the well-known voice of a friend of theirs, a prominent surgeon.

"I tell you what, Bentwing," the voice was saying, "I knew and respected Dr. Patholm when Ned was in knickerbockers, and I feel badly to see the boy losing his chance the way he is doing. Everybody is so thoroughly on the alert these days for a first-class business opening that the opportunity to find such a one as Ned had, is a rare thing. A man has not only to have the opportunity and the energy to seize it, but he must have the gumption and the hard-headed business sense to steer it after he gets it. If he hasn't he will not make a success of any undertaking and he better be satisfied to be mate, and not try to be Captain.

"Now Ned had an unusually good chance there in the Kirkwood Pharmacy. Even the name Patholm inspired confidence, for the whole community loved and respected his father, but in place of running the business according to common-sense methods, he has practically encapsulated himself."

"That's a new one on me," Bentwing responded lazily. "I can sort of imagine what the condition is, but please turn on the illumination, Doc."

Dr. Goodhue laughed good-humoredly.

"Well, for example, the other day I operated on a girl who had appendicitis. It was the prettiest sight of the kind I ever saw. The condition was tuberculate, and the whole diseased region was partitioned off with a tough wall of thick membrane built up of white blood corpuscles. It was the finest kind of a fortification thrown up by that grand old worker, Mother Nature to prevent further infection, and to localize the trouble.

"Ned's so fearfully down in the mouth, that he practically infects every one who comes near him with the blues. Nature wisely decrees that this condition shall repel people, lest they become infected likewise. So as the months have gone on he has become walled in by his own reserve and morbid tendencies. He sticks to his business too closely. He needs the red blood that comes from outdoor air and the cheerful effect of contact with his fellows, especially those of his own business. Why, I've seen mental encapsulation go on until a man became a perfect mummy.

"Customers who go into his store are met with only an

inquiring stare or a formal greeting. I tell you, Bentwing, people like to be called by their name if that name is nothing more aristocratic than Mud. No one likes to feel that he is patronizing a deaf and dumb establishment where his wants have to be made known by pantomime. His clerks are afraid to laugh, or maybe it is the general atmosphere of melancholy that surrounds the whole place. The world has no particular use for martyrs in business. It prefers to deal every time with the fellow who is doing well and who enjoys doing it.

"Now there is his wife, as bright a little woman as one could find in a twelvemonth, but he lets her sit moping at home in place of stirring himself out of his tracks. Why, it is business, if nothing more, to be seen among folks, to take one's part in local activities, to go in for organization work of a beneficial kind, and to keep right in touch with the latest in trade or business literature. It pays both in dollars and sense. To get good results a man simply must maintain a harmonious balance between work and recreation."

Bentwing laughed. "I was in there myself the other day," he said. "While a Knight of the Grip was showing him some goods. Evidently he wanted them, but his sense of decision appeared absolutely palsied. He hesitated and quibbled and wondered, rattled by the fear that they might not sell, that it might be better to order after the first of the month, and after weighing every pro and con on a knife-edge balance and wasting an hour of his own and the salesman's time, he decided to wait until the next trip round to think the matter over. Patholm went out soon after, and one of his clerks said he actually would not order good staple goods the last half of the month if he could possibly avoid it, because the money would be called soon."

"There's the point exactly," the Doctor resumed. "His stock is not kept up, and he hires cheap help and leaves them just where he finds them in point of capability, so that his sales are uncertain. The clerks themselves often need encouraging and guiding, and every last one of them will do better work, if they know their efforts are watched and appreciated. It's human nature."

"That is so," acquiesced Bentwing; "that is one secret of the other druggist's success, I mean Cartyn down at the Square. His clerks are given a salary and a commission chance besides. He told me about it himself. He didn't want to give them a direct interest in the business, and yet he figured that he would like the same kind of service that such an interest would give.

"He averaged his cash sales for a year, also his cost of help for the same time, and he reckoned that any way he could fix it, it would cost money to boost his sales much above that point. If he could increase them materially he could afford to pay for the power that did it. He laid the matter before his clerks and showed them, that up to a certain point their work was covered by their regular salary, and the man who could make himself worth more to the firm was entitled to more pay.

"The way those fellows took hold was a caution. There are four of them, you know. They clubbed together and are, paying for expert instruction in different branches in which they feel they are weak. Cartyn placed some good business-building books on the shelves and he makes those men feel that he has a personal interest in their success each month, in their morals, and their future prospects.

"Does it pay him? Well, I guess it does. You couldn't chase those fellows from that place. Does it pay numberless wide-awake firms to make their help feel that they are reasonable beings with bodies worth caring for, and ideas worth heeding? It certainly does.

"Cartyn had it all figured out before he made them the offer, that if they claimed no commission he was no worse off, and if they did he certainly was a great deal better off. His store is as neat as wax, not just on the surface and in the front part, but the out-of-sight and behind-the-scenes places as well. His stock is in apple-pie order and his custom attended to right up to the Queen's taste, and such an aggravating thing as an omission on the Want List is unknown. It might cause the loss of a sale later. It doesn't pay to forget at Cartyn's.

"I happened to be in there when the same drummer called that Patholm turned down. Cartyn looked over the goods, called up a couple of the clerks—intelligent looking fellows—got their opinion on the chance of creating a paying demand for the line, made his decision and placed his order in exactly

seven minutes. His very manner inspired confidence in those clerks."

"Another thing at which I have been surprised," the Doctor said, "is that neither Ned nor his clerks seem to have their stock in hand, and before the article called for is located the patient is well or the customer out of the notion of buying. No one wants to wait for a purchase while a tracer is sent out to locate it. Even his advertising, when he does advertise, is dead, trite, and stereotyped, a mournful obligation disposed of as quickly as possible from a sense of duty. Cartyn's advertising has a personal note that makes one feel impressed with the sincerity of the man behind it. His advertising pulls. When you go into his store there is a personality everywhere present. You never see his clerks resting on the show cases or visiting together. They haven't time. If there is a lull in business they are getting ready for the time when business comes."

"If Patholm could be persuaded to buy a couple of dozen mirrors," remarked Bentwing, "and hang them around his store while he studied the downward curves of his own face, it might help him to 'see himself as others see him.'"

There was a stir in the audience, instantly the lights went out, and up went the curtain. The melody rollicked happily up and down the scale. Patholm touched his wife on the arm and silently they slipped out.

"Wasn't it perfectly awful?" she whispered weakly when they reached the foyer.

"Rubbed it in pretty good, that's a fact," Patholm agreed.

"I'd never speak to either of those horrid men again," his spouse declared loyally.

They had reached the street. Patholm savagely kicked an offending pebble out of his path.

"I don't believe a single word they said, anyway, Ned," his companion remarked comfortingly.

Patholm laughed. It was a happier laugh than his wife had heard for many a day.

"I guess it's all true, whether we want to believe it or not. Encapsulated, eh? Well, the way they pictured me out, I'm it! What I need is more red blood, cheerful, healthy red blood. They have given me the straight tip. What my business lacks is the *personal element*, and I should have come to the wall if I had not got it. I ought to be grateful to Goodtime and Bentwing for raking me over the coals the way they did tonight. I overhailed every part of my business except myself, and it looks as if that is where the trouble lies."

There was a dry sob at his side.

"Don't you fret, little woman, criticism may hurt, but there are times when it and the surgeon's knife are good for us. I am satisfied that the box paid tonight all right, for it certainly introduced me to a chance acquaintance with myself. Wait a year and see if I do not profit by the introduction."

"Let's have lunch somewhere, I may as well begin crawling out of my shell now as any time. Here is a cheerful looking place, with no end of mirrors about, so I reckon it was meant for Patholm and Company, and their ilk, who need to see themselves."

And in the bright-faced couple who entered the Hallberg Café it would have been difficult to recognize the occupants of the box so recently vacated.

#### Chapter 6 Renominates Mrs. Lee for President.

PHILADELPHIA, March 27.—Preliminary plans for what is expected to be the most successful year in its history were laid at the March meeting of Chapter 6 of the W.O.N.A.R.D. at the College of Pharmacy. Perhaps the most interesting item of the business was the report of the nominating committee. This report, which was unanimously adopted, placed the following names before the chapter to be elected at the April meeting: President, Mrs. William Estell Lee; first vice-president, Mrs. N. D. Streeter; second vice-president, Mrs. Harry G. Comp; recording secretary, Mrs. W. T. Burke; corresponding secretary, Mrs. Carl W. Shull; treasurer, Mrs. Josh E. Marsden.

The entire harmony of the membership and its strength were much in evidence at the meeting. It was announced that the treasury was in excellent condition and that the membership was 264. Several new members were elected. Among the undertakings before the entertainment committee is the holding of a dance at the college some time in May. Delightful features were vocal solos by Miss Helen Voshage, accompanied by Miss Amy S. Wells, and the violin solos by Mr. Alan Lewry.

## Loisette.

By Joel Blanc.

Business was so dull that the poor, down-trodden druggist had gone out for a four-hour spin in his six-cylinder car. As the clerks informed me that he had already been gone more than three hours, I waited, hoping that his chauffeur might give me a joy-ride around the block. While I stood close to the cage, Loisette warbled through the bars and I posed to listen. I always do listen to Loisette, for wisdom from the lips of oracles is but baby-talk in comparison with the wisdom that flows from the lips of lady cashiers—and from the bunch of pulps that fill her bucket hat to her Cuban heels Loisette, compared to all other lady cashiers I have met, is silk as to zingham. As her patronymic is McGurk, it may be that she changed her other name from Liz to Loisette when she became one of the seven original peroxide sisters.

"Take the number," said Loisette, pointing to an elderly lady who stood at one of the counters. "The goods in that gown cost five per yard at least and it's cut on the bias; but because she isn't a doll-looker and has hips, that fluffy tip of a clerk is giving her the goggle glare and showing her two-bit hair brushes. Why, I can tell at a glance that she inherited an opera box and has credit at the post-office."

"I've worked at my profession in tonsorial parlors, picture shows, restaurants and merry-go-rounds, and I never seen such a lot of blindfolds as there is in drug stores. Why, if one of them there clerks was waiter in a fine, swell feed store he couldn't get enough tips to pay for washing his white fronts. I remember one night when a little bundle of fodder with thistle-down eye-brows came into the palm room. From his drapery you couldn't tell whether he was a divinity student or head of a little red school house, but when the drum-major got him set to one of Antoine's tables, that garçon fairly put flowers under the jaybird's feet. After he had eaten about glove money out of a nine-dollar order of feeds and left half a quart of bubbles in a four-dollar bottle, he smiled a number of ten yellow-back into Antoine's palm. That flossy one was the only son of a Texas cattle king and he was chafed under the pockets from the bunches of engravings what he had in his clothes. Of course, Antoine had the X-ray eye and could look through a motor coat at the coat of arms tattooed on a man's back, but while most of them ain't in Antoine's class, I never seen a waiter, tonsorialist or any sort of tip chaser what didn't know more about human nature than the slickest drug sharp what ever lived. Perhaps they need the tip scheme to educate them."

Loisette extracted thirty-seven cents from a twenty-dollar bill with the dexterity of a magician and continued: "Every man in this store has a different standard for judging people and they ain't none of them right. The kid clerk judges every one by their clothes. The second clerk is only decent to them what is meek and humble. The senior clerk ain't got no use for any but high-brows and the boss is worst of the lot because he will kneel on a dolly at the feet of any one what has a nickel to spend."

"Now, the way I size it up is this—and I've measured them all from the near-silk bluff with oysterless pearls in her wings to the little meekly with a petticoat ruffle of bonds: You never don't want to think what anybody *looks* like when the curtain first goes up. At first look it's almost impossible to tell a Friday sale directory and paper shoes from a Fifth avenue empire and twelve-dollar suede boots. However, after you have had a chance to see whether the embroidery is worked on or woven by the yard you can put down either a white or black mark for clothes. Next, you want to remember that the fact ain't no Bradstreet and that the man or woman with a pink cameo visage ain't as likely to have money as them what has had their countenances pushed into humpy brow

ridges by brain pressure and their faces generally jumped up by emotions. When you see a face with a jaw so strong that the muscle of a Marcellus couldn't make it wrinkle and that ain't got no more lines around the eyes than there is around the chin, then you want to hold your breath and wait for orders. But even if the jaw is as flat as a straight-front corset, if the eyes look like sunbursts on account of the many little lines that twinkle around them, then you have a customer that can be persuaded, if you handle her right.

"Another thing in which you druggists ain't basted quite right for the stitching, is this: There are lots of people, even some good-looking, what don't want to be taken for what they look like. Now, I ain't got no use for any one what can't see that me hair is a different color at the roots and I know that Lady Audrey's Cream don't cover all me freckles. If I had to get a position on me looks it would be the five-cent store for mine. People what comes into a store for a hie should first be considered by what they ask for and how they ask for it and then be judged as to whether or not they can be persuaded to take a veil with the hat. And you can't tell that by the veil she's got on, neither; but you can tell it by the price of the hat she buys and whether or not she asked you to change the trimming to make it a dollar less. If a woman comes in here for a free sample of talcum powder the quinces in this store will rush all over her if she has a sold monogram on her wrist bag and they will turn up their noses at a jolly old fat woman who buys a gross of nipples to present to the foundlings' home.

"Another thing that all hands in this shop falls down hard on is patience. They have it in bundles when it ain't needed and they ain't got a dime's worth of it in their music rolls when it is needed. There's a seven-dollar-per-weeker that comes in here every Saturday night at the rush time and his purchase is never more nor less than one nickel cigar. He handles all there is in the box, rolls them in his fingers, smells them and takes ten minutes to dissipate his pinyune, and while he is doing it, any one of the clerks or even the boss will stand and smile on him while a half dozen people are waiting. They call that performance 'holding trade.' But if a bright, snappy woman who knows what she wants and proposes to have it, refuses to take the first hot-water bottle that is shown to her, the clerk gets snarly and tries to flim flam her.

"As I had reason to tell one of me gentlemen friends in explaining why I stuck me hat pin through his arm, 'Familiarity breeds contempt.' The sort it breeds in this store I ain't never seen no place else. There is people what comes in here almost every day, who has been coming for years and buys lots of the best goods. When one of that sort does, the clerks and boss treats her like they was paying her alimony. They growl at her, never show her nothing new and act just like she was one of the family. But if some one comes into the neighborhood because it is cheaper to move than pay rent and ain't got nothing but a little easy payment furniture, every one in the store will two-step around her and offer to deliver a cake of soap. They call that 'Going after new business.' But say, it's the people what pays pew rent that supports the church.

"I suppose I may be insulting them college gents by comparing them with waiters and barbers, but if they don't earn no more than waiters or barbers, they ain't no better business men, are they? You can study books all your life and you can even get what you call practical experience, but if you don't study human nature and use your knowledge of folks, you ain't never going to have steak a la Borderlaise with mushrooms and Nesselrode pudding for lunch."

#### Temple University.

PHILADELPHIA, March 27. Final examinations in the senior and junior classes in the department of pharmacy commence May 1 and both students and faculty are busy preparing for them. With 37 members, the senior class this year will be the largest in the history of the department at Temple.

—Dr. John R. Minchart, dean of the department, entertained the senior class at his home in Germantown recently. Music and readings by Mrs. Minchart were delightful features of the informal entertainment provided.

—S. A. Dwyer has been elected president; Edward H. Newton, treasurer, and Otto Tegel, secretary of the senior class. Committees have been appointed to arrange for a banquet to follow the examinations.

## Original and Selected

### UNIFORMITY OF "STANDARDIZED" TINCTURES.\*

By Charles E. Vanderkleed and L. Henry Bernegau.

*"Can Uniform, and therefore 'Standardized' Tinctures be prepared from Assayed Drugs, without assaying the Finished Products?"*

The above question is not merely one of scientific interest to all engaged in promoting progress in professional pharmacy, but is of vital importance to the patient, to the physician, and to the pharmacist. That uniformity of medicinal agents is necessary to the scientific practice of therapeutics, no one will deny—but aside from the ethical and professional consideration of the question of standardization, the question is of much practical importance to the pharmacist, not only because of his hearty co-operation in placing the practice of pharmacy upon a scientific and professional basis, but because of the necessity of upholding the various State and National laws which now compel a strict adherence to the standards of our Pharmacopoeia.

Of the twenty crude vegetable drugs for which the Pharmacopoeia gives assay processes, eleven appear officially in the form of tinctures, and in each case the assay of the finished product is specified. Thus the Pharmacopoeia itself has already answered our question in the negative, since in each of these cases, the tincture is directed to be prepared from an assayed drug, and it is obvious that the Pharmacopoeial Revision Committee would not direct an additional assay of the finished product, thus greatly increasing the cost of the preparation, if it were not deemed a necessity.

It would appear, therefore, to be a waste of time to argue this question, were it not for the fact that many pharmacists have been led to believe in the safety and security of their position in purchasing so-called "assayed" or "standardized" drugs and preparing tinctures that are supposed to meet with the requirements of the law, without reassaying either the drug or the tincture. The object of the authors in writing this paper, therefore, is to point out the fallacy of such a belief, and to save from possible unpleasant experiences with those who are expected to enforce our laws, those who feel secure in their ability to do something which experience teaches is impracticable.

Many theoretical reasons for variations in the strength of the finished products made from different lots of drugs might be given, even though the drugs themselves conformed, at the time they were assayed, to the standards given. Chief among these reasons are the following:

*First.*—The drug employed, unless very recently assayed, may have a different strength from that given, due to moisture variation, deterioration, or other cause.

*Second.*—Faulty manipulation or imperfect percolation, as well as differences in rate of flow, and in temperature, will cause variation.

*Third.*—The given assayed strength of the drug may have been (and probably was) determined by means of a menstruum such as ether, chloroform and ammonia water, yielding an assay figure corresponding to the total alkaloidal strength of the drug, whereas the corresponding tincture is made with an alcoholic or hydro-alcoholic menstruum which may not so completely exhaust the drug as does the ether-chloroform mixture.

*Fourth.*—Differences in cellular structure, and in fineness and uniformity of the powder, may yield tinctures of different strengths from the different lots of the same drug, which, when assayed by means of an ether-chloroform mixture, may have assayed exactly alike.

Naturally, the answer to the first of these four reasons, namely, that the drug may have a different strength from that given, is that the "assayed" or "standardized" drug employed has been purchased under a guarantee of its strict adherence to the label. Our response to this answer is, that while such guarantee would be ample protection to the pharmacist in

\*Proceedings of the Pennsylvania Pharmaceutical Association, 1908.

selling the drug itself, it would absolutely cease to protect him when he himself converted the drug into a tincture.

The answer to the second of these four reasons (namely, that faulty manipulation or imperfect percolation may cause variation) is, that the skill of the pharmacist must be depended upon to avoid this variation. Our response to this answer is that a study of the results of assays of percolated products, covering many years, shows that, even in the hands of experts, devoting their whole time to the process of percolation, *different lots* of drugs, which themselves assay alike or nearly alike, yield products which vary greatly in original strength, and which must be diluted or fortified through a considerable range in order that the finished product may be brought to a uniform standard.

The natural answer to the third of the four reasons given (namely, that differences in the exhausting menstrua employed in the assay of the drug and in the preparation of the tincture, yield differences in results) is, that the Pharmacopoeia is supposed to take this into consideration in formulating directions for the assay and for the preparation of the tincture. Thus, hyoscyamus, which must yield not less than 0.08 per cent of myriatic alkaloids (by means of the chloroform-ether assay), is supposed to yield a tincture (made with diluted alcohol) which assays 0.007 Gm. of myriatic alkaloids in 100 Cc. Our response to this answer is that experience on a large scale has shown that this official allowance by the Pharmacopoeia does not always work out accurately in practice, the variation with different lots of drugs sometimes being more and sometimes less than the official allowance. This response also applies to any possible answer to the fourth of the four reasons given (namely, that differences in cellular structure, and in the fineness and uniformity of the powdered drug, cause variation in results). With regard to the latter, while it is true that the Pharmacopoeia specifies the fineness of the powder to be employed, the microscope readily demonstrates that one No. 60 powder may differ greatly in the amount of powdered drug *finer* than No. 60 contained therein, from another lot of No. 60 drug.

It was the writers' privilege not long since to examine several tinctures made by pharmacists (unknown to the writers) from reputed assayed drugs with the following results:

	Assayed, per ct.	U.S.P. Stand., per ct.	Variation, per cent.
Tinct. aconite .....	0.0834	0.045	87 overstrength.
Tinct. belladonna .....	0.0138	0.030	46 of the proper strength.
Tinct. belladonna .....	0.0420	0.020	40 overstrength.
Tinct. colchicum .....	0.1120	0.040	250 overstrength.
Tinct. digitalis .....	0.0163		35 below adopted standard.
Tinct. nux vomica .....	0.0225	0.100	92.5 of the proper strength, nearly correct.

In the above column it is natural that the tincture of nux vomica should not have varied far from the standard, as this is supposed to be made from the standardized solid extract. On the other hand, it is almost impossible to understand how such an extreme overstrength could be reached in the case of tincture of colchicum, unless some mistake had been made in its preparation. It is possible, however, that an extremely strong drug made into tincture according to the U.S.P. 1890 directions, might yield a preparation assaying as high as this one.

As the crude "assayed" drugs from which the above tinctures were made were not submitted, the relationship of tincture strength cannot be given. Desiring therefore to present some data along this line, the writers, about May 1, 1908, purchased from a wholesale house in Philadelphia, two samples of powdered aconite root in pound and half-pound packages. Portions of these drugs were used for checking the assays, and portions were employed for the preparation of U.S.P. tinctures, which were made from them in small amounts, following accurately the proportions and directions of the Pharmacopoeia. The following tablet summarized the results obtained:

Drug.	Fineness Declared of powder, per ct.	Found to assay, per ct.	Assay of Tinct., per ct.	U.S.P. Stand., per ct.	
Aconite root (No. 1).....	No. 60	0.5	0.84	0.067	0.045
Aconite root (No. 2).....	Very fine Not (about given, No. 120).	0.43	0.043	0.045	

#### Remarks:

No. 1. Tincture obtained was 50 per cent above U.S.P.

strength, although 20 per cent below strength to be expected from the drug assay. Drug itself assayed 68 per cent higher than stated on label. Moreover, although purchased May, 1908, the directions on the label were for the employment of 280 Gm. drug to make 1000 Cc. of Tinct., U.S.P., 1890. Had these directions been followed, a tincture assaying at least 0.187 per cent would have been obtained, or one over 500 per cent above present U.S.P. strength.

No. 2. Although no stated assay is given on label, this drug is stated to be "prepared from selected fresh root" and directions for preparing the tincture are given on label as follows:

"Powdered aconite root, 11 oz.; alcohol sufficient to obtain 2 pints."

As these are obviously the proportions for the preparation of the old 1890 tincture (although a diluted alcohol and not all alcohol was directed), the amounts specified in the present Pharmacopoeia were used. The extreme fineness of the powder, which made percolation extremely difficult and slow, apparently caused the assay of the tincture to measure up to the assay of the drug. This tincture happened to come out strictly U.S.P.

#### Conclusion.

These results show that great variations in strength of finished preparations as compared with the crude drug assays, are often obtained, and that it is not safe to accept without verification, the reputed "assayed" strengths of crude drugs as stated on labels. It follows, therefore, that uniform and standardized tinctures cannot safely be prepared from the "assayed" drugs on the market, without assaying and standardizing the finished products.

## THE MAN OF THE MORTAR.

By J. P. Brashear, Poet Laureate of the Tarrant County (Texas) Retail Druggists' Association.

The poets have sung of the warriors of old.

And many and thrilling the stories they've told;

But my feeble voice is a-tune all the while,

To the man of the mortar, the pestle and tile.

His watchword is caution—to duty he's tied,

And many the times that his patients are tried;

But he picks up his courage, renews the task,

Of answering questions the people may ask.

And while serving their wants, is forgetting his own,

In lending his talents, his time and his phone.

Now he turns to dispose of some beggars or tramps,

And to serve the dear people with much-needed stamps;

For his place is wide open while others are closed,

And many the tasks that are on him imposed.

He's a man full of wisdom, as all people know,

Else when you want knowledge, where else would you go?

He's the most indispensable man that I know.

Not even excepting the "man with the hoe."

## Silver Anniversary of Class of 1884.

St. Louis, March 27.—The St. L. C.P. Class of 1884 held the first annual banquet for the members of the class March 12 at Anshentz Hall, that being the silver anniversary of the graduation exercises. This is the second St. Louis class to organize, the Class of '75 having been organized for a number of years. Dr. H. Muetz was toastmaster and each member of the class told something of the days since he was a student and reminders of the college days were suggested in the talks of Profs. O. A. Wall, J. M. Good and Francis Hemm, the guests of honor.

The out-of-town guests were Henry Barth, of Lincoln, Neb.; W. H. Fogas, Mount Vernon, Ill.; Charles Meyer, St. Charles, Mo. Greetings were received from Schnh. Cairo, Ill.; A. Gordon, Palestine, Colo.; H. C. Smiley, Hot Springs, Ark.; William C. Kempinsky, Spokane, Wash.

The following officers were elected: George C. Berg, president; Charles Meyer, first vice-president; Otto Ude, second vice-president; Charles Bierman, treasurer; Oscar Bausch, of Meyer Brothers Drug Company, secretary. An effort will be made to have at least a greeting to be read from every member of the class at the next reunion, if the actual presence cannot be secured.

## Publicity and Promotion.

### Circular Letters.

The art of letter writing, whether the letter be intended for one or many, has undergone great changes within a few years. Ten years ago "a good letter" for use in the business world, or even in social correspondence, was stiffly grammatical and abounded in the greatest number of formal or set phrases. The art of letter writing was a Puritanical art, rigid and precise. Not until the dawn of the decade commencing with the year 1890 did art in correspondence begin to take form, a natural, conversational letter previous to that date being generally considered as affectively exaggerated. We looked for the elasticity, the resiliency of natural expression in printed dialect, but in correspondence the same naturalness of preserved expression was considered vulgar.

Present oral expressions tend to show the evolution of what may be termed an American language. So many individuals are bound by rule and rote that they would still have every used expression grown carefully from a Chaucerian root, forgetting that the purpose of language is to express present thought and not to embalmed dead classics. A far greater number appear to believe that a given thought should be orally expressed in the free, vigorous style which best conveys and defines meaning, and yet they would have an expression of the same thought through the art inscriptive or the art preservative stilted and almost geometrically precise. This is illustrated in the action of

the man who has orally addressed an intimate friend for years as "Bob," "Old boy," "My dear fellow," or in other terms equally affectionate, but who in a letter, invariably addresses his friend as "Dear Sir," concluding the body of the letter as though the writer and prospective recipient had never come within a thousand miles of each other, and concluding the same with "Yours truly, Jonathan Henry Smith." In a lesser degree the same criticisms may be applied to form or circular letters. The difference between an advertising adept and a tyro is that the adept writes as most people talk and the tyro writes as no one ever talked.

### Two Examples.

Here is a copy of a fluent, smooth and yet penetrating and convincing circular letter. The original is printed in two colors, red and blue, on a nine by twelve inch sheet of heavy, soft, white paper, the stock being not unlike a drawing paper. On this stock the tint of the dark blue letters sets deep and soft, while the light line ornamentation in dark red seems almost to stand in relief. The letter reads:

"In issuing this our second circular letter we cannot refrain from expressing our thanks to the many kind friends who have during the first month of our New Year and of our new firm of Perry & Son, encouraged us, first, by word of mouth, second, by commendatory letters, and last, 'The best of all the game,' by unusually frequent and liberal orders.

"In our printing about this store we have tried to steer clear of the use of big, black type and staring headlines. There are so many good things in and about the store that if we undertook to put their merits in big-faced type we could not find room to say this February word for our Prescription Department, which we have got in the finest sort of shape. Today we can—we trust with becoming modesty—refer you to its equipment as evidence of what has come to pass, in the line of changes and improvements wrought by this drug store of ours. Aside from the now known quality of our drug stock, we make it a special point to deliver prescriptions anywhere in the 21st Ward. Let your doctor phone us your hurry-up orders and we'll do the rest. We say this about the prescription department just to picture the general service of the store.

"If you should be the least bit interested in Valentines, we wish you'd come in and see the splendid offering we have provided for 1909. Some great beauties we've got; all the way from a post card to the handsomest thing in book form.

"In the conduct of a Drug Store, like any other kind of store, the question of price is always an important one—to both of us. A whole lot of us dispose of this question by simply making the statement: 'Our prices are the lowest.' It's rather an unpleasant subject to tackle, but, quality considered, we believe that our prices will talk for Perry's Pharmacy against equal service in all Philadelphia. Good Service means a great deal—WITH US—careful attention, promptness, helpfulness—even down to the bit of a Valentine."

At the top of the letter the name of the pharmacy and its location and the names of the firm and its members are enclosed in light line, double rule boxes and between the two boxes is a light line scroll ornament. These are in red, as are also three trefol ornaments between each two paragraphs. The signature of the firm closes the letter.

Many a critic would raise his hands in holy horror at the "we've got," "you'd," and other contractions, words and uses of capitals; but give such a critic a chance and he would probably turn out a letter printed on cheap paper at the top of which he would very likely have a letter-head taking up a quarter of the sheet. Amidst a jumble of impossible clouds and improbable cog-wheels and dear little birds without legs he would announce himself as a "wholesale druggist," when he is not even a big retailer. The heading would probably also impart the startling information that he dealt in pure drugs, stationery, cigars and tobacco (and never had a plug or sack of tobacco in the store) and also compounded prescriptions. Below this heading he would have the printing in what he considered a clever imitation of typewriting, a type impression which looks more like Sanscrit than typescript. He would use the first line of the limited space remaining for "Dear Sir," and mail all the letters to women. Then he would go on thus:

"We respectfully beg to announce that we are exceedingly grateful for the liberal patronage that has been bestowed upon us since the organization of this firm as at present constituted.

"We have the most complete and diversified stock of any drug store in the city. Prescriptions carefully compounded. Our prescription department is without a peer and is in charge of skilled graduates who compound prescriptions carefully and have their diplomas hung on the wall. We handle pure drugs and chemicals only and guarantee that your prescriptions will be carefully compounded.

"Our stock of valentines is without a peer. We have valentines at all prices from one cent up. Our valentines are very beautiful. We also have comic valentines. If you desire to purchase any valentines be sure to inspect our valentines before going elsewhere for valentines.

"Our prices are the lowest. We defy competition. We will not be undersold. Patent medicines at less than cost."

After having used all the room that remained below his circus-poster letter-head our ethical grammarian with the multiplication-table mind, would send this stuff to his printer and soon again be yowling "Advertising does not pay!"

An entire number of a magazine might be filled with model circular letters and yet he of no more help to our readers than by the presentation of the above contrasts. The make-up of the suppositious second letter is by no means a figment of the writer's imagination. It is a composite of sentences of letters which he has in his possession.

If druggists would write as they talk—they could if they would—even repeating some of the grammatical errors and slang Americanisms of their speech, their advertisements would "talk" and talk convincingly.

Be natural! No man naturally is an animated Green's Grammar, Webster's Dictionary and Wright's Rhetoric in one. Put yourself in your advertisements. Green and Webster and Wright are dead and a mixture of their mummies always produces just such a jumble as the second of the letters shown above.

### Her Preference.

"Well, Maggie, you have been married a year. How do you like your husband?"

"Sober, mum."

## WINDOW DISPLAYS OF VALUE AS A MEANS OF EXPLOITING MAGAZINES AS DRUG STORE SIDE LINE.

Attention has often been called in the ERA to the value of magazines and other periodicals as side lines in pharmacies, for they serve the double purpose of acting as a magnet to draw new patrons to the store while at the same time yielding handsome profits on their own account. Nor should it be forgotten that they afford an excellent means of relieving the monotony for patrons who may have to wait while prescriptions are being compounded. In the latter instance time passes faster and the dispenser is not under suspicion of being slow in his work, while often the magazine so interests the reader that its purchase is made as a result of partial perusal.

One of the druggists who is a firm believer in the magazine side line is D. V. Quigley, manager of the pharmacy of Robert W. Terbell, at Painted Post, N. Y. Mr. Quigley has found the line so profitable that he frequently makes attractive displays of the magazines and has found that trade has benefited greatly as a result. This is what he says regarding one of his displays, which is illustrated herewith:

"I consider magazines and newspapers first class both as a side line and as trade-getters. I have fifty customers who are subscribers for one New York paper which brings fifty people to my store each day (as I do not deliver one) and fully 60 per cent purchase something else. I find magazines first class also. My window displays increase their circulation 200, 300 and as high as 500 per cent and that is going some. I thoroughly believe that no other side line can equal the magazine as profit or as advertising for your drug store."

"I enclose the only picture I have of my *Good Housekeeping* magazine contest window and it is not a very good illustration. The main features were my son Harry in center with a copy of the periodical in his hand, and a large English walnut suspended in the center window over which a sign reads, 'Good Housekeeping all in a Nutshell.' I take great pleasure in arranging my windows and it certainly pays. You can use any part of this letter as you may see fit and I trust that the retail druggists will receive much benefit from your assistance in opening the eyes of those who do not know the value of magazines as a side line in a drug store."

## Graduates of Southern School of Pharmacy.

ATLANTA, Ga., March 27 Thomas H. Jeffries, Grand Master of Masons and president of the board of trustees of the Southern School of Pharmacy, delivered the principal address at the recent graduating exercises of the latter institution. Following is a list of the graduates: H. K. Bailey, Alabama; G. M. Bird, Georgia; S. M. Baynton, Georgia; E. F. Cox, Georgia; R. E. Darnell, Georgia; G. D. Elford, Georgia; W. W. Fisher, Tennessee; K. E. Foster, Georgia; T. A. Hancock, Florida; H. Johnson, Georgia; E. T. Lasseter, Georgia; G. C. Miller, Florida; D. V. Stanley, Arkansas; Miss Beatrice Tyler, Georgia; B. H. Waggon, Georgia; A. N. Wood, Georgia.

## Druggists and Postage Stamps.

It is rather queer that the entire population of the United States of America expects the druggists to sell postage stamps. It is not a fair proposition and the postal authorities should not tolerate it. It is not only a nuisance, but a loss of time and money to the druggist. It would be easy for any one to buy a book of stamps for 25 cents at a substation and have stamps on hand, instead of buying one at a time from one to five times a day at the drug store.—W. J. B., in *Chicago News*.

## QUESTION BOX

THE OBJECT of this department is to furnish our subscribers and their clerks with reliable and tried formulas, and to discuss questions relating to practical pharmacy, prescription work, dispensing difficulties, etc. Requests for information are not acknowledged by mail, and ANONYMOUS COMMUNICATIONS RECEIVE NO ATTENTION; neither do we answer questions in this department from non-subscribers.

In this department frequent reference is necessarily made to information published in previous issues of The Era. Copies of those may be obtained at 10 cents each, except a few issues which are out of print, for which we charge 25 cents each.

## Iodized Oil.

"P. C."—"I have had a good deal of trouble compounding the following prescription. I wish to ask your assistance through the Question Box:

R. Iodum anhydrous ..... 2℥.XXX.  
Lanum anhydrous ..... 5℥v.  
Oleum gossypii, q. s. .... 5℥i.  
Aetheris sulphuris ..... 5℥ss.

Misc. fr. oleum.

"I have trouble in keeping the iodine in the mixture. It turns white and should be of a brown color."

"However compounded this mixture (a modified form of 'iodized oil') will eventually become decolorized when exposed to the action of light. The customary procedure is to dissolve the iodine in the ether before mixing it with the anhydrous lanolin and cotton-seed oil. The mixture is then heated on a water bath to drive off the ether and decolorize it. This process has been objected to by Huzonpenny (see U. S. Dispensary, 19th edition) on the ground that if the oil be completely deprived of the odor of the ether, the heating must

be continued for several hours, which tends to render the oil quickly rancid. His plan is to rub up the iodine for five or six minutes in a porcelain mortar, with a small portion of the oil, and gradually add the remainder. In this way a limpid red liquor is obtained, which may be completely decolorized by exposure to the sun's rays, the resulting product not being any more liable to become rancid, it is claimed, than the pure oil and it is free from hydriodic acid.

### Tasteless Castor Oil.

(A. E., Dr. G. A. M.)—Formulas for this preparation have been frequently published in the ERA. Here are two of them:

(1)	
Oil of anise .....	4 minims.
Saccharin .....	1 grain.
Alcohol, 90 per cent .....	1 dram.
Dissolve and add .....	
Castor oil .....	4 ounces.
(2)	
Pure castor oil .....	1 pint.
Cologne spirit .....	3 fl. ounces.
Oil of wintergreen .....	40 minims.
Oil of saffron .....	20 minims.
Oil of anise .....	15 minims.
Saccharin .....	5 grains.
Hot water, a sufficient quantity.	

Place the castor oil in a gallon bottle. Add a pint of hot water and shake vigorously for about 15 minutes. Then pour the mixture into a vessel with a stop-cock in its base, and allow the mixture to stand for 12 hours. Draw off the oil except the last portion, which must be rejected. Dissolve the oils and the saccharin in the cologne spirit and add to the washed castor oil. The alcohol reduces the density of the oil and the washing partly removes the acrid principles. The sweetening and flavor are said to make the oil comparatively palatable for children.

### Mosquito Lotion.

(A. E.)—Under the above title "Pharmaceutical Formulas" gives these formulas:

(1)	
Insect powder .....	1 ounce.
Acetic ether .....	½ ounce.
Rectified spirit .....	4 ounces.
Macerate three days, filter and add.	
Oil of lavender .....	15 minims.
Rectified spirit to .....	5 ounces.
(2)	
Formalin .....	15 ounces.
Nylol .....	5 ounces.
Acetone .....	4 ounces.
Canada balsam .....	1 ounce.
Perfume, a sufficiency.	

Shake the bottle and apply a little of the lotion to the mosquito bite by means of a small piece of cotton-wool.

### Stick Cement.

(O. R.)—There are numerous formulas for cement in sticks, but it is not usually customary to incorporate a lead salt as one of the ingredients. Of the formulas we have at hand for making a cement to be molded into sticks the following are selected.

(1)	
White glue .....	½ pound.
White sugar .....	1 pound.
Water .....	1 pint.

Soak the glue in half a pint of water for 24 hours, then melt on a water-bath, adding the remaining half-pint and the sugar. Make a paper mold by wrapping stiff paper around a rod of the desired size and pasting the edges. Fit a plug into one end of this mold and pour in the glue mixture. When cold cut into sticks three or four inches long. In use, the end of the stick is melted in a flame and rubbed over the edges to be united, these being pressed firmly together. The cement may be made harder or softer by the use of more or less glue. This resists the action of cold water for a considerable time.

(2)	
Orange shellac .....	½ pound.
Gutta percha .....	¼ pound.
Melt together on a sand bath and form into sticks. These	

may be made in the same manner as directed for No. 1 and the directions for use are also the same.

(3)

Isinglass and parchment glue, of each one ounce; sugar candy and gum tragacanth, of each two drams; add to them one ounce of water; boil the whole until the mixture appears, when cold, of the consistency of glue. Then form into small rolls for use.

### Ice Cream Powder.

(W. F. D.)—Powdered gelatin, either alone or in combination with glucose or cornstarch, is usually employed for giving "body" to ice cream. A formula which has been published under the above title is:

Powdered sugar .....	3½ pounds.
Arrowroot .....	1 pound.
Corn flour .....	14 ounces.

Mix well. Use four ounces of the powder with every pint of milk, making a paste of the powder and a little of the milk, boiling the remaining milk, mixing the two and freezing in the usual way.

In some of the States the food laws require the use of such substances to be stated on the ice cream so made.

### Massage Cream.

(E. E.)—Formulas for massage cream were published in the ERA of October 22 and November 17, 1908, pages 524 and 760, respectively. We cannot give the formula for the proprietary articles.

### Razor Paste.

(G. P. S.)—Try one of the following:

(1)	
Finest emery powder .....	1 ounce.
Spermaceti ointment .....	1½ ounces.
Olive oil .....	¼ ounce.

Melt the ointment and stir in the emery powder. This is said to be an excellent paste for putting on stropps and keeping the razor sharp. It is put up in small collapsible tubes.

(2)

Black lead .....	2 ounces.
Mutton suet .....	3 ounces.
Oil of bitter almonds .....	2 minims.

(3)

Levigated rouge (ferric oxide) .....	2 ounces.
Pumice powder .....	½ ounce.
Mutton suet .....	3 ounces.
Oil of peppermint .....	2 minims.

### Castile Soap.

(C. B. C.)—"I have two gallons of olive oil which has become rancid. Will you please publish a receipt in the ERA for making castile soap with this oil?"

The wisdom of attempting to make an olive oil soap from a rancid oil is not apparent. However, here is a formula from an English source:

Olive oil .....	100 parts.
Soda lye, sp. gr. 1.33 .....	50 parts.
Alcohol (90 per cent) .....	30 parts.

Heat on a steam bath until saponification is complete; add 300 parts of hot distilled water, dissolve, and salt out by adding a filtered solution of sodium chloride, 25; sodium carbonate, 5, and water, 80 parts.

### Thymophen.

(W. A. S.)—According to Coblentz ("Newer Remedies," 4th edition), "thymophen" is an anodyne and antiseptic liniment manufactured by the Sieco Institute, Berlin, Germany. We cannot give the formula.

### Improved Dover's Powder.

Albert Early, Carlisle, Pa., sends the ERA the following formula which he believes to be an improvement over the regular formula for Dover's powder (power of ipecac and opium):

Powdered opium .....	1 grain.
Powdered ipecac .....	1 grain.
Powdered potassium bromide .....	8 grains.

He says that physicians who have used the powder so made claim that the potassium bromide is superior to the old sulphate or the sugar of milk used at the present time.

## PERSONAL MENTION

—FRED RAGATZ, of Dubuque, has accepted a position in the pharmacy of Rolling & Kraus, Bellevue, Iowa.

—WILLIAM GIDDINGS, of Ogden, Utah, has returned home from a two months' tour of southern California.

—EDGAR CASWELL, of Gorham, Me., was a recent visitor at Haverhill, Mass., where he was the guest of James Howard.

—PROF. H. H. RUSBY, of New York, was the guest of Dr. and Mrs. L. P. Kehler at their Washington home on March 26.

—FRED J. CARTER, of the managing force of Meyer Brothers' Laboratory, St. Louis, has returned from a trip to San Antonio.

—JOSEPH LE FEVE, of Milwaukee, is now employed as prescription clerk at the McDonald-Strassburger Pharmacy, at Green Bay, Wis.

—FERNALD K. MILES, of the Dr. Miles Medicine Company, of Elkhart, Ind., was a visitor in New York drug circles for a few days last week.

—B. C. HARTZ, president of Hartz & Bahnsen Co., of Rock Island, Ill., visited friends in the New York City wholesale drug trade last week.

—C. E. WINEGAR, of Babylon, L. I., has launched out for himself, having purchased the store of Arthur G. Howell, at Rockville Center, N. Y.

—SAMUEL L. HILTON, Washington, D. C., is being congratulated upon the rapid recovery of his wife, who has been suffering from pneumonia.

—WABU H. LEE, recently head prescription clerk for Wolff-Wilson Drug Company, St. Louis, has opened a store at 2748 Franklin avenue, St. Louis.

—JOHN VAN DALE, of the Pfeiffer Chemical force of city salesmen, St. Louis, has opened a store in the St. Charles Rock road, four miles from St. Louis.

—C. A. VOGT, of 12th street and St. Louis avenue, St. Louis, has sold his store to W. J. Wiese and will move to Davenport, Iowa, to go into business.

—RAYMOND LEER, of Reading, Pa., has retired from business on account of ill-health and taken possession of a farm near Friedensburg, where he will recuperate.

—WILLIAM G. COOK, traveling for the New York Quinine & Chemical Works, is back in New York for a few days, after accomplishing an extensive Western trip.

—G. W. FECHTER, of Toledo, Ohio, was severely injured recently by being thrown from a buggy when a horse that he was driving became frightened and ran away.

—F. C. HERRINGTON, president and treasurer of the Burlington Drug Company, Burlington, Vt., was a caller in the wholesale drug trade in New York City last week.

—MAX SAMSON, a prominent New Orleans druggist, has been appointed by Governor Sanders as a member of the Board of Administrators of the Louisiana State Insane Asylum.

—F. G. TANCE, of Delavan, Wis., and E. E. Grebel, of Beaver Dam, Wis., were among the druggist visitors at the establishment of the Milwaukee Drug Company last week.

—GEORGE M. SIBERT, one of the oldest and best druggists of Sumter, S. C., has resigned his position in China's Drug Store to become a traveling salesman for a Baltimore drug house.

—HUGO YITS, of Manitowoc, Wis., has been appointed purchasing agent for the Aluminum Goods Manufacturing Company, recently organized to include all of the leading aluminum plants of the country.

—HARRY A. DOCKUM, of Wichita, Kan., is not a believer in omens of ill-luck, but on the contrary expects to have all kinds of good fortune in his new home in North Lawrence avenue, the number of which is 1313.

—EDWIN MUTH, of Muth Bros. & Co., Baltimore, is mourning the loss of his mother-in-law, Mrs. Anna Mary Despeaux, who passed away March 19 after a short illness at her daughter's home, 1809 North Broadway.

—A. A. MACK, the new registered pharmacist at Crane's drug store, Portland, Mich., is a graduate of the Ontario College of Pharmacy and has been 13 years in the business. He was formerly manager of a drug store in Richland.

—R. E. LEE WILLIAMSON has retired from Williamson & Watts, a Baltimore corporation which conducts three drug

stores in the Monumental City, and has taken an office in the Builders' Exchange Building in East Fayette street.

—CHARLES S. IVES, of Syracuse, N. Y., has sold his drug store at 450 Hawley avenue, to his clerk, Charles F. Holley, and will locate on a farm in Herkimer County. Mr. Ives retires from the drug business because of failing health.

—ABOLF LANGE, Leavenworth, Kan., accompanied by his wife and returning from a trip around the world, arrived in New York last week and after spending a few days calling on friends in the metropolis left for home on last Thursday.

—E. M. FORMAN, who went to Baltimore from Centerville, Md., buying the retail drug store at St. Paul and 21st streets, put the latter up at public auction last week, but it was withdrawn owing to the insufficiency of the highest bid received.

—J. H. A. FINK, representing the Mallinckrodt Chemical Works, of St. Louis, has just returned from a six weeks' business trip to Cuba and Porto Rico. Mr. Fink called upon a number of friends in the New York drug trade last Monday.

—JOHN C. WALLACE, a well-known pharmacist of New Castle, Pa., was a visitor last week at the Drug Club in Philadelphia and discussed legislation pending in Pennsylvania which effects the drug trade, to an interested company of fellow pharmacists.

—PROF. CHARLES E. F. MOLLET, of the Department of Pharmacy of the Montana Agricultural College at Bozeman, is highly praised in an article recently printed in the Bozeman *Republican-Courier*, which devoted three columns to a description of the features of the college.

F. F. RAVENSCROFT, of Union Springs, secretary of the Alabama State Pharmaceutical Association, is making an inspection of all the drug stores of the State as the representative of the State Board of Pharmacy, to ascertain if the druggists are complying with the pharmacy laws.

—CHICAGO visitors last week included J. A. Larsh, Rensseler, Ind.; E. T. Scott, Westville, Ind.; J. D. Brown, Joliet, Ill.; W. A. Chiddell, Crown Point, Ind.; H. D. Abbott, Abbott & Co., Langdon, N. D.; L. C. Meyer, Sheboygan, Wis.; J. H. Vadhin, Bethany, Ind.; F. L. Mitchell, Mitchell & Smith, Mason City, Iowa.

—MARTIN NOLL, of 925 Goodfellow avenue, St. Louis, has just returned from an extended health trip to California and was so charmed with the country that about the first thing on his return was to visit Dr. H. M. Whelpley and enlist to go with the A.Ph.A. party to Los Angeles, so that Mrs. Noll may make the trip.

—MR. AND MRS. WYMOND H. BRADBURY, Washington, D. C., entertained informally at their Park Road residence on March 26. Among those present were Dr. and Mrs. L. F. Kehler, President C. A. Taylor, of the D.C.R.D.A., and wife, Mrs. Henry Evans and daughter and Mr. and Mrs. J. Leyden White and son, of New York.

—SAMUEL B. DAVIS, owner of a chain of stores in Philadelphia, entertained Capt. Ellis Parker, of Beach Haven, N. J., companion on many a fishing trip, in the Quaker City last week and incidentally had the captain substantiate many fish stories and tales of exciting experiences that Mr. Davis has related from time to time.

—ORNELIUS ZECHEL, enterprising young druggist at Pewaukee, Wis., has moved his pharmacy into a new building, where larger and more modern quarters are available. A new soda fountain is also being installed by Mr. Zechel, who, although he has been the owner of the business but a few months, has been most successful.

—MR. AND MRS. CHARLES REHFUSS, Miss Lebo, Mr. and Mrs. Otto Kraus, Mr. and Mrs. S. B. Davis and Mr. and Mrs. L. H. Davis, all well known in the retail trade of Philadelphia, spent a day last week at Seaside Park, N. J. They were shown around by Mayor Hanz, of the seashore resort, and L. Wickham, a Philadelphia druggist, who is an extensive property owner at Seaside Park.

—GEORGE H. JOHNSON, who represents the Boston house of Thomas C. Riley & Co., and one of the best-known traveling salesmen among the drug trade, was recently elected exalted ruler of the Boston Lodge of Elks. The election was of much more than local interest, while in the lodge itself the election brought out the great number of 674 members to vote. Mr. Johnson's friends everywhere, and especially in the Traveling Men's Auxiliary of the Massachusetts State Pharmaceutical Association, of which he was one of the organizers, and is now one of the officers, have since showered him with congratulations on his notable victory.

## BOARD EXAMINATIONS

### Pennsylvania.

**HARRISBURG, March 27.**—The February examination by the Pennsylvania Pharmaceutical Examining Board was attended by 40 applicants for registered pharmacists' certificates and 65 applicants for registered qualified assistants' certificates. Twenty passed for registered pharmacists and 33 for registered qualified assistants. Examiners present were Louis Emanuel, Pittsburg; L. L. Walton, Williamsport; George D. Stroh, Pittston; Christopher Koch, Philadelphia, and Charles T. George. The following were the successful applicants:

**REGISTERED PHARMACISTS.**—Samuel Vigderman, William F. J. Friedler, Alexander Livingston, William C. Crist, Eugene F. Morton, A. H. Martin, all of Philadelphia; Edward C. Reif, Jr., Pittsburg; Albert R. Flanagan, Williamsport; Edwin L. Study, Tyone; L. W. Hall, Sunbury; Louis E. Kern, Johnstown; Walter F. Huebner, Johnstown; William A. Seybert, Hazleton; Stowe Shoemaker, Lock Haven; Joseph L. Pennock, Coatesville; C. L. Meadows, Crafton; Claude H. Kratzer, Allentown; Edgar R. Buzzell, Phillipsburg; Lee F. Manger, Pottstown; William K. Ehrenfeld, Greensburg.

**REGISTERED QUALIFIED ASSISTANT PHARMACISTS.**—Ellsworth R. Jones, C. W. Greenziner, William Borgos, John L. Kooker, Jr., Ludvig Zoerb, Robert D. Bricker, Charles E. Corkhill, Marshall P. Snyder, James C. Faheny, Anthony G. Cavenas, James H. Pauley, Edwin P. Runyan, all of Philadelphia; Jesse J. Rosen, Pittsburg; Edward B. Weaver, Williamsport; Fred W. Melville, Scranton; Charles G. Cone, South Bethlehem; John R. Rupert, Lewistown; C. Raymond Moyer, Reading; Joseph H. Bickert, Huntingdon; William C. Harris, West Chester; Norman H. Thomas, Hazleton; Robert E. Hemminger, George E. Ritchey, Jacob C. L. Ritchey, all of Carlisle.

The next meeting for the examination of applicants will be held in Pittsburg and Philadelphia on May 21 and 22. All applicants for examination should apply to Charles T. George, secretary, not later than ten days before the meeting of the board for necessary blanks and information.

### Texas.

**GONZALES, March 27.**—Secretary R. H. Walker announces the following list of applicants who were successful at the meeting of the Texas Board of Pharmacy, held recently in Fort Worth, and who were granted certificates:

**CERTIFICATES.**—C. A. Christian, Lindale; W. E. Saucier, Houston; E. B. Powers, Rock Island; H. A. Johnston, Wharton; J. H. Gallagher, San Antonio; C. F. Zeitfuss, Rockdale; Ed. B. Moseley, Jr., W. D. Butler, E. E. Crawford, D. G. Gorman, Leon Weinberg, Fort Worth; G. C. Thomson, Waco.

**ASSISTANT CERTIFICATES.**—E. H. von Rosenberg, Dallas; Q. E. Carter, Wallhalla; J. H. Rogers, Dallas; T. A. Mar in, Midland; W. A. Martin, Dallas; H. W. Lingsweiler, Fort Worth.

### Eastern Branch, New York.

The following candidates passed the examination for licensed pharmacists at the February meeting of the Eastern Branch of the New York State Board of Pharmacy held at the New York College of Pharmacy: Louis T. Blatz, J. J. Blumekranz, E. E. Coleman, A. A. Heller, P. P. Hoffmann, D. Levy, W. U. Meier, I. F. Rindler, S. Rubinstein, B. H. Schubert, T. S. Terry, E. A. Tietze, E. Tomati, P. Galante, I. Karpe, S. P. Lichtman, G. Marrocco, M. J. Feely.

### New Officers for Seabury & Johnson Elected.

At a recent meeting of the directors of Seabury & Johnson, Dr. Henry C. Lovis, who has been secretary and treasurer, pro tem, was elected president, which office has been vacant since the death of George J. Seabury, which occurred on February 13. Other officers elected were: Secretary, Edgar L. Benjamin; treasurer, John B. Dakin.

### New Uptown Hegeman Store Will Open in September.

A new Hegeman store will be opened in September at Broadway and 54th street, in the Benard Apartment Building, which is to be the largest of its kind in the world.

## OBITUARY.

### William J. Harrison, Druggist and Senator.

**LAKEWOOD, N. J., March 27.**—William J. Harrison, State Senator from Ocean County, died in his home here recently of acute pneumonia. He was 57 years old and unmarried. He was president of the People's Bank of Lakewood and belonged to the Masonic and many fraternal orders. He was postmaster of Lakewood for nine years, a member of the Democratic County Committee and represented the county in the Assembly in 1902. He was engaged in the retail drug business and was a member of the New Jersey State Ph.A.

### Obituary Notes.

—**MRS. J. H. STEIN**, wife of the Reading (Pa.) pharmacist, is dead, aged 92.

—**STEPHEN R. THOMA**, formerly in the drug business in Fairfield, Iowa, is dead.

—**ASA G. LUCE**, retired druggist, Utica, N. Y., is dead, aged 78. A widow and two sons survive.

—**DR. HENRY CLAY McCORMICK**, of Pen Argyl, Pa., is dead, aged 65. A widow, son and other relatives survive.

—**WILLIAM H. FULLER**, aged 78, is dead in Skowhegan, Me., where he was engaged in the drug business for more than 40 years.

—**WILLIAM E. WINSTEAD**, of Cedar Rapids, Iowa, is dead, after a long illness. Industry and affability won for him a host of friends.

—**CHARLES H. STEELE**, of Stenbenville, Ohio, is dead, aged 50, as the result of a murderous attack made on him in his home by a robber.

—**WILLIAM ALWARD**, a pioneer druggist of Montana, who was one of the partners of the Bozeman firm of Rocher & Alward, died recently.

—**EDWARD ZUCKERLY**, of Birmingham, Ky., is dead, aged 70. He came from Saxony in 1861 and his father was a noted pharmacist. He was unmarried.

—**FRANCIS PARES BROWN**, for 28 years in the employ of Church, Dwight & Co., New York, died recently of heart disease at his home in Brooklyn Borough.

—**GEORGE W. DARLING**, Whitefield, N. H., is dead, aged 62. He was prominent in public affairs, belonged to many societies and was formerly engaged in the drug business.

—**RICHARD GRAHAM**, of Graham & Wortham, Corvallis, Ore., is dead, aged 63. A widow and six children survive. He was a native of Ohio and went to Oregon by ox team in 1863.

—**BERT E. KING**, who conducted a pharmacy at Battle Creek, Mich., is dead of tuberculosis, aged 34. He formerly was in the drug business in Mason, Mich., and once managed a pharmacy for Travis & Baker, in Fowler.

—**DR. MILTON SAWYER WOODMAN**, of West Lebanon, N. H., is dead, aged 59. Lately he had devoted his attention to his medical practice. He was prominent in public affairs and active in Masonry. A widow, son and daughter survive.

—**WILLIAM HITY WELKS**, manufacturer of chemicals, aged 31, died recently at his country home, White Plains, N. Y. He spent his early life in Philadelphia and won recognition for his original investigations in chemistry. For 30 years he had resided in New York City.

### Bankruptcy for Store H. W. Atwood Founded.

A petition in bankruptcy has been filed against the Atwood Drug Company, which has a drug store at 850 Broadway, near 13th street, New York City, by these creditors: Carrie L. Atwood, \$3000 on notes; Albert H. Bullard, \$20, and the Lillibridge-Weeks-Thurlow Company, \$72. It is alleged that the company is insolvent, made preferential payments to various creditors, of which \$200 was to McKesson & Robbins, and on March 26 admitted in writing inability to pay its debts. Judge Hough appointed Jesse Watson receiver with a bond of \$2000 and authorized him to continue business for ten days. The assets are estimated at \$3000. The business was established 43 years ago by Herman W. Atwood, who died in 1897, and was subsequently carried on by his daughters, Mabel J. and Carrie L. Atwood, as the Atwood Pharmacy until the present company was incorporated, April 10, 1903, with capital stock of \$10,000. Joseph F. Griffin was president of the company and George B. Wray vice-president until October, 1904, when Mabel J. Atwood became president and treasurer and Carrie L. Atwood vice-president and secretary.

## NEW METHODS IN MANUFACTURE OF BOTTLES.

## Suspension Agents for Emulsions Also Discussed at the

**March Meeting of the Baltimore Branch, A.Ph.A.**  
BALTIMORE, March 27.—The March meeting of the Baltimore Branch of the American Pharmaceutical Association, held at the Hotel Caswell, resolved itself into a symposium of various processes related directly or indirectly to the drug trade. P. I. Heinsler described how some of the 40 blue bottles are made. As president of the Maryland Glass Corporation he has lately taken up and studied thoroughly the methods of glass manufacture, and he gave an extended review of the development of glass manufacture since the first known production of vitreous substances down to the present perfection of the glass-blower's art. He gave the general composition of the most used glasses, the means and methods of coloring, tempering and blowing, and a detailed account of the manufacture of bottles, dwelling especially on the use of the mechanical processes, whereby far greater uniformity is secured, and which do away with some of the difficulties formerly encountered in bottle manufacture.

H. A. Brown Dunning, who has been experimenting for several years to determine, if possible, which suspending agent or agents gave the most satisfactory emulsion of fixed oils for extemporaneous use or for keeping purposes, stated the results attained. He said he had found that the "phosphatic" type of emulsion stood long storage the best, and was even when fresh, the most palatable. Acacia produces a very smooth and perfect emulsion, but separation soon takes place. This product he considers the best for extemporaneous use. The proportions of acacia and water directed in the N.F., Dr. Dunning found more satisfactory than the proportions generally used, i. e.: one-fourth as much acacia and one-half as much water as oil. Tragacanth gave the most permanent suspension, but the emulsion was not so smooth as with acacia. Tragacanth should be combined either with acacia or glycerin, as it prevented separation. The use of 12 grains of tragacanth in place of dextrin gave a much better N.F. emulsion of cod liver oil with extract malt. Sapouin in proportion of 1-16 grain to the ounce was the most perfect emulsifying agent, but its use could not be recommended until its medicinal effect is better known. Irish moss emulsions were smooth and white, but not so desirable as the acacia emulsion. Dextrin emulsions were unsatisfactory in almost every respect. Ten per cent alcohol, eight minims of a solution of potassium hydroxide to the ounce, and sufficient salicylic acid to saturate the aqueous portions of the emulsion, were used as preservatives, but all the above-mentioned emulsions became unsalable after storage for some time, either through oxidation, fermentation, with the development of a sour taste or excessive separation, although the "phosphatic" type was found to stand the storage best. Acacia emulsion became sour more readily if syrup was present.

It was the sense of the meeting that no official emulsions of cod liver oil, castor oil, or petroleum should be kept more than four days before use.

Letters were read from M. I. Wilbert inviting the members to attend the meeting of the Philadelphia Branch and also inviting the Baltimore Branch to meet jointly with the Washington Branch in May.

Otto Raubenheimer, in a letter, called attention to the proposed joint meeting of the Eastern branches in Atlantic City in June, coincident with the annual meeting of the American Medical Association. Secretary E. F. Kelly was instructed to obtain further details of these meetings and to advise the members as to complete arrangements.

## A Popular Illinois Traveler.

VANCE BUCKER.

of Chicago, is a member of the entertainment committee of the Illinois Pharmaceutical Travelers' Association and is active in preparing plans to make the forthcoming meeting of the Illinois State Ph.A., at Quincy a success. He represents the National Lead Co.

## CHICAGO BRANCH OBJECTS TO FAKE "ADVS."

## National Formulary Discussed and Educational Campaign for Prerequisite Legislation is Proposed.

CHICAGO, March 27.—Considerable interest was manifested in the subjects discussed at the March monthly meeting of the local branch of the American Pharmaceutical Association held in Northwestern University. The Branch went on record against the publication of advertisements of fake prescriptions in prominent newspapers by adopting the following resolutions:

"Whereas, Reputable Chicago newspapers are accepting ads. in the nature of prescriptions which are exploited as cures supposed to have originated from some celebrated specialist; and,

"Whereas, These so-called prescriptions usually contain some secret nostrum, which involves a deception on the public and makes the druggist a party to a fraud; and,

"Whereas, Many of these prescriptions contain whisky, gin or some other spirituous liquor as a part of the formula, therefore, be it

*Resolved*, That the Chicago Branch of the A.Ph.A. deplores the action of the Chicago newspapers in accepting these fake ads, and calls upon them to submit these preparations to the Illinois State Board of Pharmacy and State Board of Health for an opinion before admitting them to the advertising columns of the papers."

The principal topic of the programme related to the proposed revision of the National Formulary, Professor Hallberg briefly outlining the work of some of the subcommittees regarding formulas that should be dropped and formulas that should be admitted or improved, also flavors and coloring.

Mr. Boehm asked why it was proposed to leave morphine out of syrup of white pine compound. Mr. Avery said that this syrup was frequently prescribed without morphine. Mr. Yeomans said it was especially desirable to leave out the morphine because the syrup was frequently prescribed for children. Professor Hallberg said that there was no necessity for the morphine, that the chloroform gave all the sedative properties required, and that when he published the first formula he included the morphine, a fact which soon he regretted, realizing that it was a mistake and that he had always since made the preparation without morphine, stating the fact on the label.

President Oldberg said that both the Pharmacopoeia and National Formulary should be revised in such a way as to give the pharmacist a chance to make his own

prescriptions with no greater trouble and with no more apparatus than is absolutely necessary.

Mr. Boehm referred to syrup of rhubarb and potassium and some of the elixirs, and said that he believed it would be a great advantage if, instead of using the fluidextracts, the crude drugs were employed, as the amount of menstrua is ample for a thorough extraction of such drugs and tends to give a more stable preparation than where fluidextracts are used.

Otto Bruder read a paper embodying suggestions for the improvement of the N.F. and comprising among other features information as to preservation, desirable additions and preparations that should be dismissed.

H. H. Harrison said in regard to flavors that not only would the large manufacturers secure fresher and better volatile oils than the retail pharmacists were able to obtain, but that they used various other substances as well, several of the synthetics being cited as examples.

Theodore C. Scheips exhibited a chocolate syrup of phenolphthalein that he had prepared to meet the demand of similar preparations recently introduced, also a syrup of apricot which he had found to be the basic flavor of a certain cough remedy largely advertised to the medical profession.

Charles H. Avery, of the State Board of Pharmacy, made

a report of what was done at the recent committee meeting. He said that some opposition had developed among the druggists in the smaller cities throughout the State to the proposed prerequisite features of the amendments and it was quite evident that some of the druggists did not understand the situation. The objection generally made was the consequent increase in the clerks' wages. It was apparent that the opponents of the proposition did not understand that if the proposed amendments were incorporated in the law the privileges of the registered assistant pharmacists would be increased and competent clerks provided in this way. However, the committee which represented the Chicago Branch of the A.P.A., the Chicago Retail Druggists' Association and the State Board of Pharmacy did not deem it best to undertake to secure the amendment of the law at this time, but rather to enter into a campaign of education with a view of bringing the matter clearly before the druggists of the State so that they might thoroughly understand it.

Mr. Avery said the Board of Pharmacy proposed to make the examination for full registration more rigid and inquire into the qualifications of the applicants more thoroughly. It was of the opinion that the Board of Pharmacy possessed authority beyond that it had heretofore used in regard to examining into the qualification of candidates as to what their preparation for the examination had been.

President Oldberg considered the qualification of applicants as fully as important as their answers to the questions submitted in the examination. These qualifications should include a statement of their educational preparation; what studies had been pursued, what text books employed and similar information.

Next meeting occurs on Tuesday evening, April 29.

#### Illinois School Alumni Elects Officers.

CHICAGO, March 27.—The Alumni Association of the University of Illinois School of Pharmacy held its annual election last night with this result: President, Dr. A. W. Baer, '85; first vice-president, Lotus L. Huston, '07; second vice-president, Frances E. Wells, '05; third vice-president, E. J. Karlovsky, '03; secretary-treasurer, A. H. Clark, '04; historian, Charlotte E. Stinson, '00.

The historian, Miss Stinson, presented a very interesting report. Arrangements for the alumni banquet at the Palmer House on commencement evening, April 29, were discussed.

The class of 1884 will celebrate the 25th anniversary of its graduation by a reunion in Chicago on commencement day and the members of the class will have a separate table at the alumni banquet.

Professor Day invited the alumni to attend the botanical excursions which will start from the college every Tuesday at 1 p. m. during May and on the first Tuesday in June.

#### C.R.D.A. Will Resist Strained Law Interpretation.

CHICAGO, March 27.—The executive board of the C.R.D.A. held a special session recently to consider the dram shop law as it affects druggists owing to some new phases that have come to light. It was decided to offer shelter under the legislative wing of the Chicago association to all druggists who might be charged with violation of this law. The meeting was called by President Yeomans when it was known that charges had been filed against several members of the association. It seems that a druggist can be charged with violation of the State dram shop law even if he has faithfully lived up to the city ordinances. That position will be combated by the association lawyers.

#### Special Train for Pharmacists, Chicago to Quincy.

CHICAGO, March 27.—The Burlington Railroad is contemplating putting on a very fine special train for the accommodation of pharmacists who attend the convention of the Illinois A.P.A. and the I.P.T.A. at Quincy the second week in June. Drug men in charge believe this is another point added to the many others to make the attendance at the convention go above all other preceding ones. The train will leave Chicago at 8 a. m. and make a straight run for Quincy.

#### Will Have One of the Finest Stores in New Jersey.

NEWARK, N. J., March 27.—C. O. Padelford will move from 280 to 283 Park avenue about April 1, where he will have one of the finest drug stores in the State of New Jersey.

### QUESTION AS TO BOARD'S LEGAL STATUS.

#### Illinois Pharmacists in Quandary as Law Makes No Provision for Hold-over of Members of State Body.

CHICAGO, March 27.—Registered pharmacists, assistants and apprentices who have been given certificates by the State Board of Pharmacy since January 1 are wondering what their legal status is, since it has been called to their attention that one of the members of the board legally went out of office December 31, 1908, although he still continues to act as a member of the board and signs all certificates issued by that body. Charles H. Avery is the member of the board whose standing is questioned.

In regard to the make-up of the board, the law, after providing for the appointment of the five members by the Governor, says: "Persons so appointed shall hold their offices for five years, and the terms of office shall be so arranged that one shall expire on the 31st of December of each year."

The law, unlike those relating to other State boards, does not state that the member whose term expires shall continue in office until the appointment of his successor. Mr. Avery admits this, but claims he continues in office by custom.

This situation not only puts in question the legality of the certificates issued by the board this year, but also all the other acts of the board since January 1.

Mr. Avery was president of the board in 1908. It is a custom of the board to elect the member whose term expires next to the presidency. The present head of the board is John B. Michels, of El Paso, Ill., whose term expires December 31, 1909.

Another angle to the situation is furnished by the fact that Mr. Avery is president of the American Druggists' Fire Insurance Company. He is also Illinois agent for the company, which insures only the property, stock and fixtures of druggists.

While no question of Mr. Avery's competency as a member of the State Board of Pharmacy has been raised, many druggists have questioned the propriety of his holding the office in view of his connection with the insurance company.

#### Chicago Notes.

—Chicago druggists will no longer collect gas bills for the local companies for a small commission. Considerable agitation has been going on around C.R.D.A. headquarters recently against druggists acting as agents of the gas companies. People's Gas Light & Coke Co. have made arrangements to have accounts paid at various offices of its own in the city. Thus a long-time side interest of the Chicago druggists has passed away.

—The Northwestern University School of Pharmacy has organized a ball team. A game is scheduled with a team of the law department of the university for April 10 on the Lincoln Park grounds. Games are being arranged with teams of technical schools and colleges of the city and the faculty is reported pleased over the new development in class spirit.

—In electing new aldermen for the Chicago City Council, the C.R.D.A. has cast an eye over the candidates and is now boosting those men who have helped put bills or ordinances through the body that the Chicago druggists espoused. John Downey, of the 29th ward, and Michael McNerny, of the 30th ward, are receiving the support of the druggists.

#### Where to Find Analytical Chemists.

Beginning with this issue of the ERA new index headings have been added to The Classified Buyers' Directory—"SODA CHECKS AND POKER CHIPS" and "CONSULTING AND ANALYTICAL CHEMISTS." Druggists who are called upon for names of expert analysts for the examination of foods, drugs, waters, sputum, blood and the assaying of ores should take advantage of the expert services offered by these chemists. Many new names have also been added under some of the other headings. Busy buyers will find these Classified Ads. of great value.

#### Working for the Saratoga Springs Bill.

SYRACUSE, March 27.—A representative of the Saratoga Springs Business Men's Association is making a tour of the cities of northern New York in an effort to develop a sentiment favorable to the Brackett Bill, now pending at Albany, which empowers the State to acquire the mineral springs at Saratoga and maintain them as a State reservation for the benefit of the people for all time to come.

## VICTORY WON BY THE MASSACHUSETTS BOARD.

### Governor's Recommendations Rejected in Legislature and New Pharmacy Law Doubtful of Passage.

Boston, March 20.—The Massachusetts Board of Registration in Pharmacy has triumphed in its contest with Governor Draper over the question of reorganizing and consolidating the four professional registration boards of pharmacy, medicine, dentistry and veterinary medicine. The recommendation for the consolidation was made in the Governor's inaugural address in January to the Legislature. The committee on public health, to whom was referred that part of the message, reported adversely on the Governor's recommendation. But the friends of the Governor rallied in the House of Representatives when the matter came up. Debate began last Wednesday afternoon and was continued Thursday, when a vote was reached.

Representative Weeks, of Everett, was the leader of the Governor's friends. He said the present separate organization of the registration boards should be abolished and all four boards consolidated in the interest of both efficiency and economy. Dr. Oliver, of Athol, chairman of the committee which reported adversely on the measure, made a strenuous opposition to the bill, pointing out the fallacy of hoping for greater efficiency by centralizing the powers of four professions in the hands of a single executive at the meager salary of \$2500, which the bill proposes to pay. Dr. Oliver's opposition was so intense that one of the Democratic representatives could not refrain from calling attention to the Republicans who were opposing the Governor's recommendation now, when but a few weeks ago, when it was made, they vigorously applauded it.

Representatives Saunders, of Clinton; Montague, of Boston, and Coleman, of Nantucket, spoke in opposition, all emphasizing the impracticability of such a consolidation, and the unwisdom of attempting to have a single channel for the registration and supervision of members of four widely different professions.

When the question came to a vote the opposition was so overwhelming to the Governor's bill that not even a division was called for.

The new pharmacy bill has struck something of a snag, and the probability is that it will not go through as at first reported. After having passed the two branches of the Legislature to the very last stage—the enactment of it in the Senate—it was quietly held up by the president of the Senate and remained in his pigeonhole for a week or more. Following the defeat of the Governor's Bill for reorganizing the registration boards of medicine, pharmacy, dentistry and veterinary medicine, the Senate moved to reconsider the pharmacy bill.

Section 5 of the bill, which provided that the public statutes relating to the advertising of licenses and the giving of bonds therefor, should not apply to druggists' licenses, was the point of attack. It was moved in the Senate that this section be stricken out. The amendment passed without opposition, and then the bill as amended was sent to the House for concurrence. There it now is.

This new amendment, therefore, restores the two expenses which the new pharmacy bill revoked, and which provided for turning more money into the State Board of Pharmacy without increasing the expense to the druggists. The net result of the new bill, so far as expense is concerned, is to increase the cost of the druggists' license \$4, that being the increased sum required for the certificate of fitness from the State Board of Pharmacy.

Notwithstanding this item, druggists as a whole are rather satisfied with the new bill as being an improvement over the present law.

## BIG SHAKE-UP IN LOUISIANA STATE BOARD.

### Governor Sanders Disregards Recommendations of State Ph.A. and Appoints Entirely New List of Members.

NEW ORLEANS, March 27.—The greatest surprise that New Orleans druggists have had in a long time came to them recently when Governor Sanders announced the personnel of the new State Board of Pharmacy. It was generally believed by druggists in the city and all over the State that, following the policy of his predecessors, Governor Sanders would act upon the recommendation of the Louisiana State Pharmaceutical Association in appointing the new board. But he did not do this. The recommendation of the association was forwarded to him by Secretary F. C. Godbold, of the State board, but in the appointments just announced it was completely ignored. Not one of the old board, not even Mr. Godbold, who has been secretary since 1888, is reappointed. The new members, all of them strong men in the trade, are as follows: Gustave Seemann, Peter Rupp, Fred Earhart and M. M. Bradburn, all of New Orleans; E. L. McClung, Natchitoches; W. A. Allen, Monroe; Paul Eckles, Crowley; Charles W. Outwaite, New Iberia, and E. H. Walsdorf, of New Orleans, the latter in place of J. R. Olivier, who failed to qualify.

The old board which is thus replaced consisted of: Max Bernstein, Shreveport; T. J. Maguire, Baton Rouge; T. J. Labbe, St. Martinville; E. L. Aaron, Alexandria; F. D. Buckingham, Shreveport; Adam Wirth, William Levy, C. D. Sauvignet and F. C. Godbold, all of New Orleans.

The commissions of the old board expire April 20, which is before the next examination, but the new board will take possession this week and will conduct the May examinations.

"I have been secretary of the board since 1888," said Mr. Godbold. "I have thus attained my majority and am content to step down and out."

## TO FIGHT FOR SLOT 'PHONES.

### Druggists in St. Louis Will Appeal to Public Utilities' Commission.

ST. LOUIS, March 30.—This city now has a public utilities' commission and it is entirely possible that one of the first cases that will be taken before it is the grievance of the Retail Druggists' Association against the Kinloch Telephone Company.

E. A. Bernius, chairman of the St. L. R.D.A. telephone committee, is taking up his work with earnestness. He was a member of the committee last year when William Busch was chairman. These two and the other members succeeded in

carrying the demand for slot machines up to President Orthwein, of the company, and getting a final refusal of slot machines. Heretofore the committees have been compelled to accept promises. Mr. Busch clanged that sort of thing when he brought Wilhelm Bodeman, of Chicago, here to attend one of the meetings and arouse enthusiasm. He had Manager Robert, of the Kinloch Company, at the same meeting, but Mr. Robert was in a half-defiant and half-conciliatory mood.

Then Mr. Busch played his trump card and asked for a meeting with the president and directors. President Orthwein said he would not rent the machines on the market for the druggists and would not give them slot machines even if he secured control of a machine. Inasmuch as the Kinloch now has some slot machines in operation, the druggists think they have a fairly good case for the commission.

### Price War Raging Over Patent Medicines.

SYRACUSE, N. Y., March 27.—A cut-rate war on patent medicines was inaugurated in this city a month ago and has since developed rapidly.

Helped Rebuild San Francisco.

R. F. MILLER.

of San Francisco, who played a conspicuous part in the restoration of that city after the earthquake and fire of 1906, is president of the Owl Drug Co., which has added to its chain of pharmacies by opening its fifth San Francisco store. The new pharmacy is in the Chelan Building, 775 Market street, and is one of the most complete in the country. Mr. Miller's company also has three stores in Oakland and three in Los Angeles, making eleven altogether.

# LETTER BOX

## Medicine Plants Blooming in Sunny Texas.

Editor *The Pharmaceutical Era*:

Spring is upon us down here and while the East and the North on Inauguration Day were in the grasp of a fierce blizzard the temperature in Sherman was about 90° F., with all kinds of fruit trees in bloom and the air heavy with perfume. All my perennials in my drug plant garden are coming out and growing fast, while the annuals I have resown. Blessed thistle, borage, parsley, benne and marigold seed and the wild plants are pushing up all over the prairies and in the woods. I will begin to harvest horehound about April 1, and from that time on the different plants will come in quick succession. The Bureau of Plant Industry at Washington is sending me a great variety of new seeds and plants to be tried out in this latitude. Our Congressman is still at work on the proposition of setting a Drug Plant Experiment Station here at Sherman and it looks as if he might succeed. The ERA seems to have a great circulation, as I am getting letters from all over the country in regard to my work here and the writers all begin by referring to what they have read in your columns. I am particularly happy today in that I have with me Mr. Sady Mishino, a very learned and distinguished Japanese traveler who is now touring Texas. He speaks English fluently, as well as several other languages, and is correspondent for several leading Japanese papers. He seemed much interested in my garden.

Yours truly,

Sherman, Tex., March 8, 1909.

J. LONG.

## Prefers Young Women to Boys or Men.

Editor *The Pharmaceutical Era*:

In calculating woman's part in the pharmacy of the future we must consider her place on the commercial as well as the professional side and in this consideration we can only surmise how many channels she may successfully navigate. In the Washington (D. C.) Drug Exchange young women are used for all but heavy labor. Stock keeping and order filling are done exclusively by them, and so far as I am aware, this is the only wholesale establishment in the country where such work is done by women. It is true that the "Exchange" is a co-operative concern owned and managed by retail druggists, yet it is a model wholesale house and not a very small one either. According to Manager Bradbury, the saving in per capita salary is not great; but effectiveness of service through cleanliness, order, quiet and reliability make the service of these young women much cheaper than would be the service of boys or men. That is to say: the woman does more for a dollar and does it better.

If the retailers who are responsible for this innovation can purchase merchandise cheaper from their co-operative concern than from regular jobbers, the difference in character of help is probably one of the causes contributory to the effect and suggests that unless male helpers in the drug world bestir themselves, many of them may ultimately be replaced by women.

OBSERVER.

Philadelphia, March 19.

## Brown and Nolte Win Bowling Marathon.

PHILADELPHIA, March 20.—The event of the week in local drug circles was the six-hour Marathon bowling contest for two-men teams that took place this afternoon.

The match was won by P. P. Brown and H. A. Nolte by the score of 2023. Brown bowled a stronger game late in the contest and steadily out down the lead that had been held by Secretary Frank W. Smith and Treasurer L. H. Davis, of the club, from almost the beginning of the contest. The latter scored 2023. The other teams and their scores were: Buchanan and Huts, 1923; McCullough and Jolley, 1861; French and Duffy, 1832; and Miller and Schulte, 1821. Buchanan made the high score, 200, and Davis was second with 199. The entrance money, instead of being divided in cash, will probably be invested in a cup emblematic of the club championship, which will be contested for regularly. Mr. Nolte also won the silver cup in the individual handicap bowling tournament, beating out a large field of contestants.

## OPIUM REGULATIONS ARE PROMULGATED.

Conditions Under Which the Drug May Be Imported for Medicinal Purposes, in Effect Beginning Today.

WASHINGTON, March 27.—New regulations affecting the trade in opium were issued by the Treasury Department today. The regulations are intended to carry out the recent Act of Congress which prohibits the importation of opium except for medicinal purposes, and will be effective on and after April 1. They are considerably extended beyond those that were submitted to the Treasury Department by the New York custom officials which were drawn up at a conference of the officials and the importers held in New York a short time ago.

Under Regulation 1, the term "opium" covers all forms of opium. Regulation 2 defines "preparation" as meaning any product containing opium, while Regulation 3 includes as derivatives the following alkaloids, their salts or combinations, obtained either directly or indirectly, and other alkaloids obtained from opium as it may be found necessary to include in the future: Morphine, codeine, dionine, diacetyl morphine, heroin, peronine, their chlorides, sulphates, phosphates, etc., or preparations containing the above.

The term "for medicinal purposes" is defined in Regulation 4 as meaning opium, its preparations and derivatives, such only as are used for the treatment, mitigation or prevention of disease of man or other animal.

Regulation 5 prohibits the delivery of any opium, preparation or derivative except for medicinal purposes and the seizure and destruction of smoking opium or other illegal importation.

Regulation 6 pertains to the importation and entrance for immediate transportation in bond and for consumption or for warehouse. The importation is limited to the following ports and at no others: Baltimore, Boston, Chicago, Detroit, New Orleans, New York, Philadelphia, San Francisco, Seattle, St. Louis, Honolulu and San Juan.

A form for the declaration of the owner or ultimate consignee that the importation is made in good faith and according to the regulations is provided under Regulation 7.

The following quantities and articles are covered in Regulation 8: The entire importation must go to the appraisers' warehouse for examination and the subsequent delivery of crude or unmanufactured opium, in quantities or packages, must not contain less than 100 pounds; morphine and its salts either singly or assorted less than 50 ounces; codeine, heroin, dionine, diacetyl morphine, their salts or any other derivative of opium or its salts not otherwise provided for, either singly or assorted, not less than 25 ounces. The appraisers' report must show that the goods are of such quality and purity as to fit them for medicinal purposes.

Regulation 9 provides for the payment of the duties, which shall not be refunded on opium removed from bonded warehouses.

Under Regulation 10 importers must keep separately from all other records, a record of all sales of imported opium and derivatives or preparations of opium, showing the names of purchasers, their place of business, date of sale, and name and quantity of article sold, which record shall be open for the inspection of the proper custom officials.

The penalty for violating this law is the loss of the prohibited drugs and a fine ranging from \$50 to \$5000, or imprisonment not to exceed two years, or both.

## Mr. Ramsey Denies Hegeman-Riker Consolidation.

Concerning the rumors which have been persistent in the trade during the past three months, that a consolidation was to take place between the Hegeman Corporation and the Riker Drug Company, George Ramsey, directing manager of the Hegeman interests, denied emphatically the truth of the rumors to an ERA representative last Tuesday.

When asked if negotiations had been or were pending along the lines of a consolidation with the Riker Drug Company, Mr. Ramsey said: "You can say for me that these rumors are absolutely false. There are not any negotiations going on nor have there been any, and as to the report that papers were signed last Monday consummating the matter such a thing is utterly absurd, as I did not sign any such papers."

A. H. Cosden, manager of the Riker Drug Company, was out of town, so that he could not be interviewed on the subject by the ERA representative.

NEURALGYLINE CO. ABSORBS THIRD PATENT MEDICINE CONCERN—THE STERLING REMEDY CO.

H. F. BEHRENS, JR.,  
of Wheeling, W. Va.

Major H. L. KRAMER,  
of Kramer, Ind.

A. H. DIEBOLD,  
of Wheeling, W. Va.

WHEELING, W. Va., March 27.—H. F. Behrens, Jr., W. E. Weiss and A. H. Deibold have returned from Attica, Ind., after closing the big deal by which the Neuralgyline Company absorbs the Sterling Remedy Company. A million and a half was involved. The successful conclusion makes the Neuralgyline Company one of the largest patent medicine concerns in the world. The Neuralgyline Company has controlled the J. W. James Company and the Knowlton Danderine Company for several years.

During their stay at Attica and after the details of the transfer had been arranged, a complete reorganization of the Sterling Company was made and an election of officers held. H. L. Kramer, the originator of Cascarets, remains president of the company. H. F. Behrens, Jr., was chosen vice-president. A. H. Deibold, for some time past secretary-treasurer of the Neuralgyline Company, was elected to the same office in the acquired concern, and W. E. Weiss, general manager of the Neuralgyline Company, now holds the same position in the Sterling Company.

Mr. Weiss stated that the Attica plant will be continued in operation for a time until the local factory can be enlarged. This work of enlargement will be done on an extensive and elaborate scale and will involve the outlay of a large sum of money. It will be begun as soon as possible.

**Sterling Company Put in at \$1,500,000.**

ATTICA, Ind., March 27.—The Sterling Remedy Company, of this city, and the Neuralgyline Company, of Wheeling, have, for the purpose of effecting savings in the general administration of business on more economical lines, made a combination of their interests, with the active management of the two companies passing into the hands of the Neuralgyline Company. The Sterling was put in at the price of \$1,500,000.

A. H. Deibold, the new treasurer of the Sterling Remedy Company, will reside in Attica, and will soon move his family to this place.

Mr. Kramer expects to take the first rest that he has had since he was 14 years old. He will devote some time to a trip to Joplin, Mo., where he will look after his mining interests,

W. E. WEISS,  
of Wheeling, W. Va.

and then some time this summer he expects to take Mrs. Kramer and go to Europe. He will move his residence from Attica to Chicago.

As to the plans for the future of the Sterling Remedy Company, that is purely a matter of detail, with which the active managers of the company will cope. As to whether the Sterling will be moved from Attica, it will not at least for six months, according to Mr. Deibold. If time shall show that economy of management demands that the Sterling be moved, it may leave here.

In case it should go, Mr. Kramer expects to convert the building, which he personally owns, into headquarters for the advertising department of the Indiana Springs Company, which was not affected by the transfer of the Sterling. He has plans for the erection of another big hotel at the Springs, costing in the neighborhood of \$300,000.

Mr. Kramer was the originator of Cascarets and No-To-Bac, two of the principal remedies manufactured by the Sterling Company. In an interview he said:

"The Neuralgyline Company occupies just as important and successful a position in the manufacture and sale of its products Danderine. Its famous trade-line Danderine Grows Hair and We Can Prove It" is as well known almost, as "They Work While You Sleep," which helped to popularize and make Cascarets so famous.

"Everything will be done on the part of the new management, not only to carry out our past plans and policies, but to make them stronger. This will not only apply to increasing our advertising appropriation and making it more effective, but it means also the co-operation with the retailer in every way that he may get the full benefit of the advertising, resulting in increased sales. I have been in this work for many, many years; the business has grown to be a vast one—the details many, and I am getting along in life. I desire to shape my matters now, so that this business, in passing into the management of younger hands, will be conducted along lines that will ensure for it continued success.

"The effect of this consolidation will permit me to gradually retire from the every-day grind of detail work. I have been

in the harness since I was 14 years of age. I want to look over the world and see some of the people that live in it—to know more about how they live. Then, again, I have a number of other large enterprises, particularly some mining industries, that involve construction and development work. This is a line of work that I most heartily enjoy. It gives me the out-of-door life."

#### The Four Men Concerned in the Deal.

Portraits are herewith given of the four men chiefly concerned in the consolidation. Mr. Kramer won success through originating No-To-Bac and the Cascarets Candy Cathartic and advertising the same liberally. When he ran his first little advertisement 20 years ago his capital was less than \$100 and the order was written by himself on a rented typewriter. In the last year his advertising appropriation was \$400,000.

Major Kramer also scored another business success in the Moor-Mud baths at Mudlavia, Ind., which he originally exploited. Now there is a town there called Kramer in his honor and a \$400,000 plant of hotels, cottages, bath houses, etc. Mr. Kramer is now 46 years old and has been in active life since he was 14 years old.

Mr. Weiss is well and favorably known in business and social circles in the city of Wheeling, being general manager of one of the large business enterprises in that city, and also a member of its Board of Trade and leading clubs. He was born in Canton, Ohio, and for several years clerked there in a retail drug store. In 1894 he matriculated at the Philadelphia College of Pharmacy, and graduated with the class of 1896. Immediately after leaving college, Mr. Weiss went into the retail drug business in Sistersville, W. Va., where he was also largely interested in the oil business. His business ventures in that city were successful and profitable, but having his mind on the possibilities in the proprietary medicine field, he went to Wheeling in 1900, and there organized the Neuralgylne Company, with a capital stock of \$25,000, for the manufacture of Neuralgylne.

In 1903 the capital stock of the company was increased to \$100,000, and the company purchased the business of the J. W. James Company, of East Brady, Pa., manufacturers of Dr. James' Miniature Headache Powders. In 1906 the capital stock was increased to \$500,000, and the company assumed ownership and control of the Knowlton Dandierine Company, manufacturers of Dandierine, having offices and laboratories not only in this country but also in Canada and abroad. Now, the capital stock of the Neuralgylne Company has been increased to \$1,000,000, and the Sterling Company added to the list.

Mr. Weiss is general manager not only of the Neuralgylne Company but also of its several allied companies. With all his responsibilities, he is modest and unassuming and dislikes to be brought into the "line light." He is of a genial disposition, and makes friends right and left, besides keeping close to business. He is a member of the New York Drug Club, of the Proprietary Association of America and of the West Virginia State Pharmaceutical Association, and is an earnest worker for the welfare of drug trade and proprietary interests.

Mr. Diebold was born in Canton, Ohio. After finishing his college course he was associated with his father in conducting the business of the Diebold Safe & Lock Co. In 1900 he became identified with the Neuralgylne Company as secretary and treasurer. Mr. Diebold's duties in connection with the several allied companies which he represents have taken him from coast to coast in this country, also to England, Germany and France. While abroad a couple of years ago, he established branch offices and laboratories in England.

In temperament, Mr. Diebold is quiet and conservative, and aside from his arduous business duties, spends most of his time with his family at his home in Forest Hill road, East Cleveland, Ohio, in which city he has a wide acquaintance in business and social circles.

Mr. Behrens was born and raised in Wheeling. After completing a course at Washington and Jefferson College, of Washington, Pa., he spent some time abroad, both in Germany and France, giving particular attention to the study of languages. Mr. Behrens became prominently identified with large corporate interests in Pittsburgh and Wheeling, and at the present time is director in two of Wheeling's leading banks. His presidency of the Neuralgylne Company dates from its inception. His success is attributed to his faithful attention to detail work, and to his energy and push.

#### Fusible Core Hot Water Bottle.

The Walpole Rubber Works, with factories at Walpole, Mass., and general offices at 185 Summer street, Boston, Mass., have perfected and worked out a process by which it is possible to make hollow molded rubber goods of one piece of rubber. A full description of this process was given in the advertisement on page 23 of last week's issue of the ERA. In the Gleason Fusible Core Process (patented) a fusible metal core that liquefies or melts at the same temperature that rubber vulcanizes, is constructed, and the uncured rubber is then formed over the core in the shape of a bottle. The bottle is then put into the mold and subjected to 2000 pounds per square inch hydraulic pressure during the curing process, thereby producing a bottle of absolute uniformity of thickness and strength, and entirely in one piece. The rubber is cured under heat from the exterior to the interior, the core being fused or liquefied and poured out after the bottle is removed from the mold. In water bottles made by this process there are no cemented seams to give way under the action of hot water; there is no overcure or second cure which is always injurious to rubber. According to Mr. Gleason, vice-president and general superintendent of the Walpole Rubber Works, this is the only practical process for making hollow rubber articles of a defined mechanical strength. Every bottle is made from high grade Para rubber, and tested under steam pressure before shipment. The red color remains permanent and does not bloom or change its shade. The Fusible Core Hot Water Bottles are guaranteed for two years and there are many reasons why you should investigate their merits before placing your order for goods of this character.

#### Reduction in Prices of Post Cards.

The E. C. Kropp Company, of Milwaukee, have recently improved their facilities for the manufacture of Post Cards and are now able to produce the same high grade goods at a considerably lower cost. As a result of this economy in production they are giving the trade the benefit by reducing prices.

The Hand Colored Cards manufactured by this firm are classed among the best hand colored cards manufactured in the United States. The method followed is original and capable of yielding the very best results. Many of the Hand Colored Cards contain six or eight colors and when the cards are finished they are carefully inspected and counted. No imperfect cards are ever delivered to a customer. The E. C. Kropp Company also manufacture other styles of cards, samples of which will be sent for the asking.

#### Stewart's Facial Cream.

In a recent communication, W. D. Stewart, manufacturer of Stewart's Facial Cream, Waterbury, Conn., writes as follows: "You may be interested to know that the sales of Stewart's Facial Cream are increasing every day. The druggists throughout the Eastern States have taken hold of our proposition in fine style, and the popularity of the article is assured. When the druggists do their part by distributing our advertising matter so that the people will receive it, it means immediate and most satisfactory sales for the druggists. The preparation gives perfect satisfaction, and I am anxious to have at least one live druggist in every town accept our special advertising proposition."

## 1909 AND 1910 CLASSES, SCHOOL OF PHARMACY, WINONA TECHNICAL INSTITUTE, INDIANAPOLIS.

1, Dean John H. Gertler; 2, Prof. A. S. Haller.

INDIANAPOLIS, March 27.—The students of the Winona School of Pharmacy will count St. Patrick's Day, March 17, 1909, as the red-letter day in their calendar. On that day 84 of these students were the guests of Eli Lilly & Co. In the afternoon the class, accompanied by its instructors, visited the Lilly plant and the wholesale drug houses of the Daniel Stewart Company, Ward Brothers, Mooney-Miller and A. Kiefer Drug Company, and at 6 p. m. there was a banquet at the Claypool Hotel, the students and other guests numbering 101.

The only woman member of the class, Mrs. Albert Schilling, of this city, occupied a place of honor at the banquet board, being seated at the head of the table next to the toastmaster, Charles J. Lynn, general manager of the Lilly plant, who gracefully presided in the absence of Josiah K. Lilly, who is now in California. John S. Wright, manager of advertising, officiated as master of ceremonies.

Besides the students there were among the guests Prof. W. C. Smith, of Winona Technical Institute; Prof. J. H. Gertler, dean of the Pharmacy School; Prof. A. S. Haller, of the chair of chemistry; Fowler Manning and Randolph Rhodes, wholesale druggists, of Chattanooga, Tenn.; William Scott, Barret Moxley, F. A. Fisher and Dr. H. E. Barnard, Chief of the Indiana Pure Food and Drug Commission.

The toasts were all informal, but the responses were witty and clever and set the table in a roar. The pharmacy boys were well to the front as the dinner went on. They have a yell which, when let loose, is a blood-curdling paralyzer. And they let it loose. It is a yell in chemical combination with a howl, a wild, uncanny yawn that even the Russian alphabet with its 46 letters could not frame to pronounce. The boys are very proud of this yell and when they let it loose they manage in some mysterious way to incorporate the name of Lilly in its barbaric cadences.

In the evening the entire company attended the Grand Opera House. It was a vaudeville performance and the students who had made up their minds to applaud everything would have set the best drilled corps of French claqueurs crazy with the brilliancy of their achievement.

The Lilly company, as a souvenir of the day, had the students and their instructors photographed in a group picture.

#### American Color Co.'s Easy Dye in Tubes.

The American Color Company, Indianapolis, Ind., has a special introductory proposition for retail druggists who wish to make money and to sell goods that will please their customers, full particulars of which are given on advertising page 13 of this issue of the ERA. The offer holds open until April 15 and enables the druggist who takes advantage of it to make 100 per cent profit on his investment. The Easy Dyes manufactured by the American Color Company are unique from the fact that they are put up in tubes, are especially recommended for home use, stencil work, textiles and

fabrics of all kinds. The dyes can be made in hot or cold water and come in 20 different colors. Druggists should take advantage of this extraordinary offer, using the blank forming part of the Company's advertisement on page 13. There is money in the proposition.

#### Hohner Harmonicas and Accordions.

Hohner Harmonicas and Accordions offer to the druggist a most profitable side line, the returns from their sale coming in without any great effort on the part of the seller. The manufacturer of these instruments, M. Hohner, 475 Broadway, New York, in his advertisement on page 33 of this issue of the ERA, calls attention to the display stand he offers to the drug trade for selling these instruments. The display consists of twelve Harmonicas, in all keys, and so attached to the stand that they may be easily removed and replaced, as the

case may be. The Hohner Accordion, as shown in the accompanying illustration, contains a number of improvements. The keyboard, to which the reed plates are directly attached, is artistically made up and securely fastened to a beautifully designed panel by means of thumb-screws, which may be removed, thereby permitting the player to dissect the accordion in a few moments and to readjust any temporary disarrangement. In this accordion, Mr. Hohner states, the use of beeswax has been entirely eliminated, leather being substituted in its place. Read Mr. Hohner's advertisement and write for catalogue No. 4.

#### Druggist Dalton Will Take a Rest.

SYRACUSE, N. Y., March 27. Thomas W. Dalton, after a business career of 22 years in Syracuse, has sold his drug store in South Salina street, in the heart of the retail district, to the Weld Drug Company, of Geneva, and the Weld-Dalton Drug Company has been incorporated. R. G. Weld is managing the store and Mr. Dalton retains a financial interest. For the present he has not decided what he will do after taking a long needed rest. He will take a Western trip. Mr. Dalton has been an active member of the New York State Ph.A. and was first vice-president in 1891.

# BUSINESS RECORD

**Changes in Ownership, New Drug Stores, Incorporations, Fires and Other Commercial Matters of Interest to Wholesale and Retail Merchants.**

Supplement to The Era Druggists' Directory.

**ALABAMA**—ALBERTVILLE—Hood Drug Company have opened their new store here.

**ARKANSAS**—OLA—Ola Drug Company, incorporated with a capital of \$10,000.

**CALIFORNIA**—LOS ANGELES—Aikens Pharmacy, 16th and Georgia streets, have moved to Calceico, Cal.

**COLORADO**—DENVER—Van Zandt & Bray, Colfax and Marion streets, have dissolved partnership. T. R. Bray will continue business as the Capitol Hill Drug Store.

**CONNECTICUT**—BEACON FALLS—Victor Anderson has been succeeded by W. H. Watson.

**NAUGATUCK**—Stephen Gladding, 22 Church street, has been succeeded by T. J. Parks. Style of firm to be Parks Drug Company.

**FLORIDA**—DE FUNIAK SPRINGS—De Funiak Drug Company is the style of the new drug store here. D. H. Simmons, proprietor.

**DE LAND**—Walters Pharmacy has been succeeded by B. J. Eccles & Co.

**GEORGIA**—ALBANY—Geise Drug Company have been succeeded by Mitchell-Thornton Drug Company.

**ILLINOIS**—CHICAGO—P. J. Frobrich, 1742 West 19th street, has been succeeded by V. T. Freligh.

**EAST ST. LOUIS**—Henry F. Bader, Main street and Broadway, has been succeeded by Charles F. Merker.

**PONTIAC**—J. S. Murphy Drug Company has been succeeded by Frank J. Butler Company.

**INDIANA**—ALBANY—Thomas F. Barrett; store destroyed by fire; loss, \$2500; insurance on stock, \$2500.

**INDIANAPOLIS**—J. A. Conkey, 726 North Senate street, has been succeeded by S. L. Stout.

**IOWA**—ATLANTIC—J. B. Jones is the new proprietor of the Atlantic Drug Company.

**DES MOINES**—The Lee Miller Drug Company have opened a new store, corner Seventh and Locust streets.

**HAWKEYE**—A. H. Brooks has been succeeded by H. H. Sorg, Red Oak—Red Cross Pharmacy has been succeeded by Hine & Larson.

**KANSAS**—TOPEKA—F. M. Curtis, 732 Kansas avenue; store damaged by fire.

**KENTUCKY**—CROFTON—Brasher & McCord have been succeeded by Brasher & Croft.

**STANFORD**—Dr. W. B. McRoberts has been succeeded by Shugers & Tanner.

**MARYLAND**—BALTIMORE—Owen C. Smith has sold his store at 1200 Penn avenue to Abell A. Wilson.

**MASSACHUSETTS**—FITTSFIELD—Durgin & McManus, 163 North street, have dissolved partnership. McManus Pharmacy, incorporated, will be the style of firm to continue business.

**MICHIGAN**—CORUNNA—C. M. Peacock has been succeeded by the Albert Pharmacy, John Albert, proprietor.

**MONTANA**—GLASGOW—Glasgow Drug Company, incorporated; capital stock, \$10,000.

**NEW JERSEY**—HOBOKEN—Charles Schmidt, 432 Willow avenue, has opened a new drug store here.

**JERSEY CITY**—Herman J. Lohmann, Harrison and Monticello avenues; store damaged by fire; loss, \$500; fully insured.

**NEW YORK**—AUBURN—The Odell Drug Company, incorporated; capital stock, \$10,000.

**BUFFALO**—Stoddard Brothers, 84-88 Seneca street, wholesale and retail druggists; store damaged by fire to the extent of \$25,000; fully insured.

**NEW YORK CITY**—Snow & Yeomans will open a new drug store in the Washington Irving Building, 151st street and Broadway.—J. J. Sosnor will open a new store at 150th

street and Eighth avenue about April 1.

**SYRACUSE**—T. W. Dalton, Kirk's Block, has been succeeded by the Weld-Dalton Drug Company.

**WARSAW**—The Warsaw Drug Company is the style of the new drug store opened in the Post-Office Block.

**NORTH DAKOTA**—LINTON—John J. Flaherty has been succeeded by Linton Drug Co., Carl Vorlander, manager.

**VALLEY CITY**—F. L. Ulm has been succeeded by the Seigfried Pharmacy.

**OHIO**—CINCINNATI—Milton J. Ullmann has opened a new drug store, at corner Barnett and Erkenbrecher avenues, Avondale.

**CLEVELAND**—Rosengarten & Feuer, 1621 Euclid avenue, have moved their stock to 10,613 Superior avenue East.

**LAURELVILLE**—Otto A. Koch has opened a drug store at the old S. D. Povenmire location.

**ZANESVILLE**—A. P. Rogge has opened a new drug store at Market and Third streets.—H. M. Widney, Main and Seventh streets, has been succeeded by G. E. Schwint.

**PENNSYLVANIA**—ALLENTOWN—Nagle & Danowsky, 705 Hamilton street, has been succeeded by Dr. Thomas S. Nalge.

**BRAEFORD**—J. F. Leonard & Son, 35 Mechanic street; store damaged by fire.

**CARLISLE**—B. F. Emrich has been succeeded by William R. Shearer.

**JOHNSTOWN**—Shaffer-Davis Company have opened a new drug store here.

**PHILADELPHIA**—Lawndale Pharmacy, H. A. Kalbach, proprietor, 6425 Second street, has been succeeded by Arthur H. Martin.

**SOUTH CAROLINA**—JOHNSTON—Johnston Drug Company; store damaged by fire.

**TENNESSEE**—KNOXVILLE—F. B. Sharp, Gay and Wall streets, has been succeeded by Lotspeich Pharmacy.

**LEBANON**—McDonnold-Wooten-Lester Company have been succeeded by Lester-McCartney Company.

**TEXAS**—ARLINGTON—Arlington Drug Company; store damaged by fire; loss, \$500.

**UTAH**—MURRAY—C. H. Lyon & Co. have moved into their new store at State street and Second avenue.

**VERMONT**—BRANDON—Barken & Evans have dissolved partnership. The Barken Pharmacy will continue the business at the old stand.

**WEST VIRGINIA**—THURMOND—Dr. J. W. Mankin has re-bought the store he sold to Bradley Drug Company; style of firm will be Mankin Drug Company.

**WISCONSIN**—MANITOWOC—Schmidt Brothers; store damaged by fire; insured.

## Up-to-Date Quarters for Old Jersey City Pharmacy.

Shortly after April 1 the Eugene Hartnett drug store at Montgomery and Warren streets, Jersey City, will cease to be a landmark in as far as the location is concerned. Recently Mr. Hartnett decided that better accommodations were needed for his business and leased the premises at 21 Newark avenue running through to 128 Montgomery street, a block away from the present location and in the heart of the business district. The new quarters are more than twice the size of those now occupied and several departments will be extended, but the prescription department will still be the leading feature. For more than 50 years the corner which Mr. Hartnett vacates has been a drug store, William King locating there in 1859. After conducting the store for 23 years he sold it to Mr. Hartnett, who has had it over 27 years. More than 336,000 prescriptions are on record in the books as having been compounded there.

## R. K. Smither's Drug Store Incorporated.

**BUFFALO**, March 27.—A certificate of incorporation has been filed at the County Clerk's office in Buffalo by the R. K. Smither Drug Company, of this city. The capital stock is \$12,000. Robert K. Smither, John G. Gottwein and Paul M. Burgdorf are the directors.

## Pharmacy in a Department Store.

**SYRACUSE**, March 27.—The Hunter-Tuppen Company has established a pharmacy in its department store at South Salina and East Fayette streets. Silas Smith, at one time in the Yates Pharmacy, is pharmacist.

39,941—Laine Chemical Company, New York, N. Y. Class 6. Tablets in the nature of a hepatic stimulant, antizymotic, uric-acid solvent and eliminant.

40,348—Solomon Baruch, New York, N. Y. Class 6. Vaginal suppositories.

40,349—Eleto Company, New York, N. Y. Class 6. Talcum powder.

40,423—Young & Bokemyer, Baltimore, Md. Class 6. A tonic for the hair and scalp.

40,486—Herman Tosser Company, Milwaukee, Wis. Class 6. Bitters.

Opposition to Poison Labels on Paint.

ST. LOUIS, March 27.—Dr. H. M. Whelpley, dean of St. Louis C.P., was one of a delegation to appear before the Missouri Assembly Public Health Committee to argue against a proposed law requiring the word "poison" to appear on all paint labels attached to paint containing above a certain percentage of white lead. Dr. Whelpley's argument was that such use would cheapen the word poison, as no one thinks of eating paint or using it for medicine.

# THE DRUG MARKETS

## GENERAL MARKET STEADY AND FIRM.

Quotations Without Change of Consequence Except in Articles Affected by Tariff Agitation.

**NEW YORK, March 29.**—Since the introduction into Congress of the new tariff bill the attention of the trade has been given to the discussion of its merits pro and con; and while there are many opinions regarding the bill the majority of the people in the trade believe that changes in the present draft will surely be made and that a measure of some kind will be adopted as soon as the two houses of Congress can come to an agreement. Articles in the drug and chemical line which are affected by the proposed changes have been quite active at higher figures, which are firmly maintained in anticipation of the new rates becoming effective. Opium, oxalic acid, dandelion root, cacao butter, oils of anise, bergamot, citronella, lavender, lemon, orange and rose are firmly held owing to the proposed increased rates of duty.

**OPIMUM.**—The market is very firm at \$4.50 per pound in case lots and a number of cases have changed hands at this price. Granulated and powdered are also firm at \$5.50 per pound. The Smyrna market is firm with some sales reported for our country. The arrivals in Smyrna to March 22 amount to 2023 cases, as against 1253 cases for the same period last year; and in Constantinople 1929 cases as against 469 cases for the same period last year. The stock in Smyrna is now about 1910 cases, against 1883 cases last year, and in Constantinople 170 cases, against 107 at the same period last year.

**QUININE SULPHATE.**—The market in this article is without any new features, there being still a fairly good consuming demand at unchanged prices. The last auction sale of Amsterdam brand of quinine, which took place at Amsterdam on March 23, went off at florins 10.85, as against florins 10.82 averaged at the previous sale. The whole quantity offered, 50,000 ounces, was sold.

**NORWEGIAN COD LIVER OIL.** Primary markets are decidedly higher owing to unfavorable reports of the catch, which is said to be unsatisfactory. There are plenty of fish being taken, but the livers are gradually becoming smaller and leaner, yielding now only 48 to 52 per cent of oil as against 54 per cent at the beginning of the season. The catch to March 22 is as follows: In Lofoten, 8,000,000 fish, producing 8,700 barrels of oil; in all other districts, 21,300,000 fish, yielding 21,380 barrels of oil. In 1908 to the same date the records were as follows: In Lofoten, 7,600,000 fish, yielding 11,086 barrels of oil; in other districts, 20,300,000 fish, yielding 27,140 barrels of oil.

**CASTOR OIL.**—This article is slightly easier and quotations have been reduced 1/4c. per pound, depending on quality and sizes.

**OXALIC ACID.**—There is more inquiry for this article, partly owing to the proposed duty in the new tariff bill of 1c. per pound. Prices have advanced in sympathy to 7c. per pound in case lots, but this price will have to be further advanced if the duty is added.

**ASAETIDA.** There is a good demand for this article, but good quality is very scarce both here and abroad. The demand for powdered has increased very largely and some difficulty is met in supplying demands. There seems to be considerable difficulty in producing a powdered asafetida which will comply with U.S.P. requirements, for while the test made from the gum resin itself will show 50 per cent solubility in alcohol and only 15 per cent yield of ash, it has been found almost impossible to make the powder conform to the U.S.P. requirements as regards ash, as assays made from several lots show but 52 per cent solubility in alcohol and over 24 1/2 per cent of ash.

**CHAMOMILE FLOWERS.**—Recent arrivals of Hungarian have sold well and only a few cases are left, which are being held at 35c. per pound in cases of 110 pounds. New crop will not be in the market before the latter part of May or June.

**ESSENTIAL OILS.** The primary market for bergamot, lemon and orange has further strengthened itself and the tendency is still upward. Considerable excitement prevails in the mar-

ket for oil of bergamot, owing to a rumor that the strong gales which have prevailed of late have damaged the trees to an extent that may curtail production. In the meantime holders in the primary markets decline to give quotations. The market here is firm but without any change in value.

**VANILLA BEANS.** This article is in good consuming demand, the increased activity being attributed by some to the fact that manufacturing consumers are apprehensive of the possibility of a duty being imposed when the tariff law is changed. The market has a firm undertone and quotations are well sustained at \$2.75/\$3.15 for whole Mexican, \$2.25/\$2.50 for cut, \$2.00/\$2.50 for whole Bourbon, \$1.85/\$2.00 for cut and \$1.00/\$1.25 for Tahiti, according to quantity.

**CANADA BALSAM OF FIR.**—The available spot stock is too small to admit of any but jobbing transactions. There is some consuming inquiry and values are decidedly firm at \$6.50 @ 6.75 per pound, as to quantity and seller.

**CURACAO ALCOHOL.**—The market is fairly steady at 6 1/2 @ 7 1/2c. per pound, as to quantity and seller, with a number of sales reported at the inside figure. It is claimed that the available stock of 1908 crop has been bought up and there is no more to come forward from primary sources of supply.

**SHORT BUDIC LEAVES.**—Goods of desirable quality continue firm at 31 1/2 @ 32c. per pound in large quantities, and further improvement in values is predicted. Sales during the past week aggregated over 75 bales, and the spot stock is under good control.

**VENICE TURPENTINE.**—The spot stock of true quality is said to be well concentrated, and with European sources reported depleted, prospects are regarded more favorable for higher prices. In large quantities the current basis is 21 @ 22c. per pound.

**LAVERNE FLOWERS.**—On the spot, the prices are unchanged and steady at 15 1/2 @ 16c. for ordinary and 20 @ 22c. for select, as to quantity. Primary markets show an easier tendency owing to an expected large yield of new crop and bids are solicited for shipment.

**CACAO BUTTER.**—The prospects of an increased duty of 2c. per pound have stimulated keener buying interest, particularly in bulk for consuming account. Cables from primary markets report heavy buying for this country, presumably in anticipation of new tariff schedules.

## London Drug Market

**LONDON, March 29.**—Although business continues to be restricted to a very small scale, prices generally are well maintained. Owing to the influenza epidemic and to the prevalence of other maladies due to the long continued inclement weather, pharmacists have experienced busier times and in due course the steady consumptive demand must lead to brisker business in the wholesale trade. Following on the reduction in the price of Morphine, makers of Codeine have reduced their price 5d. per ounce. Although the state of the opium market barely justifies a further reduction in the price of Morphine, it is not impossible that makers may deem it expedient to make a further concession to meet the competition of a Continental maker, outside the Convention.

There has been some movement in the Cod Liver Oil market. Early this week prices advanced considerably, a dealer who had oversold having found it necessary to cover; at the time of writing the market is easier at about 72s. 6d. per barrel c. i. f. for first, non-freezing Norwegian. Camphor is dearer and business has been done at 1s. 7d. per pound for 2 1/2-pound Japanese slabs, crude China is firm at 140s. per cwt. Essence of Lemon is tending firmer and 4s. per pound is quoted for "spot." American Peppermint Oil is steady at 8s. 11d. per pound for H.G.H. and 6s. 3d. for Wayne County in tins. Menthol is dull. At the auction of Cinchona bark held in London this week the small supply of less than 500 packages was offered and less than half sold at steady rates.

### Druggist Thorpe Invades Liverpool.

**SYRACUSE, March 27.**—George E. Thorpe, proprietor of the Yates Pharmacy, has extended his business to the village of Liverpool, five miles north of Syracuse, where he has established a branch store with a complete line of drugs and a soda fountain. Garfield Plews is manager.

# THE PHARMACEUTICAL ERA

PUBLISHED EVERY THURSDAY

**VOL. XLI.**

**NEW YORK, APRIL 8, 1909**

**No. 14**

**D. O. HAYNES & CO. - Publishers**  
**90 WILLIAM STREET, NEW YORK**

Telephone, 2457 John. Cable Address: "Era, New York."

Western Office:

Room 500, Dickey Building, 49 Dearborn St., Chicago  
Telephone, Central 5888

## SUBSCRIPTION RATES.

United States, Cuba, Hawaii, Porto Rico, the	
Philippines, and Mexico	\$2.50 a Year
To Canada, postpaid	3.00 a Year
To Foreign Countries in Postal Union	4.00 a Year
Single Copies	10 Cents.

ALL SUBSCRIPTIONS ARE PAYABLE STRICTLY IN ADVANCE

Published every Thursday at 90 William Street, Borough of Manhattan, New York, by D. O. Haynes & Co., a corporation; President and treasurer, David O. Haynes; vice-president, Ezra J. Kennedy; secretary, Edward W. Drew. The address of the offices is the office of this publication, and the title is registered in the United States Patent Office.

Entered at the New York Post-Office as Second Class Matter

## Re Photographs for "Era Album"

### Illustrated Section

Each subscriber to The Pharmaceutical Era is entitled to representation in this work, and is invited to send us his photograph. We do not require a subscription from each partner and clerk. If the firm or proprietor is a subscriber, the other partners and clerks may have their portraits included for \$1.50 each. To secure all of the Album sections one must be a subscriber to The Era in his own name.

In sending photographs be sure that each one is distinctly labeled with the name, address, business, profession or occupation of the person, written clearly on the back of your photograph. A good plan is to write it on a printed label and stick it on the center of the back of your photograph. Here is a good specimen:

FOR ERA ALBUM.

Fred S. Rogers, Middletown, N. Y.  
McMongle & Rogers,

Ex-Press, N. Y. State Pharm. Assn.

When additional photographs of partners and clerks are sent, each one should have written on it the name of the subscriber who sends it, as well as the name of the person in the photograph.

### Cabinet Photographs Only

The style of photograph we require is the so-called "cabinet" size, with the head about two inches long. If other sizes are furnished they interfere with our plans for keeping the faces uniform, also prevent us from classifying the cuts by localities.

In view of the great amount of work we are assuming, to have each of our subscribers properly represented in this Album, we feel that we are not asking too much when we request each subscriber to supply us with the size and kind of a photograph which will facilitate our work and best enable us to do him credit.

In forwarding photographs for the Album, see that they are distinctly addressed as follows:

THE PHARMACEUTICAL ERA,

90 WILLIAM ST., NEW YORK.

For Era Album

## PATENT FIGHT IS NOW UP TO THE SENATE.

Two weeks ago we had occasion to note with satisfaction that the Payne Tariff Bill contained a provision embodying one of the chief points in patent law reform sought by the organized druggists of the country, namely the reciprocal treatment of patentees. Surely there is no injustice in treating inventive citizens of foreign countries on precisely the same plane of conditions that are imposed upon our own citizens who seek patents abroad.

It seems, however, that some wiseacres at Washington have discovered a provision in an international treaty subscribed to in 1887 which provides that none of the signatory Powers should during the life of the treaty make any discrimination in patent laws between its own citizens and those of the other Powers subscribing to the treaty. As a consequence the patent provision in the Payne measure has been stricken out. In the condition of tariff legislation at Washington if anything further is done an appeal will have to be made to the Senate.

## PRINCIPLE VIOLATED BY GREAT BRITAIN.

Whether the patent law clause violates a treaty or not is doubtful and only an appeal to the courts, in the event of enactment, would determine the validity of the law. Without going into the subject exhaustively there are two or three points to be considered. Great Britain now discriminates against foreigners; Americans in other countries have found semi-unofficial obstructions that amount practically to the same thing; if foreigners who have always been treated in this country with more than courtesy find cause to complain of legislation let them seek relief in the courts.

It is too late now to appeal to the House to let the patent law clause go through, but the druggists and others who are interested in this legislation will do well to bombard the Senators, both from their own States and others, with urgent requests for its reinsertion in the Tariff Bill. The argument can be made that in the execution of the law it will be a matter for judicial determination whether it infringes upon the rights of any person.

## WILL REQUIRE UNITED EFFORT TO WIN.

We do not believe that any foreign Power will ever object to the law if it be enacted and the moral effect will be of inestimable importance to Americans who may seek patents in other countries. So many reasons have been printed so often showing the necessity for legislation of this nature that it is not necessary now to repeat them. It is evident that some extremely

powerful influences are at work to defeat the wishes of the N.A.R.D. and it will require the united support of the retail druggists to help their officers and legislative committee in securing a restoration to the bill of this much desired provision. Everybody interested should get busy immediately.

#### THE USE AND ABUSE OF THE GUARANTY.

Senator Heyburn's bill introduced in Congress amending the provisions of the Pure Food and Drugs Act of June 30, 1906, is intended to prevent the abuse of the Federal guaranty by manufacturers and others who have sought to convey the impression that the articles labeled were guaranteed by the Government, instead of by the makers. When the Act was under final consideration the ERA pointed out that the guaranty would be accepted by the public, with few exceptions, as a Government indorsement and in actual practice this has proved to be the case. Unscrupulous persons have so printed their labels as to carry out this idea with even more force than was conveyed by the plain statement contained in the original legend as formulated in the Regulations.

The abuse of the legend has become so notorious that legislation on the subject was inevitable and objection to it will not be made by honest manufacturers. The penalty of a fine of not more than \$1000, or imprisonment of not more than a year, or both, is by no means severe for persons who make fraudulent representations regarding foods or medicines, whether in connection with the Government's efforts to secure purity or in their own guaranty. While the measure may not be passed at this extraordinary session of Congress it will eventually become a law and any persons in the drug trade who are in a position to be affected can safely alter their course in the future to conform to the change which they must make through force of law and should they persist in violating the common business principle of correctly representing the quality and character of the goods they manufacture or sell.

#### INTEREST IN ORGANIZATION WORK.

With the announcements that are now beginning to be made of the forthcoming annual meetings of the State pharmaceutical associations the old problem of arousing interest in the conventions is again uppermost in the minds of pharmacists who realize the value of these organizations to all who participate in their benefits. In this connection a timely publication is made on page 325 of this issue of the ERA of a paper read before the Utah association by Mr. Eddy, a member of the executive committee of that organization. Too much cannot be said of the importance of pharmacists becoming members both of their local and State associations, for in no other way can they present a solid front to legislative and other foes who look upon druggists as the legitimate objects of legislation that is often vicious, arbitrary and unjust, as well as unnecessary for the public good.

As "S. N. J." aptly says in the "Letter Box," "so many law makers consider the retail drug store a veritable gold mine that only by united effort can we get this fallacy out of their minds and

secure justice for our profession." All readers of this note who are not association members should hasten to take steps to broaden their scope of usefulness by taking steps to strengthen the hands of those who are working for the benefit of all pharmacists.

#### GETTING RID OF THE ITINERANTS.

Illinois is the first State which offers a solution of the elimination of what most retail druggists, especially in the small towns and villages, have found to be their worst competitors. Legislation is pending and sought in numerous States to drive the itinerants out of business, but nowhere are conditions so favorable to the success of the movement as in Illinois. In that State no itinerant can do business without a permit issued by the State Board of Health, but the State Board of Health not being compelled to issue licenses, has refused to do so, leaving the itinerants without a shadow of legal right to do business in the State. Even city licenses are worthless, for the State law is superior to any local ordinances.

If the Illinois druggists wish to send their non-rent paying competitors away from the field all they have got to do is to enforce the law. The Illinois Pharmaceutical Association, at its meeting in Quincy in June, can make an appropriation to provide for enforcing the law. The Chicago Retail Druggists' Association probably already has the matter well in hand and other local associations can aid in the crusade. The doctors on the State Board of Health are more than willing to do their share. It seems to be "up to" the druggists to do some police and detective work.

New York, Iowa and some other States have been having their troubles in relation to their State boards of pharmacy, but it has been left for Governor Sanders of Louisiana to "shake 'em up" with celerity and neatness, for, as noted in the last ERA, he has cleaned the slate of the old board, ignored the State P.H.A. and appointed an entirely new set of members of his own selection. We are without reasons for this sweeping action, but the men who failed of reappointment are of such high character, personally, professionally and officially, that no doubt the Governor is one of a class of men who make changes without any reason except to make a change. The new members are above criticism, but it is to be regretted that the Executive pursued the course of disregarding the communication of the State association.

Under the new pharmacy law just enacted in Oklahoma the Governor is not required to appoint board of pharmacy members from a list furnished by the State association, but is empowered to select the board from the association's membership. It is to be assumed that the association guards its portals against the unworthy, but there would be better results probably if the members had a voice in the selection of appointees, instead of being mere eligibles. The reason given for making the change was that in presenting the lists an appearance of favoritism was shown for the adherents of one political party, but we are inclined to the opinion that the complaint was based on grounds more fancied than real.

Ban against the importation of all but medicinal opium is growing stronger on the American continent, Canada's new prohibitory law having gone into effect on April 1. Its provisions are about the same as our law and its enforcement will greatly aid in the determination of our own Government to exclude the banned drug.

The opium regulations adopted at Washington to enforce the new prohibitory law are applicable, of course, to its importa-

tion and to interstate commerce, but cannot be expected to entirely remedy the evil without the support of legislation by the various States. Some of the States now have laws dealing with this subject which are fairly satisfactory, but uniformity would be desirable and some movement in that direction might well occupy the attention of the American Pharmaceutical Association at its forthcoming meeting in Los Angeles.

Tariff discrepancies at Washington now turn out to have been what the politicians call "little jokers"—that is to say errors purposely made and intended to accomplish different results from those ostensibly intended. It will be just as well for the National legislative committees to keep a watchful eye on the bill as it worms its way through Congress.

"What did Druggist Swifter do when the prescription he compounded killed old Hardphz?"

"Added 'M.D.' to his name and signed the death certificate himself."

Of the great number of men who have done their best for the advancement of commercial pharmacy, C. R. Cosby, manager of the New York branch of Eli Lilly & Co., manufacturing pharmacists, of Indianapolis, is a typical representative. By persistent effort and making the most of his opportunities he has achieved not only success but has acquired the reputation of a worker who has produced results.

Mr. Cosby has always been an ardent believer in the expansion of American trade and to him there is no field for the study of the manufacturer of this country more important than that of Latin-America. For years he has been a close student of conditions affecting the drug trade in Mexico and the Spanish-American countries. He has traveled extensively, and possessing a thorough knowledge of the Spanish and French languages, he has been able to get in close touch with the conditions, methods and demands of the peoples of these countries.

"In all of them," Mr. Cosby says, "vast commercial possibilities await the manufacturer who will awaken to his opportunity. Heretofore the manufacturer or merchant of the United States has been too occupied with home trade conditions on the one hand, or, on the other, with the possibilities of commercial expansion in Europe or Asia, that he has almost entirely overlooked the wealthy countries in our neighborhood to the south of us. That there is a grand opportunity awaiting our manufacturers is evident from the fact that these great nations have unlimited undeveloped resources and yet in 1907 their average foreign trade amounted to \$1,513,415,000, of which the share of this country was barely one-seventh. During the same period the countries of South America sold us much more than we sold them by a balance of nearly \$60,000,000. But the present outlook is encouraging and with the awakening that is going on at home as to the desirability of supplying these foreign markets, I believe we shall soon reap our full share of the reward."

Mr. Cosby is of the opinion that considerable benefit will result from the distribution of the Spanish translation of the United States Pharmacopoeia.

"It must not be supposed," however," he said, "that the Pharmacopoeia in Spanish *per se* will create a demand for American products any more than the translation of a foreign pharmacopoeia distributed here would create a demand in this country for foreign products. The real work must be done by those who are expecting to profit by the sale of their products, and on them rests the burden of demonstrating the superiority of our methods and our goods. Most of the physicians and pharmacists of Central and South America have been educated in European countries and it is natural that they should adhere to the methods that are most familiar to them. It is not likely that they will adopt our formulas and standards until a real need for them has been shown. It still rests with

the men in the field to popularize the products represented by our Pharmacopoeia."

Mr. Cosby is a native of Iowa, where he was born in 1881. His early life was spent largely in the Western and Rocky Mountain States, where he followed surveying for some time. Later, as a civil engineer and deputy county surveyor of Jefferson County, Ind., he was engaged in the compilation and publication of new maps and records of that part of the country. He became connected with the wholesale house of Schull & Co., of Indianapolis, and later with Eli Lilly & Co., where he served for some time in the various departments of the laboratories. In 1901 he was sent to New York as assistant to Charles J. Lynn, then manager of the company's New York branch. When Mr. Lynn became general manager at the home office in Indianapolis in 1906 Mr. Cosby was promoted to manager of the New York branch. Personally, Mr. Cosby possesses a splendid physique, which he attributes to his early out-door activities as a surveyor. He takes an interest in the work of all local pharmaceutical organizations and is a member of the Drug and Chemical Club and of the executive committee of the Drug Trade Section of the New York Board of Trade and Transportation.

That the span of human life might be lengthened five to fifteen years if the proper steps were taken to wipe out preventable diseases and discover incipient stages of diabetes and tuberculosis, was the declaration made recently by Dr. Burnside Foster, at a meeting of the Association of Life Insurance Presidents. As a means of bringing about the ideal condition he recommended that the life insurance companies examine their policy holders every five years to ascertain their physical condition.

Dr. Foster is editor of the *Medical Journal*, of St. Paul, Minn., and he came here to address the life insurance officers. He said that the United States could, if it wished, stamp out typhoid fever just as effectively as Havana stamped out yellow fever.

"The problems of the control of the diseases of mankind are not very different from the problems of the control of the diseases of beasts," said Dr. Foster. "Are not its citizens at least as great an asset to a nation as its hogs? The government undertook the matter of protecting the lives of its hogs and cattle because the people demanded it. When the people demand it it will also undertake to protect the lives of its citizens. The medical profession has for years been pleading for governmental aid in their efforts to wipe out preventable diseases. It has pleaded to deaf ears. Many persons die of kidney disease, of tuberculosis, of cancer and diabetes and of other diseases every year and many millions of dollars are paid by the life insurance companies which have issued policies on the lives of these persons who were sound when the policies were issued and who might have lived much longer and paid many more annual premiums if the diseases which caused their deaths had been recognized and properly treated in their earliest stages."

Dr. Foster brought on a lively discussion. Opposition to his five-year plan was expressed by F. E. Wells, medical examiner of the Equitable; Oscar H. Rogers, of the New York Life, and Thomas H. Millard, of the Metropolitan.

"Sick deadbeats and drunks," as he classes them, will not be doctor'd any more by Dr. J. Dobson, of Winsted, Conn., who has sent word of his intention in a circular letter to his patients. He has on his books numerous accounts marked "N.G." Dr. Dobson's letter reads:

"I am growing old, and it is neither wisdom nor prudence for me to wear out myself, horse and team, driving over these hills in all sorts of weather, giving the best of service and the costliest medicines to people who are not willing to pay. Therefore, I wish to announce that henceforth every one must be placed on the same footing, and all business must be on the spot cash basis. No more credit, no more deferred pay-

C. R. COSBY,  
of New York City.

ments, and no more deadbeats will be allowed, nor will any drunks be attended. When I am called it must be clearly understood that payment is to be made at every visit."

W. F. Doty, United States Consul at Tahriz, furnishes some interesting facts on the extent to which chemical dyestuffs are supplanting those of vegetable origin in Persia.

"The large carpet importing houses," he writes, "have done their utmost to guard against coal tar preparations, and presumably most of their Oriental rugs are about what they are represented to be. Naturally, the price of such rugs is above that of the products in which chemical dyes are employed. In Persia there are some well established rug exporting firms that loudly cry, 'Back to the vegetable dyes.' It is to them the credit is given that a royal edict was issued more than eight years ago forbidding the introduction of aniline coloring material. This law, however, is not enforced."

There are a few druggists who seem to believe that business enterprise is reflected in the use of advertisements that out-lie a circus poster.

Albany *Evening Journal* recently sent its sporting editor to "cover" the smoker of the Albany Drug Club, the result being an amusing story in which facts, sporting phrases and humor all strove for the supremacy. To the reader who was not present and who is devoid of sporting blood it is, however, difficult to realize what actually happened, except that everybody had a most enjoyable evening.

It was Mabel's birthday, and, moved by childish curiosity, she suddenly asked: "Mamma, tell me what time in the day was I born?"

"At 2 o'clock in the morning, dear."

"And what time was I born at?" asked her brother Jack.

"At 7 o'clock."

"Heh! My birthday's longer'n yours," cried Mabel exultingly.

"Well," said Jack, puzzled for his answer for a moment only, "what's the use of being born before it's time to get up?"

During one of the banquets of the Church Congress in London a certain Bishop had as his left hand companion a clergyman who was completely bald, says *Success*. During dessert the bald-headed vicar dropped his napkin and stooped to pick it up. At this moment the Bishop, who was talking to his right hand neighbor, felt a slight touch on his left arm. He turned, and beholding the vicar's pate on a level with his elbow, said: "No, thank you; no melon."

"How do you know you talked sensibly to your wife?"

"She wouldn't listen to me."

What is said to be the first instance on record of articular tuberculosis caused by excessive devotion to typewriting work is reported from Antwerp. A correspondence clerk in a wholesale business house there consulted a doctor recently about a pain in his right hand. Upon examination the doctor found the hand to be affected with tuberculosis and needing amputation above the wrist. The only reason that could be discovered for the existence of the disease was the abnormally heavy amount of typing work habitually done by the patient. The operation was successfully performed and the clerk has retained his employment, having taught himself to work his machine with the left hand only.

"It amuses me to hear Hopperdyke say he is a man of few words."

"Well, he is, but he can talk you to death with the few he does know."

How long would it take you to make a pair of boots, do you think? You probably had not better begin it, especially if you need them soon. Even a cobbler in the old days, working with his assistant, would spend a day and a half making a pair of boots. And the cost would be about \$4. But now, of course, shoes are made by machinery, and it is astonishing to hear how quickly they are made, says the *Chicago News*. It takes just four minutes to make a pair of boots! And the labor cost is 35 cents. Of course, no one makes the whole boot nowadays. There are a hundred different men making different

parts of it, and each one does the same thing over and over again, and each man learns to do his particular work especially well and quickly. And you should see the buttons sewed on! A boy takes the part of the shoe where the buttons are to go and fits it into a machine, throws in a handful of buttons quite carelessly, turns the machine, and in no time out comes the piece of leather with all the buttons exactly in the right place. No wonder some factories turn out ten thousand pairs of shoes in a day!

"He has always been a great wanderer, hasn't he?"

"Yes, in his mind."

A sign of the times is the following advertisement culled from a London paper recently:

LADY is desirous of engagement as chauffeur to lady or gentleman; splendid driver, understands all cars; age 29; town, country or abroad; state full particulars. Apply, etc.

The Russian Government has rejected the Washington State Department's application that American business men belonging to the Jewish faith should be allowed to transact business in Russia. The commercial treaty between the two governments contain a clause that citizens of each country may travel freely in the other on their lawful affairs. Russia's treaty adds the proviso: "Subject to existing regulations." These regulations prohibit immigration of foreign Jews into Russia.

The American Government applied in the closing days of Roosevelt's Presidency to have the proviso struck out. The Russian Foreign Office has refused the application.

It's useless to try to drown your troubles in the cup. Troubles are expert swimmers!—*Lippincott's*.

The fact that China is in dire need of modern medicine was brought out by Dr. Charles T. McArthur, formerly of Hong Kong, a recent visitor in Milwaukee.

"Modern, enlightened medicine is rapidly gaining a strong foothold in China and the Celestials are beginning to realize their great need of it," said Dr. McArthur. "The number of native practitioners with foreign training is rapidly increasing and practically every missionary physician in China has a medical school for natives. The result is that the whole lump of Chinese medical ignorance will soon be enlightened. At present, the amount of unrelieved suffering which could be relieved under proper medical care is appalling."

"The Chinese are favorable to the patent medicine business, if it can be brought within their reach. They take naturally to such a method of treating disease and remedies advertised in China as they are in the United States would have a tremendous sale. The field for patent medicine manufacturers is certainly promising in China."

The nice thing about having a clerk who is engaged to be married is that there is always some one in the store to make it look busy.

Mrs. Maud Pepono, wife of Henry Pepono, a farmer in Blue Clay Creek, Arkansas, got up one morning and at once proceeded to search her husband's trousers, as was her custom, but instead of finding the usual collection of small change she grasped a giant bullfrog. Her wild shriek awakened her husband, who leaped from his bed, intending to tell her it was all a joke, but she already had rushed out of the door and into the adjoining woods, still screaming in her fright, says the *Chicago Inter Ocean*.

Pepono pursued her, and both might have been running yet had not their wild flight been suddenly halted by a black bear rushing furiously at them from the opposite direction. The Peponos whirled instantly and rushed for their dwelling, the bear still after them and gaining in the run. Just as they neared the clearing they noticed that their house was on fire, probably due to overturning a kerosene lamp in their hasty exit.

In order to escape the bear both jumped into a well, from which they were rescued, more dead than alive, after neighbors shot the bear. The dwelling was burned to ashes. Pepono is too excited to admit that he put the frog in his pocket to break his wife of a bad habit. He, however, has coined a moral like this:

"It's cheaper to let your wife search your pockets than to scare her with a bullfrog."

# Paper on Good Window Dressing Gives Jerseyman Era Cash Prize of \$10.

In Contest No. 1, of the ERA'S series of Cash Price Competitions, the judges this week have awarded the cash prize of \$10 to Daniel F. Wettlin, Pharm.D., New York College of Pharmacy, 60. Mr. Wettlin is with Charles Holzhauser, the prominent pharmacist of Newark, N. J., whose store is at Broad and Market streets, in the center of the business and shopping district. This contest is for the best article on any business subject of value to retail druggists. Full details of this competition, which is open to all, will be found on advertising page 37 of this issue of the ERA. Mr. Wettlin's winning paper is as follows:

## Getting Results From Window Displays.

By Daniel F. Wettlin, Pharm.D., Newark, N. J.

The criterion of the value of a window display is the direct results which may be obtained from it. Of course, all good advertising has an indirect value, which in the very nature of things cannot be estimated with exactness. But the fact remains that if a given display shows favorable direct results, the indirect results are sure to follow in its wake. Every display has some sort of results. They may be good, bad or indifferent, but whatever they are, the salient points should be remembered, and the best way to remember a thing with accuracy is by putting it in writing; therefore, records should be kept of window results, just as a salesman keeps a record of his work. A record kept in the following manner I find very useful, and requires only a few moments after each display to keep right up to date:

## FORM OF WINDOW DISPLAY RECORD.

DATE	DISPLAY	DESCRIPTION	RESULT

Photograph records are of great value, and a scrap book filled with pictures of displays, either your own or cuts taken from periodicals, make a very valuable reference book.

To properly arrange a display, I believe that it is necessary to feel that you are fitting out a salesman to bring in "orders." Too many window dressers err in this one salient point. A certain large firm that are good advertisers generally, hired a valuable window to display the article they were selling, and the results fell absolutely flat, and why? They had a beautiful display arranged by a professional window dresser. It would stop the average passer-by, and he would admire, but then pass on. He did not get a definite idea of the value or use of the article, consequently did not see its application to his personal needs. There must be that something about a window display which will not only attract, but convince and sell. To draw a pretty picture is the Alpha and Omega of too many window dressers, and especially of those who belong to the non-professional class. A pretty picture in a window that does not tell something in a convincing way represents merely a waste of time and good material.

The methods of attracting attention are as varied as the number of things that are mysterious, unusual or unique. The quack "doctor" will exhibit his powers of mesmerism, or have strange animals, or bandle with impunity naturally dangerous snakes, etc. These are his methods of attracting attention, to enable him to tell the story that will finally draw the money from the pockets of his hearers. Today, when a good salesman approaches you, he does not begin by presenting a cold bare business proposition. His first object is to arouse your interest in the thing he wants to sell. To do this he may resort to mesmerism, if he be clever, but he does not extract a snake from his pocket and demonstrate his ability as a snake-charmer. Rather his methods are refined and you like

his genial manner. Your interest aroused, he then shows why you need that particular article he is selling, and then if conditions are right, he makes the sale.

A good window display is a silent salesman. It attracts attention, and it convinces onlookers that they need the article displayed. It brings direct results. Such displays are usually the most difficult to get up, because they require original ideas and often much work, but they pay. They pay in every store that caters to retail trade, and there is no exception to prove the rule. To be sure, results will be far greater in a store located where greater numbers of people pass every day, but wherever there is a store that can do any business at all, then it pays. It pays because seven people out of ten are anxious to obtain a bargain, whether they need it or not, they buy anyway—if the article is presented right, and one doubtful customer made by those means is worth a great deal in indirect results which will follow.

The display which I will describe sold 19 dozen pairs of rubber gloves in two weeks. Previous to the display there had not been a pair of gloves in the store in over a year, so that the results attained were entirely the outcome of the display, coupled with one insertion of the accompanying ad. in the best evening paper in the city.

The main feature of the display was two right gloves held together as in a hand-shake. These were designated "Glad Hands," and below them was a statement which read, "Wear rubber gloves while doing housework, and you will always have 'Glad Hands.'" Above this and suspended from the ceil-

### DO YOU KEEP HOUSE?

**"GLAD HANDS" result if you wear RUBBER GLOVES**

Housework will save a woman's hands, and the more delicate the skin the more quickly do the hands become ruined. We have secured a lot of brand new gloves of good, heavy quality. Every pair guaranteed to be perfect. While they last,

## 49c

Mail Orders Filled

**HOLZHAUSER'S DRUG STORE, Cor. Market & Broad**

ing was a large sign which read "Superior Quality Rubber Gloves, 49 cents." At one side of the window and not shown in the photograph was a smaller sign on an easel with the plain bold statement that the gloves were not damaged nor seconds, and that every pair were strictly guaranteed to be perfect. Gloves were displayed on glass shelves arranged on the floor of the window. In order to have the goods stand up and show their form, an ordinary mineral water glass was used, over which the glove was drawn, then blown up. The Glad Hands were fixed in the same manner, but mounted on pieces

of soft wood, which fitted inside the glass and held it firmly. The other end of this arm was fastened to the frame work on the back of the sign. Crepe tissue was used to form the sleeves. In order to give the proper effect and to set the gloves off in strong contrast, a curtain was made of dark colored material and hung from a wire fixed at the top and back of the sign, and bent to form a semi-circle.

You will notice that the word "guaranteed" was used in one of the signs. I believe that this word is one of the most valuable assets that an advertiser has at his command, and yet it is a word that is abused and played with more than anything else I know of in the advertising line. It must not be used in a general sense, but it should be the center of all the force of expression and positiveness of assertion that one can command. To merely state that you guarantee a certain article means absolutely nothing to the average person that passes a show window. But to assert in unequivocal terms that the article is absolutely perfect in every particular, and that you are not only willing, but glad to refund the price paid if the article is not exactly as represented, then I say, you are making a statement that is one of the strongest selling points I know of. You would not put up a prescription nor sell five cents worth of salts, if you were not satisfied that it was all that it should be.

Exactly the same principle should apply to merchandise. If there is one class of tradesmen that should have more confidence in the thing he sells than any other tradesman, then that man is the druggist. Don't buy what you are not willing to stand by, even if it is only a fountain syringe. One of the most rapidly growing department stores that I know of has for its slogan, "Money back for any unsatisfactory purchase"; of course they mean it. This attitude taken by a store creates a confidence in its customers, and it is just this relation that all business men are striving for as a prelude to success.

It is surprising how few "come backs" there are with this plan, if managed properly. In the case of our rubber glove sale, we had a great many pairs exchanged because of error in selecting the proper size, but only two pairs were returned as unsatisfactory. One of these was actually imperfect, but the other case, I believe, was an imposition on the liberality of our plan. In every case, however, the customer was satisfied, and the store was a gainer by the deal.

Getting results from window displays is merely the application of the simple, time-worn principles of salesmanship as applied to displays. They may be summed up as follows:

1. Attract attention.
2. Convince.
3. Make good.

### Curiosities of Old Prescription Files in Lafayette.

Lafayette (Ind.) *Sunday Times*, of recent date devotes more than two columns to an interesting historical sketch of the Hogan Drug Company, wholesale druggists of that city, dating back to 1842. Thomas W. Hogan, the president, pointed out to the writer the interesting features of the old prescription files and furnished much information of local historic value. Among the peculiarities of physicians of years long gone was that of Dr. Jewett, of whom it is related that if he wrote a prescription for anyone, the ingredients of said prescription being nice and pleasant to the taste, he would always add some neutral drug that was bitter to the palate. He would make the statement that when a medicine was swallowed there was a mental attitude toward it that made it effective for good, if it was unpleasant. His own mind was far in advance of his day, for he believed greatly in the power of mental suggestion. While psychology and mental suggestion as sciences had not as yet been formulated, still the principles of these sciences, as yet crude and of a shape indefinite, were nevertheless, taking possession of broadly original and reflective minds, not bound down to hard and fast rules of an inflexible professionalism.

### Meetings of the New York Section, S.C.I.

At the March 19 meeting of the New York Section of the Society of Chemical Industry the evening's programme was as follows: G. W. Thompson, "Dutch Process White Lead"; E. C. Klipstein, "The Influence of Chemistry on the Utilization of Quinacrine." Illustrated with lantern slides; J. P. H. Perry, "Reinforced Concrete Industrial Buildings." Illustrated with lantern slides. The election of officers will be held April 23.

## Why Medicines Sometimes Fail.

By Emma Gary Wallace.

This is a great age. No one doubts it for a single moment. Truly the Public—the great, novelty-seeking Public—pays its money and takes its choice of any one of a dozen different roads which are supposed to lead to the town of Good Health.

Healing vibrations may be bought by mail at one dollar per so many vibs. The occult, the weird, and the speculative are regularly revived and rub elbows with newer theories of healing. Some are hypnotically fantastic and others entirely reasonable and progressive. We may have our food raw or cooked, pre-digested or natural. It may be grown above or below

ground, and we may eat of the flesh pots of Egypt to repletion or diet strenuously, so that according to an ancient priesthood, our bodies may sit lightly about our souls; or what is a great deal less poetical, we may go down to the corner drug store and get a dose of good, honest, cold-pressed castor oil made into a liquid sandwich with a sarsaparilla or a lemon soda and continue our way of thinking, rejoicing.

Yes, it is a great age, and what with the multiplication of medical schools, remedies and unrecognized, the various healing sciences, physiotherapy, the profusion of advertised remedies, the sensational itinerant medicine vendor, who has his field of influence and public uncertainty concerning the possible purity of drugs and fishes—the angust Court of Public Opinion has become confused.

It questions closely the efficacy of everything, even the old reliable remedies which have bridged over many a yawning chasm. Confusion leads to questioning. Superficial questioning which comes from lack of true understanding of a subject leads to doubt, and doubt means loss of confidence. Now, as the basis of all business is confidence, the loss is a serious one, of a more threatening nature if long continued, than a temporary panic, which readjusts itself with the restoration of confidence.

There is no use ignoring the vast following that believers in non-medication have gained in the last decade, and nine out of ten of them will argue logically and convincingly to the lay mind at least, that medicines too frequently fail in the effects they are expected to have.

It is often a matter of surprise to physicians and to pharmacists why tried and true remedies do apparently fail, when there is every reason to believe that the diagnosis has been correct, the proper remedies prescribed and the greatest skill and accuracy brought to bear in the compounding. Idiosyncrasies on the part of the patient are argued, and other remedies tried with equally discouraging results. Another druggist is patronized and the seeds of lack of confidence between the twin professions are sown, as well as in the minds of the patient and family. Practitioner and pharmacist have been conscientious and no error of judgment has been made, and yet too often the effects are not justified by the hopes of either. Why?

There is a reason so simple, why in many, many cases medicines fail, that its very simplicity seems to have caused it to be persistently overlooked. Too often, the medicines are not given in the homes as they are directed to be taken.

This is by no means true in all cases, but it is true in enough cases to be a serious menace to uniform results.

Unless critical illness invades the home—and even then various circumstances may prevent the employment of a trained nurse—the house-mother usually attends to the giving of the medicine, except in cases where the patient is able to attend to it himself, and in the crowd of detail and distracting cares which surround her, medicines are often given in haphazard manner. Many people do not have the respect for the medicines they are handling that they ought to have, and too frequently the necessity for a definite system of continued action to accomplish a given purpose is overlooked. Labora-

tory research may show that certain elements and combinations of elements have an unvarying action upon the human system, but up to date no laboratory research has shown by what means such action may be obtained if the medicines prescribed are left in a bottle on a shelf. Metabolism is difficult under such circumstances.

These cases are much commoner than is generally supposed, and they are not confined to any part of the country, either. Possibly the very paradox of the idea has kept it from being suspected, but if one stops to reflect how difficult it is to get any service, however simple, performed exactly right, the wonder will disappear.

Recently a well-educated woman—as far as books go—was given a prescription calling for a four-ounce mixture of essence of pepsin and tincture of nuxvomica. The medicine was to be taken three times a day in teaspoonful doses. It lasted considerably over a month, at the end of which time the patient reflectively viewed the remaining half-ounce and complained that either the doctor did not understand her case or the drugs had not been first quality, she rather suspected the latter, as the mixture had a most disagreeable, bitter taste, and she had received no benefit from it. That woman was not educated in that most important branch of knowledge, the necessity for system, and so she lost confidence in her druggist, blaming him for that for which she was to blame herself.

A dozen tablets to be given every half-hour until taken, beginning at 9 a. m., does not mean, as many interpret, one along during the day as it happens to some handy, with perhaps three or four left in the box and never taken. The patient has a restless night, the fever continues, and doctor or druggist, or both, are condemned.

The methodical, painstaking individual who will attend to such matters properly, without having particular and frequent attention called to the importance of it, is the exception. What avails the skill and knowledge back of material means, if such means are handled irrationally?

A mother with money and the advantages of travel, was heard recently to lament that the medicines prescribed for her child afflicted with urinary incontinence had been unavailing. She had consulted several physicians, and now meditated engaging the services of a magnetic healer. "And there," she said mournfully, "is a whole shelf full of medicines, that I have paid my good money for, and Johnny no better than he was in the beginning."

When questioned as to the reason for her frugality in keeping them on the shelf instead of giving them to Johnny, as directed, she looked injured, and declared "that one mortal could not be expected to remember everything, and it was not likely that they would have done any good, anyway. No improvement had been noticed from any given," and in a burst of parental solicitation she decided to crasp at the last straw, and send away for an advertised remedy of entirely unknown origin. Probably that joined the shelf assortment, too. If so let us rejoice.

Scarcely a week passes that some serious result does not occur from home carelessness in the handling of medicines. Sometimes dispensing doctors do not have the time to label their remedies, and patients forget the directions or get them quite differently in mind than was intended.

A woman with a weak heart who took powders of acetanilid and codeine every half-hour instead of powders containing one-tenth grain of calomel each, explained weakly when the alternate doses of brandy and strong coffee had pulled her together again, that she hadn't bothered to put on her glasses to read the labels. If every person had the proper respect for the medicines in their handling, prescriptions would not be handed around the neighborhood, nor would medicines be given internally which had been in the house for indefinite periods.

A case of this kind is still fresh in mind. A bright young man felt symptoms of a complaint from which he had suffered a couple of years previously, and going to the cupboard he found about one-third of a bottle prescribed for him at that time. He drank some of the bottle and went out to milk. Not returning, his family went in search of him and found him dead by the side of the first cow. Doctor and druggist were called upon to explain. Examination and analysis of the bottle and remaining contents showed that the original cork had been replaced by a very defective one, evaporation and chemical change had taken place, and the unmeasured dose of this different and stronger mixture had proved fatal. Ignorance is no excuse in the eyes of the laws of Nature, and patients

suffer and by reactionary effect, confidence in applied medical science suffers also.

People do not need to be frightened. They did not have to dance on the third rail in order to learn that it was wise to treat it with the respect of distance. Neither are they deterred from riding on the electric by the sign, "Dangerous, Keep Off." They have learned a wholesome deference for the power which they do not understand that whirls them on to their destination.

What can be done about it? Guard cannot be mounted over every prescription dispensed until it is all used, but an occasional word of advice may be given, embodying the truth that close prescribing and accurate dispensing are entirely dependent for results upon the faithfulness with which the directions are followed.

And the women-folk of the drug trade—those fortunate ones who understand, can be of *inestimable help* in disseminating among their sisters, in circles of friends, in clubs, and wherever opportunity presents, the incontrovertible fact that medicinal plants and material means were given us by a wise Creator, for the healing of the Nations, if rightly used. That the home administration must be systematic, conscientious, and of first importance, if the blessing of Good Results is to follow.

#### Winter's Programme at College in Richmond.

RICHMOND, Va., April 3.—The Pharmaceutical Association of the University College of Medicine has held meetings regularly each month this winter and much interest has been shown by both students and faculty. The following is a record of the winter:

October. Address, "History of Pharmacy," Dr. Roshier W. Miller, Dean.

November.—Discussion, "The Pure Food and Drugs Act, and Virginia Drug Laws," Prof. George E. Barksdale. The following students, representing their respective States, discussed the influence of the National drug laws on State legislation: S. O. Blair, West Virginia; W. M. White, North Carolina; L. H. Batts, Florida.

December. "Ethical Pharmacy" was discussed. T. E. Carper discussed the relation of proprietor to clerk; W. A. Madden discussed the relation of proprietor to public.

January. Address, "Household Chemistry," Prof. W. E. Radd, Paper, "Household Cleaning Preparations," E. P. Fletcher.

February. Address, "Good Tar Products and Their Official Derivatives," A. Bolenbaugh.

March.—Debate, "Resolved, That the practice of pharmacy should be limited to the sale and dispensing of only those substances used for the prevention or mitigation of disease." Affirmative, H. M. Fortes, L. W. Burdage, M. H. Hoffman, R. B. Shelor; negative, P. M. Massie, R. E. Monroe, C. L. Coleman, W. T. Johnson.

The officers are: President, E. D. Capper; vice-president, L. T. Ford; secretary and treasurer, W. L. Grimes.

#### New Chapter Has a Promising Future.

SYRACUSE, N. Y., April 3. The Syracuse Chapter of the W.O.N.A.R.D., a wide-awake organization representing 75 families, held a meeting Tuesday afternoon at the Chamber of Commerce. The auxiliary was organized for the purpose of assisting the Syracuse R.D.A., but as yet has not decided what line of work it will take up. The organization includes in its membership the wives of druggists and women clerks. Only routine matters of business were considered. Miss Effa J. Lawton, pharmacist at James E. Jones' drug store, at 415 Pond street, read a paper on "Women's Clubs." In the near future the women hope to develop a plan to promote the interests of the druggists. Mrs. W. B. Bissell is president, Mrs. George E. Thorpe secretary and Mrs. H. W. Greenland treasurer.

#### Timely Topics Discussed by Ohio Druggists.

CLEVELAND, April 3. The March meeting of the Northern Ohio Druggists' Association was held at the Cleveland School of Pharmacy, with President Schmeurer in the chair. After routine business the session was devoted chiefly to discussion of prescriptions, U.S.P. and N.F. preparations.

The absorption of making window displays of goods whose prices are unprotected was brought up, as it had been several times before. A report was made concerning a physician who complained because his prescription for *spiritus juniperi communis* was not filled by dispensing gin. This raised the familiar problem of Hoffmann's Drops vs. Hoffmann's Amodyne, and lastly the confusion regarding the many varieties of syrup of hypophosphites was discussed. All present added to their fund of information.

## A Double or Not.

By Joel Blanc.

It is a strange fact that the more peculiar looking an individual may be, the more supposed doubles he has. As it has been stated that all Chinamen look alike, and with fully as much truth, it may be said, that all one-eyed men look alike. The traveling man of peculiar appearance finds many evidences of the truth of this statement. Should he have a hair-lip or have suffered any disfiguring affliction, he will, wherever he goes, be told of other men who "look exactly like" him. However, when one comes face to face with his claimed doubles it will generally be found that the resemblance is only in a similarity of facial disfigurement, that observers have noted only the mark of affliction and ignored all other physical characteristics. In my years on the road I had a number of personal experiences of this nature.

In spite of the foregoing, I did have one experience which leads me to believe that I actually did have a perfect double, and yet I cannot be positive in my belief. It happened in the days when I was selling that little old pill, the sort that so many of you boys have bought from me. To be exact, it was during the yellow fever scourge of '87.

When I reached Decatur, Ala., the mail from farther south was already being punched full of holes and fumigated before delivery. Birmingham was under shot-gun quarantine and by the time I reached Florence via Tusculum and Sheffield the scare was in full swing. As a result, I was locked up in Florence by a cordon of armed sentries who surrounded the town, for be it known that a shot-gun quarantine keeps those who are in a town from leaving, just as rigorously as it keeps others from coming in. Having previously had some unpleasant experiences with quarantine in Florida and Mississippi, I resignedly accepted the inevitable and settled down for an indefinite stay in Florence.

I had arrived in Florence Wednesday night. When I learned on Thursday morning that I was trapped, the train upon which I came in being the last one that was permitted to enter, I simply laid in a stock of periodicals and settled myself to spend the first day in reading. Before this, however, I had called on Jim Milner and the other druggists, but under the circumstances had sold nothing. I then left my watch with Andrew Brown, the jeweler, for him to replace a broken main-spring with a new one. It rained hard all day Thursday and up to Friday evening, so I did not leave the hotel. Friday night I went over to Brown's for my watch. When I entered the store and asked for my ticker, Brown looked at me in amazement and said, "Why, you got it this noon!" Despite my emphatic denials, Brown insisted that I had come in about noon, that he had handed me the watch before I could ask for it, that I had taken it, proffered a ten-dollar bill in payment for the repairs, accepted my change and walked out. Brown's son Robert sustained his father by declaring that he had witnessed the entire transaction. Thinking that I had better keep quiet until I should have time to consult a lawyer, I mentally decided to first attempt to unravel the mystery, and returned to the hotel. In the lobby a group of men stood before the desk in earnest conversation with the proprietor of the house. Later I learned that the group was made up of the sheriff, Campbell, the banker, and some of the town merchants. I was in such a dazed condition that I could not be sure that they glanced at me suspiciously, but it seemed to me that they did.

Throwing myself into a chair, I sank into a troubled reverie which was soon broken by the voice of the proprietor who had advanced toward me, accompanied by the other men. What Connor, the hotel man, told me was this: Among the deposits made at Campbell's bank during the day, a number of counterfeit ten-dollar bills had been discovered. Investigation dis-

closed the fact that nearly every store along the main street had taken in a counterfeit ten-dollar bill during the day. Further investigation led a number of storekeepers and their clerks to declare that I had entered their stores, made a trivial purchase and in each case proffered a ten-dollar bill, receiving the necessary change in each transaction. While proprietor Connor, his clerk and the porter declared that I had not left the house until night, so far as they knew, the storekeepers and their clerks unhesitatingly identified me as the man who had passed the counterfeit money.

In a little while the hotel office was thronged with a curious crowd. The noise of argument had also drawn many from the nearby bar. Just as Sheriff Crow had expressed his intention of immediately removing me to jail, a long, raw-boned native came from the bar and pushed his way through the crowd in order to find out what the excitement was about. As his eyes rested upon me he gave a scream and then yelled, "Good Lawd! He's done come back. He's dead an' livin' too, an' I shot him with both barrels, blowed his face off an' throwed him in the river." Ashen white, trembling convulsively, the man thrust his hand into his pocket, drew forth and handed me *my watch!* "Take it, take it!" he exclaimed. "It must be a hant, laik you-all—an' this, take this, too!" He extended towards me a roll of bills, the tens of which proved to be counterfeit. Then the man attempted to flee; but the crowd closed around him and he was soon subdued.

Of course, this raw-boned native had not received the watch from Brown, had not passed the counterfeit money and was not the one who had been mistaken for me. From his half-drunken, half-crazy ravings we were able to piece out the story which told us how he had become connected with the case.

The man, a shiftless, n'er-do-well named Bloss, had volunteered for quarantine duty and had been put on guard at the Florence end of the railroad bridge which spans the Tennessee River at this point. He declared that shortly after sunset I had approached him and endeavored to bribe him to let me pass over the bridge. When he refused, I had, so he declared, rushed past him and started to run across the bridge. He thereupon fired both barrels of his shot-gun, killed me instantly and nearly blew my head away. Thus far Bloss had acted within the law, but when he reached the body and felt a watch in one of the pockets of the clothing, cupidity got the best of him and he took everything he could find. Then he made his greatest mistake by throwing the body into the swiftly rushing river. He went back on post and remained on duty until relieved by another quarantine guard. By this time Bloss' conscience had become awakened and he decided that the only way to quiet it was to come into town and use his ill-gotten wealth to get drunk. So far as I know, there was never any confirmation of Bloss' story except the pool of blood that was found upon the bridge, and never having seen the man I cannot say how much he really looked like me. It was proven that he had passed counterfeit money in several towns between Nashville and Florence. In Columbia he had acted as a book agent, it was said, and had a horse and buggy of his own. Possibly he had a pal with the horse at the other end of the bridge, but how and when he got into Florence and why he took such a fool's chance in trying to get out of the town will never be known. That he was dressed like me was certain, but there was nothing remarkable in that, as I wore a blue serge suit, black tie and derby hat.

The evidence of his resemblance to me was so unanimous and exact that I am forced to confess that the man must have borne a remarkable likeness to me.

I have often wondered what sort of a scrape I would have gotten into if Bloss had not shot the crook, and I am under the impression that some of the Florentines still believe that I passed those counterfeit bills.

### Remembered Brutal Murder of Venerable Druggist.

Boston, April 3.—Druggists in the Massachusetts Legislature recently showed that they remembered the murder of venerable Charles A. Bushee, of Somerville, who one stormy Sunday night a year ago was brutally beaten and robbed in his drug store by three young toughs. The Legislature was asked this year to allow juries in capital cases to report verdicts of guilty in the first degree with these words added: "without capital punishment." On the roll call on the bill Druggists Bonney, of Wakefield; Thompson, of Somerville, and Whittemore, of Somerville, all went on record against the amendment and helped to kill the bill.

## Original and Selected

### AROUSING INTEREST IN THE WORK OF THE STATE PHARMACEUTICAL ASSOCIATION.\*

By Wynn L. Eddy, of Brigham City, Utah.

*"What method can be suggested to stimulate interest among those members of the association who never attend its meetings, and do not realize the value of such gatherings?"*

The subject of this paper is one that has received more or less attention from the active members of every association, both social and commercial, that has reached any degree of efficiency in its particular field of action.

The first point for consideration in this question is: why will a man join the association, pay his fees, and yet never attend its meetings? At first thought you may not agree with me when I state that it is almost entirely a matter of selfishness; later you will arrive at the conclusion that it is selfishness, because he is willing to pay money to be considered one of a "live bunch," yet still will put forth no personal effort for the general good. That so many are willing and anxious to reap the benefits of concerted action, but will not give their personal attention to

The proper way to stimulate interest among members of this kind is to prove the work, is the basis of the entire trouble, to them that they lose more by being absent from the meetings than they can possibly hope to gain in the same time by their best efforts at their individual work. You, no doubt, feel this to be true or you would not be present at this time. The best method to thoroughly impress this upon the absent members is our desire. Have you a method? Many of you probably have a better method than I can suggest. If you have no method to accomplish this particular object, now is the time to get one, for upon you as individuals depends the life and efficiency of this association.

The method I have is to advertise. Advertise the benefits of the association to druggists as a whole, but more especially to advertise the benefits of the meetings to druggists individually. If you have something the other fellow wants to exchange for something you need you can adopt some means to let him know it. This is advertising, whether it be by bill-board, booklet, letter, newspaper or word of mouth. Now we have the good each individual receives by being present at our meetings to exchange for the presence of the absent members. Our pleasure and profit derived from this meeting will have no effect upon them unless they hear of it, therefore I would advise that this association have the proceedings of this meeting printed in pamphlet form and that the secretary be directed to send a copy to every member; also that several of the leading drug journals receive a general synopsis of our actions and a complete report of the pleasant entertainment extended to us by our fellow druggists of Provo and surrounding towns. The journals will be pleased to publish it as news and thus it will reach many members not here.

The membership committee might, with propriety, extend its sphere of action and write each member, not here, stating that their absence was noted and expressing a hope that they can arrange their affairs to meet with us next year; or better still, have the president, who has labored so assiduously for the welfare of the association the past year, perform this diplomatic service.

The above suggestions, if well executed, only begin our campaign. The major part of this advertising of the benefit

of the meetings to the individual member must be performed by personal effort. Continued personal effort in the endeavor to impress the value of attending the meetings upon the members who never come. If you can show by your enthusiasm that attending the meetings of this association has renewed your courage to tackle the problems of life, exalted your hope in the future of your business and presented you with ideas that give an impetus to your trade that cannot be withstood by all the petty efforts of your non-attending competitors, then our desire will be fulfilled and the non-attending members will be sitting on the front seats at our first meeting next year.

Begin now, if you have not already done so, to pay particular attention to the points and suggestions advanced at this meeting. Get them in concrete form and where applicable use them in your business. Brush up in the use of the English language, if getting a bit rusty, in order to be able to tell in a fitting manner the benefits and pleasures of this meeting. It will renew the good done you and stimulate the interest of those not present, when properly presented to them.

Take an active part in politics. Your time and energy cannot be better spent. Not as a politician or party man, but as a wide-awake citizen interested in the civic welfare of your particular community. Never before was there a greater interest manifested by the public in sanitary and health regulations than at the present time. The pharmacist leaves it all to the physician. This is neither proper nor right.

The prohibition problem will soon be presented to the people of Utah. It is a question of very material interest to the druggist. Study it, take one side or the other and be able to give your reasons in a dignified, agreeable manner.

Other questions may arise in your community that are of importance to you as a druggist and a citizen. If so, meet them fairly and come out squarely in the right that you may gain honor and your neighborhood profit thereby.

And last, but not least, be loyal to the association. Give it credit for the assistance it has rendered to you. Support its committees, answer their letters, spend some time and personal attention in the labor of the committee on which you may be appointed. Do these things that you may become a bigger man and a better druggist, that this association may be a greater power in the State and accomplish more good than ever hoped for in the fondest expectations of the most enthusiastic member present; that those absent will fully realize the value of such gatherings and be stimulated in interest to such an extent that nothing could keep them away from our meeting a year hence.

WYNN L. EDDY,  
of Brigham City, Utah.

### BUILDING UP A PRESCRIPTION BUSINESS.\*

By Charles H. Frantz, Bay City, Mich.

Endeavor and effort in the building up of a prescription business covers a very wide field of work. The modern drug store with its many "side lines" that have become practically integral parts of the drug business, if not of the drug store, give much opportunity for the display and feature work, so much so that the up-to-date drug store little resembles the shop we used to know where labeled bottles in orderly rows gave a sedate air that we all remember. The prescription business is often permitted to suffer under the stress of present-day conditions, often being subordinated to the confectionery, stationery and sundry lines, the soda fountain, the lunch features, the cigar stands, etc. At the same time the prescription business is still and always will be the basis of a drug store, and it should be and can be held as the first consideration without injury to the other departments.

It is the department upon which the public, ill with real or imaginary ills, looks with the most critical eye, to say nothing

\*Proceedings of the Michigan State Pharmaceutical Association, 1908.

\*Read before the Utah Pharmaceutical Association.

of the physician who is the mainstay of the prescription room.

While there are varying conditions in the different localities, there are plenty of rules that must be observed in building up a prescription business. Undoubtedly the first requisite is to cultivate the personal acquaintance of the physicians and to inform them of your prescription department and its clerks. Instill into them the confidence of yourself and your clerks. The prescription room is generally the "behind-the-scenes" of the drug store and it should be kept scrupulously clean and attractive, while the physician should be solicited to inspect the department at all times. Never substitute. Always give just what the doctor orders on his prescription. If he specifies P., D. & Co.'s make of any preparation, give it; if he orders Wyeth's give him Wyeth's, and if he wants Fairchild's be sure and give him that. By following this method it will take but little time to gain the physician's confidence for yourself, your clerks and your store, and it is productive of good with the patients, for such a practice metes out full justice to all concerned.

I do not think that it is good policy to be too aggressive in accepting agencies from patent medicine houses that antagonize the physicians with their newspaper copy. It has been my experience that where you are appointed an agent for a concern that guarantees to cure dyspepsia, catarrh, rheumatism, etc., over your name, guaranteeing to refund the money if it does not cure, you are antagonizing the physician, even though you may not know it. If a patent medicine house creates a legitimate demand for its wares, I believe it is good business to stock the article to a reasonable degree and hand it out when it is asked for. The rule against substitution applies here as well as elsewhere, not only on moral grounds, but because when a house creates a legitimate demand for its wares through newspapers, etc., I believe it ought to receive proper consideration in handling its wares, providing, of course, they are put into your hands at the regular \$2, \$4, \$6 and \$8 basis, or better.

Whenever we get hold of a new product in our prescription room, which in our judgment is a good thing for the physician to know, we do not hesitate to call his attention to it. I have invariably found that the physician appreciates and prescribes it for at least a trial, whenever he has an opportunity to do so. I do not think it is particularly good policy for a druggist to throw his influence to any particular physician when all things are equal. Fortunately I am in touch with the majority of the best men in our city. When asked for the name of a good physician it is a simple matter to mention a goodly number and a prospective patient will almost invariably make his own selection and ask your opinion, which may be then given with less appearance of favoritism.

Prescriptions by telephone are desirable and profit adders. It is worth while to get "next" to the physicians and request them to telephone their prescriptions, and then to make a special effort to fill such prescriptions quickly, securely, and attractively as you would do for a waiting customer, with, of course, quick delivery. The physician will invariably throw his business to the druggist who serves him best on telephone orders and that much sooner and in preference to sending prescriptions through the regular channels, via patient or messenger, because he telephones to save time and trouble.

The same rule holds good where patients telephone orders, etc. Druggists who have not had the experience nor made any efforts in the direction of telephone service will be surprised at the result if they will only cultivate this business.

#### Profitable Meeting of Northern Ohio Branch.

CLEVELAND, April 3.—The March meeting of the Northern Ohio Branch of the American Pharmaceutical Association held at the residence of Mr. and Mrs. Hopp, proved to be one of the most successful in the history of the branch. Curiously enough, the discussions of processes and preparations brought up by the members in an impromptu manner were possibly more important than were the set papers of the evening, although all present gained much valuable information from the timely paper on "Oil of Lemon" given by Professor Feil.

#### Use of Compound Microscope in Pharmacy.

The Washington City Branch of the A.P.A. will meet on April 13. The subject for discussion will be: "The Use of the Compound Microscope in Pharmacy." Papers will be read by Burton J. Howard and W. W. Stockburger.

## QUESTION BOX

THE OBJECT of this department is to furnish our subscribers and their clerks with reliable and tried formulas, and to discuss questions relating to practical pharmacy, prescription work, dispensing difficulties, etc. Requests for information are not acknowledged by mail, and ANONYMOUS COMMUNICATIONS RECEIVE NO ATTENTION; neither do we answer questions in this department from non-subscribers.

In this department frequent reference is necessarily made to information published in previous issues of The Era. Copies of these may be obtained at 10 cents each, except a few issues which are out of print, for which we charge 25 cents each.

#### Dyeing Straw Hats.

(T. G. S.)—"Will you kindly print in your Question Box column a formula for coloring or varnishing straw hats black. The formulas in my possession are not satisfactory, as they will either rub off or water will make them run."

We have had no practical experience in dyeing of this character. The plan generally followed, we are told, is that of coating the hats with a solution of varnish in which a suitable aniline dye has been dissolved. A German trade journal has recommended the following combinations, from which you may select one which will probably answer your purpose.

For dark varnishes prepare a basis consisting of 900 grams of orange shellac, 225 grams of sandarac, 225 grams of Manila copal, 55 grams of castor oil and nine liters of wood-spirit. To color, add to the foregoing amount alcohol-soluble coal-tar dyes as follows: Black, 55 grams of ivory-black (modified by blue or green). Olive brown, 15 grams of brilliant-green, 55 grams of Bismark brown R, 8 grams of spirit blue. Olive green, 28 grams of brilliant-green, 28 grams of Bismark brown R, Walnut, 55 grams of bismuth brown R, 15 grams of nigrosin. Mahogany, 28 grams of Bismark brown R, which may be deepened by a little nigrosin.

For light colors prepare a varnish as follows: Sandarac, 1350 grams; elemi, 450 grams; resin, 450 grams; castor oil, 110 grams; wood spirit, 9 liters. For this amount use dyes as follows: Gold, 55 grams of chrysoidin, 55 grams of aniline yellow. Light green, 55 grams of brilliant-green, 7 grams of aniline yellow. Blue, 55 grams of spirit-blue. Deep blue, 55 grams of spirit blue, 55 grams of indulin. Violet, 28 grams of methyl violet, 3 B. Crimson, 55 grams of safranin. Chestnut, 55 grams of safranin, 15 grams of indulin.

A similar process from an English work is the following under the title:

#### Straw Hat Reviver.

Shellac .....	4 ounces.
Sandarac .....	1 ounce.
Gum thus .....	1 ounce.
Methyl spirit .....	1 pint.

In this dissolve aniline dyes of the requisite color, and apply. For white straw white shellac must be used.

#### Licorice Gum Drops: Jujubes.

(Todd)—The old-fashioned licorice gum drops used to allay tickling coughs and to remove hoarseness, were simply a mixture of extract of licorice, gum arabic and sugar, made into a paste with water, additional flavor being added by those who preferred it. Here is a formula:

Extract of licorice .....	6 ounces.
Gum arabic .....	6 ounces.
White sugar .....	12 ounces.

Dissolve in,

Water .....	q. s.
-------------	-------

Jujubes, as sold by confectioners, are made from the best picked gum arabic and sugar and only the inferior kinds contain gelatin. According to the author of "Pharmaceutical Formulas," the common proportions are:

Gum arabic .....	32 pounds.
Sugar .....	14 pounds.
Water .....	2 gallons.

These are warmed by steam heat until, with occasional stirring, the gum and sugar are dissolved, then strained. Some makers dissolve the gum alone in the water, strain, then add the sugar, and heat until it is dissolved. Solution effected, the

preparation must be steadily heated until it attains a proper pourable consistency. When it is approaching this point, the coloring and flavoring materials are added, the whole well mixed, and poured to the depth of about one-half inch or so into oiled tin trays (jajubes boxes), or, if to be in the form of pastilles, the thick syrupy liquid is poured into molds made in trays of farina. These trays are next put into the drying rooms for a period varying from four to six or seven weeks. In this way "voice jajubes" are made, the coloring being cochineal and a trace of licorice, the flavors capsicin with traces of tolu, prunes, etc., and "delectable jajubes" are similar without the capsicin, and glycerin pastilles have two pounds of glycerin added to the above quantities of gum and sugar. The last-mentioned pastilles are often coated with a plain solution of gelatin to prevent them sticking. This is done in exactly the same way pills are coated with gelatin. The crystallization of gum goods is done by putting the jajubes in special crystallizing tins and filling the tins with a blood-warm syrup consisting of 24 pounds of sugar and a gallon of water. At the end of 12 hours (more or less, according to the crystallization desired) the syrup is drained off and the jajubes dried. Glyco-gelatin pastilles are made with either of the following bases:

(1)

Refined gelatin ..... 1 ounce.  
Glycerin (by weight) ..... 2½ ounces.  
Ammoniacal solution of carmine ..... a sufficiency.  
Orange-flower water ..... 2½ ounces.

The gelatin is soaked in the water for two hours, then heated on the water until dissolved. The carmine solution is added after cooling.

(2)

Transparent French gelatin ..... 4 ounces.  
White sugar ..... 4 ounces.  
Glycerin ..... 2½ ounces.  
Water sufficient to make ..... 16 ounces.

Prepare in the same way as No. 1. This mass may be flavored with 20 minims of oil of lemon, and for some combinations a small amount of citric acid is a decided improvement.

The medication of pastilles is accomplished by melting one ounce of the glyco-gelatin on a water bath, adding the medicine, previously rubbed to a thick syrup with glycerin, if powder, stirring until nearly cool, and forming into square or round pastilles.

## To Cement Wood to Iron.

(D. N.)—To cement wood to iron, a technical work gives these formulas:

(1)

Mix together four parts of carpenter's glue and one part of Venice turpentine.

(2)

Give the iron a coat of best white lead paint, allow to dry hard and coat with Russian glue dissolved in water containing a little vinegar of acetic acid.

(3)

Add tannin to a solution of glue until the glue becomes rosy.

(4)

Gutta percha, 20 parts; dissolve in a mixture of carbon bisulphide, 50 parts; oil of turpentine, 10 parts, and add powdered asphaltum, 20 parts. After standing a few days the mixture become homogeneous. If too thin it may be evaporated until, when cold, it is of the consistency of honey.

(5)

Gutta percha ..... 16 parts.  
India rubber ..... 4 parts.  
Pitch ..... 2 parts.  
Shellac ..... 1 part.  
Lined oil ..... 2 parts.

Reduce the solids to small pieces, mix with the lined oil and melt all together.

## Thymophen.

(W. A. S.)—In further reply to your query, this journal, April 1, 1909, page 304, E. H. Gane, of this city, writes us that the "term thymophen has been applied by Dr. E. C. Kirk, of Philadelphia, Pa., to a preparation composed of equal parts by weight of crystallized phenol and thymol. Rubbed together in a mortar, these two form a syrupy liquid which is largely used by dentists in treating exposed pulps of teeth, and as a root-canal dressing. It is not escharotic and is, of course,

highly efficient as a germicide. If you will look over a file of the Dental Cosmos you will find a note on the value of the preparation."

## "A.B.C." Gargle.

(A. B. R.)—We are unable to find a formula for a gargle under the above title in any of the reference works at our command. Can some reader supply the information?

## "Oil of Man."

(X. Y. Z.)—"Can you tell me what 'oil of man' is? An old Englishman wants it. He used to get it in England."

Nearly two years ago, in reply to the query "what is oil of man," used by English horse-breakers and tamers, we stated that we were unable to give a definite answer to the question, although the name might be a local synonym for oil of rhodium, which is used, it is said, by farriers, horse tamers and jockeys for quieting unruly horses. Various fictitious oils are also employed, a mixture of oils of sandalwood and rose or rose geranium being substituted for oil of rhodium. We have no additional information to give on this subject. It is possible that by closely questioning the Englishman you can get a line upon the uses of the "oleum hominis," which may give you a clue to its identity. In the meantime we submit the query to the readers of this journal and hope that some of them may solve it.

## Remedy for Excessive Perspiration.

(J. C. J.) We are not familiar with the proprietary preparation. However, some formulas for remedies recommended for use in the treatment of this complaint were published in the ERA of December 31, 1908, page 831. A formula for a satisfactory foot powder, said to be especially effective for counteracting perspiration, is the following:

Carbolic acid ..... 1 part.  
Dried alum ..... 4 parts.  
Starch ..... 200 parts.  
French chalk ..... 4 parts.  
Oil of eucalyptus ..... 2 parts.

A soluble antiseptic powder may be constructed along the line of the "pulvis antisepticus" of the National Formulary, which may be used as a dusting powder, or in 2 per cent solution. This powder, according to the "Physician's Manual of the U.S.P. and N.F.," is similar in composition to various antiseptic powders of more or less secret composition sold under trade names.

We believe that either of these formulas will answer your requirements, but the choice of which one you will do best to exploit must rest with you.

## ERA COURSE IN PHARMACY.

### Graduates for March, 1909.

Matriculation No.	Examination Grade, p.c.
5600. Clive Stanley Smith, Taunton, Mass.	98
5772. Bertha Grossman, Sealy, Texas	98
5799. Harry Promisloff, Philadelphia, Pa.	95
5806. Anna M. Stafrin, Dallas, Ore.	98
5810. Onis O. Hocker, Monroe, Ind.	98
5857. John A. Crook, Des Moines, Iowa	96
6001. Milton W. Paris, Fulton, Ky.	95

The above graduates will receive diplomas within a short time. A large and very handsomely engraved diploma, printed on artificial parchment, with the graduate's name engrossed, especially suited for framing, will be furnished to all those who request it for \$2. Those desiring the latter should forward the necessary fee to THE PHARMACEUTICAL ERA.

## Prescott Fund Aids University of Michigan Senior.

ANN ARBOR, April 3.—The trustees of the Prescott Memorial Scholarship Fund which exists for the purpose of loaning money to capable and deserving students, met at the School of Pharmacy in order to incorporate and transact necessary business. The present trustees of the fund are J. W. T. Knox, J. O. Schlotterbeck, F. W. R. Perry, Charles F. Mann, D. E. Pratt and E. E. Fulkner. One trustee is chosen annually by the Michigan Pharmaceutical Association and serves five years. A loan was made recently to one of the most promising young men of the senior class.

# ADVERTISING for DRUGGISTS

## WRINKLES TO ATTRACT PASSERS-BY.

### Signs of Spring.

With the coming of the balmy spring days all humanity gets out-doors and all eyes begin to look for new things. This tendency on the part of everybody suggests that now is the time to find new wrinkles to attract the attention of the passers-by. A sign which protrudes directly from the center of the glass of the show-window is rather startling, even though it be very simple.

Thus, take two pieces of heavy, stiff cardboard, each 16 x 6 inches in size. At one end of each piece fold back a flap one inch wide and at the unfolded ends join the two pieces together with a strong hinge of fibrous card paper or muslin fastened with glue. If a card 32 inches long, or equivalent to the length of both pieces is procurable, a simple fold may take the place of the hinge. When hinged and folded as directed, the figure becomes V-shaped, and when inverted and erected on the ends will stand on the one-inch folds with the folds turned to the inside of the V. Letter the two sides of the V-figure as may be desired. For lettering, such phrases as the following may be used: "A pointer on Spring Medicines: Try our Sarsaparilla." Or, trim the window with house-cleaning helps and on the sign letter "Time for These," and add a hand with index finger pointing to the window display. After the sign is lettered, cover the outside surface of the one-inch flaps with glue or cement and press them to the outside of the window glass until they adhere, the sign being so placed that it will extend over the walk.

### Another Pointer.

An even more striking sign is secured by making a cone or funnel of cardboard, cutting teeth in the edge of the base or open end of the cone, thus bending the teeth in and lettering the cone; now fasten the sign to the glass with glue or cement placed upon the teeth.

Additional attractiveness may be given to signs of this type by fastening a few long, narrow, brightly colored ribbons to the end of the sign. The fluttering of the ribbons in the breeze will attract the attention of those approaching from a distance.

### Just an Eye-Catcher.

A simple and yet effective method of causing people to pause and look into the window is to take ten or fifteen strips of narrow, say one-quarter-inch ribbon, each of a different color, glue one end of each piece of the ribbon to a small, circular piece of cardboard and then cement the card to the window glass. The ribbons become fluttering interrogation points to the average observer and the eye glances to the contents of the window for an answer to the question they suggest.

### Pushing Out.

Take a cardboard container of any article that you are driving, say a boxed soap. Take one of the soap boxes and cleanly cut it into two equal parts, the box being cut when the cover is on. Around the inside of the cut edges of each part glue a few angles of cardboard so that they will be in the same position as the fastening flaps of the previously described signs. When dry, fasten both halves of the box to the window glass by cementing one part to the inside of the glass and the other part to the outside. Fasten the halves of the box in such a position that the cut edges will seem to meet and thus make the box appear as if it had been thrust through the glass. Below this place a sign lettered similar to the following: "It is almost like throwing this soap away to sell it at this price."

### To Add to the Deception.

The attractiveness of this sign may be greatly enhanced by making it appear as if the glass around the box were really broken. There are two methods of doing this. For the first method either a point of soap or a paint made of whiting and water may be used to make a maze of fine lines close to and on

all sides of the box; the lines being made on the inside of the glass to simulate a mass of cracks. From the first lines drawn run long, wavy lines in every direction, some of which are made to meet at their ends so as to form long, irregular, spear-like points, thereby making it appear as if the glass were cracked in all directions.

The second method is more complicated and also more deceptive. Place a large sheet of heavy paper upon the floor of the window and upon it a sheet of glass. The paper should be large enough to make it possible to fold the edges upward and over the glass so as to almost, if not quite, cover it. After the paper is so folded place another sheet of paper on top of the first sheet and the glass. Now take a hammer and strike a quick, hard blow over the center of the glass so as to shatter it. The paper having now served the object of keeping the broken glass from scattering, the top piece should be removed and the edges of the lower piece unfolded. With invisible cement or light glue fasten the pieces of glass to the inside of the window glass and around the apparently protruding box, each piece of glass being in a position corresponding to the one it occupied in the unbroken sheet, so far as may be possible. Do not use the pieces of glass which show the square edge of the unbroken sheet. If the breaking blow has left the outside pieces very large, these should be broken separately so as to secure plenty of glass for the purpose without having to use the square edges, which would thus destroy the deception. Glass thus broken and fastened may be used around all objects which are so adjusted as to appear to be sticking through the window glass.

### An Awful Kick.

Take an old shoe that is in fairly good condition, a woman's laced shoe being preferable. Saw it cleanly into two parts at a slight angle. Start the saw at the top a little below the lower lace eyelet and finish the cut at the widest part of the sole. Stuff both parts with cotton, packing the cotton into the parts in layers. The two or three layers nearest the cut edge should be coated with glue to give rigidity, but without using enough glue to add greatly to the weight of the filling. The last layer of cotton should be liberally treated with glue and pressed flush with the cut edge of the shoe so that, when dry, there will be a smooth, hard surface by which to cement the parts of the shoe to the window glass. To secure a smooth surface it is best to set and dry this glue-treated surface under the pressure of a piece of glass that has been coated with vaseline.

When both parts are dry fasten to the window glass in the manner outlined for the adjustment of the soap box. Have the larger or heel part of shoe outside. Bring up the ends of the laces or ties, which should have been left in the shoe, and cement them to the window glass so that they will act as additional supports for the large part of the shoe. Do not cement them for their entire length, but leave the ends hanging loose. If thus adjusted, few will notice that the shoe is partly suspended from the ties. This adjusted shoe may be used with especial fitness for advertising corn cures. In connection with it signs like the following may be used: "When your foot feels as if it was full of broken glass it's time to use our corn remedy"; or, "She was bound to get our corn remedy, however hard she had to kick for it."

For general advertising the shoe may be used for other announcements as, "She had no kick coming about the price of this soap"; or, "Fifty dollars reward to the woman who can put this shoe on without removing it from where it is."

### Honesty, Profit-Sharing and Commissions.

DETROIT, April 3.—Joseph Hoffman, secretary to the general manager of Parke, Davis & Co., before the Detroit Credit Men's Association, talked about "The Growing Pains of a Great Business." His most emphatic point was that dishonesty never pays in the long run. He had considerable to say of the profit-sharing plan, declaring that while it is desirable in a small business, it is indispensable to a big one. He expressed the opinion that the commission system is better than the salary basis for traveling men, because thereunder there is less temptation to travel.

### Burglars Pilfer Druggists' Money Drawer.

YALE, Mich., April 3.—Burglars recently entered the Palace Drug Store of Pollock & Hennessy and stole \$50 from the money drawer.

## PERSONAL MENTION

—L. M. MONROE, of New Canaan, Conn., was a caller in the New York City trade last week.

—N. J. FINLEY, of Glen Cove, L. I., N. Y., was a visitor in the New York City trade a few days ago.

—CHARLES B. ALLISON, of Pipestone, Minn., has gone to Gayville, S. D., to take charge of a drug store.

—WILLIS L. MIX, of New Haven, Conn., spent a day last week in calling upon the trade in New York City.

—S. H. CARRAGAN and W. J. CARR, of the New York branch of Parke, Davis & Co., were recent visitors in Detroit.

—D. O. PATTERSON, cashier at H. D. Dwight & Co.'s drug store, Syracuse, N. Y., was recently confined to his bed by illness.

—G. W. MUTTER, of Parke, Davis & Co., of Detroit, Mich., was a visitor at the New York branch of the firm several days ago.

—E. A. MCFADDEN, of Hackensack, N. J., called upon friends in the New York City trade during the forepart of the week.

—R. E. MILLER, manager of the Owl Drug Company, of San Francisco, Cal., was a caller recently in the New York City drug trade.

—A. C. KOCH, who formerly represented Wm. R. Warner & Co. in Chicago, has taken a position as Chicago manager of the Vril Company.

—WILLIAM L. HAMILTON, auditor for the Armstrong Cork Company, was a Philadelphia visitor last week, before continuing on to Baltimore.

—MELVIN H. PERKINS, of Gloucester, Mass., is recovering from an attack of illness which recently confined him to his home in Prospect street.

—PETER ANSLIMI, formerly associated with Strosnider & Jenkins in Williamson, has accepted a position with George S. Landon & Co., Pocahontas, Va.

—RENE BIRSCHOW, of Milwaukee, is now employed as prescription clerk at the McDonald-Strassburger Pharmacy during the illness of Mr. Strassburger.

—SAMUEL ROBERTS, formerly representing Sharp & Dohme in northern Illinois, has resigned and taken a position as city salesman for Morrison, Plummer & Co., Chicago.

—F. L. BREYENING, who has been with the Chicago branch of Parke, Davis & Co. for a number of years, resigned April 1 to go into the brokerage business with his father at Milwaukee.

—JAMES D. BARTLETT, manager, and F. P. O'Brien, assistant manager of the Chicago branch of Parke, Davis & Co., visited Detroit last week to attend the Joseph Hoffman banquet.

—FRED ATKINSON, representing Parke, Davis & Co. in upper New York State, has returned to the New York branch of the firm after doing special work in that territory for some time past.

—ARTHUR A. HALL has returned to Provo, Utah, after an absence of several months in Pleasant Grove, where he was engaged in the drug business. He will be with the Moore Drug Company.

—A. J. HORBLICK, of Racine, Wis., who is in the field for reelection as mayor of Racine on the Republican ticket, is practically assured of his reelection, owing to the withdrawal of the opposing candidate.

—HALCOMB BEACH, of Lacuna, Oswego County, N. Y., has accepted a position in George E. Thorpe's Yates Pharmacy, in Syracuse, and will clerk there for a while preparatory to entering the Buffalo College of Pharmacy.

—PROF. I. V. S. STANISLAUS, dean of the Department of Pharmacy of the Medico-Chirurgical College, Philadelphia, has closed his home at Lansdowne and has taken apartments near the college. Mrs. Stanislaus is spending some time at Atlantic City.

—THOMAS V. WOOLEN, of the School of Pharmacy, Northwestern University, Chicago, will serve as a member of the reception committee at the entertainment of Jacob M. Dickinson, Secretary of War, by the Southern Club, of that city, on April 10.

—T. W. DALTON, of Syracuse, whose intention to take a rest was announced in last week's ERA, with his son, who

is also a pharmacist, will visit Texas this week. Mr. Dalton and son sojourned in New York City for a few days en route to the South.

—JOSEPH HELLMAN, assistant to the general manager of Parke, Davis & Co., Detroit, completed 25 years' continuous service with the company Thursday, and in honor of the event gave a dinner to several of his associates in the Hotel Cadillac, Thursday evening.

—DR. H. H. RUSBY, president-elect of the American Pharmaceutical Association and dean of the New York College of Pharmacy, will deliver an address before the North Carolina Ph.A. at the annual meeting of the latter organization at Greensboro June 23-25.

—ROBERT M. DADD, proprietor of the Dadd Pharmacy, Grand avenue and Second street, Milwaukee, and one of the best known pharmacists in the city, will soon leave with Mrs. Dadd for a trip through Europe. Mr. and Mrs. Dadd will be absent about two months.

—PROF. JOHN URI LLOYD, of Cincinnati, recently delivered an address to the graduating class of the Georgia Eclectic College of Medicine and Surgery, at Atlanta. While there he was entertained by numerous druggists, headed by President W. S. Elkin, of the N.A.R.D.

—MISS BERTHA LANDON, who is a contestant for a prize pony and trap offered by a local newspaper, is a daughter of Francis P. Landon, of Keystone, and a niece of George S. Landon, of Pocahontas, Va. Miss Landon is very popular and expects to win the contest.

—C. C. HAY, of Como, Miss., whose place of business was destroyed by fire in December last, will again embark in the drug business with E. W. Dimond as partner. Mr. Dimond is a graduate of the St. Louis College of Pharmacy and both partners are registered as pharmacists in Mississippi.

—CHICAGO drug trade had the following out-of-town druggists last week: H. J. Stiger, of Stiger & Crossman, Toledo, Iowa; C. J. Rouser, Lansing, Mich.; R. A. Abbott, Muskegon, Mich.; E. Woolsey, of Engel & Woolsey, Hartford, Mich.; N. S. Swain, of the Swain Company, Kansas City, Mo.

—DR. WILLIAM JAY SCHUEFFELIN, chairman of the Citizens' Union, was one of the speakers at a hearing in Albany recently before the Senate Cities' Committee, in which the proposed new charter for New York City was the subject of consideration. Dr. Schueffelin spoke in favor of the charter.

—GRANT SILVENS, who recently sold his drug store at Adams and Woodward avenues, Detroit, has bought the drug business of Dr. R. S. Dupont, 170 Michigan avenue, one of the oldest retail drug establishments in the city. Dr. Dupont will hereafter devote his time exclusively to his practice.

—PROF. C. H. KIMBERLY, of the Medico-Chirurgical College, spent a pleasant hour with Dr. Harvey W. Wiley, who stopped off in Philadelphia recently on his way from New York to Washington. Professor Kimberly, during the summer vacation, is connected with the United States Bureau of Chemistry.

—CHARLES A. DRETS, son of Charles A. Drets, a Buffalo (N. Y.) druggist, has been elected president of the Philomathean Literary and Debating Society of the University of Pennsylvania and was unanimously chosen as representative of the society on the university debate committee. At its last meeting Mr. Drets was awarded second prize in the annual oratorical contest.

—WALTER I. DREW, treasurer of the Maine State Ph.A., has recently sold his drug store in Portland to B. F. Dudley, of Gardiner, and will become the traveling representative of a wholesale drug house. Mr. Drew has been identified with the drug business for 30 years and succeeded A. S. Hinds as proprietor of the pharmacy which he has just sold.

—JOHN T. COLLINS, manager of the Collins Drug Company, Newburyport, Mass., recently had a house-warming at his new home, in Titcomb street, at which 200 friends, including 75 Elks, were present. Mr. Collins was presented with a beautiful Morris chair and an entertainment followed in which local talent participated. There was a bounteous feast.

—DR. HARVEY W. WILEY, Chief of the Bureau of Chemistry, of the Department of Agriculture, Washington, D. C., delivered an address upon pure food legislation before the Associated Clubs of Domestic Science at Hotel Astor, New York City, last Saturday. Dr. Wiley urged the adoption of pure food State laws to supplement the National act, which he said only controlled the interstate commerce phase of the situation.

## PHARMACY BILL WOULD CHANGE STATE POLICY

**Reason Why Massachusetts Measure Was Halted When Near Passage—Insist on Notices and Bonds.**

BOSTON, April 5.—Senator C. D. B. Fisk, chairman of the legislative committee on liquor law, explained to a representative of THE PHARMACEUTICAL ERA today the reason why he offered the amendment to the new pharmacy bill, after the matter had passed both branches and was in the enacting stage.

"A serious mistake had been made in that bill," said the senator. "A provision had been inserted which changed the whole policy of the State in its regulation of the sale of liquor. Ever since the present law has been on the statute books it has been the policy of the State to require the applicant for a license to sell liquor to advertise the application in some newspaper published in the town or county where the application was made. In other words, the State has required publicity as one of its policies in the regulation of the business. Then as another precaution, or as a guarantee that the license, if granted, shall be faithfully observed, the State has required that the applicant shall file a bond.

"Perhaps those are two of the most important features of the liquor license regulation in this State. Now what happened in the new pharmacy bill? In some manner a section was inserted providing that neither should the applicant for a druggist's license advertise the application, nor should he be required to furnish a bond for the faithful observance of the condition of the license. Perhaps that crept into the bill, and succeeded in passing both branches of the Legislature because the bill was reported from the committee on public health instead of the committee on liquor law, to which committee the matter ought to have gone if any change in the liquor law was contemplated.

"The committee on liquor law of course handles all matters affecting the conduct of the business in this State. Therefore a change in the policy of the State regarding druggists' licenses, which appeared to be innocent enough to the committee which reported the bill, became a precedent which to the committee on liquor law appeared one of much danger.

"When it was called to my attention I saw at once that a mistake had been made, and that the Legislature could not have known of the change in the State's policy which the pharmacy bill involved. I moved to amend the bill by striking out the clause which exempted druggists from either advertising their application or from furnishing a bond. When I called it to the attention of the Senate, the amendment was adopted unanimously.

"I met Dr. Oliver, chairman of the committee on public health, on Friday, and he agreed that the amendment proposed by me would be perfectly satisfactory not alone to him, but to his committee, and that it would pass the Legislature undoubtedly without opposition and in its present form. I understand that the bill in its amended form is also satisfactory to the druggists who petitioned for the legislation and to the State Board of Registration in Pharmacy."

### One Robber Convicted—Another Still at Liberty.

BOSTON, April 3.—Eighteen months in jail was the sentence imposed upon John Currier for breaking into the Boulevard Pharmacy in Malden February 27. Later the Federal authorities will press their charge against him for breaking into a postal station.

The police have also been baffled thus far in their attempts to apprehend the thief who entered the drug store of Maurice O'Donnell, at Human square, Cambridge, and who walked off with 130 money order blanks and the official fee with which the orders must be stamped. The postal authorities are still following that case.

### Eta Chapter Members Enjoy Annual Dinner.

BOSTON, April 3.—A merry company of 50 assembled at the Hotel Esplanade for the annual dinner of Eta Chapter, Phi Chi Fraternity of the Massachusetts College of Pharmacy. E. A. Ray, W.C.C., presided at the business meeting, while Prof. C. F. Nixon, of the faculty, was toastmaster. The speakers were Prof. Elie H. La Pierre, Dr. Henry J. Perry, R. Albros Newton, A. H. Tripp, all of the faculty; George L. Barronchs, of the alumni association; H. F. Gerald, W. Lee Campbell, A. M. Darling, W. A. Hurlburt and T. Dangelmeyer.

## WILL BE BIG EVENT FOR CHICAGO DRUGGISTS.

**Elaborate Plans Being Made for Minstrel Show to Be Held Next Thursday in Y.M.C.A. Auditorium.**

CHICAGO, April 5.—Plans for the minstrel show to be given by members of the Social Drug Club at the Y.M.C.A. Auditorium on the evening of April 15 are progressing satisfactorily. The first full dress rehearsal was held at a meeting of the club at the Sherman House today and the final work before the show is given will now be rapidly pushed in a manner that will insure another of the successes for which the organization is noted.

Many prominent druggists will be present and a box will be occupied by Thomas H. Potts, secretary of the N.A.R.D., and party. It is expected that all the seats will be sold.

### Joint Meeting in Chicago a Success.

CHICAGO, April 3.—The joint meeting of the Chicago Branch of the American Pharmaceutical Association and the Chicago Medical Society was held Wednesday evening in the Northwestern University Building with a large attendance. There was an interesting display of pharmaceutical preparations and a number of entertaining speeches were made. Among the speakers were Dr. Frank G. Billings and Dr. Fautus, of the College of Physicians and Surgeons.

### Northwestern Commencement Next Wednesday.

CHICAGO, April 3.—The graduates in pharmacy of the Northwestern University School of Pharmacy will be given their degrees at exercises to be held at the university building on April 14. The class numbers 57 students. The principal address of the day will be delivered by Dr. Edward Kremers, the dean of the University of Wisconsin School of Pharmacy. The subject of the address will be "Pharmacy's Contribution to Civilization."

### Chicago Notes.

—Chicago Chapter of the W.O.N.A.R.D. holds its annual meeting on April 13 for the election of officers.

—Rochester Germicide Company has leased quarters at 212 Washington street for two years at an annual rental of \$1200.

—Illinois State Board of Health is seeking an appropriation of \$23,000 from the Legislature to be used in the free distribution of antitoxin.

—Chicago Retail Druggists' Association will hold its quarterly meeting Tuesday evening, April 13, in the assembly hall of the Northwestern University Building.

—Walter Stauman, patent medicine manufacturer, and Mrs. Dorothea Vallaguethe have been indicted on charges made by Mrs. James C. Hoskins, a wealthy Chicago widow, who lost \$3000 that she invested in Stauman's business.

—Drug Store of Lee Stafield, 2843 Wentworth avenue, was held up one night last week, the thieves getting \$45 from the cash register. Mr. Stafield and two customers were covered with a revolver by one of the robbers while the other rifled the cash drawer.

—F. A. Lemke, a druggist at 1501 Harrison street, was playing cards with four friends in a room back of the store one evening last week when hold-up men entered the place. The highwaymen got away with \$125 in cash, four gold watches and the contents of the cash register.

### Plans of the A.P.A. Branch at New Orleans.

NEW ORLEANS, April 3.—Organization for the New Orleans Branch of the American Pharmaceutical Association was completed recently when the branch adopted the report of its committee on by-laws and constitution and mapped out the scope of the local organization's work. At the next meeting several samples will be submitted and scientific work started. It is also likely that the branch will take part in the propaganda work.

### Druggists Vote Against Woman Suffrage.

BOSTON, April 3.—Every druggist in the Massachusetts Legislature went on record on the question of amending the constitution so as to permit woman suffrage, and all of them were opposed to the innovation. Messrs. Bonney, of Wakefield; Bonvier, of Fall River, and Whittemore, of Ashland, voted against the proposition, while Thompson, of Somerville, was paired in opposition.

## OFFICERS OF NEW YORK STATE PHARMACY BOARD WHICH GOVERNOR PROPOSES TO REORGANIZE.

HERBERT M. GROVES, Jamestown,  
First Vice-President.

JOHN HURLEY, Little Falls,  
Second Vice-President.

WILLIAM MUIR, Phar.D., Brooklyn,  
President of the Board.

ALBANY, April 3.—About 32 pharmacists were present at the hearing on the Conklin Pharmacy Bill before the Assembly Committee of the Legislature on March 30. The legislative committee of the New York State Pharmaceutical Association was not represented, but President Peter Diamond appeared in opposition to the measure, urging the committee to defer action until the All-State Bill could also be considered, explaining that this measure would be introduced within a week and would differ materially in some respects from the Conklin Bill.

J. Roemer, in speaking for a delegation from Westchester County, said that they were opposed to the bill and in fact to any bill which was not altogether different from the present pharmacy law, especially in the matter of fines, which, in their opinion, should not be used for the maintenance of the board. They also desired a bill, stated Mr. Roemer, which should contain provisions defining definitely the powers and duties of inspectors. Mr. Diner and Mr. Conklin were accused of bad faith by the Westchester delegation, because a number of submitted suggestions from this delegation had been ignored and left out of the bill. It was stated by some of the Westchester druggists present, that in conference with Mr. Diner and Mr. Conklin at the time the bill was drafted, they were led to believe that their suggestions would be included.

Mr. Conklin replied to this accusation and said that he did not intend to do gratis legal work and the introduction into the bill of the features demanded by the Westchester delegation would have involved such a considerable amount of detail that they should have secured the aid of an attorney to look after their interests.

E. Wiesendanger stated that the Westchester druggists were willing to work in harmony with the State Pharmaceutical Association provided some good measure could be produced.

Finally Dr. Gary H. Wood, chairman of the Assembly committee, made a statement to the effect that the matter of the bill appeared to be a factional fight among the druggists and that from the mass of evidence submitted to the committee he did not believe the committee was justified in giving the bill

WARREN L. BRADT, Albany,  
Secretary-Treasurer.

any consideration. Dr. Wood also suggested that the druggists get together and work under the State Association and that when a bill which represented the factions from all over the State was presented the committee would take cognizance of such a measure.

From the questions of several members of the Assembly committee it was evident that they preferred a non-divided board, and would not consider favorably any bill which divided the State into sections, as does the present law.

There were present five or six Brooklyn Borough druggists, including W. E. Cragan and T. Lamb; a Westchester County representation of about ten, besides U. Wiesendanger and J. Roemer; Jacob Diner and George H. Hitchcock, of the Borough of Manhattan, New York City.

#### All-State Bill Introduced.

ALBANY, April 6.—The All-State Pharmacy Bill which has the approval of the State Pharmaceutical Association, was introduced in the Assembly by Assemblyman Brown today. Tomorrow Senator Witter will introduce it in the Senate. President Peter Diamond and the legislative committee of the State Association

had a conference with the Governor yesterday before the bill was introduced, and Mr. Hughes expressed his approval of the measure. The Commissioner of Education also has given his approval. The members will be appointed by the Regents from a list submitted by the State Association of double the number of members required for the board which in the measure is nine. The bill provides that the Board of Pharmacy shall enforce the law and the board will also conduct the examinations under the supervision of the Regents. The Whitney-Wainwright Bill is incorporated in the new bill.

#### Disinfectant Killed Him Just the Same.

MILWAUKEE, April 3.—Declaring that nothing which he drank could harm him, Rudolph Sturm, a well-known butcher, recently swallowed the contents of a vial of disinfectants and died in less than an hour.

"Oh, it wouldn't hurt me," declared Sturm, and drank the poisonous liquid before anybody could prevent him.

## BOARD EXAMINATIONS

### GOV. SANDERS ADDRESSES LOUISIANA BOARD.

Average Required at Examinations Raised to 75 Per Cent.—Charles W. Outhwaite President.

NEW ORLEANS, April 3.—The new Louisiana State Board of Pharmacy has formally organized and taken over the affairs of the old board, the latter being represented at the meeting by F. C. Godbold, for 21 years its secretary; Adam Wirth and W. M. Levy.

The election of officers resulted as follows: Charles W. Outhwaite, New Iberia, president; Fred A. Earhart, New Orleans, secretary; M. M. Bradburn, New Orleans, chairman finance committee; Gustave Seemann, chairman examining committee. Other members of the new examining committee are: Peter Rupp and M. M. Bradburn, New Orleans; Paul Eckles, Crowley. Other members are W. A. Allen, Monroe; E. L. McClung, Natchitoches; E. H. Walsdorf, New Orleans.

The next examination was fixed for May 7-8, and a resolution was passed requiring candidates to make application at least ten days prior. It was also decided to raise the required average for registered pharmacists from 70 to 75 per cent. The 60 per cent required of candidates for qualified assistants was not changed.

Governor Sanders addressed the board, speaking briefly of the duties which it had to perform and the necessity of conducting the board's affairs openly and without partiality.

The Tontonia Bank & Trust Co. was made the board's fiscal agents. The books and other affairs of the old board were found in excellent shape.

### Michigan.

GRAND RAPIDS, April 3.—The following have passed the recent examination held here by the Michigan State Board of Pharmacy for registered druggists: V. J. Burz, Chelsea; R. S. Hannah, Windsor, Ont.; S. A. Klukoski, Grand Rapids; R. H. Kolb, Unionville; E. D. Curtz, Hastings; Joseph Lake, Saginaw; F. C. Lee, Grand Rapids; J. A. Leevers, Bangor; R. D. Matthews, Grand Rapids; R. I. Parrish, Kalamazoo; W. J. Rosier, Jr., Saginaw; Robert Ryder, Adrian; J. H. Westerfelt, Holland; A. U. Axelson, Hancock.

These passed the examination as registered pharmacists: E. W. Ansin, Midland; H. S. Bowen, Adrian; R. A. Cosier, Marshall; A. J. Hall, Calumet; George Ireland, Almont; Charles King, Big Rapids; A. H. Knuth, Manistee; E. A. Lake, Nashville; F. E. Lohrstorfer, Port Huron; A. C. Meskey, Alma; H. R. Miller, Hastings; O. E. Oie, Munising; C. S. Schwarz, Detroit; D. R. Westendorf, Mount Clemens; H. W. Bowman, Almont; O. A. Eaton, Kalamazoo; B. McIlhenny, Harbor Beach; N. V. McPherson, Hart; C. G. Ranger, Morenci; G. H. Raycroft, Alma; J. W. Pemberton, Howard City.

### Massachusetts.

BOSTON, April 5.—The March examinations for registration as pharmacists proved to be unusually severe for the 79 applicants, for less than 22 per cent succeeded in passing. Not a single applicant in the class of 14 who took the examination March 29 succeeded in meeting the demands of the State board. Two other classes consisted of 16 each, one of 15 and one of 18. The list of successful applicants follows:

PHARMACISTS. Samuel J. Barron, Boston; Fortunat M. Beauvais, Holyoke; Peter F. Murray, Boston; Paul S. Staley, Lynn; John Walker, Jr., Winchester; Guy W. Cole, Boston; Joseph C. Cornwell, Pittsfield; Matthew C. Fleming, Pittsfield; Frederick B. Flittner, Boston; William C. B. Merriam, Springfield; Louis E. Bragg, Worcester; Andrew T. Frost, Chilton; Louis A. Lebbossier, East Weymouth; George L. Dow, Lowell; Robert J. Perry, Boston; Emile J. Phenipin, Waltham; Lloyd H. Webster, Braintree.

ASSISTANT PHARMACISTS.—Walter E. Cunningham, Lowell; Max M. Dain, Boston; Henry F. Murray, Boston; Frank E. Potter, Boston; John F. Smith, Boston; Ivan C. Thom, Waltham; Guy K. White, Boston; William F. Barnstead, Boston; Ernst A. Carlson, Brockton; Henry J. Chenette,

Brockton; Walter L. Douglas, Cambridge; Harry L. Hussey, Boston; John J. Lee, South Boston; Ernest G. Lundberg, Cambridge; George A. Rivers, New Bedford; Alfonso Gaeta, Boston; J. M. Raoul Gravel, Fall River; William T. Hunter, Fall River; Carl Krotki, Boston; Harry M. Macdonald, Scituate; George F. Martin, Chelsea; Walter L. Merrill, Newton; Frederick L. Mitchell, Richford, Vt.; Harold L. Pettingell, Boston; Edward T. A. Welch, South Boston; Samuel S. Broadbent, Worcester; Daniel F. Callahan, Woburn; Ernest A. Doyle, Boston; Solomon Feldman, Boston; William H. French, North Adams; Charles E. Grise, Springfield; Wm. E. McLaughlin, Woburn; Thomas J. Sullivan, West Somerville; Wallace E. Young, Taunton; Ernest A. Johnson, Lowell; C. M. Aivazian, Boston; Roy S. Bence, Pittsfield; William J. Cullinan, Lowell; Charles E. Hanson, Southbridge; Vernon Laing, Cambridge; Joseph U. La Salle, Fall River; Gustaf Peterson, Fitchburg; John E. Rock, Boston; Charles L. Smith, Boston.

### North Dakota.

FARGO, April 3.—More than 75 young men took the recent examination of the State Board of Pharmacy. The successful candidates were:

REGISTERED PHARMACISTS.—H. N. Bjornson, Ashley; William Baertsch, Marion; Allen H. Crawford, Westhope; A. E. Crum, Hansboro; G. A. Christianson, Leeds; Harold Collins, Langdon; J. F. Delury, Cando; D. E. Diles, Leeds; F. J. Edelman, Harvey; A. S. Flath, Churches Ferry; F. D. Harhold, Fargo; Fred N. Hall, Fargo; Oscar L. Hempstead, Sandstone, Minn.; H. N. Hewitt, Minto; Richard H. Juers, Harvey; E. C. Kuising, Jackson, Minn.; W. A. Knoll, Harvey; B. B. Lohrath, Fargo; J. R. Leeper, St. Johns; D. C. Miller, Minnewaukan; Arthur McDonald, Minneapolis, Minn.; Ralph E. Nix, Harvey; W. J. Orchard, Dickinson; R. A. Burt, Hope; A. J. Spielman, Garrison; Perry L. Stanton, New Rockford; Charles N. Sheldon, Rugby; Joseph N. Simmer, Grand Forks; Carl Vorlander, Linton.

REGISTERED ASSISTANTS.—Arthur Anderson, Thompson; P. J. Bergham, Ryder; C. Baglin, Hillsboro; William F. Crowley, Fargo; J. J. Gilchrist, Langdon; G. P. Manning, Hansboro; George J. McCabe, Jamestown; G. M. Noyes, Gackle; Cora L. Norris, Detroit, Minn.; R. C. Olson, Columbus; C. N. Parker and S. H. Short, Lisbon; D. L. Thompson, Esmond; E. Thompson, Devils Lake; J. L. Thiesden, Valley City; R. S. Turner, Lisbon; C. W. Ware, Abercrombie; L. J. Wilker, Hensel, and R. L. Ward, Fargo.

### Alabama.

BIRMINGHAM, April 3.—Secretary Edward P. Galt announces that at a recent meeting of the Alabama Board of Pharmacy 30 persons applied for examination and of that number the following were successful: Percy Y. Ashford, Bolton, Miss.; Samuel T. McKnight, Birmingham, Ala.; E. C. Miller, Atlanta, Ga.; Guyton Hall, Quincy, Fla.; W. C. Abbott, Trilby, Fla.; H. K. Bailey, Shocum, Ala.; O. C. Rush, Meridian, Miss.; A. J. Collier, Ozark, Ala.; A. J. Morris, Jr., Newton, Ala.; J. C. McFarland, Decatur, Ala.; Charles Smyrl, New Decatur, Ala.; Dr. T. E. Callen, Gadsden, Ala.; J. B. Stone, Tuscaloosa, Ala.; J. T. Eubanks, Tallassee, Ala.; G. H. Severage, Whistler, Ala.; Adain Lewin, Mariana, Fla.; Charles M. Sims, Searight, Ala.; H. B. McGeahey, Tuscaloosa, Ala.; James H. Loftin, Troy, Ala.; Roderick G. Lander, Mobile, Ala.; Samuel Sevier, Wylan, Ala.; B. L. Wheat, Atlanta, Ga.; F. Williams, Montgomery, Ala.; W. H. Gaudy, Pratt City, Ala.

The next meeting occurs at Gadsden, Ala., June 8-9.

### Rhode Island.

PROVIDENCE, April 3.—At the March meeting of the Rhode Island State Board of Pharmacy nine candidates were examined. The following were successful: Joseph B. North, Woonsocket; Henry O. Tanquay, Woonsocket; James L. Perkins, Providence; Charles M. Bennett, Providence; Alfred Parent, Providence; Salvatore Belli, Providence.

### Wyoming.

CHEYENNE, April 3.—The new State Board of Pharmacy, recently appointed by Governor Brooks, has organized as follows: R. A. Hopkins, Cheyenne, president; F. H. Egglestone, Laramie, vice-president; C. B. Gunucl, Evanston, secretary.

**EASTERN A.P.H.A. MEMBERS GETTING TOGETHER**

**Atlantic City Session Meeting With Favor and Annual Convocation at Los Angeles Very Attractive.**

BALTIMORE, April 3.—Arrangements are being made for a delegation of members of the Baltimore Branch of the American Pharmaceutical Association to attend the meeting on April 6 of the Philadelphia Branch. The Washington and New York branches have also been invited to go, and it is hoped that the Boston Branch will be represented at the meeting, which will discuss especially the expediency of holding sessions of the Eastern branches of the A.P.H.A. at Atlantic City next June, simultaneously with the deliberations of the American Medical Association.

Prof. Henry P. Hynson, who proposed the June gathering, states that he feels greatly encouraged over the manner in which the idea has been received. There has come to him a letter from Professor Hallberg, secretary of the section of the American Medical Association on pharmacology and therapeutics, expressing the opinion that such a joint meeting is entirely feasible, and that the section would so arrange its work as to have the druggists present.

Charles B. Whilden, secretary of the California State Board of Pharmacy, writes that the annual meeting of the American Pharmaceutical Association at Los Angeles will be one of exceptional interest, and that the trip alone will repay those who attend for the outlay and time expended. Mr. Whilden dwells on the beauties of California scenery and the excellence of the Pacific Coast climate, and he also points out that the meeting affords an exceptional opportunity for strengthening the association in the Western States.

**PROPAGANDA IN WASHINGTON.**

**Columbia District Association Now Working in Effective Manner.**

WASHINGTON, April 3.—The D.C. R.D.A. continues its activity in the U.S.P. and N.F. propaganda. The first two blotters of the series to be mailed to physicians have already gone out. They are beautifully printed on fine stock and bear no resemblance to the average "advertising blotter."

The first blotter deals with Liquor Antisepticus Alkalinus, N.F., and the second with Elixir Terpinii Hydratis Cum Hellebina, N.F. Following the title there is a description, formula and dosage. Then the physician is told why he should prescribe the preparation and informed that any member of the organization will furnish him with a sample of any U.S.P. or N.F. preparation he may desire.

The D.C.R.D.A. is proving that it meant what it said when it announced three months ago that it had "taken a new lease of life." The various committees are working harmoniously and effectively under the following chairmen: Membership, Paul Pearson; finance, H. C. Easterday; telephone, S. L. Hilton; legislation, W. S. Richardson; education, F. M. Criswell; preparation of samples, Lewis Flemer; early closing, Charles J. Fuhrman; joint meetings, Frank C. Henry; mail order evil, Charles B. Campbell; N.A.R.D., W. S. Wagner; entertainment, F. P. Weller; press and printing, Frank T. Stone; price protection, George W. Hurlbeaus.

**\$100,000 Fire Caused by Explosion of Chemicals.**

MINNEAPOLIS, April 3.—Damage estimated at \$100,000 was done the stock and fittings of the Minneapolis Drug Company by an explosion of chemicals on the sixth floor of its plant and the consequent breaking loose of a thorough sprinkling system over all six floors. The explosion is said to have occurred when John C. Walker, a chemist, opened a container of barium, a supposedly non-explosive substance.

**"CAPTURE" AND PROPOSED RECAPTURE OF U.S.P.**

**Physicians and Pharmacists Discuss Revision, Standards, Government Supervision and Propaganda.**

PHILADELPHIA, April 3.—Before a large audience of physicians and pharmacists at the meeting of the Philadelphia County Medical Society, Prof. Joseph P. Remington, dean of the Philadelphia College of Pharmacy and chairman of the Revision Committee of the United States Pharmacopoeia, replied to the charge made by Dr. Henry Leffman, a previous speaker, that the pharmacists had "captured the Pharmacopoeia" and declared that it was only when the physicians had abandoned the fortress that the pharmacists had entered and taken possession. In this claim he was ably seconded by George M. Beringer, of Camden, N. J.

The evening was devoted almost entirely to a discussion of the Pharmacopoeia and the relations of the pharmacist and the physician. The title of Dr. Leffman's paper was "The Capture of the Pharmacopoeia and Suggestions for its Recapture."

**Honored by Fellow-Scientists.**

JOSEPH L. TURNER,  
of Philadelphia, Pa.

Fellow-scientists have recognized the ability of one of the youngest of their number in electing Mr. Turner as chairman of the recently formed Scientific Section of the Philadelphia Branch of the A.P.H.A. He is in charge of the research laboratories of the H. K. Mulford Company.

He discussed the large representation of pharmaceutical interests on the Committee of Revision and the small proportion of representatives of the medical profession and advocated a complete reorganization of the system of revision and publication. He suggested that the committee should consist of representatives of the American Medical Association, the American Pharmaceutical Association, the Army, the Navy and the Marine Hospital Service, and that the revisions should be made every five years instead of every ten years. He supported the plan of having the Pharmacopoeia published under the supervision of the United States Government.

In replying, Professor Remington criticized the title of the paper, saying that in no case was it the capture of the Pharmacopoeia nor was that portion of the title any happier "suggestions for its recapture."

"It is the abandonment of the fortress," he said, "by the medical profession and of the pharmacists entering and taking possession, for the Pharmacopoeia had to be published. The pharmacist and the physician have never been arrayed against each other as such and as any one could see, the Pharmacopoeia was made up mainly of standards for the preparation of medicines, giving tests for the identity and purity of chemical substances used as medicines. It was undoubtedly because of the acceptable character of the book that the Food and Drugs Act of June 30, 1906, adopted it as its standard."

Continuing, Professor Remington declared that the medical profession to a very large extent had wandered from its allegiance to the Pharmacopoeia many years ago and had worshipped strange gods, prescribing proprietary preparations, specialties, and in some cases, nostrums. This custom, he said, prevailed to such an extent that many of the younger physicians did not know what the Pharmacopoeia was. Under these conditions, he said, it became necessary after the passage of the Food and Drugs Act to organize a propaganda to make the physicians acquainted with the Pharmacopoeia, to visit the doctors personally and show them Pharmacopoeial preparations with which they should have been perfectly familiar in their daily practice. This work, according to Professor Remington, has spread to such an extent that practically a revolution is going on throughout the country. He said:

"But this revolution is a peaceful one, as meetings have been held in the large cities in which the physicians and pharmacists have sat down together and discussed with a pipe of peace the situation. And thousands of physicians are prescribing today, Pharmacopoeial preparations which they never previously had used in their practice."

Professor Remington further stated that in his opinion the destiny of the Pharmacopoeia was to become a Government

book, but that the Government would undoubtedly revise the work through a commission composed of physicians, pharmacists, chemists, botanists, physicists, importers and wholesale druggists and manufacturers, who would be selected for their expert knowledge and their recognized ability to perform the work. He said every effort should be made to invoke the aid of every good and honest interest throughout the country to make the work as successful as possible. The part especially required of the physician, he said, would be the forming of titles and determining what drugs and preparations should enter into the Pharmacopoeia and what should be dismissed, and again what should be the proper doses.

Other speakers were B. Frank Hays, who urged the admission of tablet preparations to the Pharmacopoeia; Charles H. La Wall, who described "The Revision of the National Formulary," and Prof. I. V. S. Stanislaus, dean of the Department of Pharmacy of the Medico-Chirurgical College, who outlined a code governing the duties of the pharmacist and the physician in relation to the prescription.

#### Spanish Edition of U.S.P. Nearly Ready.

PHILADELPHIA, April 3.—The Spanish edition of the United States Pharmacopoeia is now being bound and it is expected that within a week it will be ready for distribution among the Spanish-speaking nations for which it is intended. The first edition will number 2000 volumes, but judging from the advance orders, it is believed that this will soon be exhausted and another edition will be necessary. It will be sold at a fixed price to everybody.

#### DR. WILEY HITS HARD AT "TONIC" DRUGS.

**Certain Proprietaries, He Declares, Owe Their Popularity to Alcohol, a Dangerous Ingredient.**

WASHINGTON, April 3.—Dr. Harvey W. Wiley, Chief Chemist of the Department of Agriculture, was the principal speaker recently before the second session of the Society for the Study of Alcohol and Other Drugs, which is holding its semi-annual conference in this city. Dr. Wiley criticized certain proprietary drugs sold as tonics, of which alcohol, he said, was the chief and most dangerous ingredient.

"The good effects of alcohol in quieting the system are attributed to the tonic actions of the drugs," said Dr. Wiley, "but in reality this action is narcotic and depressant, covering up and concealing the damage and at the same time provoking a craze and demand for continuation in the future. Alcohol as a preservative and a narcotic in the so-called tonics and stimulants is dangerous because of the unknown effects which are sure to follow. Many drugs now on the market owe their popularity entirely to the alcohol they contain and this in the poorest and most dangerous forms."

#### Pharmacy Students Visit Indianapolis Laboratories.

LOUISVILLE, April 3.—Eli Lilly & Co. acted as the hosts to a delegation of retail druggists on Wednesday. The party was composed mainly of students from the Louisville College of Pharmacy, with several of the professors accompanied by some of the prominent retailers. A chartered car left this city over the Louisville & Indianapolis Railway at 8 a. m., arriving at Indianapolis at noon. The visitors were taken to the Board of Trade restaurant for luncheon and then repaired to the laboratory, where all of the different departments were inspected. Dinner was served at the Claypool Hotel, after which the start was made on the return, arriving here about midnight. All are loud in their praises of the attraction and hospitality shown them.

#### Druggists Guests at Rockland County Joint Meeting.

NANUET, N. Y., April 6.—A pamphlet has been issued by the officers of the Rockland County Medical Society to its members calling attention to the joint meeting of the society with the pharmacists of Rockland County which will be held tomorrow afternoon. The programme will be carried out at the Lederle Farm after the regular meeting of the Medical Society. Dr. William C. Anderson, of Brooklyn, chairman of the propaganda committee of the New York State Pharmaceutical Association, will be the speaker, and deliver an address on "The Relations of the Physicians and the Pharmacists." After a general discussion refreshments will be served. The pharmacists have been invited as guests of the physicians.

#### LARGE GRADUATING CLASS AT ATLANTA C.P.

**Interesting Exercises in the Grand Opera House, Including a Recitation of the "Georgia Girl."**

ATLANTA, April 3.—There was a large attendance at the very interesting commencement exercises of the Atlanta College of Pharmacy at the Grand Opera House on Monday evening. The exercises were opened with an invocation by Rev. Junius W. Millard. Degrees were conferred by President Judge Howard Van Epps. Rev. S. R. Belk delivered an address with "The Building of a Man" as his subject. The dean, Dr. George F. Payne, read his report. Miss Clara Wimberly, a well-known elocutionist, recited Harry Stillwell Edwards' "The Georgia Girl." Music for the occasion was furnished by Professor Card's orchestra. The graduating class is said to be one of the best in the history of the institution. Its officers are Lee H. Williams, president; Frederick A. Swanberg, vice-president; Osmond C. Rush, secretary and treasurer. Following is the class roster:

Percy Young Ashford, Mississippi; William Cassidy Abbott, Florida; Henley Varner Bayne, Georgia; Hugh Lee Boyd, Mississippi; Thomas Carleton Komar, South Carolina; Herman Murphy Crowder, Mississippi; Mike Cheln, Georgia; Philip Cohen, Georgia; Raymond H. Carswell, Georgia; Edwin Marvin Carr, Mississippi; Isaac Earl Dantzler, South Carolina; Arthur Aaron Derrick, Mississippi; Lindsay Franklin Dicken, Mississippi; Herman David Flanagan, Mississippi; Benjamin Franklin Gilbert, Mississippi; Thomas Lee Graves, Mississippi; John Cleon Hunter, South Carolina; Geyton Hall, Florida; George Samuel Hiller, Alabama; Ernest Elmer Hagland, New Hampshire; Travis Lambkin Hazood, Alabama; Charles Terrell Hardman, Georgia; Thomas Percy Howard, Mississippi; A. D. Johns, Jr., Texas; Samuel Carlton Lindsay, Mississippi; Alva Herman McDonald, Georgia; Otto Cleveland McClellon, Alabama; William Joseph Maloy, Virginia; Joshua Grady Mills, Georgia; El Caney Miller, Alabama; Osmond Conrad Rosh, Mississippi; Frederick Albert Swanberg, Colorado; John William Stewart, Arkansas; James Henry Souther, Georgia; Roy Stephens, Georgia; Charles M. Sims, Alabama; Hugh Joseph Thompson, Arkansas; George Anton Tanner, Georgia; James Willis Twigg, Jr., Georgia; Lee Henderson Williams, Mississippi; Robert Burns Wise, Mississippi; Miss Jessie Wimberly, Florida; Benjamin Lucien Wheat, Mississippi.

Taking the degree of Ph.C.: Charles Slater Vanzandt, Mississippi; taking the degree of Pharm.D.: Marion Sims Dantzler, South Carolina.

#### Graduates of the Louisville College of Pharmacy.

LOUISVILLE, April 3.—At the annual commencement exercises of the Louisville College of Pharmacy, held in Trinity Methodist Church, diplomas were granted as follows: A. L. Parsons, West Virginia; J. S. Shaffer, Indiana; J. E. Curtis, Kentucky; C. H. Standiford, Texas; A. S. Newell, Indiana; G. D. Baker, Indiana; W. T. Myers, Pennsylvania; T. T. Gibson, Virginia; J. G. Bently, North Carolina; G. R. Garvin, Indiana; P. C. Stackey, West Virginia; Edgar Austin, Illinois; J. D. Bruvniert, Kentucky; H. M. Garrison, Kentucky; C. I. Hughes, Arizona; L. T. Terrell, Kentucky; J. D. Banta, Kentucky; B. F. Tye, Kentucky; G. G. Fox, Pennsylvania; W. F. Potter, Virginia; C. B. Davis, Kentucky; C. W. Lenhart, Illinois; J. S. Tamplin, West Virginia; J. A. Franze, Kentucky; J. L. Russell, Kentucky.

#### "Get-Together" Dinner at Drug Club This Evening.

Invitations are out for a "Get-Together" dinner, of the members of the Drug and Chemical Club of New York, to be held at the club rooms this Thursday evening. According to the committee, the affair is to be informal and designed for the purpose of renewing friendships among the older members and making the acquaintance of the newer element. Dinner will be served between 6.30 and 10.30, with accommodations for 200 persons. The art and entertainment committee has charge of the arrangements.

#### Food Decision 77 Amended in Decision 106.

Board of Food and Drug Inspection at Washington has promulgated Food Inspection Decision 106, which amends Decision 77, defining the terms "batch" and "mixtures" as used therein. It refers chiefly to dyes.

## NEW CHEMISTRY AND PHARMACY BUILDING BEING ERECTED FOR UNIVERSITY OF MICHIGAN.

ANN ARBOR, April 3.—Owing to the increased attendance and consequent overcrowding of the old chemical laboratory of the University of Michigan the Board of Regents awarded contracts some time ago for a new and larger chemistry and pharmacy building, which will cost about \$300,000. This building will accommodate from 800 to 1000 students and every effort is being made to have it ready for occupation by the beginning of the next school year.

The building is located in North University avenue, near the Barbour and Waterman gymnasium, and is of simple rectangular form, 230 by 130 feet, with two interior courts, separated by a central building or cross-wall. The exterior is of iron-spot brick with Bedford limestone grade and belt line courses and with terra-cotta cornice. The interior is of reinforced concrete columns and floors with hollow brick partitions.

Much attention has been paid to the heating, ventilating and lighting of the building, and to the electric wiring and plumbing systems. Other features will be the lecture rooms, which will seat from 150 to 200 students, and the library, which will be a handsomely finished room having shelving capacity for about 12,000 volumes, or nearly twice the number of books in the present chemical laboratory. A food and drug laboratory will adjoin the office of the Dean of the School of Pharmacy and other research laboratories will be open to advanced pharmacy students. The ends of the building will be occupied by large and well equipped laboratories which will be used for work in general chemistry, pharmacy, qualitative analysis, quantitative analysis and organic chemistry. A prescription room equipped to accommodate twice the present prescription department will adjoin the pharmacy laboratory and a special laboratory for pharmacognosy and a drug museum will be located on the third floor. It is intended that upon occupation of its new quarters each member of the class in pharmacognosy shall own a drug cabinet of about 250 specimens for laboratory as well as home use.

Distilled water will be made on the fourth floor and hydrogen sulphide generated in an entirely isolated room of the attic and both will be piped to all parts of the building. In addition to the usual plumbing for water and gas, independent sets of pipes will supply steam and compressed air.

### SENATOR HEYBURN'S PURE FOOD BILL.

**Would Prevent Misrepresentation as to Federal Guaranty But is Not Likely to Pass at This Session.**

WASHINGTON, April 3.—Considerable interest has been aroused here over the re-introduction by Senator Heyburn, of Idaho, chairman of the Senate Committee on Manufactures, of his bill amending the Pure Food and Drugs Act so that the guaranty label cannot be used to make fraudulent representations. The text of the bill is as follows:

Section 1.—That it shall be unlawful for any person, association of persons or corporation to place any mark, sign or insignia upon any package, label, covering or wrapping of any article of food or medicine stating in words or effect that the contents of such packages are guaranteed under the Pure Food and Drugs Act of June 30, 1906, or are guaranteed or recommended in any manner by the Government of the United States.

Section 2.—That any person violating any of the provisions of this Act shall be fined not more than \$1000 or imprisonment for not more than one year, or both, at the discretion of the court.

In the last Congress the bill was favorably reported by Senator Heyburn's committee, but got no further. At this session he again introduced it, with a number of other bills, but there is a general understanding that no legislation in addition to the Tariff Bill will be attempted at the special session and nothing further is likely to be done with it before the regular session convenes in December.

### Coming Meeting of the Oklahoma Ph.A.

Local Secretary William E. Dechant, of Muskogee, expects a large attendance on May 18-20 at the annual meeting in that city of the Oklahoma Ph.A. and Travelers' Auxiliary. There are now about 3000 druggists in the new State and the number is reported to be constantly increasing.

### N.Y.R.D.A. EMBLEMS ON STORE WINDOWS.

**Display Aids in Killing Traffic in Premiums and Turning Trade to Ethical Pharmacists.**

At the March meeting of the New York Retail Druggists' Association the "premium evil" was again the chief topic under discussion. The special committee which has had the matter in charge has been divided in several subcommittees and two of these made reports. The committee on emblems announced that the emblem of the association was ready for distribution to the members who wished to place them upon their windows, showing that the store was an "association store," where no premiums were handled. A number of members each secured an emblem and have placed it conspicuously on the door pane, where the public cannot fail to see it before entering.

The committee on the journal which is published by the society for the purpose of educating the public and assisting in wiping out the premium evil, reported very gratifying results. A number of instances were cited where customers had been reformed from the habit and also how the interest taken by many people living in the district was aiding the committee in securing patronage for the anti-premium stores.

The report of the legislative committee was made by Joseph Weinstein in place of Chairman Peter Diamond, who was unavoidably absent. This report caused a discussion on the Conklin Bill and also other pharmacy legislation. Stress was laid by all who took part that the association endorse only such legislation as emanated from the New York State Ph.A. and members of the legislative committee were instructed to insist that appointment of members to the Board of Pharmacy by the Governor be only from the names submitted by the State association.

By unanimous vote \$75 was ordered sent to the treasurer of the New York State Ph.A. for defraying the expenses of the annual meeting at Richfield Springs next June.

The following pharmacists were elected to membership: M. Kirschstein, L. Bailin, H. Morgenstern, Harry H. Reinstein, I. Bleier, H. Strass and George H. Guth. At a previous meeting Jacob Diner and H. Gorodez were elected members.

### New York Druggist Indicted for Selling Cocaine.

Giovanni Valle, a druggist at 52 MacDougal street, Borough of Manhattan, New York City, who was arrested about four weeks ago charged with selling cocaine, was indicted by the grand jury on March 23 and held in \$10000 bail pending trial. Two detectives went to Valle's home and there purchased a small package of the pulverized cocaine, at the same time seizing five boxes and five bottles, which also were found to contain the same substance. It is said that Valle only dealt in the article at his home and not at the store.

### Banquet, Vaudeville and Paper for Three D's.

KINGSTON, N. Y., April 3.—The annual meeting of the Associated Doctors, Druggists and Dentists of the city of Kingston and vicinity will be held at Hotel Elchler Tuesday evening, April 13, at 9 o'clock. After the banquet Dr. James J. Walsh, of Fordham University, will speak on "Medicines, Physicians and Specialists," to be followed by a vaudeville entertainment furnished by the Bijou. Charles L. McBride is president and George H. Clark, D.D.S., secretary.

## DISPENSING HABIT OF DOCTORS GROWING.

German Apothecaries Hear That Use of Nostrums is Not on the Decline—Arranging for Entertainments.

A large portion of the meeting of the German Apothecaries' Society held last Thursday evening was given over to the discussion of the prescribing of nostrums by physicians. E. C. Goetting thought that the physicians were very slow to recognize official preparations, considering the efforts spent by the druggists in that direction. Mr. Goetting stated that there were more nostrums prescribed now than ever before, contrary to the opinion of a large number of pharmacists who believe that the practice is passing out of existence. A number of the members took up the discussion and stated that the physicians were becoming dispensers to quite an extent. No action was taken except that the members who spoke, all announced that they were combatting these practices wherever possible, and looked for a solution in the closer co-operation of the physician and the pharmacist.

There was no action taken on any legislative matters, George Kleinau, chairman of the legislative committee, announcing that the new All-State Bill had not as yet been introduced, and there were no bills requiring attention. President Hirsman stated that in any new bill, he favored having only active pharmacists appointed to the Board of Pharmacy.

Otto E. Gilbert, chairman of the entertainment committee, announced that all the arrangements were being completed for the entertainment to be given in the society's rooms on April 29 and that as previously announced, Carl Hauser, the famous German humorist, would certainly appear. Mr. Gilbert stated that a musical programme would also be carried out and due to the fact that the entertainment would be a rather complete affair, no "kommers" for the members would be held until September or October. An informal outing to Pielis, in East New York, was also under consideration by the committee, said Mr. Gilbert, while the annual summer outing would be reported upon at the next meeting.

Treasurer Robert Lehman stated that the expenses in connection with the last annual ball were \$45 less than those of the previous year. President Hirsman complimented Mr. Gilbert, chairman of the entertainment committee, for its success.

C. F. Schlensner, ex-president of the society, called attention to the celebration at the Brooklyn College of Pharmacy on April 15, at which time the mortgage clearing the institution of debt will be burned. Mr. Schlensner made several complimentary remarks concerning the college.

A communication from Prof. Joseph P. Remington was read expressing the hope that all the members had enjoyed the evening of his recent visit to the society as well as he had himself. The members were also shown a copy of Professor Remington's "Practice of Pharmacy," bound in sheep, which was presented by the author to the society.

A communication from the widow of Dr. Charles W. Volney contained the information that Dr. Volney died on February 28. She thanked the society for the friendship shown her husband. Dr. Volney has lectured before the society several times and was to have entertained the members in May. A letter of sympathy was sent to Mrs. Volney.

A letter of condolence was also sent to Emil Roller, chairman of the scientific committee, expressing sympathy for the death of his mother on March 9.

Herman Ridder, vice-president of the Hudson Celebration Committee, in a letter invited the society to take part in the celebration. No action was taken, but E. C. Goetting, president of the Riding Club, which is composed of members of the Verein, stated in a humorous way that the riding club would probably turn out. Mr. Goetting also strongly advised President Hirsman to join and stated that ladies were eligible to membership. Members of the club were very enthusiastic over the sport, said Mr. Goetting, and had just taken their first ride in a body through Central Park.

A check was ordered sent to the United German Societies, which the Verein recently joined.

Emil A. Bischof was proposed for membership.

Following the meeting lunch was served.

## Publishing Company to Be Dissolved.

MILWAUKEE, Wis., April 5.—The *Pharmaceutical Review* Publishing Company, of Milwaukee, has filed notice of dissolution.

## MANY ICELESS FOUNTAINS FOR LOUISVILLE.

Druggists All Seem to Be Installing New Apparatus for the Coming Summer Season.

LOUISVILLE, April 3.—This city appears to have gone wild on the subject of "Iceless" soda fountains, as turn where you will or wherever you go, you find a new one. Some comparatively new fountains are being disposed of at very low prices to make room for the newest in that line. Only recently the Newman Drug Company put in a "Liquid," and the new store that is to be opened in Fourth avenue under the Swellbach has contracted for one of the same make.

The City Hall Pharmacy received and put up one of the latest designs of a Becker last week and to judge from the genial smiles of the boys who run the place they are not only well pleased with their selection but think they have the only apparatus in Louisville.

The Krieger Drug Company, at Second and Market streets, has just set up a Puffer. The Krieger store at Second and Jefferson streets is installing a Marietta "Iceless" made in Indianapolis. The two stores are owned by the Krieger Brothers, and naturally each of them believes he has selected the best that can be offered in the Iceless line.

Several other stores are figuring on the new style fountains and it looks as if every drug store that makes a specialty of the soda water business will be equipped with a new apparatus before the summer season is well under way.

Vene A. Coleman, hustling representative of the J. Hungerford Smith Company, is making his usual call on the drug in this section. He is a "native" and gets the loyal support of the local trade, both wholesale and retail.

## \$4000 License to Sell Near-Alcoholic Beverages.

AMARILLO, Tex., April 3.—Deputy Sheriff Frank Buckingham is authority for the statement that sale is rather slow in the new soft drink occupation licenses recently created by the State Legislature. The act creating necessity for the occupation tax provides that if a person shall engage in the sale of frosty, tin-top, 2 per cent or other similar drinks, he shall pay a license of \$2000 to the State, \$1000 to the county and \$1000 to the city, making a total of \$4000.

While the Dispensatory Drug Act is not repealed in this law, this later act of the State Legislature proposes to strip the establishments operating under the Drug Act of other sources of revenue than the legitimate sale of prescription whisky. So far none of the licensed houses under the Drug Act have seen fit to invest the necessary \$4000.

## New Fountains in Milwaukee Pharmacies.

MILWAUKEE, Wis., April 3.—Several druggists in and about Milwaukee are preparing for the coming season in the soda fountain line by installing new equipment.

Henry Gerboth, well known Milwaukee druggist, is installing a modern new fountain at his branch pharmacy at 43d and Clyburn streets, and expects a big business. Cornelius Zeche, who recently moved into his new building at Pewaukee, is putting in a new fountain which will be a winner, judging from indications. The McDonald-Strassburger Drug Company, at Green Bay, has remodeled an adjoining store to be used as a new ice cream parlor, the serving to be done from the usual fountain.

## Another Victory for Massachusetts Pharmacists.

BOSTON, April 3.—The committee on education of the Massachusetts Legislature has reported adversely on the bill which would place all technical and professional schools under the supervision of the State Board of Education. Had the bill passed the Massachusetts College of Pharmacy, now said to have the largest endowment of any school of pharmacy in the country, it would be placed under the supervision of the State Board of Education. The bill aroused much hostility, and at the hearing before the legislative committee there was overwhelming opposition.

## Jail and Bankruptcy for Selling Liquor.

LYNDEN, Wash., April 3.—C. Landall, druggist, convicted of running a "blind pig," and who is serving a 30 days' sentence in jail, has had also to close his store and go into bankruptcy. His liabilities are \$4000 and his nominal assets nearly the same.

# PATENTS, TRADE MARKS, ETC.

## PATENTS.

Granted March 30, 1909.

- 916,425—Walter L. Ellingwood, New York, N. Y. Bottle-filling apparatus.
- 916,450—William H. Keller, Philadelphia, Pa., assignor to Caloris Manufacturing Company, a corporation of Delaware. Vessel for the conveyance or storage of liquids.
- 916,485—Major D. Porter, Lewiston, N. Y. Container.
- 916,495—John H. Seymour, Whitney Point, N. Y. Process and apparatus for making calcium carbide.
- 916,532—Hans Christensen, Canton, Ohio, assignor to the Miller Pasteurizing Machine Company, Canton, Ohio. A corporation of New Jersey. Apparatus for pasteurizing or sterilizing liquids.
- 916,598—Thomas M. Richards, Alton, Ill. Bottle-fishing machine.
- 916,692—Richard von Foregger, New York, N. Y., assignor to the Roessler & Hasslacher Chemical Co., New York, N. Y., a corporation. Topical remedy.
- 916,701—Chriss Hansen, Columbia, Nev. Non-refillable bottle.
- 916,814—David A. Williams, Represa, Cal., assignor of one-half to Charles Murray, Represa, Cal. Bottle seal and closure.
- 916,815—David A. Williams, Represa, Cal., assignor of one-half to Charles Murray, Represa, Cal. Bottle casing and closure.
- 916,900—Gustav Teichnew, Nuremburg, Germany. Process for electrolytically producing peroxid of hydrogen.

## Iowa Druggist Burns His Liquor License.

PLEASANTON, Ia., April 3.—A unique meeting took place here recently to determine whether it was a benefit to the town to continue the sale of liquor at the local drug store. The meeting was called by the proprietor A. M. Hagg. It was composed mostly of business men. Arguments were presented, both pro and con, and even an experienced temperance lecturer could have gained points. After the flow of oratory had ceased a vote was taken, and all but three voted to discontinue the sale of liquor. Among the three dissenting votes was one cast by a minister. When the matter was finally decided, Mr. Hagg produced the Government license and a match was applied to it. As the last of the paper disappeared in smoke, a rousing cheer was given by those in favor of prohibition, but outside the building, where were gathered the antis, many groans disturbed the quiet night air.

## TRADE MARKS.

Published March 30, 1909.

- 33,933 The Mother Siegels Syrup Company, New York, N. Y. Class 6. Tablets for indigestion and all stomach and liver disorders.
- 38,268—Frank V. B. Gildersleeve, New York, N. Y. Class 6. A pharmaceutical preparation used as a remedy for pyorrheal-alveolaris and as a general mouth wash.
- 39,604—The Amulet Chemical Company, Philadelphia, Pa. Class 6. Talcum powder and tooth paste.
- 39,913—Farbenfabriken of Ellersfeld Company, New York, N. Y. Class 6. A bactericide and antiseptic.
- 39,914—Farbenfabriken of Ellersfeld Company, New York, N. Y. Class 6. An anesthetic.

## Pharmacy Law Changes in Oklahoma.

GUTHRIE, Okla., April 3.—Governor Haskell has approved the Bryan Act amending the law regulating the practice of pharmacy. The new law does not change the requirements for registration but increases the number of members of the State Board of Pharmacy from three to five. It also repeals the provision of the old law which provided that the Governor should select the membership of the State board from a list of ten names submitted to it by the State association. Under the new law the Governor may choose the membership of the State board from the entire membership of the association.

Some Republicans claim that the new law gives the Democrats an advantage claiming that Republicans controlled the association and that the names of Democrats were not often submitted to the Governor from which he could make his appointments. Under the new law the Governor has no limitations as to whom he shall appoint as members of the State Board of Pharmacy.

## Students' Meeting at New York Branch Monday Night.

A symposium of the essentials of the leading foreign pharmacopoeias will be the programme for the meeting of the New York Branch of the American Pharmaceutical Association on Monday evening. This meeting is called for 8.30, a half hour earlier than usual, as it is proposed to entertain students of the various colleges of pharmacy located in the metropolitan district. Physicians, pharmacists and clerks have also been invited to attend. Following are the pharmacopoeias that are to be considered and the names of the gentlemen who are to present outlines of the same: Austrian, Otto Raubenheimer; British, Prof. H. J. Lohmann; French Codex, C. A. Mayo; Japanese, Keizo Wooyenaka; German, W. C. Alpers; Russian, Joseph Weinstein; Spanish, Hugh Craig; Swiss, Dr. Joseph L. Mayer.

Copy of any PATENT or TRADE MARK, 10 cents.  
 Author of copyrighted work on Protective Trade Marks,  
 Food and Drugs Act, and Valid Patents.  
 G. H. DAVIS, Attorney, 908 G St., Washington, D. C.

# LETTER BOX

## Kentucky's Law Importance of Organization.

Editor *The Pharmaceutical Era*:

In my recent letter, printed in the *ERA*, March 25, page 288, regarding organization and the laws which affect retail druggists in this State, I notice that I have made two minor errors in my statements which I want to correct. The *Pure Drug Law* specifies that the *Kentucky Pharmaceutical Association* shall name one member of the board—hence the Governor has nothing to do with the appointment.

Another error was in the statement that a person could not be punished for a first offense. It should have been followed by the words: "That in case of the first charge—shall be notified of the findings and be given a hearing within 15 days before a report is made," etc.

In my opinion the *ERA* could do no more beneficent work than to continue the agitating of organization as the only safety for the retail druggist. So many of our law-makers consider the retail drug store as a veritable gold mine and prone to put us in the class with multimillionaires and robber barons that only by united effort can we get this fallacy out of their minds and secure justice for our profession.

Yours very truly,

Louisville, March 30.

S. N. J.

## Medicinal Plant Industry in Nebraska.

Editor *The Pharmaceutical Era*:

I feel that I ought to write you and tell you about my experience in raising medicinal plants on a ten-acre tract of ground adjoining Omaha, Neb.

Of course the altitude and climate are not available at this point for the raising of everything in medicinal plants and I met with some disappointment in trying it. I expect to do better this year, however, having gained by the experience of the past year.

I set out 100 plants each of the following: *Sal muscatella*, *seminu*, *corpula*, *castolax*, *pilobersin*, *salva-ea*, *rootbear*, *foot-easelle*, *bancue*, *antipidlogeride*, *baccocura*, *kargon* and *chococax*.

On account of the previous Legislature the country was very "dry" around here and much boot-legging had to be done to keep things moist. Then we were bothered with the insect known to medicinal plant raisers and botanists as the *pulempitis afterdarkerus*.

I was unable to get a purchaser for any of my crop, despite the writing I did to all the drug handlers of this and other continents. Many of them wrote me to consult a specialist in diseases of the upper-thinkum, some wrote me to go hence (particulars of where on demand), and others refrained from replying at all—seemingly being too busy with other matters. I, however, found a market by putting the goods in on commission with some of the second-hand dealers who disposed of them to curio buyers who bought them under the impression they were good for warts and epilepsy when used at the dark of the moon in conjunction with the incantations.

If there was a better market for my products I would make another payment on the land and continue more seasons at the business.

Any one desiring to go into the raising of medicinal plants can obtain slips of any of the above mentioned plants by writing me in a plain envelope and enclosing \$10.

I also raised some corn and potatoes, for which I found a ready sale indirectly—that is, I fed the same to some hogs I had on the place and then sold the hogs. Animals of any character can be turned loose among the above stated plants with the assurance to yourself they will not eat them.

Many of my neighbors called during the season, but they seem to take my efforts with a great deal of fun and ridicule. I was prepared for this, as all workers in advance knowledge have to bear the brunt of ridicule and discouragement.

With this extended and detailed description of my medicinal plant emporium I finish. With the season's compliments and the assurance you have one of the best drug journals extant, I am, Medicinally Plant Farm Life Yours,

Omaha, Neb.

JOHN MEDPLANT.

## FIRST AID STATIONS IN NEW YORK STORES.

Twenty-nine Druggists Interested in Ambulance Service Which Replaces That of Roosevelt Hospital.

During the past month 29 drug stores in the Boroughs of Manhattan and the Bronx have installed equipments for first aid stations as provided by the National Volunteer Emergency Service to its members. From what can be learned probably as many more will join the service and secure equipments before very long, as the druggists now members state that progress is being made very rapidly.

The action of the service in establishing these first aid stations, follows the withdrawal of the Roosevelt Hospital ambulances, which occurred on March 1, and in order to have an efficient substitute in the place left open in this field the service has decided upon this method of first aid stations, which is patterned after the St. John's Ambulance Corps, of England.

Eriz-Gen. F. E. Davis, in an interview at the New York headquarters a few days ago, stated that while the organization was over nine years old it was just recently that the pharmacists had been actively appealed to for participation, due in a measure to the lack of opportunity to use their services until the recent chance. General Davis went on further and stated as follows:

"The service is a National organization and its purposes are designed not to supplant but to supplement health measures, sanitary societies and public utilities already established and to provide the means of supplying deficiencies in personal and equipment wherever a volunteer service may be of advantage, either in peace or war. To best accomplish the aims it has adopted a military form of organization. The object of the drug store stations is to relieve the hospitals which are greatly overcrowded and when possible place people who have been injured in their own homes under the supervision of their own physician.

"The duty of the druggist who is a member of the service is to get into communication with the patient's family physician and it is then up to the doctor to say what he wants done with the case. If he directs the case transferred to the home of his patient he promptly summons an ambulance from headquarters, and it is done without expense either to the doctor or patient. The doctor will feel grateful to the druggist for his work and the druggist will incidentally secure the physician's prescription, besides possibly the trade of the patient. Every station is provided with a regular army litter, emergency bag, lantern, poncho, pair of blankets and a rubber pillow. The membership fee is \$3 per year for druggists and \$5 for physicians, while the organization is purely a philanthropic affair and no one gets paid for services."

## BUFFALO EVENS UP WITH ROCHESTER.

Second Inter-City Session Includes Bowling and a Banquet With Toasts and Interesting Speeches.

BUFFALO, N. Y., April 3.—The druggists of this city had as their guests recently a party of about forty of their brothers from Rochester. Six weeks ago, when the Buffalonians went to Rochester for a good time, they were beaten in a spirited bowling match. Just to even matters, they beat the Rochester men in three straight games that lasted all afternoon and into the evening. Each of the eight alleys at Foss' was kept busy. Totals: Buffalo, 2532; Rochester, 2391.

Following the bowling, an excellent meal was served at the Hotel Brozel. James A. Lockie presided at the speech-making end of that affair. Among those who responded to toasts were W. F. Whelan, who welcomed the visitors; M. H. Page, who tried to excuse himself for moving from Buffalo to Rochester; R. K. Smith, who amusingly reviewed some of his experiences as an alderman; George Hahn, who talked a little "shop"; Thomas Stoddard, who dwelt on his favorite theme, Buffalo's railway terminals; Julius A. Grass, a lawyer, and Dr. Guy L. McCutcheon.

## Cahoon-Lyon Company Buys Another Store.

BUFFALO, April 5.—The Cahoon-Lyon Drug Company, of Buffalo, has bought the drug store and business at 367 William street, this city, many years occupied by Charles E. Martzloff. New fixtures and a new front will be installed.

# BUSINESS RECORD

**Changes in Ownership. New Drug Stores, Incorporations, Fires and Other Commercial Matters of Interest to Wholesale and Retail Merchants.**

**Supplement to The Era Druggists' Directory.**

**ALABAMA**—SELMA—V. D. Young Drug Company have opened a new store here.

**WINFIELD**—Hill & Hollis have dissolved partnership and Dr. R. L. Hill will conduct the business alone.

**WOODLAWN**—F. M. Wood, formerly proprietor of the Second Avenue Drug Store, has been succeeded by L. R. Shiflett.

**ARKANSAS**—DE QUEEN—Jones & Alston, proprietors of the Model Drug Company, have sold out to Latimer Brothers. Style of firm will remain the same.

**LITTLE ROCK**—H. A. Mashburn & Bro. Co., incorporated, is the style of the new drug store at 707 West Seventh street; capital, \$3500.

**CALIFORNIA**—WHEATLAND—Dr. W. A. Patterson has been succeeded by W. M. Crilley.

**WOODLAND**—F. Von Jochnimsen has been succeeded by James Roseberry.

**COLORADO**—COLORADO SPRINGS—George W. Tate, Opera House Block, is the new proprietor of the Opera House Pharmacy.

**WRAY**—Dr. Thomas Barr has been succeeded by Brown & Roberts.

**CONNECTICUT**—WATERBURY—Stephen Gladding, Jr., will open a new drug store at 755 North Main street.

**DISTRICT OF COLUMBIA**—WASHINGTON—R. K. Helphensline, 14th and R streets N. W., has been succeeded by W. S. Richardson.

**FLORIDA**—MILTON—Dr. W. E. McDougal has been succeeded by Hilson Brothers.

**O'BRIEN**—Dr. J. H. Reynold; store destroyed by fire; loss, \$1000.

**ILLINOIS**—CHICAGO—O. J. Duke, 935 North Halsted street, has been succeeded by Olaf Olsen.

**MOMENCE**—Roden & Cone have dissolved partnership. Mr. Roden will continue the business with L. S. Cooke. Style of firm to be Cooke & Roden.

**INDIANA**—COLUMBUS—Hauser & Parker have been succeeded by Hauser & Updegraff.

**VINCENNES**—Duesterberg & Kramer will open their new drug store about April 15.

**IOWA**—ESTHERVILLE—Anderson Drug Company is the style of the new drug store here.

**GREENE**—Birney Drug Store has been succeeded by L. M. Snow.

**LEHIGH**—Nelson Drug Company has been succeeded by M. I. Little.

**WINTHROP**—E. E. Collins has been succeeded by E. W. Gaylord.

**KANSAS**—CUBA—G. R. Thomason has been succeeded by Milburn Reed.

**KENTUCKY**—FULTON—Irby Brothers; store destroyed by fire.

**LOUISVILLE**—Treber Drug Company, Broadway and Third avenue, has been succeeded by Haschemeyer Brothers.

**ROBARKS**—William B. Eblen; store destroyed by fire.

**MASSACHUSETTS**—WOBURN—F. P. Brooks has sold his store at 261 Main street to W. S. Davis.

**MICHIGAN**—DETROIT—Gray & Worcester have opened a new drug store in the Majestic Building, formerly occupied by the Lorain Confectionery Store.—R. A. Carmichael has sold both his stores here. One at 1022 Champ-lain street to Sepull & Travis and one at 933 Champ-lain street to J. H. Webster.

**EATON RAPIDS**—Wilcox & Golding have been succeeded by O. C. Palmer.

**NEW JERSEY**—NEWARK—J. D. McCroery, formerly of New York City, is now located at 250 Walnut street.

**NEW YORK**—BROOKLYN—C. E. Slauson, 1169 Liberty avenue, has been succeeded by William Hanson.

**CLIFTON SPRINGS**—C. N. Bryaut has been succeeded by N. B. Briggs.

**COOLERSJOWN**—Brazee & Bodin have dissolved partnership. H. L. Brazee will continue the business alone.

**CORNING**—The partnership heretofore existing under the firm name of Cole & Matthews in the cities of Corning and Elmira, N. Y., has dissolved. L. V. Cole will continue the business at Corning and L. N. Matthews the store at 135 East Water street, Elmira, N. Y.

**TROY**—Stovers Pharmacy, Fulton and Fourth streets, has been succeeded by Grady Drug Company.

**OHIO**—CANTON—Eby Drug Company, 120 North Market street, has been succeeded by the Square Drug Store. Kays & Ogden, proprietors.

**TOLLEDO**—Rex & Katzenmeyer, 2202 Ashland avenue, are the new proprietors of the Economical Drug Company.

**PENNSYLVANIA**—ALLENTOWN—Dr. W. D. Lithgow will open a new drug store at Sixth and Washington streets May 1.

**BRADFORD**—J. F. Leonard & Son, 35 Mechanic street; store destroyed by fire. Mr. Leonard states he will resume business at a new location in a short time.

**CANONSBURG**—J. M. Donaldson has succeeded J. B. Donaldson, lately deceased.

**TENNESSEE**—COVINGTON—The Covington Drug Company is the style of the new drug store here. McDougal & Alexander, managers.

**PARIS**—Kirk & Tyson is the style of the new drug store opened here.

**TEXAS**—ABILENE—Bradfield Drug Company, incorporated; capital stock, \$8000.

**MOFTAI**—John Taylor has succeeded George E. Wilson & Son.

**PARIS**—Palace Drug Company, incorporated; capital stock, \$15,000.

**YOKIUM**—Palace Drug Company has been succeeded by F. F. Schwab.

**WASHINGTON**—BELLINGHAM—S. I. Carr; store destroyed by fire; loss, \$2000; fully insured.

**WISCONSIN**—BIRCHWOOD—Mrs. B. E. Taylor has opened a new drug store here.

**MADISON**—Badger Pharmacy is the name of the new store opened at 1320 University avenue.

## Only 20 Per Cent of Drugs Adulterated.

Boston, April 3.—In the monthly bulletin of the State Board of Health the statement of the work of the board under the Food and Drug Inspection Act it is shown that 81 per cent of all drug samples taken during February and analyzed were found to be pure. The board also found that about 33 per cent of the samples of olive oil analyzed was adulterated. Other drugs adulterated were spirit of camphor and spirit of peppermint. These proprietary medicines were found to violate the law: Calf-Artil Headache Powders, White Pine Expecto-rant with Tar, and Az-ma-Syde. The analyses showed that the headache powders, made by George H. Hill, of Ayer, contained acetylind and the ingredients were not marked on the main label. The expectorant, which is made by a firm in Cambridge, contained alcohol which was not marked on the label, while the Az-ma-Syde, made by the Asthma Remedy & Manufacturing Co., of Tremont Temple, Boston, contained cocaine.

## Picnic Outing Planned for Next July.

MILWAUKEE, Wis., April 3.—Milwaukee druggists will tear themselves away from the dull routine of business some time next July and revel in a picnic outing, according to a decision reached at the quarterly meeting of the Milwaukee Retail Druggists' Association. The exact place of the outing has not as yet been decided upon, although Cedarburg and other hamlets surrounding Milwaukee were suggested.

Dr. Edward Kremers, dean of the School of Pharmacy at the University of Wisconsin, addressed the druggists. He outlined much of the valuable and practical training which his department is offering to the future druggists and urged druggists to cooperate with the State by employing and aiding registered pharmacists who are graduates of the university.

Resolutions of condolence were adopted to be sent to the family of the late Herman H. Hackendahl, president of the association.

# THE DRUG MARKETS

## JOBGING LOTS STILL CHIEF FEATURE.

Uncertainties of Tariff Legislation Checking Business in a Large Way. But Market Remains Firm.

NEW YORK, April 5.—The uncertainties existing in relation to the changes which will be made and the date of the passage of the proposed tariff bill tends to check business in a large way, and while the regular jobbing business is of fair proportions, the market has a quiet appearance without any changes of note, although some articles are scarce and more firmly held.

**OPIMUM.**—The latest cables from Smyrna state that if the crop continues to suffer, prices will doubtless rise very much, as the stock in Smyrna is small and quantities assaying above 11 per cent very scarce. Three hundred cases of this stock are qualities containing 6 to 7 per cent of morphine; 700 cases, 9 to 10 per cent of morphine; 400 cases, 10½ to 11½ per cent morphine. The quotations in our market are unchanged at \$4.50, and at which sales of cases are being made. The arrivals in Smyrna to April 2 amount to 2045 cases.

**QUININE SULPHATE.**—The regular auction sale of bark at Amsterdum last Thursday went off at an advance, the unit being 3.25 Dutch cents, as against 3.10 Dutch cents at the previous sale. Seven-eighths of the quantity offered was sold. The bark shipments for March are small, being only \$40,000 pounds. The price of quinine remains unchanged, but a better demand is being felt. If the bark shipments for the next few months are small, the price of quinine is likely to advance.

**NORWEGIAN COD LIVER OIL.**—Cables to March 29 in regard to the fishing are as follows: In Lofoten, 12,000,000 fish, yielding 12,520 barrels of oil; in other districts, 27,000,000 fish, yielding 27,000 barrels of oil. The figures for the year 1908 to same date are: In Lofoten, 9,700,000 fish, yielding 13,300 barrels of oil; in all other districts, 25,800,000 fish, yielding 32,500 barrels of oil. The total output is 5300 barrels less than last year, which has caused the price to advance from the lower figures prevailing earlier in the season. There is a good demand in the local market and prices are being firmly maintained.

**TOKKA BEANS.**—Owing to very light stocks, the Angostura variety has advanced sharply to \$1.00/\$1.75 per pound. Para are unchanged and are held at 40¢/50¢, per pound. The new crop of Angostura will not be in the market for several months and in the meantime prices are not likely to decline but may further advance.

**JALAP ROOT.**—This article is very scarce and with a good demand prices have advanced to 50¢/55¢, per pound for whole and 57¢/62¢, for powdered.

**COUMARIN.**—Quotations have been advanced and prices are very firm. \$3.30/\$3.55 are the quotations, according to size of order, the inside figure being for 200 pound lots and the higher price for quantities less than 25 pounds.

**CURACAO ALOES.**—There is a fairly good demand with sales reported at 6½¢, in large quantities. The market lacks strength and it is said dealers are inclined to give concessions.

**ESSENTIAL OILS.**—The market is generally quiet but steady, anise being firmer in tone with some sellers asking \$1.25 in large quantities, although several buyers say that they can buy inside of this price. The rush of shipments in anticipation of a duty has caused a scarcity abroad, but the situation in the local market is less pressing.

**CITRIC ACID.**—Manufacturers reduced their prices on citric acid 2¢, per pound last Friday. The various citrates were also reduced in sympathy, the reduction amounting to 1¢, per pound.

**CAMPHOR.**—Japanese, in ounces, is extremely scarce, the spot stock being almost exhausted. In large quantities 50¢, is the ruling quotation for the limited supply available.

**SUNFLOWER SEED.**—The foreign is nominally unchanged at 3¢/3½¢, per pound, in fair sized quantities. There has been an arrival of domestic striped and cleaned which is held at 4¢/4½¢.

**QUINCE SEED.**—There is a somewhat better supply and the market is easier in consequence. The revised quotations show a reduction to \$5¢/90¢, per pound, according to quality and quantity.

**SENNA LEAVES.**—This article is meeting with an exceedingly good demand and a large business is reported in both Alexandria and Tinnelly at full quoted prices.

**BUCHU LEAVES.**—Short leaves of desirable quality continue firm at 31¢/32¢, per pound, as to grade and quantity, and further improvement in values is predicted. Sales in the local market during the past week amounted to over 75 bales and the spot stock is under good control.

## London Drug Market

LONDON, March 27.—Small supplies were brought forward at this week's drug auctions and the demand was very limited, in fact less interest than usual was taken in the goods catalogued. There were, however, one or two exceptions. Thus a good demand was evinced to secure the small offerings of Buchu Leaves and eight bales of good green rounds sold readily at 11d. to 1s. per pound, while for mixed leaves 6d. per pound was paid. Cape Aloes was very firm and for good bright hard a bid of 32s. 6d. was refused, the broker wanting 33s. per cwt. but for another lot almost as good, 32s. 6d. was accepted, and for fair bright hard 31s. to 31s. 6d. was paid. Fair liver, slightly dark Curacao realized 42s. 6d. per cwt. and medium 37s. 6d., lower quality selling on the same basis. Zanzibar Aloes was bought in.

Ipecacuanha was barely steady and five bales of fair plump Rio sold at 5s. to 5s. 2d. per pound. Jamaica Honey sold well at firm prices. Two cases of Balsam Tolu sold at 10½¢, per pound (subject), for hard, fair flavor. Coca Leaves and Cascara Sagrada were neglected. One case of Camphor, Ceylon crude, sold at 125s. per cwt. Eight cases of Rhubarb sold without reserve at 1s. to 1s. 1d. for flat small to hold high dried. About 200 cases of Tinnelly Senna sold at steady rates, the quality being poor and prices ranging from 1½¢, to 3½¢, per pound. Sarsaparilla realized steady rates, gray Jamaica, 1s. 4d. to 1s. 5d.; native, 11d. to 1s. 2d., and Lima, 1s. to 1s. 2d. per pound. Sumatra Gum Benzoin was easier, fair almost seconds selling at 26 15s. per cwt. Cardamoms were steady. Wax was dull of sale.

Privately there is no improvement in business, with the exception that there has been a better demand from America for a few articles which are threatened by the revised tariff. The most important price alteration is a reduction of 20s. per cwt. in the price of Sodium Bicarbonate which takes effect April 1. Citric Acid is quiet and unchanged. Camphor is dearer and 1s. 8d. per pound has been paid for Japanese refined in one-ounce tablets and 1s. 7½¢, for 2½-pound slabs. A small business has been done in American Oil of Peppermint at 8s. 9d. to 8s. 10½¢, per pound for H.G.H., and 6s. 1½¢, to 6s. 3d. for Wayne County tin oil. Small sales of good Oil of Star Aniseed have been made at 4s. 5d. per pound. Jamaica Ginger advanced 1s. to 2s. per cwt. at the spice sales. The London Opium market is quiet and prices of the alkaloids remain unchanged. Balsam Peru is scarce and wanted. Cod Liver Oil has not materially altered since last week and the value is from 70s. to 72s. per barrel, c. i. l., for pressed Norwegian. Essence of Lemon is steady at late quotations. Second-hand holders of Santonin are asking 17s. 6d. per pound.

### No Tax on Bay Rum When Used for Toilet Purposes.

In Treasury Decision No. 1475, just issued by John G. Capers, Commissioner of Internal Revenue, a decision is made regarding the handling of bay rum for toilet purposes, which is as follows:

"Since, however, bay rum when kept and sold only for toilet purposes is not regarded as distilled spirits, and may be sold in either wholesale or retail quantities without the payment of a special tax, the ruling in question does not apply to persons who are neither wholesale nor retail liquor dealers, and who are handling bay rum in good faith for toilet purposes only, and such persons may keep bay rum in stock in unstamped containers of more than five gallons and may reduce imported bay rum above proof to proof without incurring any liability under the internal revenue laws."

### First Home of Big Concern to Be Apartment House.

DETROIT, April 3.—The first home of Parke, Davis & Co. has just been sold for \$15,000 and will be remodeled into an apartment house.

# THE PHARMACEUTICAL ERA

PUBLISHED EVERY THURSDAY

VOL. XLI.

NEW YORK, APRIL 15, 1909

No. 15

D. O. HAYNES & CO. - Publishers

90 WILLIAM STREET, NEW YORK

Telephone, 2457 John. Cable Address: "Era, New York."

Western office:

Room 500, Dickey Building, 40 Dearborn St., Chicago  
Telephone, Central 5888

## SUBSCRIPTION RATES.

United States, Cuba, Hawaii, Porto Rico, the Philippines, and Mexico	\$2.50 a Year
To Canada, postpaid	3.00 a Year
To Foreign Countries in Postal Union	4.00 a Year
Single Copies	10 Cents.

ALL SUBSCRIPTIONS ARE PAYABLE STRICTLY IN ADVANCE

Published every Thursday at 90 William Street, Borough of  
Manhattan, New York, by D. O. Haynes & Co., a corporation;  
President and treasurer, David O. Haynes; vice-president, Ezra  
J. Kennedy; secretary, Edward W. Drew. The address of the  
officers is the office of this publication, and the title is regis-  
tered in the United States Patent Office.

Entered at the New York Post-Office as Second Class Matter

## Re Photographs for "Era Album"

### Illustrated Section

Each subscriber to The Pharmaceutical Era is entitled to  
representation in this work, and is invited to send us his photo-  
graph. We do not require a subscription from each partner  
and clerk. If the firm or proprietor is a subscriber, the other  
partners and clerks may have their portraits included for \$1.50  
each. To secure all of the Album sections one must be a sub-  
scriber to The Era in his own name.

In sending photographs be sure that each one is distinctly  
labeled with the name, address, business, profession or occupa-  
tion of the person, written clearly on the back of your photo-  
graph. A good plan is to write it on a printed label and stick  
it on the center of the back of your photograph. Here is a  
good specimen:

#### FOR ERA ALBUM.

Fred S. Rogers, Middletown, N. Y.

McDonaghe & Rogers.

Ex-Pres. N. Y. State Pharm. Assn.

When additional photographs of partners and clerks are  
sent, each one should have written on it the name of the sub-  
scriber who sends it, as well as the name of the person in the  
photograph.

### Cabinet Photographs Only

The style of photograph we require is the so-called "cabinet"  
size, with the head about two inches long. If other sizes are  
furnished they interfere with our plans for keeping the faces  
uniform, also prevent us from classifying the cuts by localities.

In view of the great amount of work we are assuming, to  
have each of our subscribers properly represented in this  
Album, we feel that we are not asking too much when we  
request each subscriber to supply us with the size and kind of  
a photograph which will facilitate our work and best enable us  
to do him credit.

In forwarding photographs for the Album, see that they are  
distinctly addressed as follows:

THE PHARMACEUTICAL ERA,

For Era Album

90 WILLIAM ST., NEW YORK.

## SENATOR HEYBURN'S GUARANTY BILL.

Senator Heyburn, in a communication to the ERA,  
confirms the view taken by us of his Pure Food and  
Drugs Law guaranty bill and sends us a copy of the  
bill which he has reintroduced as Senate Bill 1461,  
showing that the omission of a few words permitted  
an entirely different construction to be placed upon  
the purpose of the measure than he intended. The  
corrected bill is reprinted in full below in order to  
correct misapprehension regarding its proposed  
effect:

A BILL to prevent fraudulent representations as to Govern-  
ment guaranties of foods and medicines.

Be it enacted by the Senate and House of Representatives of  
the United States of America in Congress assembled, That it  
shall be unlawful for any person, association of persons, or  
corporation to place any mark, sign, or insignia upon any sign,  
package, label, covering, or wrapping of any article of food or  
medicine stating in words or effect THAT THE CONTENTS OF  
SUCH PACKAGE ARE GUARANTEED BY THE GOVERN-  
MENT OF THE UNITED STATES under the Pure Food and  
Drugs Act of June thirtieth, nineteen hundred and six, or are  
guaranteed or recommended in any manner by the Government  
of the United States.

Section 2. That any person violating any of the provisions of  
this Act shall be fined not more than one thousand dollars, or  
imprisoned for not more than one year, or both, at the dis-  
cretion of the court.

It will be seen that, as the ERA said, the object of  
the legislation is merely to prevent unscrupulous  
manufacturers from declaring that their products  
are *guaranteed by the Government, or that they are  
guaranteed or recommended by the Government.*  
Proper use of the guaranty is not prohibited, nor is  
mention of the Pure Food and Drugs Act in a legiti-  
mate way prevented.

## REVISED ALL-STATE BILL A GOOD MEASURE.

Out of all the turmoil attending the preparation of  
bills to carry out Governor Hughes' idea of reorgan-  
izing the New York State Board of Pharmacy there  
has come what is called the All-State Bill, intro-  
duced in the Assembly by Charles F. Brown, of  
Cortland. This bill has the approval of the State  
Pharmaceutical Association and of the Governor and  
his advisers. A survey of its provisions shows that  
there is little, if anything, to be desired by pharma-  
cists who have in mind the welfare of the profession  
and the safety of the public.

One of the chief perils dreaded in the reorganiza-  
tion of the board was that of making it a political  
football, but this has been happily averted, with the  
concurrence of the Governor who also believes that  
a body of this importance to the public health should  
not be tainted with politics. The board is to be re-  
duced from 15 to nine members, with a secretary  
who is not a member, making a much more wieldy  
body than at present.

The first nine members shall be appointed by the  
Regents of the University from the membership of

the present board, thereby in a way preserving and continuing the excellent quality of its personnel. Thereafter annually the New York State Pharmaceutical Association is required to send six names to the Board of Regents, from which list the latter shall appoint three members. Qualifications are that the appointees shall be licensed pharmacists who have legally practiced pharmacy in this State for at least ten years.

#### SOME NEW FEATURES OF THE BILL.

As to expenses, the Legislature is required to make annual appropriations, but pending the availability of such appropriations the collections by fees, fines, etc., may be expended for legitimate expenses, thereby legalizing the present system, the continuance of which will greatly aid the board in enforcing the law.

A new feature is an examination for apprentice's certificates open to applicants more than 15 years of age. The fee required will be only \$1.

Another new provision is the recognition of the certificates of other boards of pharmacy, the limitation being the natural one of requiring that the standards of such boards shall not be inferior to those of New York State and providing for a fee of \$25.

In the matter of examinations it is provided that the practical examinations shall be conducted by the members of the board, who are technically designated as examiners, while the written examinations shall be conducted by the regents.

Pure drug legislation, embodying the provisions of the Whitney-Wainwright Act, which failed to become a law last year through lack of executive approval, is included and if the bill is passed will undoubtedly receive the Governor's approval, as it is understood that his previous objections were not to the chief aims sought in the act, but rather to the means of enforcing it. In a word his objection was that the act gave too much power to a body not a direct part of the State government. The All-State Bill eliminates this reason.

Pharmacists who have read the bill have said that it is an excellent measure and in its present shape its passage would tend to elevate the educational and professional aspect of pharmacy in the State.

#### OWNERS OF MORE THAN ONE DRUG STORE.

An esteemed correspondent of the ERA raises an interesting question in the communication which follows:

*Editor The Pharmaceutical Era:*

Here is an idea for the progressive Era to fulfill: Ascertain who are the druggists in each of the States in the United States owning three retail stores or more?

The answers will tend to show how far the co-operative idea, as worked out in this way, has been taken advantage of by retail druggists and would afford interesting comparisons of the progress made in the drug trade in the Northern, Southern and Pacific States.

E. P. H.

The suggestion is a good one, but its scope might well be extended to include retail druggists who own and operate more than one store in the various States of the Union. The expansion of the business of retail druggists in this way is one form of co-

operation, of which there are several. A retail druggist with a number of stores is enabled to make larger purchases and at better terms than would several druggists each operating the same stores separately, but leaving that aside the question is worth seeking an answer: How many druggists in various sections operate more than one store? Of these, how many stores does each conduct? The ERA will be pleased to receive answers from any of its readers who may be interested.

#### TARIFF BILL IN THE SENATE.

As expected the Senate has made numerous changes in the Payne Tariff Bill as passed by the House at Washington. In the chemical and drug schedule the bill as reported by the finance committee makes quite a number of reductions and the entire measure is more in line with taxing luxuries higher and necessities lower than was the schedule passed by the House. Coal tars, dyes and colors, for instance, are reduced from 35 to 30 per cent ad valorem and a number of articles are placed on the free list. Perfumery is increased from 20 per cent to 25 per cent ad valorem. The revision is by no means finished and further amendments are due to be made in the Senate before the bill is passed and sent back to the House.

The Senate finance committee declares that its present draft will furnish ample revenue without imposing an inheritance tax and that provision of the Payne Bill is eliminated. In this situation there does not seem to be any occasion for reviving the war stamp tax on medicinal preparations, bank checks, etc., which has been feared in some quarters.

#### PATENT PROVISION SHOULD BE RESTORED.

Druggists and others interested should lose no time in appealing to the Senate to restore section 41 of the Payne Tariff Bill which provides for the reciprocal treatment of patentees, as between Americans and foreigners. The section, as heretofore noted in the ERA, was stricken out in the House, but the reasons given do not appear to have been adequate.

Letters should be sent by the druggists of the several States to their United States Senators at Washington urging them to use their influence to have the provision restored. If any doubt exists as to its legality, tell the Senators that the courts can decide the question if anybody ever raises it. The section is based on the principle of fair play and no foreign nation can object to it with any degree of decency.

Seeing ourselves as others see us through uncolored glasses and without prejudice is the picture given by the editor of the Cedar Rapids Gazette in connection with the recent defeat of legislation that was sought to divorce the retail drug trade in Iowa from the liquor traffic. Druggists everywhere will find the article worth reading on general principles, aside from its local informative value, so it is reprinted on page 348 of this issue of the ERA.

Value of organization was strikingly exemplified recently in the case of Druggist Movitt who succeeded in fighting off a blackmailing suit through the active support of the Chicago Retail Druggists' Association. As usual in such cases a small boy was the purchaser and the claim was made that he was given something he did not ask for, the plaintiff contending

that "bitter salts" (the German name for epsom salts) was ordered, whereas the druggist maintained that saltpeter was called for and dispensed. The suit dragged along for months and the defendant would have been forced to settle, or go to considerable expense but for the timely and active efforts of the association, whereby he won a verdict of no cause of action. The C.R.D.A. has a way of giving practical help to its members that is pleasant to behold.

That Great Britain needs a new Poisons Law is quite evident from the statistics showing 9557 deaths from the accidental and unauthorized administration of poisons in the last decade. One thousand deaths a year in England and Wales is certainly an awful toll to pay for carelessness and perverseness made possible by inadequate poison laws.

"Old Hunk is too mean to live!"

"Oh, I don't know. If he thought he could spite more people by dying, he'd die."

Lyman H. Savage, of Guymon, will go down into history as one of the pioneer druggists of Oklahoma, whither he went in the summer of 1884, locating at what was then Benton. At one time it attained a population of something like 300 inhabitants, but now there is not a trace of the town left, and none except the old-timers remember much about the place.

It was here that Mr. Savage believes the first drug store in Oklahoma had its institution. He then knew of none operating in the Territory. He was but 17 years of age at the time and was associated in business with an elderly gentleman, since deceased. Mr. Savage is modest in referring to his adventures in the pioneer line, but recently was persuaded to tell this much to the Era:

"About 1884 my father, John W. Savage, and myself came West from Cook County, Ill., he locating at Englewood, Kan., while I came on down into what was then called No Man's Land (Neutral Strip), Public Land Strip and other names. At that time there was no law over it as it belonged to no judicial district, but when Oklahoma was opened for settlement in 1889 by Special Act of Congress it was attached to Oklahoma for special judicial purposes. I am not sure, but I think it was in the fall of 1884, B. D. Fowler, formerly of Greengburg, Ind., a man of 60 years, and myself started a little drug store out on the prairie on the bank of the Beaver River. Our house was made of sod and covered with lumber and poles and dirt on top of that. Our floor was made of slabs of rock we quarried ourselves from the hills near there.

"We put in a very nice stock of drugs and, considering the sparsely settled condition of the country (being nearly all cowboys and cattlemen then), we did a nice business from the start. We cooked our own meals in the rear of the store. There are many queer things connected with this little State, one of which I will mention. In the spring of 1886 we found the remains of a man under the bank of the river. His body had been placed just under the edge of the bank and the dirt pushed over him, but the water had washed away some of the dirt and left part of the remains exposed. We held sort of an inquest and found nothing in the man's pockets except a few watermelon seed. There was a bullet hole in the back of his skull and his hat was powder-burned. We buried the remains, except the skull, and that we placed on the top shelf of the store, and there it remained for years. We never learned the identity of the man.

"A number of vigilante trials were held at our store and some very serious things occurred several years later. I severed my connection with the store, but Mr. Fowler remained there until the roof fell in. After he reached the age of probably 70 years he was stricken with paralysis and eventually died in the Soldiers' Home in Kansas. Mr. Fowler and myself remained close friends until his death in 1890.

"I left the Oklahoma country and went to Alaska. For seven years I lived in the interior of that country, most of the time on the Yukon River and its tributary, the Tanana. I pursued various lines of work there, prospecting, wood-cutting and fur buying. About eighteen months ago I returned to Oklahoma, found it settled by farmers, and found a town here which was not in existence when I left, bought the drug business which had been established by Dr. W. H. Langston and called it the Savage Drug Company. I am married and have one son, three years old, who was born at Fairbanks, Alaska."

One by one old landmarks disappear. Now the British "chemist" is doomed, according to our London correspondent, for hereafter as applied to private chemists and druggists the old designation will be replaced with the more modern and comprehensive title of pharmacist.

The word "kerosene" seems to have been first used in the United States Patent No. 12,612, of March 27, 1855, granted to Abraham Gesner, of Williamsburg, N. Y., and assigned to the North American Kerosene Gas Light Company, says the *Scientific American*. In the preamble to his specification Gesner states that he has "invented and discovered a new and useful manufacture or composition of matter, being a new liquid hydrocarbon which I denominate 'kerosene.'" So far as we are aware, and so far as the Patent Office examiners are aware, this is the first instance in which the word "kerosene" was suggested as a trade mark or a name for what was then generally called "rock oil."

LYMAN H. SAVAGE,  
of Guymon, Oklahoma.

"The unearned for human mouth," said Dr. Samuel A. Hopkins at the Harvard Medical College, according to the *Boston Herald*, "is the prize bacterial garden of the world, and all the conditions are there present for raising a banner crop. Upon the condition of the mouth," he continued, "depends the proper nutrition of the body. If the teeth are decayed or so sensitive through decay that one shrinks from proper mastication the person who has neglected them will not be properly nourished. Diseases of the ear and eyes, as well as all kinds of neurological diseases in some cases even tonsillitis—depend on the condition of the teeth. At the Brookline Grammar School cases of mental deficiency have been traced to defects of hearing, vision or of the teeth, and the children are now taught to take care of their teeth."

"Germany has established infirmaries for the care of children in its public schools, and they have shown: First, that the time expended in putting teeth in order is far less than that lost through toothache and diseased teeth; second, that the cost of keeping teeth in order is more than compensated for by the general health of the children; and third, that the children became physically stronger, secured a higher average of results in study and were undoubtedly happier."

Dr. Hopkins showed how the teeth could be cared for. "Five minutes spent every day on them," said he, "will keep the teeth in good condition. They should be brushed after meals, but especially at bedtime. The food should be well masticated, and the mental attitude should be cheerful, without irritation, during the meal. Proper mastication prevents overeating and leads to simple diet."

The people in Siberia buy their milk frozen, and for convenience it is allowed to freeze about a stick, which forms a handle to carry it by, says the *Bakers' Weekly*. The milkman carries one chunk or two, as the case may be, at the houses of his customers. The children in Irkutsk instead of crying for a drink of milk cry for a bite of milk. The people in winter time do not say "Be careful not to spill the milk," but "Be careful not to break the milk." Broken milk is better than spilled milk, though, because there is an opportunity to save

the pieces. A quart of frozen milk on a stick is a very formidable weapon in the hand of an angry man or boy, as it is possible to knock a person down with it. Irkutsk people hang their milk on hooks, instead of putting it in pans, though of course when warm spring weather comes pans or pails must be used, as the milk begins to melt.

She'll marry me some day I know,

Although she vows that she won't,  
For when I was asked to sing tonight  
She whispered, "For my sake—don't."

—Trenton Times.

American medical colleges may grind faster in future and, from the rawest material, turn out the finished product, doctors of medicine, in 4100 hours precisely. It is not worth while reckoning the odd minutes and seconds. Dr. Arthur Dwan Bevan, professor of surgery at Rush Medical College, Chicago, announced recently that the council on medical education of the American Medical Association, in session there, will recommend to the National association that the course of medical study be cut to 4100 hours, from the curriculum of 5000 to 6000 hours in vogue at most colleges.

Four thousand one hundred hours is about six months, but, of course, the time during which lectures are delivered will be distributed over two or three terms of college.

It takes a smart druggist to make a fool customer believe that he, the fool customer, is smart.

"The last flat I was in," said Mrs. Mover, according to the *Pioneer Press*, "was equipped with an automatic button which lit the gas in the country visitors' room after they had blown it out, a talking machine which swore at the janitor when the temperature dropped below 35 degrees, and a bell and a mirror which registered and displayed the husband of the lady across the hall when he came in at 3 o'clock in the morning singing Bohemian folk songs backward."

"That's nothing," replied the real estate agent. "Every apartment in the Half Svelte is provided with a sound magnifying apparatus, enabling you to hear Mrs. Plane in No. 29 confront her husband with his waning love; with an iron garrote concealed in the front door and which seizes collectors, canvassers, policemen and assessors by the neck, slowly choking them to death while you air your opinions; with a built-in-the-wall kitchen cabinet, which may be converted into a Carnegie library, a piano player, a folding bed, a billiard table, a princess dresser and a Scandinavian cook who was kidnapped from Stockholm in infancy and is guaranteed never to leave the apartment until the 30th of February or the crack of doom."

The way to hear money talk is to keep quiet and hustle on your own account.

A number of Indianapolis schoolboys with a number of schoolgirls as their aides and abettors, were having great fun on April 1 in the neighborhood of the Benjamin Harrison public school. They had secreted themselves behind a tight board fence and had placed a plump pocketbook very temptingly on the sidewalk. Of course there was a drawback attached to this prize in the shape of a string. One citizen after another looked at the fat pocketbook and remembering the day each shook his head, smiled, and wisely passed on.

The boys and girls were beginning to get discouraged when a North Delaware street druggist came along. They all knew him, they had bought candy, picture postals and all kinds of things at his store. The pleasure of fooling this "wise guy," as the boys irreverently termed him, would just be "immense," and as he approached the bait the little group behind the fence was in a titter of anticipation.

He came nearer and nearer. It was hard to keep back the laughter, but they did. Suddenly he stopped, put his foot on the string and lifted the book. There was yet a chance to laugh. They would wait and see him open the book.

Now it so happens that this druggist is an amateur sleight-of-hand man and quite skillful. He opened the book. To the amazement and wonder of the waiting April-foolers he began to take from that book, not the brown paper with which they had snuffed it, but money, real money! One bill after another came from its magic recesses and then he began to take out

silver half-dollars and quarters until it seemed incredible to the youngsters that there really should be so much money in the world. And how could they have overlooked it!

After emptying the pocketbook of this great store of wealth and replacing the brown paper, he dropped the book to the sidewalk and passed on, leaving that saddened group behind the fence vainly trying to solve the deep mystery.

The man who never failed at anything has few successes to boast of.

Manufacturers are watching with interest the work of experimentation in the engineering department at the University of Wisconsin in regard to spruce turpentine. Efforts are being made to ascertain whether or not the oil, which is a by-product of pulp manufacture, can be used to advantage as a denaturing agent of alcohol in its various applications and a fuel for internal combustion engines. The work is under the charge of Prof. W. W. Richter. Samples of both the crude form of the oil and the rectified were obtained from a paper plant for the purpose and tests made in the chemistry laboratory show that 85 per cent of the oil is not turpentine at all, but cymol, a substance closely related to the benzol used in Germany with alcohol to overcome the disadvantages of the thermal difference between alcohol and oil as a fuel.

"I'd like to have you call on me," said the hearth rug.

"All right," responded the mantel clock. "I'll run down next Saturday."

Sometimes we meet a man who says: "Oh, I never take the time to read trade papers. I am too busy looking after my own business." Such a man does not wisely look after his own business. He is neglecting one of the most important needs in business, his purchasing.

The last thirty years trade papers have become a great factor in industrial and commercial life, and one of their greatest values is the information they give the buyer regarding what and where to buy.

It pays to know where to buy. By keeping posted the shrewd buyer can always balance the proposition of competing sellers and is in the position of being able to nail down misstatements or unfair arguments of salesmen who are seeking his order.

The limitations of space, however, prevent the advertiser telling the buyer as much as he is willing to or as much as it pays the buyer to know. Hence it has been accepted wherever trade papers are read, that the buyer is at liberty to ask for further particulars regarding any line advertised and the advertiser has learned the wisdom of granting such requests in the most liberal spirit.

It pays to sit down after every paper comes in that is devoted especially to your work, to look through the advertisements and write for full information regarding every appliance or article you feel you should know more about than you do today.—*Canadian Manufacturer*.

"I don't see where all those people get their money."

"Visit the poor and you'll know."

A French professor, sent by his government to study cancer in Uruguay and the Argentine Republic, has returned from Buenos Ayres, says the *Herald*. He said he was surprised at the great number of cases of cancer in the digestive organs and believes that certain fishes propagate the germs of the disease.

It is doubtful if trade will ever be rid of the dishonorable fellow, for the makers of business continually change and the evil is always present and mars natural tendency. Wherever there is an open field, unhampered by the rules and regulations enforced by incorporated commercial bodies, men will practice tricks of trade.—*American Grocer*.

**NOTICE**—We are now revising the Era Price List for the 1909 edition and will thank the users of this List to advise us of any errors or omissions which they may have noticed in the last edition.

Address, ERA PRICE LIST,  
90 William St., NEW YORK

## The Other Side of the Street.

By Emma Gary Wallace.

Madam hurried breathlessly into the store.

"Do you know," she announced, "I have made a discovery!"

The Apothecary looked up with a mild expression of interest.

"Something rediscovered or just found?" he inquired, glancing longingly back at his beloved weekly trade magazine.

"Just found, for the first and only time, and that within the last half-hour, and I sincerely believe the aforesaid discovery will make for greater prosperity."

"Good," the Apothecary ejaculated, as he inserted a blotter to mark his place, laid down his magazine and sat back to listen.

"You know," Madam explained, "I had occasion to go down on Dawson street this morning, and on my way back I came up Pierce avenue, and down the other side of the street. Positively I hardly knew the place from that direction. It looks altogether different both from the avenue, and from across the way."

"We have been so enthusiastic over our new fixtures, the canopy we have added to the fountain, and our special advertising that we have forgotten all about outward appearances. When we look at a familiar object close at hand, it does not stand out in all its imperfections and ugliness of outline as it does when we view it from a distance and observe its relation to surrounding objects. I discovered, for one thing, as I looked at our place from a distance, that it is not particularly attractive. The entire block lacks a general air of prosperity."

"This struck me with such surprising force that I followed along on down the street, then I went around through Cross street, up the other way and back through Park road. You know our best paying class of custom comes from those and the adjoining streets."

"As I passed the Beacon Apartment House a family was moving in, and I determined to assume that I was the new woman resident, taking a leisurely walk about, gathering impressions of the vicinity and deciding whether I should do my household buying up this way or farther downtown."

"And what was your decision?" the Apothecary interrogated.

"Guess," Madam demanded.

"Why, you decided to trade in this locality, of course; otherwise how would our fortunes be improved?"

"Wrong," Madam declared. "I decided to go the other way by all means."

"If that is your discovery, I cannot see that it is a very cheerful one," the Apothecary remarked in an aggrieved tone.

Madam laughed. "But that only led, or rather forced me to the real discovery. Stop—Look—Listen. If we expect to attract people to us, we must make, not only our building attractive from the other side of the street, but we must make the entire neighborhood attractive as well."

"But we do not own the building, nor even the neighborhood," her companion objected.

"No, but fortunately our voice carries as much weight as that of any one else. If every business man in this street would approach his location from an unaccustomed direction, and adopt the critical attitude of an uninterested party seeking a place where the outward signs indicated good service inside, it would result in many much-needed local improvements."

"Our own building stands up tall and forbidding, painted in the most pessimistic shade of grey-brown. It should be against the law to use that colored paint on big buildings. It certainly has a depressing effect on people and things, when such a mass of it bulks dismally up before one. The paint, I noticed for the first time, was peeling off in patches—it was canary-colored before, you remember—and from the avenue or the Park road it gives the whole place a sickly, jaundiced, eruptive appearance."

"The complexion of things must be changed, if we are to

expect Prosperity to come forward and plant the kiss of approval upon our noble brows. We are paying a good rent and there are five other stores in this block, not to mention over twenty offices above. Tomorrow I shall, with your approval, circulate a courteously worded petition to the landlord, among these rent payers, to have this building painted and otherwise improved. Our reputations and our ability to pay the rent depend in a great measure upon a prosperous exterior, and we'll tell his lordship so. Maybe the landlord cannot change his spots, but we'll do our best to chance ours."

"Then I counted no less than four awnings which were new last summer, and that had remained on the frames all winter, growing rotten and weatherbeaten. Those awnings were not exactly given away either. This coming summer we shall be protected from old Sol's rays by a faded, frayed-edged affair that will doubtless go in holes before the season is over—serve us right, too."

"From those opposite viewpoints our sign is positively funny. Instead of two twenty or thirty foot signs across the end and front of our place of business there is one absurd little bobbed-off signlet over the door, so dingy that one would have to put on spectacles to read it ten feet away."

"What, they cost so much a running foot? All the better then they could be made exactly to suit any space. It is as cheap and satisfactory advertising as one could have."

"How did the new window trim show up?" the Apothecary inquired.

"On the whole the effect was excellent, but viewed from across the way, the window looked a trifle out of proportion and bald. The plate glass extends so far up that the entire window depth is too much. This is, on the whole, a good fault, for when the awning is dropped it still leaves plenty of window in view."

"There are many ways of remedying that," the Apothecary suggested. "The Corner Clothing Company has placed a row of carved oak window panels across the top of its front window, but the effect is a trifle top-heavy. I noticed another concern the other day that had lowered its window height by a couple of rows of lightly latticed framework, in which was set plain, oiled paper, so one of the clerks told me. It gave a soft, creamy tone which harmonized with anything put in the window."

"Then there comes ready prepared a transparent paper," Madam added, "which may be applied to the inside of the glass. It is made in varied designs and colors, and is an excellent imitation of stained glass. The cost, too, is trifling."

"What else did you discover?" the Apothecary queried. "How did our frontage generally compare with those about us?"

"Fairly well, no better and no worse, except for the new block on the other side of the street, that puts us all in the shade. One thing I did notice, however, was that the roadway about here was distinctly untidy. Papers were flying about, and unnecessary litter reposed in the gutter. As long as the business men of the street have formed a 'League for the Improvement of Local Conditions,' this evident lack of care can readily be brought to the attention of the street commissioners. Nothing detracts more from the appearance of a locality than dirty, untidy streets."

"Then, too, the matter of lighting ought to be looked after, as more light is sorely needed, and that could be best attended to by the League, as the City Department would give more heed to the request of a body of men than of an individual."

"Another thing which spoils the general appearance is the variety of pavement. Some places it is cement, others flagstone unevenly sunk or worn, and again little better than a cinder track, which is hard to walk upon and disastrous to light clothing in damp weather. With due attention to this, uniformity ought in time to be gained and this part of the town be as easy to walk along or wheel a baby carriage on as the finest boulevard. All these things have a distinct effect upon business, and the very fact that the League has been formed shows that the men are alive to the influence of local conditions upon trade, that in union there is strength, and that if they do not take an interest in local improvement, others cannot be expected to. Besides, in this as in everything else, those who go after the political favors usually are served before those who do not."

"There is a business meeting of the League tonight," the Apothecary said, "and when I come from dinner, I'll try your plan of taking a walk and approaching from some unusual

quarter. Let me see, I'll pretend to be a prospective business purchaser with cash to pay for what pleases me or to make any suitable changes, and I'll see how the view from the other side of the street strikes me."

"Do you know," Madam went on, "I believe we are so occupied in getting a living and attending to our daily cares that lots of us do not really have time to live at all. If we could pause oftener, and go over on the other side of the street and look calmly upon ourselves and our lives, many things plainly visible to other people would at once become apparent to us."

"When we think that we have been generous, it probably appears to the man across the way that we have done no more than we ought to have done long ago. When we think we have been brave and hopeful and helpful to others, the people across the street may see clearly what we have overlooked, the political or business axe which we thought needed grinding."

"Ah, these people across the way. How keen their eyesight is! Sometimes they persistently misjudge us to be sure, but the only way to do, is to keep radiating the real propaganda spirit in spite of it all, the spirit of 'real humanitarianism and genuine fraternalism, entirely separate and apart from financial gain.'"

There was a moment of silence, the clerks in the front store could be heard busily supplying the needs of an ailing populace. Madam ripped into a peal of laughter.

"The other day," she said, "after I had about worried myself grey-headed over some practical means of curtailing medical charity to the well-to-do, in the hospitals and free clinics, I chanced to pick up a current magazine. There I read an account of some charitably minded young women, who during the extreme summer heat decided to take some poor little child to the beach."

"They chose a name from a list supplied them for the purpose and went in search of the waif. To their surprise the number selected brought them to a prosperous looking drug store with a most up-to-date electric sign. The child they were after proved to be the druggist's son, dirty, pallid, unkempt, ragged, puny and ill-nourished. Yes, the father would consent to let the boy go with the young women if they would pay his carfare, and bring him back. No, he could never take the child himself, he must remain at home and make money—all the time make money."

"That surely, too, was a view from the other side of the street. Such views may not always please us, they may even be in a measure misleading, if we take up our viewpoint too far away to see and interpret the signs correctly, but it is by appearances that the world judges us, and accords us confidence, patronage and justice—or the lack of them."

#### Plans for the Louisiana Ph.A. Convention.

NEW ORLEANS, April 10.—Arrangements have been practically completed by the committee in charge for the entertainment of the annual convention of the Louisiana State Pharmaceutical Association, which will be held here May 11-14. There will be many social features. On May 11 the members will be entertained at luncheon by Sharp & Dohme, and that night they will probably go in a body to the annual commencement of the New Orleans College of Pharmacy. On May 12, Parke, Davis & Co. will be the host at luncheon, and that evening a smoker will be given at the New Orleans College of Pharmacy. On May 13 practically the entire day will be spent on a boat ride to a nearby sugar plantation, where there will be a ball game between the city and country druggists, and other amusements. A band will be taken along and there will be dancing on the steamer. At the conclusion of the convention on the night of May 14, the annual banquet will be given, probably at West End.

The following compose the committee on entertainment: John E. Scott, chairman; Lucien Lyons, F. A. Dicks, C. C. Johnston, William Shisa and George S. Humphreys. The committee has been holding weekly meetings in order to perfect its plans.

#### Michigan Pharmaceutical Travelers Are Active.

Dr. Lewis W. Kuapp, president of the Michigan Pharmaceutical Travelers' Association, announces that a more elaborate programme than heretofore will be prepared for the entertainment of the members of the Michigan State Pharmaceutical Association at the annual meeting which will be held this year on June 22-24 at Detroit.

## Wanted—More Words.

By Joel Blanc.

One of the peculiar faults of the present age is lack of definiteness in expression. Before entering into an explanation of what is meant by this statement, it may be well to first define the classes of individuals to which the following is not intended to apply. I do not refer to those who "talk too much and say too little," or to those who lack the power of expression. Neither am I writing of those who, as they speak, balance themselves upon the fence in such manner that they may "be ready to fall on whichever side offers the best pasture

and who are intentionally indefinite for policy's sake; this article has nothing to do with moral cowardice. We can also dismiss from our thoughts those who purposely speak evasively and seem to find a satanic joy in the trouble that their prevarication brings to others.

Those whom I accuse of word-lack are men of intelligence, fearless sincerity and command, yet they fail to use an extensive and expressive vocabulary. Among them may be found prominent men of all classes, who teach the masses, who mold public opinion and are leaders in official, public or semi-public life. I refer to men who, in a broad sense, mean all that they say but do not say all that they mean. I have in mind the man who makes such a statement as, "The dyes used in confectionery are poisonous," but who, when pressed for details, honestly replies that he only meant certain dyes used in the cheapest grades of candies. When the true situation dawns upon him he really seems amazed to find that his hearers or readers did not, by some occult method, know what he meant, but did not say. Such a man is neither incompetent, insincere, nor untruthful; he is merely a victim of the "quick-lunch language" habit of the period.

There are a number of contributory causes responsible for this language demoralization. Chief among them is our National characteristic of attempting to crowd a day's activities into an hour of time. The brevity of telephone conversations and the skeleton method of correspondence which results from dictation in place of letter writing have spread a harmful leaven through discourse and correspondence. The increased use of Americanisms or slang is, in a measure, also responsible for this condition. Because these expressions, when accompanied by other words or gestures or facial expression, contain so much definite meaning in a very few words, we have come to use them in a disconnected, haphazard manner which makes them indefinite or misleading. Lastly, the public seems to be prejudiced against the language of fruit by its love for the language of flowers. It ridicules the definiteness of a legal document and applauds the brilliant creator of that document who speaks from the platform in glittering generalities which act upon the hearers' minds like a glare of white light, but which utterly lack the instructive definiteness of the spectrum.

To appreciate what a great evil our abbreviated language has become one should on a few of our laws, our sermons, our newspapers, our periodicals and our text-books. Having done so, he must conclude that our leaders presuppose the possession of telepathic power by all but themselves. Desirable laws are nullified by our courts, class prejudices are fostered, commercial interests are jeopardized and education made superficial by this jerky, disjointed modern mode of expression.

It works the greatest harm when used by those of whom it may be said that, for them, "a reporter lurks behind every tree." Forgetting that the interpretation of spoken words depends largely upon the manner in which they are spoken, the man of authority makes statements which, when printed verbatim, appear as a mere code communication for which each reader must find the key in his own imagination. It matters little what the interpretation may be, the original speaker honestly declares that he has been misquoted, and he is honest

in his declaration, because he is himself ignorant of the fact that he only uttered a fraction of the words necessary to express that which he thought.

The evils which this paucity of language have brought to the drug trade and to pharmacy are evident in controversies over pure drug laws, pharmacy legislation made inimical through poorly drawn bills, confusing, contradictory and ineffective educational standards and requirements, and even in the faulty nomenclature of the Pharmacopoeia and National Formulary.

It may be human, but it is not truthful for any man to say that his opponents alone are guilty. The evil has become a National one which contaminates the lips of babes and finds its end in the epitaph. This degenerate language started with a deterioration of thought, has spread until it has infected every artery of our National life. Not only are none innocent, but he who would return to crystalline expression finds that general conditions make it exceedingly difficult for him to do so. Yet, as no group, organization or party is innocent, he who would remedy the evil must first eradicate it from himself.

There is no more striking example of this sin of many omissions than that which may be found in the affirmative and negative arguments upon the National Pure Food and Drugs Law. Both sides are equally culpable in the use of expressions, which through their brevity and generalities force the opposition to its own construction of their meaning, and naturally tempt it to interpret according to its own interests, with the result that many are harmed and few benefited, and effectiveness is thereby delayed by disavowment and crimination.

I have written chiefly of this belittlement of the power and beauty of language by those of station, because their errors work the most widespread harm; but the evil exists to a proportionate degree and works harm in a corresponding ratio among all men in all walks of life.

It may be that etymological deficiencies are primarily the cause of this derogation in our language. We know that language, like a deciduous tree, is of slow growth and yet rapid changes, but that does not justify us in permitting our tongue to become a mere dropper of dead leaves! Once it was and again may be made, a bearer of golden fruit.

The diseased thought which has resulted in emaciated expression did not work a change of the people by the tongue, but a change of the tongue by the people. It therefore follows that the remedy does not rest with reformative cults nor organizations, nor yet with educational institutions. The reform must commence where the contamination started—with the individual.

We need not appeal to ourselves to work a self-reform for the good of others; we need take no such an exalted plane of self-appeal as that. The degeneration has found its only apology in the statement that it is of economic value; a time-saver and therefore a money-maker. Freely confessing my own deficiencies, the best I can say is that I have *tried* to show that this culled language in which only the evils are used, is not a time-saver and money-maker; on the contrary it is a time-waster and money-loser, a civic weakener, a common-wealth corrupter, a breeder of national discord and a commercial and professional demoralizer, therefore it is not good business.

The matter of lucidity of expression should be considered by the individual as a personal question of dollars and cents. Such a consideration is worthy because it cannot be tainted by hypocrisy. To receive your money's worth in what you buy, you must definitely state what you want. To receive just profits on what you sell, you must explicitly describe the merits of the articles to be sold. If you would have your representatives in commercial or professional organizations represent your true interests, you must make them thoroughly understand what these interests are. You cannot expect clear, effective laws unless you demand them in clear, effective language.

In conclusion, it may be well to state that the user of clear and terse, yet ample, descriptive English need not of necessity be the possessor of a book-taught, desk-bred education. Such language is at the command of every one who knows what he wants to say and says all of it.

#### No Refills Subject of Agreement.

KAUKAUA, Wis., April 10.—Druggists and physicians have made an agreement whereby residents will not be able to get a prescription refilled without first securing the consent of the physician who wrote it.

## Original and Selected

### HOMEOPATHY.\*

By C. F. Jesper, M.P.S.

In presenting an explanation of what homeopathy is, it is important to state at the outset what it is not. It is not, as popularly supposed, a system depending upon infinitesimally small doses. The dose that cures is the correct dose, whatever it may be. It is not quackery, as there is no secrecy whatever about it, and its adherents court the fullest investigation of its principles and practice. It is not humbug, as thousands who have experienced its beneficial treatment can testify. Nor is it a played-out affair, as at the present time its disciples are more numerous than ever, and they are daily increasing.

The essential part of homeopathy is the guiding principle or rule treatment enunciated in the year 1810 by Samuel Hahnemann, a German physician. This principle, in his own words, is that "in order to cure disease in a mild, prompt, safe and durable manner, it is necessary to choose in each case a medicine that will incite an affection similar to that against which it is employed." This doctrine is expressed by the now well-known formula *Similia similibus curantur*—"let likes be treated by likes"; that is, any disturbance in the normal functions of the body, which constitutes disease, is to be treated by the administration of a drug, which, if taken in fairly large doses and for some time, will produce in a healthy person a similar disturbance. If we know from the study of drug effects upon the healthy human body that a certain medicine has the power so to disturb the health as to produce an exact picture of the disease in hand, reproducing to a nicety all the symptoms, is not this then the medicine which would appeal to the plainest common sense as being the one which, given in a small dose, would so act upon the disease as to assist nature in its reparative processes, give the necessary but gentle stimulus to the disordered forces of the body and accomplish a cure? That drugs, when taken by healthy persons, do produce sets of symptoms which correspond closely to those actually occurring in disease is a definite and completely proved fact. Such a marvelous correlation of drug action and disease cannot exist by mere chance, it is quite evidently subject to a law—the law of *Similia similibus curantur*—"Likes are cured by likes." This is the motto of the new school of medicine, and the treatment of disease under this law is known as "Homeopathy."

Admitting this then as the only certain guide to the curative treatment of disease, what is our next step? Clearly it is to find out or prove what are the effects which the taking of any drug produces in a healthy person, and to record these effects or symptoms, so that the symptoms in any given case of disease may be compared with the records of these drug provings, and the remedy which has produced a similar set of symptoms to those which are present in the case in hand may be easily found and administered. We must know the effects a drug produces before we can utilize it intelligently as a remedy. Happily, by the heroic labors of Hahnemann himself at first, and later of his disciples and followers in many countries—both physicians and others—during his life and since his death, trials or provings of a vast number of drugs have been recorded—so that there are now very few diseases or natural morbid conditions whose parallel or similia cannot be discovered among the medicines which constitute the homeopathic materia medica. It is upon these stores of symptom-records that the homeopathic physician draws—noting the various symptoms or deviations from the normal—even the very minutest and those of apparently least importance—which present themselves in the case to be treated, and then, by careful study and comparison of these with the records of the drug symptoms he is able to prescribe the medicine which will "cure"—*cito, tuto, et jucunde*. The word "symptom" includes everything that is abnormal or out of the ordinary condition of the patient, and applies to mental as well as bodily conditions, and to imaginary as well as real sensations; indeed, subjective symptoms are often very valuable guides to the proper remedy. It is useful to guard against the error of selecting the remedy by the correspondence of only one or two

\*Pharmaceutical Journal.

symptoms, and it is not necessary to a cure that the patient should have *all* the symptoms which are produced by a given remedy, but it is necessary that all the patient's symptoms should be included among those produced by a given drug in order that a complete cure may result. That is, the "totality of the symptoms" is to be the first consideration in prescribing.

It may be useful to show how this mode of selecting the remedy works out in practice. Take, for instance, diarrhea. Many drugs cause this condition, *e. g.*, aloes, podophyllum, colocynth, rhubarb, but each one causes at the same time other symptoms which are different for each drug and entirely characteristic of it. Thus the diarrhea produced by taking material doses of aloes is accompanied by great heat of the abdomen and occurs chiefly in the early portion of the day (about 5 to 10 a. m.). That caused by podophyllum occurs in the night or very early morning, also after taking food, and is frequently painless. Colocynth produces a peculiar griping as if the intestines were squeezed between stones, coming up into the stomach and causing nausea; and the diarrhea caused by rhubarb is accompanied by a sour smell of the whole body. Supposing therefore that we have before us a case of this complaint to which we desire to apply the homeopathic principle of treatment, we observe closely, what are the most characteristic accompanying conditions or collateral symptoms. If we find that the diarrhea is accompanied by heat of the abdomen, and occurs chiefly in the early morning, or that there is a squeezing griping of the intestines, or a sour smell of the body, we administer a minute dose of the remedy—aloes, podophyllum, colocynth, or rhubarb, as the case may be—which has been found to produce a similarly conditioned diarrhea. In nasal catarrh or cold in the head we find that arsenic has among its recorded effects a catarrhal condition with soreness of the interior of the nostrils; mercury is known to bring about a fluent catarrh with stuffy condition of the head; nux vomica also induces this condition, but there is pain in the head on coughing; and pulsatilla (*Pulsatilla pratensis*—the meadow anemone or wind flower) produces a bright yellow secretion with loss of taste and smell. Now if we are treating this affection and find that any of these (or any other) characteristic features are present, we administer a minute dose of that drug which has been found to produce similarly conditioned catarrh, and we shall be gratified with an entirely satisfactory result.

The instance just given of small, but definite, differences in the action of drugs which apparently affect the body in the same manner are merely the simplest examples of the law. Homeopathic literature teems with them, and its practice is conducted by constant reference to them. The symptoms connected with such remedy are constant, and though these may not all be present at one time in one patient, there are always sufficient characteristic indications to guide the careful observer to the correct remedy.

It is found in practice, when a remedy is administered in accordance with the homeopathic rule, that a very much smaller dose is required than the usual allopathic one, and this brings us to the "infinitesimal dose." The "small dose" and the "infinitesimal dose" are not homeopathy, nor an essential part of the homeopathic principle. This essential rule consists in the fact that drugs will effect cures in those instances where the disease symptoms present correspond to those which the drug itself will produce when tried in health. At the same time the small dose follows necessary practical consequence. The common-sense course as to this matter is, not to dogmatize that this or that "cannot possibly" act, but to patiently examine and test the matter in the light of the very latest theories and discoveries of physical science. In the face of all that is known about radium and the radio-active bodies any doubt as to the active effects of infinitesimal quantities is now completely out of court, and each fresh scientific investigation in this direction only the more fully establishes the fact of their action. The popular objections are that as a bottleful of homeopathic medicine may be taken with only slight perceptible taste, and as there is scarcely any taste of medicine, it is therefore not "strong" enough—also, because it cannot do any harm it cannot do any good. Those making these objections do not take into consideration the fact that though the effect of a small dose in health may be nil, it does not follow that it is so when the system is out of balance through illness. Homeopaths find that as a matter of fact exactly the contrary is the case. In a condition of ill-health the body is exceedingly sensitive to the action of medicines,

and especially so to the action of the remedy which corresponds most closely to the symptoms present. In this connection an ounce of practical experience is worth tons of theory, and there is no need for massive doses which merely force the more prominent symptoms into subjection for the time being, only to break out afresh in an aggravated form when the immediate effects are exhausted. To use a homely illustration, a locked door with the key lost may be opened by smashing the lock with a sledge-hammer, but a properly fitted key will accomplish the desired result without injury to the delicate mechanism of the lock.

The intention has so far been taken for granted that only one medicine at a time is to be used. It is, of course, obvious that if a remedy is found which has produced all the symptoms which are present in the case in hand, it is the only one required by the circumstances of the case, and the dose being small it will therefore not require any "adjuvants" or "corrigens," there being no disadvantages about its administration which require to be corrected.

It will be apparent from the foregoing remarks that the appeal of homeopathy is to facts. There is first the fact of the occurrence of disease—spontaneous and otherwise—but not due to drugs. There is next the fact of the occurrence of "disease," or disturbance of the system from the action of drugs in material doses. This effect may be called "drug disease." Here is as far as the allopath has got, but the homeopath goes one step further and discovers the most curious and interesting fact that "drug diseases" correspond exactly with "diseases"—that is, that each "disease," or rather phase of disease, has its counterpart in the record of effects produced by some particular drug. This last is just as much a fact as the previous facts, there is no theory about it, and the homeopath says why not make use of this fact.

It is obvious that there is between the two schools of medicine a fundamental difference in mode of thought and conception of medicinal action. The allopath takes the "disease," diagnoses it, gives it a name, classifies it, labels it, and puts it into its proper box in his mind; whereas the homeopath treats the assemblage of symptoms in the patient without reference to any nomenclature of disease. A disease is not an entity—a thing that materially exists. It is merely the name for a generally recognized and tolerably constant assemblage of symptoms. Where there are no symptoms a condition of perfect health exists, consequently if the symptoms are removed the patient is cured, and the homeopath finds that the symptoms are removed by the administration of the drug which produces the counterpart of these symptoms, so there is no need to consider whether "stimulants," "depressants," "diaphoretics," "diuretics," or any other so-called class of medicines is indicated—this mode of thought being quite foreign to homeopathic principle.

In concluding this necessarily imperfect sketch of the homeopathic idea, I may mention the following books bearing upon the subject: "Homeopathy Explained," by J. H. Clarke, M.D.; "The Dictionary of Homeopathic Materia Medica," by J. H. Clarke, M.D. (three volumes); "Fifty Reasons for Being a Homeopath," by the late Dr. J. C. Burnett; "Manual of Pharmacodynamics," by Richard Hughes, M.D.; "The Homeopathic League Tracts," Homeopathic Publishing Company, Warwick Lane, E. C.

## A LAY VIEW OF THE FIGHT BETWEEN DRUGGISTS AND BOOZE IN IOWA.

(From the Cedar Rapids, Iowa, Gazette.)

The bill proposed by George H. Boyson, of this city, prohibiting the selling of booze in drug stores, failed to pass the House this week. Those who had given the question serious consideration hardly expected that the bill would pass. The idea embodied in the measure had not been before the Iowa public long enough to gain the favor necessary to force its passage through the law-making body. But the bill did not fare so badly after all. It received 44 votes—with 11 of enough to pass. There were 48 votes in opposition, showing that with a full vote in the House there might have been a chance of its passage.

The *Gazette* ventures the prediction that the next General Assembly will take away from the druggists the privilege—if it is a privilege—of dispensing liquors in any form. It is one of the movements in the direction of temperance that seems

bound to win. And if the druggists are barred from selling booze the *Gazette* believes it will be a good thing for the drug business. Booze has been the means of attaching a stigma to the business of the druggist—a stigma that ought to be removed, and which an increasing number of pharmacists desire to see removed.

Booze is hardly a necessity to the success of the business of conducting a drug store. There are very many druggists who have made a splendid success of the business without selling a drop of booze. In addition to the regular drug supplies, all druggists nowadays carry many side lines from which they reap very acceptable profits. Abandoning booze and devoting their time and space to a variety of specialties they gain a class of trade that they would not gain if they catered to the booze-loving element.

It should not be understood that all druggists, or most druggists, who handle liquor, are guilty of an attempt to run a booze joint, or a desire to evade the law in any way. Very many of them try very hard to sell liquor only as the law contemplates they should sell it. But the very fact that they handle liquor at all often gives them the name, and unjustly so, of being liquor vendors. So it would seem every conscientious druggist would be glad to get rid of the whole business. And what the conscienceless druggist thinks about it does not excite the sympathy of any one who has the moral right to offer sympathy.

### SALE OF POISONS IN GREAT BRITAIN.

New Regulations. Effective April 1, Expected to Reduce the Thousand-a-Year Death Rate.

(From the Regular London Correspondent of the Era.)

LONDON, April 5.—The number of deaths due to poisoning is sufficiently great to be a question for public concern and any serious attempt to diminish the comparatively high rate of mortality from this cause is naturally regarded with some degree of hopefulness. During the last ten years no less than 9557 deaths were caused in England and Wales by the administration, either by accident or with suicidal intent, of poisonous substances. From this calculation the deaths due to anaesthetics, numbering 1500, are excluded, for no amount of restriction on the sale of poisons can be expected to be followed by any diminution in the number of cases in which drugs used for the purpose of producing an unconscious state prior to operation prove fatal. The Poison and Pharmacy Act, which went into force on April 1, has for one of its objects the better control of the distribution of poisonous drugs and there is ground for hope that the effect of the operation of this enactment will be to diminish the death rate due to poisoning by accident and to create an improved feeling of security in regard to the supply of drugs.

The most important provision of the Act is that which requires that all premises where the business of a chemist and druggist is carried on, shall be under the management of a person who has passed the Pharmaceutical Society's examination and whose name is on the official register. The result of this provision is that already a number of drug stores owned by unqualified persons and one-man companies are on the market, and the demand for qualified managers is so heavy that, in all probability, the average salary of the qualified assistant will have to be increased.

Assistants have soon recognized the advantages under the new legislation and a trades union is in course of formation, the first general meeting in connection with which is to be held in Birmingham on Good Friday. The new regulations will make no essential difference to the methods of the best-known drug companies, for they already employ qualified assistants. In future, however, there will be this distinction between joint stock companies and private chemists, that the latter will be called "pharmacists," a title which companies may not exhibit. At present this title is little known to the public, but in a few years it is probable that, so far as the private chemist is concerned, it will almost entirely replace the present designation of "chemist and druggist."

While the regulations relating to the sale of medicinal poisons have been made more stringent they have been relaxed, to some extent, in the case of poisons used in agriculture and horticulture. Some five years ago, as a result of complaints about the restrictions on the sale of sheep dips insecticides and weed killers containing arsenic and nicotine was a source

of inconvenience to farmers and gardeners, who sometimes had to journey long distances to the nearest chemist shop to procure their supplies, a department committee was appointed to inquire into the question. The committee reported that the existing facilities for obtaining poisonous compounds used in agriculture and horticulture were insufficient and recommended that they should be increased.

Acting on this recommendation, the legislature has embodied in the new Act a provision that, in those districts where, in the opinion of the local authority, the existing facilities for obtaining these particular classes of preparations are insufficient, other traders, such as florists and seedsmen, may be granted licenses to sell them. In order that the increase in the facilities for obtaining the compounds indicated may entail the minimum of risk to the public, the proviso is made that certain regulations as to the packing and storage of the poisons shall be complied with. County Councils, Town Councils and Borough Councils have been made fully acquainted with their new powers, for in all parts of the country applications for poison licenses have been submitted while, on the other hand, lists of the registered chemists have been supplied to the licensing authorities, so that they may be able to judge whether any extension of the existing facilities is necessary.

Mainly on the recommendations of coroners, regulations have been made in respect of the sale of the mineral acids and retailers of vitriol, spirits of salts and nitric acid are now required to label the bottles containing these articles with the word "Poisonous," as well as their name and address and the name of the article. Hitherto the sale of these acids has been subject to no restriction.

### Elkhart Lake Meeting to Be Notable.

MILWAUKEE, April 12.—Plans are under way by members of the Wisconsin Pharmacological Association for making the coming annual convention of the body at Elkhart Lake one of the most successful in the history of the association. The motto adopted at the last convention was "One hundred new members and an attendance of 500 at next year's gathering." W. H. Barr, of Milwaukee, local secretary of the association, says that indications now are that the attendance will be more than 600. Manager Osthoff, of the Hotel Osthoff, at Elkhart Lake, was a recent Milwaukee visitor, and announces that he can accommodate any number of druggists.

### Scientific Papers for the A.Ph.A. Meeting.

Charles E. Vanderkleed, chairman of the committee on scientific papers of the A.Ph.A., has sent a request to the members to inform him whether they expect to attend the meeting in Los Angeles and if they will contribute one or more papers to be read at this section. He explains his request by saying: "It was decided at Hot Springs that the Section on Scientific Papers was to be allowed hereafter as many sessions as are necessary to read and fully discuss the papers that are presented." Mr. Vanderkleed's address is 200 First avenue, Collingswood, N. J.

### To Entertain Georgia Pharmacists at Macon.

MACON, Ga., April 10.—Elaborate arrangements are being made for the entertainment of the members of the State Pharmaceutical Association in Macon May 25 and 26, one month hence. President B. S. Parsons, Third Vice-President Horace Head and Secretary Max Morris all reside in Macon, and their attention has already been given to making the coming sessions important and active.

### NEW BOOKS.

- BAIRD, H. CAREY. The practical dry cleaner, scourer and garment dyer; comprising dry, chemical or French cleaning, etc. ed. by W. T. Braunt. 3d ed., rev. and enl.; ill. by 23 engravings. Philadelphia: Henry Carey Baird & Co. c. 22+250 p. 12<sup>o</sup>, cl., \$2.50.
- BEDELL, W. LYON D. Practical electro-plating: a guide for the electro-plater; 130 illustrations. Newark, N. J.: Hansom & Van Winkle Co. c. 108, 244 p. 12<sup>o</sup>, cl., \$2.
- BENNETT, SIR W. H. Injuries and diseases of the knee-joint, considered from the clinical aspect. New York: William Wood & Co. 2nd ed., ill. p. 122, cl., \$2.
- MATTHEWS, JOSEPH MERRITT. Laboratory manual of dyeing and textile chemistry. New York: John Wiley & Sons. c. 12+363 p. 8<sup>o</sup>, cl., \$3.50.
- MORRIS, SIR J. COLMAN. Diseases of the skin: an outline of the principles and practice of dermatology. New and enl. ed. New York: William Wood & Co. 752 p. ill. p. 12<sup>o</sup>, cl., \$3.50.

## QUESTION BOX

THE OBJECT of this department is to furnish our subscribers and their clerks with reliable and tried formulas, and to discuss questions relating to practical pharmacy, prescription work, dispensing difficulties, etc. Requests for information are not acknowledged by mail, and ANONYMOUS COMMUNICATIONS RECEIVE NO ATTENTION; neither do we answer questions in this department from non-subscribers.

In this department frequent reference is necessarily made to information published in previous issues of The Era. Copies of these may be obtained at 10 cents each, except a few issues which are out of print, for which we charge 25 cents each.

### Treatment of the Morphine Habit.

(O. R.)—The treatment that should be followed for the cure of the morphine habit is a subject for the physician rather than for the pharmacist, and while we can give some formulas that have been recommended by eminent physicians who have made a study of this subject, it is not to be presumed that the administration of such remedies is all that is necessary. In the language of De Costa, "there is no specific for the opium habit," and others equally prominent have said that "no agent is of any value unless strengthened by moral courage and perseverance on the part of the patient." However, the following prescriptions are quoted by Potter as useful in combating the nervous agitation which succeeds to the final withdrawal of the drug:

(1)

Ammonium bromide .....	1½ ounce.
Sodium bromide .....	½ ounce.
Potassium bromide .....	1 ounce.
Fowler's solution .....	1 dram.
Syrup of tolu .....	1 ounce.
Peppermint water .....	1½ ounces.
Comp. syrup of hypophosphites .....	3 ounces.

Mix. One to two drams in water thrice daily.

(2)

Tincture of capsicum .....	4 drams.
Potassium bromide .....	4 drams.
Aromatic spirit of ammonia .....	3 ounces.
Camphor water, enough to make .....	6 ounces.

Mix. A dessertspoonful several times daily. Instead of the bromide, Fowler's solution (50 minims) may be added; or tincture of nux vomica (2 drams) or tincture of bitter orange (5 drams) (Ringier).

(3)

Tincture of nux vomica .....	3 drams.
Dilute phosphoric acid .....	5 drams.
Syrup of wild cherry .....	2 ounces.
Water, enough to make .....	4 ounces.

Mix. Two drams twice daily as a nerve tonic (Potter).

### Tests for Lead in Face Powder.

(R. R. H.)—We have never examined the face powder you name. However, it is not likely that any preparation of this character contains lead acetate, as that salt, on account of its tendency to effloresce is not adapted for use in face powders. Lead carbonate (white lead) would be the most likely lead salt to be suggested, but upon hygienic grounds it is not to be recommended on account of its tendency to produce injurious effects upon the health. But you can easily determine by a few qualitative tests whether there is any lead salt present or not. About the only metallic salts or compounds used in face powders are very light forms of zinc oxide or hydroxide or other basic salts of bismuth.

### Pepsin in Acid Mixtures.

(W. C. T.)—"Is not pepsin injured by close contact with hydrochloric acid and also by alcohol? Should not a mixture of pepsin, if possible, be diluted further before mixing it directly with dilute hydrochloric acid, U.S.P., or a strongly alcoholic tincture? If you had a prescription containing all

three of these substances would you mix the acid with the tincture first and before adding it to the pepsin? The U.S. Dispensatory says pepsin is not active in liquids above 30 per cent."

According to the best authority the presence of hydrochloric acid of greater strength than 0.5 per cent (U.S.D.) inhibits and rapidly destroys the proteolytic activity of pepsin, and as a general proposition mixtures containing both of the substances should be compounded by diluting the acid as much as possible before bringing it into contact with the pepsin. Notwithstanding nearly all reference works state that pepsin is rendered inert by prolonged contact with alcohol, it is extensively prescribed in combinations of this character, the various elixirs of the N.F. in which pepsin is employed being evidence of such use. In many of these preparations hydrochloric acid is also employed, and if you will note the N.F. formulas closely you will find that in their manufacture the pepsin is first mixed with water and acid, that is, the acid only comes in contact with the pepsin in largely diluted form. Answering your second question, we would dilute the hydrochloric acid with the tincture before mixing it with the pepsin.

### Blond and Chestnut Hair Dye.

(A. G.)—"For a 'two bottle' blond hair dye, try the following formula from 'Pharmaceutical Formulas':"

#### Bottle No. I.

Potassium permanganate .....	½ dram.
Water .....	1 ounce.

#### Bottle No. II.

Sodium hyposulphite .....	20 grains.
Water .....	1 ounce.

The hair, free from grease and dry, is treated with No. I allowed to dry, and then similarly treated with No. 2.

#### Chestnut Hair Dye.

Pyrogallic acid .....	1 dram.
Nitric acid .....	5 minims.
Rectified spirit .....	½ ounce.
Water, enough to make .....	4 ounces.

This solution will keep clear for a long time. Directions: Wash and thoroughly rinse the hair, when dry apply the dye with a sponge. This should be repeated daily.

### Potassium Citrate and Spirit of Nitrous Ether.

(W. C. T.)—"Please answer the following in the Question Box."

Potassium citrate .....	4 drams.
Spirit of nitrous ether .....	1 ounce.
Water, enough to make .....	3 ounces.

"Can you suggest any method of mixing that will prevent separation?"

In compounding this prescription the potassium citrate was dissolved in 1½ ounces of water and the spirit of nitrous ether added. Almost immediately the mixture resolved itself into two distinct layers, the spirit of nitrous ether refusing to mix with the aqueous solution of potassium citrate. This is clearly an example of pharmaceutical incompatibility and it is this instance the dense solution of potassium citrate formed is immiscible with the strongly alcoholic spirit. The difficulty cannot be overcome by any method of procedure.

### Will Co-operate in Cultivating Medicinal Plants.

MADISON, Wis., April 10.—A plan of co-operation between the United States Bureau of Plant Industry and the Department of Pharmacy, of the University of Wisconsin, has been adopted, the purpose being to provide for the cultivation of medicinal plants. Investigation and research work is to be carried on in connection with the growing of plants used in the preparation of drugs and medicines, and experimental work will be conducted in this connection.

### Government Officials Taking Higher Courses.

WASHINGTON, April 10.—Dr. Henry E. Kalusowski, dean of the Washington College of Pharmacy, is giving his attention to preparations for the forthcoming final examinations and graduation exercises. The attendance this year is notable for the number of men of high attainments who are taking special courses. Among them are prominent government officials who bear such degrees as Ph.D., M.A. and B.S.

# ADVERTISING for DRUGGISTS.

## \$5 CASH PRIZE FOR BEST WINDOW DISPLAY.

D. Charles O'Connor, of Fitchburg, Mass., Carries Off the Award by Era Judges This Week.

The judges in the ERA Prize Competition this week have unanimously awarded the \$5 prize in Contest No. 2 to D. Charles O'Connor, of Fitchburg, Mass., for the window display published on this page. The window proved a big drawing card and the local newspaper printed the following account of it:

"The west window of the White Drug Store has brought the genial proprietor, D. Charles O'Connor, many words of commendation the past few days, both on account of the clever and skillful arrangement of the display and also for the wonderful amount of information contained in regard to the apparatus and conveniences of an up-to-date chemical laboratory such as is found at the White Drug Store. The window is a miniature laboratory and interested spectators can be seen at all times inspecting and studying the many things used to carefully prepare and compound prescriptions which have given this busy store a reputation second to none.

"The window contains a display of chemists' covers and flasks, glass and wedgewood mortars and pestles, metric and troy weights, and a scale which will accurately weigh 15,000 of a grain, percolators, rubber and glass funnels, metric percolation jars, graduates, metric and apothecaries' measures, tripod, Bunsen burner, evaporating dishes, filter and powder papers, finished prescriptions, prescription cartons, kernal machine and kernal, suppository machine and molds, pills and pharmaceutical preparations used in prescriptions. In the front of the window is a sign reading, 'One registered pharmacist, 19 years' experience,' and another in the back reading, 'One registered pharmacist, 17 years' experience.' The wooden case in the window was made to order to represent the shelf bottle section of store, containing 36 shelf bottles, 4 oz. size, which is  $\frac{1}{2}$  of the size displayed in the front of the store. Another interesting display shows the pill tile, pill roller and divider, with a batch of pills, rolled into a mass cut and divided into pills, showing clearly and interestingly the process of making pills, which is entirely unknown to the great majority of people."

### Era's Prize Competition Stimulating to Druggists.

In entering this window in the ERA Competition Mr. O'Connor writes as follows regarding both the display and the series of contests:

#### Prize Editor, Pharmaceutical Era:

Inclosed please find photograph of my laboratory window display. It caused a sensation in this section of the country. It was highly complimented by the physicians and proved an education to the general public. Every minute during the day and evening people stood outside commenting on the batch of pills, cultures in the test tubes, kernal or some article or apparatus that composed the display. Clipping from newspaper attached describes the general make-up of the display.

Your venture of awarding prizes as outlined in the ERA is splendid and will surely stimulate druggists to hustle a little

more and call to their attention facts about retail drug business that they do not at present appreciate or realize their value. I wish you every success in this up-to-date departure. Yours respectfully,

Fitchburg, Mass.

D. CHAS. O'CONNOR.

## PUBLICITY AND PROMOTION.

### A Model of Moderation.

It is very seldom that one finds a store which possesses so many good points in fixtures, stock and management as to justify a description of the entire store. However, in one of our medium sized cities there is located a pharmacy in which so many admirable characteristics blend that they may be best explained by a general description of the store.

In this establishment prescriptions are of the first consideration and yet what is generally referred to as the "commer-

cial side" has its importance acknowledged by the carrying of a fair presentation of established side lines and the presence of a soda fountain. The store is located in a residential neighborhood among those who may be called "middle class" people. It is of moderate size, about 20 x 40 feet, located on a corner and the upper part used as a dwelling by one of the two proprietors.

### Walls and Fixtures.

The ceiling and walls are of stamped metal, the former painted a very light blue, while the walls are white. The floor is of white maple, unpainted and kept scrupulously clean. With the exception of one show case, all of the woodwork, including the show-globe pedestals in the windows, is finished in white enamel.

On the right hand, as one enters the store, are three show cases of the "silent salesman" type. They are heavy plate glass and each contains two glass shelves. The top, ends and front are fastened together with cement upon ground joining surfaces, there being neither frame nor rivet of wood nor metal, nothing but glass above the base of very light Tennessee marble. Between the second and third of these show cases is located the sales counter, with top of marble to match the show case bases. The front of this counter holds two glass-front receptacles for sponges and chamois. These are hinged at the bottom and tilt forward to throw the top open. The aisle side or back of the sales counter, is occupied by four tiers of three drawers each. These drawers are used for quick service goods such as postage stamps, stationery for sale by the sheet, light propie-

tary articles, such as pills and powders, and ready-to-deliver packages of cream of tartar, boracic acid and other counter drugs. The scales are at one extreme end of the counter, while at the other end stands a three-roll paper rack with a twine reel on top of it. By this arrangement the greater part of the counter slab is left clear and is kept so.

#### The Wall Cases.

The wall behind the show cases and sales counter is covered from floor to ceiling with drawers and shelves. Directly behind the sales counter and plainly visible at either end, are three glass door, double-shelf closets. In the center closet flat plasters are kept; in the front one perfumes, and in the one to the rear are ink, nailpolish and package dyes. The dyes are sorted into pigeon holes. It is the policy of the owners not to use dye selling cases or other advertising containers furnished by manufacturers. No show cards or other advertising matter are exhibited in this store, except that a really artistic calendar or other hanger may be suspended for a few days. Proprietary goods are shown in such manner as to merely inform the observer that they are to be had.

To return to fixtures: The spaces between the floor closets are occupied by drawers with brass pulls in which are set clear glass plates. These plates are not lettered, but bear numbers corresponding with numbers opposite their contents as listed in the store stock list and directory kept close at hand. Above the doors comes the shelving proper, behind sliding glass doors.

#### Novel Door Arrangement.

These shelf doors roll on ball bearings at the bottom and move in an open slot at the top. By being raised upward slightly and the bottom pulled forward, each door may be readily lifted out for cleaning. The space between this shelving proper and the ceiling is filled with shelves with swinging glass-front doors. These upper sections are used for storage stock, but the packages are always clean and faced and make an attractive showing.

From the end of the last show case, in which candy is kept, extending at right angles across the store, is the soda counter. The end of the counter, which comes flush with the candy case, is open and shelved. Upon these shelves are kept the original packages of candy and various sizes of paper bags. Above this closet, upon the end of the counter, stands the cash register, which, as will be later perceived, is placed at the center of the store's general activities.

#### Simple and Sanitary.

The soda counter proper has a top of Tennessee marble and its interior is completely lined with zinc. There is an enameled sink with two enameled drip boards and running water. Behind the counter stands a wall fountain of light onyx with mirror, and canopy top of wood in white enamel. The entire floor space, underneath and between counter and fountain, is covered with heavy sheet lead and over this is a movable wooden foot rack. There is no drainage outlet whatever, and consequently no drain pipes to become clogged and malodorous. The drippings gather on the leaden floor pan beneath the rack and are frequently mopped up, thereby assuring cleanliness by the absolute necessity of it. Beneath the fountain there is ample cold storage room for suppositories, solution of hydrogen peroxide, citrate of magnesia and similar articles, as well as for the fountain supplies.

#### Ice Cream a Feature.

At either end of the fountain is an ice cream cabinet, three flavors, vanilla, chocolate and strawberry being always kept on hand. A large business is also done in ice cream for home consumption.

#### Clean and Safe Cigar Lighter.

Set obliquely to the farther end of the soda counter is the cigar case. The novel feature in connection with this is that the cigar lighter consists of a thin, nickel gas pipe run through the floor against an outer corner of the case. The burner has an automatic spring shut-off with chain pull, so that the flame is kept very low when not in use. No alcohol, dippers or other movable lighters are used, as a light is taken directly from the gas flame.

Directly behind the cigar case is a window, and farther along on the same side a large bay window. Within the bay rests the only floor case on this side of the store. The case is of golden oak frame with top, ends and front of glass. The top is used for box papeteries and the bottom holds racks for mineral waters. The owners say that the display of these

waters has largely increased their sale.

#### The Prescription Room.

In a consistently ethical pharmacy such as this the compounding room is of course the most interesting part.

Rack of the fountain the store is divided by an enclosed stairway through which run stairs to the upper floor and also down to the cellar. Then comes the prescription room, which is about half as large as the store proper. Against the right-hand wall is the dispensing counter with marble top. Above it are four narrow shelves. These hold only non-poisonous prescription chemicals in general use. Poisons and prescription specialties are kept on glass enclosed shelves against the wall backing the stairway, while the heavier dispensing drugs and original packages are on the open shelves against the opposite wall.

Beneath the prescription counter are the usual drawers and closets for corks, bottles, boxes, utensils, and so on. Among the novelties here are to be found large bulb, measuring droppers graduated in both the apothecary and metric scales, rubber scale pans which one of the proprietors himself made by cutting disks from a sheet of hard rubber, softening in hot water and then molding to required concavity, a wooden suppository slab marked with three scales: U.S.P., 1800 and 1900, and for vaginal suppositories, thus assuring uniformity in the sizes of these medicaments. Capsules are wiped with gauze dental napkins, each napkin being used but once and thrown away; but in this immaculate pharmacy towels are not unknown, for a laundry company supplies 50 clean ones per week. Machine folded powder papers are bought ready for use. Pill and powder boxes have unfinished tops, as labels adhere more readily when placed directly on the strawboard. In the corner between the prescription counter and wall is located an enameled sink, the wall above it being covered with sheet copper.

#### Labels Written on Typewriter.

In the center of the room stands a large, heavy table which is used for quantity compounding. Upon its end nearest the prescription counter rests a typewriter upon which all labels are written. A novelty used in connection with this work table is a glass "bill file," which is about 24 x 36 inches. The surface is ground. One of the proprietors ground it with powdered emery. Compartments in label drawers are made of heavy tin, the bottom being made of the same metal. This prevents the labels from absorbing moisture and gumming. The partitions are soldered and the entire tin structure may be lifted from the drawer in one piece, cleaned, refilled and returned. Beyond the work table within a window bay is a model office with roll-top desk, files and other modern conveniences.

This store is not new, nor is it an experiment; it is an evolution. Every corner of it is as clean as a hospital ward and so it has been for over 20 years. It looks as fresh and new as if it had not been open for more than a week. This is a specimen of an ethical pharmacy in fact; some others, so-called, are only theoretically so.

#### "The Peelings" to Prove Corn Cure's Merits.

MILWAUKEE, April 10.—Druggists, physicians and everybody have been gazing in wonderment in the display windows of the downtown pharmacy of Peters & Beek of late. Surrounding a central display of a certain well-known corn cure is piled high a substance advertised as "the peelings which we have removed." Careful investigation discloses the fact that the "peelings" are gum tragacanth, an excellent imitation. Not only is the display one of the most unique which has appeared in Milwaukee pharmacies for a long time, but it has had the effect of materially raising the price of gum tragacanth, so much of the substance is required for the huge display. The advertised corn cure is also selling faster than the enterprising druggists can secure shipments.

Do not snap out a "thank you" at every patron. Either say, look or do something to show that appreciation is real.

**NOTICE**—We are now revising the Era Price List for the 1909 edition and will thank the users of this List to advise us of any errors or omissions which they may have noticed in the last edition.

Address, **ERA PRICE LIST,**  
90 William St., NEW YORK

# PERSONAL MENTION

—R. H. LACKEY, of Philadelphia, was an Atlantic City visitor last week.

—DR. THEODORE JACOBS, one of the best known pharmacists in Norristown, Pa., will retire from business.

—O. W. SMITH, manager of the New York branch of Parke, Davis & Co., left last Monday for Detroit.

—WILLIAM THOMSON, well known Oakland avenue druggist, Milwaukee, was presented with a baby girl on Palm Sunday, April 4.

—HERBERT COLLINS, for some time a druggist at Grand Rapids, Mich., has gone to Owosso to accept a position in W. E. Collins' pharmacy.

—E. B. HINSON, proprietor of the Fifth Street Pharmacy, Long Beach, Cal., has come East to take part in the settlement of an estate in New Jersey.

—W. A. PIERCE, of West Chester, Pa., has returned from a delightful as well as beneficial trip of six weeks duration to Cuba and islands in that vicinity.

—JOHN PASTERNAK, of Chisholm, Minn., recently visited his former home at Stevens Point, Wis. He was one of the heavy losers in the forest fires which devastated Chisholm last fall.

—ROY LEAR, who has been employed in the Reburn drug store, Kalamazoo, for the last two years, has bought a new drug store in Centerville, Mich., of which he has taken possession.

—CHARLES A. SCHAFER, of Pittsburg, Pa., is making many new friends by sending out 500 post cards each month, containing reasonable hints and attractive prices on goods which he carries.

—L. E. HYBES, who formerly was a member of the sales force of Schieffelin & Co., of New York, has purchased the retail drug store of W. C. Wolfer, at Old York road and Venango street, Philadelphia.

—B. S. LANCASTER, who has been acquiring valuable experience as the manager for the stores of J. E. Marsden in Philadelphia, has purchased from the latter the well known pharmacy at 22d and Market streets.

—OTTO KRAUS, of Philadelphia, whose good stories, good fellowship and other characteristics which endear him to a large circle of friends, is now dividing his time with the big carousel which he owns in Fairmount Park.

—W. J. STRASSBURGER, of the McDonald-Strassburger Drug Company, at Green Bay, Wis., is recovering from a recent operation for appendicitis. The well known druggist is recuperating at his home at Appleton, Wis., at the present time.

—JAMES W. MATLAND, manager of the sundry department of the Milwaukee Drug Company, will spend two weeks of recuperation at West Baden Springs. He will be accompanied by Hayes Young, perfume salesman for the Dabrooke Perfume Company.

—EDWARD F. PFAFF, formerly in the retail business at 275 Lenox avenue, Borough of Manhattan, New York City, has accepted a position as representative of Eli Lilly & Co., in the northern section of Manhattan. Mr. Pfaff is secretary of the New Yorker Deutscher Apotheker Verein.

—PAUL ECKELS, one of the members of the new Louisiana Board of Pharmacy, has many friends in Philadelphia who were glad to hear of his new honors. Mr. Eckels was graduated from the Philadelphia College of Pharmacy in 1901 and was afterwards employed in several prominent stores in the Quaker City.

—ALONZO STRONG, of the drug firm of Strong Brothers, Reed City, Mich., has purchased the drug business of Sahlmark & Torberson, who have bought a drug store in Cadillac. Mr. Strong has been engaged in the drug business for the past ten years and has been a member of the firm of Strong Brothers for nearly four years.

—H. A. NOLTE, of Philadelphia, who is also the proprietor of one of the largest drug stores in Atlantic City, is particularly pleased with the outlook for business at the shore during the coming summer. Mr. Nolte is a firm believer in the soda fountain particularly as an attractive feature for the transient trade of the busy season.

—ROLAND H. SHUNTON, formerly in the retail drug busi-

ness at 55th and Market streets, Philadelphia, has sold his store and will return to his old home at Carbondale, Pa., to engage in the business of a mining engineer. His successor, Albert M. Barnes, a well known drug store broker, has placed Arthur W. Crawford in charge of the store.

—M. I. WILBERT, pharmacologist of the Marine Hospital Service, Washington, D. C., was a guest at the meeting of the New York Branch of the American Pharmaceutical Association last Monday evening. Mr. Wilbert also attended the meeting of the Philadelphia Branch last week, and called upon a number of his old friends in his former home city.

—CHARLES SIEBLAK has sold his interests in the Kamps & Sacksteder drug firm at Appleton, Wis., to Charles Sacksteder and will assume on May 1 the management of the Chicago office of the Frederick Stearns Drug Company, of Detroit, Mich., for which he was at one time a traveling representative. J. Austin Hawes will be made manager of the Kamps & Sacksteder pharmacy.

—MARTIN J. WILBERT, formerly of Philadelphia but now of Washington, D. C., with his successor, Ambrose Hunsberger, secretary and treasurer of the Philadelphia Branch of the American Pharmaceutical Association and Harry C. Blair, its president, were the guests of Prof. I. V. S. Stanislaus, dean of the department of pharmacy of the Medico-Chirurgical College at a dinner at the French Club.

—E. R. LARNED, M.D., chief of the experimental laboratories of Parke, Davis & Co., is spending the week in New York City. Dr. Larned lectured last Monday evening at the Brooklyn College of Pharmacy; Wednesday afternoon at the Eclectic Medical School; Wednesday evening at the New York College of Pharmacy. The programme will be concluded tomorrow evening at the University of New Jersey, Jersey City. The title of Dr. Larned's paper is "The Practical Application of Bacteriology to the Cure of Disease."

—CHARLES H. LAWALL entertained a party of personages, prominent in pharmaceutical circles, at an informal dinner at the Drug Club, Philadelphia. In the party were Dr. Lyman F. Kohler and Martin I. Wilbert, of Washington; Charles L. Meyer, H. A. B. Dunning and H. P. Hynson, of Baltimore; Otto Raubenheimer, of Brooklyn; George M. Beringer, Camden; Joseph P. Remington, E. Fullerton Cook and Charles H. LaWall. Following the dinner the party attended the meeting of the Philadelphia Branch of the American Pharmaceutical Association.

—WALTER M. LOWNEY, president of the Walter M. Lowney Company, manufacturers of cocoa and confectionery, and Fred L. Carter, president of the wholesale drug firm of Carter, Carter & Meigs Co., both of Boston, are taking a leading part in the scheme of the Boston Merchants' Association to increase the trade of the city. They are members of a committee which is now organizing a party of members of the association who will tour the New England States early in May. The trip will occupy four days, and the plan is to have this body of Boston business men meet the members of the trade organizations of the various cities of the New England States and explain the plan for mutual co-operation in booming New England.

## Marriage Mentions.

—EDWARD TURNER, of Indianapolis, was recently married at Fort Wayne to Miss Marian Knight.

—DR. JOEL J. BARNETT, with Sharp & Dohme, will wed Miss Rachel Palmer Sills, of Baltimore, this month.

—EDWARD B. DAYHOFF, a druggist of Mercersburg, Washington County, Md., was married April 2 to Miss Anna Mosser.

—J. C. LOOK, prominent druggist at Sheboygan, Wis., is engaged to marry Miss Mayme Buckelmüller, daughter of Mr. and Mrs. Charles Buckelmüller, of Milwaukee.

—JOHN PAUL LAMB, of the Baker Drug Company, Winchester, Va., and Miss Esther Wise, of Cumberland, were recently wedded at the home of the bride's parents.

—WELDON TEXAS WALL, general manager of the Cabarrus Drug Company, Concord, N. C., recently married Miss Katie Barringer, daughter of a clergyman of Mount Pleasant.

—WILLIAM L. SHARPE, representing a Kansas City firm in Springfield, Mo., and Miss Grace Wood, of Mammoth Spring, Ark., were recently united in marriage at the bride's home.

—EBERT W. HUBBARD, who went from Perth Amboy, N. J., to Los Angeles, Cal., where he is connected with the Sun Drug Company, was recently married to Miss Martina Marie Christensen, who crossed the continent for the happy event.

## FIRST COPY OF NEW SPANISH U.S.P. EXHIBITED.

## Prof. Remington Shows It at Meeting of New York Branch After Reading of Papers on Pharmacopoeias of Other Countries—Date for Joint Session With Doctors Not Yet Determined.

A number of valuable papers, all of them comprehensive and instructive reviews of various foreign pharmacopoeias, were read at the meeting of the New York Branch of the American Pharmaceutical Association last Monday evening. The authors made comparisons with the United States Pharmacopoeia and it was the unanimous opinion of all that the U.S.P. was far superior to any of the pharmaceutical works under consideration or of any published so far. It was brought out that the revision committee of the U.S.P. had taken the initiative on many important matters in the pharmaceutical field and incorporated them in the Pharmacopoeia, whereas the majority of foreign pharmacopoeias still clung to conservatism and precedent, remaining decades behind scientific progress.

William C. Alpers predicted that the time would come when the present order of things would be reversed and the European pharmacy student would come to America to study scientific pharmacy, and characterized the U.S.P. as a living book, the quintessence of American pharmaceutical life. In the pharmacopoeias considered it was a noticeable characteristic that practically all tables of saturation, alcohol strengths, comparisons between various standards were omitted, while several were more like law volumes than a text book and an authority compared with the U.S.P.

Prof. J. P. Remington, chairman of the revision committee of the U.S.P., was an interested listener. Following the review of the Spanish Pharmacopoeia, Professor Remington showed the members the first complete printed copy of the Spanish edition of the U.S.P.

He declared that it would prove of great value in bringing about a closer affiliation between the pharmacists of Latin America and the United States, while the publication of the edition was really a duty which the United States owed to the Spanish-speaking inhabitants of its insular possessions. In view of the commercial prominence of New York City, said Professor Remington, it was eminently fit that the work should first be shown in the city having predominance in foreign trade.

Following are the pharmacopoeias that were considered and the names of the gentlemen who presented the outlines: Austrian, Otto Taubenheimer; British, Prof. H. J. Lohmann; French Codex and Mexican, C. A. Mayo; Japanese, Keizo Woynenaka; German, W. C. Alpers; Russian, Joseph Weinstein; Spanish, Hugh Craig; Swiss, Dr. Joseph L. Mayer.

George H. Hitchcock, chairman of the propaganda committee, announced that May 13 had been set as a date for the joint meeting with the New York Medical Society. However, it was found that on this date would take place the commencements of the New York and Brooklyn Colleges of Pharmacy, so the matter of another date was left with Mr. Hitchcock. At least four papers have been arranged for this meeting and Dr. George C. Dickman and Dr. H. H. Rusby will speak.

Dr. George C. Dickman, chairman of the committee on pharmacy, reviewed the month's progress as shown in foreign pharmaceutical and chemical publications.

Announcement was made by President Jacob Diner that the proposed meeting of the Eastern branches at Atlantic City during the convention of the American Medical Association had been discussed at a conference in Philadelphia by various officers of the branches concerned, and the conclusion reached that the plan had better be abandoned, although the Philadelphia Branch was to give its exhibit as previously arranged.

Ewen McIntyre was elected an honorary member of the branch amid much enthusiasm. He has long been an active worker in the A.P.A.

Joseph Weinstein, treasurer, reported a balance on hand of \$49.90. Fred Borggreve was announced as a new member.

## Places Responsibility for Success or Failure.

BALTIMORE, April 12.—Prof. Henry P. Hynson has addressed the following open letter to George M. Beringer, P.M.,

of Camden, chairman of the delegation from the A.P.A. to the A.M.A.:

My Dear Sir: I venture to call your attention to the facts that by your own and Prof. J. P. Remington's opposition to the proposed informal "getting together" of Eastern members of the American Pharmaceutical Association at Atlantic City during the annual convention of the great American Medical Association, June 7-11 next, when representative pharmacists of the East might be closely associated with the leading medical men of the United States; when members of the A.P.A. could attend and take part in the proceedings of the Section on Pharmacology and Therapeutics; when these same members would be able to witness the working and effects of this remarkable organization, the A.M.A., when a joint session of physicians and pharmacists might be arranged, whereas could be most advantageously discussed the U.S.P. and N.F., and the propaganda of both—all of great importance and of vital interest to pharmacy and pharmacists—this opposition together with your silent acceptance of the reference of this whole matter to you and your delegation at the meeting in Philadelphia, April 6, places the responsibility of what may follow or fail to follow in this connection, directly upon you and Professor Remington. This, you and he are, no doubt, willing to assume and will discharge in a manner creditable to both.

The occasion, so closely preceding the revision of the U.S.P. and N.F., offers opportunities for good and effective discussion far outweighing in importance, it seems to me, the mere success of any association's meeting or the interest of any locality, even if any such matters could, by any possibility, be involved.

Most respectfully yours, HENRY P. HYNSON.

## Judge &amp; Dolph Company Makes Important Purchase.

ST. LOUIS, April 12.—A notable transaction in the local drug trade was the recent purchase of a majority of stock in the Raboteau Drug Company by the Judge & Dolph Pharmaceutical Co. The purchaser conducts the largest downtown drug store in the city and the Raboteau Company is just moving from its long time site at Broadway and Lucas avenue to Broadway and Washington avenue, where one of the handsomest sales rooms in the West is being fitted.

This deal will give Judge & Dolph the two most pretentious retail drug establishments in the city, and although only five blocks apart, the stores will not in a sense be rivals. Mr. Judge said, in speaking of the deal, that James Gibson will remain with the Raboteau store, there being no change there except that his company had bought stock in it.

## "Pay-as-You-Enter" Cars Are a Nuisance.

MILWAUKEE, April 10.—George Harris, druggist of Philadelphia, was a recent Milwaukee visitor. Mr. Harris expressed the hope that Milwaukee would never adopt the pay-as-you-enter cars for the sake of the druggists of the city.

"Every storekeeper hates to be bothered by people asking him to change bills into nickels and dimes and that is just where these cars are a nuisance," said Mr. Harris. "People seem to think that a drug store is just there for the purpose of making change. Ever since the pay-as-you-enter cars have been in operation, and they pass my store, we have been besieged for nickels. The sign on the cars asking passengers to have the exact change creates a great demand for nickels that would soon exhaust our supply if we did not make special provisions for the rush."

## Explosion Causes \$10,000 Chemical Fire.

BOSTON, April 12.—Ten thousand dollars' worth of chemicals went up in smoke Thursday at the plant of Knox & Morse, 225 Congress street, and two men and a boy who were in the laboratory where the fire started had a narrow escape from death. From some unexplained reason an explosion occurred on the top floor where a quantity of disinfectant was being made. The damage is covered by insurance.

## New Member for Green Bay R.D.A.

GREEN BAY, WIS., April 3.—H. R. Francois was admitted to membership in the local druggists' association at the recent monthly meeting of the body. Several matters of interest were up for discussion. The next meeting will be held at the A. G. Neven Pharmacy.

**NOTICE**—We are now revising the Era Price List for the 1909 edition and will thank the users of this List to advise us of any errors or omissions which they may have noticed in the last edition.

Address, ERA PRICE LIST,  
90 William St., NEW YORK

## SNAP SHOTS TAKEN FOR THE ERA AT THE JOINT MEETING AT NANUET, ROCKLAND COUNTY, N. Y.

## CONKLIN OPPOSES THE ALL-STATE BILL.

In the Absence of Assembly Committee Chairman Author of Rival Measure Secures a Postponement.

Number of Pharmacists in Albany on Tuesday—Outlook Considered Good.

ALBANY, April 10.—Question was raised in the Assembly yesterday by Mr. Conklin, of New York, as to how the All-State Pharmacy Bill introduced by C. F. Brown, of Cortland, amending the public health law relative to the practice of pharmacy, had found its way to the calendar.

Speaker Wadsworth announced that the bill had been reported to the desk by the Public Health Committee, of which Mr. Wood, of Jefferson, is chairman.

Mr. Ward, of New York, a member of the committee, said the bill was not reported at the meeting of the committee on Tuesday, and so far as he knew there had been no meeting called since that time.

Majority Leader Merritt suggested that criticism of the committee be suspended in the absence of Chairman Wood, and the bill went over until Tuesday.

ALBANY, April 13.—A number of pharmacists are here today in the interest of the All-State Pharmacy Bill. The outlook for its passage is good, as it has the approval of the Governor and is generally endorsed by the members of the New York State Pharmaceutical Association.

## Downer Pharmacy Wins First Prize.

(From the Appleton, Wis., Crescent.)

Downer's Pharmacy, of this city, won the \$5 cash prize last week in the window display contest held by THE PHARMACEUTICAL ERA, a druggists' weekly journal. Druggists from all parts of the United States compete in the ERA contests and to win a first prize means to get ahead of hundreds of pharmacists in the big cities.

The display which won the prize was in Downer's window last Labor Day. It consisted of home-made and also union-made cigars. Tobacco in the leaf was displayed by each dealer represented by one or more brands of Appleton-made cigars, showing from what kind of tobacco the cigars are made. The local cigar makers' union congratulated the Downer Pharmacy on its fine display of all home-made and union-made cigars. The photograph in last week's ERA is a good reproduction of the display.

## Druggists on the Wrong City Ticket.

St. Louis, April 12.—Local druggists and allied interests did not come out as successfully as hoped in the recent city election. It was a Republican day and the druggists were all on the Democratic ticket, and though they made good races comparatively, they were all sent to the discard.

L. A. Seitz, president of the St. L. C. P., was a candidate for the House of Delegates in the Sixth Ward, W. J. Pfeiffer in the Tenth Ward, and Herman Fay, of Fay & Schuler, manufacturers of druggists' labels, was a candidate for City Council. Mr. Fay had been in the House of Delegates for two years and made such a remarkable record that he led the Council ticket which is voted for by the city at large.

## BOTH PROFESSIONS AT LEDERLE FARM.

Joint Meeting of Rockland County Pharmacists and Physicians Made Interesting by an Address by

Dr. Anderson and Demonstrations Showing Methods of Producing Antitoxin.

A very enthusiastic meeting was that of the pharmacists and physicians of Rockland County, N. Y., on April 7, at the Lederle Antitoxin Farm, near Nanuet. The Rockland County Medical Society had as their guests the pharmacists of the district, while the members of both the professions were royally entertained by the Lederle Antitoxin Laboratories. About 40 physicians and pharmacists were present, the medical men being in majority.

A feature of the meeting was the paper of Dr. William C. Anderson, of Brooklyn, N. Y., chairman of the propaganda committee of the State Pharmaceutical Association and dean of the Brooklyn College of Pharmacy. The physicians listened intently as he took up the subject of dispensing by doctors and counter-prescribing by the pharmacists.

"Due to lack of co-operation and consideration between the members of the two professions," said Dr. Anderson, "the non-ethical physician and the substituting druggist has developed, as has also the dispensing doctor and the prescribing druggist."

Dr. Anderson stated that no iron-bound rules could be laid down to regulate prescribing and dispensing; it was as necessary for the doctor in the country districts to carry medicines and do a great amount of dispensing, he said, as well as it was pertinent for the druggist to answer correctly the questions of his customers and subsequently sell drugs which were not restricted by law. The physicians were urged to return to the Pharmacopoeia and the National Formulary and prescribe or buy their supplies of these preparations from the retail druggist. Such a procedure, he said, would rid the professions of a number of undesirable practices, but when all was considered the solution of a number of grievances really hinged upon the establishment of cordial relations through which both professions would have much to gain, while a corresponding loss would ensue if disharmony prevailed instead of harmony.

The physicians said that they agreed heartily with what was brought out by Dr. Anderson when discussion on the paper was started, a number expressing their desire for some understanding as to what should constitute the rights of each profession and in order to bring this about resolutions were adopted by the Medical Society that a committee of three members confer with the druggists with a view of establishing more closer relations and promote an understanding which will benefit both the physicians and the pharmacists of the county. In carrying out the plan a joint meeting of physicians and pharmacists will be held at least once a year.

Dr. George Leitner, in speaking for the physicians, said that what annoyed the doctors more than counter-prescribing and the other evils was the traffic in various remedial agents owned and manufactured by companies composed of retail druggists who acted as special agents for this class of goods. The articles covered remedies for nearly all known ailments. The advertising of these remedies generally was of a character

that induced the public to try self-medication, and slight the doctor, and was a curse to the public as well, he declared. Dr. Leifert said there was absolutely no excuse for the existence of these preparations and that the physicians would rejoice to see them withdrawn, and would gladly co-operate with the pharmacists in working toward more ethical principles for both professions.

Other speakers were M. J. Sanford, J. C. Dingman, president and secretary, respectively, of the Medical Society, and Dr. Bogert; among the druggists who took part in the discussion were Ed. G. Egge, of New City; Charles Van Wagener, representing John D. Blauvelt, of Nyack, and H. D. Fink, of Spring Valley.

At adjournment it was announced that a number of demonstrations of the methods employed in the preparation of antitoxin, vaccine and antisera had been provided. F. D. Bell, secretary and treasurer of the Lederle Antitoxin Laboratories, and Henry S. Livingston, secretary of Schieffelin & Co., showed the visitors around.

In all the demonstrations the physicians and pharmacists present were most interested. The toxin room, horse stable, calf stable, quarantine stables and storage rooms were visited. The absolute cleanliness of each apartment was commented upon by the guests. The first demonstration was the removal of vaccine from a calf that had previously been vaccinated. This operation was performed by Dr. Richard Slee, director of the laboratories at the Lederle Farm. The visitors were impressed with precautions taken to secure the vaccine under as nearly aseptic conditions as possible. The operators wore gowned, sterile instruments used and the operating room thoroughly cleaned.

Another interesting demonstration was the drawing of blood from a horse under treatment for the production of diphtheria antitoxin. This operation was performed by Dr. Herbert F. Harms. A special operating room is provided for these operations. This room has the appearance of a hospital operating room, being finished in white enamel. The horse is securely fastened in iron stocks and when the skin has been thoroughly cleansed, a cannula is inserted into the jugular vein and the desired amount of blood drawn into sterile bottles. The laboratories for refining antitoxin are located in New York City. The manner of injecting horses under treatment was also shown.

At the conclusion of these demonstrations the guests were invited to the home of Dr. Slee, where refreshments were served. Each guest was presented with a beautiful souvenir programme and pigskin card-case, provided by the management of the laboratories. A convenient telephone call index was presented with the compliments of Schieffelin & Co., selling agents for the products of these laboratories.

#### Medico-Chirurgical College at Philadelphia.

PHILADELPHIA, April 10.—The Alumni Association of the Department of Pharmacy of the Medico-Chirurgical College gave a reception and banquet at Mosebach's Casino April 7, at which the members of the senior class in that department were guests of honor.

—Committees have been appointed for a two-day celebration, June 4-5, of the tenth anniversary of the organization of the department of pharmacy.

—A distinctly scientific programme, highly entertaining and instructive, was rendered at the March meeting of the Mortar and Pestle Club of the college.

—Commencement will be held on June 5.

#### F. H. Fenwick President of Worcester County Ph.A.

WORCESTER, Mass., April 3.—The annual meeting of the Worcester County Pharmacists' Association was held at the Worcester Automobile Club recently and the following officers were elected: President, F. H. Fenwick; vice-president, Walter S. Doane; secretary, B. C. Cutler; treasurer, F. W. Ring; executive committee, H. E. Davis, W. H. Goggin, Albert W. Andrews, Frank W. Lavoine and M. G. Hirshon.

#### Cost \$300 to Violate Pure Drug Law.

MANHATTAN, Kan., April 10.—George B. Harrop, a local druggist, was found guilty of violating the Pure Food and Drugs Act by adulterating drugs by Justice Porter recently on three counts. He was given the minimum fine of \$100 for each count and costs.

#### THE CHARGES AGAINST IOWA BOARD MEMBERS.

Governor, Unable to Remove Commissioner, Sends Case to the Attorney-General for Court Action.

DES MOINES, April 10.—Failing in his efforts to summarily dismiss Pharmacy Commissioner Bert F. Keltz, whom he charges with falsifying his accounts to the State, Gov. B. F. Carroll has demanded that Attorney-General Byers proceed against Keltz in the courts. The Governor has written a letter to the Attorney-General and made public a statement setting forth some of the charges against Keltz and reviewing the case of former Commissioner Goss, whose resignation was tendered at the Governor's request some weeks ago.

Governor Carroll declares that Keltz promised to resign, but failed to keep his promise. The Governor cites the instance of Keltz's trip to Chicago during the National convention, and says that his accounts for per diem for last June show a charge against the State of \$5 per day during the days he was in Chicago, the item being listed as follows: "Traveling after vendors, and office work." The Governor also shows that on June 20 Mr. Keltz was in Webster City "riding about the town in an automobile," and attending a convention held there that day.

Commissioner Keltz, in his own defense, declares that he actually did work for the State when he was in Chicago, that all of his bills were correct and that Governor Carroll, when State auditor, had advised members of the board to charge for a full day in cases where only a part of the day had been used. He ascribes the Governor's attack to personal enmity due to Keltz's course in favoring the nomination of another man for Governor.

In the House, Governor Carroll's Bill, introduced by Mr. Grier, to abolish the board was defeated by a vote of 51 to 24, although an appeal was made on behalf of the executive to have the bill passed.

#### Many Persons Want to Get Rid of Their Whiskers.

COLUMBUS, Ind., April 10.—When Joseph Griner brought suit against George F. Meyer, a Seymour druggist, for \$5000 damages for giving him an ointment which is alleged to have ruined his whiskers, he little knew of the free advertising there was in store for Meyer. Now the Seymour druggist is receiving letters from all parts of the country from people who wish their whiskers removed. One man writes from Parkersburg, W. Va., that his face is so tender shaving is "miserably painful." If the Seymour druggist has an ointment which will remove whiskers, root and branch, he desires some of it.

"If you have a preparation that will remove hair on the face it is just what I want," writes a man from Indianapolis. An Evansville woman encloses stamps for a sample. She wants something that will rid her of hair on the face. Another inquiry comes from Galveston, Tex. The man says barbers always sneak out of the shop when they see him coming, and his beard is too heavy for him to shave himself. He wishes some of the remover.

#### Programme of Botanical Excursions in Philadelphia.

Philadelphia College of Pharmacy botanical excursions for 1909 will be held as follows:

April 28, Darby Creek, take car in Walnut street, and meet at terminus of line at 2 o'clock; May 5, Swarthmore, take Angora car in Walnut street, and meet at Angora Junction at 2 o'clock; May 12, West Chester Road, take car in Market Street Elevated Road, and meet at terminus of line at 2 o'clock; May 19, Hordern Hill, Fairmount Park, meet at hall at 2 o'clock; May 26, Crum Creek, take Angora car in Walnut street, and meet at Angora Junction at 2 o'clock.

#### Electric Mortar and Pestle as a Sign.

SYRACUSE, N. Y., April 10.—C. W. Snow & Co. have a large mortar and pestle sign with a row of electric lights around the outer edges in front of the store in South Warren street, to keep up with other merchants who are making electrical displays in that thoroughfare.

#### Wisconsin Drug Stores in Good Condition.

MILWAUKEE, April 10.—D. M. Walsh, United States Pure Food and Drug Inspector, has been visiting several Wisconsin cities and towns in his official capacity. Conditions in the drug stores of the State were found to be very satisfactory by Mr. Walsh.

## JOINT MEETING HELD IN BALTIMORE.

Drug Exchange Represented and the Formulation of a Programme for the Next Legislature Discussed.

BALTIMORE, April 10.—Another conference of representatives from the Baltimore Branch of the American Pharmaceutical Association, from the Maryland Pharmaceutical Association, the Baltimore Association of Retail Druggists and the Baltimore Drug Exchange was held recently, the Drug Exchange sending delegates for the first time. William M. Fouch, president of the Maryland Ph.A., presided. It was decided to hold other joint meetings whenever this seemed desirable, such gatherings to be called by President Fouch on the request of members from any organization wishing to have the call issued.

The proposed joint meeting in May elicited some discussion. At this meeting probable legislation to be brought before the Maryland General Assembly at its next session, in January, 1910, is likely to receive extensive consideration. A committee consisting of R. E. Lee Williamson, Dr. E. F. Kelly and A. C. Meyer was named to arrange a programme.

## WANT PRIVILEGES RESTORED.

Retailers in Baltimore Decide to Revert to Anti-Tripartite Conditions.

BALTIMORE, April 10.—The Baltimore Association of Retail Druggists, at a meeting Thursday afternoon, received reports from various committees and disposed of other business, discussing among the various matters the programme to be arranged for the proposed joint meeting of pharmaceutical bodies here next month.

The committee on membership reported that ten new names had been added to the list as a result of the canvass made among the druggists of the city. The telephone committee was authorized to circulate a petition for an increase of the pay for the maintenance of pay telephones in drug stores, while the legislative committee was instructed to formulate a programme for the joint meeting of druggists and allied interests.

The meeting unanimously indorsed David R. Millard for appointment as a member of the State Board of Pharmacy.

A resolution was adopted providing that the retailers ask for the restoration of the privileges which they had before the tripartite agreement went into effect in the way of price concessions when purchases are made in quantity. The retailers will urge that they be placed upon an equality with the jobber in this respect, as was the case formerly.

## Lively Contest for Vacancy in the Maryland Board.

BALTIMORE, April 10.—There appears to be an active rivalry for the vacancy to occur next month on the Maryland Board of Pharmacy with the expiration of the term of Ephraim Bacon, the secretary. Mr. Bacon is reported to be anxious to succeed himself, and is making strong efforts to be retained. The candidate of the Baltimore Association of Retail Druggists is David R. Millard, who was at one time on the board and who obtained a reappointment, but resigned.

The Maryland Ph.A. seems not to be committed to any one, and has sent in the names of three available candidates, as it is required to do under the law. The three names submitted are those of David R. Millard, Ephraim Bacon, the present secretary, and Robert S. McKinney, postmaster of Taneytown, Carroll County, and a prosperous druggist there. Mr. McKinney has many friends and can be depended upon to run a swift race. Louis Hergenrath, of Towson, Baltimore County, is also an applicant.

Much, apparently, depends upon the construction of the law relating to sectional representation. If a druggist must reside in the section to which he is accredited and be engaged in business there, some of the present aspirants are ineligible.

## PLANS FOR COMING ILLINOIS PH.A. MEETING.

Important Subjects to Be Considered and Membership Roll is Expected to Reach the 1300 Mark.

CHICAGO, April 10.—Judging from the plans which have been made and the activity displayed by the officers and committee of the Illinois Pharmaceutical Association, the coming meeting at Quincy, June 15-17, will be the banner meeting in the history of the association. Not only is the association fortunate in having an exceedingly active local secretary in the person of Charles H. Achelpohl, but the vigilant and enterprising officers of the Illinois Pharmaceutical Travelers' Association have determined to break all records in the entertainments for this meeting.

The full meaning of this determination can be realized only by those who enjoyed the hospitality of Quincy at the meeting there two decades ago and have also witnessed the great success which the travelers have made of the entertainment features for the last six years.

The Illinois Pharmaceutical Association is in prosperous condition, with the largest membership it has ever had, not less than 1100 pharmacists being represented on its rolls.

The membership committee is hard at work with a view of presenting 200 new members for election at the annual meeting. Among the most important subjects to come up for consideration are questions affecting education and legislation and the much-talked-of amendment to the Pharmacy Law so as to require a systematic pharmaceutical training prior to examination by the State Board of Pharmacy.

The finances of the association are in excellent condition. The secretary reports a larger number of members than usual who have paid their dues for the current year in advance and there is every indication that with the enthusiastic support of the travelers the meeting will be a record-breaker in attendance and entertainment as well as in business transacted.

## New Drug Company Formed.

CHICAGO, April 10.—The Chicago Wholesale Drug Company has been incorporated, with a capital stock of \$20,000, to engage in the wholesale and retail drug business. The incorporators are Henry P. Sandkoetter, Matthew White, Conrad H. Sippel and Anthony E. Zuber, all well known to the Chicago trade. The new concern expects to commence business shortly and has leased quarters at Wabash avenue and Harrison street. Mr. Sippel is the attorney for the Chicago Retail Druggists' Association. Mr. Sand-

koetter was the former chairman of the propaganda committee of the N.A.R.D. Mr. Zuber is a trustee of the Chicago Retail Druggists' Association and Mr. White is connected with the Chicago Branch of the American Druggists' Syndicate. It is generally understood in the trade that the new concern will undertake the representation of this line after it is opened for business.

## Social Drug Club Ready for Minstrels.

CHICAGO, April 10.—The Social Drug Club held its regular monthly meeting at the Sherman House today. The interest of the members largely centered in the preparations for the forthcoming minstrel show to be given at the Y.M.C.A. Auditorium on April 15. The success of this affair is so well assured that there is talk of giving the same performance at Quincy in June during the State convention.

## F. W. Meissner Now Chairman Propaganda Committee.

CHICAGO, April 10.—Fred W. Meissner, of Laporte, Ind., has been made chairman of the U.S.P. and N.F. committee of the N.A.R.D., in the place of Christopher Koch, of Philadelphia, who resigned. Franklin M. Apple, of Philadelphia, suc-

RALPH G. SHIRLEY.

who is on the parade committee of the Illinois Pharmaceutical Travelers' Association, is making strenuous efforts to promote the success of the State Ph.A. meeting in Quincy in June. He represents Bauer & Black in the Quincy district.

ceeds to the vacancy on the board created by Mr. Koch's resignation. Mr. Meissner has been identified with the N.A.R.D. since its organization and was a former member of the National executive committee and also a member of the United States Pharmacopoeial Convention.

#### Chicago College of Pharmacy Commencement.

CHICAGO, April 10.—The annual commencement exercises of the University of Illinois School of Pharmacy will be held at the Central Y.M.C.A. Auditorium, 153 La Salle street, April 29, at 2 p. m. The speaker of the day will be State Superintendent of Public Instruction Francis G. Blair. The graduating class is the largest in the history of the institution and will be represented by G. A. Anderson, salutatorian, and Richard Van Dusen, valedictorian. President Edmund J. James, of the University of Illinois, will confer the degrees.

The trustees have appointed S. C. Yeomans the Chicago member of the advisory board to fill the vacancy caused by the expiration of the term of W. K. Forsyth.

On the evening of commencement day the Alumni Association will give its 27th annual banquet and reunion.

A special feature will be a reunion of the class of 1884, which will celebrate the 25th anniversary of its graduation. George P. Mills, of Evanston, and W. W. Albers, of Wausan, Wis., are actively at work in promoting the success of this reunion. Dr. H. H. Rogers will act as toastmaster.

On April 14 the Beta Chapter of the Phi Gamma Sigma Fraternity gives its third annual banquet.

On April 23 the students, both junior and senior class, will visit the laboratories of Parke, Davis & Co., at Detroit.

#### Revenue Ruling Causes Much Inconvenience.

CHICAGO, April 10.—A new ruling of the Internal Revenue Department on the five-gallon merchandise package of alcohol is causing some inconvenience to druggists in this district. Up to a short time ago the so-called five-gallon package contained 4½ gallons in order to avoid the inconvenience of attaching a revenue stamp to each individual package. Without any warning came the notification from the Government that hereafter all five-gallon packages that contained less than five gallons would be subject to seizure if it did not have on it a revenue stamp. The ruling does not increase the tax, but simply adds to the trouble and expense by reason of the additional labor involved in securing and placing the stamps.

#### Live Topics Discussed by Chicago Druggists.

CHICAGO, April 10.—The Chicago Retail Druggists' Association will hold its regular quarter meeting April 13. The report of the committee on the revision of the constitution and by-laws will be the principal topic. The proposed constitution contains many new features and is expected to incite considerable discussion. The brokerage question and the matter of new stores will also come up and the officers will submit reports. The pending liquor prosecutions in Illinois will also be considered.

#### Drug Club "Get-Together" Dinner Big Success.

Over 100 members took part in the "Get-Together" dinner of the Drug and Chemical Club of New York on April 7, and the event was a success from start to finish. The dinner, which was planned especially for the newer members and for the promotion of general good-fellowship, served its purpose admirably. Among the speakers were President Edwin H. Burr, who planned the novel features; Vice-President C. B. Zabriskie, Thomas P. Cook, H. B. Harding and I. F. Stone. All took part in the singing of songs which were printed on the programme and a number expressed a desire to see similar sessions become at least annual affairs.

#### Buried Mrs. Hall's Mother in Michigan.

George C. Hall, of Brooklyn, Eastern representative of the Zenmer Company, Pittsburg, Pa., with his wife and daughter returned to the city Saturday evening. March 26 they took the remains of Mrs. Hall's mother, Mrs. J. D. Mizner, to Burr Oak, Mich., for burial. They visited Kalamazoo, Mich.; Erie, Pa., and Pittsburg, Pa., before their return.

#### Druggists Win in Pennsylvania Senate.

HARRISBURG, April 12.—Senate Bill 376, opposed by A. Ph.A. and all druggists, has been defeated in the Senate.

#### KILLS HIMSELF TO MEET HIS DEAD WIFE.

##### Veteran Druggist of Cleveland Never Recovered From Sorrow Caused by Her Suicide.

CLEVELAND, O., April 12.—Despondent over the suicide of his wife four years ago, Albert Peterslge, 57, druggist, recently ended his life with a bullet.

Peterslge was born in Stadtlm, Germany, and came to this country 42 years ago. He settled in Cleveland, learned the drug business and eventually started in business for himself at East 22d street and Woodland avenue, S. E. For 28 years he conducted the business at that place until about seven years ago, when he turned it over to his son Emil and retired.

Afflicted with nervous trouble, the wife four years ago retired to her room one day and ended her life with poison. The wife's tragic death had a depressing effect upon the husband. From the shock of it he never entirely recovered.

Fits of despondency came upon him time after time during the past four years and made him long to end his troubles and join his wife.

#### Philip A. Calder, of Troy, N. Y.

TROY, April 10.—Philip A. Calder, president of Polk & Calder Drug Co., and the oldest active druggist in this city, died recently from shock resulting from a fall.

In 1860 he secured a position with Robinson & Green, wholesale druggists, and after 19 years was admitted to the firm. The firm underwent several changes until 1897, when the present concern was incorporated. Mr. Calder was a member of the Commercial Travelers' Association and the Rensselaer Society in New York. The survivors are his widow and two sisters. The funeral was largely attended.

#### Easter Monday Wedding Prevented by Death.

BOSTON, April 10.—One of the saddest funerals held in Watertown for many a day was that yesterday of Thomas H. Smith, employed for many years in Sullivan's drug store. He was to have been married Easter Monday. The cards had been sent out only a week ago, and the affianced had received a linen shower from her many friends. Mr. Smith had been ill only a few days.

#### Obituary Notes.

—J. W. McDUGALL, Rock Springs, Wyo., is dead.

—ELIHU BUNKER, of New Bedford, Mass., is dead of apoplexy, aged 76.

—L. G. SCHULTZ, formerly in the employ of the Koenigick Drug Company and well known among Wisconsin drug clerks, is dead at Fond du Lac of pneumonia.

—OTTO G. SCHNEPP, of Wheeling, W. Va., is dead, aged 31. His father had operated the pharmacy to which he succeeded at his parent's death. A widow survives.

—ATRELIUS SMITH, aged 46, of the Smith & Grisham Drug Co., Winfield, La., is dead, leaving a widow and two children. He was a prominent business man and Mason.

—HENRY A. HUNCKE, a founder and former president of the St. Louis Chemical Society, was recently killed by leaping from the window of a hospital where he was awaiting an operation.

—C. L. SHERWOOD, one of the best known druggists in southwestern Michigan, is dead, aged 71. He was in the drug business at Dowagiac for 40 years and was connected with many fraternal organizations.

—LARS L. RUTLEN, a pharmacist at the O. O. Melaas drug store, Stoughton, Wis., for the past 30 years, is dead of heart failure. He was born in Norway in 1840 and settled at Stoughton in 1871, when he became associated with O. N. Falk in the pharmacy business.

—FRANK A. WEISE, for 28 years in business as a druggist in Nashville, Tenn., is dead, aged 68. Previously he had served in the Federal Army in the Hospital Department and after the war obtained employment in Nashville drug stores, later starting in business for himself. He was born in Berlin, Germany, and came to America when 16.

—HENRY FISCHER, a director in the St. Louis C.P., member of the St. Louis R.D.A. and of other organizations, is dead. He was born in Germany in 1845 and came to this country in 1861. At Fort Wayne he was connected with the Meyer Bros. Drug Co. and later went to St. Louis. A widow and two children survive. His body was cremated.

## NEW HEAD FOR GLENSIDE GALENICAL CO.

Frank M. Ramsey, Formerly With the William R. Warner Co., Now President and General Manager.

Frank M. Ramsey, who has recently become the president and general manager of the Glenside Galenical Company, Glenside, Pa., is well known to the trade as one of the most expert pill men in America, his experience in this direction having been obtained in an association of nearly 40 years with the house of Wm. R. Warner Company, of Philadelphia, Pa., where he rose from errand boy to general manager, a position he held until November of last year, when he withdrew, owing to changes in ownership of that company.

The Glenside Galenical Company, with which Mr. Ramsey is now identified, is a comparatively new addition to the list of manufacturing houses, and Mr. Ramsey informs us that his company will pay especial attention to the manufacture of private formulas for the trade rather than to attempt a full line of pharmaceuticals.

Added to this work will be the supplying of certain articles put up for the trade, ready for selling, physicians' supplies, specialties, etc. Mr. Ramsey is hopeful for the future and believes that intelligent, conscientious work in behalf of his clients will surely merit a reputation and a growing quantity of business.

## Easter Bonnet Burned in Drug Store.

BALTIMORE, April 10.—A tragedy with an Easter bonnet for the central figure was enacted in the pharmacy of Thomas & Thompson, Light and Baltimore streets, yesterday. A woman was standing near the cigar counter when, by an unguarded movement, her Easter hat came in contact with the small gas jet kept burning for smokers to light their perfectos. There was a sudden flare and in the twinkling of an eye what had been a creation of straw, cherries, lace and wax was transformed into a mass of unsightly rubbish. Clerks and patrons of the store who witnessed the conflagration were uncertain as to whether they should regard the occurrence as a comedy or a tragedy. There were a few sighs, a few shouts and then laughter. The young woman who had worn the hat seemed to bear the misfortune with equanimity.

## To Burn Mortgage Tonight.

The burning of the mortgage on the Brooklyn College of Pharmacy, clearing the institution of its entire debt, will take place this evening with special ceremonies. A banquet given in honor of the occasion by the Kings County Pharmaceutical Society, which owns the institution, will be a feature.

Outside of the alumni association, the trustees, the faculty of the college and the officers of the society, a number of invited guests are to take part in the festivities and there will be speeches by prominent pharmaceutical men from all branches of the trade and profession. The committee on arrangements has been making preparations for the event for more than a month and besides the illumination of the entire building the banquet room will be handsomely decorated with the college colors. Following are the names of the gentlemen on the committee: William Muir, Ph.D., chairman; William C. Anderson, Ph.D.; Frederic P. Tutbill, Ph.D.; Adrian Paradis, Ph.D.; Thomas J. France, Ph.D.

## Fatal Accident Caused by Carboy Breaking.

MILWAUKEE, April 10.—The accidental breaking of a large carboy of oxalic acid at the plant of the Pfister & Vogel Leather Co. will probably cause the death of Steve Caroleck, an employee. Just how the accident occurred is not known.

## Druggist Suffers in Bad Fire at Lenox.

LENEX, Mass., April 12.—In a fire yesterday which destroyed the business section of this place and cost six lives, the pharmacy of James Cassidy was burned, with a loss of \$100,000.

## 61 NEW MEMBERS—RECORD BROKEN IN P.A.R.D.

Proposed Legislation Considered and Suggestions Made for Advancing the Interests of Retailers.

PHILADELPHIA, April 10.—The admission of 61 new members and the discussion and action on the proposed amendments to the State pharmacy law were the prominent features of the quarterly meeting at the Drug Club of the Philadelphia Association of Retail Druggists. It was not only a largely attended meeting, but an exceptionally interesting one, as was indicated by the fact that it was midnight before the members gathered at the luncheon which was served in the club café.

The proposed radical change in existing legislation by which the proprietor of each drug store in Pennsylvania will be taxed \$2 annually came up in the course of the report of Chairman William L. Cliffe, of the legislative committee, and was new to most of the members. Other amendments to the pharmacy law provide for the paying of a salary of \$1500 per annum to the members of the Pharmaceutical Examining Board, the granting of permission to country storekeepers to sell the common household remedies; compelling every drug store in the State to possess a United States Pharmacopoeia and a National

Formulary; permit pharmacists registered in other States to register in Pennsylvania, provided that the standards of the other commonwealths are equal to those of Pennsylvania, and provided also that the same privilege of registration is given in those States to men registered in Pennsylvania; compel qualified assistants taking the examination for registered pharmacist to hand over the a. a. certificate before they can receive the other, and lastly stipulating upon what conditions the license of an applicant may be refused or revoked by the State board.

But it was on the section providing for the payment of an annual tax of \$2 by the proprietor of every store in the State that the principal discussion took place. Christopher Koch, Jr., recently appointed a member of the State board, announced that he was the sponsor for the bill and pluckily took the floor to explain and defend the measure from the attacks which came from all sides. He declared that with this assessment feature it would be possible to keep an authentic record of the stores of the State and that the owners would receive protection and the laws would be enforced as never before. He showed how it would be necessary for every proprietor to comply with the law before he received his license to conduct a

store and that if he violated the law there would be no hunting of evidence and he would lose his license. He declared that it should be worth \$2 for every druggist as an insurance proposition and to know that every other druggist was living up to the law the same as he was.

On the question of salary, he said that as it was proposed to put medical inspectors on a salary of \$1500 a year, it was only in keeping with the dignity of the profession of pharmacy that the members of the State Pharmaceutical Examining Board should receive a similar salary, instead of \$5 a day as is now paid.

William E. Lee declared that it was class legislation and that the taxing of pharmacists for the enforcement of a law was wrong in principle. He read a letter from L. L. Walton, the Williamsport member of the board, expressing the latter's disapproval of the amendment to impose the tax suggested. Mr. Cliffe said he was in favor of the licensing feature and that members of the board should receive the salary proposed, but he explained that the Legislature had repeatedly been urged that an appropriation was necessary to successfully enforce the pharmacy laws and that for that as well as other reasons it was now wrong for the retail drug trade to accede to a proposition to go down in their own pockets and pay for the protection the State should provide.

Charles Reifuss said that it was all right for the State board to get a line on every drug store in the State and that

FRANK M. RAMSEY,  
of Glenside, Pa.

it was worth \$2 for him to know that every druggist in the State was living up to the law.

"It is an injustice," he continued, "to tax the druggists, but if there is no other way, why I say pay it. One of the best features of the amended bill is the licensing of drug stores."

Charles Leedom, Walter Rothwell, Charles E. King, Dr. E. K. Boltz and others also opposed the taxation feature of the amendments, while President Frank W. Fluck called attention to the section which allows the license of a store to be revoked upon the conviction of the licensee of any violation of the laws pertaining to pharmacy. Mr. Fluck thought that this should be amended so that this penalty should be imposed only when the violation was of a criminal nature.

The proposed amendments were referred to the legislative committee with approval of the licensing feature, but disapproval of the taxation fee of \$2; that the medicines sold by storekeepers be compounded or mixed under the direction of a competent pharmacist and that licenses be revoked upon failure of the proprietor to renew the license within 60 days, when it was shown that he conducted his store without competent help or when the proprietor was a habitual drunkard or used or sold illegally, habit-forming drugs.

Great enthusiasm was shown by the meeting when Chairman William A. Carpenter, of the membership committee, read off a list of 61 applicants for memberships who had already received favorable action by the executive committee. It was the long-distance record for members admitted at any one meeting of the association, the high number previously being 28. He magnanimously divided credit for the work with Organizer J. H. Barlow and F. J. Austin, J. H. Bailey, Harry Swain, Nelson Fry, Ralph Haus, C. L. Dobson, A. R. Hesse, H. C. Clapham, H. J. Siegfried, J. B. Reynolds, Russell T. Blackwood, B. F. Krehl and F. P. Streeper, the other members of the committee, for going with him in their respective neighborhoods and soliciting those who hitherto had withheld their applications.

Dr. J. Madison Taylor was introduced by President Fluck and in a concise, interesting manner discussed the large mortality among infants and recommended to the druggists that they take up the question of supplying the milk diet for children. He declared that the place where this food could and should be prepared was the drug store.

President Fluck, in reporting for the ethical preparations committee, announced that a booklet on "Expectorants" would go out shortly to the physicians of the city and that it was proposed to send out matter perhaps as often as twice a month between this and the close of the fiscal year of the N.A.R.D., at the September convention. The suggestion was made that it would be better if this matter received from National headquarters be kept and distributed regularly so as to cover the period up to the first of the year. Secretary N. A. Cozens announced that thus far the names of 1300 physicians had been received from members who wished this literature sent to the medical profession. He said that as the association was entitled to send to 2000 physicians, those who had not sent in lists should do so at once.

A suggestion which may bear fruit was that the association secure men to make inventories of the stocks of retail drug stores at small cost. The necessity of such an inventory was pointed out and it was explained that such a plan might be a source of profit to the association as well as a convenience to members. It was said that one of the wholesale houses in the city sent men out to do this work.

The other reports of committees and officers showed that the association was in a most healthy condition. It was announced that the pharmacists in the Italian quarter of the city would organize soon and as most of the prospective members are already affiliated with the P.A.R.D., the new organization will really be an affiliation of the larger body.

#### Old-Time Drug Store Changes Hands.

The drug store which was established about 50 years ago at 10 Greenwich street has been sold to Rudolph Mielke, M.D. During the past 19 years it was owned by Bracklo Brothers. Owing to the death, last winter, of William Eberhard Bracklo, the remaining brother, Herman U., lost all interest in the store and determined to sell it. It is the intention of Herman U. Bracklo to take a trip to Europe. Herman H. Breuer, Ph.G., executed the transfer and a new lease for five years.

## BOARD EXAMINATIONS

### Mississippi.

JACKSON, April 9.—Of 102 applicants for certificates to practice pharmacy in Mississippi, the following made the required grade in the examinations held here during this week, and they will be given certificates:

Edward A. Richardson, Holly Springs; Dr. C. W. Melton, Shaw; H. B. McGill, Greenville; J. A. McNeill, Ellisville; Earle Wylie, Eru; Lyman Faden, Iuka; S. J. Gaddy, Bond; C. W. Fountain, Logtown; C. E. Jones, Bolton; B. H. Dickson, Jackson; Delma Goode, Myrtle; Walter F. Fortenberry, Columbia; F. L. Graves, Meridian; E. E. Hagland, Atlanta; C. S. Stevens, Ruleville; R. A. Fadely, Vicksburg; Robert W. Keyser, Canton; C. E. Merrill, Greenwood; D. V. Stanley, Fort Smith, Ark.; T. J. Ray, Long Beach; E. R. Wiggins, Natchez; J. T. Larsen, New Orleans; E. L. Gaudet, Covington, La.; C. H. Butler, Natchez; Charles Ferchaud, Vicksburg; C. V. Horrell and D. C. Pitts, Hernandville; Jesse M. Eley, Montrose; H. L. Boyd, Kosciusko; Charles Kette, Vicksburg; J. F. Carter, Seabolt; J. D. Lynch, Weir; C. M. Reames, Senatobia; F. L. Mancham, Iuka; L. C. Callahan, Columbus; John T. McLain, Cleveland.

The following were given duplicate certificates to replace others lost or mislaid: A. D. Culley, Fayette; H. B. Clarke, Kosciusko; H. Eastland, Forest; L. K. Hubbard, Hazlehurst.

The class was the largest in the history of the board and it was also remarkable for furnishing relatively the smallest number of successful candidates. Secretary Wilkinson, of the board, has left for his home in Indiana and will send out the certificates from there.

### Colorado.

DENVER, April 10.—At the March examinations of the Colorado State Board of Pharmacy the following 15 candidates passed as registered pharmacists: Charles L. Barthen, George McLeod Bowman, Harry Frank, Banks Gayman, Grace Griswold, John F. Harting, A. E. Lindahl, Henry O. Lutz, George Meyer, J. A. Reynolds, William J. Schils, of Denver; Thomas B. Crigler and William Odau, of Boulder; William J. Lacy, of Grand Junction; Carl G. Meyer, of Trinidad.

### New Pharmacy Law in Massachusetts.

BOSTON, April 12.—The new pharmacy bill has been signed by Governor Draper, and is now a law, it having taken effect immediately upon its passage. The bill gives the Board of Registration in Pharmacy greater power over the druggists, not alone in the regulation of the liquor licenses, but as to the druggists' conduct.

Incidentally it raises the fee to druggists for the certificate of fitness for a liquor license from \$1 to \$5, and guarantees that the board in the future will be self-sustaining.

### Maryland University Alumni to Banquet.

BALTIMORE, April 10.—The annual banquet of the General Alumni Association of the University of Maryland, of which the graduates in pharmacy form a part, will take place at the Eutaw House on the 22d inst., and will be attended by many of Baltimore's most prominent citizens. Among the speakers will be Congressman William H. Wiley, of New Jersey. Eugene L. Hodson is the representative of the druggists on the committee of arrangements.

### Next Meeting of North Dakota Board.

Secretary W. S. Parker, of Lisbon, announces that the next meeting of the North Dakota State Board of Pharmacy will be held at Fargo on June 15.

**NOTICE** We are now revising the Era Price List for the 1909 edition and will thank the users of this List to advise us of any errors or omissions which they may have noticed in the last edition.

Address, **ERA PRICE LIST,**  
90 William St., NEW YORK

ANNIVERSARY DINNER TO "THE OLD GUARD." FINE WINDOW DISPLAY IN PHILADELPHIA.

JOSEPH HELFMAN.

James E. Bartlett and Frank P. O'Brien, of Chicago; S. H. Carragan, Dr. Jokichi Takamine and W. J. Carr, of New York; W. F. Whelan, of Buffalo; E. J. Ware, of Kansas City, and W. M. Grant, of Walkerville, Canada.

The dinner was given in the Hotel Cadillac, and the toastmaster of the occasion was J. C. Spratt, one of Mr. Helfman's oldest friends in the house and manager of the department of traveling service. The toast list follows: "My Secretary," E. G. Swift; "How I feel when I pay Helfman's dividend," George Hargreaves; "Things that have happened since 1884," L. C. Fink; "One of the near 25ers," J. E. Bartlett; "Back for a day with the Old Guard," W. F. Whelan; "The man who has quit having birthdays," S. H. Carragan; "Reminiscences," H. B. Mason.

In a way this banquet was a return compliment given by Mr. Helfman to the hearty send-off accorded him in very much the same manner a year ago, when a banquet in the same hotel was tendered him by his friends in the house just prior to his departure for a three months' tour in Europe. During the evening many sincere compliments were paid to Mr. Helfman's qualities of mind and heart, and his many abilities were singled out for enthusiastic praise. Telegrams were read from those unable to be present, and one came from President Frank G. Ryan, whose presence in the South prevented him from attending the dinner.

During the afternoon a set of beautiful silver tableware, comprising 54 pieces, was sent up to Mr. Helfman's house—the joint gift of the guests at the banquet. His office at the laboratory was also decorated with flowers in honor of his anniversary.

May Have Chain of Stores, But Not Now.

SYRACUSE, N. Y., April 10. Articles of incorporation have been filed by the Dwight-Nye Drug Company, capitalized at \$45,000, to take over the business of H. D. Dwight & Co., in the Bastable Theater building at South Warren and East Genesee streets. This store is very popular with theater patrons and does a great soda fountain business. The incorporation papers set forth that the company may operate other stores, but Frederick J. Nye, who is to manage the store, said the company would confine its business to Syracuse for the present. The change takes effect April 15. The directors are: Henry D. Dwight, Mr. Nye, Helen A. Nye, Louis P. Lang and Miss Emma G. Williams. Mr. Dwight will not take an active part in the business.

Jersey Druggist Retires After 30 Years.

Charles F. Wood, who for 30 years conducted the drug store at Lower Jamesburg, N. J., has sold to Hallam T. Koons, N.Y.C.P., 1901. Mr. Wood will take a much needed rest on his new, big farm which has six large buildings and is one of the ideal country places at Hightstown, N. J. Herman H. Breuer, Ph.G., was the broker.

View of the pharmacy of William E. Lee, first vice-president of the Philadelphia Association of Retail Druggists.

INJUNCTION AGAINST PRICE CUTTING VACATED

Manufacturers Will Appeal to Higher Court in Effort to Prevent Continuance of the Practice.

DETROIT, April 10.—Judge Murphy, of the Wayne Circuit Court, has handed down a decision in the case of the W. H. Hill Company vs. Gray & Worcester, denying the company's right to enjoin the defendant concern from cutting the prices on the former's products. Accordingly, the injunction granted by the Circuit Court about a year ago has been dissolved. The decision is of considerable importance, especially in view of the rate war that is now on.

The proceedings grew out of Gray & Worcester's action in cutting the price of a certain article manufactured by the Hill Company, from 25 cents to 20 cents, thereby terminating its agreement with the manufacturer. The latter, of course, refused to sell the firm any more of the goods, but Gray & Worcester managed to get them from a private source. Suit was then brought by the manufacturer and a temporary injunction was granted against the retail firm.

Attorney Arthur Webster, representing the defendant, contended that the agreement in question was in violation of the State Anti-Trust Law, and Judge Murphy took this view. The Hill Company will probably appeal the case to the Supreme Court.

Marquette to Have Alumni Association.

MILWAUKEE, April 10.—The first steps toward the organization of an alumni association among the graduates of the Pharmaceutical Department of the Marquette University were taken at a recent banquet enjoyed by 100 of the alumni at the Hotel Gilpatrick. J. G. Donnelly made a witty address on "Drugs of the Market." R. E. W. Sommers, dean of the Department of Pharmacy, spoke on the influence of pharmacy on general civilization. Other speakers included Rev. James McCabe, president of the university.

## BRANCHES HOLD HIGHLY INTERESTING SESSION

### Valuable Papers Read and Status of the Prescription with Respect to Ownership is Fixed.

PHILADELPHIA, April 7.—Representatives of the New York, Baltimore and Washington Branches of the American Pharmaceutical Association last evening attended the meeting of the Philadelphia Branch at the College of Physicians. The action of the business meeting as well as of the papers and the discussion which followed made it one of the most interesting meetings in the history of the organization. One feature was the report of the committee on the declaration of the prescription which had been appointed at the February meeting and which consisted of Prof. Joseph P. Remington, Prof. I. V. S. Stanislaus and Franklin M. Apple. Another important topic was the discussion on the proposition made by Martin I. Wilbert to organize the meeting into an organization of members of the American Pharmaceutical Association, the object of which would be to meet at Atlantic City during the convention in June of the American Medical Association.

The motion was opposed because it was declared that it might be construed as an indication of a lack of harmony between the Eastern and Western members of the American Pharmaceutical Association. It was decided to leave the matter of preparing a programme to the Atlantic City delegation, of which George M. Beringer is chairman.

Dr. Lyman F. Kebler gave an illustrated talk on the work he is doing as chief of the Drug Division of the Bureau of Chemistry, showing on a screen the various nostrums and dangerous patents which have been seized and put out of business by the Government since the passage of the Food and Drugs Act. The analyses of these specimens in nearly every case were shown on the screen directly beneath the preparation and were of particular interest to this large audience of professional and scientific men and women. Advertising claims in particular were exploited and Dr. Kebler told many amusing and some pathetic instances which had developed in the investigation.

George W. Hoover, chief of the Drug Inspection Laboratory at Washington, discussed "Supervising the Importation of Drugs." After reviewing the facilities and the scope of the bureau and its 21 branches he noted the changes which had taken place both in the quality and labeling of various products which are imported into the United States since the summer of 1907. Steady progress along these lines had been noticeable, he said, since the passage of the Food and Drugs Act. In detail he mentioned the adulterations that had been coming in and then the misbranding that was attempted when the Government officials detected these adulterations and put a stop to them.

"The Organization and Work of the Hygienic Laboratory" was most ably discussed by its chief, Dr. Murray Galt Motter. He told of the facilities and the workings of the divisions of pathology, chemistry and bacteriology and of the value of the bulletins on research that were being published. In this connection, he said that the digestive criticism of the last revision of the United States Pharmacopoeia was now on the press and would comprise a book of about 150 pages.

The papers were discussed by C. S. Brinton, C. H. Kimberly, Dr. Seneca Egbert, M. I. Wilbert, C. H. La Wall, J. P. Remington, I. V. S. Stanislaus, Jacob Diner, of New York, and Professor Hyinson, of Baltimore.

The report of the special committee on the declaration of the prescription was as follows:

First.—The prescription is an utterance of the prescriber who alone should direct and control its employment. It should, whenever practicable, carry the name of the patient and if a minor, the age in years and the date when written.

Second.—The pharmacist who prepares the medicine should retain the prescription for reference as a record of his services and for a certain limited period, not less than five years, for the protection of the prescriber, himself and his patient. The physician when delivering the written prescription should impress upon the patient that it is an order for medicine, subject to the following conditions and limitations.

Third.—The medicine prescribed should be supplied not more than once on the same prescription: (1) If ordered by the prescriber "not to be repeated" (N. rep.); (2) If containing medicinal substances commonly called narcotics or habit-forming drugs; (3) If called for by some person known not to be the original holder thereof; (4) A declaration to this effect should appear on the prescription blank over the doctor's signature.

Fourth.—No copy of a prescription shall be furnished to the patient (1) if the physician has declared such prescription not renewable; (2) if it contains a narcotic or habit-forming drug.

No such prescription should be copied upon the label. Where copies of prescriptions are furnished, they should be written on an especial blank, containing a declaration that it is a copy of a prescription which has been delivered to the original holder. The copy is made without recourse to possible error.

This report was accepted and ordered forwarded to the Council of the American Pharmaceutical Association with a favorable recommendation. Following the meeting, the members and their guests adjourned to the French Club, where a reception took place, followed by a luncheon.

### Pleased With Reception Given Baltimoreans.

BALTIMORE, April 10.—The Baltimoreans who attended the recent meeting of the Philadelphia Branch of the American Pharmaceutical Association speak in the highest terms of the reception accorded them and the hospitality extended by the Philadelphia contingent. They were royally entertained at dinner at the Philadelphia Drug Club and at supper in the French Club. The proceedings proved to be exceptionally interesting and everyone was glad to be there. The Baltimore delegation included W. A. C. Smith, of Sharp & Dohmer; Dr. H. P. Hyson and H. A. Brown Dunning, of Hyinson, Westcott & Co.; Charles L. Meyer and Dr. E. F. Kelly, secretary of the Baltimore Branch of the American Pharmaceutical Association.

### New Yorkers Entertained at La Club Francaise.

Members of the New York Branch of the A.P.A. who attended the last meeting of the Philadelphia Branch were Jacob Diner, George H. Hitchcock, Otto Raubenheimer, Dr. George C. Diekmann and Hugo Kantrowitz, of the *Apotheker Zeitung*. After the meeting and before leaving Philadelphia the members of the party were "lunched" at La Club Francaise de Philadelphia.

### New 19th Edition of United States Dispensatory.

A glance at the index of the new 19th edition of the United States Dispensatory shows an enormous number of subjects that are discussed in this work—some 20,000—and all of them are handled in a way that is authoritative and informative, the information being of just the kind needed in the every-day work of the pharmacist. The additions and corrections of the latest United States Pharmacopoeia and the National Formulary are inserted in the text, and every effort has been made by the authors and publishers to adapt the work to quick reference and to the need of the busy druggist.

This Dispensatory is a splendid example of the book-maker's art and the binding, width of page, style of type, paper, etc., are of a character that is in keeping with the scientific information presented. The book is a handsome imperial octavo in size, and can be had in any binding, with patent thumb index if desired. You make no mistake in purchasing this great work. Read the advertisement of the publishers on another page and write to your wholesale dealer or to the J. B. Lippincott Company, Philadelphia, Pa., for terms and information.

### The Unique Orange and Lemon Press.

The juice of citrus fruits is thought, by many, to be more refreshing than any other fruit in the world. To obtain the juice in the most satisfactory condition, however, it must be freshly expressed and for this purpose the Unique Orange and Lemon Press, manufactured by the Mosteller Manufacturing Company, 128 Indiana street, Chicago, Ill., is especially recommended. It is claimed that this little machine presses all the juice from lemons, limes, oranges, grapefruit, etc., retaining all the pulp and seeds and producing a pure, clear liquid. All parts of the machine coming in contact with the acid of the juice are made of aluminum and are non-corrosive. An illustration of this Unique Press appears in the advertisement of the Mosteller Manufacturing Company on page 36 of this issue of the ERA.

### Washington Druggist Will Install New Fountain.

A. T. Bronaugh, Seventh and P streets N. W., Washington, D. C., is putting in a new front in his store and giving it a general renovation. As soon as the heavier work is done he will install a Green counter dispensing fountain.

Too many drug trade reformers confine their reformative efforts to telling the other fellows how to reform.

**PATENTS, TRADE MARKS, ETC.**

**PATENTS.**

Granted April 6, 1909.

917,002—Robert Head, New York, N. Y., assignor by mesne assignments to National Lac Casein Company, Portland, Me., a corporation of Maine. Process of separating casein.

917,081—Berthold Laner, Paris, France. Cork-cutting machine.

917,096—Carl Mezger and Albert Weller, Frankfort-on-the-Main, Germany, assignors to Vereinigte Chininfabriken Ziemer & Co., G. M. B. H., a society of Germany. Theobromin double salts.

917,155—Harry E. Sanders, Zanesville, Ohio. Bottle-filling apparatus.

917,191—Andriaan P. H. Trivello, Scheveningen, Netherlands. Process for obtaining radio-active bodies from uranium or thorium, etc.

917,196—Harry R. Vanaman, Millville, N. J. Bottle cap.

917,344—John A. McNulty, Baltimore, Md. Bottle-capping machine.

917,502—Emerson H. Strickler, New York, N. Y. Process of making phosphoric acid and Glauber salt.

917,507—Otto G. Winckler, New York, N. Y. Veterinary medicine.

917,509—Frank O. Woodland, Worcester, Mass. Label-supply mechanism.

917,531—Peter Brown, Troy, Idaho. Retort for the destructive distillation of resinous woods.

917,646—George H. Newey, Winterport, Me. Bottle stopper.

917,665—Richard L. Sanders, Mobeetie, Tex., assignor of one-fourth to George O. Mathews and one-fourth to J. J. Long, Mobeetie, Tex. Bottle.

917,675—Genaro Sparano, Philadelphia, Pa. Bottle and stopper therefor.

917,694—Harold Wilson, Conneaut, Ohio, assignor of one-half to Frederick T. Roosa, Conneaut, Ohio. Combined bandage and dressing.

917,706—Henry S. Blackmore, Mount Vernon, N. Y. Formic-aldehyde containing composition and process of making the same.

**TRADE MARKS.**

Published April 6, 1909.

30,711—The Purrington Company, Northampton, Mass. Class 6. Tooth powder, tooth paste, liquid dentifrice, talcum powder, foot powder, bath powder, etc.

37,317—James A. Lane, Ukiah, Cal. Class 6. A remedy for consumption and catarrh.

38,561—Benedict Weissman, New York, N. Y. Class 6. Medicines to prevent venereal diseases.

31,131—The Allen & Hanburys Co., Ltd., Toronto, Can. Class 6. Cod liver oil and castor oil.

39,320—Fairfield Manufacturing Company, Inc., Guthrie, Okla., and Philadelphia, Pa. Class 6. Blood tonic for horses.

39,533—Amos H. Gottschall, Harrisburg, Pa. Class 6. Liniment, pills, salve, vermifuge, cough balm, a medicinal preparation for dyspepsia, azoe, etc.

39,779—Claus Julius Enebuske, New York, N. Y. Class 6. An antiseptic preparation in liquid form for the treatment of all kinds of skin irritation.

T. H. Newberry Vice-President of Navy League.

WASHINGTON, April 10.—Before sailing for Europe last week former Secretary of the Navy Truman H. Newberry, of Detroit, accepted the office of vice-president of the Navy League of the United States, succeeding William McAdoo, Gen. Horace Porter, former Ambassador to France, is the president.

# THE DRUG MARKETS

## LOCAL TRADE CONTINUES UNCHANGED.

Some Sections of Country, However, Show Improved Conditions—No Important Changes in Staples.

NEW YORK, April 12.—Trade locally continues quiet, but business with some sections of the country is improving; a better condition, however, is looked for as the season advances. There has been little of interest to note since our last report. Opium is a trifle easier owing to competition and citric acid is also lower for the same reason. Cube berries are higher. Balsam of fir, Canadian, is very scarce and very firmly held. Oil of cubeb has advanced owing to the advance in the price of cubebs. Cacao butter, notwithstanding the proposed increase in duty of the raw article is lower. Norwegian cod liver oil is steady at unchanged values.

OPICUM.—Primary markets do not furnish any information to justify a weaker market here and the lower prices reported can only be attributed to competition between importers. The arrivals in Smyrna for the week ending March 19 amount to 2012 cases, against 1354 cases for the same period last year. Total arrivals to April 9 amount to 2030 cases.

QUININE SULPHATE.—The market is unchanged with a fairly good demand for jobbing quantities. In Batavia on April 7, the monthly sale of quinine was held and 2400 kilos sold at florins 10.50, which is the same price as that realized at the previous sale. In Amsterdam on April 8, 1400 kilos of Amsterdam brand of quinine were sold at florins 10.82, which is a trifle higher than the unit realized at the previous sale, which was florins 10.80.

NORWEGIAN COD LIVER OIL.—There is a good demand at unchanged prices, but primary markets are not quite as firm as ten days since owing, it is believed, to better conditions in the Lofoten district. Cable advices give the results of the fishing up to April 5 as follows: In Lofoten, 15,200,000 fish, yielding 15,820 barrels of oil; in other districts, including Lofoten, 33,100,000 fish, yielding 32,215 barrels of oil. For the year 1908 to the same date the statistics were: In Lofoten, 12,600,000 fish, yielding 15,530 barrels of oil; in other districts, including Lofoten, 30,200,000 fish, yielding 37,000 barrels of oil. The total production of oil this year in comparison with the production last year in Lofoten is only 290 barrels less; and if the fishing continues good to the end of the season, the total production may reach that of last year, which was very large.

DANDELION ROOT.—This article may be affected by the new tariff. New shipments consisting of 4000 to 5000 pounds of choice quality are scheduled to arrive within a few days.

CUBE BERRIES.—The foreign markets are much higher and good berries are quite scarce. The price in our local market has advanced in sympathy, and prime, sifted and stemless are now held at 37c., and 38c. for powdered.

CASSIA BUDS.—This is one of the articles which is now free of duty under the present tariff, but the new tariff proposes a duty of 30 per cent which, if adopted, will increase the cost materially and advance prices accordingly. A shipment is on board a steamer soon due to arrive, and will be offered in lots of five cases of 66 pounds each at 23c. per pound for prompt acceptance.

BENZONIN, SUMATRA.—There is a limited spot supply and the market is firm with a fairly good consuming demand reported at figures within the quoted range of 31c. to 38c. per pound, as to quantity and quality.

CANADA BALSAM OF FIR.—Prices have again advanced and the market is much firmer owing to steadily diminishing supplies. Dealers in large quantities are now quoting \$7.00 to \$7.10, as to quantity, while the jobbing prices are \$1.00 to \$1.10 per pound.

THYMOLO.—The market is quiet and dull and a revision of prices shows a reduction to \$1.90 to \$2.00, as to quantity and seller.

VANILLA BEANS.—Good goods are meeting with an improved demand at unchanged prices, but the market is firm owing to reports of extreme drought in Mexico.

GUM ARABIC.—Sorts are again called easier at primary sources of supply, but spot quotations remain unchanged at

\$8.91c. for amber and 13c. to 14c. per pound for white, as to quantity.

CHICLE.—This article is firm with round lots of desirable grades reported scarce for prompt delivery. For prime Mexican in carload lots the nominal quotation is 49c., but for jobbing parcels the ruling figure is 50c.

CARDAMOMS.—There is an excellent consuming demand and quotations continue firm at 55c. to 80c., according to grade and quantity.

SHORT BROWN LEAVES.—This article is still held firmly at 31c. to 32c. for desirable grades, and the situation is further strengthened by reports from primary markets to the effect that as the season is now closed the exports show a shortage of well over 50,000 pounds, or about 25 per cent of the normal crop.

NUX VOMICA.—Markets abroad are reported higher and much firmer than for some time past and spot quotations in the local market are firm in sympathy at 24c. to 3c. per pound in large quantities. Considerable business, it is reported, has been transacted at the inside figure during the past week.

## London Drug Market

LONDON, April 3.—Business in the drug and chemical markets is slightly better, notwithstanding the near approach of the Easter holidays, and inquiries have been coming in more freely. As was not unexpected, makers of Morphine salts reduced their prices 3d. per ounce this morning, but at the time of writing the price of Codeine is unchanged. The London Opium market is quiet and easier. Camphor is firm and tending dearer; further business has been done in 1-ounce tablets at 1s. 8d. per pound and there is a scarcity of this size on the spot; 2½-pound slabs have been done at 1s. 7d. to 1s. 7½d. per pound. German refined has been advanced one-half-penny per pound but English refined is unchanged. Crude China is quiet but steady at 140s. per cwt. spot. Quinine is in much better demand and a fair business has been done for consumption from second hands at 7½d. per ounce for the German sulphate. Cod Liver Oil tends easier. Oil of Star Anised is dearer and 4s. 6d. per pound is wanted for spot. Cassia Oil is quoted at 4s. 6d. per pound for 80 to 85 per cent. American Peppermint Oil is very quiet at 6s. 1½d. per pound for Wayne County oil in tins and 8s. 9d. for H.G.H. Japanese demethylized is quoted at 4s. 9d. per pound. Essence of Lemon is quiet at 4s. per pound for good brands.

Oil of Bergamot is quoted at 18s. 6d. per pound. Citric Acid is dull and unchanged in price. Balsam Peru is dearer and business has been done at 7s. per pound. Ipecacuanha is firm. Cascarilla Sacrada has been in better inquiry and holders are not willing to sell below 37s. 6d. The supply of Asafetida on the spot is small and owing to troubles in Persia consignments are not coming in. At the Vanilla sales this week 440 tins were offered and the bulk sold at steady rates.

### Routine Matters Considered by Drug Trade Section.

Practically only routine business was considered at the meeting of the Drug Trade Section of the New York Board of Trade and Transportation on April 7. Thomas P. Cook, chairman of the legislative committee, announced that at the hearing before the Assembly Committee of the State Legislature on the Filley Bill, relating to weights and measures, it was brought out that the provisions in the bill conflicted with the National Pure Food and Drugs Law. The sentiment of the majority of interests represented at the hearing, said Mr. Cook, showed that the bill could serve no useful purpose and consequently was withdrawn. Mr. Cook also notified the members of the fact that the Heyburn Bill, relating to the "quarantine legend" of the Pure Food and Drugs Act and guarantees by the Government, had been introduced in Congress.

The topic of "Propositions to Promote Trade With Latin-America," which was to have been introduced by Mr. O'Neill, of Johnson & Johnson, was laid over for consideration at a future meeting, Mr. O'Neill stating that he was unprepared, having been absent from the city.

### Horse Medicine Fatal to Man.

WAUKESHA, Wis., April 10.—Because he took horse medicine by mistake, Charles Williams, aged 62 years, a wealthy farmer, is dead.

# THE PHARMACEUTICAL ERA

PUBLISHED EVERY THURSDAY

VOL. XLI.

NEW YORK, APRIL 22, 1909

No. 16

D. O. HAYNES & CO. - Publishers

90 WILLIAM STREET, NEW YORK

Telephone, 2457 John. Cable Address: "Era, New York."

## Western Office:

Room 500, Dickey Building, 40 Dearborn St., Chicago  
Telephone, Central 5885

## SUBSCRIPTION RATES.

United States, Cuba, Hawaii, Porto Rico, the	
Philippines, and Mexico	\$2.50 a Year
To Canada, postpaid	3.00 a Year
To Foreign Countries by Postal Union	4.00 a Year
Single Copies	10 Cents.

ALL SUBSCRIPTIONS ARE PAYABLE STRICTLY IN ADVANCE

Published every Thursday at 90 William Street, Borough of Manhattan, New York, by D. O. Haynes & Co., a corporation; President and treasurer, David O. Haynes; vice-president, Ezra J. Kennedy; secretary, Edward W. Drew. The address of the officers is the office of this publication, and the title is registered in the United States Patent Office.

Entered at the New York Post-Office as Second Class Matter

## Re Photographs for "Era Album"

### Illustrated Section

Each subscriber to The Pharmaceutical Era is entitled to representation in this work, and is invited to send us his photograph. We do not require a subscription from each partner and clerk. If the firm or proprietor is a subscriber, the other partners and clerks may have their portraits included for \$1.50 each. To secure all of the Album sections one must be a subscriber to The Era in his own name.

In sending photographs be sure that each one is distinctly labeled with the name, address, business, profession or occupation of the person, written clearly on the back of your photograph. A good plan is to write it on a printed label and stick it on the center of the back of your photograph. Here is a good specimen:

#### FOR ERA ALBUM.

Fred S. Rogers, Middletown, N. Y.

McMonagle & Rogers,

Ex-Pres. N. Y. State Phar. Assn.

When additional photographs of partners and clerks are sent, each one should have written on it the name of the subscriber who sends it, as well as the name of the person in the photograph.

### Cabinet Photographs Only

The style of photograph we require is the so-called "cabinet" size, with the head about two inches long. If other sizes are furnished they interfere with our plans for keeping the faces uniform, also prevent us from classifying the cuts by localities.

In view of the great amount of work we are assuming, to have each of our subscribers properly represented in this Album, we feel that we are not asking too much when we request each subscriber to supply us with the size and kind of a photograph which will facilitate our work and best enable us to do him credit.

In forwarding photographs for the Album, see that they are distinctly addressed as follows:

THE PHARMACEUTICAL ERA,

For Era Album

90 WILLIAM ST., NEW YORK.

## PHARMACY BILL JUGGLING AT ALBANY.

Nobody seems to know what is going to happen with pharmacy legislation at Albany. One day the All-State Bill seems to be on top and the next day the Conklin Bill is passed in the House. First Governor Hughes is said to favor one bill and soon afterwards he is declared to be unalterably opposed to it, favoring another bill. Now the Manhattan Pharmaceutical Association, which recently raised considerable dust by ignoring the New York State Pharmaceutical Association in endorsing the Conklin Bill, has again jumped into the arena, recanted as to the Conklin Bill and passed a resolution approving the All-State Bill when the latter has been amended to suit the wishes of such of its members as are opposed to the appointment of any members of the old board upon the new board.

Underneath all this juggling there appears to be the same old story, the persistent seeking for public office by persons who place their own preferment above the benefits that may come to pharmacy through an orderly, decent and non-political reorganization of the State Board of Pharmacy. If the new friends of the All-State Bill are as sincere as they profess to be they will withdraw the Conklin Bill, which they formulated and fathered, pass the All-State Bill and then, with other members of the State Ph.A., take their chances at the proper time for appointment to office.

## A REMARKABLE COURT DECISION.

If the New York Court of Appeals decision in the case of Grocer Gasau is what it appears to be on its face there is presented the most remarkable situation of a grocer being permitted to sell pharmacopoeial substances of impure, adulterated or otherwise deficient standard without penalty under the State Pharmacy Law, while a pharmacist can be punished for selling the identical goods. While the court makes comparisons showing the absurdity of applying the tests and operation of the pharmacy statute to chemicals used in the manufacture of gunpowder, for instance, even the layman will be puzzled to satisfactorily apply the precept to cream of tartar, for, as the New York Times pertinently inquires, Why should adulterants, whether dangerous or inert, be permitted in chemicals that are to be ingredients of food any more than they should be tolerated in chemicals or other substances that are to be used in the preparation of medicines?

It is noteworthy that all of the inferior courts took the view that the substances, not the salesman, were on trial as to purity and potency, which seems to be

the rational principle of common sense and of law. On the theory evolved in the high court, however, it would be possible to upset many laws which deal with the commission of crime and set up classes as to who may or may not legally commit murder or other offenses, the crux being in who does it, not what is done. It is possible that the issues may not have been presented to the high court in the same fullness of view that obtained in the lower courts, but whatever the reason it is regrettable that such a decision should have found its way into the court records.

#### STANDARDIZATION OF ANTITOXINS.

Gratifying evidence is shown in the last annual report of the Surgeon General of the Public Health and Marine Hospital Service of the progress which has been made in the manufacture and sale of viruses, serums and toxins, the continued improvement of the products being of a nature to call for official commendation. Especially in the matter of the standardization of diphtheria antitoxin has the advance been notable and the report states that it has now become a matter of routine in the Division of Pathology and Bacteriology of the Hygienic Laboratory. Packages of diphtheria antitoxin purchased in the open market, when examined for both purity and potency, have shown that the product on the American market "is of good quality, contains at least the strength claimed for it and may be relied upon to produce its maximum effect if given early in the disease."

Besides commending the American manufacturers of antitoxins, the report disposes of numerous cases which were brought forward by physicians who sent samples to Washington for examination in the belief that the antitoxin had been responsible for untoward symptoms in patients. The investigations in the Hygienic Laboratory demonstrated that the serums were free from bacteria contamination and the unsatisfactory results must be attributed to other causes than the use of the remedy. The report is a subject for congratulating our manufacturers of products of this description.

#### MUST STUDY THE PHARMACOPOEIA.

Dr. Kepler's communication, printed on page 384 of this issue of the ERA, presents in a forcible manner the necessity for the study of the Pharmacopoeia and Formulary by pharmacists if they would expect the co-operation of physicians in discouraging the use of proprietaries and other remedies. Dr. Kepler's experience, as narrated by him, serves to show what many enthusiastic propaganda workers have discovered elsewhere in their efforts to interest physicians in a return to the old method of writing prescriptions.

Doctors cannot be expected to take much interest in the propaganda campaign if they are to have experiences similar to those of the Boston physician and the pharmacists may just as well come to a realization of the fact now as at some future time. Pharmacists must know their own profession and practice it before they call upon others to recognize methods

and practices with which they are themselves only slightly, if at all acquainted. Unfortunately there are too many druggists of the kind encountered by Dr. Kepler and they form a serious incubus to progress. They ought all to awaken, brush up in their professional Bible and get in the front ranks of pharmaceutical advance.

#### THE WORSHIP OF STRANGE GODS.

Some telling points were made the other evening at a meeting in Philadelphia when Professor Remington replied to the charge made by a physician that the "pharmacists had captured the Pharmacopoeia" and urging the medical men to go to work to "recapture it." Instead of capture, it was plainly a case of desertion and as the professor naively calls it, "a wandering away" to become "worshippers of strange gods." The pharmacists merely went to the rescue of the precious book and preserved its integrity and life.

In the discussion it was made plain that this was the real situation, for had it been otherwise the extensive propaganda which is now in progress to educate physicians in the uses of the Pharmacopoeia and the National Formulary would not be necessary. The meeting showed an awakening of medical interest in the U.S.P. and its preparation, as well as its method of publication and probable future, that augurs well for concerted support of doctors and druggists in any movement to improve and render the book more useful to both professions.

#### NO CANADIAN STAMP TAX IMPOSED.

Considerable uneasiness and uncertainty manifested in certain quarters recently regarding the supposed imposition by the Canadian Government of a stamp tax upon proprietary medicines was without justification, for the new law which became operative on April 1 does not impose such a tax.

The report grew out of the existence of what was called a "special exemption stamp" which was used by pharmacists and others to label goods on hand on April 1, showing that they were exempt from the operation of the law. All there was of it was a legend to show that the goods were on hand when the law became operative, a provision similar to that which had to be complied with in this country when the Pure Food and Drugs Act of June 30, 1906, went into effect, except that at that time rubber stamps and ordinary labels were used instead of special exemption stamps purchased of the government, as has been the case in Canada.

Burning of the mortgage of the Brooklyn College of Pharmacy marks another milestone of educational progress in pharmacy in New York. Moreover it is an enduring monument to the devotion, energy and ability of the men who have been responsible for its success. The event, as described in our news columns, was a memorable one not only for the participants but for the historians of American pharmacy.

Membership committee of the New York State Ph.A. is working hard to recruit the ranks. A written appeal has been sent to all the unaffiliated pharmacists in Buffalo and Rochester calling their attention to the recent propaganda meetings held in those cities and urging them to give the State Ph.A.

needed moral and financial support in the great work which is being done for the benefit of retail druggists. Every pharmacist should belong to his State association.

Secretary Walker, of the Texas State Ph.A., lapses into picturesque reverie in pointing out the beauties of San Antonio, where the association will meet June 15-16. "Everything from a hot tomale to a Government post" will be as free as air to the members, in addition to the benefits of ripe pharmaceutical experience and cultured training which will be in evidence at the business meetings.

Illinois paper refers to a druggist as "being again at the helm of his drug store." A diagram and picture of the "helm" ought to be supplied, so that less fortunate druggists may see what a drug store helm looks like. Such a curiosity ought not to be hidden in Mound City.

A true salesman is never a tough citizen.

As a majority of the readers of the ERA already know, Albert Plant, senior member of the firm of Lehn & Fink, wholesale druggists of New York, has always taken a great interest in legislative matters pertaining to the drug trade. It is but a few months ago that he presented at the tariff hearings held in Washington the only argument before the Ways and Means Committee of Congress in favor of reduction in import duties. He argued against the present tariff schedule because he believed that it imposed upon many articles specific duties which are abnormal and prohibitive in most instances, articles, which in his opinion, could be put into the same general class. He said that the entire schedule, so far as it affected drugs and chemicals, "is antiquated. It is not fair, it is unjust, and it is oppressive to the consumer, and the consumer, in most instances, means the retail druggist." He also took an active part in the work which preceded the enactment of the Federal Food and Drugs Act, and his voice has been heard on nearly all of the important legislative questions that have come before pharmacists in the past 20 years.

As a member of the National Wholesale Druggists' Association, Mr. Plant has filled many important offices, being at the present time the chairman of the board of control of that organization. At the last meeting of the association he emphasized, in one of his characteristic speeches, the importance of drug interests undertaking to secure proper representation in the United States Pharmacopoeial Convention, stating that the delegates to be selected by the incorporated bodies entitled to such representation should be individuals "who are not merely academic, but who are broad-minded, representative men, who will properly safeguard drug interests, not mere faddists, osteopaths and others, so that the interests represented shall receive due consideration." This statement reflects the thought of one who has studied the subject from all points of view, and it is perfectly safe to say that Mr. Plant's conclusions were those of all of his hearers.

It would be difficult to enumerate the various organizations to which Mr. Plant owes allegiance or to which he is a contributing member, but his name will be found on the rosters of nearly all of the associations identified with pharmacy—the A.Ph.A., the Society of Chemical Industry, the New York College of Pharmacy, and the Drug Section of the New York Board of Trade and Transportation. As a member of the New York Section of the Society of Chemical Industry, he has strongly favored the movement to secure the next meeting of the International Congress of Applied Chemistry for New York. As is well known, this organization will hold its seventh convention in London, from May 27 to June 2, under the patronage of King Edward VII and the vice-patronage of the Prince of Wales. Mr. Plant, who is at present traveling in Europe with his two daughters, expects to attend this

gathering of distinguished chemists and will do his utmost to secure the next meeting for America. Before his return he expects to visit Italy, although most of his time will be spent in England. This previous trip across the Atlantic—the 20th—was made nearly four years ago.

As stated above, Mr. Plant is the senior member of the wholesale drug firm of Lehn & Fink, his partner being his brother, Joseph Plant. This firm has the reputation of being one of the most progressive in the drug trade, its large and recently constructed building at 120 William street, being indicative of its business ramifications which extend all over the United States and to many foreign countries. Albert Plant has been connected with the business since 1877, when he began as a boy doing his daily duty to the best of his ability. That prosperity came his way is evidenced by the fact that in 1886 he was admitted to the firm, becoming its head in 1898. Success has been his because he deserved it.

Dr. Charles L. Dana, of New York, declared before the American Academy of Political Science recently that alcohol is a direct cause of insanity in the general population in about 12 to 15 per cent of cases. It is an important associative cause in about one-third of the cases of paresis, he said.

An active educational propaganda against the use of alcohol by persons under 30 years, he continued, would do more good than attempts to eliminate it. Almost all cases of drunkenness and dipsomania, he said, developed before the age of 30 years.

Leipzig is the first German city to inaugurate a system of bicycle messenger girls. They are dressed in a uniform of red, trimmed with gold braid and gold buttons, and wear their little messenger caps at the dangerous angle of 45 degrees. The hat is held securely by the regulation band which passes under the chin, and also does away with the necessity of hat-pins.

Addressing about 1000 people at a union meeting of the Christian Church at Walla Walla, Wash., Dr. Lyman Beecher Sperry declared that the average life of the human race possible by right living can be extended from its present 40 years to 150 years, and he elaborated his theory in detail, naming the cause that has brought about what he termed physical degeneracy in the race, including intemperance and worry.

"The last time I worried," said Dr. Sperry, "was when the Russo-Japanese war broke out. I feared that that little nation just awakening into consciousness would be crushed by those Cossacks and annihilated. Then I thought me that I was not called upon to settle it and that it would have to be left to the Japs, the Russians, God and Theodore Roosevelt, and that they would bring it out all right."

Frate Father—It beats all where my umbrellas go to. I left one in the rack last night, and now it's gone.

Willie—Alice's bean has got it.

Alice—Why, Willie! The idea!

Willie—Well, last night when he was going home I heard him say that he was going to take just one.

It has long been known that milk may be a vehicle for the diphtheria germ, but eggs have not until recently been suspected of having any part in the communication of this noisome malady. A recent number of the London *Lancet* contains a startling communication from Dr. Sambon, one of the professors in the London School of Tropical Medicine, in which it is shown that fowls as well as birds are subject to diphtheria and that eggs often contain virulent germs of this disease and may easily be the means of spreading the disease. The doctor claims that he has even found active diphtheria germs in an egg at his own breakfast table.

In view of these facts, says *Good Health*, it is apparent that

ALBERT PLANT,  
of New York.

eggs must be invariably cooked to avoid the danger of infection. Raw eggs are unquestionably quite as dangerous as raw milk, or possibly even more so. The egg is doubtless much more often a source of serious illness than is generally supposed. A stale egg or a sick or infected egg may be the cause of sudden nausea, vomiting and purging, the real cause of which may not be suspected. Certainly the egg is very far from being the safe and innocent food which it has so long enjoyed the reputation of being. Various species of germs have been found inside the shells of eggs which were apparently perfectly fresh. It is known that germs may be picked up and included in the egg during its transit along the oviduct of the fowl and that germs may penetrate the egg after it is laid.

"Aw, let's drop the argument."

"Why?"

"I've sprained my brain."

"How?"

"Trying to follow your crooked reasoning."

One of the most interesting efforts in education today is the school at Overbrook, Pa., which represents the greatest achievement thus far in fitting the blind child to overcome his handicap and to take his position as a useful citizen in the world. The story of Overbrook and of the New York Association for the Blind, as illustrative of "The New Basis of Work for the Blind," has been told for the *May Century* by Samuel H. Bishop, who shows that this new basis, and the fundamental inspiration of all the work at Overbrook, is hope. The concrete results of this rapidly broadening work both at Overbrook and in New York make interesting and inspiring reading.

"If a man is naturally bad, education won't make him better."

"No, but it will help him to keep out of jail."

"Those ladies who come here every Sunday afternoon to hold religious services are very kind," said the man in the hospital ward who was convalescing from typhoid fever, "but I wonder if they ever give any thought to the hymns they select. Two or three times a week something is carried out of here covered with a sheet. We hardly need a town crier to tell us that in the midst of life we are in death. A good part of the time it's hard to think of anything else. On Sunday afternoons, when we've listened to 'Nearer, My God, to Thee,' 'I Would Not Live Always,' and a few more hymns like that, we are so lonesome that indign wouldn't make a mark on us. It's an actual physical detriment. There used to be hymns that would brace a fellow up."

"It's lucky for us the organ grinders are more cheerful in their selections. A few yards of rag-time are as good as a tonic."

"My parents used to threaten to beat some sense into my head."

"Those idle threats that parents never carry out should be discouraged in every possible way."

"I call the whole idea a bare-faced prevarication," sneered the razor-man sharply.

"Such methods are not calculated to throw dirt in any person's eyes," blustered the talcum-powder salesman.

"Why, it is the essence of narrow-mindedness," declared the man with the sample case of extracts, with a show of strong feeling.

"It is a clean case of open violation of the American Constitution," frothed the soap drummer.

"Don't get a hot-box, fellows, what is the cause of all this incompatibility, anyway?" inquired the representative of "The Strongest Spices," who had just dropped into the smoker at the last station.

All eyes turned reproachfully upon the "Yellow Star Axle-Grease" man who was entrenched behind the back of a seat. Only his head showed, and with the dusky-red of his cheeks gleaming through a shiny coat of tan, the onlookers were strongly reminded of a baked apple.

"Wall," he explained with a grin. "I had no sort of notion of raisin' a cyclone in this here peaceful environment, but jest fer the sake of sociability I told the gentlemen as how, out our way it was proposed, taint no law yet, to class all traveling salesmen with itinerant vendors, an' tax 'em accordin' and

oblige 'em to wear a band on their hats, sayin' as how their license was paid, an' they was free to be turned loose, an' they all tharted right up. If I had a-been in an automobile garage I should a-been scared. To hear 'em a person would suppose they had been offered a personal indignity, instead of a distinguished mark of government approval. Next stop is where the 'Yellow Star' beams temporarily. So long, pards." With this lubricating explanation and another illuminating grin he rolled out of the car.

"Pa," asked little Willie, "what does 'food for the gods' mean, anyway?"

"Probably," replied his father, who was a patron of the drama, "it means peanuts, plug tobacco and such things."

Cancer may be effectually cured, according to an address by Dr. James G. Mumford recently at the Harvard Medical School.

"Cancer is incurable," he said, "only if you make it so by delay. It is readily curable if undertaken by a properly qualified surgeon. Patients come too late to the surgeon, partly because they are ignorant. The early symptoms of cancer are trifling. A slight, persistent sore on the tongue or lips; a painless lump in the breast; an occasional slight hemorrhage; a slight persistent dyspepsia, which does not yield to treatment, such are the symptoms of early cancer."

"Another important factor is the patient's age. Cancers rarely occur before the age of 35. They are not common before 10. Cancers in the young are more serious than in the old. Those of us who are in the middle period of life must not neglect apparently trifling but persistent sores, swellings and bleedings."

"A few words as to remedies other than the knife. The X-rays have been found to have a certain value, and splendid work in this field has been done in the hospitals of Boston. The radium rays have apparently proved even more effectual than the X-rays, but the radium method, because of the expense of radium, is not yet very practical."

"Heat expands things."

"I've often heard of people contracting a cold."

A chemical discovery which is expected to make wood pulp and paper products many times more plentiful and much cheaper than they are at present was recently announced at the Minnesota State University in Minneapolis.

The discoverer is Dr. George B. Frankforter, professor of chemistry, who has worked on the process for more than 12 years. The discovery makes possible the manufacture of paper from fir trees, sawdust and waste timber.

The pulp for paper at present is made only from spruce. The supply of fir is 100 times greater than the supply of spruce; and Dr. Frankforter and those associated with him say the new pulp process will be more economical.

As proof of the value of his discovery Dr. Frankforter shows a table recording his experiment with one cord of fir wood. The wood cost him \$7.50, and from it he obtained wood pulp worth \$39, turpentine worth \$41.60 and by-products of a lesser value. The waste that is now burned or thrown away, Dr. Frankforter says, can be used as well as the fresh cut wood.

Mrs. D.—A man hates to explain a hockey game to a girl. Mrs. W.—But he will spend three hours explaining to his wife how he didn't play poker.—*Trenton Times*.

In the courts of Venice, when a prisoner is about to be condemned to death, a tall and ghostly looking individual, dressed in a long, black gown, walks majestically to the center of the court room, bows solemnly to the judge, and in cavernous voice pronounces the words, "Remember the baker!" Then he bows again and stalks away, says the *Detroit Free Press*.

Three hundred years ago a baker was executed in Venice for a crime of which he was not guilty. When his innocence was established the judges who condemned him gave a sum of money to the city, the interest on which was to be devoted to the setting up and perpetual burning of a lamp, known as the "lamp of explanation," in the palace of the doges.

The clerk who does his own work well has no time to criticize his employer's methods—nor reason to.

## The Capacity for Economy.

By Emma Gary Wallace.

When one of our great American cities was yet a thriving overgrown town just commencing to send out ambitious suburban feelers in every direction two men, each unknown to the other, reconnoitered for the most promising drug store location.

By the same course of reasoning both decided that Elmwood had a future. That because of the order and coherence of its mapped out plans, its natural advantages and its exceptional location, it was sure to expand healthfully and at no distant time become an integral part of a great and flourishing city.

On the broad central avenue, which was the main artery of the local business life, each secured a

corner store on the same side of the street, and as luck would have it exactly one short block apart. Here, with a happy college life just behind, a hopeful bride-wife at hand for cheer and counsel, and an untried future ahead, the young proprietors opened their respective stores in a quiet, unostentatious fashion, in the early summer. The fan-fare of advertising trumpets, free sodas and open house were not as yet demanded by an exacting public, although the essentials of ultimate success were as fixed in that day as in this.

Each man felt a bit resentful toward the other because of his invasion of what he considered his especially pre-empted territory, consequently there was no exchange of courtesies, and none of the benefits of agreements as to prices and policies.

The proprietor of the Up-the-Street store was somewhat worried over the narrow cash margin left after his business had been launched and he talked the situation over very frankly with his little partner. She had come from a peculiarly sheltered home, but the cool, keen judgment which he knew her to be capable of exercising had given him profound respect for her comprehensive grasp of things. As she had been deeply interested in the purchase of stock and fixtures and in the placing of the goods so that every dollar's worth should have the effect of three, and had opened a simple set of books to keep close tabs on the income and the outgo, she was at least in possession of the facts governing the case.

### Facing Crisis as Winter Approaches.

After six months of a fairly good opening trade they sat down one rainy evening to not only face, but to solve the problem of meeting the winter's maturing bills on a probably decreasing volume of business. The country was in a condition of doubt and depression following a chance in the political administration and a spirit of cautious conservatism pervaded the atmosphere.

The winter would tell the tale. It was the time-log upon which the teeter-board of their fate would balance up or down. If business could be increased a little, they would go up slightly, or even if the weekly average, already reached, could be maintained, they could with economy preserve their balance, but if it dropped ever so little their credit would be seriously strained. They had reached a crucial point and they knew it.

To them, the solution seemed to lie in the Wise Expenditure of every dollar of their money, the best possible use of every hour of their time, and in every effort to increase their clientele of customers. They determined to add to the brilliancy of the window lighting, to introduce an extra line of attractively priced fancy goods, and to let people know about it. Hot soda was a new idea. They gave a number of surprisingly good drinks with the most meager equipment, and they let folks know that, too. In fact they kept right on doing things and letting people know that the best and most up-to-date service could be had right at home.

### On the Watch for Selling Suggestions.

They read every business circular that came to them eagerly, because many of them were prepared by highly paid experts, and they gleaned many a valuable selling hint therefrom. They

read their one business journal from cover to cover. They made every number pay them at least the value of the entire subscription, because they read receptively, measuring themselves, their methods and their results by its standard of progress and wisdom. They did not bother their heads as to whether it fitted some one else's case, but they were anxious to know where and how it fitted them.

They took pains to serve every one promptly and to either send medicine exactly as promised or to offer a truthful explanation of inability to do so. If the patient's need was imperative this gave opportunity to go elsewhere or for the physician to come to the rescue and to use something else, even if temporarily. The doctors soon remarked upon this conscientious avoidance of delays in the new druggist's service.

The children were not especially mindful of the drug store man, but they loved the "drug store lady." One came in one day and eyed her curiously.

"What is it, little one?" was the kindly inquiry.

"I was jes' wonderin'," the tot returned, "whether youse was goin' to stay here or not. The new barber is shut up, an' the peanut man has went, an' Ma, she says, you folks'll soon peter out, too."

The drug store lady laughed.

"Run right home, childie, and tell your Maumma," she said heartily, "that we 'us have come to stay."

### Business Increases Faster Than Expenses.

So they had. When spring came, they found that while they had increased their running expenses somewhat, that on the other hand they had increased their volume of business 20 per cent. The bills had been promptly met and the business was rolling along merrily. To be sure everything had been made to count for the most. Heavy paper and coarse twine had been saved and a regular place assigned for them. Cloth sugar bags were ripped, not cut, then washed and used for coarse strainers or dusts.

Near them was a great manufactory of delicately poised weighing machines, and they knew that these people swept many of their rooms daily, and washed the sweepings to recover the brass filings and clippings. Small economies increased the ratio of profits by lessening the expenses.

Economy of time was practiced by having the stock and working utensils in the most convenient places and by always having them in those places. Manufacturing was started in ample time to replenish the stock. There was no one to borrow from in an emergency and it taught foresight. Outside business which could as well be attended to in half a day was not allowed to spoil a whole day. Important business papers were kept in fire and burglar-proof quarters, and in fact, all reasonable precautions taken to make the most of one day and to insure the security of the next. In every particular they strove to live their motto of Wise Expenditure.

### Approaching the Rocks of Ruin.

The Down-the-Street proprietor watched his neighbors with jealous eyes. He, too, was beginning to feel the rub when the disagreeable fall weather set in. He thought probably that the youngsters up the street were too addle-pated to recognize an emergency when they met it. He was too proud to acknowledge to his wife that he was putting in to a narrow channel with dangerous rocks on either side. What did a woman know of such things? Her sphere was the smooth and easy one of domesticity.

One day he went home unexpectedly early for his mid-day meal and found her working on a variegated assortment of store neckties. He pretended not to notice them or her apparent and almost apologetic confusion, but he went back to the store and looked over his assets and liabilities and decided that the situation called for the Strictest Economy.

Accordingly, he turned off all the window lights except one at each end of the straight chandelier, which was shaped like an inverted letter T. He cut down his orders and omitted articles called for but occasionally. He refused to listen to the different salesmen with their varied lines of holiday goods, arguing that times were so hard that people would not buy and the left-overs would more than devour the profits.

He failed to renew his subscription to either of the two trade journals he had taken, declaring to himself that they were not much good anyway, being written and printed for the other fellow evidently, as nothing in them ever struck his case—even when he did read them. He closed his little single draught-arm fountain, and rather regretfully turned off the

silvery spray which had fallen continuously upon the form of the gay, dancing nymph beneath the oval glass on top, heeding not her look of dry-eyed reproach.

### Prescriptions Few, Doctors Seldom Call.

The errand boy was an unwarranted extravagance and he was discharged. Medicine promised at a certain time was frequently hours late. If an ingredient called for was not on hand and had to be obtained, neither patient nor doctor received any explanation. He feared they might think his stock incomplete. Some showed immediate irritation, more did not, but gradually the prescription business fell off and only rarely did a doctor drop in for a friendly chat.

Small economies were not practiced for they would take the time of a high-priced man, and that clearly did not pay. The little partner in this home, now openly made neckties and turned her profits into the household treasury. It was a source of revenue not to be scorned, for instead of getting them all out and ready to put together from a firm which furnished material easily worn and frayed and the sloziest kind of lining, she purchased closely woven, durable silk and firm linings and made them from start to finish. She added a distinctive name, "The Madewell," and secured a regular outlet in a wholesale store in the nearby city, receiving a fair profit on both time and goods. Clearly she was not entirely devoid of business ability.

The spring came and found the Down-the-Street proprietor barely solvent, even with the quiet help which he received. He had practiced what he considered the Strictest Economy.

Time passed. The city and its suburb became one; the latter grown lusty with well-to-do homes, fine public buildings, extensive parks and a prosperous business section.

### A Contrast of Success and Failure.

The Up-the-Street pharmacist had kept step with the rapid march of events, and was genial, successful and free from the tell-tale lines of worry. The best of help surrounded him. He considered inefficient help an unsatisfactory expenditure of good money. The personal, human interest he had always taken in his help and the absolute fairness with which he had treated them, had established hearty co-operation and secured long terms of valuable service. The numberless exacting details of the business were shared or entirely attended to by others, although he maintained a general oversight, yet ample time was gained for sufficient leisure to attend to the larger issues.

The necessity for the active assistance of his little partner long since passed away, yet she maintained that best of all interests—a genuine heart interest, which anticipated the time when the stalwart son, and the studious daughter would share in the expanding business, so splendidly established on lines of strictest integrity. The Up-the-Street store was an up-to-date one in the best sense of the word, and that through the policy of Wise Expenditure.

The same sign still hung above the store Down-the-Street, although the dancing nymph was silent summer and winter now, staring stonily at antiquated fittings, cracked show bottles, an almost customerless and stockless store, and a furrow-lined, white-haired man, who still amidst his decaying surroundings bore the courtly aspect of more prosperous days.

### Pathos in the Picture.

There was no help, and meals were taken from the manufacturing table in the dusty laboratory. Behind a dingy curtain a small sleeping apartment could be seen.

His single specialty—a really worthy tonic—was advertised pathetically by pasting one of its cheap labels over the name of some pictorially advertised remedy.

To all purposes and intents it was the Down-and-Out store and still he lingered, without complaint or outward show of bitterness.

A small patrimony and the sale of the necktie business had enabled his wife to purchase an interest in the company owning the building, barely sufficient to give him a rent-free tenure for life. It was the best she could do, even with her unbounded loyalty. Care and midnight oil had robbed her of youth and hope and then silently the White Death had crept from the ever-present shadows and claimed another victim. The interpretation of Strictest Economy had indeed been too lavish, for upon its altar had been laid success, happiness, and human life itself.

Economy may mean expenditure, and vice versa, expenditure—Wise Expenditure may be the Strictest Economy.

## Sunlight, Twilight and Dew.

By Joel Blanc.

### The Man Who Laughed.

It was nearly daylight of the morning after election when the druggist entered his room. A voice from the bed asked: "How was it, John?"

"Hullo, Mother! You awake? Oh, the Prohibs swept the county. They intend to make it as dry as Sahara. But the law allows doctors to write prescriptions for the stuff and I suppose that old Doc Boozer and young Doc Graball will get rich—but we have never sold the stuff and never shall."

"But won't it hurt us, John? Suppose some of our good drug customers want you to

sell them liquor, what will you do?"

"Let 'em slide, Mother; let 'em slide! Don't you worry. I'll turn huckster and peddle parsnips before I'll sell booze—I always did think there was money in parsnips." With a hearty laugh the druggist started to disrobe.

The day after the saloons closed, one of the druggist's oldest and best patrons presented a "prescription" (?) for a pint of whisky. The druggist handed back the paper and said: "Sorry, but I haven't a drop in the house. Not sorry that I do not sell it, but sorry that I am expected to."

"Look here, John, I have given you my drug business for over ten years. I have used whisky for twenty years and have never been drunk. Do you expect me to swear off now, just because the cranks have shut up the saloons?"

"I know you are a good man, a good husband and father, but that is not the point. The law is to stop the liquor business in the county and not to transfer it from saloons to druggists. I have been in business for fifteen years without becoming a law-breaker. If I broke the spirit of the law to fill that fake prescription, could you trust your child's life in my hands the next time it was sick and needed medicine? But say, friend, let us not quarrel. Come have a soda. Soda is wetter than whisky and it is my treat," and with a cheery laugh, the druggist led the way to the fountain. In similar manner he handled a number of whisky applicants during the day.

The next night, about a dozen men entered the store in a body. They were all prominent citizens, but several of them were regular patrons of the druggist's rivals. Some of them were known as militant "drys" while others were prominent among the "wets." The druggist was astonished to have each man hand him a whisky prescription, but he did not lose his good natured nerve. Holding the prescriptions in his hand, he said: "Gentlemen, why don't you chip in and get one prescription for a barrel? It would be cheaper. I'm still doing a legitimate drug business at the same old stand, with soda on the side. Come, I'll set up the soda for the crowd—what'll you have?"

Then the man who acted as spokesman said: "John, some of us are 'wet' and some are 'dry' and we are opponents on the prohibition question. But we agree that the issue should be tried out on the square. We heard how you were handling the matter and we came to try you out. 'Wet' or 'dry,' we are all with you, John, and we are going to help you prove that a real drug store can be profitably run in a 'dry' town."

And prosperity continued to smile on the man who laughed.

### The City Beautiful.

We were strolling along a street in the beautiful city, Mama and the little fellow and I. As Mama pointed out the beauties of our surroundings to the little chap, I walked on, wrapped in reverie, my memory carrying me back to the years of my wanderlust, when I visited the city frequently. Raising my eyes I saw approaching me a tall, immaculately garbed, fine-looking man whose eyes met mine. His face was unfamiliar, but some strange, ethereal vibrations seemed to unite us. As we reached each other our hands, which seemingly of their

## THREE ACTIVE MEMBERS OF N.A.R.D. PROPAGANDA COMMITTEE, INCLUDING NEW CHAIRMAN.

FRANKLIN M. APPLE, Philadelphia,  
New Member N.A.R.D. Prop. Committee.

IRA B. CLARK, of Nashville, Tenn.  
Member N.A.R.D. Propaganda Com.

F. W. MEISSNER, Laporte, Ind.  
New Chairman N.A.R.D. Prop. Com.

own volition, were outstretched, the words came, "Meat?" "Joel!" With the hand-clasp there came to me an emotion such as I had never before experienced. The pressure of his palm, the light in his eyes, convinced me that my emotion was but a likeness of his own. As we gazed into each other's faces it seemed as if we had only parted yesterday, but in truth, the parting was over twenty years ago, and we are only entering life's twilight now. Only when my eyes turned and rested upon the loved faces of wife and child did my thoughts come back to the present and time again become measurable.

"Who was he?" My own dear chum, my inseparable companion during the brightest five years of my boyhood. The dawn of manhood spread our paths apart and kept them divergent for twenty years of wandering through the dark valleys, over the bleak mountain tops and along the sunlit plateaus. But time means nothing, for we are chums again, just as though we had never parted. Such is friendship.

His nearness to me seems to have made the glory of friendship more real than it has ever been before. I realize that the distance and time annihilating vibrations that kept him and me united in sub-conscious mind, unite me to many more, to friends less old, but no less dear. To many of you druggists who are scattered over this broad continent. From the backward gaze I turn and look ahead and wonder if, after another twenty years, when we are old, if you and I, my friend, my reader, shall meet again. Even though the distances shall never again be spanned by material transit, we are and always shall be friends, friends united by that matter ignoring time-conquering emotion that knows neither distance nor years.

Thus, as we dwell in friendship dwell in the City Beautiful. Whether blocks, or miles, or States, or continents shall measure the material distance between friends, the true spirit of fraternal love makes of all the earth and all the realms beyond, one City Beautiful—and its name is Friendship!

#### The Man Who Cried.

He was one of the charter members of the organization and had served it officially during its entire life. He was a strong man, and when need be, a stern one. Abuse had been his and he knew the bitterness of ingratitude; but still he kept on, doing his duty as he understood it. True, he had many friends, but even they sometimes criticized him unfairly. Still he kept on the even tenor of his way, always under marvelous self-control, never exposing his wounds, never bitter or resentful.

For all of his years of untiring labor for others there had been no material reward, and in his heart he must have

known that the measure of praise which came to him was but a fraction of that he deserved. Because of his calm demeanor, because of his measured speech, people called him cold. His courtliness was termed affectation and many who knew not the meaning of fraternity, eyed him suspiciously and whispered dishonor, because he labored without pay.

At last, when the Winter of Years had drifted its whiteness over his brow, when the burden of unselfishness had commenced to curve his shoulders, he laid down the baton of authority and returned to the ranks.

He may have thought it was mere custom which prompted the proposal of resolutions of regret at his retirement, and probably he had forgotten the matter during the several months that elapsed before the resolutions were framed; but at last the occasion of their presentation arrived.

There were but few men in the room, only the officers of the organization and a couple of guests. As the president read the resolutions his voice seemed far away, to the man for whom they were written. Before the mirror of his memory there passed vivid pictures of every campaign, but he no longer heard the din of strife. He no longer remembered the wounds of injustice, nor the anguish of ingratitude. He knew that the words of the resolutions spoke the true sentiments of every member of the organization, because they were sentiment. He realized as never before that sentiment is the unquenchable flame in the heart of every man, that however hard the exterior may be, there is in every soul the pure, vibrant flame of emotion; that each vibration of that flame starts responsive vibrations in the souls of all those who have acted together in labors of love; that into every life there comes, for at least one fleeting moment, a glorious conception of the truth of the brotherhood of man. Such a moment came to him when the last word of the resolutions passed the president's lips. For one sweetly wonderful moment the man felt that the minds of all his fellows were in emotional harmony with his own. He knew that his labor had been appreciated; he knew that to him had come the greatest reward that men can give to man—Love! He tried to speak, but the words faltered upon his lips. So he simply cried! Weak? Ah no! The strongest, the most manly moment of all his life was when he cried. No act in all his career, no words that he had ever spoken reflected so clearly of honor and unselfishness, strength and manhood, as did his freely flowing tears.

#### New Hampshire Proceedings Issued.

Secretary Herbert E. Rice, of Nashua, has issued the proceedings of the last annual meeting of the New Hampshire State Ph.A.

# Original and Selected

## NOTES AND QUERIES.\*

By William Duncan, Ph.C., F.C.S.

*Crystalline Bismuth Carbonate.*—Last session the following query was discussed:

R—Liq. bismuthi .....	1 ounce.
Sodii bicarb. ....	2 drams.
Aquam. ....	ad. 6 ounces.
Ft. mist.	

Why does the above precipitate? In the discussion it was stated that the mixture had shown no sign of precipitating at the end of three months. During the past winter, however, a slight separation began—amorphous bismuth oxycarbonate depositing. The mixture, therefore, in the course of time does precipitate. My object in returning to the query is to draw attention to a similar mixture which was prepared at the same time:

R—Liq. bismuthi .....	1 ounce.
Potass. bicarb. ....	4 drams.
Aquam. ....	ad. 6 ounces.
Ft. mist.	

Last August a change began—a micro-crystalline sediment forming. Examination proved this to be a bismuth carbonate, but the quantity at disposal was insufficient to permit of a quantitative analysis to decide whether it was normal carbonate or oxycarbonate. This is the first time, I believe, that a bismuth carbonate in crystalline form has been produced. Precipitation in both mixtures seems to follow the slow conversion of the alkali bicarbonate into carbonates, the strong alkalinity of the latter eventually causing decomposition of the bismuth salt.

*Gelatination of Tincture of Kino.*—From 1879 to 1903 rarely a session passed without this subject being discussed. White's work on kino (P. J. 14), vol. xvi, pages 644, 702) removed our hardy annual. After much experiment White came to the conclusion that the gelatinizing is due to an enzyme, and recommended heat to be used as a preventive by destroying the enzyme. I believed up to January of this present year that a sure remedy had been found, but the two tinctures I now exhibit are upsetting. Both were made on August 17, 1903, from the same kino. A by the B.P. method and B by White's, namely, "Boil the kino in the water for 15 minutes, cool, and add the glycerin and alcohol, and finally adjust with water to the desired volume." A became solid within six weeks. B remained in perfect condition up till January last, that is about five and a half years. The latter has been opened at least eight times every year; probably much oftener, as it has been used as a class demonstration of the superiority of White's over the official process. But last January the tincture began to show signs of change. It has gradually got thicker until now it is almost a jelly. I may mention I have seen a tincture keep perfectly fluid for 12 years and suddenly pass into a solid condition in the course of 24 hours. That heat is a remedy I still believe, but to be infallible it should be continued for an hour at least, and preferable with the glycerin in the water.

*Lead in Iodide of Iron Syrup.*—The following query is handed in with a request to explain the yellow deposit formed soon after compounding:

R—Syr. ferri iodidi .....	1½ ounces.
Aqua menth. pip. ....	ana.
Misce.	

The deposit proved to be lead iodide. Inquiry elicited the fact that the syrup had been extemporaneously prepared from a commercial liquor ferri iodidi, but how it came to contain lead the manufacturer alone can answer. It might be due to using lead-enamelled pans, or storing in a dirty bottle, but the quantity found suggested that either lead-contaminated iron filings or crude iodine had been used. Solutions of iodides have a solvent action on lead, complex salts resulting, and

unless the lead be present in free amount, a dilution of the liquor with syrup remains quite free of deposit. When water is used dissociation of the double iodide at once follows, and yellow crystals of lead iodide fall as in the above mixture. I have here a lead-contaminated liquor ferri iodidi to demonstrate this. On adding a little to water the yellow lead iodide immediately separates. In this other bottle I have double iodides of lead and potassium, which you see is a white crystalline salt. On adding it to water dissociation takes place and the yellow lead iodide quickly appears. A mixture of lead carbonate and anhydrous potassium iodide has been suggested as a test for water in alcohol, and such like bodies; this double salt appears equally sensitive.

*Blackening of the Tongue by Bismuth Mixtures.*—Two years ago my attention was drawn to a peculiar blackening of the tongue following the taking of the following mixture:

R—Glycerini acid. pepsin .....	1½ ounces.
Tinct. meiss. vom. ....	2 drams.
Liquor bismuthi ....	ad. 4 ounces.

A black patch about the size of a sixpence was noticed the third day after beginning the mixture, the patch gradually increasing in size until a strip about two inches long and one inch broad, lying in the center of the tongue, was quite covered with apparently bismuth sulphide. As this effect did not follow the taking of enclots or pills of bismuth the discoloration could not be ascribed to absorption. Normal saliva is said to contain no sulphur, smoker's invariably does; but the tongues of two ladies who had never used the fragrant weed blackened even quicker than the smoker's. On the other hand, if the blackening is due to sulphur in the saliva why is it restricted to the center of the tongue? Eructations of sulphuretted gases have been suggested. But after observation on a number of self-sacrificing patients, the conclusion arrived at is that the blackening is only in cases where the tongue is foul, the mucus under this condition being apparently rich in sulphur.

*A Calcium Lactate Mixture.*—Is it possible to turn this out without any undissolved calcium lactate?

R—Calcii lactat. ....	3 drams.
Glycerini ....	1 ounce.
Tinct. aurant. ....	2 drams.
Aquam. ....	ad. 6 ounces.
Ft. mist.	

Yes, but not to keep as the glycerin and alcohol both diminish the solubility of the salt in the water. The better way of dispensing calcium lactate in mixture form is to make the salt fresh by saturating lactic acid with calcium carbonate. For the three drams prescribed here take 128 grains of calcium carbonate and allow the action to complete in the cold. Prove neutrality, filter, dilute, add the glycerin and tincture, and finally adjust with water to the six ounces. Following this method the mixture was obtained quite free of undissolved salt, but a flocculent precipitate began to deposit in the course of an hour. Calcium lactate in mixtures has been giving trouble of late from its solubility in water diminishing with age. Prepared in the cold as above it is soluble about 1 in 10 in cold water and 1 in 3 in boiling water. The lactate is an exception among the calcium salts in respect that it is more soluble in hot water than in cold. It is almost insoluble in cold, but readily in hot alcohol. Age or prolonged heat lessens its solubility. A molecular change evidently takes place with formation of less soluble isomers, as in the case of calcium tartrates.

*Linimentum Chloroformi Comp.*—What would you dispense for Lin. Chloro. Co., A.B.C. liniment or chloroform liniment? It would be very wrong to dispense A.B.C. liniment unless one knew that the writer intended that to be given. Failing that I would give the official Linimentum Chloroformi.

*Unnecessary Addition of Mucilage of Acacia.*—What is the intention of the prescriber, and if mucilage should be added, how much in the following?

R—Sodii salicyl. ....	3 drams.
Mucil. acac. ....	q.s.
Tinct. aurant. ....	1½ ounces.
Aquam. ....	ad. 6 ounces.
Ft. mist.	

Evidently the prescriber had other things in his mind than those ordered. Possibly the sparingly soluble salicylic acid. It is not, as a rule, judicious to worry a prescriber over trifles

\*Read before a meeting of Edinburgh Chemists', Assistants' and Apprentices' Association, March 24, 1909, and reprinted from the *Pharmaceutical Journal*.

like this. Put in half an ounce and mark the quantity on the prescription.

What is *Extractum Belladonnae*?—What extract should be used in the following?

R—Extract belladon. .... 1½ grains.  
Oli. theobrom. .... q. s.

Ft. suppos.

That depends. If you know the prescriber intends the alcoholic extract, use it. Without this knowledge dispense what has been ordered—Extract belladon. virid.

A *Phenazoa Mixture*. Can the following be dispensed without precipitate?

R—Potass. citrat. .... 3 drams.  
Phenazoin. .... 1 dram.  
Liq. ammon. acet. .... ad. 2 ounces.

Ft. mist.

This will not remain clear, but with two drams of glycerin it remains free of crystals.

*Hexamethylene Tetramine in a Mixture*.—How should the following mixture be dispensed?

R—Ferri sulph. .... 1 grain.  
Quin. sulph. .... 1 grain.  
Acid. sulph. ammon. .... 10 minims.  
Magnes. sulph. .... 20 grains.  
Hexamethylene tetramine .... 5 grains.  
Aquam. .... ad. 1½ ounces.

This mixture is quite incompatible physically and chemically, hexamethylene tetramine being incompatible with alkalis and acids incompatible with it. Two or three drams of powdered acacia in the six-ounce mixture make it presentable.

*Dispensing Puzzle*.—How would you dispense the following?

R—Menthol. .... 4 grains.  
Sp. ammon. aromat. .... 2 drams.  
Sp. chlorof. .... 2 drams.  
Tinct. card. co. .... 3 drams.  
Syr. zincubr. .... 2 drams.  
Aq. menth. pip. .... ad. 1 ounce.  
Sig.: One dram in hot water when required.

This is a puzzle. If you cannot consult the writer, add an additional ounce of peppermint water, and direct two drams to be taken for a dose.

*Potassium Bromide and Alkaloids in Mixture*.—How would you dispense?

R—Potass. bromidi. .... 2 drams.  
Caffein. cit. .... 24 grains.  
Liq. strychnin. hydrochlor. .... 35 minims.  
Ext. cinchon. liq. ....  
Acid. phosph. dil. of each. .... 2 drams.  
Aquam. .... ad. 6 ounces.

Ft. mist.

A very passable mixture may be made by triturating the salts with two drams of powdered acacia and four drams of water adding the liquid extract, then the liquor, and finally the acid oil ointed. Send out with a "shake" label.

*Menthol and Croton Oil in Pills*.—What excipient would you suggest for the following pill?

R—Oli. crotonis. .... 1 minim.  
Pulv. opii. ....  
Menthol. of each. .... ½ grain.

Ft. pill.

Beeswax and sufficient powdered liquorice. Melt 1½ grains of wax for each pill, add the oil, and combine. To the cold mass add the menthol, then the opium and finally the liquorice if required.

*Liquor Arsenicalis with Quinine and Strychnine Hydrochloride*.—How would you dispense the following?

R—Quin. hydrochl. .... 2 drams.  
Liq. arsenicalis. .... 2 drams.  
Liq. strychnin. hydrochl. .... 2 drams.  
Ext. glycyrrh. liq. .... 6 drams.  
Aquam. .... ad. 6 ounces.

Ft. mist.

This should be dispensed as written. The querist probably is worried over the incompatibility of the arsenical liquor with the quinine salt and solution of strychnine, but the liquorice will suspend the quinine, and there is sufficient alcohol

and water in the mixture to keep the strychnine in solution.

What is *Magnesia*?—Which magnesia should be used and what change takes place in the following?

R—Ferri et ammon. cit. ....  
Potass. cit. ....  
Magnesia, of each. .... 2 drams.  
Glycerini. .... ½ ounce.  
Infus. cumbulac. .... ad. 3 ounces.

Ft. mist.

Heavy magnesia is ordered, but the light is more diffusible. The magnesia will in time decompose the scale preparation, setting free ammonia and forming less soluble magnesium formyl-citrate. This, with the crystalline magnesium hydroxide produced by slow hydration of the excess of magnesia will tend to set in solid block similar to plaster of paris.

A *Boric Acid Cream*.—How should the following be dispensed?

R—Ung. hyd. oxid. ....  
Adipis lane, of each. .... 3 drams.  
Paraff. moll. alb. .... 1 dram.  
Acid. boric. .... 16 grains.  
Pulv. tragaecanth. .... 5 grains.  
Aq. rose com. .... 1 ounce.

Ft. cream.

Mix the tragacanth with the melted fats in a heated mortar and carefully combine with the rose water in which the boric acid has been previously dissolved.

*Subacetate of Lead and Soap Liniment*.—How should the following be dispensed?

R—Liq. plumbi. subacet. .... 2 drams.  
Lin. saponis. .... ad. 3 ounces.

Ft. lin.

The dispenser should approach the prescriber. It is not fair to leave him in ignorance of the incompatibility, and although he may refuse to alter at your request, there is a probability your sincerity will save others from worry. Trinitration of the liquor with two drams each of soft soap, glycerin and olive oil before the addition of the liniment has been tried. The best result was obtained with the olive oil and the best was far from elegant.

A *Musk Mixture*. What would you do with the following?

R—Moschi. .... 1 dram.  
Tinct. digitalis. .... 2½ drams.  
Sp. ammon. aromat. .... 1½ ounces.  
Sp. ether. sulph. .... 1 ounce.  
Vin. liqecac. .... 6 drams.  
Tinct. cinchon. .... ad. 6 ounces.

Ft. mist.

Sig.: Two tablespoonfuls in a little water every four hours. Approach the prescriber *secundum artem*, and if intended get payment before dispensing. It would be a gracious thing to send the money to the Benevolent Fund as a thank-offering.

*Oil of Cloves with Extracts*.—How would you dispense the following?

R—Ext. belladon. ....  
Ext. nucis vom. of each. .... ½ grain.  
Morph. mur. .... 1-12 grain.  
P. asafetida. .... ½ grain.  
Oli. caryoph. .... 1 minim.  
Ext. hyoscy. .... 2 grains.

Stiffen the oil with a grain of beeswax, work in the asafetida and morphine, and then the extracts previously evaporated to dryness on a water-bath. Liquorice may be added to give plasticity.

#### New York State Ph.A. at Richfield Springs in June.

Edward S. Dawson, secretary of the New York State Pharmaceutical Association, announces that the 31st annual meeting will be held at Richfield Springs June 29 to July 2. Willard A. Smith, of Richfield Springs, is the local secretary, and his associates are: W. H. French, Worcester; George S. Slade, Oneonta; Charles A. Scott, Cooperstown; William H. Whitehead, Herkimer; J. V. Downs, Ilion; Frank H. Howd, Mohawk; Charles J. Zipp, Utica; J. G. Black, Richfield Springs. From reports received from members of the Commercial Travelers' Auxiliary, Mr. Dawson predicts that the meeting will be largely attended.

## QUESTION BOX

THE OBJECT of this department is to furnish our subscribers and their clerks with reliable and tried formulas, and to discuss questions relating to practical pharmacy, prescription work, dispensing difficulties, etc. Requests for information are not acknowledged by mail, and ANONYMOUS COMMUNICATIONS RECEIVE NO ATTENTION; neither do we answer questions in this department from non-subscribers.

In this department frequent reference is necessarily made to information published in previous issues of *The Era*. Copies of these may be obtained at 10 cents each, except a few issues which are out of print, for which we charge 25 cents each.

### Non-Absorbent Floor Cement.

(C. C. E.)—"Please publish in your columns a formula for making a cement preparation for floor use which is non-absorbent. Ordinarily Portland cement and sand will absorb. There is a preparation of this kind on the market."

It is stated on good authority that the intermixture of a certain proportion of hydrated lime increases the water-tightness of concrete, one of the formulas recommended for making this cement being as follows: Portland cement, 1 part; sand, 2 parts; stone, 1 part; hydrated lime, 8 per cent, the percentage being based upon the weight of the dry hydrated lime to the weight of the dry Portland cement. However, for your use it might prove satisfactory to make the cement waterproof by following one of the processes recommended some years ago by Dingler's *Politechnic Journal*: Rub and scrape the surface of the concrete thoroughly and then coat it with a layer .3 to .4 mm. thick—of emulsion glue, spreading it on with a trowel. When dry, an outer protective coating of cement can be applied, smoothed over with a steel blade. When the operations have been carefully performed the concrete, it is said, will be impervious by water.

A waterproof coating for the same purpose may be made as follows: Mix together three parts of burned porcelain clay and sandstone in equal parts, two parts of burned porcelain clay with two parts of freshly slaked lime, while it is still warm, adding sufficient water to bring it to the consistency desired for applying with a brush. In this way a wash is made that forms a calcium silicate, which, if often wetted, after a time becomes almost as hard as stone. These constituents mixed together make a base to which any colored pigment that can be used in conjunction with lime, can be added. It should be applied quite thickly and allowed to dry for 24 hours, after which it should be frequently washed with clear water, which makes it waterproof.

### Release of Energy Within a Prescribed Time.

(C. C. E.)—"I am a subscriber to your magazine and wish to inquire if you know of any ingredient that could be put into a full bottle (4 ounces) of carbonic acid that would cause it to explode or blow out the cork in about 45 minutes?"

We must confess that we are unable to outline any scheme which will conform to the limitations prescribed in this query. It is stated that bombs are constructed with clockwork by which it is possible at a given time to set in motion certain agents which will release energy, but to adapt such a scheme to the problem submitted would be as futile as it would be impracticable. If our correspondent has had an experience with a bottle of carbonic acid where the cork was blown out in the time he names, he should have said so. It is reasonable to suppose that such a result might be brought about by the gradual elevation of the temperature, conditions for the attainment of which are of frequent occurrence. With the consequent expansion of the liquid it is not difficult to imagine what would happen.

### Cressotal With Syrup Cocillana Comp.

(W. E. W.)—"I have been getting a prescription for cressotal with syrup cocillana comp. I do not think it will mix. Can it be mixed?"

A clear, non-separable mixture of cressotal in aqueous solutions cannot be made, as the cressotal is insoluble in water. It is also insoluble in glycerol and alcohol, but soluble in oils, and for this reason the cressotal is best given along with cod

liver oil, or in capsules. It is also possible to emulsify it by adding a little oil and acacia, but no such method should be employed without first consulting the prescriber.

As a suitable adjunct to cressotal, the following mixture is recommended by P. Loele (Coblentz, "Newer Remedies"):

Infus. ipecacuanhas ..... 0.95-95.0  
Liq. ammon. anis. .... 5.0  
Syrupus althaeae, q. s., ad. .... 200.0

M.D.S. One teaspoonful with 15 drops of cressotal four times a day.

### Combustion of Sugar.

(A. S.)—"Will you please state in the Question Box the chemical changes which sugar undergoes when consumed by fire. I know that a teaspoonful of sugar burned on a shovel will generate a very active and powerful gas that will quickly expel foul air from an ordinary sized room."

A note on the burning of sugar appeared in the *ERA* of April 1, 1909, page 296. The products of the combustion of sugar no doubt vary considerably with the conditions under which the combustion is effected. According to Mulder, the action of heat on sugar generates humic products; it is probable that caramel and assamar are only modifications of humic acid, i. e., more or less dehydrated carbohydrates. Other authorities have also recognized the formation of humic acid with disengagement of formic acid when sugar solutions are heated to 160° C. Sugar when heated for a long time between 210 and 220° produces a mass which froths up and becomes continually darker and darker brown, evolving a large proportion of water containing traces of acetic acid and volatile oil (this contains furfural, according to Völcker) the product when the frothing has ceased becoming converted into caramel, unburnt sugar, assamar, etc. At a still higher temperature an inflammable, gaseous mixture is given off consisting of carbon monoxide, marsh gas, carbon dioxide, etc. When subjected to dry distillation, sugar yields aldehyde, acetone, acetic acid, tarry products, carbon dioxide, carbon monoxide and marsh gas. That there is a slight foundation for the popular belief that the burning of sugar in a sick room will remove disagreeable odors is borne out by the evidence submitted by many investigators.

### Brown Hair Dyes.

(R. W. M.)—"Formulas for a chestnut hair dye appear on page 350 of last week's *ERA*. Here is another formula for dyeing the hair brown; it is as simple and harmless as any you know of:

Crocynic acid ..... 1 1/2 ounces.  
Solution of ammonia ..... 2 drams.  
Rectified spirit ..... 1 ounce.  
Water ..... 3 ounces.

Dissolve the acid in the spirit, add the other ingredients and mix.

For a "two-bottle" brown dye, the following formulas have been recommended:

#### No. 1. Mordant.

Crocynic acid ..... 3 drams.  
Alcohol ..... 3 fl. ounces  
Water ..... 11 fl. ounces

#### No. 2. Brown Dye.

Silver nitrate ..... 1 av. ounce  
Ammonia water, q. s., or about ..... 2 fl. ounces  
Sodium carbonate (sal soda) ..... 3 drams.  
Water, q. s., or about ..... 10 fl. ounces

Dissolve the silver nitrate in 8 ounces of water and an ammonia water until the precipitate which is formed is dissolved; dissolve the sal soda in the solution, and add enough water to make 12 fluidounces, and, after standing a few days, decant.

To apply this dye the hair is first washed with water to which a little soda has been dissolved or soap suds to remove any grease or oil, the mordant is then applied and allowed to dry; the dye is then put on carefully with a tooth-brush or other convenient means and dried by fanning; the hair, when dry, is then washed with soap suds to remove any superfluous dye and dried.

Stains on the skin may be removed by rubbing them with the following solution:

Potassium sulphate ..... 1 ounce.  
Water ..... 1 pint.  
Dissolve.

# ADVERTISING for DRUGGISTS

**EASTER WINDOW DISPLAY WINS ERA \$5 PRIZE.**

**E. V. McAllister, of Rockford, Ill., Sends Photograph of a Useful and Interesting Exhibit.**

In carrying out the plan of the ERA'S Prize Competition, the judges have concluded that of the offerings for this week's prize the most attractive window display is that made by E. V. McAllister, manager of the West End Pharmacy, 1950 West State street, Rockford, Ill., the same being reproduced on this page. The prize of \$5 which is offered in Contest No. 1 for the best photograph of a druggist's show window or any display of goods in a drug store, is therefore awarded to Mr. McAllister.

Regarding the window display, Mr. McAllister mentions that it was designed for and exhibited on Easter of this year and is therefore entirely new and up-to-date. The background was

## DIFFERENT SORTS OF HANDY HELPS.

### The Handy File.

EEP a small, triangular file in one of the drawers under the prescription counter. Sharpen the smooth or handle end to a keen point. This point will be found useful for extracting cotton or lint from the inside of bottles. Place the end against the cotton and turn the file. The file teeth will catch in the cotton and hold it firmly, so that it may be pulled from the bottle. The file end also makes an excellent swab-stick for winding with cotton to dry the insides of bottles, remove small particles and for other uses.

### Home-Made Post Card Rack.

Across a picture or other suitable frame stretch a strong linen thread as follows: First thread, one-quarter inch from

made of old porch pillars, calumnetted and backed with prim paper upon which was painted a marine scene and stone walls on each side of the roadway leading to the water. The doll was lent by Stewart & Co. and the sign "Mamma buys her patterns at Stewart's" explains itself, as it was used with a Ladies' Home Journal display. Other goods shown in the window are candies, perfumery and toilet articles appropriate to the season, while ornamentation is supplied with nine rabbits, an team, chicks and Easter eggs.

Druggists should read the announcement on advertising page 37 of this number of the ERA regarding this Prize Competition. It is proving of great value to the retailers throughout the country in the way of affording incentive to advertise through window displays, in the newspapers and otherwise. The competition is open to everybody, regardless of whether the competitor is a subscriber to the ERA or not.

side of frame. Stretch the second thread parallel to the first and one-quarter inch beyond it. Then run the third thread parallel to the second, leaving a space between the threads of two and one-quarter inches. The fourth thread should parallel the third at a distance of one-quarter of an inch between the threads. Fill this frame with sets of four threads in the order outlined. The best mode of adjustment is to drive small tacks nearly to the heads in the top and bottom of the frame at the indicated distances apart. Over these tightly stretch a continuous thread and when the end is fastened to the last tack, drive the tacks all the way in so that they will hold the threads firmly.

To place the cards: Run the first card under the second and third threads and over the first and fourth threads. Run the second card under the first and fourth threads and over the second and third threads. As thus placed the cards will be

woven in between the threads and each card will hold the threads tightly against the cards above and below it.

By placing tacks in the same order in upper and lower window-sash and stretching threads thereon, a line of postals may be displayed almost directly against the window glass. Or the threads may be run from the bottom of the window to the back of the window at the top, or to a strip of wood located as may be desired, thus permitting a slanting display to be made. Two sets of threads at each side of the window will permit a postal display that will not interfere with a general display upon the window floor.

#### A Dark Closet Help.

Much annoyance in selecting goods from dark closets may be saved by the following simple scheme: For example, roll handkerchiefs are often kept in dark closets under the counter where it is difficult to see the width and grade markings that are printed upon the boxes. To overcome this annoyance cut large numbers from calendars, preferably those which have been printed black on white, so that a square of the white background will show. Number each box with these figures. Make a list of the numbers of the boxes on a heavy card and opposite each number give the contents of the corresponding box. Keep this card hanging conveniently at hand. A glance at it will indicate the number of the box desired and one will be surprised to see how plainly the box numbers will show in any but a totally dark closet.

#### Stucco Work.

Stucco or plaster of paris is very useful for simulating mountains, snow-drifts or any window trim of a similar nature. Make a light wood or heavy wire frame of any desired shape. Cover with window screen wire or two or three thicknesses of cheese-cloth. Dip the covered frame in a thin solution of plaster of paris, repeating the dipping process until a plaster deposit of the desired thickness is secured. A covered frame of this nature may also be coated with glue, sand, saw-dust, mica dust or powdered glass being sifted on, as may be desired.

#### Fly Drums.

However carefully a drug store may be screened, a few flies will get in, and how to exterminate them becomes quite a problem. Fly many sticky fly-paper is thought to be the best means, but it does not add to the attractiveness of a store to expose sheets or ribbons that are coated with dead flies. To prevent such a morose exhibition is not difficult.

Roll a sheet of sticky fly-paper into a cylinder, with the sticky side in. Roll this cylinder in one thickness of crepe paper, which should extend about two inches beyond the open ends of the fly-paper drum. Cut the protruding edges of the crepe paper into a fringe and curl each tongue of the fringe inwardly. Run a twine or ribbon through the drum and suspend horizontally from the lighting fixtures, top of shelving or from the ceiling, as may be desired. It is well known that light paper drapery will in itself draw and hold flies. The flies are attracted to the fringe of the drum and then crawl inside, where they are caught by the sticky interior and kept out of sight.

#### A Stopper Wrench.

To remove flat-top glass stoppers from bottles, take a piece of moderately hard, non-resinous, curly grain wood, such as maple or chestnut. The piece should be six inches long by two by three inches. In the center of the two-inch side cut a slot of sufficient depth, length and width to loosely hold the top of an average size flat glass stopper. Place the top of the flat stopper in the slot, hold the bottle with the left hand, grasp the block of wood firmly with the right hand and turn. Few stoppers will resist the great force that may be thus put upon them.

#### For Round Stoppers.

Prepare an eight-inch piece of strong, stiff iron or steel rod of a piece of about a half-inch in diameter. To an end of this firmly fasten one end of a 12-inch piece of insulated copper wire of about the size used for general incandescent wiring. Smoothly bind the entire rod with two or three thicknesses of insulating tape, adding a covering of tape to the top so as to give it added strength, resiliency and clinging power. To remove tight round-top stoppers, such as are to be found in the average salt-mouth shell bottle, proceed as follows: Place the end of the rod to which the wire is at-

tached against the waist of the stopper. Then take two or three tight turns of the insulated wire around the stopper. Tightly grasp the rod and the loose end of the wire in the right hand with the bottle in the left hand or between the knees. Turn the rod in the direction that will cause the coils of wire to tighten around the stopper. The great leverage thus brought to bear will turn the majority of tight stoppers. The device, it will be seen, works on the same principle as the pipe-fitter's chain-and-rod pipe tongs.

#### An Anti-Splasher.

Splashing of water as it falls from the faucet upon the sink is a great nuisance. It may be entirely prevented by procuring a piece of rubber tubing one inch in length and of a size to make it fit tightly over the end of the faucet. Next, secure a small piece of fine mesh, brass wire netting. Cut out two small disks of the same diameter as the end of the faucet. Then cut another disk of three times the diameter. Place the two small disks in the center of the larger disk so that the meshes, when the disks are in place, will cross each other. Carefully take the larger disk in hand and press it over the faucet opening so that the small disks cover the outlet. Gather the sides of the larger disk around the faucet and over all press closely the rubber tube. With fine wire securely bind the netting to the rubber. This device will not only prevent splashing, but it will also strain the water. The netting should be removed every few weeks, thoroughly cleansed and replaced. Whenever the flow of water appears to be decreasing it is time to remove the appliance and cleanse it.

#### "Wanted—A Man."—His Qualifications.

ANN ARBOR, Mich., April 17.—J. W. T. Knox, advertising manager of Frederick Stearns & Co., addressed the Prescott Club recently on the subject: "Wanted—A Man." Mr. Knox endeavored to show what kind of young men were wanted in the chemical manufacturing business and what was expected of them. The most notable features of his address were the enumeration of the qualities, initiative, competency, perseverance, sincerity, open-mindedness, etc., which he considered essential to the success of every young man entering this line of business, and the diagram by which he represented the workings of a large corporation. The latter, which was in the form of a triangle, was divided into sections; the sections represented in order from top to bottom the stockholders, board of directors, officers, managers, assistant managers and lastly, at the base of the triangle the clerks of the making and selling departments. In explaining his diagram Mr. Knox remarked that to every ten good men ready to enter the making department only one good man could be found for the selling department. Prof. A. B. Stevens gave a short sketch of the life of Dr. Albert B. Prescott, former dean of the department of pharmacy, and after whom the Prescott Club was named.

#### Penn. Ph.A. Offers \$20 Gold Prize for Best Paper.

PHILADELPHIA, April 17.—Interest in the papers and discussion at the coming meeting, June 22-24, at Bedford Springs of the Pennsylvania Pharmaceutical Association will be stimulated by the offer of a prize of \$20 in gold for the most meritorious paper, pharmaceutical apparatus or device possessing originality, presented during the session. This prize will be awarded this year for the work presented last year and hereafter the same rule will be observed.

Chairman Charles H. LaWall, of the committee on papers and queries, has prepared a list of queries for the guidance of those who intend to submit such work. The other members of the committee are E. Fullerion Cook, Ambrose Hunsberger, Clarence L. Bonta, of Philadelphia, and Fred J. Blumenschein, of Pittsburg.

#### Charity Offer Will Aid in Advertising Drug Store.

HAMLET, N. C., April 17.—A local pharmacy recently installed a beautiful new soda fountain and originated a novel way to advertise it. The fountain was turned over to the Ladies' Auxiliary of the Y.M.C.A. and the entire proceeds will be given to that organization, in return for which the beneficiaries have advertised a spring opening. The fountain as well as the whole store has been decorated with cut flowers and plants. A committee of young ladies will serve the drinks and incidentally boost the sales by assisting the young men to dispose of numberless plates of ice cream.

## PERSONAL MENTION

—BENJAMIN C. LANHAM, Washington, D. C., is seriously ill with typhoid fever.

—E. H. FIENHOLD, of Philadelphia, is recovering from a long siege of typhoid fever.

—SAMUEL T. LEIGHTON, of Kalamazoo, Mich., was a recent visitor at Los Angeles, Cal.

—JOSEPH B. BOYLE, of Westminster, Md., is recovering from a severe attack of the grip.

—AUSTIN SNAPP, of Gurdon, Ark., recently visited his parents at Jamestown in the same State.

—AMONG the visiting druggists in Baltimore recently were Mr. and Mrs. D. L. Miller, of Waynesboro, Pa.

—PAUL ADAMS, of Cadiz, Ky., has gone to Sturgis to take a position in one of the pharmacies at that place.

—F. E. HOLLIDAY, of the N.W.D.A., with his wife and daughter, recently visited Norfolk, Old Point and Washington.

—HARRY SKILLMAN, advertising manager of Parke, Davis & Co., Detroit, Mich., was a New York City visitor during the early part of the week.

—WILLIAM C. WENDT, who recently sold his pharmacy in Kaukauna, Wis., has become a traveling salesman for a St. Louis wholesale drug house.

—GEORGE RILEY, who covers western Ohio for Muth Bros. & Co., of Baltimore, was called home last week by a telegram announcing the birth of a daughter.

—MATHON H. KLINE, president of the Smith, Kline & French Co., Philadelphia, was a visitor in the New York City wholesale trade for a few days last week.

—MISS MARY A. FAGAN, who recently passed the Delaware examination with a high average, is now an assistant in Dr. Horace Bradley's pharmacy in Wilmington.

—STANLEY E. PARKILL, ex-mayor and druggist of Owosso, Mich., and several times mentioned as Democratic candidate for Governor, has been ill for several weeks.

—FINLEY PAGE SCHUBERT, manager of a pharmacy in Germantown, Philadelphia, took a brief vacation recently, during which he visited his parents at Hagerstown, Md.

—DR. EDWIN C. LIVINGSTON, a druggist at 3100 York road, Baltimore, has been confined to his bed for three weeks with illness. He is a former member of the City Council.

—GEORGE W. FEHR, treasurer of the Philadelphia Association of Retail Druggists, with Mrs. Fehr, on May 11 will celebrate the completion of 15 years of happy married life.

—WILLIAM O. FRALEY, of Lancaster, Pa., is a proud grandfather. His son, Henry E. Fraley, who is connected with the A.D.S., became the father of a nine-pound girl on April 12.

—J. E. MARSDEN, one of the most active members of the Philadelphia Association of Retail Druggists, has disposed of both of his stores in that city and will take life easy for a few months.

—T. M. BURNETT, one of the most capable druggists of Clinton County, has severed his connection with the Egan pharmacy and taken a position with the George W. Brown drug store.

—F. E. FALKENBERG, of Chicago, has disposed of his drug business and connected himself with the Chicago Chocolate Company, a confectionery manufacturing establishment that supplies the drug trade.

—J. A. MCDONOLD celebrated on April 12 the 25th anniversary of his connection with Fuller & Fuller Co., Chicago. As city salesman he has been industriously gathering in orders for a quarter of a century.

—KARL H. GRAHAM, of New York, who has been serving as pharmacist at the Marine Hospital, Maryland avenue extended, Baltimore, since last September, has been transferred to the Savannah, Ga., quarantine station.

—A. EDWIN SCHMIDT, a druggist at Ann and Aliceanna streets, Baltimore, is promoting a project to build the largest apartment house in the eastern section of the city, which he hopes to fill with Polish and other alien tenants.

—FRANK W. SMITH, who is in charge of the territory in and about Philadelphia for the Lilly & Co., was a recent Atlantic City visitor. The latter city had no attractions for Mr. Smith, whose errand was strictly business.

—J. H. STEIN, one of the best known advocates for organiza-

tion for the retail druggists in Pennsylvania, is convalescent at his home in Reading after a long illness. He hopes to be able to attend to business in the course of a week or two.

—JOHN G. GOODING, treasurer of the Massachusetts College of Pharmacy, and one of the leading druggists of Boston, has been elected a member of the new Merchants' Association, which the Massachusetts Legislature has just incorporated.

—W. C. WALTERS, formerly botanist for Eli Lilly & Co., at Indianapolis, but now a member of the sales force of that company, at Baltimore, was a recent Philadelphia visitor. Mr. Walters is taking a special course at Johns Hopkins University, at Baltimore.

—WILLIAM T. BURKE, chairman of the executive committee of the Philadelphia Association of Retail Druggists, accompanied by Mrs. Burke, is celebrating the 25th anniversary of their wedding by a trip by water to Norfolk, Va. They will be absent about two weeks.

—RICHARD P. WILKLER, of the export department of Parke, Davis & Co., who has been touring Pennsylvania for recreation during the past few weeks, returned to the New York branch of the firm last Monday preparatory to starting on his South American trip, which will occupy a year or 18 months.

—CLARENCE M. KLINE and Superintendent J. William Landis will act as hosts to the members of the senior class of the Philadelphia College of Pharmacy on Thursday next on the occasion of the annual visit of the latter to the laboratories of the Smith, Kline & French Co., Philadelphia.

—MR. AND MRS. WILLIAM E. LEE, of Philadelphia, were Atlantic City visitors last week. Mr. Lee is first vice-president of the Philadelphia Association of Retail Druggists and is active in the State and National bodies. Mrs. Lee is equally well known as the president of the W.O.N.A.R.D., and of Philadelphia Chapter.

—O. W. OSTERLUND, of Philadelphia, has been busy for the past few days showing his brother, John A. Osterlund, the sights of the Quaker City. The latter is superintendent of the rolling stock of the Ferro Car Company, of Lisbon, Portugal, and is enjoying a three months' leave of absence. He formerly resided in Philadelphia.

—GEORGE H. BENKHAUPT, formerly one of the star bowlers on the crack team of the Smith, Kline & French Co., in the Philadelphia Wholesale Drug Bowling League, has forsaken the game in the interests of golf and has been making some record scores on the course of the Delaware County Field Club. Mr. Benkhaupt is connected with the Eskey's Food department and also looks after the advertising for the Smith, Kline & French Co.

—A. R. HESSKE, H. J. Siegfried and F. P. Strecker, fellow-members of the entertainment committee of the Philadelphia Association of Retail Druggists, with their automobiles, have been valuable assistants to Chairman William A. Carpenter in scouring the city in search of new members for the Philadelphia organization. Since 61 were elected at the April meeting, more applications have been received, largely through the efforts of this "auto corps."

—PROF. ARNE OLDBERG, son of Prof. Oscar S. Oldberg, president of the American Pharmaceutical Association, is winning laurels in the School of Music of the Northwestern University, Chicago. The commencement season in the first week in June is to be made memorable by a great music festival in the new gymnasium and the opening number of the first concert of the festival will be a festival overture with original finale written for the occasion by Prof. Arne Oldberg.

—W. H. MORRILL, of Philadelphia, is the proud captain of a new motor boat and is spending his spare time snail fishing on the Delaware River in the vicinity of Philadelphia. A company of friends in the retail drug business are already looking forward to the annual trip in quest of snail as his guest and the delights of the dinner which is a part of the programme for the day. It is expected that Thomas H. Potts, secretary of the N.A.R.D., will be in Philadelphia at the time and will become one of the party.

—CHARLES F. RILEY, of Taunton; H. C. Wiegand, and James F. O'Donnell, of Boston, were delegates from the Boston Druggists' Association to the big mass meeting of New England commercial and business bodies held April 13 in Boston, under the auspices of the Boston Chamber of Commerce, to protest against the addition of the differentials on west-bound import freight rates favorable to Boston. F. E. ATTENOX, Allen Chaffin and Frank W. Atwood were delegates from the American Society of Chemical Industry.

## MANHATTAN ENDORSES ALL-STATE BILL.

Elimination of Old Board From Reappointment to Be Insisted Upon—New Officers Elected.

The two pharmacy bills which are pending in the State Legislature and the election of officers were the chief matters considered by the Manhattan Pharmaceutical Association last Monday evening. With the elimination of several features, the All-State Bill was unanimously endorsed.

Jacob Diner, chairman of the legislative committee, outlined the provisions of the All-State Bill and remarked that it contained a so-called "joker," namely what might be styled the perpetuation of the present board. The bill made it mandatory that members of the new board be appointed out of the old board. Mr. Diner said this seemed to him an unqualified and ill-advised provision, in that it legislated the old members into office. He also asserted that the All-State Bill was not the Governor's bill as had been heralded far and wide, and knew on good authority that the Governor disapproved of it in several ways. During this announcement Mr. Diner was called to the telephone and when he returned said that Mr. Conklin, who drew the Conklin Pharmacy Bill, had just telephoned him from Albany that the Governor had just emphatically stated that he disapproved the All-State Bill.

Dr. George C. Diekmann and C. O. Bigelow, members of the Eastern Branch of the State Board of Pharmacy, both said that they disapproved of this provision.

Mr. Bigelow stated that a number of pharmacists had the impression that the All-State Bill was a "board bill" drawn by the members of the present board. He said that the Board of Pharmacy, as a board, had nothing to do with the measure and it was a State Association Bill.

Joseph Weinstein, secretary of the Eastern Branch, stated that the provision was put into the bill as to vindicate the old board; that there had been so many conflicting stories concerning the integrity of the old board that its inclusion was simply to see if the Governor was acting in good faith, and demonstrate that he had no personal animosity toward the present board. Mr. Diner replied that the matter of the vindication should be left to the State Association, and as the association met in June and the appointments were not to be made until August he considered there was ample time for such a procedure. W. C. Alpers and G. H. Hitchcock also spoke.

The association finally decided to endorse the All-State Bill, except the perpetuation clause and with an amendment that the per diem of the members be stated in the bill, instead of being left to the Commissioner of Education.

Mr. Diner, on a question of personal privilege, declared that Dr. William Muir, president of the Board of Pharmacy, had used his position to intimidate two members at the last meeting during the vote on endorsing the Conklin Bill. At least the two members, whose names were not stated, had given this as a reason for not voting. They sat near Dr. Muir.

Amid much enthusiasm Dr. George C. Diekmann was unanimously elected as president for the ensuing year. All of the other officers were unanimously elected as follows: First vice-president, Thomas Latham; second vice-president, C. K. Crowell; third vice-president, Charles H. Lowe; secretary, B. R. Danscha; treasurer, George H. Hitchcock.

Announcement was made regarding the joint meeting of the New York County Medical Society with the New York Branch of the American Pharmaceutical Association, which will take place on May 19 at the Academy of Medicine.

Treasurer Hitchcock reported there was a balance of \$8.40 in the treasury after the payment of a \$125 scholarship fee in the New York College of Pharmacy. An appropriation of \$25 was made to the State Association for use at the coming meeting in Richfield Springs. The resignation of F. Wichelns was accepted.

## GROCERS NOT AMENABLE TO PHARMACY LAW.

New York Court of Appeals Decides Against Board in the Brooklyn Borough Cream of Tartar Case.

After a long fight the United Retail Grocers' Association has obtained for one of its members from the New York Court of Appeals a decision which apparently deprives the State Board of Pharmacy of its hitherto unquestioned and long-exercised right of insisting that drugs sold by grocers shall meet the standards of purity laid down in the U. S. Pharmacopoeia.

The test case was based on a sale of cream of tartar by Fred Gasau, a grocer, who objected to paying a fine of \$25 on account of certain impurities found in it, claiming that substances designed for ordinary domestic uses did not need to be as pure as those prepared for medicinal purposes. The decision was against him in the Municipal Court, the Supreme Court, and the Appellate Division, but now the Court of Appeals reverses these decisions, assumes original jurisdiction, and declares that as "it is a matter of common knowledge that the chemicals of the apothecary or druggist are of a much higher grade of purity and strength than the same articles when used for other purposes," the Board of Pharmacy must cease its prosecutions under the statute upon which it has collected about \$500 in fines, and rely on the other laws by which ordinary adulterations can be penalized.

In commenting on the case the New York Times says: "This would seem to settle the question, and it is considered a great victory by the Grocers' Association. The public, with its new knowledge as to the needs and possibilities of pure foods, may take a somewhat different view, and there is no danger in prophesying that before long certain wise manufacturers will be advertising that, however it may be with other brands of the chemicals used in cooking, theirs are fully up to the standards of the Pharmacopoeia."

Chief Justice Cullen, speaking for the Court of Appeals, says it would be absurd to insist, for instance, that sulphuric acid, used in the arts, or other chemicals that assist the laundress, or are the basis of gunpowder, should be refined to the degree required by doctors when they use the same substances. That argument is obviously strong, says the Times, but it is not at all clear why adulterants dangerous or even inert should be permitted in chemicals that are to be ingredients of food any more than of medicine. If the labels told the truth, the whole truth, and only the truth, most people could take care of themselves, but if a thing is sold under a name which it deserves only in part, there is some danger to health—and much to the pocket.

## Golden Celebration of Wedding in County Jail.

MILWAUKEE, April 17.—Orange Williams, secretary and treasurer of the Septicide Company, of Milwaukee, and a well-known former druggist of Wisconsin, with his wife, has just celebrated his 50th wedding anniversary. Mr. and Mrs. Williams were married in the county jail at Elkhorn, Wis., not because either party was confined there, but because the bride's father was county sheriff. She was 18 at the time and he was 22, being at the time a bustling young druggist at Elkhorn.

## Matrimonial Mentions.

HARRY F. LEHNS, who conducts a pharmacy at Columbia avenue and Barre street, Baltimore, was married April 11 to Miss Clara Hook.

—DR. WILLIAM H. FREITHE, of Long Beach, Cal., was married recently at San Bernardino to Mrs. Annie L. Heron, of Los Angeles, by Rev. Mark B. Shaw, of the First Baptist Church.

—HARRY REED, of Huntingdon, Pa., was in Baltimore last week for the first time in 29 years, the occasion being his wedding trip. He and his bride called at Muth Bros. & Co.'s place of business.

DR. GEORGE C. DIEKMANN, New York,  
Elected President Manhattan Ph.A.

## BROOKLYN COLLEGE OF PHARMACY'S MORTGAGE BURNED IN ANCIENT MORTAR AT BIG MEETING.

In a most appropriate manner was the burning of the mortgage on the Brooklyn College of Pharmacy celebrated last Thursday evening. A banquet was held in honor of the occasion in the assembly room of the college and present as invited guests were a number of former legislators, men high in the trade and profession, besides the officers of the Kings County Pharmaceutical Society and the institution.

Every one was enthusiastic over the event and when Dr. William Muir touched the match to the document, the burning of which destroyed all evidence of indebtedness against the college, the scene was impressive to say the least. It can hardly be described, only those who were present can appreciate fully the silent, solemn spirit that prevailed for a moment as the paper was reduced to ashes, and the burst of cheer that followed when its destruction was complete.

The mortgage was burned in a mortar made of antique bell metal. This mortar was presented to the college by Horatio N. Fraser. It was made in Germany in 1534 and is said to be the oldest mortar in America. The ashes were later hermetically sealed in this mortar and a suitable inscription placed upon it in commemoration of the event.

Dr. Muir, as chairman of the board of trustees of the college and one of the founders of the Kings County Society, was the first speaker of the evening. He outlined briefly the history of the society from its inception, in 1877, down to the present, describing the first meeting at which the name of Long Island Pharmaceutical Society was adopted, but which was changed at the second meeting, February 27, 1877, to the present title. The society owed its formation to rumors that the then existing pharmacy law of New York City was to be extended to the then city of Brooklyn, said Dr. Muir, but which was averted and a separate law secured, which was operative until the formation of the State board.

Several instances were cited by Dr. Muir relative to the initiative of the society in important matters, such as the publication of the first pharmaceutical formulary and the founding of the State Pharmaceutical Association. Finally he reviewed the work of the society in connection with establishing the college, describing the hard struggle for funds and the indefatigable work of the members, which eventually culminated in the building of the present institution and the celebration of the evening.

Dr. William C. Anderson, dean of the faculty, reviewed the history of the college. He told how in the early days the drug clerks, including himself, attended lectures in Grenada Hall, and the meager facilities offered, which by great sacrifices and faithful effort on the part of the members of the society had gradually improved, until they were now among the best. Dr. Anderson referred to his note book used at the first lecture, on November 5, 1885, and cited the following epigram: H-W, H-W, H-W=Success. The letters, he said, were interpreted by L. T. Perkins, the lecturer, as standing for hard work, head work and heart work, and these characteristics had always stood out prominently in the history of all connected

with either the society or the institution, ever since the first lecture.

Ex-Senator Arthur J. Audett, formerly chairman of the Senate committee on public health, and instrumental in the passing of the pre-requisite clause, and ex-Senator George W. Wilson, a worker in behalf of the amendment of the college charter establishing the post-graduate course, both congratulated the members of the society and the college upon the attainment of the great success of the college. Both spoke along humorous lines, telling incidents occurring in the Legislature when the work of passing these bills was on.

Dr. Henry L. Taylor, of the State educational department, expressed himself strongly in favor of having the surplus funds of the Board of Pharmacy go to the educational institutions, as under the present law. He said he regretted the move on foot to deprive the institutions of these funds. Among others who spoke were: A. Stewart Walsh, William M. Davis, an ex-president of the society; William L. Perkins, and Rev. Edward Niles, who also pronounced the benediction.

President Jacob H. Rehms read letters of congratulation from Governor Hughes, ex-Senator Thomas C. Platt, Senator Patrick H. McGarren, William McConnell, secretary of the Drug Trade Section of the New York Board of Trade, besides a number of other congratulations and regrets from invited guests unable to attend. A telegram expressing the congratulations of the German Apothecaries' Society of New York was also read.

Over 100 members and guests, besides members of the alumni association, were seated at the tables and the room was beautifully decorated with large American flags draped from the ceiling, besides the college flags of several of the former classes which have graduated from the institution. An excellent menu was served and the guests were provided with red carnations twined with yellow carnations, representing the college colors. It was after 1 a. m. before the speaking programme was finished, while the majority did not leave until after 2 a. m.

The menus were handsomely printed in red and contained a picture of the College of Pharmacy. One unique feature of the dinner was the ice cream, which was served in the shape of skulls and crossbones.

On the committee of arrangements were William Muir, Phar.D., chairman; William C. Anderson, Phar.D.; Frederic P. Thorhill, Phar.D.; Adrian Paradis, Ph.G., and Thomas J. France, Ph.G.

## Kings County Society Surprised at Size of Funds.

It was a surprise to a number of the members of the Kings County Pharmaceutical Society to learn the amount of funds on hand after the payment of all bills down to the date of the last meeting, which was held on April 13.

Following the reading of the report by the treasurer, Oscar C. Klein, the showing elicited comment from a number of members who considered the financial attainments of the so-

ciety and the college as unprecedented in pharmaceutical history. The society account showed a balance of \$900.91 after the payment for eight months' continuous propaganda work, involving the services of a detail man, the distribution of thousands of N.F. and U.S.P. preparations and a large number of copies of a bound manual to the physicians of the borough. In the college account the balance amounted to \$4382.73 after the payment of nearly \$6700 for the cancellation of the mortgage on the institution.

Dr. William Muir, chairman of the legislative committee, announced that the new All-State Pharmacy Bill had been introduced in the Assembly at Albany and that its chances for passage were very bright, in that it concurred with the views of the Governor and the commissioner of education. The provisions of the bill were explained by Dr. Muir and a resolution was passed approving the bill.

The following were elected to membership: Abraham J. Kramer, Meyer Strongin, William A. Hoburg, Jr., and Ch. Zinkler. Applications were received from Hyman Freidland and Clarence S. Abrams. Three were dropped from the rolls for non-payment of dues, and resignations were accepted from William Schroeder, M.D., L. A. Behn and C. J. Hettlesheimer, M.D., who are no longer connected with the drug business.

A paper entitled "The Use of Ampuls in the Preservation and Dispensing of Hypodermic Solutions" was read by C. A. Mayo, and afterward discussed. Mr. Mayo gave a number of practical demonstrations and exhibited a large variety of manufactured ampuls.

### OBITUARY NOTES.

—OSCAR KING, of Cherry Valley, Ill., is dead.

—S. LOGAN WALLHOUR, formerly in the drug business in Scotland, is dead at Greensburg, Pa.

—C. H. MILLER, of the Phoenix Drug Company, Alexandria, La., is dead. He was a prominent citizen.

—T. M. HAYNES, one of the best-known druggists in eastern Texas, died recently at his home in Palestine. He leaves a widow and family.

—MRS. MAMIE F. PEARSON, wife of Paul Pearson, of Washington, D. C., druggist, is dead of typhoid fever. Mrs. Pearson leaves one child, an infant.

—M. S. KAHN, of Liberty and Lexington streets, a prominent member of the Baltimore Retail Association, is mourning the death of his father, Samuel Kahn, who died April 16 at the age of 81 years.

—GEORGE H. FOWLER, retired druggist and well-known public man, is dead, aged 74, at his home in Wauwatosa, a suburb of Milwaukee. He was married in 1859 to Miss Lucy Bree, of Wauwatosa, who survives him with three sons.

—CHARLES W. FISCHER, who died recently at Stuttgart, Germany, aged 64, was formerly a prominent resident of San Jose, Cal., and a member of Fischer & Pellerano, but withdrew from active business a few years ago to spend the remainder of his life in his old home.

—JOHN L. YATMAN, of Orange, N. J., died recently in Memphis, Tenn. Many years ago Mr. Yatman kept a pharmacy in Orange. He was born in Fredon, Sussex County, 60 years ago. His brother, the Rev. Charles H. Yatman, the evangelist, a wife and two daughters, survive him.

—CHARLES B. WOODWORTH, former member of the Indiana State Board of Pharmacy and a leading druggist of Fort Wayne, is dead, aged 61. He was a public-spirited citizen and held several local offices. Two sons survive, one of them, Benjamin, having for several years been associated with his father in business.

—MRS. MARY A. SCHALL, widow of John Schall, of 1020 North 18th street, St. Louis, died recently. She was the mother of Edward J. Schall, proprietary buyer for Meyer Brothers Drug Company, and of Charles W. John A. William J. and Eugene L. Schall, also known to the drug trade, and Mrs. Joseph Reemer.

—DR. ALBERT W. NEUFELD died recently at the Mount Sinai Hospital. He was for many years chief pharmacist of the New York Dispensary, a graduate of the College of Pharmacy, College of Physicians and Surgeons, and City College of the City of New York, a fellow of the Academy of Medicine, and a member of the New York County Medical Society and Harlem Medical Society.

## BOARD EXAMINATIONS

### Illinois.

SPRINGFIELD, April 17.—At the March meeting of the Illinois State Board of Pharmacy in Chicago, 31 out of a class of 107 applicants for registered pharmacist, and 38 of the 75 candidates for assistant pharmacist passed successful examinations. Their names follow:

REGISTERED PHARMACISTS.—George Afremow, Ben Aron, Frank R. Branne, James Casey, Edw. J. Comerford, S. V. Cross, C. W. Gauth, John R. Hall, Otto W. Leininger, Joseph Lieberman, J. F. Mueller, B. E. McGuire, Frank H. Niemeyer, William E. Plotz, John M. Rambo, Charles E. Seaton, John J. Staszak, Chicago; David E. Swanson, Harry A. Underdiner and F. E. Wells, all of Chicago, and Fred N. Buerkett, Springfield; A. F. Cover, Toulon; F. L. Fraumenhoff, Aurora; St. Clair Madden, Grayville; Arthur W. F. Mester, Quincy; T. J. McNamara, Blue Island; Oscar C. Oberg, Rock Island; Samuel N. Rinde, Berwyn; Lester Rink, Peoria, and Claude E. Tilton, Fairmont.

ASSISTANT PHARMACISTS.—H. W. Allen, Henry C. Barthel, Conrad A. Berg, Joseph S. Beyer, D. E. Binanti, Floyd F. Birch, Walter J. Carrick, Ben G. Chambers, B. Ross Cool, Charles R. Crain, David Funt, Louis E. Halperin, William A. Herrick, S. S. Horvitz, A. C. Kaufmann, C. M. Kowalski, Charles Matey, Alex F. Murawski, Samuel W. Melton, Robert H. McVay, William A. Perkins, Arthur P. Reid, William Schaffarick, Harry G. Skinner, John P. Scott, Charles Shipman, Carl Speckhart, H. S. Sponberg, Arthur A. Sprague, Joseph C. Streit, Ralph H. Walker, William A. Werth, all of Chicago, and John S. Benson, Joliet; C. E. Brown, Helron; Harley M. Carlisle, Eldorado; John J. Levitt, Cairo; Charles F. Snyder, Peoria, and Arthur P. Zimmer, Monmouth.

The next meeting of the board in Springfield for the examination of applicants for assistant pharmacists and registered pharmacists will be held on Tuesday, May 25, at 9 a. m., at the State House.

### Georgia.

MONTICELLO, April 17.—Secretary Charles D. Jordan announces the results of the recent meeting of the Georgia Board of Pharmacy held in Atlanta, April 5 and 6. Fifty-six applicants presented themselves for examination, among them being one lady and three negro men. Forty of these applicants were successful, the following receiving druggists' licenses:

H. B. Bates, Wilson, N. C.; H. B. Bayne, Atlanta, Ga.; H. T. Benton, Commerce, Ga.; A. S. Brewster, Newnan, Ga.; L. N. Brown, Lyons, Ga.; W. E. Butler, Valdosta, Ga.; Philip Cohen, Atlanta, Ga.; J. L. Cooley, Sandersville, Ga.; I. H. Dent, Atlanta, Ga.; George D. Elrod, Adairsville, Ga.; T. C. Fletcher, Mayo, Fla.; K. E. Forster, College Park, Ga.; Gwynon Hall, Quincy, Fla.; E. D. Harris, Elberton, Ga.; C. M. Herndon, Hartwell, Ga.; Ben Hill, Pelham, Ga.; A. W. Early, Dawson, Ga.; J. H. Johnston, Washington, Ga.; H. Johnson, Jacksonville, Fla.; W. L. Maize, Carrabelle, Fla.; J. H. B. Page, Wrens, Ga.; J. C. Payne, Shellman, Ga.; J. K. Saunders, Hartsville, S. C.; J. T. Seiman, Douglasville, Ga.; C. L. Spear, Waycross, Ga.; J. H. Souther, Blairsville, Ga.; W. J. Walker, Montezuma, Ga.; E. C. Welch, Lumpkin, Ga.; H. H. Harrison, Jacksonville, Fla.

The following obtained apothecaries' licenses: H. L. Anderson, Bartow, Fla.; L. S. Archer, Macon, Ga.; G. M. Bird, Metter, Ga.; B. H. Hale, Zebulon, Ga.; Livingston Henry, Macon, Ga.; W. J. Maloy, Madison, Fla.; R. C. Robertson, Clayton, N. C.; G. A. Tanner, Douglas, Ga.

The following obtained pharmacists' licenses: C. E. Brinson, Wrightsville, Ga.; Miss Jessie Wimberly, Gainesville, Fla.; F. E. Williams, Macon, Ga.

The Georgia board issues three grades of license: Druggist, from 75 to 85 per cent; apothecary, from 85 to 90 per cent; pharmacist, from 90 to 100 per cent. These three grades are used to designate the percentage made on examination and the legal rights of each are the same.

The next meeting of the board will be held in Macon, Ga., Monday, May 24, this meeting just preceding the annual meeting of the Georgia Pharmaceutical Association.

**WASHINGTON BRANCH FAVORS THE MEETING.**

**Wants All Pharmacists Invited to Be Present at Atlantic City During Convention of the A.M.A.**

WASHINGTON, April 17.—Vice-President S. L. Hilton presided at the April meeting of City of Washington Branch of the American Pharmaceutical Association. "The Use of the Compound Microscope in Pharmacy" was discussed.

Prof. Burton J. Howard described the compound microscope and discussed the nature and the cost of the apparatus necessary for work in connection with drug analysis.

W. W. Stockburger discussed the use of the microscope in detecting drug adulterations, and expressed gratification at the increased interest in the use of the compound microscope. He discussed the economic conditions that have brought about the changes in the method of making and marketing drugs and medicines and pointed out the need for becoming thoroughly acquainted with the structural characteristics of the several drugs and their adulterants. He enumerated a number of drugs and their adulterants and pointed out that the compound microscope offered a ready means for distinguishing between them.

Dr. Motter called attention to the need for applying the microscope in a practical way and pointed out that the meetings of the branches offer an excellent opportunity for developing interest in the science of pharmacy.

Professor Kalusowski called attention to the unsatisfactory nature of the official descriptions of vegetable drugs. He asserted that comprehensive descriptions of powdered drugs were absolutely necessary as pharmacists, at the present time, see only the powdered or comminuted drugs. He believes the time has come when powdered drugs should be recognized by the Pharmacopoeia.

Messrs. Howard and Stockburger were given a vote of thanks for their interesting and practical presentation of the subject.

On behalf of the delegation which attended the meeting of the Philadelphia Branch of the A.P.H.A., Dr. Motter made a report. After considerable discussion it was resolved to request the chairman of the A.P.H.A. delegation to the meetings of the Section on Pharmacology and Therapeutics of the American Medical Association to organize a meeting and to invite pharmacists at large, irrespective of A.P.H.A. membership, to attend.

M. I. Wilbert reported that he had attended a meeting of the New York Branch of the A.P.H.A., at which the newer pharmacopoeias of the world were ably discussed.

It was decided to devote the next meeting to a joint session with members of Baltimore Branch for discussing some of the pharmaceutical problems involved in the revision of the National Formulary.

**Pa. Travelers to Entertain.**

PHILADELPHIA, April 17.—President Frank W. Smith, of the Traveling Men's Auxiliary of the Pennsylvania Pharmaceutical Association, has issued a call for a meeting next Thursday of the executive committee at 514 Arch street, when plans for the coming meeting at Bedford Springs, Pa., will be considered. The traveling men propose to entertain the druggists and others who attend on at least two occasions, and just what form this entertainment will take will be decided next week. Numerous applications for membership will also be acted upon and a report received upon the progress of the membership campaign in the interests of the State association that is being carried on by the traveling men.

The druggist who is everlastingly telling his clerk to "get a hump on" is generally an old dromedary himself.

**SCIENTIFIC SECTION PROVES A SUCCESS.**

**Representative Attendance and Valuable Papers Mark the Interest in Innovation of Phila. Branch.**

PHILADELPHIA, April 17.—The attendance as well as the discussions were features of the initial meeting this evening of the recently organized Scientific Section of the Philadelphia Branch of the American Pharmaceutical Association held in Odd Fellows' Temple. Those who participated included prominent chemists—some of them connected with the large manufacturing houses—representatives of the faculties of the local colleges of pharmacy and retail druggists.

The first paper was by Prof. J. V. S. Stanislaus, whose subject was "Mechanical Indicator for Judging the End Reaction when Estimating Sugar with Fehling's Solution." He described a very ingenious analytic method for determining with great accuracy the point when all of the copper is reduced to cuprous oxide, thus rendering the results comparable with the tedious gravimetric determination.

"Some Suggestions in the Examination of Medicinal Chemicals" was the subject of a very valuable paper by Prof. H. B. Meade. Attention was called to several inaccuracies in the United States Pharmacopoeia and suggestions given for many improvements in this connection. A plea was also made for uniform methods in taking melting and boiling points.

Prof. C. H. LaWall gave the results of hundreds of experiments he has made in the course of his study as to whether formaldehyde is formed when solutions of cane sugar are boiled. Hahn's milk sulphuric acid test for formaldehyde gave positive results in many cases and this was considered a group test rather than an absolute test for formaldehyde as shown by repeated negative results with various reliable tests. It was shown that while some member of the aldehyde group probably is formed when solutions of cane sugar are boiled it is very certain that formaldehyde is not. According to Professor LaWall, the interfering body which is responsible for the positive result with Hahn's milk sulphuric acid test may be formaldehyde. When the latter was added to control these experiments, its presence was easily detected in very high dilutions.

Of equal interest was the discussion of these subjects led by Chairman Joseph L. Turner, Secretary W. A. Pearson and Messrs. Blair, Wilder, Kimberly, Stanislaus, Graham, Sindall and others.

**Successful New Orleans Druggist.**

FRED A. EARTHART, new secretary of the Louisiana State Board, is one of the younger New Orleans druggists who started at the bottom and is now the owner or part owner of several stores. He began 15 years ago with the wholesale house of Finlay & Brunswick, and four years later entered the retail trade. He now owns a store at Chippewa and Eighth streets and is senior partner in Earhart & Berner, at Valence and Froese streets. He is a member of the A.P.H.A., the Louisiana State P.H.A. and the Orleans P.H.A.

**DEFICIENT DRUGS REJECTED.**

**Importers Refuse to Accept Hyoscyamus Not Up to Standard.**

PHILADELPHIA, April 17.—The failure of a large proportion of the importations of hyoscyamus at this port recently to conform to the standards of the U.S. Pharmacopoeia has resulted in the export of a large quantity of this drug and the holding of other portions, pending the investigation by the Custom House officials. A peculiar feature of the case is that while the quality of the drug offered here is in most cases deficient in alkaloidal value, it is understood that at other ports the leaves conform to Pharmacopoeial standards.

Analysis indicates that in most cases the crop is an old one, although it is admitted that if the investigation was followed up, these imports might show the presence of foreign leaves and other articles that would indicate adulteration. Authorities of the port are not prepared to say whether or not these inferior goods have been offered at some other port of entry and upon being refused were either reshipped to Philadelphia or sent back to the consignor, who then put them into other containers and forwarded them to Philadelphia. Practically all of the drugs imported here are intended for the local mar-

ket and are manufacturers, in Philadelphia or the immediate vicinity. When the consignees were notified of the fact that certain goods did not conform to Pharmacopoeial standards, they promptly refused to accept them. In fact the officials here report a general disposition on the part of the trade to co-operate in every way with the Government departments in the interest of pure drugs.

### GREAT ACTIVITY IN W.O.N.A.R.D. CIRCLES.

#### Delegates Sent by Boston Chapter to Other Organizations and Aid Given Anti-Tuberculosis Crusade.

Boston, April 19. Thursday's meeting of the Boston Chapter of the W.O.N.A.R.D. was held at the Hotel Vendome and was of an educational character. The details and progress of the crusade against tuberculosis and the means of participating in the great movement were presented by two speakers from two somewhat different standpoints. Dr. Eugene Browning, president of the Cambridge Anti-Tuberculosis Association, and Mrs. George H. Holdcroft Medford, chairman of the department of anti-tuberculosis of the Massachusetts Federation of Women's Clubs, were the speakers.

At the business session which preceded the formal addresses, Mrs. J. G. Godding and Mrs. W. H. Henderson were elected delegates to the annual meeting of the Massachusetts Federation of Women's Clubs, with which Boston chapter is allied. The meeting will be held at Springfield, May 19-20. Mrs. C. A. Stover and Mrs. Charles H. Davis were elected alternates. Mrs. Henderson and Mrs. Kidder were also elected delegates to the convention which is to be held next week in Boston in the interest of boys.

Five o'clock tea was served at the conclusion of the exercises, the pointers being Mrs. Henderson, Mrs. Kidder and Mrs. Gammon. Plans were set in motion for the annual meeting of the chapter which will be held at the Hotel Vendome on May 27.

#### Mrs. Lee Again President of Philadelphia Chapter.

Philadelphia, April 17. The annual election and the reports of officers and committees, indicating a most prosperous condition of affairs, were the features of the annual meeting on Tuesday of Chapter 6 of the W.O.N.A.R.D., at the Philadelphia College of Pharmacy. As there were no other nominations, the secretary cast the ballot for the ticket already named, as follows: President, Mrs. William E. Lee; first vice-president, Mrs. N. D. Streeter; second vice-president, Mrs. Harry G. Comp; recording secretary, Mrs. W. T. Burke; corresponding secretary, Mrs. Carl W. Shull; treasurer, Mrs. Josh E. Marsden.

The entertainment committee turned over \$200 as the proceeds from the recent entertainment and the treasurer announced a balance of \$150. Three new members were elected, bringing the membership up to 265. The next event will be a dance at the college on May 7. The meeting on Tuesday was followed by a social session, during which the piano solos by Mrs. E. W. Godhardt and the vocal solos and recitations by Mrs. H. A. Nolte, added very much to the enjoyment.

#### Enchre Held by Washington Chapter—Picnic Coming.

Washington, April 17. Washington Chapter, W.O.N.A.R.D., gave a matinee enchre at the residence of its president, Mrs. Charles J. Fuhrman, on April 14. There was a good attendance of members. Mrs. J. Layden White, of New York, was present as a guest. After the cards, dainty refreshments were served. The winners were: Mrs. W. H. Bradbury, Mrs. Charles J. Fuhrman, Mrs. A. C. Taylor, Mrs. Walter MacDonald, Miss Sarah Richardson, Mrs. G. C. C. Simms, Mrs. Roger Dufay, Miss C. Kubel, Mrs. E. Kubel and Mrs. J. Layden White.

On the following day the monthly meeting was held at the residence of President Mrs. Fuhrman. Aside from routine business, consideration was given to a proposed rummage sale and also to plans for cooperating with the D.C.R.D. in a picnic which will be held when the weather is sufficiently warm.

#### American Druggists' Syndicate Car on Fire.

INDIANAPOLIS, April 17. American Druggists' Syndicate's Pullman exhibition car has arrived here safely. At Hamilton, Ohio, it caught fire and had a narrow escape. Loss, \$75.

### C.R.D.A. INCREASES ITS VALUE TO MEMBERS.

#### President Yeomans Delivers Stirring Address at End of Organization's Most Successful Quarter.

CHICAGO, April 17.—The Chicago Retail Druggists' Association held its quarterly meeting on Tuesday evening. President Yeomans reviewed the work of the organization for the quarter. He reported a substantial condition of affairs, together with satisfactory progress toward simplifying executive work. He prophesied an increased value from the services of the association to its members and called upon them for a proper sense of individual appreciation for the principles that underlie the common good. He referred to the get-together meetings of the Chicago Medical Society and the association and asked members to foster those interests. He condemned counter-prescribing and stated that physicians were discontinuing the tablet dispensing habit as a result of the U.S.P. and N.F. work. He praised the work of the propaganda committee of the Chicago association and condemned the patent medicine business.

Mr. Yeomans spoke of the efforts of the organization towards restricting the increase of drug stores in Chicago beyond the requirements of trade and cited the work of the Retail Liquor Dealers' Association in having enacted an ordinance restricting the licenses pro rata to the population. He asked that a special committee be appointed to look into the matter of having such a measure passed relating to the drug stores in Chicago. The liquor licenses are based on a one to five hundred population proportion and in European countries pharmacy restrictions have been made as high as one to ten thousand population. Drug stores in Chicago at the present time are at the ratio of one to one thousand population.

During the quarter he reported that the organization had prosecuted more than twelve cases, some of which were settled out of court and others were successfully brought to issue before the judges.

Secretary I. M. Light stated that the quarter had been the most successful in the history of the organization owing to the fact that more dues were paid during the period than ever before within three months. He said the get-together dinner at the Auditorium on January 19 was the main event in the work of the secretary for the period. He called upon the members for closer cooperation on all common matters. The secretary's financial statement showed receipts of \$4969.30 for the quarter and expenditures of \$2077.59, leaving a balance in the bank of \$2891.71.

Treasurer Storck, in his report, showed receipts for the quarter of \$5113.05 and expenditures of \$2322.92, with a balance of \$2780.15 in the bank. The discrepancy between the two reports is accounted for by the fact that there was considerable outstanding financial business when the reports were made up.

The report of committee on reorganization was adopted with some debate and alterations. The new constitution does not differ very materially from the old by-laws. Considerable unfinished business went over to a special meeting on April 27.

#### A. Ph. A. Section and Boston Retailers Meet Jointly.

Boston, April 19. The B.A.R.D. and the New England Section of the A. Ph. A. held another joint meeting Wednesday night at the Hotel Plaza.

The members of the B.A.R.D. assembled earlier in the afternoon at the Massachusetts College of Pharmacy, transacted routine business, elected one new member, and adjourned to the Hotel Plaza in Columbus avenue, where they became the guests of the New England Section. The night was stormy, and the attendance fell somewhat below that of the previous meeting, but the numbers were still above the average, and showed the wisdom of again holding a union meeting. C. Herbert Packard, of East Boston, president of the New England Section, presided, and seated beside him was August Thiel, proprietor of the Bon Brook distillery, and a graduate of the Chicago College of Distilling and Blending. Mr. Thiel was the chief after-dinner speaker, and he gave a most interesting and comprehensive history of wine, with especial reference to the pharmaceutical use of wine as prescribed by the U.S.P. and the N.F.

A general discussion followed the paper, in which Charles Sawyer, James F. Finerman and Prof. Elie H. LaFiere took part.

## DIST. OF COLUMBIA DRUGGISTS HOLD ANNUAL MEETING—INTEREST AND ACTIVITY INCREASE.

AUGUSTUS C. TAYLOR, Washington,  
President District of Columbia R.D.A.

W. S. RICHARDSON, Washington,  
Vice-Pres. Dist. of Columbia R.D.A.

W. H. BRADBURY, Washington,  
Secretary District of Columbia R.D.A.

WASHINGTON, April 17.—The Washington R.D.A. held its annual meeting at the College of Pharmacy on April 13. President Augustus C. Taylor, Secretary Wymond H. Bradbury and Treasurer H. C. Easterday were unanimously re-elected. W. S. Richardson was chosen vice-president and the following executive committee was elected: Paul Pearson, Samuel L. Hilton, C. J. Fuhrman, W. R. Hill, Louis Flemer, G. W. Hurlbans, F. P. Weller, C. G. Gross, C. B. Campbell, W. P. Herbst, R. W. Builey.

Chairman F. P. Weller, of the entertainment committee, made a report dealing with the recent "get-together" entertainment at Carroll Institute. The association gave the committee a vote of thanks for its successful conduct of the affair and also instructed the secretary to send a letter of thanks to those who had volunteered their services for the musical and literary features.

The secretary and treasurer made satisfactory reports dealing with finances and other matters and the auditing committee certified to the correctness of accounts.

Chairman Flemer, of the propaganda committee, reported satisfactory progress and named six popular N.F. and U.S.P. preparations which his committee had selected for immediate efforts.

The report of Chairman Hilton, of the telephone committee, called attention to the fact that some other cities were receiving a much larger portion of telephone receipts than are the druggists of the District. He suggested that an effort be made whereby a more favorable contract might be arranged with the telephone company.

Dr. W. P. Andrews, of E. R. Squibb & Co., spoke upon the N.F. propaganda. He interestingly told of the different ways in which the work is received in different sections. Dr. Andrews' services have been placed at the command of the D.C.R.D.A. for several weeks. He is making a personal canvass of the local physicians.

J. Leyden White (Joel Blau) spoke briefly upon the subject of stimulating attendance at organization meetings and described some methods that had been used successfully by organizations elsewhere.

The Washington Association is publishing a list of the most generally sold U.S.P. preparations which contain alcohol, opium and other drugs whose content must be given on all labels in the District. A note in this brochure advises the members to use "THE ERA DOSE BOOK" as their guide for ascertaining the percentages of the prescribed drugs.

The third and fourth of the series of blotters which are being sent to physicians have been mailed. The third gives a list of N.F. and U.S.P. preparations commonly known by more than one name and the fourth deals with essence of pepsin.

Each succeeding meeting of the Washington Association shows increased and harmonious effectiveness. "Scraps" seem to have gone on an unlimited leave of absence.

#### DR. E. F. KELLY SUCCEEDS LONDON MAN.

Management of Sharp & Dohme Laboratories in Baltimore Passes From Aubrey T. Hill, After Two Years.

BALTIMORE, April 17.—After having been with Sharp & Dohme as general manager for two years, Aubrey T. Hill, of London, manager of laboratories, on Tuesday last severed his connection with the house. Before connecting himself with Sharp & Dohme Mr. Hill was with Burroughs Wellcome & Co., of London, in a similar capacity. During Mr. Hill's incumbency a number of changes were made in methods and personnel and some of the older employees retired. His own resignation was not altogether a surprise.

It is Mr. Hill's professed purpose to return to London and engage in the retail drug business there, an intention which he is said to have entertained for some time past.

Mr. Hill is succeeded by Dr. E. F. Kelly, one of the most popular young pharmacists in Baltimore, who has been with Sharp & Dohme almost since his graduation from the Maryland College of Pharmacy in 1902.

#### PROSECUTING THE SELLERS OF COCAINE.

Prison Term and \$500 Fine for New York Druggist and Much Official Activity in Other Localities

Fred Lo Pinto, a druggist of 200 Grand street, Manhattan Borough, New York City, was sent to the penitentiary for 11 months and 29 days by Judge O'Sullivan in Part I. General Sessions, last week. Lo Pinto was found guilty of selling cocaine, and the police say he is one of the most persistent offenders in this respect. The court also imposed a \$500 fine.

Detective John Maddock, on January 17 last, went to Lo Pinto's shop and purchased 86 worth of the drug. It was said that the druggist had already served a jail sentence in Buffalo. He is 30 years old.

Victor Harper, a druggist, of 60 East 116th street, was held recently in \$500 bail in the Harlem court on a charge of failing to keep a record of the names and addresses of purchasers of cocaine.

#### Served Eight Months on Cocaine Charge.

NORFOLK, Va., April 17.—K. D. Taylor, a drug clerk, sent to prison for two years for violating the anti-cocaine law, has been released after having served eight months; the Appellate Court decided that the evidence was insufficient.

# LETTER BOX

## A Scheme of Inland Revenue.

Editor *The Pharmaceutical Era*:

The press makes reference quite freely to the declared purpose of some members of the Congress, now sitting, that to offset the deficit in the National Treasury they would favor a revival of the Stamp Tax of 1898, at least on medicines. Now, there is no more reason for taxing a medicine to support the Federal Government, because it is a medicine, than for taxing shoes, or clothing, or machinery, or anything else. The Stamp Tax, when in force, worked a hardship on the retail druggist because of the increased wholesale prices asked by many proprietors, which could not be added to the retail price, and also from having to stamp his own little specialties, having only a limited retail sale.

But, there is a basis for taxation, if needed, which would be entirely equitable, and would be no burden on those who paid it. Let a tax be laid of one-half of one per cent on the printed retail price on all articles having the protection of a Trade Mark, issued by the United States Government. This would apply to a great variety of goods which have an enormous volume of business. There are probably no figures available on which to predicate an estimate of the returns from this source, but it would very likely exceed anybody's estimate, and if the tax were honestly collected and administered, there would never again be a deficit, but a surplus instead. It might very well be made a permanent tax and for a distinctive name be called Inland Revenue. The tax should be represented in the form of stamps, to be printed in the necessary fractions of a cent to cover articles from five cents upwards. The sale of the stamps to owners of trade marks could be carried on by the Internal Revenue Department, under regulations prepared by the Secretary of the Treasury. There could be no evasion by those liable to the tax as every trade mark is recorded in the Patent Office. For the purposes of this act, the question of citizenship is not material. Every owner of a United States trade mark, resident or non-resident, citizen or alien, who manufactures the article in this country for domestic or export trade, should affix the proper stamp to every package. The stamping should be a part of the labeling process. Provisions may be made for private design stamps.

There is ample reason and warrant for such a tax in the circumstance that the United States backs the owner of the trade mark and punishes infringers. The costs of such suits might properly be chargeable against the fund raised by the tax. There would doubtless be a strong opposition from many wealthy owners of trade marks, but so there would be to any inalienable legislation involving a tax except in time of war. I believe if this form of tax can have the careful consideration of the members of the Congress, they will concede it to be right and reasonable and just to all.

The person or firm doing the largest volume of business in a trade marked article would pay the largest tax and the smallest trade would pay the smallest tax. The surplus which would inevitably result might very well be devoted to the purposes of Coast Defence or similar military or naval use to become available in time of war. Or, the surplus might be used to eliminate some other form of taxation; for example, that feature of the Internal Revenue which for forty years and more has compelled respectable apothecaries to submit to the insulting appellation of "Retail Liquor Dealer."

Brooklyn, N. Y.

THOS. D. McHENRIE.

## Boston Physician Arraigns Druggists.

Editor *The Pharmaceutical Era*:

Permit me to lay before you some experiences that I am having, as a general practitioner, with druggists here in Boston.

In the first place, druggists in this section, at least, have had a good many complaints to make of late, that general practitioners wrote for proprietary and even patent medicines to so large an extent that they almost excluded the regular prescription writing, and any of the N.F. or U.S.P. preparations.

They made the claim that physicians should know for what

they were writing; second, that they should not permit themselves to be taught by any sample man, or drug manufacturing house what they should prescribe; third, that the doctors should work in co-operation with the druggists, so that the druggists could fill regular prescriptions, U.S.P. and N.F. prescriptions, and thus enable the druggist to realize a larger percentage of profit than would be possible if he were filling prescriptions for proprietary or patent medicines. With all of the above, I am heartily in accord.

Now for the facts: I write for a prescription of Unguentum Resorcinol Comp. N.F. My patient takes it to one of the best drug stores in Boston, and it is filled with less than the original package. Another patient, has my prescription for Glycerinated Elixir of Gentian, N.F., and it is filled by one reputable house, with Gray's Glycerin Tonic, Comp.; the third patient of mine passing over the counter a prescription for Syrup Hypo-phosphit Comp., U.S.P., is handed an original package of Fallow's Syrup. These are only three instances, out of quite a large number that have come under my observation.

I will just mention one more instance, that is now under 48 hours old. A prescription of mine for Elixir Viburni Opuli Comp., N.F., traveled around to four different drug stores, at one of which they said they had never heard of it; at a second it was called a patent medicine, and two others said it was a proprietary to fill which they would have to send downtown to the jobber.

My patient in despair, telephoned me, asking me what to do with the prescription. Knowing an up-to-date druggist, I told her where to get the prescription filled, which was carefully and immediately done. I will say right here, that this statement that I have made is a fact, and I have the names of the druggists, if they should be required. I dislike very much to make such an arraignment as this, but I believe it is high time that our druggists, if they are not familiar with original U.S.P. and N.F. preparations, should at the earliest possible date familiarize themselves with the same.

The druggist can hardly expect co-operation with the intelligent physician until he has done so. I am well aware that there are many so-called physicians that prescribe very large numbers of proprietaries, many of which are of doubtful value, but, I should like to ask, what inducement can there be for a physician to prescribe old line pharmaceuticals, when the druggist, to whom his prescription will go to be filled, has an utterly inadequate knowledge of standard U.S.P. and N.F. preparations, not even, as I have shown in at least one instance, knowing or recognizing the name of a regular N.F. formula.

I give you permission to regard this letter as a private or as a public one, as you may see fit. Very truly yours,  
362 Commonwealth Avenue, Boston, C. O. KEPLER.

## The Personnel of the New Louisiana Board.

Editor *The Pharmaceutical Era*:

Referring to your remarks in reference to the recent appointment of a new State Board of Pharmacy by Governor Sanders, I will say that the appointments are most excellent ones. One thing about them, too, is that they are in no way connected with any pharmaceutical college, which is saying more than the other board could. No one having a connection of any kind with an institution of that class should hold office of this character. As to the Louisiana State Pharmaceutical Association, its membership does not include 5 per cent of the retail druggists and pharmacists of the State. What reason has it to dictate appointments?

New Orleans, La.

WILL T. JACKSON.

## A Good Way to Expedite Shipments.

Editor *The Pharmaceutical Era*:

I have found that I could expedite shipments and save considerable time by learning from my local freight agent the best route of shipment and specifying on my order that it be shipped by a certain route. Please call attention of brother druggists to the fact through your columns.

Lyons, N. Y.

G. T. GETMAN.

## New Pure Food Bill Likely in Wisconsin.

MADISON, April 17.—Indications are that a new pure food bill will be drafted to be presented to the Wisconsin Legislature at the present session by the committee on dairy and food.

**TARIFF, INSURANCE AND FREIGHTS DISCUSSED BY MANUFACTURING PERFUMERS' ASSC. OF U. S.**

**JOHN BLOCKI**, Chicago,  
Vice-Pres. Mfg. Perfumers' Assc.

**CHAS. W. JENNINGS**, Grand Rapids,  
Second Vice-Pres. Mfg. Perfumers' Assc.

**J. CLIFTON BUCK**, Philadelphia,  
President Mfg. Perfumers' Association.

The tariff question was the predominant topic under discussion by the Manufacturing Perfumers' Association of the United States at its 15th annual convention, which was held at the Drug and Chemical Club, 100 William street, New York, last week. President Theodore Ricksecker, in his address, characterized the matter of the proposed tariff legislation as a "buzz saw" and the hottest question of the day. The work of the president and a number of colleagues on the legislative committee in opposing the 25 per cent proposed duty on raw material used in perfume production was outlined in the message. Mr. Ricksecker praised the Dingley Act and announced that assurances which could be depended upon had been given the association that the essential oils would be retained on the free list. Most of the tariff discussion took place at a general executive session on Wednesday and a long address was given on the subject by Alfred G. Wright.

Life insurance was again recommended by the president as was also the minimizing of the prepayment of freight costs on goods to a basis of 2 per cent, with a penalty of a cash forfeiture if violated by pledged members. Referring

to the past year's stagnation in general business, President Ricksecker said: "Many have tried to fasten a share of responsibility for the business depression upon our honored retiring President, but when time allays the irritation and settles the dust of his trivial mistakes, it will be seen that history has written the name of Theodore Roosevelt high in the list of American Presidents and as a leader of men in the world's moral and material progress."

The report of Secretary Willbur H. Hyde, of Cleveland, showed the membership to be as follows: Active members, 46, associated, 57; honorary, 1; total, 94. This is a gain of one active member over last year and was considered a good showing, as the total resignations amounted to nine members. Following are the names of the firms admitted to membership: Active, John Blocki & Son, Chicago; Seely Manufacturing Company, Detroit; associated, Talcum Puff Company, Ketchikan Lithographic Company, Hero Fruit Jar Company, T. W. Lemmer Company, Hazel Atlas Glass Company, B. L. Pope,

**FRANK B. MARSH**, New York,  
Re-elected Treas. Mfg. Perfumers' Assc.

**WALTER J. HATHAWAY**, New York,  
Elected Secretary Mfg. Perfumers' Assc.

American Stopper Company, and Illinois Glass Company.

Treasurer Frank B. Marsh reported a balance on hand of \$6580.14, which is smaller than last year's figures, due to the extra expenses in publishing last year's large proceedings and the greater outlay necessary for the legislative committee.

All the reports and recommendations of the officers and the standing committees were, as usual, referred to the committee on resolutions, of which James E. Davis, of Detroit, is chairman. The recommendations were taken up serially at the session on Wednesday afternoon. The important features were as follows:

The formation of the committee of three members to consider a feasible plan of life insurance and report at the next convention. The resolutions to form this committee were adopted last year, but as no members were appointed to serve, the recommendation was again acted upon and adopted at this meeting.

The recommendation of the membership committee relative

to the changing of article 3 in the constitution, so as to admit to active membership manufacturers of toilet articles who are not perfume manufacturers. This matter was discussed to some length, the committee arguing that the association now practically includes all manufacturers eligible to membership under the constitution, and unless such a change is made the additions of members will be a slow process. The proposition was voted down as it was thought that the addition of other branches not strictly in the perfumery line would bring about a too diversified combination of interests and produce an unwieldy organization. The committee announced that they only recommended the plan with great hesitancy. A phrase of the same article of the constitution was later changed to read "toilet preparations" in place of "toilet articles."

The recommendations of the committee on parcels post were the same as last year, namely, favoring a system of transmission through the mails of liquids and semi-liquids, that would reduce the rate of postage. This recommendation was indorsed, but several voted against a parcels post.

The matter of publishing a supplement to the regular list of trade names every three months, recommended by the committee on fraternal relations, was indorsed and it was decided that the work rest with one man who should thoroughly familiarize himself with it.

Minimizing of the prepayment of freight costs to a rate of 2 per cent, with forfeiture of a cash penalty, if plan was adopted unanimously or by 90 per cent of the members. There was considerable discussion on this recommendation and many spoke in favor of adopting the plan or an agreement calling for the shipping of goods f. o. b. factory. It was the opinion of several that while such a procedure would not be illegal, the action might be construed by the courts to be a combination in restraint of trade. The president called upon individual members to express their opinion and finally it was decided to appoint a committee of three, of which the president will be chairman, to promulgate some plan and report at the next meeting.

A. B. Calisher brought up the matter of giving discounts and bonuses in connection with the discussion on the freight proposition and stated that there were now so many drains in the business that it would be a simple matter to make it unprofitable and suggested that the bonus question be also taken up by the committee in considering the freight matter.

Prof. J. P. Remington, of Philadelphia, chairman of the Committee on Revision of the U. S. P., addressed the convention upon the subject of testing essential oils, and also announced that the new Spanish edition of the Pharmacopoeia had been completed and would soon be ready for distribution.

Wilbur F. Wakeman, secretary of the American Protective Tariff League, addressed the convention on the matter of the tariff. He stated that his association was not opposed to any good plan providing for the looking after of the tariff to some extent, but did not favor the continual watching and revision of duty rates, as it was certain that such a method would make business unstable. The Payne Bill, said Mr. Wakeman, would be a good measure and that the greatest confidence could be placed in the Ways and Means Committee.

Percy Strauss, head of R. H. Macy & Co., of New York, told the members in a very entertaining manner about the perfumery business as viewed by the department stores. He stated that from his estimates, more than 55 per cent of the perfumer's product is now sold through the department stores and that he stood strongly for unrestricted trade and considered any protective price policy an error.

The only paper read at the convention was by George Luaders. It was an exhaustive report on musk and civet. The paper was commented upon by the members for its unusual excellency throughout, and Mr. Luaders was tendered a rising vote of thanks.

The officers elected for the ensuing year are as follows: President, J. Clifton Buck, Philadelphia; vice-president, John Blocki, Chicago; second vice-president, Charles W. Jennings, Grand Rapids; secretary, Walter T. Hathaway, New York; treasurer, Frank B. Marsh, New York; executive board, Alfred G. Wright, Rochester; Henry Dalley, New York; Theodore Ricksecker, New York.

The social part of the programme was in charge of J. M. Montgomery, of the entertainment committee. On Tuesday evening a theater party followed by a supper at Hotel Astor was a feature. The annual banquet was held at Hotel Plaza and on this occasion the retiring president was presented with

a silver cup by President Buck on behalf of the association. The speakers at the banquet were William McCarroll, of the public service commission; former Senator Charles A. Towne, and Charles Batell Loomis.

## REFEREE BOARD IS DECLARED LEGAL.

**Attorney-General Upholds the Appointment of the Expert Body by the Roosevelt Administration.**

WASHINGTON, April 17.—Attorney-General Wickersham has rendered a decision upholding the legality of the appointment of the Referee Board of Consulting Scientific Experts which was appointed by President Roosevelt to pass upon several pure food rulings by Dr. Harvey W. Wiley, Chief Chemist of the Department of Agriculture.

The Attorney-General's action, which was announced at the Department of Agriculture, really establishes the Referee Board, of which Dr. Ira Remsen, of Johns Hopkins University, is the head, as the Supreme Court on food products. The board was in session at the time at Baltimore and heard the arguments of New Orleans molasses and California fruit industries in favor of the use of sulphurites as preservatives, which has been forbidden by Dr. Wiley.

At the Bureau of Chemistry no statement was forthcoming, but no secret is made of the fact that the establishment of the Referee Board was regarded as opposed to Dr. Wiley's ideas on the subject of pure foods and their adulteration.

President Roosevelt was appealed to by catsup manufacturers and others, who declared that the Wiley ruling against the use of benzoate of soda was ruining their business.

The Referee Board was the result, but the legality of its appointment and the compensation of \$25 a day and expenses for traveling was attacked by those in favor of radical enforcement of the Pure Food Law. The question was referred to the Department of Justice. The statement issued by the Department of Agriculture says:

"The Attorney-General points out that the statutes of the United States do not provide for the creation of the Bureau of Chemistry in the Department of Agriculture, but that the existence of such bureau is recognized in the appropriation acts. The Attorney-General holds that the Secretary was authorized to accept the advice of this board, and indeed that it was necessary for him to have recourse to the disinterested and unbiased advice of eminent and expert chemists whenever a serious conflict of opinion arose as to the deleteriousness of any particular article or substance added to food. The decision of the Attorney-General that the board is legal means that the work of the board on the wholesomeness of sulphur, saccharine and copper salts will be continued."

## Drug Stores Damaged by Explosions and Fires.

MOUNT PLEASANT, Mich., April 17.—The drug store of P. Corey Taylor, in Main street, caught fire in the basement and quickly communicated to casks of turpentine, which exploded. Flames rushed up the elevator shaft to the first and second floors of the building and so dense was the smoke that Mr. Taylor and his employees had to run for their lives. Loss \$10,000; insurance, \$9500.

BIRMINGHAM, Mich., April 17.—Fire, which did considerable damage to the Cobb drug store, was caused by an explosion caused by spontaneous combustion among paints and oils. The damage was covered by insurance.

## Patent Medicine Bill Killed in Minnesota.

ST. PAUL, April 17.—By a vote of 35 to 30 the House recently killed J. A. Gates' bill regulating patent and proprietary medicines. Donald Robertson, who made the motion to kill the bill, is a druggist, while the author of the bill is a doctor. "Every time a doctor stands for a bill like this they say he's selfish," said Dr. Gates. "If a doctor were selfish he would want his people to drink patent medicine all the time because they have to come to the doctor to get cured of the harm it does."

## Wants Duty Imposed on Post Cards.

MILWAUKEE, April 17.—The Federated Trades Council of Milwaukee will petition Congress to impose a duty upon post cards printed in Germany, running in some cases to 150 per cent.

# PATENTS, TRADE MARKS, ETC.

## PATENTS.

Granted April 13, 1909.

917,753—Delbert D. Coombs, Auburn, Mo., assignor of one-half to Benjamin F. Sturgis, Auburn, Mo. Nursing bottle holder.

917,758—Emil Fischer, Berlin, Germany, assignor to Farbenfabriken vorm. Friedr. Bayer & Co., Elberfeld, Germany, a corporation of Germany. Calcium salt of dibrobenic acid.

917,816—Garry P. Van Wye, New York, N. Y. Vacuum insulated bottle.

917,828—Richard F. Wolfenstein, Berlin, Germany, assignor to P. Beiersdorf & Co., Hamburg, Germany. Process for the manufacture of soaps containing peroxides.

917,914—Neal C. Van Otterman, Grand Rapids, Mich. Bottle and ticket holder.

917,934—Johann H. Draeger, Lübeck, Germany, assignor of one-half to the firm of Draegerwerk, Hehr. & Bernh. Draeger, Lübeck, Germany, and one-half to Ernst Wiss, Griesheim-on-Main, Germany. Blow-pipe.

918,234—Charles F. Welsh, Detroit, Mich. Syringe.

918,242—Frank O. Woodland, Worcester, Mass. Wiper mechanism for labeling machine.

918,246—Garry P. Van Wye, New York, N. Y. Stopper or vacuum bottles.

918,281—Edward C. Chambers, Kansas City, Mo. Tooth-leaving device.

918,372—Peter A. Rohr, Philadelphia, Pa. Tooth-brush case.

## Favor New Patent Treaty With Germany.

WASHINGTON, April 17.—The Senate Committee on Foreign Relations has ordered a favorable report on a new patent treaty between the United States and Germany. Under the existing arrangement an American who patents an article in Germany or a German who patents an article in the United States is required to manufacture the article in the country here patented within three years.

The new treaty eliminates the requirements that the manufacture of the article must be in the country issuing the patent. The effect of this is to permit the issuance of patents by either country and have them continue in force if the article patented is manufactured in another country and imported.

## TRADE MARKS.

Published April 13, 1909.

35,032—Farbenfabriken of Elberfeld Company, New York, N. Y. Class 6. A sedative and hypnotic.

35,034—Farbenfabriken of Elberfeld Company, New York, N. Y. Class 6. An antipyretic, antineuralgic and antirheumatic.

35,025—Mary E. Chichester, Brooklyn, N. Y. Class 6. Medicated pads and plasters for the stomach, liver and other parts and organs of the human system.

36,993—Anglo-American Stock Food Company, Chicago, Ill. Class 6. Stock tonics.

37,443—Cora E. Hopkins, Philadelphia, Pa. Class 6. Mouth wash.

38,812—The Syntva Medicine Company, Spencerville, Ohio. Class 6. Remedies in tablet form for worms, coughs, diarrhoea, colic, rheumatism and diseases of the kidneys, and a tonic for the blood, nerves, stomach and also for laxatives.

39,108—Charles L. Hopkins, New Orleans, La. Class 6. A remedy for consumption (tuberculosis), muscular rheumatism, inflammatory rheumatism, sciatica and lumbago.

39,170—Robert Drogen, Washington, D. C. Class 6. A remedy for coughs, deep colds and asthma.

39,324—John G. Fambach, Cleveland, Ohio. Class 6. Remedies for coughs, colds, diseases of the skin, liver, kidneys and blood, etc.

39,756—William J. Anderson, Winnipauk, Conn. Class 6. Tonics and restoratives for horses.

39,978—William A. La Charly, Downers Grove, Ill. Class 6. A remedy for the liquor and tobacco habits.

40,311—John A. Brown, Washington, Kan. Class 6. Toilet cream.

40,430—Hiram J. Hampton, Tampa, Fla. Class 6. A cancer remedy.

## L. E. Warren to Investigate Proprietaries.

HILLSDALE, Mich., April 13.—L. E. Warren, formerly of this place, but of late connected with the Department of Agriculture at Washington, as food and drug chemist, has accepted a position with the *Journal of the American Medical Association*. His work will be largely along the line of investigating proprietary remedies sold to physicians. Mr. Warren is a graduate of the University of Michigan, where he was an instructor in the pharmacy department. He was holder of the Stearns fellowship and won the Ebert prize of the A.P.A. for his work along this line.

# THE DRUG MARKETS

## LEADING ARTICLES WITHOUT CHANGE.

### Tariff Still Exerts a Depressing Influence on the Demand—Essential Oils Back on Free List.

NEW YORK, April 19.—Nothing of special interest has taken place in the market for drugs and chemicals during the past week, and the market presents a quiet appearance due to some extent to tariff legislation. The leading articles are without any material changes and steady at quoted prices. Opium, which ought to be higher, owing to the proposed increase in duty, is without any change, and until it is definitely settled as to just what the duty will be, present quotations will likely remain stationary. Norwegian cod liver oil is slightly easier in primary markets owing to more favorable results of the fishing, but our market is unchanged and values remain about the same. Canada balsam of fir is higher owing to depleted stocks, but Oregon is easier because of lack of demand.

OPUM.—Prices remain nominally unchanged at \$4.35 for cases and up to \$4.90 for smaller quantities, with a continued inactive market reported. Powdered is finding a moderate jobbing outlet, but the demand is not urgent and dealers quote the old range of \$3.65 to \$5.00, as to quantity and seller. The arrivals in Smyrna to April 16 amount to 2947 cases.

QUININE SULPHATE.—This staple is without important inquiry and only a small routine jobbing business is reported, but there is no change in market conditions. Manufacturers' prices are maintained on the basis of 14c. per ounce for bulk in 100-ounce tins. According to cables received recently the bark shipments from Java for the first half of the current month are 940,000 pounds.

ERGOT.—During the past week there have been new arrivals of choice quality Russian ergot, which is being offered in large jobbing or manufacturing lots of 125-pound bales at 38c. per pound. There is also choice quality of Spanish obtainable in our market in 150-pound bales at 42c. per pound.

ESSENTIAL OILS.—In the Payne Tariff Bill, oils of anise, bergamot, citronella, lavender, lemon, orange and rose, were dutiable at 25 per cent ad valorem, but in the substitute tariff bill these articles are all placed on the free list. The effect of this has been to weaken the market for the moment and prices for bergamot, lemon and orange are easier.

ACETIC ACID.—There are firmer views in sympathy with the recent advance in values of acetate of lime, and manufacturers have marked quotations for U.S.P., 36 per cent, up to \$4.85 to \$5.35, as to quantity. For 28 per cent in carboys the revised quotations are \$2.55 to \$2.80. Other descriptions are correspondingly higher.

GLYCERIN.—Refined quality for prompt delivery is somewhat steadier and none of the leading manufacturers are disposed to quote under 15c. for U.P. in drums and barrels, and 16c. for cans. Contracts, however, can be procured at lower figures, it is said.

TINNEVELLY SENNA.—This article continues to find a satisfactory consuming outlet and values are well maintained at 5½¢ to 13½¢, as to quality and quantity. The better grades are said to be exceedingly scarce and the stock of prime bold leaf being decidedly small.

EPSOM SALT.—Prices are a shade easier and the revised quotations are 75¢ to 85¢ for bags and 90¢ to \$1.75 for barrels, the latter as to quality, quantity and seller.

ASAFTIDA.—A good inquiry exists and values are firm at 2½¢ to 26¢, as to grade and quantity, and only small parcels are available at the inside figure.

BICHT LEAVES.—The short variety of desirable quality is steadily held at 31¢ to 32¢, in large quantities, and a fairly good business is reported at full prices.

FOENICULI SEED.—Prices in our market are firm in sympathy with corresponding conditions at the primary sources of supply, and spot values are well sustained at 2½¢ to 3c., as to quality and quantity.

CASCARA SAGRADA.—Increasing firmness has characterized the business in this article during the week, during which there has been a good consuming demand. Dealers have been inclined to offer sparingly at 8½¢ for new and 9c. for old.

Indications are considered favorable to improvement in values. ARNICA FLOWERS.—Prices are somewhat irregular and quotations show the wide range of 11¢ to 14c., as to quality, quantity and seller. Some business has been reported at the higher figure.

VANILLA BEANS.—Bourbons are again higher with continued activity, and spot quotations for the better grades have been advanced to \$2.50 to \$3.00, as to quality and quantity. Cables from European centers of distribution report steadily hardening markets abroad.

## PRICE LIST & CHANGES SUPPLEMENT TO ERA PRICE LIST

Published Weekly in  
The Pharmaceutical Era

These supplements enable all Manufacturers of goods for the drug trade to promptly notify all the best buyers in this trade regarding any recent changes in their price lists, such as new goods or articles discontinued; changes in prices, packages or discounts; special offers, free goods, etc.

The charge for these notices is 20c. a type line each issue. Always mention the number of insertions desired.

COPY with us by MONDAY morning for the issue of that week.

Address: ERA PRICE LIST,  
90 William St., NEW YORK.

## INFORMATION WANTED

Independent Printers.—A subscriber asks for names and addresses of printers of druggists' labels, prescription blanks, pill boxes, etc., outside of the combine, and shall be pleased to hear from subscribers who have had satisfactory dealing with such concerns.

A. B. & Co., 250 Tompkins Ave., Brooklyn, N. Y.  
We desire to have Rheumatic Liniment listed at \$2.00 per dozen. The retail price is 25 cents.

H. Alpers, 25 W. 42d St., N. Y. City.  
"Bath Delight" is a new toilet preparation we have placed on the market. It retails for 10 cents and the price to druggists is 80 cents a dozen.

S. P. Crandall & Co., 53 East 53d St., N. Y. City.  
We are the manufacturers of a new preparation known as "Crandall's Kastroil," which retails at 35 cents. Price to the trade is \$2.40 per dozen.

Dwa Chemical Co., 318 W. 34th St., N. Y. City.  
We are placing on the market two new preparations: Dwa Cream, selling 50 cents, and Gaiusol, at \$1.00. Trade prices are \$4.50 and \$8.00, respectively.

Eckman Manufacturing Co., 414 Arch St., Philadelphia, Pa.  
We beg to announce that the price of Eckman's Alternative has been reduced to \$16.00 per dozen.

F. Roder, 341 E. 136th St., N. Y. City.  
We desire to list "Ideal Egg Shampoo Cream" at \$1.50 per dozen. This cream is also put up in pound packages. Price \$2.50 per pound.

P. Rueckrich, 218 Ten Eyck St., Brooklyn, N. Y.  
The price of Popp's Swiss Herb Tea, of which we are the manufacturers, is \$2.00 per dozen. Retail price is 25 cents.

Tokalon Company, Syracuse, N. Y.  
We desire to have noted among new preparations "Neal's Olive," of which we are the proprietors. Price to druggists is \$2.50 per dozen. The article retails at 35 cents.

# THE PHARMACEUTICAL ERA

PUBLISHED EVERY THURSDAY

VOL. XLI.

NEW YORK, APRIL 29, 1909

No. 17

D. O. HAYNES & CO., - Publishers

90 WILLIAM STREET, NEW YORK

Telephone, 2457 John. Cable Address: "Era, New York"

Western Office:

Room 500, Dickey Building, 40 Dearborn St., Chicago

Telephone, Central 5888.

## SUBSCRIPTION RATES.

United States, Cuba, Hawaii, Porto Rico, the Philippines, and Mexico	\$2.50 a Year
To Canada, postpaid	3.00 a Year
To Foreign Countries in Postal Union	4.00 a Year
Single Copies	10 Cents.

ALL SUBSCRIPTIONS ARE PAYABLE STRICTLY IN ADVANCE

Published every Thursday at 90 William Street, Borough of Manhattan, New York, by D. O. Haynes & Co., a corporation; President and treasurer, David O. Haynes; vice-president, Ezra J. Kennedy; secretary, Edward W. Drew. The address of the officers is the office of this publication, and the title is registered in the United States Patent Office.

*Entered at the New York Post-Office as Second Class Matter*

## Re Photographs for "Era Album"

### Illustrated Section

Each subscriber to The Pharmaceutical Era is entitled to representation in this work, and is invited to send us his photograph. We do not require a subscription from each partner and clerk. If the firm or proprietor is a subscriber, the other partners and clerks may have their portraits included for \$1.50 each. To secure all of the Album sections one must be a subscriber to The Era in his own name.

In sending photographs be sure that each one is distinctly labeled with the name, address, business, profession or occupation of the person, written clearly on the back of your photograph. A good plan is to write it on a printed label and stick it on the center of the back of your photograph. Here is a good specimen:

#### FOR ERA ALBUM.

Fred S. Rogers, Middletown, N. Y.

McMonagle & Rogers,

EX-Pres. N. Y. State Pharm. Assn.

When additional photographs of partners and clerks are sent, each one should have written on it the name of the subscriber who sends it, as well as the name of the person in the photograph.

### Cabinet Photographs Only

The style of photograph we require is the so-called "cabinet" size, with the head about two inches long. If other sizes are furnished they interfere with our plans for keeping the faces uniform, also prevent us from classifying the cuts by localities.

In view of the great amount of work we are assuming, to have each of our subscribers properly represented in this Album, we feel that we are not asking too much when we request each subscriber to supply us with the size and kind of a photograph which will facilitate our work and best enable us to do him credit.

In forwarding photographs for the Album, see that they are distinctly addressed as follows:

THE PHARMACEUTICAL ERA,

90 WILLIAM ST., NEW YORK.

For Era Album

## TIME TO NAME PHARMACOPOEIAL DELEGATES.

Of utmost interest to all pharmaceutical associations and other bodies entitled to representation in the Pharmacopoeial Convention of 1910 is the call just issued by the secretary, Dr. Murray Galt Motter, for the appointment of delegates to the convention. While the convention does not assemble until May 10 of next year in Washington the time is not so long as it seems, for the meetings this year, some of them within a few weeks, will be the last to be held by most of the organizations entitled to participation prior to the assembling of the delegates. These extracts from the constitution show the qualifications for membership:

The members, in addition to the Incorporators and their associates, shall be delegates elected by the following organizations: Incorporated Medical Colleges, and Medical Schools connected with Incorporated Colleges and Universities; Incorporated Colleges of Pharmacy, and Pharmaceutical Schools connected with Incorporated Universities; Incorporated State Medical Associations; Incorporated State Pharmaceutical Associations; the American Medical Association, the American Pharmaceutical Association, and the American Chemical Society; provided that no such organization shall be entitled to representation unless it shall have been incorporated within and shall have been in continuous operation in the United States for at least five years before the time fixed for the decennial meeting of this corporation.

Delegates appointed by the Surgeon-General of the United States Army, the Surgeon-General of the United States Navy, and the Surgeon-General of the United States Marine Hospital Service, and by the organizations not hereinbefore named which were admitted to representation in the Convention of 1900, shall also be members of the corporation. Each body and each branch of the United States Government above mentioned shall be entitled to send three delegates to the meetings of this corporation.

Careful attention should be given to complying with the constitutional requirements and the necessary data and credentials should be promptly mailed to Dr. Motter at Washington, D. C. There should be a full representation of pharmaceutical interests.

## ALL-STATE BILL AGAIN AMENDED.

As this issue of the ERA goes to press the fate of pharmacy legislation at Albany is in doubt. The Assembly has passed two bills, the Conklin measure and the All-State Bill, the latter being desired by the pharmacists of the State and introduced by Assemblyman Brown, himself a prominent druggist of the interior of New York State. The Brown Bill has been amended in the Senate to meet the objections of some of the proprietors and wholesale druggists who feared that the provision for suing non-resident manufacturers would work hardships to any who were accused of selling or marketing misbranded or adulterated products. The amendment leaves such prosecutions in the hands of the Federal authorities.

The Conklin Bill is understood to have little chance, for aside from the fact that it is not desired by organized pharmacy, some vital defects in it have been discovered, one of the newest being its failure to provide for practical examinations of applicants

for certificates to practice pharmacy. The Brown Bill, on the other hand, seems now to meet all requirements and the belated objection of the wholesalers having been met, it was expected that this bill would pass during the closing hours of the Legislature, which adjourns sine die this week.

#### LEGISLATION AT WASHINGTON.

There have been no important developments in relation to tariff legislation at Washington during the last week. The Payne Bill is still pending in the Senate, where amendments and alterations are being made almost hourly during the sessions. The drug and chemical schedule has been changed in minor details, but the merchants in the trade are less interested in this seesawing between the two branches of Congress than they are in getting a final result, so that they can go on with their business on an intelligent basis.

Our Washington correspondent notes the fact that a stamp tax on medicines is not probable, explaining how the report originated. Another feature, one to be regretted, is that there seems to be no likelihood of patent reciprocity legislation before next December, when the regular session begins. It was hoped that this feature could and would be restored to the Payne Bill, but the pressure does not seem to be strong enough for that purpose.

#### COMMITTEE ON N.A.R.D. REORGANIZATION.

Thoroughly representative is the membership of the committee appointed by President Elkin of the N.A.R.D. to consider plans for the reorganization of that association. Those chosen are men with ideas, experienced in organization work and are without exception devoted to the advancement of the mental and material interests of the retail druggists of the country. Some of them have contributed to the pages of the ERA thoughtful expressions of their views upon this subject and that they will give careful consideration to whatever is presented to them and to any ideas which may originate with them is an absolute certainty.

The report of this committee will no doubt be one of the most interesting to be presented to the delegates at the forthcoming convention of the N.A.R.D. at Louisville in September next.

#### WHY NOT A SHOW WINDOW CALENDAR?

Pharmacist Taylor, who this week wins the ERA's Cash prize of \$10 in the Competition which has been in progress since the first of the year, offers some valuable advice to druggists in the matter of systemizing the care of show windows. He suggests a calendar by months which can be made the basis for similar calendars for use in any locality, changes when necessary being made to suit local conditions and variations being made to agree with the weather or for other reasons. Druggists who prefer to change their window displays often can use the monthly calendar as a basis for arranging a schedule for fortnightly, or weekly changes, or the thirty days of

the average month can be divided into three parts of ten days each.

While it is not imperative that a fixed programme be followed the setting of dates and keeping a calendar prevents procrastination which sometimes now carries window displays beyond their original timeliness. By systemizing the work, setting dates, promptly observing the calendar and making window displays attractive much can be done to increase trade in the retail drug stores. Mr. Taylor's paper will be found on page 399 of this issue of the ERA.

#### NOT A LICENSE TO SELL—MERELY A TAX.

Numerous protests against the issuance of Federal "licenses" for the sale of liquors in prohibition territory have called forth Treasury Decision 1484, which will be interesting to druggists and others particularly in dry States. Secretary McVeagh lays down positively the fact that the special tax stamps are merely receipts for the tax and carry no privileges except immunity from prosecution for non-payment thereof. He says:

Your attention is respectfully called to the fact that no licenses for the sale of liquors at any time or place are issued under the provisions of the internal-revenue laws.

A special tax is imposed under said laws upon all persons who engage in the business of selling liquors, and this tax must be paid by every person who does engage in such business, whether in accordance with, or in violation of, laws of the State, but section 3243, Revised Statutes, expressly provides that the payment of such tax "shall not be held to exempt any person from any penalty or punishment provided by the laws of any State for carrying on the same within such State, or in any manner to authorize the commencement or continuance of such trade or business contrary to the laws of such State or in places prohibited by municipal laws."

Furthermore, the United States Supreme Court, in the License Tax Cases, expressly held that the stamp issued evidencing the payment of the tax is not a license, but merely a receipt for the tax, and carries with it no privilege except immunity from prosecution under the Federal laws for non-payment of the tax.

#### MISREPRESENTATION AND EXAGGERATION.

If Lawyer Stafford really has written such a circular as is printed in the New York *Journal of Commerce* concerning the pharmacists of the State he is entitled by the misrepresentation and exaggeration therein contained to high office in former President Roosevelt's Ananias Club. He is quoted as saying that the retail grocery merchants of the State of New York are now free

from unlawful and infamous prosecutions that have prevailed for years, enriching the State Board of Pharmacy by over \$100,000. I am informed that they have fleeced the retail grocery merchants of the State to such an extent that they now own two colleges of pharmacy in Manhattan and Brooklyn absolutely free and clear from incumbrance.

The actual facts are that about \$500 only is the amount recovered by fines imposed on grocers, instead of \$100,000. The State Board of Pharmacy does not own any college of pharmacy anywhere and never did. It has never "fleeced" any grocers, nor has it been "enriched" by the \$500. Such libelous and untrue statements, calculated to bring the board into disrepute, should be resented by the State Board of Pharmacy. If the author of them is not merely seeking notoriety he will apologize as publicly as he has made his untrue accusations. He should at least be given that opportunity, although the course of action of the mind of a man who gloats over the prospective immunity of grocers from punishment

if they sell adulterated articles that are useful both as food and medicine is altogether problematical.

Druggists everywhere would do well to note the fact that under the ruling of the Internal Revenue Department, reported in the ERA, April 15, page 358, stamps are required on five-gallon packages of alcohol even if they contain less than five gallons. The ruling has been enforced in the Chicago district and may be enforced elsewhere. As the ruling does not increase the tax it would be better to go to the trouble of having the stamps affixed rather than run foul of the revenue officers.

It is estimated, says *Tobacco*, that each adult male in France smokes 30 ounces of tobacco, and contributes \$2.50 to the State revenue in so doing. The State profit is large. The revenue from tobacco in 1907 was almost \$75,000,000. This is over \$1,500,000 more than the revenue of 1906, and 12 times more than the revenue from tobacco in the year of Waterloo.

In the recent appointment of Edward Voss, Jr., of Cincinnati, as a member of the Ohio State Board of Pharmacy, Governor Harmon has chosen the first name on the list recommended to him for appointment by the Ohio State Pharmaceutical Association at its meeting at Cedar Point last June. Mr. Voss' appointment was originally agitated by the Ohio Valley Druggists' Association and it was due largely to the efforts of a committee of this organization that the Governor became impressed with the availability of the Cincinnati pharmacist for the office, for Mr. Voss personally was not an active candidate and the office went to him without effort on his part.

Mr. Voss, besides being one of the leading pharmacists of the Queen City, has long been identified with association work throughout the State, in addition to taking an active interest in public affairs, especially so far as they affected pharmacy commercially or professionally. In the various associations in which he has been honored with recognition of his abilities in laboring for the common good, although he has been almost over-modest in accepting office. Now only 39 years of age, his membership in the Ohio Pharmaceutical Association, in which he is a member of the board of council, dates back to 1891, a period of 18 years. Mr. Voss also is a member of the Ohio Valley Druggists' Association, of the American Pharmaceutical Association and of the National Association of Retail Druggists, all of which he has at some time served in official capacities.

Mr. Voss has been engaged in the retail drug business for 26 years and was graduated in the Cincinnati College of Pharmacy in the class of 1890. Soon after graduation he went into business for himself and is at present a member of the firms of Voss & Lakamp and Voss & Ehlers, with pharmacies at 12th and Vine streets and at McMillan and Vine streets.

As an educational and advertising proposition the Pullman palace exhibition car of the American Druggists' Syndicate which started from New York on March 20 for a year's tour of the country is proving a great success. The car has already gone westward beyond Indianapolis, stopping at many important cities en route, at all of which the exhibit attracted the attention of laymen as well as druggists, while the newspapers were invariably generous in giving space to the display. Such enterprises require the courage of conviction that they will be successful and in this case the verdict has already been given.

Some people have curious conceptions of trusts, druggists and many other component parts of our existence, as witness the following remarkable statement made by Lawyer Charles M. Stafford, who won the Court of Appeals decision exempting grocers from the operation of the New York State pharmacy

law: "The grocers would have been forced to go out of business, unless they qualified under examinations and obtained drug licenses, and the State Board of Pharmacy would have become one of the strongest trusts in America." Puzzle: How could it have been done?

Mr. McElhenie's letter regarding a scheme of inland revenue which was printed on page 384 of the last ERA contains suggestions that are at least entitled to serious consideration. If there were more legislators than there are gifted with the Brooklyn pharmacist's ability to perceive conditions from a practical point of view and legislate accordingly the result would be a much more equitable application of law to trade than has heretofore existed.

"Can I serve you a cup of cocoa?"

"No! I don't like cocoa."

"I think you will like — cocoa. Won't you try it?"

"No. I don't like cocoa. It makes me sick. Is it free?"

"Yes."

"Then I'll try some."—*American Grocer*.

*Paris Figaro* says that Father Maggieni, director of the Seismic Observatory near Sienna, has discovered a new class of waves which are propagated through the earth some minutes before the mechanical waves, which are the first manifestations heretofore known of earthquakes. He has constructed an apparatus which renders the new waves perceptible, and permits the foretelling of an earthquake. The apparatus was tested successfully on April 11, when it twice announced earthquakes, which occurred within 12 miles, four minutes after the apparatus had signalled them.

EDWARD VOSS, JR.,  
of Cincinnati, O.

There is in this city the head of a dry goods house doing about \$15,000,000 a year, who is insistent in the requirement that every public or private statement to a customer must be the absolute truth, says the *American Grocer*. A bargain offered or price reduction asserted must be such or the offender is sure to be discharged on the spot. One day he found on the aisle: "Towels reduced to three dollars a dozen." He called the buyer and asked: "What is the regular price of those towels?" "Three dollars." "Why do you put them out as a bargain?" "Because they are very cheap; cost \$2.90 and are a bargain." "Take that sign down and never announce a bargain unless it is such and below the usual price." Old clerks have been discharged for substituting goods, when the desired article was out of stock, without first notifying the customer. That man at the front is a disciplinarian, who knows that every cause for complaint strikes at his leadership and the honor of his firm. "Gato used to assert that wise men profited more by fools than fools by wise men; for that wise men avoided the faults of fools, but that fools would not imitate the good examples of wise men. For that reason the man at the front was rid of the fools, the fellows who watch the clock and have no other interest in the business beyond getting their pay envelope."

Since the Russian Government enacted the law requiring the "Poison Label" to be attached to all containers of vodka (a strong alcoholic beverage), numerous cases of accidental poisoning have been reported from various parts of the Empire. There is a large portion of illiterates in Russia, and with them the "Poison Label" appearing upon vodka bottles has come to stand for vodka. As a result many bottles of really poisonous mixtures are drunk by these people under the impression that any bottle bearing the "Poison Label" contains vodka. This emphasizes the danger of making the "Poison Label" too common.

Professor Hynson's resolution to be debated at a future meeting of the Baltimore Branch suggesting the restriction of

preparations described in the U.S.P. and the N.F. and the publication of a General Receipt Book to contain all formulas dropped from those books, together with other formulas that may be useful to pharmacists, will no doubt give rise to considerable discussion, both in the branch and outside of it. Views will naturally differ on the subject and the arguments on both sides will be perused with interest.

If some druggists' wives did not keep the homes more orderly than they, the druggists, keep their stores, what a chorus of masculine howls there would be.

Morgantown, W. Va., voted to go "dry" a little more than a year ago and since then doctors and druggists have had the greatest rush of business ever known, says the *Utica Press*. District Attorney Boyd says he has the evidence that one prominent physician of Morgantown alone has written 10,000 prescriptions for liquor during the past year. Counting Sundays, the number of whisky prescriptions written by this one physician reaches 27 a day. The customary price that is paid for these prescriptions is \$1 each, so that the physician made \$10,000 a year, while the druggist probably made half that amount. Similar conditions are said to exist all through the "dry" districts of West Virginia and Ohio. Mr. Boyd says he will bring action against several physicians and druggists who have been doing a wholesale liquor trade. The prohibitionists will be satisfied with nothing less, but, says the *Press*, it is doubtful if the courts will prohibit a doctor from giving a sick patient a prescription.

Jack (cynically)—I like the "soft pillow of a woman's mind."

Orme (calmly)—Yes, the majority of men do bolster their own minds up.

Two Fort Smith (Ark.) cigar dealers have inaugurated a somewhat novel method of creating a demand for cigars. They have employed good-looking young women who throw dice with the skill of a professional, and as a result, the custom of the stands has greatly increased. In one instance the cigar store went into bankruptcy for want of patronage, but when the man of progressive ideas came along and put a good-looking young woman behind a stock of first-class goods, he soon found the profits returning.

"Miss Ethel," he began, "or, Ethel—I mean I've known you long enough to drop the 'Miss,' haven't I?"

She fixed her lovely eyes upon him with a meaning gaze.

"Yes, I think you have," she said. "What prefix do you wish to substitute?"

Two points of view—that of the ecclesiast and that of the sociologist—give weight and interest to the two articles on the startling increase in divorce and its significance, contributed to the *May Century* by Cardinal Gibbons and Prof. Edward Alsworth Ross, of the University of Wisconsin. Both writers see in the rising tide of divorce symptoms of a great evil, which calls imperatively for the vigorous and conscientious effort of society at large.

A rolling stone gathers no moss when it it rolls away from the moss-backs.

Edward Farran, 49 years old, of St. Louis, is a human slate. Letters or figures written on his back with a blunt instrument can be read at distance of 20 feet. Farran is a patient at the City Hospital, where his peculiar ailment is causing general interest. The disease from which he suffers is known as urticaria. It is characterized by a redness of the skin, due to an inflamed condition of the tips of the nerves. It is said to be due to becoming over-heated and then rapidly reducing the temperature of the body.

Letters written on Farran's back with a slate pencil or the end of a match rise in welts and become as white as snow. They remain visible for an hour, and then gradually fade away, or they can be erased with a wet sponge. Physicians assert that he will soon recover his normal condition.

"In the matter of picture post cards I wish people living in small villages were not quite so ambitious," said a gray-headed man to a *Sun* reporter. "When I was young I lived in the

country. I was well acquainted with many villages and small towns in the Middle West. There wasn't a fishing brook or a picturesque pond or a bit of woodland for miles around that I didn't know a good deal better than I have ever known any book. I'd like now to get pictured glimpses of those old spots occasionally. The people living there do remember me and send me messages on postals now and then, but alas for their choice of cards! Instead of pictures of the places I loved they buy impossible daubs representing some corner of the earth thousands of miles away."

"Why is it more women cannot discover the 'secret of success'?"

"Oh, because when it reaches them it is no secret."

Some Milwaukee druggists were "worked" in smooth manner recently by an interesting individual, apparently about 80 years of age.

"I would like to purchase some of your best foreign wines," said George P. Thorpe, distinguished looking, wearing a frock coat, silk hat, patent leather shoes, white hair and beard, as he entered a drug store. Thorpe, in every case, would insist upon sampling two or three different brands, and then selecting a hamper or two, would tell the obliging clerk that he would send his secretary around later for the goods. It was a great scheme, but the old man visited too many drug stores and the police arrested him on the charge of being drunk. In court, Thorpe claimed that he was a scientist engaged in writing scientific articles on various wines manufactured in different parts of the country and that he was in the employ of New York magazines. He was on his way to St. Paul, he said, at the time of his arrest. The judge gave the old fellow one hour to catch the next train for his destination, but cautioned him to keep away from drug stores until he arrived at St. Paul.

"Why do you call it a feminine compliment?"

"Because there is a sting in it."

Here you are! Shirts made of pine needles, gowns made of nettles and boots made of cactus leather! Pine needles from the yellow pine of Oregon, turned into thread, are woven into a coarse fabric to be made into underwear. The ramie of China, grown in this country as well as in Germany, affords a strong washable fabric of a silken lustre, and in France is made into ramie paper and used for bank notes, says the *Harford Times*. And ramie is a sort of nettle. Then, to beat the nettle and the pine needles, comes the cactus, once despised, but now utilized as a fruit and forage plant and persuaded to yield, in addition, rope and leather, a leather as strong as that derived from the horse hide or cow skin. Do not say that all this is marvelous, but throw the credit where it belongs, and it belongs to James Wilson. "Derived industries," he calls them, but the Secretary of Agriculture quietly encourages them, and when you come to think of it you will not wonder that the President kept him in the Cabinet. The old Scotchman may yet encourage some other "derived industries" quite as odd.

Milliner—There, look at that. By tipping the hat a little to the left it makes you look five years younger.

Customer—Can't it be tipped a little farther?

A Home Trader.—A surgeon in a Western town, engaged to perform an operation of minor character upon a somewhat unsophisticated patient, asked him if he were willing to have only a local anæsthetic.

"Snrre," replied the other; "I believe in patronizing home industry whenever you can."

And he meant it.—*Lippincott's*.

A pharmacy law is not always fairly judged by its fruits—especially by those who are compelled to swallow its sour grapes.

The man who wins is the man who can stick to the disagreeable job, do it with energy and vim; the man who can force himself to do good work when he does not feel like doing it—in other words, the man who is master of himself, who has a great purpose, and who holds himself to his aim, whether it is agreeable or disagreeable, whether he feels like it or does not feel like it—that wins.—*Success Magazine*.

## A Crisis.

By Emma Gary Wallace.

The Apothecary was ill. It was typhoid the doctors had early agreed and Madam was hollow-eyed from sleepless nights and anxiety. Fortunately business had been exceptionally quiet and there had been nothing extra doing.

The days dragged wearily by. The crisis was at hand. The anxious woman scarcely dared face the possibility ahead and dared still less to turn away from it. Like a haunting spectre it robbed her of all power to rest, and occasionally there flashed before her the picture of a dull, colorless waste of future time without Him. The lines of suffering on her own face deepened as the crisis neared.

Everything possible was anticipated and done. The doctor had just come and gone, the patient was resting with a competent nurse in charge, and there was relief in action. Madam put on her hat and hurried down to the store for the first time in several days. As she sat at the desk in the tidy little office she wondered at her disinclination to tackle the pile of mail which awaited her. If the next three days were only safely passed she felt that no difficulty could ever daunt her again.

There was a tap at the door. It was Jacques, the head clerk, and back of him stood Timmerman, the next in rank.

"Come in," invited Madam cordially.

"Thank you," Jacques returned. "We are glad to hear that the Apothecary is no worse this morning, but I suppose it will be a long, slow pull. You see, I—that is, we thought perhaps you would—that is to say, you really ought to give us each a slight increase in wages. We are working extra time, and having added responsibility—and we concluded that you would be only too glad to consider the subject of more pay." Jacques looked virtuous, Timmerman ashamed.

"Dee-lighted," Madam responded, gravely looking at his with clear, steady gray eyes.

Jacques did not observe this fact for he was regarding a crack in the floor anxiously, but Timmerman saw, and wondered that he had never before noticed what clear, steady eyes they were. He felt decidedly uncomfortable and wished heartily that he had never allowed himself to be persuaded into this move.

"We thought," Jacques continued, "that you would feel that as the Boss is not likely to be on deck for some time that it would be nothing more than fair."

"To what additional sum per week do you feel that you are entitled?" Madam asked quietly.

Jacques looked at her uneasily. He did not quite understand her matter-of-fact reception of his offer to raise his own wages. It was easier than he had expected.

"Oh, about five dollars more per, would be all right for me," he returned coolly.

"Granted," Madam agreed, "and you, Mr. Timmerman?"

"I'll leave it entirely to you, Madam," Timmerman said, miserably. "I—I—do not quite know whether this is a square deal or not."

Jacques sniffed with audible disdain.

"Did I understand that you wished an increase in your pay, Mr. Timmerman?" Madam interrogated evenly.

Timmerman dropped his head.

"I'll leave that to you," he replied.

"Very well, consider your salary raised twenty-five per cent, or in the same proportion Mr. Jacques has raised his. Is that all you wish, gentlemen?" There was a steely flash in Madam's eyes, although she smiled pleasantly.

Both assented that was all at present.

"May I ask whether you anticipate this as a permanent increase or as temporary additional compensation, during my husband's illness?"

"I've never stood for any cuts, so far," Jacques retorted airily, "and I can command that amount any day."

"I am very glad to hear it," Madam returned dryly.

The men passed out leaving the door ajar. The occupant of the office arose and closed it. For a moment the steely look hardened her whole face strangely. Then she sat down in the big desk chair and laughed softly, although tears shone in her eyes. She was herself again.

"If they can afford to do it," she declared half aloud, "surely I can afford to let them, and anyway nothing matters until the crisis is passed in safety."

The small room stifled her, and at the thought of the loved one hovering so near the Borderland, an indescribable fear tugged at her heart. What had this hour's absence meant?

She had just reached home when the muffled bell sounded. It was Timmerman. His face was very white, but he looked her squarely in the eye.

"May I see you for a few moments?" he requested in a low tone.

"Come in," Madam said simply.

"I have come to tell you," he explained almost vehemently, "that I am ashamed of what I did this morning. I am sorry I was a party to any such proceeding."

"Even if the Apothecary had not been the good friend and counselor to me that he has been, I ought not to have taken such an advantage at this time. I do not want any 'raise.' I couldn't touch that money. I—well, I did not realize how contemptible it appeared until we got into the office. Then it came to me how squarely I had always been treated, and I felt meaner than ever. It sounded plausible enough before."

"Does Mr. Jacques know of your intention to tell me this?"

"He does."

"Does he feel the same?"

"He does not."

"Certainly you are entitled to pay for all overtime work, that is but fair, but frankly, Mr. Timmerman, I had not expected the attitude of this morning. I was surprised. How long have you been with us?"

"Six years."

"Mr. Jacques is to receive notice today that after the present month his services will not be required, will you accept his position at the salary he received previous to this morning? I might add, it is a change that the Apothecary has discussed before his illness."

"But—" Timmerman stammered, with the color flaming in his cheeks.

"You can do as you please, about accepting it, Mr. Timmerman, but there will be a vacancy. One hold-up is quite sufficient. This emergency has shown me two types of men. It has shown me several other things also."

"If Jacques is to go, I shall be glad of the promotion," Timmerman managed to say with a lump in his throat, "and I'll do my best."

"That is all any one can be expected to do," Madam replied gently, "and remember that there is only one thing that entitles an employee to advancement, and that is the proof on his part that he is capable of greater things. If you can fill the head clerkship and show us where our volume of business may be increased or our expenses can be wisely reduced, you will increase our prosperity and have a right to expect a share in it by demanding more pay. If you can neither increase our business nor decrease our expenses, the position as far as money is concerned is likely to be stationary. It should never be a question of how much can I get, but of how much am I worth. The man who would receive more must look to it that he becomes worth more. If you work overtime, you are entitled to overtime pay rather than to a permanent increase."

"Employer and employee must rise together, each one contributing to the increased prosperity, and benefiting by the results. I think you have realized this. The employee who does realize it, is bound to progress, and the employer who recognizes it, is likely to sift his help until he gets the men and women who will help themselves by helping him."

"Perhaps if you would talk to Jacques as you have to me—" Timmerman ventured.

Madam shook her head firmly. "It will be quite unnecessary," she remarked, "our ranks will not be broken, I know of a capable, intelligent young woman pharmacist who will take the place you are vacating."

"Life contains many crises, Mr. Timmerman; they come to us in health as well as in sickness, and it is our duty to live up to the best that is in us every day according to our light and strength, for we never can tell when our measure is being

taken for greater things. I am sure you will do your best, and He would be sure of it, too."

Timmerman wrung her hand without a word. The door closed and down the steps passed a man with a widened vision. A man, who had been little more than a thoughtless, impulsive boy one hour before. A crisis was passed in Timmerman's own life.

## MRS. WOOTEN PRESIDENT OF CHICAGO CHAPTER

**Succeeds Mrs. Thayer After a Very Successful Year.  
Preparing for New Period of Prosperity.**

CHICAGO, April 24.—The annual meeting of Chicago Chapter 2, W.O.N.A.R.D., was well attended. The retiring president, Mrs. Thayer, gave an excellent and interesting resume of her work. The recording secretary, Mrs. Forbrich, read a report filled with good, practical ideas. This was followed by Mrs. Light's report as chairman of the reception committee, and Mrs. Avery's report on behalf of the publicity and promotion committee.

The election resulted as follows: President, Mrs. Thomas V. Wooten; first vice-president, Mrs. George Lenz; second vice-president, Mrs. E. S. Bernard; third vice-president, Mrs. George Moyer; recording secretary, Mrs. F. H. Starr; treasurer, Mrs. Gustave Frank; corresponding secretary, Mrs. William Krizan; chairmen of standing committees: Programme, Mrs. J. M. Light; reception, Mrs. B. A. C. Hoelzer; publicity and promotion, Mrs. Charles A. Redig; visiting and flowers, Mrs. Louise Berger; house and property, Mrs. Wm. W. Klore.

Mrs. Wooten expressed her thanks for the honor and said she hoped for the hearty co-operation of the entire membership. She urged the members to greater activity in the matter of procuring new members and awakening more interest among the women in the drug world to their work as helpmates to their husbands in the highest, best sense of that word.

A vote of thanks was tendered Mrs. Thayer for her painstaking, conscientious work and the gracious, womanly way in which she presided during her incumbency. A similar vote was tendered the hard-working, efficient secretaries, Mrs. Forbrich and Mrs. Bernard. Thomas V. Wooten was thanked for financial and other aid in connection with the card party held February 12.

Refreshments were served. The attention of the members was called to the fact that the next meeting, May 11, will be the last for the season and an excellent programme has been provided. Delegates to the coming convention will be elected at this meeting and the plans of the new officers and committees will be well mapped out and presented for approval.

## Heir to Weightman Millions Honored by the Pope.

ROME, April 22.—The Pope has conferred the title of Marchioness on Mrs. Frederic Cortland Penfield, of New York, in recognition of her benefactions to educational institutions and charities.

[Mrs. Penfield was Mrs. Anne M. Weightman Walker, the winner of the fight begun in 1905 for the fortune left by her father, William Weightman, of Philadelphia, head of the chemical firm of Powers & Weightman. Her first husband was R. J. C. Walker, a lawyer, who died some years ago. She married Mr. Penfield on February 26, 1908, and commemorated the occasion by giving away about \$1,000,000 to relatives and to charity. She has long been a contributor to Catholic charities and educational institutions.—En.]

## Westchester County Pharmaceutical Association.

CHAPEAUA, N. Y., April 24.—The spring meeting of W.C.P.A. was held at Weskora Hotel, Ossining. The attendance was unusually good. Two new members were admitted. Legislative matters were thoroughly discussed, with result that opposition to the Conklin Bill was approved.

Messrs. Schlesinger, Wiesendanger, Russell, McCullough and Farrington were chosen delegates to N.Y.S.P.A.

Propaganda work is occupying much attention by the propaganda committee and results are manifest in many parts of the county.

A resolution in effect that "we as an association are opposed and condemn what is characterized as counter-prescribing" was unanimously approved.

The next meeting will be held July 14.

## Doran's Diamond.

*By Joel Blanc.*

Doran is one of the finest specimens of manhood I have ever seen. Though close to his fifty-seventh birthday, he is as sound as a colt and his two hundred and eighty-five are pounds of stored energy. I never knew him to be sick but once, and of that ridiculously sublime occasion I am about to write. You among my readers who are wives have possibly had experiences at least similar to that of Mrs. Doran.

Doran was always a man after my own heart in so far as that he believed that running a drug store was a business; but he carried his commercialism to the extent of contending that human sympathy had no more right in a drug store than in a boiler factory, that each druggist was inevitably pitted against all other druggists and that sentiment and organizations should be tabooed. Doran's partner is his son Raymond, as fine a physical specimen as his father, and just as good a business man; but Ray is tender-hearted and believes in the interdependence of mankind. The old man says that Ray is "more like mother." What a good thing it is for the world that so many of us fellows are "more like mother."

Considering the above, you can imagine my amazement and concern when, upon entering his store one day, I saw Doran approaching from the rear, leaning heavily upon a cane, a woe-begone expression upon his face and every outward indication of having suffered. My amazement was doubled when he spoke to a woman patron about her sick child and with tear-dimmed eyes expressed his sympathy for her. He had always said that to a successful druggist a sick human being should be the same as a sick horse, and he seemed to live up to that theory. Not that he was brutal, far from it! He was hearty, generous and good-natured; but personal sympathy and real fraternity seemed to be lacking in his character.

While still confused by the appearance and actions of Doran I happened to glance at the son, who stood at the far end of the store. Upon catching my eye Ray proceeded to do a noiseless double shuffle and appeared to be almost strangled with suppressed laughter. Before I could pull myself together the old man greeted me rather coldly and left the store. No sooner had the door closed behind the ponderous father than the equally ponderous son grabbed me around the waist and attempted to teach me a new variation of the Salome dance, while Henry, the clerk, indulged in a series of facial and pedal gymnastics.

"You overgrown kid," I gasped; "I see nothing to laugh about. What's the matter with the old gentleman? He appears to have had one foot in the grave."

"I guess it was diamonditis," said Ray, and thereupon proceeded to let off several thousand horse-power of reserved laughter. "But don't get mad, little man. I did not intend to fracture your wish-bone. Here's a good cigar. Smoke up and I'll tell you about poor daddy's affliction." Ray's story follows:

"Monday night, while at the table, pop took a drink of coffee and it seemed to go the wrong way. For a few seconds he spluttered and coughed and nearly blew his dear old head off. When the coughing ceased he suddenly gave a grab at his chest, screamed with pain and declared that something inside of him had broken. As my beloved dad had never been sick in his life, mother and I naturally commenced to throw fits. I yelled into the store for Henry to telephone for the doctor and then mother and the hired girl and I got pop upstairs. On every step of the stairs and all the time we were getting his clothes off, pop groaned or squealed. First he said his lungs were closing and that he could not breathe. Then it was his heart that was going out of business. At the top of the stairs the trouble was in his stomach and he was sure he had been poisoned and when I was taking off his shoes he busted a blood vessel in his hip—or thought he did. When the doctor

WISCONSIN BOARD'S NEW PRESIDENT AND TWO NEW APPOINTEES TO BOARDS OF PHARMACY.

EDWARD WILLIAMS,  
of Madison.

elected president of the Wisconsin State Board of Pharmacy, is a prominent N.A.R.D. man and is an active member of the Wisconsin Pharm. Association.

MAX FRIEDENBURG,  
of Winfield.

has just been appointed member of the Kansas Board of Pharmacy by Gov. Stubbs. He is a prominent druggist and was president of Kansas P.h.A. in 1906.

WILLIAM R. FORTIN,  
of Pawtucket.

recently appointed member of the Rhode Island Board of Pharmacy, besides being a prominent retail pharmacist, is the inspector of milk of Pawtucket City.

arrived mother was holding one of pop's hands, I had a grip on the other, the hired girl was pressing a hot-water bottle to his feet, Henry was holding smelling salts to his nose and Mose was over in the corner praying to his rabbit's foot. Meanwhile my venerable sire was reminding mother that she was too old to marry again, instructing me how to cash in his life insurance policies and warning me that he did not want any quartette at the funeral to sing 'There is a fountain filled with blood.' So long as he was perfectly quiet there did not seem to be any pain; but the least movement brought a groan or a squeal like that of a stuck pig, and the pain was never twice in the same place. The doctor stethoscoped, tempered and pulsed him, but could find nothing wrong. Therefore he concluded that pop's condition was critical.

"Well, the doctor wrote a prescription and pop insisted upon reading it. It contained a little morphine and the sufferer immediately declared that we were trying to poison him for his money. Then the doctor wrote a prescription for an N.F. preparation and pop declared it was slops and that the M.D. had sold out to the retail druggists' trust. Neither would he take a proprietary, because it was a nostrum and the poor old gent actually commenced to cry and wailed that he was near his end and we might at least let him die naturally. At last we managed to get a bit of dope into him and he quieted down.

"But such a night as we had of it! Pop would no sooner get to sleep than he would make some slight movement, and after each one he would awaken with a scream. And say, he got dotty. He accused mother and me of sticking knives in him, of burning him with hot irons, and so on. Within a few hours he had everything from compound fracture of the left tibia complicated with double pleurisy, to hydrophobia. Then he commenced to call himself names. He said he had been a hard-hearted, cold-blooded cuss and that he was not fit to die. He bade mother farewell about every ten minutes and begged me to forgive him for having been such a crooked parint. He said he had been devoid of sympathy, that all his clerks had been underpaid and that he was friendless, and it served him right and he wanted to make a new will so that he could leave a hundred dollars to the Z.A.R.D.

"About two in the morning he said that he was hungry and would we please give him a little refreshment—his last meal on earth. He consumed about five pounds of bread and butter, cold ham and chow-chow and then went to sleep. I persuaded mother to go and lie down while I watched dad, and as he

had not awakened at dawn I went down to make myself a cup of coffee to brace me up.

"Upon going upstairs I glanced through the doorway to see if pop was still asleep. He apparently was; but just as I was peeping in he turned over and woke up with a howl, and as he did so he put his hand beneath the bed covers and against his hip. When he pulled his hand out he held a tiny coil of gold wire between his fingers. Astonished? Say, I wish you could have seen his face! Pop is not often profane; but gee! he turned the wall-paper yellow that morning. Then he jumped out of bed and commenced to search the closet. Beneath where I had hung his clothes, he found his diamond stud; it had broken, probably when he strained with the first conging fit. The stone had strayed beneath his vest into his trousers, while the spiral had worked through his underclothing and for nearly twelve hours that bit of wire with its two sharp ends had stayed right close to pa, wandered over his anatomy and punched holes in his cuticle—and that was all there was the matter with him. I skipped without being seen and left the pater to think it over. He does not yet know that we are on. Say, he is cute, the dear daddies is. When mother went into the room she found pop considerably improved and he was amazed when she found the two parts of the stud right on top of the bed clothes, just below his chin. He remained in bed two days and I love him for putting up such a beautiful bluff. And it is evident that during those two days he did a tall lot of thinking.

"He really suffered? Of course he did! So did mother and I; suffered intensely—and pop suffered profitably. He always declared that half the ills of life were imaginary and most of the sympathy wasted. Say, he had the imaginings all right and he knows how real they were. He is still keeping up the convalescent bluff, but there is no bluff about the change in the man. He is, as he has always said of me, 'more like mother!'

"He almost cut you, Joel, because, considering the way he has abused the organization, he was ashamed to have you know where he was going. He has gone to the meeting, said he was going to join the Z.A.R.D. and pay ten years' back dues. But God bless dear old dad; the experience was all for the best and all of us will be benefited by his suffering. All those parts of the world o'er which he moves, all those with whom he comes in contact, will be brighter because all of the real tenderness of his being has escaped from its self-imprisonment."

## QUESTION BOX

THE OBJECT of this department is to furnish our subscribers and their clerks with reliable and tried formulas, and to discuss questions relating to practical pharmacy, prescription work, dispensing difficulties, etc. Requests for information are not acknowledged by mail, and ANONYMOUS COMMUNICATIONS RECEIVE NO ATTENTION; neither do we answer questions in this department from non-subscribers.

In this department frequent reference is necessarily made to information published in previous issues of *The Era*. Copies of these may be obtained at 10 cents each, except a few issues which are out of print, for which we charge 25 cents each.

### Ink Eradicator.

(C. W.)—The following formulas have been recommended:

(1)

Immerse blotting paper or a similar material in a hot, concentrated solution of citric acid, roll it into a pencil, and coat the larger portion of it with paper or lacquer. Moisten the eraser with water and rub over the ink to be removed. Drop upon the ink spot a drop of water containing chlorinated lime. The ink immediately disappears.

(2)

Mix equal parts of oxalic and tartaric acids in powder. When to be used, dissolve a little in water. The solution is poisonous.

(3)

Use equal parts of cream of tartar and citric acids in solution with water.

(4)

Thick blotting paper is soaked in a concentrated solution of oxalic acid and dried. Laid immediately upon a blot it takes it out without leaving a trace behind.

(5)

Tin chloride ..... 2 parts.  
Water ..... 4 parts.

To be applied with a soft brush, after which the paper must be passed through cold water.

(6)

A weak solution of chloride of zinc.

(7)

To remove indelible ink (silver nitrate) stains, wet the spot with a solution consisting of five parts each of mercuric and ammonium chlorides in 40 parts of water, then rub lightly with a linen rag.

To remove anilin ink spots, moisten the spot with a strong solution of potassium permanganate; after a few minutes the brown stain produced may be destroyed by a few drops of U.S.P. sulphurous acid. Another method is to dissolve 7 parts of sodium nitrate in 15 parts of dilute sulphuric acid and 500 parts of water; let stand 24 hours. Apply with camel's hair brush; rinse thoroughly.

### Potassium Citrate and Spirit of Nitrous Ether.

(W. C. T.)—In further reply to your query, this journal, April 15, 1909, page 350, L. R. Shidlett, of Woodlawn, Ala., takes exception to the statement that the immiscibility of potassium citrate, water and spirit of nitrous ether cannot be overcome by any method of procedure. He states that a clear solution may be made which will stand indefinitely by first mixing the water with the spirit of nitrous ether and then dissolving in the mixture the potassium citrate.

We would like to hear from other pharmacists on the difficulty arising in compounding the prescription, which is as follows:

Potassium citrate ..... 4 drams.  
Spirit of nitrous ether ..... 1 ounce.  
Water, enough to make ..... 3 ounces.

### Improving the Odor of Witch Hazel.

(B. S.)—Kindly give me a formula for improving witch hazel, as I have about 50 gallons which does not smell so good as it should do.

We know of no practical process which can be used for this purpose. In the first place we know nothing of the probable

cause of the change in odor or condition of the distilled extract. If the sample is of standard alcoholic strength and otherwise conforms to the pharmacopoeial strength it might be, as some one has suggested, subjected to close filtration through animal charcoal, which would modify the odor, the filtered liquid being then mixed with an equal quantity of freshly distilled extract. At the same time the witch hazel with the "off odor" might be kept on hand and used in liniments and the like where the odor would not interfere with the character of the preparation. Some experimenting is necessary to determine what is best to be done under the circumstances.

### Antiseptic Solution.

(J. O. G.)—The best formula of this character that we know of is that printed in the last revision of the Pharmacopoeia. Another formula from an English source and published under the title of "compound spirit of thymol" is the following:

Benzoic acid .....	512 grains.
Sodium bicarbonate .....	512 grains.
Boric acid .....	1024 grains.
Distilled water .....	48 ounces.

Dissolve with the aid of heat. Then add the following:

Thymol .....	160 grains.
Eucalyptol .....	30 minims.
Oil of wintergreen .....	30 minims.
Oil of peppermint .....	15 minims.
Oil of white thyme .....	5 minims.
Rectified spirit .....	25 ounces.

Color with 10 drops of caramel and distilled water to one gallon. After 24 hours filter with fuller's earth. Many other formulas of a similar type will be found in previous volumes of the *ERA*.

### Perfumed Toilet Ammonia.

(A. A. Ltd.)—The *ERA* has published various formulas for so-called "toilet ammonia," one of which may be found in the issue of March 26, 1908, page 293. Here are two others:

(1)

Stronger ammonia water .....	6 ounces.
Lavender water .....	1 dram.
Hard soap .....	10 grains.
Distilled water .....	to make 16 ounces.

(2)

Ammonia water .....	250 Cc.
Green soap .....	120 grams.
Oleic acid .....	10 Cc.
Oil of bay .....	1 Cc.
Oil of rosemary .....	1 Cc.
Oil of lemongrass .....	1 Cc.
Water, enough to make .....	1000 Cc.

Dissolve the soap in 500 Cc. of warm water, and when cool add the ammonia water and the oil; mix by agitation, and lastly add the oleic acid and enough water to make 1000 Cc.

### Ointment of Sulphurated Potassa.

(J. J. B.)—Kindly inform me how to compound the following prescription:

Sulphurated potassa .....	1½ ounces.
Hard white soap .....	8 ounces.
Olive oil .....	8 ounces.
Oil of thyme .....	2 drams.

"Please publish answer under my initials."

This formula is almost identical with those used by Beral, Jadelot and other Continental physicians years ago for a sulphurated soap liniment or ointment in the treatment of scabies and other cutaneous diseases. To compound add about half an ounce of water to the soap, in fine shavings or powdered form, and soften on a water-bath. Stir in the olive oil, then the sulphurated potassa, finely pulverized, lastly adding the oil of thyme. Aerate thoroughly until a uniform soft ointment mass results. As this preparation alters rapidly when exposed to the air, it should be freshly made when wanted for use.

### Greaseless Vanishing Cold Cream.

(F. C. A.)—Three formulas for preparations of this type were published in the *ERA* of January 21, 1909, page 64.

If you would develop your store boys into business men you must be mainly in your treatment of them.

# Original and Selected

## THE LABEL AND THE LAW.\*

By Charles H. LaWall, Philadelphia, Pa.

The most important provision of the Food and Drugs Act of June 30, 1906, and the one which has stimulated more inquiry in the trade than any other clause, is that in reference to branding, which has to do with the regulation of the labeling of foods and drugs which come within the meaning of the Act.

According to the official regulation "the term label applies to any printed pictorial or other matter upon or attached to any package of a food or drug product or any container thereof, subject to the provisions of this Act."

There are two kinds of labels recognized inferentially by the use of the words "principal label" to describe that label bearing all statements necessary to an intelligent understanding of the nature, class and place of manufacture, if given. A secondary or auxiliary label bearing directions for preparing or other similar information, may be placed upon the package, but not in such a way as to be confused with the principal label.

The underlying principle of this portion of the Act is, as has so often been said, based upon common honesty, but as there seems to be so much doubt as to what is or is not allowable, a consideration of the subject in a general way appears desirable.

In the first place, necessary descriptive phrases, such as "artificially colored," "preserved with sodium benzoate," statements of weight or measure, etc., should be conspicuously displayed as any other reading matter, and the subterfuge of printing such statements in microscopic letters or upon an inconspicuous part of the package, as was so often the practice before the passage of the Act, is no longer tolerated.

In the case of imported products, when the principal label is in a foreign language, all necessary information must also be printed in English. Examples of the justice of this interpretation are to be found, particularly in the case of olive oil. Such labels as "Huile a Manger" or "Olio per Insalata," accompanied by the drawing of an olive branch, or some other misleading subject, are no longer permissible.

In the case of imported products, when the principal label is in a foreign language, all necessary information must also be printed in English. Examples of the justice of this interpretation are to be found, particularly in the case of olive oil. Such labels as "Huile a Manger" or "Olio per Insalata," accompanied by the drawing of an olive branch, or some other misleading subject, are no longer permissible, as the former means table oil and the latter salad oil, and in both cases the product consisted of some other oil than olive oil, although offered and sold when olive oil was asked for and desired. This leads to a consideration of the fact that "descriptive matter upon the label shall be free from any statement, design or device regarding the article or the ingredients or substances contained therein, or quality thereof, or place of origin, which shall be false or misleading in any particular. The term 'design or device' applies to pictorial matter of every description, and to abbreviations, characters or signs for weights, measures, or names of substances."

In the case of olive oil no better example could be given of the flagrant violation of this provision, as about 50 per cent of the adulterated samples collected two years ago in Philadelphia, many of which consisted wholly of cottonseed oil, contained illustrative descriptive matter to deceive the purchaser into the belief that it was made from olives, and I have no doubt that the judicial determination of the matter would result in the prohibition of the use of such trade names as "premier," "superior," "superfine," "extra," "XXX," "alpha," etc., when used in connection with second-grade products, as is often done, even at the present time.

Prof. CHARLES H. LAWALL,  
Philadelphia, Pa.

A cereal food product, for some time sold as "Elijah's manna," with a picture of the venerable patriarch being fed by ravens, has had its name changed to one that is not calculated to deceive the purchaser into the belief that the firm supplying it obtained the article in some miraculous manner.

"An article containing more than one food product or active medicinal agent, is misbranded if named after a single constituent." This prevents the use of such a term as "castor oil pills," unless the principal therapeutic agent is castor oil. The interpretation of the law provides also that in the case of drugs the nomenclature employed in the U.S. Pharmacopoeia and National Formulary shall obtain. In connection with this provision, attention may properly be called to the use, or rather common misuse of the word "compound," which has been employed as an immunizing term by many manufacturers and dealers, in such an elastic manner that it means little or nothing, and the better class of manufacturers are abandoning it altogether, except in such instances as official preparations when usage makes it right.

A very important instance of the misuse of this word "compound" came under the writer's observation soon after the passage of the Act. A certain wholesale liquor dealer was so anxious to avoid prosecution or even criticism, that he had stickers printed bearing the word "compound," which he affixed to every bottle of goods in his place, even "cheap" goods, which had been guaranteed to him by the manufacturers. Several of the latter, when they discovered what was being done, raised such strenuous objections, that the dealer was compelled to go over his stock and remove the stickers from all bottles to which they did not properly apply.

The word "compound" is only permissible when the food or drug mentioned specifically by name is present in a preponderating amount by percentage in weight or volume or in medicinal effect. This is a fair interpretation of the law, and in order to effect conformity it will be necessary to change the names of several of the N.F. preparations where this principle is violated.

The word "artificial" is another which has been misused in the effort made by manufacturers to avoid the use of the correct terms "imitation" or "substitute." These latter certainly express the true state of affairs, but the truth is not always relished by the person who is trying to sell the goods. One instance when the use of this word was advantageous was seen in the slim sections of Philadelphia, where penny soda water is sold made from syrups flavored with artificial esters in imitation of the natural flavors. After a crusade several years

ago to prevent the sale of these products under the name of the pure fruit syrups, the dealers put up signs over the soda fountains as follows: "All of our syrups are guaranteed to be artificial," and a thriving business was soon re-established among the foreigners, who thought that this was a mark of superior excellence.

There are three classes of dealers or manufacturers who must be considered in connection with the interpretation of the label. First, there is a large and growing class who are desirous of having their labels tell the truth, and the whole truth, and who spare no trouble to conform to the exact provisions of the law in this respect, which is not always such an easy matter, as will be explained later on.

Second, there is a class, diminishing in number, who exert every effort to conceal the truth, so that the actual nature of the product is kept secret as far as possible. Third and last, there is a small class who label their products in a non-committal manner admitting of varying interpretations. An example of a firm making deliberate misrepresentations is found in the case of the one putting on the market "digesto coffee," which for a long time was sold as "coffee, with all the tannin and caffeine removed," although the palpably mendacious statement has since been somewhat modified.

Another example was observed several years ago in Phila-

\*Proceedings of Pennsylvania Pharmaceutical Association.

delphia, when a house furnishing colors for bakers and confectioners, put up a package of a substance intended for coloring cake icing in imitation of chocolate, marking it so that, according to whether you read it horizontally or vertically, it read, "chocolate paste-brown color," or "chocolate brown-paste color." It also bore the words "mineral brown" in minute letters on an inconspicuous part of the label. Another and smaller firm purchased a can of this material for jobbing purposes and relabeled it simply "chocolate paste," were prosecuted and fined for violating the law, and in turn entered civil proceedings and tried to collect damages from the first firm for misleading them in regard to the character of the product.

The best way to clear up some of these difficulties is to make specific examples and discuss them, and as the same principle applies to both, food and drug products will be taken up indiscriminately. Take, for instance, the product known as "black antimony." It is a worthless mixture of coal dust and earthy matter, which has been long sold in the trade for veterinary purposes, and which is still sold under that name by some dealers, with the information prominently given upon the label that "This preparation contains no antimony nor any compound thereof." This is certainly a sincere effort on the part of the dealer to do all in his power to warn the trade of the nature of the product, and yet, by a strict interpretation of the spirit of the law even such a label is illegal. The better way would be to discontinue absolutely, the sale of an article which everybody knows is worthless, although it might be more properly labeled "coal dust, formerly fraudulently called black antimony."

"Oil of sweet almonds, so called, made from peach kernels," is another example of the same kind; it might just as well be labeled and sold as "oil of peach kernels" without explanation.

Wines are now being designated as "types," such as Port type, Tokay type, etc., the specific names being understood to properly apply only to those products where the geographical origin agrees with the recognized names.

The word style is also used in a similar sense in "Boston style baked beans" and "Frankfurter style sausages," etc. That this provision is being enforced was recently shown by the detaining of a transatlantic liner at the moment of sailing because of a consignment of so-called "Bavarian beer" which was wrongly marked as to its place of manufacture.

In the potted meat industry we have an instance of the effect of the observance of the law, in the changing of the label without making any change in the identity or quality of the product. "Potted chicken, potted tongue and potted ham are now labeled "potted meat, chicken flavor," "tongue flavor" or "ham flavor," according to the kind, and the additional statement is made declaring the presence of cereals.

The host of imitation jellies are now correctly labeled, and it is common in the cheaper grades to see such labels as "apple jelly, currant flavor, artificially colored," to describe a product which several years ago would have been sold as straight, pure currant jelly.

Vinegar affords the dealer who belongs to the non-committal class a good field for his labors, for in spite of the State laws in some commonwealths, requiring the package to be plainly marked as to whether it is a distilled or a fermented product, together with the origin if it belongs to the latter class, there is much that is sold by the misleading terms "white vinegar," "white wine vinegar, so called" or "pickling vinegar," all of which would deceive the ordinary purchaser.

As regards corn syrup, the Federal authorities have sanctioned the above term to describe the product commercially known as glucose, and the principal manufacturers of this delectable substitute for cane sugar syrup, while they are careful enough to keep within the law as regards the label on the package, are using misleading illustrative matter in their newspaper advertising as applied to the product, showing the picture of an ear of corn, for instance, accompanied by the phrase "all the flavor and sweetness of the corn," as if the flavor and sweetness really did come from the corn, when it is a matter of common knowledge that the product is prepared not only from the starch of the corn, but that the husks, cobs and all cellular tissues may also be employed, and it certainly would have been preferable to have authorized the use of the words "cellulose syrup," as correctly descriptive of the product now known as "corn syrup." Certain it is that nine out of ten consumers, when asked as to their ideas of what corn syrup really is, would reply that it is a syrup made from corn, as

maple syrup is made from the maple tree, cane syrup from the sugar cane, or sorghum syrup from the sorghum plant, and when such a state of affairs exists it is a deception, and therefore a violation of the spirit of the law.

It is in connection with some of the pharmaceutical products, however, that the greatest difficulty occurs. Take, for instance, the following: A bottle is labeled "chloroform liniment; each fluidounce contains 60 minims of chloroform." While this clearly states the undoubted facts in the case, it is a direct violation of the law, for the official name "Chloroform liniment" is used, and no adequate warning is given the intending purchaser of the deviation from the official strength, which should be 144 minims to each fluidounce. The correct way to label such a preparation in conformity with the Federal law would be to say: "Chloroform liniment containing less than half the amount of chloroform than the U.S.P. liniment," or "containing about 41 per cent of the amount of chloroform required by the U.S.P.," or in some similar intelligible manner indicating the exact nature of the deviation from the official formula, for the label first mentioned would be accepted by every purchaser as an evidence that it was full standard strength. A prominent wholesaler recently found it impossible to obtain phosphoric acid that complied with the U.S.P. test for heavy metals, and therefore labeled packages sent out as follows: "Phosphoric acid. This product contains a slight excess of heavy metals by the U.S.P. test, otherwise U.S.P. strength and quality."

A very peculiar condition arises in connection with such products as tincture of vanilla or tincture of Jamaica ginger, where there is a deviation from the alcoholic strength of the menstruum directed by the U.S.P., although the full official quantity of the drug may be used. In such cases, the resulting preparation may be quite equal to the official preparation in quality, and yet it would be illegal to designate it as U.S.P.; it seems to me the only fair method would be to make the following statement clearly: "Tincture of ginger; made with a menstruum containing 10 per cent (or 20 per cent, as the case might be) less alcohol than that directed by the U.S.P.," and where there is any deviation in the quantity of drug used it should also be plainly stated as "tincture of ginger, one-half the U.S.P. strength," for while labeling of the actual strength might be literally correct, it would, as in the case of the chloroform liniment mentioned above, mislead the purchaser into the belief that there was no deviation from the official strength.

It is unfortunate that the U.S. Pharmacopoeia, 8th revision, has not included more of the synonyms for commonly used substances in the body of the work, such as essence of peppermint, essence of ginger, extract of vanilla, etc. The latter preparation particularly, almost is never used in medicine, and the relation of the formula of the Pharmacopoeia leads to all kinds of misunderstandings and complications. Under the Federal Act it is not proper to call an article "extract of vanilla" unless it is made from vanilla bean only, and of a certain specified strength. It is allowable to sell extracts made from vanilla and coumarin, however, if they are designated as "vanilla substitute flavoring," "imitation vanilla flavoring," or some other similar intelligible title, and there is no doubt, that as there are many consumers who prefer the flavor of the imitation articles, there is a large market for a properly labeled article, but it certainly is unfair to put such a product up and call it "Mexican vanilla compound" or some other misleading title.

Another difficulty, probably greater even than with the pharmaceutical products, is encountered in the handling and selling of such food products as are often sold without a label, frequently in containers brought by the purchasers, such as table syrup, vinegar, etc. Just as palpable a fraud is perpetrated upon the consumer who goes to the grocery store and asks for a quart of molasses or of cider vinegar, and who has delivered to him a quart of glucose or of diluted acetic acid colored with caramel, as though the package were plainly labeled, and at some future time the laws will doubtless provide for such contingencies in some adequate manner.

In summarizing, it may be said that if you are in doubt as to the exact status of a label on one of your products, place yourself in the position of a prospective customer who knows nothing of the product, and see if it conforms to the requirement of affording such a customer an adequate idea of the nature, class and quality of the article without any misconception whatever. If it answers this requirement you may be sure that you are right and may safely go ahead.

# ADVERTISING for DRUGGISTS

## ARRANGING WINDOW DISPLAYS FOR SUMMER.

**Light Line Effects Solve Problem Due to Small Windows and Produce Attractive, Catchy Effects.**

Various schemes have been devised to display goods in show windows during the season of the year when flies are bothersome, and this is considerable of a problem in stores having small windows or windows in which a banked display would obstruct needed light. To overcome these difficulties a trim like that devised by W. P. Herbst, of Washington, D. C., has

proved not only satisfactory for the purpose, but it aided greatly in the disposal of a gross of rubber combs.

The general character of this display is shown by the accompanying illustration. In preparing this trim tacks were driven around that part of the window frame which separated the main part of the window from the transom and at a corresponding height in the back casing, the tacks being six inches apart. From these tacks, across the window in both directions, was tightly stretched No. 36 soft iron wire. The wires were woven under and over each other so that they formed a firm network of six inch meshes. Where the window ceiling is of wood or other material into which the tacks may be driven in six inch squares without damage to the ceiling,

the network of wire may be omitted.

To each intersection of the cross wires a wire was fastened of sufficient length to reach within a few inches of the window floor, the hanging wires being thus separated by intervals of six inches. Upon these suspended wires the combs were hung. By passing the wire between the first and second tooth at one end of the comb, stretching it downward and then passing it back between the last and next to the last tooth, the weight of the comb gave the thin wire such a tension that the comb remained in place without coiling or knotting the wire around the comb. Three or four combs were hung upon each wire and as they were at irregular distances upon the nearly invisible metal threads the window appeared to hold showering combs. Upon the bottom of the window combs were strewn, and a show card announced the bargain price. The display consumed six spools of No. 36 wire, costing 30 cents per dozen spools.

### A Trellis of Brushes.

Wires arranged in the manner just described may also be used for tooth-brushes, sponges and other light articles. With

proper care a really beautiful display of tooth-brushes may be made in the following manner: Across the rear of the window, near the ceiling, fasten a stiff strip of wood into which a row of tacks have been driven at intervals of six inches and in the exact center of the window floor place a strong screw-eye. Run a taut wire from each tack to the screw-eye. When arranged the wires will radiate from the screw-eye like ribs of a fan. Across these wires fasten tooth-brushes in the formation of ladder rungs. The result will be a fan-shaped trellis of brushes. Over this trellis, in and out among the brushes, run a light artificial vine of smilax, or other small leaves or small flowers, such as violets, may be used. Be careful not to use enough vines or flowers to hide the brushes or give the display a solid appearance. The beauty of the display depends largely upon its airiness. Display tooth preparations upon the floor of the window with vines lightly twined around them.

### The Web.

For the following, fine brass or fanned wire should be used. Bright broom wire answers nicely. Run wires from the top, bottom and sides of the window so that they can cross exactly in its center. If the sides of the window are of glass, run two heavy wires from the floor to the ceiling, one at each side of window, and fasten the radiating wires to them. Weave circles of wire in and out among the radiating wires until the general appearance is that of a spider's web. This web may be used for several attractive displays. An illustration of a pretty female head may be cut from a calendar and fastened over the center of the web, and then at the intersections of the web fasten brilliantly labeled, small bottles of perfume or cakes of

soap. Fasten a candy box at the center of the web and over the web display pictures of heads of children, men and women, such as may be cut from show cards and calendars. Place the picture of a baby's head at the center of the web and round about it fasten nipples, teething rings, pacifiers and other infant goods. Do not cover the web too thickly with any goods.

### The Balancers.

Stretch five or six wires across the window at about 18 inches from the floor. Take a large cork and into each side of it force the blade of a pocket-knife, manicure implement or other pointed article. Stick these articles into the corks near the bottom and at an angle of 45 degrees. Into the

bottom of the cork force two pins nearly to their heads and just far enough apart for the taut wires to go between them. If the articles forced into the cork are of sufficient weight, the cork will, when placed upon the wire with wire between the pins, balance like a tight-rope walker and the vibrations of the building will keep the display slightly moving at all times. If desired, butchers' skewers may be stuck into the cork and light toilet articles hung to the lower ends of the skewers by means of short pieces of twine. Added attractiveness may be secured by brightly painting the corks and skewers and sticking small feathers in the tops of the corks.

Those who possess the necessary ingenuity and time may carry this balancing idea farther by using three corks instead of one, fastening them end to end with glue, drawing faces on the top corks and then dressing the cork and skewer figures in gaudy robes of crepe paper in imitation of Japanese acrobats.

#### "Siftings."

Take a strong iron hoop, such as that from an oil or alcohol barrel. Stretch wires across it so as to form a sieve with two or three inch meshes. Cover the hoop with ribbon of crepe paper and suspend from window ceiling or stand upon paper-wrapped legs upon window floor.

Upon top of this sieve place a few of the articles that are to be displayed, such as tooth-brushes, soaps or other small goods. Arrange the goods so that they will appear to be sifting through the meshes and place a pile of similar articles beneath the sieve. Use a large show card with lettering similar to the following: "SIFTINGS. We have sifted out our

tooth-brush stock and taken therefrom all the small lots and such goods as may be slightly soiled, but otherwise perfectly good. On these siftings we have sifted out the prices also and offer them to you at a figure less than their original cost. Come in and look them over."

#### "Skiddoo!"

Stretch a few wires across back of window and upon these, with small bits of wire fasten tooth-brushes, combs or other small articles so as to form the figures "23." Below this display more of the goods and the following card: "SKID-DOO! 23 for ours. We've got to get 'em out. Bought too many of these. Prefer their room to their company. Yours for 23 cents each. I usually sell for double the money."

#### Floral Shower.

Arrange wires as described for comb display. Cut a large number of three-inch squares of crepe paper. Use several brilliantly contrasting colors. Gather each piece in the center so as to form a small bow. Fasten at intervals along wires by twisting the wires around the centers of each piece. Arrange irregularly with colors alternating. On the floor of the window arrange a light display of brilliantly wrapped toilet or other goods. Allow sufficient length to the wires to permit the bits of colored paper to touch and lightly trail over the displayed goods.

If you wish to display a single odor of perfume, or soap or goods of single flower name, use a corresponding color of paper only, thus: White for white rose, violet for violet, red for carnation, yellow for golden rod, and so on.

### ILLINOIS PHARMACIST WINS \$10 CASH PRIZE OFFERED IN THE ERA'S COMPETITION THIS WEEK.

In the ERA's Prize Competition this week the judges have awarded the \$10 cash prize in Contest No. 1 to J. Earl Taylor, Ph.G., of Dr. J. A. Taylor & Son, Gridley, Ill., for a particularly good paper upon the systematizing of the care of show windows in drug stores and containing some suggestions which ought to prove of value to a large number of our readers. His contribution follows:

#### "System" of "The Care of the Show Window."

By J. Earl Taylor, Ph.G., Gridley, Ill.

System is a word we often flit by, failing to do justice to the value represented by it. By system, its application or omission, shows our profession become a success or a failure.

We should appreciate its value in every turn of our business if we aim to be with the leading pharmacists of the day. Not only to one line, but to all lines, does system apply. In cleaning up, in buying goods, in salesmanship, in the general conduct of our business, in all these, system is absolutely essential.

In the care of the show window arises a need for system that becomes more and more apparent as the results of our efforts show in a material way. The system to which I refer is that of the care of the show window regarding the definite planning ahead for displays to be made. Now, a plan that proves good in one store cannot be laid down as an unchangeable rule for another business. It may be equally effective in another store. Yet in a general way, the good ideas of one system may be applicable to a large number of stores if modified by one's own experience and adapted to one's special case.

"What shall I use as a trim today?" To be forced to this question shows a lack of systematic planning. Such procrastination—making the plans and the display at the same minute, leads to a sad end. Time has not been used to the best advantage. Never ask yourself such a question for it denotes negligence and spells failure.

Prepare ahead! Live up to a financial success. A man, by honest means, can no more attain wealth at a bound than he can expect results in a minute if he is careless or indifferent to such a valuable silent salesman as his window display. Plan ahead. Systematize your work, be up and doing! Think for yourself and if your business does not give you time to execute ideas you may easily delegate the details to your assistant.

For the sake of the busy man, I outline a calendar of window displays that may be used as a basis for future work. I have many times added to the list as necessity demanded, or as the wisdom of necessity required. The following table,

kept in a convenient place, may be found of considerable service. It is composed of articles that will suggest displays applicable to your locality and adapted to your special trade conditions:

January.—Cold cures, cough medicine, chamomile, hot water bottles, stationery, toilet articles, post cards.

February.—Cough medicine, cold cures, lozenges, toilet articles, Washington's Birthday pennants, arm bands and pennants.

March.—Base ball goods, Easter trim, perfumes, marbles, St. Patrick cards, spring tonics.

April.—Stock food, blood medicine, ball goods, April Fool goods, paints, oils, brushes, varnishes, house cleaning necessities, ammonia, disinfectants, borax.

May.—Spring medicine, household necessities, post cards, sporting goods, souvenir books, photograph supplies, high school trims.

June.—Graduates, paints, tooth brushes, foot powder, talcum, brushes, stationery, high school class window, post cards, fishing tackle, flags, bunting.

July.—Fourth. Trim, flags and bunting, bandages, tapes, court plaster, liniments, talcum, fly poisons, stock foods, baby articles, post cards, sulphur.

August.—School supplies, sundries, diarrhea medicine, toilet articles, fly paper, foot powder, mosquito lotions.

September.—Corks, spices, household needs, cleaning sundries, school supplies, post cards, Labor Day pennants.

October.—School supplies, paints, toilet articles, combs, brushes, foot ball goods, sheet music trim.

November.—Hand lotions, rubber goods, hot water bottles, syringes, Thanksgiving trim, stock foods, post cards, magazines.

December.—Christmas trim, New Year's display, stationery, books, magazines, post cards, hair brushes, hot water bottles, rubber gloves, soaps, bath powder, decorations for Christmas, tissue paper, novelties, crepe paper stickers, music supplies.

There are many other things to be added to these lists, such as special day trims, birthdays of great men, fair days, county fairs, lodge conventions, class meets, etc., all of which demand special attention.

You should have your window displays decided upon at least a month ahead. The ease with which the material will come to hand and the way details will work themselves out, if given the time to mature, will surprise you. Whereas, if you leave the display until the last moment everything will go wrong and your ineffective window will cost you double worry and work that it should.

Learn to systematize your work, plan ahead and the work of the show window will become a pleasure.

## PERSONAL MENTION

—JOHN A. STEVENS is a new Sharp & Dohme Chicago salesman.

—ROBERT H. BLUE is now representing Sharp & Dohme in West Virginia.

—EUGENE F. CORDELL is now on Sharp & Dohme's Baltimore city sales staff.

—DR. A. F. HERRING is now doing detail work for Sharp & Dohme in Chicago.

—GRANDIN V. JOHNSON, of Sea Side, N. J., was a caller upon the trade in New York City last week.

—W. B. KAUFMAN, head of the importing department of Parke, Davis & Co., is still on the sick list.

—GEORGE CHANDLER, of the Sisson Drug Company, Hartford, Conn., was a New York City visitor last week.

—J. Y. MURPHY has accepted a position with Sharp & Dohme and is representing the house in South Carolina.

—W. J. LESAULNIER is now calling on the trade and doing detail work in Indianapolis and Central Indiana for Sharp & Dohme.

—OSCAR PAUL has accepted a position with Sharp & Dohme as salesman in Kentucky, with headquarters at Louisville.

—J. E. FELTS, of Melbourne, Ark., was a recent visitor at Little Rock, where he heard William Jennings Bryan deliver an address.

—ANDREW SILVERTSEN has just been added to Sharp & Dohme's selling force in Minnesota, with headquarters at Minneapolis.

—PETER DALEIDEN, formerly in a Sheboygan, Wis., pharmacy for some time, is now located at the Hipke drug store at Center, Wis.

—A. M. KING, with Sharp & Dohme, has recently been appointed to the Ohio territory formerly covered by W. J. Shrader, who resigned.

—WILLIAM B. STRONG, vice-president and treasurer of the Milwaukee Drug Company, has returned from a business trip to Grand Rapids, Mich.

—GUY SMITH, a popular drug clerk, formerly with F. W. Herbst, of Columbus, is now traveling for Sharp & Dohme in central and southeastern Ohio.

—HENRY HEIDENSEN, formerly connected with the Hollister pharmacy at Madison, Wis., is now located with the O. O. Melas drug store at Stoughton, Wis.

—L. H. HOAGLAND, proprietor of the Van Duersen Pharmacy, New Brunswick, N. J., called upon friends in the New York City wholesale trade last week.

—GEORGE HOBKLY, formerly with the Daniel R. Jones pharmacy, of Milwaukee, is now associated with the Kamps & Sacksteder drug store at Appleton, Wis.

—DR. AND MRS. LOUIS P. RITTMANN, of Philadelphia, are home again from a 15 days' visit to the Bermudas. They brought many rare specimens of coral, etc.

—HARVEY LICHTENWANER, manager of the Sanitarium Pharmacy at Battle Creek, Mich., was a recent visitor at the Milwaukee Drug Company's establishment.

—J. ELLWOOD LEE made the high total in the matches last week of the Philadelphia Wholesale Drug Bowling League. His scores for three games were 202, 181 and 200.

—WILLIAM RACHUE, well known traveling salesman, formerly with the Roemer Drug Company, of Milwaukee, is now with the Daniel R. Jones pharmacy at Milwaukee.

—PERCY SHARP, ex-president of the Wisconsin Pharmaceutical Association, was a recent Milwaukee visitor. Mr. Sharp is a well known druggist at Oconto Falls, Wis.

—ERNEST J. MCCILLIS has become registered pharmacist in Charles L. Eddy's drug store in Franklin, N. H. Herman Morrison also has accepted a position in the same pharmacy.

—DR. HENRY H. RUSBY, president-elect of the A. Ph. A., was the guest of honor and principal speaker at the spring meeting of the Hudson River Schoolmasters' Club at Albany last week.

—J. H. BARLOW, formerly N. A. R. D. organizer in Pennsylvania, but now the local representative of the Philadelphia Association of Retail Druggists, was a Washington visitor a few days ago.

—L. O. GRINNELLE, of Grinnelle & Schanck, Allenhurst and

Lakewood, N. J., was a caller in the New York City wholesale trade last week buying supplies for the coming season at Allenhurst.

—R. E. DOOLITTLE, Chief of the United States Pure Food and Drug Laboratory, of New York, is in Nashville, Tenn., superintending the installation of the new laboratory in the Custom House in that city.

—DR. LYMAN F. KEBLER, chief of the Drug Laboratory, Department of Agriculture, Washington, D. C., was a visitor in New York City during the fore part of this week, fulfilling some business engagements.

—J. F. MINNICH, head of the local sales department of the J. S. Merrell Drug Company, St. Louis, has returned to his desk from Chicago, where he spent a week, having been called there by the death of his brother.

—IRA ANTONIDES, Jr., of Atlantic Highlands, N. J., was a New York City visitor last week. Mr. Antonides reports that the business men of the Jersey coast resorts are optimistic on the outlook for the coming season.

—COL. A. H. HOLLISTER, of the Hollister Drug Company, and manufacturer of Rocky Mountain Tea, Madison, Wis., has been elected a director of the Forty Thousand Club, an enterprising commercial organization of Madison.

—W. J. WORTHING, who for years has represented Sharp & Dohme in West Virginia, has been transferred to Ohio, with headquarters at Toledo. He now covers the territory formerly looked after by R. E. Richey, who has resigned.

E. H. WOFFE, of the Wolff-Wilson Drug Company, St. Louis, has just purchased a building lot in Waterman avenue, near Union boulevard, in the heart of the residence district of that city, and has announced that he will build there a \$300,000 residence.

S. H. CARRAGAN, assistant manager of the New York branch of Parke, Davis & Co., distinguished himself on the links of the Dyker Meadow Golf Club last Thursday in the first game of the season held by the Drug and Chemical Golf Association.

—P. E. HERMAN was the unanimous choice of the field men for the position of district sales manager for Sharp & Dohme in Ohio and Kentucky, made vacant by the death of Frank N. Pike. Mr. Herman is a deservedly popular salesman among the druggists in his territory.

—O. V. WILLETT, who has been with Showers & Phillips, Elizabethtown, Ky., for the last four years, has been compelled on account of ill-health to go to Louisville for medical treatment, after which he will probably go West to locate. He is succeeded by J. H. Woodbridge, of Clarkson.

—H. C. LANSINGER, for several years in charge of the advertising and publishing departments of Dr. D. Jayne & Son, Philadelphia, has resigned to engage in the printing business. J. Maxwell Bullock, the general manager, will answer inquiries in the future in the departments mentioned.

MISS MALEY H. SELDON, of Fond du Lac, Wis., was one of the successful candidates granted a registered pharmacist's certificate at the recent State examination held at Madison. Miss Seldon was formerly employed at the Theimer Pharmacy and at the Krumer drug store at Fond du Lac, and of late has been attending the School of Pharmacy at Marquette University.

FRIEDRICH GRUNSWALD, well known in the drug trade and formerly connected with Parke, Davis & Co., as representative in Baltimore, arrived in New York City last Monday from Colon, where he is engaged with the Panama Railroad. Mr. Grunswald is renewing acquaintances in New York City this week and intends also to spend a week in Baltimore before returning to the Isthmus.

—J. AREDEAS, city salesman for J. S. Merrell Drug Company, St. Louis, is chief promoter of one of the strongest amateur base ball teams of that city. The team is the central attraction of young men's club Mr. Aredeas had devised and is strictly an amateur organization, the players all living in the Compton Heights neighborhood and they play ball for the love of the sport and without admission fee to their games.

—ERNEST CARBONNE, a prominent Philadelphia druggist, was considerably surprised when he went to meet his wife, who was a passenger on the Holland American liner Rivindam, from Rotterdam to New York, to learn that on the voyage twins were born to Mrs. Carbonne. Both the mother and the little ones were able to greet the surprised husband and father at the dock. After spending a few days in New York, the happy family returned to Philadelphia.

## WILL SEND DELEGATES TO A.M.A. MEETING.

Secretary of Section on Pharmacology Asked by Baltimore to Make Program Interesting to Pharmacists.

BALTIMORE, April 24.—At the last meeting of Baltimore Branch of the American Pharmaceutical Association, M. S. Schimmel read a paper on National Formulary preparations, with special reference to elixirs, and William J. Lowry addressed the branch on granular effervescent salts.

Resolutions authorizing the president to send five delegates to the meeting of the Section on Pharmacology of the American Medical Society when it meets in Atlantic City in June, was adopted, and the president was also directed to urge that as many druggists go from Baltimore as can get away, the purpose being to show appreciation of the courtesy and to establish closer relations between the physicians and druggists. The secretary was instructed to communicate with the chairman of the Section on Pharmacology and request that in arranging the program the latter be made as interesting for pharmacists as possible. An effort is also to be made to have the section arrange a special session for the druggists, at which physicians and druggists can meet jointly.

Secretary Charles L. Meyer feeling indisposed Dr. H. P. Hynson made a report on the visit of Baltimoreans to the recent meeting of the Philadelphia Branch. Mr. Lowry, who is vice-president and chairman of the executive committee, presided.

The following was offered by Professor Hynson for discussion at a future meeting of the branch and for discussion at the coming meeting of the Maryland Ph.A.:

Resolved, That it is the sense of the Baltimore Branch of the A.P.A. that the Ninth Revision of the U.S. Pharmacopoeia should not contain formulas for compound preparations and should present matter relative to simples and preparations of simples, only; that the National Formulary should contain only such formulas for compound preparations as are consistent with prevailing advanced knowledge of chemistry, pharmacology, pharmacy and therapeutics and that all titles therein contained should be true to content and in accord with accepted medical and pharmaceutical ethics. It is further

Resolved, That the parent body be requested to consider the advisability of publishing a General Receipt Book, with frequent supplements to contain all formulas dropped from the U.S.P. and N.F. and such other formulas as may be useful to pharmacists.

## \$1000 Verdict for a Girl's Finger.

A jury before Judge Schmeck in the City Court, New York City, recently returned a verdict in favor of Betty Abrams for \$1000. The verdict represented the value the jurors placed upon half of the first finger of the right hand of the girl. It was against John M. Halper, formerly a druggist at 140th street and Lenox avenue. Goldwater Brothers now occupy the store and are in no way concerned in the litigation.

In her complaint the plaintiff set forth that on August 24, 1904, she went to the defendant's drug store to buy a solution of carbolic acid, with which to bathe an injured finger. She said that she asked for a 2 per cent solution and that when she dipped her finger into the acid her hand was badly burned and that it became necessary to have her forefinger on her right hand amputated at the second joint.

Mr. Halper denied any responsibility for the plaintiff's injuries and set forth that whatever injuries she sustained were due to her own carelessness.

## Verdict of \$8464 for Prescription Error.

Mrs. Mary Edith Dreyer, of Bronx Borough, New York City, wife of August Dreyer, a hat and cap manufacturer, was given on Monday a verdict of \$8000 against Edward F. Miller, a druggist, of Tremont avenue, as damages for a mistake in the dispensing of two prescriptions. Mr. Miller was also mulcted of \$464 in a suit brought by Mr. Dreyer, being the amount of the doctor's bill he had to pay for treatment of his wife.

## Druggist Garver Sues for \$15,000 Damages.

BLOOMINGTON, Ill., April 24.—Christian Garver has filed a suit for \$15,000 damages against the Bloomington & Normal Railway & Light Co. for injuries received by being struck by a car on December 12. Mr. Garver received injuries from which he has not recovered. He was confined to the house for some weeks and is still walking with a cane as a result of the fall.

## COL. LOWE'S FRIENDS CELEBRATE 50TH YEAR.

Friends Banquet Popular New Englander and Present Him With a Solid Gold Hunting Case Watch.

BOSTON, April 24.—Covers were laid for 50 guests tonight in the large dining hall of the Hotel Plaza at the complimentary banquet to Col. John W. Lowe, Boston representative of Eli Lilly & Co., of Indianapolis, and the purpose of the banquet was the celebration of the 50th birthday anniversary of the guest of the evening. L. E. McCusick, of the Carter, Carter & Meigs Co., presided, and during the four hours which followed the first course of the excellent dinner fun and merriment was at a high pitch. It was wholly a stag party, yet to show that Mrs. Lowe was not forgotten the committee sent out to the Lowe home in Roxbury a beautiful bouquet of roses.

Speaking was informal, but everybody told how much they thought of the genial, lovable qualities of the guest, and the words came both from those who were his rivals on the road in the Massachusetts district, as well as from his regular customers by whom he swears, as they swear by him. Among the letters of regret read were one from Senator Blakeslee of New Haven, and C. J. Lynn, of Indianapolis.

Then came a surprise and a gift for the guest of the evening, in the presentation of a solid gold hunting case watch, inscribed: "Presented to John W. Lowe on his 50th birthday by M. P. Gould and Byron C. Gould, 1909." P. J. Hartley, who is associated with Col. Lowe in the Boston district, was chairman of the committee which organized the testimonial.

## UNITED CIGAR STORES CO. IS EXPANDING.

New Corporation Being Formed to Secure Capital to Extend Operations—Millions Already Invested.

Regarding the formation of the Corporation of United Cigar Stores this statement was given out recently at the general office of the United Cigar Stores Company, 44 West 18th street, New York City:

"The determination of this enterprise practically to double the number of retail cigar stores operated by the company throughout the country has made necessary the organization to be known as the Corporation of United Cigar Stores. To accomplish this end largely increased capital will be required, as well as an infusion of new blood in the management of the stores.

"During the last three years of the eight years of existence of the present company real estate investments involving many millions of dollars have been made, either in the outright purchase of desirable property or by long term leases.

"The incorporators in the new company are George J. Whelan, president of the United Cigar Stores Company; Elliott Everett, secretary of that company; Louis Biel and Frederick A. Whelan, vice-presidents of the company, and A. B. Duke."

## Laboratory Equipment Fund Benefit a Success.

PHILADELPHIA, April 24.—With 160 persons in attendance, the entertainment given recently for the benefit of the equipment fund of the laboratory of the food and drugs course of the Philadelphia College of Pharmacy, was a great success from a financial as well as a social standpoint. The majority of the participants were identified with the retail drug trade, while the popularity of Prof. Frank X. Moerk, who presides over the new laboratory, was indicated by the presence of many students in that course.

Mr. and Mrs. Moerk were assisted by Mr. and Mrs. W. A. Carpenter, Mr. and Mrs. Otto Kraus, Mr. and Mrs. G. H. Osborn, Mr. and Mrs. George W. Fehr and other friends. Nearly 100 prizes were distributed. An unexpected feature was the presentation by a well-known manufacturer of a number of boxes of his best chocolates and Otto Kraus, in the capacity of auctioneer, separated more money from the guests as the result of his expatiation on the superior quality of the goods and the advantages and honor of being a purchaser.

## U. of W. Seniors Visit Drug Establishment.

A party of 12 seniors from the chemistry department of the University of Wisconsin, under the charge of Prof. E. W. Kremers, recently visited the establishment of the Milwaukee Drug Company.

## ST. LOUIS COLLEGE OF PHARMACY GRADUATES 50—FINE BANQUET. INTERESTING EXERCISES.

FACULTY: 1, O. A. Wall, Jr.; 2, Dr. O. A. Wall; 3, Dr. Euge Sander; 4, Dr. Whelpley; 5, Francis Hemm; 6, Dr. J. M. Good; 7, Dr. C. E. Caspari; 8, George Lang; 9, W. H. Lamont; 10, W. K. Ihardt; 11, E. P. Cockrell. STUDENTS: 1, F. C. Fischer; 2, G. Weismann; 3, E. O. Windisor; 4, A. D. Dally; 5, H. B. Dyar; 6, R. G. Rockwood; 7, A. Bahmann; 8, A. Schulz; 9, P. H. Reiss; 10, H. C. Rogers; 11, J. L. Jensen; 12, L. E. Ghoslen; 13, J. A. Gittinger; 14, W. J. Connor; 15, A. J. Roedemicks; 16, H. P. Weyrich; 17, J. H. Throgmorton; 18, O. A. Schraut; 19, Sidney Levin; 20, L. H. Hummel; 21, R. F. Emery; 22, M. R. Rojas; 23, D. M. Schafer; 24, A. C. Schulte; 25, R. E. Anderson; 26, J. A. Mueller; 27, R. C. Lehman; 28, S. J. McDunne; 29, F. Sum; 30, C. J. Wachtel; 31, J. L. Gelfy; 32, E. G. Beck; 33, J. E. Wilkerson; 34, M. E. Hill; 35, C. O. Dorr; 36, L. L. Paulberg; 37, C. Morgan; 38, R. D. Rohlfing; 39, L. Lieberstein; 40, Miss K. O'Keefe; 41, G. L. Berry; 42, E. F. Outley; 43, J. E. Campbell; 44, L. H. Orcher; 45, P. Wild; 46, M. E. Ward; 47, L. W. Anderson; 48, Arlo Branch; 49, F. J. Beckrold; 50, F. Oppermann; 51, G. H. Grommet; 52, P. W. Hummel; 53, M. A. Scarborough; 54, P. M. Adams; 55, C. T. Bucher; 56, J. B. Roehm.

St. Louis, April 26.—Many compliments were passed upon the 49 young men and one young woman graduated from the St. Louis College of Pharmacy last week. There had been the annual banquet tendered the class by the faculty, a dance given by the class before the 43d annual commencement exercises, and at all of these there were farewells and felicitations. The faculty openly praised the class standard and in confidence gave even more glowing reports.

Of course there was advice, lots of it, from the speakers at the banquet and from Dr. William Homer Warren, dean of Washington University Medical Department, the speaker of the evening, and from President L. A. Seltz, who conferred the degrees; from Martin J. Noll, president of the Alumni Association, who conferred the alumni prize, and Prof. Francis Hemm, who announced the college honors; but none of the speakers was greeted with greater applause than Col. C. P. Walbridge, of the J. S. Merrell Drug Company, who responded to a toast, "Scholarships," on the banquet programme.

Colonel Walbridge took as his text a remark of the toastmaster, Dr. Robert E. Schluter, that he hoped to see the day when real pharmacy would be divorced from commercialism to at least the extent that a drug store could be recognized by looking in the front windows or in the doors.

"Gentlemen, I want to tell you," said Colonel Walbridge, "that Dr. Schluter will not see his ambition satisfied until the druggist asserts himself and makes a reasonable charge for his

professional services. As long as the druggist is content to let a doctor get 82 for writing a prescription and he fill it for 30 cents, he is going to be a merchant, and not a very highly respected merchant at that. When he chooses to assert himself and charge a fee commensurate with his ability and responsibility, then and then only, will he be able to quit selling sundries, post cards and telephone calls."

Dr. C. M. Nicholson, president of the St. Louis Medical Society, in responding to the toast for that society, took issue with Colonel Walbridge to the extent of blaming the willingness of druggists to sell, and in some cases recommend, patent medicines and always to use combinations and preparations put forth by pharmaceutical manufacturers.

"As long as you are willing to sell," he said to the class, "Somebody's consumption cure and Hetty Green's female complaint remedies you will not be other than merchants."

The commencement exercises took place at Memorial Hall. The banquet was at Hotel Jefferson. Never was a droller and more loyal toastmaster than Dr. Robert F. Schluter, who has served the college and Alumni Association in many capacities. A feature of the banquet not on the programme was the presentation to the college of a crayon portrait of Edmond P. Walsh, who was one of the college officials elected in 1864 and who has been continuously connected with the college as secretary, vice-president, president and in other offices. Dr. H. M. Whelpley, dean of the college, introduced Dr. Schluter for

this exercise, and Sol. Boehm made the presentation speech. William K. Illhardt, secretary of the college, accepted on behalf of the college, in the place of President L. A. Sietz, who was unable to speak that evening because of throat trouble, and Mr. Walsh described his connection with the school in speaking his personal thanks for the honor. Dr. Euno Sander, now in his 84th year, was present during this part of the exercises.

The complete programme of toasts follows: Class valedictory, Louis Henry Ortger; class motto, "Ne Tentas, Aut Perfice," Julius Benjamin Boehm; St. Louis College of Pharmacy, Dr. Otto F. Claus, ex-president; Omega Phi Society, William Joseph Gunn, president; Ph.G. Class, Frederick Christian Buscher; Alumni Association, Martin J. Noll, president; Ph.B. Class, Francis John Wild, Jr.; Our College Days, Augustus D. Daily; St. Louis Association of Retail Druggists, Charles Renner, president; Examinations are Over, John Anthony Gettinger; The College Scholarships, Col. C. F. Walbridge; The St. Louis Medical Society, Dr. C. M. Nicholson, president; The Spanish Edition of the U.S. Pharmacopoeia, Manuel Daniel Rojas; The Pharmaceutical Press, Clyde A. Jennings; The Past and the Future, Arthur Charles Schulte.

The selection of Julius Benjamin Boehm, a son of Sol. Boehm, the veteran treasurer of the college, as one of the two honor graduates to be recommended for membership in the A.Ph.A. with dues for 1909 paid by the college, was following precedent. He is the third of the Boehms to win this honor and there is still another brother yet to be heard from. Criss Morgan, of Vandania, Mo., shared this honor with Mr. Boehm. Other honors were:

Senior honorable mention, James Lothrap Jensen, Salt Lake City; John Anthony Mueller, St. Louis; George Hubert Grommet, Denver; junior class, Edward Mallinckrodt scholarship, awarded to Oscar Frederick Heitmeier, Jr., St. Louis; Meyer Brothers Drug Company scholarship, awarded to Bettie Prince Coussens, St. Louis; J. S. Merrill Drug Company scholarship, awarded to Lloyd Lucius Crocker, Ashland, Ore.; Alumni prize, standard work on pharmacy, awarded for excellence in examination to Earle Carnahan, Fort Smith, Ark.; honorable mention, Abraham Paul Cohen, St. Louis; Mary Royster Coussens, St. Louis; Benson Price Paine, Van Buren, Ark.

#### Fear They Will Have to Pay \$50 Fines Instead of \$25.

Some Brooklyn druggist, who has evidently been penalized by the State Board of Pharmacy, fearful that next time he violates the law he will have to pay \$50 fines, instead of \$25 fines, masquerading under the non de nomynous of "Chairman Retail Druggists' Committee," sent out the following misleading plea last week in behalf of druggists who do not like pure drug laws:

Brother Druggist: You are earnestly requested to write at once to your Senator and point out to him some of the MONSTROSITIES of the so-called Brown Drug Bill No. 2050 and ask him to use his influence to defeat the passage of said bill.

The fines, penalties etc. derived from the Druggists are to be used to pay the expenses of the Board. The so-called State Pharmaceutical Association which meets once a year is to select the names for the Regents to elect as members of the Board.

Fines for so called violations are to be \$50.00 and shall be deemed to be as many violations as articles sold. Shall the 10,000 or so Druggists in New York stand idly by and permit such a bill to become a law?

The Brooklyn Eagle, April 17 states, The Board of Pharmacy collected about \$100,000 in fines illegally from grocers.—Threats frightened them and they promptly paid.

What are the druggists to expect? If the fines are to be \$50.00 instead of \$25.00 and you are called upon to pay \$50.00 for "each" SAMPLE OF VOLATILE AND UNSTABLE ARTICLE you might sell to the Board's Inspectors.—Penalties to be recovered in one action. Write to your Senator at once, do not delay. DELAY MEANS DEFEAT!

CHAIRMAN DRUGGISTS' RETAIL COMMITTEE.

#### Deutscher Apotheker Verein Entertainment Tonight.

An entertainment will be given by the New Yorker Deutscher Apotheker Verein this evening in the club rooms of the society, Allaire's, 192 Third avenue, Borough of Manhattan, New York City. Members and their ladies are invited. Carl Hauser, the famous German humorist, is scheduled to appear, and there will be music and refreshments.

#### A.D.S. Car Attracts Attention in St. Louis.

ST. LOUIS, April 26.—The A.D.S. sample car has been here for several days and the exhibit of pharmaceutical preparations has been attracting considerable attention from local druggists interested in that syndicate.

## PROPRIETARY STAMP TAX NOT LIKELY.

### False Reports of Activity in the Bureau of Printing and Engraving—To Confine Revenue to Tariff.

WASHINGTON, April 26.—Several sensational daily papers have published the statement that employees of the Bureau of Engraving and Printing were working overtime installing new machines and otherwise preparing to print revenue stamps. It was implied that the activity indicated that the restoration of stamp taxes had been fully decided upon by the legislators.

The ERA correspondent is informed by a department chief of the Bureau of Engraving that an unexpected consumption of postage stamps of high denominations made an unusual demand upon the department and for a time a part of the stamp printing force worked two hours per day overtime, but this extra work ceased several days ago. The chief stated that he never knew of a case of making preparations for any work that had not already been enacted into law and that such a proceeding as that claimed would be without precedent.

The trend of discussion in legislative circles is all against the imposition of a stamp tax. Even the proposed income and inheritance tax will probably fail. The consensus of opinion is that the tariff law should provide for all the necessary revenue, but at this time it is difficult to predict what the outcome will be when conference committees of the Senate and House get together for the purpose of finally getting the Payne Bill in shape so it can be passed in both branches of Congress.

The chances of the restoration of the reciprocity paragraph in patents to the Payne Tariff Bill are considered slim. Congressman Currier, who was chairman of the patent committee of the last Congress, does not expect any legislation in relation to patents prior to the regular session of Congress in December.

## LOCAL OPTION LIKELY ON SUNDAY OPENING.

### Druggists Exempt From Bill Passed in House in Massachusetts and Now Pending in the Senate.

BOSTON, April 26.—Substantial progress was made during the past week by the Massachusetts Legislature in its handling of the Sunday law and the sale of soda water, confectionery and ice cream. The committee on legal affairs concentrated its efforts on a single bill, and reported leave to withdraw on all the other ten bills which sought to allow the same rights in slightly varied form.

The discussion in the House was among the most interesting of the session, and the two sides lined up sharply. One provision of the bill is that outside of Boston the local authorities in each city and town must first vote to accept the Act before licenses may be issued under it for the sale of ice cream, soda water, confectionery and fruit on Sundays.

When some of the opponents of the bill voiced their opposition to the bill, they were met by the reply that each city and town could decide the matter for itself, but that Springfield, for instance, did not want Somerville to dictate to her, as to whether such sales should be allowed in Springfield.

The argument that Sunday was being commercialized was also presented. On a rising vote the bill was ordered to a third reading 82 to 43. Then the opponents tried to place the members on record by demanding a roll call, but this was refused, and the bill went along to the Senate.

A provision of the bill specifies that it shall not apply to druggists, as under the present law they already have the right to sell soda water, ice cream and confectionery on Sunday.

### Professor Christie Accused as Swindler.

Charles G. Christie, formerly professor of languages at St. Francis College, Brooklyn, 58 years old, giving his address as 276 Warren street, was arrested recently charged with having passed worthless checks for small sums on business men in Brooklyn. Several months ago Christie was arrested on a charge of issuing fraudulent Regents' certificates, and the case is still pending. Christie being out on bond of \$1000.

### Opposed to the Refilling of Prescriptions.

CINCINNATI, April 26.—At the last meeting of the Cincinnati Central Drug Clerks' Association an interesting paper deprecating the refilling of prescriptions was read by Frank Veltan, after which refreshments and cigars were served.

## PRESIDENT ELKIN PLACES PROMINENT DRUGGISTS ON COMMITTEE ON N.A.R.D. REORGANIZATION.

THOMAS H. POTTS, ex officio,  
Secretary of the N.A.R.D.

W. E. BINGHAM, chairman,  
of Tuscaloosa, Ala.

THOMAS D. McELLENRIE,  
Brooklyn Borough, New York City

CHICAGO, April 26.—In accordance with the action of the last annual convention of the National Association of Retail Druggists passing a resolution calling upon the president to appoint a special committee of five, with Secretary Potts as an ex officio member, to consider plans of reorganization, President Elkin has appointed the following gentlemen to serve: W. E. Bingham, of Tuscaloosa, Ala., chairman; John V. Eitel, Columbus, Ohio; E. B. Heimstreet, Janesville, Wis.; Thomas D. McEllenrie, Brooklyn, N. Y.; Charles D. Sauvignet, New Orleans, La.

The results of the work of the committee will be presented to the Louisville convention and in the meantime the members are hoping to hear from their fellow members of the organization freely as to suggestions for consideration in the matter of the proposed reorganization. Secretary Potts already has many recommendations to turn over to the committee and he is ex-

pecting a great number in addition now that the body is appointed and ready to get busy.

#### Blow to Private Dispensaries in Chicago.

CHICAGO, April 26.—The Health Department is preparing to deal a blow to the private dispensary business in Chicago commencing May 1. At that time licenses will be renewed under the new ordinances and the authorities have decided that they will only authorize such places as are connected with hospitals, medical schools or under satisfactory private management.

#### Second Session Necessary to Finish Business.

CHICAGO, April 26.—The special meeting of the Chicago Retail Druggists' Association tomorrow evening was made necessary by business left over at the monthly meeting.

CHARLES D. SAUVIGNET,  
of New Orleans, La.

E. B. HEIMSTREET,  
of Janesville, Wis.

JOHN V. EITEL,  
of Columbus, O.

## NORTHWESTERN'S 23D COMMENCEMENT.

Alumni Banquet Precedes Graduating Exercises of the School of Pharmacy—Address by Dr. Kremers.

CHICAGO, April 24.—The 23d annual banquet of the alumni of the School of Pharmacy of Northwestern University was held in the Union Hotel. Thomas V. Wooten, secretary of the faculty, introduced as toastmaster Charles A. Storer, '88. Dr. Theodore H. Patterson, of the executive committee, led the way and was followed by a large number of the alumni who responded to toasts.

In assembly hall the graduating exercises of the pharmacy class were held. The hall was tastefully decorated with ferns and cut flowers, the music being of a high order.

Dr. Edward Kremers, dean of the School of Pharmacy of the University of Wisconsin, delivered an address to the graduating class on the subject, "Pharmacy's Contribution to Civilization." The degree of graduate in pharmacy was conferred upon the following:

Alva Lee Adams, Winnetka, Ill.; Arthur Stanley Arnold, Rockford, Ill.; James Warren Beless, Salt Lake City; Paul A. Brecht, Yankton, S. D.; William Edward Claypool, Peoria; Charles Raymond Crain, Chicago; Glenn Griffin Dewey, Poy Sippi, Wis.; John M. Dodd, Marion, Ill.; Matthew Marion Finlay, Bowen, Ill.; Chauncey William Gaeth, Schuyler, Neb.; James Patrick Galligan, Hegewisch, Ill.; Walter Edgar Green, Salt Lake City; Charles Bernard Holmes, Chicago; Arthur W. Huff, Bremen, Ind.; James Lester Hyrup, Odell, Ill.; John Wesley Jennings, Port Gibson, Miss.; Charles Augustus Loeffelbein, Grand Rapids, Wis.; St. Clair Madden, Grayville, Ill.; Walter I. McElrath, Chicago; John Leslie McKibbin, Sheldon, Ill.; Maurice Carson McLuen, Guthrie Center, Iowa; Sverre P. Nordvold, Zumbrota, Minn.; Louis William Oswald, Naperville, Ill.; George Otto Panzer, Hastings, Neb.; Alexander Constantine Rizos, Omaha; Foster Rob Rogers, Kirtley, Wyo.; Bernardo Samson, Philippine Islands; John Hunter Scholes, Bradford, Ill.; Charles Edward Seaton, Hotchkiss, Colo.; William C. Schulze, Racine; Albert Lester Shults, Plano, Ill.; Melvin Dale Sweetland, Highland Park; Neil Williamson Tarbell, Watertown, S. D.; Clifford H. Terry, Humboldt, Ill.; Walter S. Wagner, Morris, Ill.; Roy Warren Batavia, N. Y.; Daniel Clark Watson, Parowan, Utah; Leslie Harwood Wire, Winslow, Ill.; Guy Kenneth Wold, Austin, Minn.

The honor men of the class were Matthew Marion Finlay, Bowen, Ill., and St. Clair Madden, Grayville, Ill.

Graduation exercises for the pharmaceutical chemist class of the school will take place in June.

## "BARBADOES ALOES, A MISNOMER."

Interesting Discussions Upon This and Other Subjects at the Pharmaceutical Meeting in Philadelphia.

PHILADELPHIA, April 24.—One of the most interesting features of the seventh of the series of pharmaceutical meetings at the Philadelphia College of Pharmacy Tuesday afternoon was the animated discussion on the topic "Barbadoes Aloes, a Misnomer," introduced by George M. Beringer. Mr. Beringer, who is chairman of the Committee on the Pharmacopoeia of the A.P.A., explained that his paper was one that was based upon an investigation and report made by John & Fink, of New York. Prof. J. P. Remington, who was the chairman of the Revision Committee of the last Pharmacopoeia, took exception to some of the statements in the paper, particularly one which declared that there was no Barbadoes aloes on the market. The U.S. Pharmacopoeia, as well as the British and others, perpetuated the confusion in both their descriptions and titles. The question of the ruling of the Food and Drugs Act upon an article with a geographical name which was misleading, also came up.

Prof. Henry Kramer said that just such discussions as these would bring out errors at the next revision of the Pharmacopoeia, when they could be remedied by combining the scientific and the commercial knowledge of those interested.

Charles H. LaWall, in an interesting paper, discussed a chemical method for the detection of small quantities of capsiem in ginger ale and other preparations of ginger.

William G. Toplis read an interesting paper upon the progress that has been made in the purification of the drinking water of the city.

## MINSTREL SHOW PROVES A GREAT SUCCESS.

Members of Social Drug Club of Chicago Win Laurels in Entertainment at the Y.M.C.A. Auditorium.

CHICAGO, April 24.—The minstrel show of the Social Drug Club, of Chicago, held at the Y.M.C.A. Auditorium recently was a huge success in every respect and reflected credit upon its promoters as well as upon those who participated and made it possible. If any jokes on the drug trade were overlooked it was not the fault of the interlocutor and end men. The chorus was fine, as were the soloists and the pony ballet was one of the features of the evening. The following were responsible for the success of the affair:

EXECUTIVE STAFF.—Manager of advertising, Charles Stevenson; musical instructor, Al. W. Brown; the angel, Horlick's Malted Milk Company, Racine, Wis.; property master, George B. Farrar; keeper of wigs, "Sunny" Jim Pfouts; stage manager, Dr. M. H. Pritchard; press representative, Col. C. M. Carr; scenic artist, L. P. Larsen; ballet master, Charles Rice; chief usher, John J. Boehm; house chemist, B. A. C. (Alphabet) Hoelzer; censor of telephone calls, Joseph F. McDonald.

OFFICERS.—Herbert Fry, president; W. W. Winberg, first vice-president; W. F. Knoche, second vice-president; Charles H. Avery, third vice-president; J. F. McDonald, treasurer; J. M. Schwalbe, financial secretary; B. A. C. Hoelzer, recording secretary; J. J. Boehm, sergeant-at-arms.

ENTERTAINMENT COMMITTEE.—Charles E. Clarke, chairman; Walter A. Jungk, Frank J. Hoey, Charles A. Redig, Charles Stevenson, Phil Hyman, secretary.

## Students Justify the Selling of Stamps.

CHICAGO, April 24.—At the meeting of the Northwestern University Pharmaceutical Association recently there was a lively discussion by the students regarding the selling of postage stamps by the druggists. This resolution was adopted:

"Resolved, That in existing conditions the selling of postage stamps in drug stores is beneficial to these stores."

The meeting was presided over by Percy W. Savage, of Miles City, Mont., the secretary being J. Warren Beless, of Salt Lake City, Utah. The newly elected officers were: President, Halvor Halderson, of Park River, S. D.; secretary, J. P. Galligan, Hegewisch, Ill.

## Chicago Notes.

—The Iron-Ola Company, of Chicago, has surrendered its charter and gone out of business.

—The Tizit Manufacturing Company, of Chicago, has been incorporated with a capital stock of \$15,000, to manufacture and sell chemicals and chemical compounds. The incorporators are: Charles A. Fisher, Albert C. Haines and William O. Howard.

—The H. Darwin McElrath Company, of Chicago, has taken out papers of incorporation, with a capital stock of \$20,000. The incorporators are: H. Darwin McElrath, William A. Jennings and P. H. Bishop. The concern will deal in drugs, medicines and chemicals.

## Prizes Awarded to Boston Bowlers.

BOSTON, April 26.—Members of the Wholesale Drug League gathered at the Quincy House on Saturday night last for a banquet as the windup of the first season of the league, and for the purpose of awarding the prizes. William H. Forbes, president of the league, announced the winners and presented the prizes. As has already been announced in the ERA, the championship went to the United Drug Company team, and the second prize went to the Eastern Drug Company team. Frank J. Rostrom got the prize for the highest individual average for the season, and Robert Dick took the prize for the highest three-string score.

Among those present were the following: William H. Forbes, Richard Leahy, Frank J. Rostrom, John B. Small, James Otis, F. W. Herrett, O. A. Speare, W. E. Dugan, J. Tobin, T. Storratt, C. H. Rogers, E. F. Fowler, W. H. Higgins, John F. Fultz, P. Connelly, William F. Tennish, J. E. Reardon, Lewis D. Thomas, Robert Dick, Harry A. Stearns, Ernest S. Barraud, Albert Whittaker, Alfred F. Allen, Andrew J. Davis, Harry E. Cook, Robert E. McLaren, Joseph P. Ryan, Charles W. Harrington, William J. Snider, Franklin E. Collins, Albert E. Smith.

# PROMINENT PENNSYLVANIA DRUGGIST DEAD.

Jacob H. Redsecker, Former President of State Association, Was Active Until End Came at 70.

LEBANON, Pa., April 26.—After an illness of nearly three years, Jacob H. Redsecker, Ph.M., one of the best known representatives of pharmacy in Pennsylvania, died on Tuesday at his home in this city. He was about 70 years of age. For nearly half a century Mr. Redsecker had been connected with the wholesale and retail drug business of Dr. George Ross & Co., of this place, and at the time of his death he was the general manager.

Mr. Redsecker was widely known for his valuable services to pharmacy in this State, particularly along legislative lines. Until the condition of his health prevented, he was a regular attendant at the annual meetings of the Pennsylvania Pharmaceutical Association, and with Mahlon N. Kline, of Philadelphia, could always be depended upon to enliven the sessions with their lively repartee and witty rejoinders. Every year he portrayed in verse not only important events in pharmaceutical history but prominent personages as well and his many friends throughout the country regard as one of their most valued possessions, a copy of these poems which Mr. Redsecker had bound a few years ago and presented to them. He was known as the "poet laureate" of the State organization.

He was president of the Penn.Ph.A. in 1897 and a member of other organizations of the same character as well as the Philadelphia College of Pharmacy and the American Pharmaceutical Association.

The Redsecker prize for the best identification of botanical specimens which he instituted years ago in connection with Prof. John M. Maisch, has aided greatly in stimulating botanical research at that institution. His loss will be greatly felt in pharmaceutical circles throughout the country and already many messages of regret and sympathy have been received at his home from friends and organizations throughout the land. Mr. Redsecker was never married.

## Funeral of John H. Haase.

St. Louis, April 26.—A funeral much out of the ordinary was that of John H. Haase, former president of the Kaltwasser Drug Company, Salina and Pestalozzi avenues, this city, who was buried at Belleville. Mr. Haase was described by his friends as a cynic and philanthropist. In his will he provided funds to pay the expenses of the "Reinischer Frohsinn," an East Side singing society, to his funeral, and also requested that none wear mourning but that all come in ordinary clothing. He also selected Dr. Adolph Hensing, of East St. Louis, as the orator of the occasion. He provided funds for refreshments after the service was over. The service was held in an Evangelical Church whose pastor, the Rev. Mr. Lembois, had been a personal friend of the deceased. Mr. Haase lived at 3117 Lempi avenue, St. Louis, and left his fortune chiefly in trust for his sister in Germany, but added a bequest of \$2000 for his nephew, Charles Renner, now president of the Kaltwasser Drug Company, and president of the St.L.R.D.A. and a director of the N.A.R.D.

## Obituary Notes.

—THOMAS B. JOHNSTON, widely known salesman and former druggist, died recently of stomach trouble at his home, Germantown, Philadelphia, aged 63. He served in the Ohio 126th Infantry in the Civil War. A widow and four children survive.

—GUSTAV BISCHOFF, one of the oldest members of the New Yorker Deutscher Apotheker Verein, died recently at his home at 401 East 139th street, Borough of Manhattan, New York City. He was well known among the German element in the city and his sympathetic character made him many friends.

# MARYLAND ALUMNI AT BANQUET.

Event Largely a Pharmaceutical Affair, Though Other University Departments Are Represented.

The late JACOB H. REDSECKER, of Lebanon, Pa.

BALTIMORE, April 26.—Though all the departments of the University of Maryland were represented, the meeting and banquet of the General Alumni Association of the institution last Thursday evening at the Eutaw House proved to be largely a pharmaceutical affair. The president was a druggist, the toastmaster belonged to the same profession, some of the speakers were men connected with the drug trade in one capacity or another, and pharmacy furnished as many diners as any of the other departments represented in the university. The president of the Alumni Association is John B. Thomas, of the Thomas & Thompson Drug Co., and he appointed Dr. Henry P. Hynson, of Hynson, Westcott & Co., as toastmaster, while those who made addresses included Prof. Charles Caspary, Jr., dean of the Department of Pharmacy faculty. Lastly, among those seated around the festal board were George A. Bunting, Dr. Charles Caspary, Jr., Prof. Daniel Base, J. Edwin Hengst, Eugene W. Hodson, Dr. John F. Hancock, Wm. M. Fouch, David R. Millard, J. Emory Bond, head of the Baltimore branch of Parke, Davis & Co.; J. W. Westcott, of Hynson, Westcott & Co.; Leroy Oldham, of the H. B. Gilpin Drug Company; Dr. A. R. L. Dohme, of Sharp & Dohme, and others.

The business meeting resolved itself largely into a discussion of ways and means of raising a large endowment for the university, in order that the latter might be able to carry out some of the ideas of expansion and improvement that have been entertained for some time past. There was also talk of a change in administration. The present system of a board of regents, with all the departments represented, is looked upon as too unwieldy, since the board meets only at intervals, and many matters calling for quick action must be deferred, to the detriment of the institution.

Just how the money is to be raised or what form the changes in management are to take has not yet been decided. Some time ago a movement was started to raise a fund of \$200,000, but only \$20,000 of this amount is actually in hand or pledged. There has been talk of making an appeal to Andrew Carnegie, but nothing has been done in this direction. Dr. Simon Flexner, of the Rockefeller Institute of Medical Research, was also talked with, but the matter has not advanced any further.

## Colonel Philips Again Heads Southern Club.

MEMPHIS, Tenn., April 24.—Col. D. D. Philips, president of Berry, Donoville & Co., of Nashville, was unanimously re-elected president of the Southern Drug Club, which held the final sessions of its bi-yearly meeting recently at the Gayoso Hotel. John W. Durr, Jr., of Montgomery, was also unanimously re-elected secretary-treasurer of the club.

The club, which is composed of wholesale druggists from Tennessee, Alabama, Louisiana and Arkansas, went on record as favoring the National Pure Food and Drug Laws, but is opposed to many of the "freak" measures which are introduced in some legislatures.

## Marriage Mentions.

—JAMES EDWIN KEECH, of Cumberland, Md., was married there April 21 to Miss Mary Agnes O'Neal.

F. P. LAXTON, of Keystone, W. Va., and Miss Nora Austin, of Crozet, were recently married at the home of the bride's parents. The wedding trip included Washington and Philadelphia.

—F. V. PERRY, of the Eli Lilly staff in Arkansas, is in St. Louis, on a protracted visit to his home, the occasion being the marriage of his daughter, Miss Edith Blanche Perry, to James C. Haynes, of St. Louis, April 21. The Perry home is at 743 Aubert avenue.

## BOARD EXAMINATIONS

### Wisconsin.

MADISON, April 24.—The long and faithful service of Edward Williams, of Madison, was rewarded by his election as president of the Wisconsin State Board of Pharmacy at the annual meeting held on the 16th. H. G. Ruenzel, of Milwaukee, was re-elected secretary and treasurer. Sixty-four of the 91 candidates who took the examinations were granted certificates, as follows:

**REGISTERED PHARMACISTS.**—Henry G. Schewe, West Bend; Charles F. Hant, Milwaukee; Carl O. Hahn, West Allis; Harvey A. Schlitz, Milwaukee; William A. Erickson, Minneapolis; John Swanholt, Madison; Alexander G. Black, Midway; Miss Ivalyn H. Seldon, Fond du Lac; Alfred F. B. Muntzel, Milwaukee; Frank C. Behling, Janesville; C. F. Wilske, Columbus; Glen G. Dewey, Poyissippi; Fay V. Kettner, Bloomington; Charles C. Gielie, Ashland; Albert J. Smith, Waukesha; Earl R. Donovan, Appleton; George H. Puls, Sheboygan; Edward C. Lichte, Burlington; Eugene J. Ryan, Superior; Rodney O. Lamphere, Madison; Clayton Larabee Tuttle, Monroe; Robert J. Bowen, Brodhead; Frank C. Bunt, Benton; Frank L. Walter, Baraboo; Max Krembs, Milwaukee; Arthur P. Stebbins, Barron; Charles F. Muehlbach, Milwaukee; Charles E. Kirst, Two Rivers; Paul C. Janke, Milwaukee; Julius C. Look, Milwaukee.

**REGISTERED ASSISTANT PHARMACISTS.**—Charles E. Bacon, Stoughton; George Later Bonndy, Oconomowoc; Louis Desse, Milwaukee; Arthur F. Netzel, Brandon; Sophus Lyngh, Chicago; H. O. Gray, Jr., Oregon; Overt A. Bergen, Iola; Herman O. Kresse, Milwaukee; John Van Leir, Deperre; John C. Quixner, Durand; Harold Martins, Oskosh; Herbert R. Bird, Jr., Madison; Walter Josttrassburger, Green Bay; James A. Power, North Fond du Lac; Walter Gustav Grimmer, Deperre; Elery L. Priest, Green Lake; Walter P. Weber, Watertown; Jasper E. Simons, Lodi; Herman E. Barganz, Watertown; Reinhold A. Zimmerman, Watertown; C. F. Montgomery, Milwaukee; Edward Fleming, Janesville; H. H. Turstin, Hayward; John Knuf, Athens; Arno J. Wolf, Sheboygan Falls; Frank R. Keating, Milwaukee; Hugo J. Luthy, Milwaukee; F. R. Weiss, Racine; Joseph Maurer, Appleton; H. A. Smith, Madison; William J. Tomaschke, Neenah; Harry H. Backbarth, Wausau; Irwin A. Stempel, Watertown; Frank V. Ackerman, Madison.

The next examination will be held in Milwaukee on July 13 and 14. Members of the board present at the annual meeting were: Otto J. S. Boberg, Eau Claire; G. V. Kradwell, Racine; H. R. Allen, Richland Center.

### Montana.

BUTTE CITY, April 24.—Ten of the twenty-five young men who took the last examination before the State Board of Pharmacy were given certificates of registration, and eight more were granted assistants' certificates as follows:

**REGISTERED PHARMACISTS.**—F. C. Sheeran, of Butte; A. Crawford, of North Dakota; C. K. Knox, of Big Timber; A. C. Hawley, of Harlowton; L. C. Scheu, of Glasgow; Benjamin Borson, of Mondak; A. W. Lindstadt, of Butte; G. A. Dunn, of Big Timber; William F. Fagan, of Anaconda, and Gus Swander, of Butte.

**ASSISTANTS.**—J. S. Ellis, Hillyard, Wash.; Fred Hornecker, Alacanda; N. P. Walters, Jr., Helena; W. W. Harris, Butte; Fred Cullen, Livingston; O. E. Potter, Great Falls; Charles E. Rice, Butte, and Chester E. Pool, of Townsend.

The next meeting will be held in Helena in October.

### District of Columbia.

WASHINGTON, April 24.—Secretary S. L. Hilton announces that at the regular quarterly examinations of the Board of Pharmacy of the District of Columbia, held April 8-9, the following were listed as the successful candidates for licenses to practice pharmacy: Louis Laubinger, Philip Robert Wood, George Robert Croen.

The A. Ph. A. prize awarded to the applicant who makes the best examination during the year and who is deemed worthy by the board, was awarded to Morris A. Pozen.

## INTERSTATE ASSOCIATION OF BOARDS MEETS.

Charles H. Avery Chosen President and A. F. Sala Secretary at Recent Session in Louisville.

LOUISVILLE, April 24.—The most important event occurring locally in pharmaceutical circles recently was the joint meeting of the representatives of the boards of pharmacy of the following States: Minnesota, Wisconsin, Indiana, Illinois, Michigan and Kentucky. The conference was held at the Seelbach Hotel. Charles H. Avery, of Chicago, was chosen president, and A. F. Sala, of Winchester, Ind., was elected secretary and treasurer.

The principal business was the perfection of a uniform system of reciprocal and interstate registration. At the last meeting of the Kentucky Legislature, at the earnest solicitation of the Kentucky Board of Pharmacy to grant registration without examination, to applicants from other States where the examinations and regulations were up to the standard observed in this State. All of the States represented have similar laws and it is believed that the conference will result in great good to the profession.

Another important matter that came up was the consideration of the place for the next meeting and the invitation to attend the meeting of the Board of Pharmacy of Minnesota in the third week in October was accepted. An invitation was extended to the Ohio State Board to join the association. President Frost, of this board, was in attendance and the invitation will no doubt be accepted.

All of the delegates were present at an informal dinner, given by the Kentucky members after the business session.

The largest number of applicants that have ever applied for examination and registration in the history of the State Board of Pharmacy were present at the last meeting. Eighty-four applicants were in attendance when the board was called to order. This number was approximated in 1899 when 74 applied. The representatives of the boards from other States were present at the examination.

### Successful Banquet of Medico-Chirurgical Alumni.

PHILADELPHIA, April 24.—Prominent graduates of the Medico-Chirurgical College of Pharmacy attended the annual reception and banquet tendered the members of the senior class by the Alumni Association at Mosebach's Casino. The toastmaster, George C. Wilson, delivered the address of welcome to the graduates and discussed the occasion of the gathering. Prof. I. V. S. Stanislaus, dean of the department, was given a great ovation. His remarks were chiefly upon the bright future of the profession of pharmacy in America. Others who spoke were Professors Fisher, Meeker, Ritter, Hunsberger and Dr. Kelly, of the college faculty, and Messrs. Lilly, Thayer, Stover, Aston, Roshon, Mooney, Hume, Gibbs and McNeary. Other features were the musical selections by college talent, which included a piano and violin solos by H. P. Prout and songs by the college quartet, composed of Messrs. Steink, Nibcker, Goddis and McNeary. Led by the latter, the gathering at the close stood and sang the favorite "Chi" anthem.

### Hegeman Employees Enjoy Dance and Reception.

The first annual reception and dance of the Astor Circle, a social organization, composed chiefly of Hegeman employees, was held last Thursday evening at Palm Garden, Borough of Manhattan, New York City. Over 200 members and their friends were in attendance. The dance programme consisted of two parts of 12 numbers each. E. A. Smith was floor manager, assisted by J. A. Guerin and the following committee: Dr. Brady, chairman; Dr. Wyeth, L. A. Millard, J. J. Kerwin, F. A. Malkowsky, W. J. O'Shaughnessy, S. Smith, Dr. Brooks, R. K. Walsh, R. M. Amador, J. M. Engbarth, Dr. Joseph Mayer, J. M. Shapiro.

### Cut Out Programme Advertising and Ticket Buying.

ROME, N. Y., April 24.—Druggists and Rome merchants to the number of 100 have signed an agreement not to advertise in any other publications than the daily newspapers and regularly issued periodicals. The plan is to abolish all sorts of programme advertising and the agreement also prohibits the purchase of tickets for entertainments and forbids making donations to fairs and bazaars.

**ALPHONSE MAJOR CELEBRATES 63D BIRTHDAY.**

**Known to Every Druggist Through His Manufacture of Cement—Industry Over 30 Years Old.**

Alphonse Major, who is known to practically every druggist in the United States through his manufacture of Major's cement, has led a remarkably active and industrious life, but not many of his friends would believe that he has been so long in the harness as appears from the fact that only last month he celebrated his 63d birthday. In honor of the occasion the veteran had a new photograph taken and the up-to-date presentation which is printed on this page will be viewed with interest not only by his friends, but by many who have known of his cement for years and are familiar with the old label used for so long a time showing Mr. Major, his wife and daughter, used on the boxes in connection with the trade mark, but who have never met the manufacturer.

Mr. Major came to the United States from Canada just after the close of the Civil War and in 1876, in Washington, began the manufacture of the cement which has since become so well and favorably known to the drug trade of the country. From Washington he moved to Baltimore and later made short sojourns in several Pennsylvania towns, finally settling in New York City in 1877.

Mr. Major's life shows the possibilities of application, industry and perseverance, when possessed by a young man. When in 1868 he came from lower Canada to this country, with his knowledge of the tin-smith's trade as his only asset, he found that the progress which was being made in the use of machinery in the tin industry in the United States had caused a diminution in the demand for tin-smiths, so he promptly sought other employment. It was about this time that Mr. Major bought a receipt for making cement from a man known as Charlie Thompson, one of the greatest street fakirs of that time, who could make from \$50 to \$100 a day selling goods from a carriage at a street corner. The price paid for the cement was rather unique, being a pawn ticket for a leather traveling bag bought in Galveston, Texas.

Mr. Major discovered that the cement was not giving complete satisfaction. Realizing that if it could be well made it would be worth putting on the market, he set about experimenting. He found that certain expensive ingredients used were in too small a proportion and that other component parts were entirely useless. Remedying these defects Mr. Major resumed the sale of the cement and found it satisfactory in every respect. Now Major's Cement is a household word all over the United States, in our new possessions and in many foreign countries.

ALPHONSE MAJOR,  
of New York City.

**BOTANY'S USE IN IDENTIFYING CRUDE DRUGS.**

**Twenty Times as Important as Chemistry, Asserts Prof. Rusby—Illustrations by Prof. Kraemer.**

PHILADELPHIA, April 26. Botany and its importance from a scientific as well as a commercial standpoint was the theme at the sixth and last of the season's series of lectures and demonstrations comprising the post-graduate course arranged by the Philadelphia Branch of the A.P.A., on Tuesday evening at the Philadelphia College of Pharmacy, as Prof. H. H. Rusby, dean of the New York College of Pharmacy, in emphasizing the relative importance of botany and chemistry in the identification of crude drugs declared that owing to its lack of thoroughness, much of the work that had been done in botany had been thrown away. The lack of knowledge, he declared, of the vegetable world was everywhere apparent and he said that while he did not mean to criticize, he could go through the United States Pharmacopoeia and find plenty of cases of error simply because no one had the knowledge that was necessary in a work of so important a nature as the Pharmacopoeia. Continuing he said in part:

"There have been marked advances in the methods of recognizing various drugs in powdered and crystallized form, but in order to be sure in many cases, it is necessary to have a botanical as well as a chemical examination. Botany is just about 20 times more important in the examination of crude drugs as chemistry and I contend that there should be just as much time devoted to the study of botany as there is to chemistry in our schools and colleges.

"We need this work not only in the application of the standards given in the Pharmacopoeia but even more in the creation of new standards. Even yet we are stumped in the identification of various crude drugs that come into the port of New York. We cannot in many cases find the necessary information in the Pharmacopoeia, for the knowledge desired is not to be had anywhere. Take balsam of Peru for instance. No person can say positively whether or not it is absolutely pure. Recently an importation of belladonna leaves came into New York which upon examination were found to contain a large quantity of stems. No provision is made for stems, yet upon analyzing them, we found that stems of average thickness assayed higher than the leaves. Provision therefore must be made in the

next revision of the Pharmacopoeia for stems of certain thickness.

"Again long buchu leaves are thrown out when many physicians would rather have them. The mistake has been that the investigation was not exhaustive enough. What is needed is work along botanical lines and study of plant life in its native condition. That means hardship and not simply sitting down in a hotel and letting a native bring in specimens and accepting his word for the character of the specimen and the conditions under which he found it. But well will it pay the pharmacists to study botany. Experts are needed in order that the work done by chemists shall be authoritative and reliable."

Prof. Henry Kraemer, of the Philadelphia C. of P., illustrated his lecture with colored views of specimens thrown upon a screen. He spoke principally of native plants and those which he was growing right in his own laboratories or upon the roof garden which is one of the features of the college. Henry C. Blair, president of the local branch of the A.P.A., presided at the meeting, which was largely attended.

**Quigley Bros. Will Move to Flatiron Building.**

SYRACUSE, N. Y., April 24.—Quigley Brothers will move May 1 from their present location at 206 South Warren street to the Flatiron Building, at 216 East Genesee street. The latter store is being remodelled and a new front is being installed.

**Good for Soda Fountain Owners in Michigan.**

DETROIT, April 24.—Nineteen counties in Michigan went "dry" in the recent spring election after one of the most exciting local option campaigns since the advent of the temperance wave that has swept the country. This means that 637 saloons and 10 breweries will go out of business May 1. The counties voting for local option are: Alcona, Allegan, Benzie, Branch, Clare, Calhoun, Charlevoix, Emmet, Eaton, Genesee, Hillsdale, Livingston, Ionia, Isabella, Jackson, Kalaskas, Newaygo, Sanilac and Tuscola.

**President Whitney Addresses Syracuse Chemists.**

SYRACUSE, N. Y., April 24.—The Syracuse Section of the American Chemical Society had as its guest at the last meeting, Dr. W. R. Whitney, president of the American Society. Fritz Reichmann, State Superintendent of Weights and Measures, told how spring scales were operated to cheat and defraud. Prof. H. Monmouth Smith was elected a delegate to the International Congress of Applied Chemistry to be held at London next month.

## COCAINE CONVICTIONS IN BALTIMORE.

**Sentence Suspended in One Case and Held Up in Another Pending Appeal of a Test Case to Higher Court.**

BALTIMORE, April 24.—Dr. Ralph J. Schirman, of 701 West Fayette street, whose interest in the welfare of persons addicted to the use of drugs he so warmly defended in the Criminal Court April 7, when arraigned on the charge of writing prescriptions for cocaine illegally, that Judge Gorter decided it was incompetent for the court to determine whether a prescription was proper or otherwise, was convicted last Thursday of a similar charge, there having been other cases against him. Sentence was suspended under a motion for arrest of judgment.

William Rossberg, druggist at 908 Frederick avenue, was recently sentenced to pay a fine of \$100 and spend one day in jail, the penalty having been made light in consideration of the fact that the Rossberg case is treated as a test. Rossberg's attorney took an appeal to the Maryland Court of Appeals.

### Would Not Hold Druggists on Woman's Evidence.

BUFFALO, N. Y., April 24.—In Police Court here recently C. E. Clark, a druggist at 90 Clinton street, and Edward Johnson, in his employ, were arraigned on a charge of selling cocaine to persons who did not have prescriptions from regularly licensed physicians. Jessie Smith testified that she had bought cocaine from Johnson without a physician's prescription. Johnson, when placed on the stand, said that if the woman bought the drug from him he gave it to her only on a physician's order. Judge Nash held that he could not hold the defendant on the uncorroborated testimony of the Smith woman.

### Heavy Fines Are Checking Cocaine Sales.

KANSAS CITY, April 24.—Following the imposition of a fine of \$6500 on Dr. George Schmitt, druggist, last month for unlawfully selling cocaine, the police have been actively at work trying to catch other violators of the law. Frank O'Brien, a drug clerk, who pleaded guilty and was fined \$1000, has been released on stay of execution on his promise to quit selling the drug. The police are determined to drive every cocaine seller out of business or into the penitentiary.

### Arrested Soon After Reopening His Branch Store.

CHICAGO, April 24.—Two hours after he had reopened his drug store at West Randolph and Sangamon streets, which he was forced to close a year ago in a crusade of the police against sellers of cocaine, Adolph Brendenke was arrested recently on a charge of illegally selling cocaine. He was released on bonds of \$400. The complainants against him are Mrs. Mary Gyer, 28 years old, of 294 West Madison street, and her husband, Albert Gyer, 27 years old, a carpenter.

### Three Arrests and One Prison Sentence.

SYRACUSE, N. Y., April 24.—A crusade inaugurated by the police department against the peddling of cocaine has resulted in three arrests. Louis A. Meisler was indicted, convicted and is serving three months in the Onondaga County Penitentiary. William Dines was tried but the jury failed to agree. Dines is in jail awaiting a second trial. A third arrest has recently been made and the prisoner held for the grand jury.

### Fighting the Cocaine Evil in San Francisco.

SAN FRANCISCO, April 24.—California Board of Pharmacy and the police are active in trying to suppress the traffic in cocaine and opium. A number of arrests have been made recently and the following have each been fined \$100: Frank Forbes of the Abbey Drug Company; William P. Ryan, clerk for J. H. Gates.

### Defects in Indictments Prevent Prosecutions.

DALLAS, TEXAS, April 24.—Defects in the indictments have caused cases against several Dallas druggists, accused of unlawfully selling cocaine and morphine, to be thrown out of court. The authorities expect to force a suspension of the "dope" traffic, however.

### Two Fined in Mississippi for Selling "Dope."

JACKSON, April 24.—A. M. Redmond, a negro drug clerk, employed in the drug store of Dr. S. D. Redmond, a negro

## PRICE LIST & CHANGES

### SUPPLEMENT TO ERA PRICE LIST

Published Weekly in  
The Pharmaceutical Era

These supplements enable all Manufacturers of goods for the drug trade to promptly notify all the best buyers in this trade regarding any recent changes in their price lists, such as new goods or articles discontinued; changes in prices, packages or discounts; special offers, free goods, etc.

The charge for these notices is 20c, a type line each issue. Always mention the number of insertions desired.

COPY with us by MONDAY morning for the issue of that week.

Address: ERA PRICE LIST,  
90 William St., NEW YORK.

### Information Wanted.

Name and address wanted of manufacturer of Zan's Rheumatic Specific.

A subscriber desires to get in touch with some German concern or American representative of German concerns, who handle or put out high grade coal tar, creosote oils.

Another subscriber is inquiring for names of manufacturers or firms handling rubber aprons fitted with metal parts, to hold the apron in place.

If any of our readers are in a position to supply any of the above information, we would appreciate their advices.

**Caementium Sales Co.,** 120 Boylston St., Boston, Mass.  
Our new preparation "Caementium" is a 25 cent article, and is sold to druggists at \$2.00 per dozen.

**Chas. R. Doane,** 20 Meserole St., Brooklyn, N. Y.  
We desire to notify the trade that we have reduced the price of Seidlitz Powders to \$17.00 per gross.

**H. Herron Johnson Co.,** 1370 Lexington Ave., N. Y. City.  
Wish to list among new preparations "I'll Fix." Price is 25c. to retail trade and \$2.00 per dozen to druggists.

**Dr. P. F. Hogan,** 319 Third Ave., Brooklyn, N. Y.  
Wish to have you list "Old Reliable Cough Remedy" at the following prices:  
Small size, 25 cents ..... \$2.00 per dozen  
Medium size, 50 cents ..... 4.00 per dozen  
Large size, \$1.00 ..... 8.00 per dozen

**Meयर Levy,** 53 Avenue C, N. Y. City.  
We are the manufacturers of Xanotox. Desire to have this preparation listed at \$1.00 retail and \$9.00 per dozen.

**Protone Company,** Detroit, Mich.  
We are manufacturing a new preparation named Protone. It sells at \$1.00 and the price to druggists is \$8.00 per dozen.

**Ross O. McElroy,** 472 Eighth Ave., N. Y. City.  
We are manufacturing a new preparation "Kavo San." Retail at \$1.00 and the price to the trade is \$9.00 per dozen.

**The Mucol Co. (Inc.),** Buffalo, N. Y.  
We beg to announce that we are marketing a new product Dental Mu-Col at \$2.00 per dozen.

physician and druggist, and a relative, was recently given a fine of \$75 on a charge of selling cocaine. Robert Clark, white, caught making a sale in the drug store of Johnson Brothers, was given a minimum fine of \$10, there being extenuating circumstances.

### Druggists Bow to Local Option Verdict.

GRAND JUNCTION, Colo., April 24.—As the result of the local option election, the drug stores have decided not to sell any whisky for any purpose whatsoever, medicinal or otherwise.

PATENTS, TRADE MARKS, ETC.

PATENTS.

Granted April 20, 1909.

918,503—Reinhold Burger, Berlin, Germany. Making double-walled vacuum vessels.

918,589—Raoul P. Pictet, Germany. Apparatus for separating nitrogen and oxygen from mixtures containing them.

918,762—Christian W. Meinecke, Jersey City, N. J., assignor to Whittall Tatam Company, New York, N. Y., a corporation of New Jersey. Atomizer and nebulizer.

918,774—Gustav R. Schimmel, Detroit, Mich. Hypodermic needle.

918,811—Frank O. Woodland, Worcester, Mass. Label-attaching mechanism.

918,814—Charles R. Barney, Chicago, Ill., assignor to Handy Manufacturing Company, Chicago, Ill., a corporation. Funnel.

918,920—Albrecht Schmidt, Heinrich Rössner and Hans Balhorn, Höchst-on-the-Main, Germany, assignors to Farbwerke vorm. Meister Lucius & Brüning, Höchst-on-the-Main, Germany, a corporation of Germany. Highly brominated halogen indigos and process for making same.

918,989—George B. Frankforter, Minneapolis, Minn. Apparatus for use in extracting turpentine and resinous matter from resinous wood.

918,990—George B. Frankforter, Minneapolis, Minn. Process of extracting resinous matter from wood.

918,997—William F. Giles, New York, N. Y., assignor of one-half to Frederick C. Norris, Detroit, Mich. Process of producing from straw a liquid suitable for the production of alcohol.

919,021—Herman Junge, Baltimore, Md. Bottle carrier.

919,049—Manuel F. Martinez, Jerez de la Frontera, Spain. Process of purifying potassium tartrate.

919,065—Percy E. Page, Asheville, N. C., assignor to Talcum Puff Company, Asheville, N. C., a corporation of North Carolina. Powder puff.

919,079—William L. Richards, Wilkes-Barre, Pa. Siphon pump.

919,161—Reinhold Grüter, Charlottenburg, Germany, assignor to Chemische Werke vorm. Dr. Heinrich Byk, Char-

lottenburg, Germany, a corporation of Germany. Theophyllin compound.

919,250—David Sarason, Berlin, Germany. Bandage and the like.

919,282—Julius Casaccia, San Francisco, Cal., assignor to Martin M. Fennell, San Francisco, Cal. Non-refillable bottle.

TRADE MARKS.

Not to Interfere With Rebuilding Bangs Factory.

BOSTON, April 24.—The city government of Everett has taken action to facilitate the rebuilding of the big factory of the C. H. Bangs Druggists' Fixture Company which was burned to the ground a few weeks ago. Some years ago the city laid out a street which if built would run through the main building of the Bangs factory. So long as the building stood and the city government took no further action the laying out of the street appeared to make no difference, but when the laud became cleared through the burning down of the factory Mr. Bangs found he could not rebuild because of the projected street. The aldermanic committee has now recommended that the projected street be discontinued so that the Bangs company may rebuild on its old site.

# THE DRUG MARKETS

## IMPORTANT DEVELOPMENTS STILL LACKING.

**Business in Jobbing Quantities Chief Feature. With Changes in Prices Few and Unimportant.**

**NEW YORK, April 26.**—There is an absence of any important developments, and the general market for drugs and chemicals retains an uninteresting appearance, but business in a jobbing way is of fairly good proportions with few changes in values. Opium, quinine sulphate and Norwegian cod liver oil are quiet but steady at unchanged prices. Rio ipéacac root, lycopodium, vanilla beans, Venice turpentine, Canada balsam of fir and German fennel seed are held with increasing firmness and in some quarters higher prices are quoted.

**OPICUM.**—While the market presents a quiet appearance there is a demand from jobbers for case lots. The market price is \$4.35 per pound for cases, and for smaller lots \$4.50@84.75. Powdered and granular lots of 25 pounds, are held at \$5.35 and smaller quantities at \$5.50@85.75. In primary markets there is no material change. For the week ending April 2, the arrivals in Smyrna amounted to 2045 cases, against 1369 cases for the same period last year. The stock in Smyrna on March 31 was 1563 cases, against 1828 cases last year, and in Constantinople 180 cases, against 77 cases last year.

**QUININE SULPHATE.** There is little of interest to report concerning this article, which is selling only in a routine jobbing way. In London on the 20th instant, the regular bark auction was held but without any change in values. In Amsterdam last Tuesday the forty-first public auction sale of Amsterdam brand of quinine took place and 50,000 ounces were offered.

**NORWEGIAN COD LIVER OIL.**—Cable advices to the 19th instant give the results of the fishing as follows: In Lofoten, 16,700,000 fish, producing 17,210 barrels of oil; in other districts, including Lofoten, 37,000,000 fish, yielding 35,150 barrels of oil. The increase in the production of oil has caused manufacturers to be less firm in their views, as the active consuming season is on the wane and an easier market looked for.

**CANADA BALSAM OF FIR.**—The stock in our market is now very much reduced and prices have been further advanced to \$1.05@81.15 per pound. New crop cannot be had for several months to come and the present prices will probably be maintained while the stock lasts, or may possibly be still further advanced. Oregon balsam of fir is unchanged.

**LYCOPodium.**—This article which has been selling at very unprofitable prices to producers, is now in a better position and prices are now much firmer in our market. In primary markets a change has also taken place and higher prices are looked for.

**VANILLA BEANS.**—The crop of Mexican and Bourbon is reported to be a small one and much higher prices are looked for as the season advances. The trade here expects a material advance in values as soon as the season's consuming demand sets in.

**IPÉACAC ROOT.**—The market has been cleaned up of all cheap lots of the Rio variety and prices have been advanced to \$1.35@81.70 for whole and \$1.85@81.95 for powdered. Prices for Carthagenia are nominally unchanged.

**VENICE TURPENTINE.**—This article is very scarce in production countries and new crop will not be available before August and September. Stocks here are quite small and further slight advances on quantities are noted, which shows a general tendency to harden the prices, which may be still further advanced in the near future.

**SANTONIN.**—The Payne Tariff Bill proposed a reduction of 50c. per pound, but the Senate substitute bill proposes a \$1.00 per pound duty, which is the present rate under the Dingley Law, and this will probably be the rate of duty when the tariff law will have been passed. The stock in the local market is still very low, and several dealers refuse to quote. A leading importer is reported as announcing that nothing could be found available for primary shipment. The new crop of wormseed has been received at manufacturing centers abroad, and is reported to be of inferior quality. The market here is

steady at \$4.25@84.50 per pound for crystals, and \$4.45@84.70 for powdered, both as to quantity.

**BALSAM PERU.** Prime quality is firmly held, and dealers report the tone of the market as growing stronger, but limited quantities are still available at the old range of \$1.65@81.70, according to seller or size of order.

**BALSAM COCAINE.**—The bulk of the first hand holdings of South American pure have been taken by dealers. Quotations are unchanged but prices are more firmly held at 47½@50c., although some dealers do not quote less than the outside figure. For Para, 57½@62½c. is asked, according to size of order.

**MANNA.**—Small flake is offered more freely and values are slightly lower with quotations reduced to 39@40c., as to quantity and seller.

**ASAETIDA.**—The available stock continues to diminish and dealers offer very cautiously, as indications favor higher values than the recent advance to 25¼@26c. per pound.

**GERMAN FENNEL SEED.**—Quotations for prime have been advanced to 10½@11½c. per pound in large quantities owing to scarcity. The foreign markets are also reported very firm.

## London Drug Market

**LONDON, April 17.**—This week has been shortened by the latter end of the Easter holidays, but business is now in full sway again. Although generally speaking the demand is quiet there is a fair amount of healthy enquiry. Camphor is in strong position and there is a good demand for 1-ounce Japanese tablets which are practically unobtainable on the spot, the nominal price being 1s. 8d. per pound, but buyers are willing to pay 1s. 9d.; for near arrival business has been done up to 1s. 7d. per pound. In 2½-pound slabs the price is 1s. 7d. per pound. German refiners have advanced their prices for flowers to 1s. 9d. per pound. China crude is firm and business has been done at 140s. per cwt. Citric acid is quiet and easier at 1s. 5d. per pound from second hands. Essence of Lemon is firmer and a fair business has been done on the spot at 4s. 6d. per pound for good brands.

Cassara Sagrada tends higher and 40s. per cwt. is asked. Japanese Isinglass is dearer and for good fresh 1s. 10½d. per pound is wanted. The demand for Jamaica Ginger continues and sales have been made at prices slightly in advance of last rates. Cod Liver Oil is quiet and lower. Saffron is very firm. Gentian Root is dearer and 22s. per cwt. is asked "to arrive." Sales of Johore Ipeacacantha ex-auction have been effected at 7s. 10d. per pound. Oil of Peppermint continues quiet at 8s. 9d. per pound for H.G.H. and 6s. 1½d. per pound for Wayne County oil in tins. Oil of Star Aniseed is firm at 4s. 6d. per pound.

**LONDON, April 19.**—In spite of the circumstances that this is more or less of an "off" week, owing to the Easter holidays, a drug sale was held on Wednesday. As might have been expected, the demand was extremely slow, a holiday feeling being in the air, and the exceptionally fine weather having tempted many people out of town a day earlier than usual. There was no outstanding feature of any importance in connection with the sales, but it is worthy of note that over 50 packages of Suma were bought in, for it very rarely happens that any of the offerings of this article pass unsold. The offerings consisted of small common leaf, of which part sold at late rates, but for the other part of which the selling brokers asked higher prices. Pods were dearer at 4½d. per pound.

Sumatra Benzoin was in fair demand at easier rates and 47 cases sold at 46 to 47 10s. per cwt. for fair seconds, and 45 for ordinary kinds. Jamaica Honey was in fair demand at dearer rates, realizing 46s. 6d. per cwt. for fine white set. Ipeacacantha was not in request and only a few sales of Matto grosso sold at 4s. 7d. to 4s. 9d. per pound for damaged, 5s. 2d. being wanted for good. Coca Leaves were slightly easier at 8½d. per pound for good, green Ceylons. Rhubarb was in small request at steady rates. Sarsaparilla was firm at 1s. 4d. per pound for good grey Jamaica, 11d. to 1s. for native and 1s. 1d. for Lima. Cape Argol realized 37s. per cwt. for grey and pinky and 34s. for pinky. East African Guaza was knocked down at 2½d. per pound for dusty siftings. Cardamoms were rather slow of sale and prices tended easier. Dragon's Blood was firm at 12 10s. to 12 12s. 6d. per cwt. for good reboiled lump. One case of Myrrh sold at 45 15s. per cwt. for pickings. Jamaica Wax was firm and dearer, realizing up to 47 17s. 6d. per cwt.

# THE PHARMACEUTICAL ERA

PUBLISHED EVERY THURSDAY

VOL. XLI.

NEW YORK, MAY 6, 1909

No. 18

D. O. HAYNES & CO. - Publishers

90 WILLIAM STREET, NEW YORK

Telephone, 2457 John. Office Address: "Era, New York."

Western Office:

Room 500, Dickel Building, 4 Dearborn St., Chicago

Telephone, Central 5888

## SUBSCRIPTION RATES:

United States, Cuba, Hawaiian Port, Bloor, the	
Philippines, and Mexico	\$2.50 a Year
To Canada, postpaid	3.00 a Year
To Foreign Countries by Post, Union	4.00 a Year
Single Copies	10 Cents.

ALL SUBSCRIPTIONS ARE PAYABLE STRICTLY IN ADVANCE

Published every Thursday at 90 William Street, Borough of Manhattan, New York, by D. O. Haynes & Co., a corporation. President and treasurer, David O. Haynes; vice-president, Ezra J. Kennedy; secretary, Edward W. Brown. The address of the officers is the office of this publication, and the title is registered in the United States Patent Office.

Entered at the New York Post-Office as Second Class Matter

## Re Photographs for "Era Album"

### Illustrated Section

Each subscriber to The Pharmaceutical Era is entitled to representation in this work and is invited to send us his photograph. We do not require a subscription from each partner and clerk. If the firm or profession has a subscriber, the other partners and clerks may have their portraits included for \$1.50 each. To secure all of the advantages, one must be a subscriber to The Era in his own right.

In sending photographs be sure that each one is distinctly labeled with the name, address, business, profession or occupation of the person, written clearly on the back of your photograph. A good plan is to write on a printed label and stick it on the center of the back of your photograph. Here is a good specimen:

FOR ERA ALBUM
Fred S. Rogers, M.D., 100 N. Y.
M. Monmouth, N. J.
Ex-Pres. N. Y. State Med. Assn.

When additional photographs are sent, partners and clerks are sent, each one should be labeled with the name of the subscriber who sends it, and the name of the person in the photograph.

### Cabinet Photographs Only

The style of photograph preferred is the so-called "Cabinet" size, with the head and shoulders, 2 1/2 x 3 1/2. If other sizes are furnished they interfere with the plan for keeping the faces uniform, also prevent a true comparison of the cuts by localities.

In view of the great number of photographs we are assuming to have each of our subscribers represented in this album, we feel that we are asking a bit too much when we request each subscriber to send a photograph of the size and kind of photograph which will fit in our work and best enable us to do him credit.

In forwarding photographs to the album, see that they are distinctly addressed as follows:

THE PHARMACEUTICAL ERA,

90 WILLIAM ST., NEW YORK.

For Era Album

## WORLD'S FAIR IN BOSTON IN 1920.

Much interest attaches to the recent announcement in the Boston *Herald* that a movement has been begun to commemorate the 300th anniversary of the landing of the Pilgrims and the founding of New England by a World's Tercentennial Exposition to be held in Boston in 1920. New England has never had an event of the character and importance of a world's fair and with its resources in every essential respect more ample to create and conduct a celebration of adequate scope and dimensions there is good reason for initiating and prosecuting the project to a successful termination. Eleven years is none too long to prepare for an exposition of the magnitude which we may well expect to see in the City of Culture.

Pharmacists in Boston and New England may be depended upon to aid in making the occasion a success. The section affords avenues for historic displays in pharmacy and the drug trade generally will welcome the opportunity to place before the visitors such exhibits as they may wish to present for the observation of such a high-class of the people as would certainly attend this or any similar exposition in Boston.

## ALL-STATE BILL WINS IN LEGISLATURE.

While Governor Hughes had not signed the act of the Legislature reorganizing the New York State Board of Pharmacy at the time of closing this section of the Era no other course than approval seemed logically open to the executive and it may safely be said that New York will have a new law regulating the practice of pharmacy. The bill was prepared in accordance with the Governor's recommendations, it was altered and amended to meet his views and in fact was carefully edited by the Governor's legal adviser. With the exception of an amendment made at the last minute relegating the prosecution of dishonest non-resident manufacturers to the Federal authorities, instead of penalizing them in this State, the measure as finally enacted represents the best thought of the Governor's adviser and of the officers and legislative committee of the New York State Pharmaceutical Association.

The passage of Mr. C. F. Brown's All-State Bill was effected in the closing hours of the Legislature in the face of opposition which came from sources that ought to have aided its enactment, but which only served to make more arduous the efforts of those interested in this really model piece of pharmacy legislation. The All-State Bill, however, had the support of the great mass of the pharmacists of the State and the futility of endeavoring to defeat it was

made manifest in the action of the legislators, for the victory was a conspicuous one against the elements which favored taking the board into practical party politics. High standards of membership are provided, the State association will name the eligibles and the actual appointments will be made by the Regents of the University of the State of New York.

While the ERA favored the election of the members by the pharmacists of the State, as under the system just discarded, we are unable to see any possibility of unworthy men being forced to the front under the new method, while to some extent, the right of voting participation by the pharmacists of the State is retained in the provision which gives the State Ph.A. the nominating power. On the whole, the new measure is a distinct step in advance and it may be said that the integrity of the board is permanently protected from the practical politicians, for the old cry of unconstitutionality was a continuous menace of a reorganization which might be made on lines other than the admirable ones of the Brown bill. If Governor Hughes signs the act, as no doubt he will, he will have performed a service of high importance to pharmacy and to the people of this commonwealth.

#### NOT A VICTORY FOR THE GROCERS.

Careful perusal of the decision of Chief Justice Cullen, of the New York Court of Appeals, discloses that the judgment of reversal in favor of Grocer Gasau and against the New York State Board of Pharmacy was based upon a technicality which to the lay mind had no substantial foundation in fact or in law and one which could hardly have served its purpose had the attention of the court been directed to the statute upon this branch of the issue. In other respects the opinion gives evidence of apparent omission to acquaint the court with full scope of the contentions, for Justice Cullen has apparently made a careful investigation of the merits and on the face of his decision it is improbable that he omitted to consider any arguments that were presented for the information and consideration of the court. All of which explains the astonishment with which the decision was received in pharmaceutical circles.

The crux of the decision is found in the opinion of the court that the grocer should have been convicted under section 164 of the Agricultural law, classing cream of tartar as food, instead of under the pharmacy law, the court holding that the board could not prosecute under the former law. Instead of vindicating the grocer the court intimates that he was probably guilty. The opinion says:

It is very probable that the defendant sold an adulterated article, and it is also quite possible that in so doing he violated the law and subjected himself to a penalty for section 164 of the Agricultural Law (L. 1893, ch. 338, as amended by L. 1903, ch. 524) defines food as including "all articles used for food, confectionery or condiments by man, whether simple, mixed or compound," and by section 41 of the Health Law anyone selling adulterated food is subject to a penalty of \$100.

This plaintiff, however, cannot maintain an action for such a penalty. Its authority to sue is limited to penalties accruing under Article 11 of the Public Health Law, which deals with pharmacy. The question, therefore, is whether the defendant violated any provision of that article.

The case may be very summarily disposed of. Section 41 of the Health Law prescribes that it shall be deemed an adulteration in the case of drugs:

1. If when sold under or by a name recognized in the United States Pharmacopoeia, it differs from the standard of strength, quality or purity laid down therein. 2. If when sold under or by a name not recognized in the United States Pharmacopoeia but which is found in some other Pharmacopoeia or other

standard work on materia medica, it differs materially from the standards of strength, quality or purity laid down in such work.

The name cream of tartar under which this article was sold is not recognized in the United States Pharmacopoeia. Therefore, the case does not fall within the first section. There is no proof in the record that the name is found in any other Pharmacopoeia or standard work on materia medica. Had such proof been given, then the standard of purity and strength would, under the terms of the statute, depend upon the standard prescribed by the work in which the name was found, and not that of the United States Pharmacopoeia, of what is said to be its equivalent, potassium bitartrate. The proof is therefore fatally defective.

The court, in its conclusion, as noted above, apparently ignores section 192, paragraph j, of Article 11, which in defining the powers of the Board of Pharmacy, gives it authority "to investigate all alleged violations of the provisions of this act, or any other law of this State regulating the dispensing of drugs," etc. That would seem to dispose of the question of power.

The court asserts that the name cream of tartar is not recognized in the United States Pharmacopoeia. An inspection of this book, discloses the following item in the index:

Page

Cream of tartar, (*Potassii Bitartras*), ..... 356

Numerous decisions have established the fact that an index is part of a book and there is no reason why the U.S.P. should be any exception to the rule. It would seem that the attention of the court was not called to this important fact. In the preface of the U.S.P., treating of synonyms, the editors outline the generally policy to be to limit the number as much as possible. Cream of tartar appears to have been one of the eliminations in the main body of the book under this policy, but its presence in the index retains it in the Pharmacopoeia.

What the court considers a more important objection is that under section 199 cream of tartar, as sold by merchants, is exempt from action by the Board of Pharmacy, again omitting to take cognizance of the provision heretofore quoted giving the board power to prosecute "under any other law." In construing the intent of the legislators the court holds (and here is where the grocer's attorney sees his great "victory") that the court is

of opinion that the various exempted articles enumerated in section 199, when not sold as drugs or medicines, are not required to conform to the standard prescribed by the Pharmacopoeia for medicinal preparations.

The court, throughout the opinion takes ground against adulteration of food and drug products and adds significantly:

If adulterated the vendors may be subject to other statutory penalties, but not to those imposed by Article 11.

Summed up in a paragraph, the grocer sold adulterated cream of tartar and should have been penalized under the Agricultural act instead of the Pharmacy law. This does not seem to be much of a victory for grocers who sell adulterated articles.

#### A NOVEL, BUT POPULAR INNOVATION.

A very pretty custom, recently inaugurated by the publishers of the ERA, that of introducing new advertisers to the readers of this journal, has apparently become popular even in its infancy. Its benefit is not at all one sided, either, as it concerns the advertiser or the druggist, for it enables the purchaser to become quickly conversant with the merits of the offerings made by the seller in a way which estab-

lishes an acquaintance that would be made much more slowly through the usual method of merely printing the formal announcement of the advertiser. In business done through advertising in the trade journals, as well as in the ordinary affairs of life, as much depends upon the proper introduction of business men to one another as upon the circumstances under which persons in social circles become acquainted. The ERA has set about the performance of this duty in a way that can only serve to bring our readers and our advertisers closer together.

Michigan druggists are finding that the requirement of true and correct statements of their liquor sales is not a joke. One of them in Van Buren County has been arrested on a charge of perjury and the authorities are gunning for evidence against others.

Though still a very young man, Dr. R. F. Kelly, who has just been made manager of the extensive laboratories of Sharp & Dohme in Baltimore to succeed Aubrey T. Hill, an Englishman with the prestige of having been drilled in the establishment of Burroughs Wellcome & Co., London, must be classed with the most capable pharmacists of Baltimore. The promotion has come to Dr. Kelly after only a few years of which he made excellent use. By faithful performance of duty, by untiring endeavor, by devotion to the work before him, and by unremitting effort to master all the details, combined with solid learning and a naturally alert understanding, he soon gained the confidence of his employers and rose rapidly in their regard, so that when, after a little more than two years, Mr. Hill decided to return to London and engage in business there, the choice of those in authority naturally fell upon the youthful member of the force who had proved so diligent and intelligent in the performance of his labors.

Dr. Kelly is not yet 30 years old, yet upon him now rests the responsibility for the reputation of all the products turned out by Sharp & Dohme. He was born near Carthage, N. C., as the son of J. E. Kelly, a well-known teacher of the Old North State, who at times was connected with the public schools and also conducted a private institution. Practically all of his scholastic training was received under the tutelage of the father, who grounded him well in the various branches taught in his own school and gave him personal instruction. It was only natural under the circumstances that the son should lean toward the calling of the father, and thus it happened that the young man for a time served as one of the instructors in his father's school. He might have made pedagogy his life work, for that matter, had not an uncle, Dr. C. B. Warren, of Green Cove Springs, Fla., intervened. Dr. Warren, a physician, owned a drug store, to the management of which he could give no attention, being completely occupied with a large medical practice. It so happened that Dr. Warren's clerk had given notice of intent to leave, and the uncle persuaded young Kelly to go down to Green Cove Springs and take charge of the store. The young man knew little or nothing of pharmacy, but with the confidence of youth he assented to the plan, and in this way he acquired a fondness for the pursuit, which was destined to become his life profession. In order to meet the highest requirements Mr. Kelly matriculated at the Maryland College of Pharmacy, where he carried off honors and graduated well up near the head of the class of 1902.

During his two years at the Maryland College of Pharmacy he had formed a strong attachment for Prof. Charles Schmidt, one of the faculty, and through him he was brought under the notice of Sharp & Dohme, so that after graduation he obtained

a position in the stock room of the extensive laboratories, exercising special supervision over the crude drug supply department, which had not before been under any one's particular supervision. There Dr. Kelly at once proved his value, developing the department and properly emphasizing its importance. Having thus improved on the favorable impression he had made, he went up step by step, being entrusted with more responsible duties and steadily rising in the esteem of the corporation heads.

Everything Dr. Kelly undertook to do he tried to do well. With him there was no slighting or indifference. He was not content to perform the task immediately before him, but sought to promote the interests of his employers in whatever way he could. At college he had made such excellent use of his time that he was invited in 1904 to become an instructor in pharmacy, a position for which his early pedagogic training especially fitted him. Upon the death of Professor Schmidt, over one year ago, he was made assistant in pharmacy, being immediately under Prof. Charles Caspari, Jr. The position he still holds, with great honor to himself and with credit to the Department of Pharmacy of the University of Maryland, the old college having been merged with the university.

Dr. Kelly's disposition to be a working member, no matter with what organization he might become affiliated, caused him to be singled out for other distinctions. He was elected secretary of the Maryland College of Pharmacy, the body which holds the charter for the college, though its teaching functions have been transferred to the University of Maryland. Dr. Kelly has now been secretary for several years and his fidelity in attending to the details of the office is likely to make him the permanent incumbent. His record of the proceedings is always up to date and the work is done in a competent manner. In addition, Dr. Kelly was elected secretary of the Maryland Pharmaceutical Association, his choice being dictated by a purpose to have the duties of this office attended to with the same unflinching regularity. Dr. Kelly's devotion to the scientific and mercantile aspects of pharmacy, furthermore, impelled him to seek membership in the American Pharmaceutical Association, and when the Baltimore Branch was formed he became the logical secretary, so that he holds not less than three positions with somewhat similar duties.

Dr. Kelly also is affiliated with the General Alumni Association of the University of Maryland and with other bodies. He contributes frequently to the literature of the several societies and he takes a prominent part in the deliberations on pharmaceutical subjects. His patriotism and love of his native State find expression in affiliation with the North Carolina Society of Baltimore and he is not less popular among his own Tar Heelers than among druggists.

His clerkship in his uncle's drug store proved fateful in more directions than one, for it was during his sojourn in the Pineapple State that he became acquainted with Miss Marian Low, who was prevailed upon to change her name to Mrs. Kelly when the young man had found himself, so to speak, and had gained a firm footing. They are a thoroughly congenial and happily mated couple, and reside with their young son in North Baltimore. As may have been surmised from Dr. Kelly's various offices, he is of a singular obliging disposition and consequently he has much work thrust upon him. Of a modest, almost retiring nature, he has never sought to push himself forward, and all the honors he has received have come to him unsolicited. Amiability is one of his leading characteristics; and his courteousness is not of a forced type, but asserts itself spontaneously as part of the man. Good fortune has not in the least turned his head, and he bears his new distinctions with the same unassuming modesty which he displayed as a student.

A "Pure Shoe Bill" is the latest. Says the *Shoe Retailer*: The bill which was recently introduced in the Senate of the

Dr. R. F. KELLY  
of Baltimore, Md.

Missouri Legislature providing a penalty for all manufacturers and dealers in footwear to sell the same if any substitute for leather enter into the composition of a shoe which is not duly stamped showing the substitution, is not meeting with favor by many of the leading retailers of the State. The proposed law provides that each substitution for real leather be stamped on the sole of the shoe, so a customer may know he is not getting a solid leather shoe. Dealers incline to the idea that it is all nonsense to enact such a law; that if such a law is needed it should be a National and not a State law, since it gives adjoining States having no such legislation an advantage.

Tariff revision at Washington is in a "to be continued in our next" condition. There is a ray of hope in a promise that the bill will be ready to go to the President by June 1. As we have said before: the sooner the revision is completed and affected business men are relieved of the suspense the better it will be for everybody.

Surgeon Major C. Dubnel de Broglie, of the French army, who has been stationed in Tahiti, Society Islands, for three years, left New York recently on his way to Paris, where he will publish in a French medical journal the details of his studies of tropical diseases, and particularly the discovery of a cure for elephantiasis.

"There is much of this terrible malady in the Polynesian Islands," said Dr. de Broglie to a *Herald* reporter, "and I had opportunity to make a thorough research. As a result, I am convinced that the idea held by the medical world for so long that the disease is incurable is incorrect, and, furthermore, that the theory advanced by Sir Patrick Manson, the celebrated English surgeon, that the disease is caused by filaria, a slender parasitic worm, is erroneous.

"My investigations showed me that the disease is contagious and infectious, and I found that the microbes which cause it are an association of the *Staphylococci* family and a new one yet undescribed. I experimented with many rabbits and chickens and found that injections of the serum produced the disease in them.

"I was successful in the treatment of cases of the disease by antitoxin treatment. I made photographs of a patient in July and October of the same year. In the first instance the legs of the patient, a man, was swollen beyond any resemblance to their original shape, one ankle being as large as the leg of an elephant. The patient had an air of apparent hopelessness. When the second photograph was taken the swelling was greatly reduced."

As the debonair drug clerk stepped forward to wait on her she trained her guileless blue eyes upon him and said: "I wish you would give me a sponge bath, please."

The clerk was for a moment nonplussed, but at last managed to say: "Do you prefer hot or cold water, miss?"—*Herald*.

A new crime has been invented in Ohio. The public school superintendent of Columbiana has been deprived of his job for "using patent medicines to excess." What next?

Whether or not an optometrist may properly call himself a "doctor" is a question that is coming before the optical societies now that 2000 men in this State have been recognized as optometrists under the provisions of the optometry law which went into effect last year, says the *New York Sun*. About one-half of the total number of these men are practicing in New York City and a large proportion of them have assumed the doctor's title without the formality of obtaining a degree from a college authorized to confer it.

The Optometrical Society of the City of New York at a meeting held recently considered an amendment to the by-laws prohibiting members from styling themselves "doctors" on their office signs, cards, letterheads and other printed matter. Those who favored the amendment argued that it was necessary in order that dishonest opticians may be deterred from posing as physicians and so bring discredit upon the new profession of optometry.

The society voted down the amendment but decided that all members using the title "doctor" must accompany it whenever it is written or printed with the word "optometrist." Failure on the part of a member to do this or any effort to deceive the public into the belief that he is a medical practitioner

will be ground sufficient for expelling him and for asking the State authorities to cancel his optometry certificate.

This action has not entirely satisfied those who are opposed to the use of the doctor's title, so the question is to be carried to the convention to be held early in June at Albany by the Optical Society of the State of New York and also to the National convention to be held in Atlanta, Ga., on June 21, by the American Association of Opticians.

Those who believe in the optometrist calling himself "doctor" say that dentists, veterinarians, pharmacists and chiropractors call themselves "doctors," and claim that they are not confused in the public mind with the medical practitioner, although this is by no means true, except in some portions of the South, for the idea conveyed to the average mind is that a doctor is a doctor of medicine, unless there be the qualification or explanation which is insisted upon by optometrists who wish to avoid misleading the public.

Optometrists say that in time their colleges will be authorized to confer the doctor's degree, just as the colleges of dentistry and pharmacy now do, and then their right to the title will no longer be questioned. They are to celebrate at their coming State convention the passing of optometry laws in 20 States, seven of these having been passed this year, following New York's example.

In all these laws the optometrist is defined as a man who measures the power of vision by mechanical means and fits eyeglasses for the relief of the eye's defects. He is thus distinguished from the optician, who merely grinds lenses, and from the oculist, who treats diseases of the eye.

Chief Clerk: "Here comes the lady who wrote those articles on 'How I Live Regally on Six Dollars a Week.'"

Satan: "Put her over there with the other liars."—*Lippincott's*.

Within a short time a light will be flashed from the gray stone beacon on Branford Reef, a few miles beyond New Haven harbor, in Long Island Sound, that, if successful, may mark a new departure in small lighthouses at least and do away with hundreds of lighthouse keepers along the coast. For years the dangerous hidden reef which only shows at low water has been marked by a circular stone day beacon about 20 feet in height surmounted by an iron cage or "daymark."

Now it is proposed to install an acetylene gas light that can be seen for about five or six miles by masters of approaching vessels, the lighting of which at sunset and turning down at sunrise will all be done without human aid for at least a year. The gas will be lighted and extinguished by a sun valve. The inventor of the device, M. Dalen, a Swedish engineer, is now in this country.

The Commercial Acetylene Gas Company, whose president is E. G. Benedict, is the contractor for the new light, and Major Potter, the engineer of the lighthouse establishment in Tompkinsville, said recently that if the light is successful it will be kept burning without care for a whole year from the battery of charged gas tanks.

In Iowa even the burglars are taking a hand in trying to prevent druggists from selling intoxicants. Recently they cleaned out the entire stock of a Mason City druggist.

In a Philadelphia club a member was met not long ago by the announcement from a fellow member that a friend of both had fallen ill.

"I understand from the physician," said the first member, "that Tom has brain fever. He'll recover, but it's thought his mind will be a blank."

"I trust the diagnosis is incorrect," came in fervent tones from the second member, "inasmuch as Tom owes me a hundred dollars."—*May Lippincott's*.

Mr. Featherston—Just a moment, Miss Tartun. Let me tell you what I think—

Miss Tartun—Certainly; I can wait long enough for that.

The outlook upon the future depends upon whether we view it from the heights of hope and determination or the valleys of doubt and timidity.

The only way to measure the value of a theory is to transform it into fact by intelligent and immediate action.

## The Ways and Means Committee.

By Emma Gary Wallace.

There are a good many Ways and Means Committees in existence, as almost every organization and government finds it expedient to have one. The members are generally selected because of their resourcefulness, clear-headed business judgment and foresight.

Bullards have no place on any regular committee of this kind, but this particular Ways and Means of which I am about to write is by no means regular, in fact it is decidedly irregular, and while its members cannot be charged with lack of resourcefulness they certainly are wanting in foresight.

The Committee is unique, it is the largest one in the world, as the membership is self-appointed and most of them are elected for life. This is especially true if the objects are realized even in part. Each member or group of members works on an independent plan, following a go-as-you-please gait, and in consequence recruits are constantly added.

The deeply benevolent purpose of each and every active worker is to find some plausible way of separating anybody who happens to have means—cashable means—from such a questionable possession. The risk and possible loss to self are ignored with a fortitude that is little short of heroic.

The owner of a fine and prosperous drug store recently discovered that his health was undermined to such an extent that an immediate and prolonged change was imperative. He advertised his business in a well-known daily paper. We will call it *The Comet*, not because its name was really anything like that or because of its likeness to one, for the paper boasted of a circulation that would have destroyed utterly the symmetry of any well-trained comet, but rather because of the speedy and extraordinary results obtained.

The store owner took infinite pains with the wording of his copy, the style of type, the border and its location in *The Comet's* best selling column. Even newspapers have choice spots of location.

Next day a voluminous mail was delivered in reply. Every writer seemed to be a member of the Committee—although no one stated that fact—and appeared willing, even eager to do the ailing business man a good turn.

He was offered rich, unimproved orange land, and earnestly recommended to make his own improvements as a means of restoration to perfect health; shares of fabulously rich mining stock, which had a gleaming, beckoning future, and which could now, for a short time be obtained at a ridiculously low figure; undivided shares in rubber plantations with the most elastic tales of riches just ahead; apple orchards where wealth grew rosy-cheeked and unassisted in the glorious sunshine; walnut, eucalyptus and lemon groves, grape and fig lands rushed forward, so to be, enthusiastically waiting to be embraced; there were opportunities to exchange for business property which had only the trifling drawback of litigation concerning the title; industrial enterprises that manufactured everything from air-ships and their supplies to corner-building lots in Cloudland, and air-castles all furnished and ready to let to the many summer tourists who were planning to take the numerous air-lines.

A few dozen brokers came forward and confidentially guaranteed inside deals—if all delays were eliminated. Haste seemed in all cases necessary. There were offers difficult to classify. One read:

ME. NORBALT,

Dear Sir: I have 2500 watches that are not such very good-looking, but as time-keepers they are simply grate. One fine driving horse, gentle as a white kitten, also one buggy and harness both still servicable. Although this here property is worth a good deal more, I will take your drug-store for it. I am no druggist, but the woods is full of them and I can hire one until I can catch onto the business. I understand the profits in the business is all that can be desired.

If your health is pore, you couldn't find a finer propositushun than mine. You plan out a fashunable driving tower, pack your stock in the back of the buggy—it is built that way—and do business right along the road. Take your drug-store right along, only in another form. You would gain helth and probably make more money than you ever seen before. This offer is only open for three days. Yours very truly and again:

J. H. F.

MR. NORBALT DEER:

Seem your ad of a nise drug stoar in the *comet* and Aw! the fixins And good Will I have to say that I have a Piece of copyrite sheat Music I will exchange for the stoar if it is as good a stoar as you clame it is.

I am riting other Parties and the won that answers me first and satisfactory will get the Piece.

I ask \$20,000 for Piece if soald for kash. Plees let me no your decism by the same male you get this.

Yours for returns,

MRS. M. M. C.

The man with the drug store to sell was so overcome with the generosity of his many correspondents that he requested his amiable wife to act as his private secretary, and to let the Ways and Means people who had written him know of his entire unwillingness to allow them to make such sacrifices on his behalf. But for once, she was distinctly disobliging, declining to waste sarcasm and stamps and declaring with some show of reason that he had foolishly attempted to market a special product to a miscellaneous public and that he must except miscellaneous replies. That if she wished to purchase a piano she would not look for it at a church bazaar, in a fancy notion store, or even in an Apothecary Shop, varied as were their side lines. She would seek the normal outlet for such goods—a reliable piano store, and by the same course of reasoning she arrived at the conclusion that any person with capital and the educational investment to handle a drug store successfully would naturally look in the selling columns of a reliable weekly drug journal. A weekly one should be selected because of the greater frequency to repeat the proposition, and that moreover an advertisement of this nature would reach out and make a stronger appeal to the class of people it seemed desirable to reach.

The next week this plan was acted upon and although the mail divided amazingly and they lost lots of fun, the store was soon satisfactorily placed, which was really more to the point. The owner had wanted but one customer and he found him right speedily.

Then there is a large contingent of this extensive Committee which has for its sole working capital the time of other people. They have nothing to market, and apparently nothing to do but to hang around and interfere with the regular business of those who have an ambition to make their time count for something.

Have you ever met the active member, who arises about noon, yawns lazily through the afternoon, begins to come to when the evening commences and by closing time is as wide-awake as an owl? By this time his mind is alert and he frequently decides to write a letter and makes the liberal purchase of a sheet of paper, an envelope and a stamp, and borrowing pen and ink proceeds to indite a lengthy epistle, without noticing that the window lights are out and that he is the only obstacle in the way of closing.

He is usually a likable chap, too, and is frequently popular enough to be the President of the local Dilly-Dally Club. He has not the slightest idea that he has used up two dollars' worth of time, added the last straw to a long, tiresome day, and only given in return the profits on a five-cent cigar.

Time is the only commodity that costs us nothing to get and everything to lose. If it means nothing to the Dilly-Dally Club—that is their fortune—or misfortune, but what moral right have they to go about and systematically appropriate some one else's valuable time without their leave or license.

The loss of one hour a day for a year means a total loss of thirty-six and a half working days of ten hours each. Over one month of valuable time lost through the selfish thoughtlessness of people whose ways and means of spending time and seeking entertainment is to hang around and talk. That month would make a splendid vacation, or it would accomplish that pet scheme which has waited patiently in the background for years.

These time-vampires care little for their own prospects and less for those of other people. It is stated that the man who is

the biggest power in the banking world today has become such, largely through his ability to say "No" courteously and by his manner of polished finality which he can assume without giving offense to the Ways and Means Committee who would devour his time and help him most willingly to get rid of the means at his disposal.

When the great military leader Von Moltke was aroused from his midnight slumber with the news that France had declared war, he is reported to have said, "Look in the upper right-hand pigeon hole of my desk, you will find papers there that will tell you what to do." Then he turned over and proceeded to resume his interrupted sleep.

His preparedness gave him absolute self-possession and he knew that the best use he could make of his time was to get ready to carry out the plans he had so successfully prepared beforehand. It was futile to waste time and energy in premature surmises and pointless discussion.

It does not matter in the least whether the particular scheme of the Committee is in the form of a stock company which agrees to purchase liver-pads and selling-territory from some philanthropic parent company upon what is an apparently fair basis, if their claims can be substantiated, a fake jewelry concern, a Magic Cleanser which does not cleanse at all and the only magical property about it is the speed with which its promoters disappear, or a simple overcharge of hours or even minutes of a workman's time because his employer will never know, it all amounts to the same thing. It is a question of accepting money and not giving value received. There is no basis of mutual benefit, which is the dividing line between legitimate and questionable business.

It is generally safe to assume that an opportunity (?) which must be snapped up to be secured without sufficient time for investigation better be left entirely alone. The chances of losing a good thing are much less than of securing a poor one.

There is a novel and valuable line of insurance known as Use and Occupancy. It aims to reimburse the policy holders for actual business loss he is made to suffer by loss of the occupancy and use of a building destroyed by fire. Frequently the loss of business is quite as heavy as the loss of property.

There is likewise an insurance against the wiles of the Ways and Means Committee, and it consists in keeping in touch with the publicity given to the schemes aimed to entrap any one particular class of business.

A druggist who decided that he could not afford to renew his subscription to the magazine that served him best in this way, was left unprotected. Within a couple of months he was "taken in" to the extent of \$42.50 by a scheme that had in the meantime been carefully exploited in its columns and the trade warned against. He decided that if he received no other benefit of any kind it was pretty cheap insurance against the wiles of this too-often smooth and honest-appearing Committee of many Ways and varied Means.

#### Rhode Island College Juniors Entertain.

PROVIDENCE, May 1.—The first ball of the junior class of the Rhode Island College of Pharmacy and Allied Sciences was given recently, with about 150 present. In the receiving line were Prof. and Mrs. Charles H. Dargott, Mr. and Mrs. Frank E. Lockwood and Dr. and Mrs. Francis T. Harrington. The executive committee included John J. Pastille, chairman; Miss Lillian Garrett, Frank McBride, Owen Hanoway, Charles Gilson, John McGovern and Morris Horowitz.

The floor director, Frank McBride, was assisted by Clarence Doherty, James Matteson, William McKenna and William Potvin. The reception committee consisted of Ernest Codere, Louis Colla, Fred Gilbert and Dana Maynard.

#### Preparing for Connecticut Ph.A. Convention.

NEW HAVEN, May 1.—The Traveling Men's Auxiliary of the Connecticut Ph.A. is arranging for the meeting to be held at the Shoreham, June 15 and 16. The following committees were appointed: Reception committee, F. A. Wolff, president, chairman; E. N. Richardson, secretary; J. Denby; entertainment committee, R. F. Isbell, chairman; W. W. Sykes, J. J. Horan, W. H. Newton, J. E. Cary; badge committee, John Baker, James Kenny, M. F. Hoop, chairman of the local association, and Charles Fleischer were present representing the Connecticut Ph.A. at the last meeting.

## A Tack in the Foot.

By Joel Blanc.

I have always contended that any characteristic, problem, reward or injustice in which druggists as a class are concerned, is not, in its abstract form, a thing or condition bearing upon the drug trade alone, but as a characteristic or condition which relatively concern all humanity. Nearly all of the many druggists to whom I have expressed this opinion have agreed with me and yet, within a few moments after such an agreement, any one of them might say or do something which plainly indicated that in his customary thought

and action he considered the men who populate the drug world as being in a class apart from the general run of humanity, or rather an isolated class antagonizing all and opposed by all.

I will concede that in a measure the members of every trade, business or profession live within a narrow world of their own, and in their sphere they act and speak as though only chaos extended beyond their restricted horizons. While the chief thought and action of all my business life has been within the domain of drugs, peculiar conditions have forced me to mingle with many classes of men in many places, and after careful retrospection I am forced to the conclusion that, with a few exceptions, druggists do live in a narrower world than those who are engaged in other callings.

The effect of this restricted life does not show plainly in the individual, for it cannot be gainsaid that among druggists as a class, individual extremes of wealth and poverty, intelligence and ignorance, and refinement and vulgarity, are less noticeably than among men of any other business or profession. But, taken as a whole, I believe that druggists do hold themselves more aloof from the great world than any other class of business men. On the other hand, it is conceded that as professional men they live, think and act upon a broader plane than do those of many other professions. Thus, it is evident that if all druggists were to become exclusively professional and secure their livelihood as chemists and prescriptionists only, their boundaries of thought and action might draw even closer without detriment to themselves.

At the same time there is a definite, if not obstructive, line between the business and professional duties of the druggist-pharmacist as the class exists today. As the vast majority of drug businesses are conducted the relative material importance of the positions of pharmacist and druggist may be compared to the differences in floor area behind and before the prescription counter. My readers will kindly understand that I am not considering any present effort to change these relations nor am I considering exceptions; I am merely considering the vast majority of drug stores as revenue-earners of the present. Granting that the line is properly drawn, you must concede that the druggist must succeed as a business man if he is to have the contented, clear mind that is necessary to his progress as a scientific pharmacist. Therefore, the power of mental concentration as a professional man is dependent upon his successful mental expansion as a business man.

It was Marcus Aurelius who, in effect, said that in order to grow great, a man must first realize and make self-confession of his own insignificance. If this is true of the individual, how much more truly it must apply to a class of men. Humility and vanity may be so very near akin that what is called one may be the very essence of the other.

There are druggists who use as a chorus to their song of life "I am only a druggist." While they are not intentionally hypocritical, their modesty is at the same time a sort of conceit, for it very often plainly implies that while the speaker is conscious of the littleness of his world he considers it the world of the elect, a world upon which all the balance of the universe is centering either its praise or abuse. It is this

difficulty defined characteristic that is responsible for many of the hardships of the druggists collectively, and the sooner they awaken to their own littleness in world consideration and action, the sooner will they commence to expand.

If we could rake over this footstool of the universe and separate each trade, commercial and professional class from all others and in one pile put all the retail, wholesale and manufacturing druggists of the earth, we could keep quite cool and comfortable in the mid-morning shadow of a good-sized labor union. Intellectually compared with some other classes, our place in history making would be proportioned to a period on a printed page, when compared to the metal, textile, farming or transportation interests of the world. We are financially as a grain of Sahara's sand. Comparatively speaking, we are merely one of the countless tacks used to hold a strip of gimp on the footstool. The sooner we realize our tack-like proportions, the sooner will we find out that we are attracting about as much attention from humanity at large as the moving picture business does, the sooner will we commence to grow into a nail and to develop a hope of eventually becoming a spike.

We have an idea that the public is putting in a great deal of time to heap injustice and misrepresentation upon us, when in fact, what we are really thinking of as the public is none other than some cult or party much smaller than ourselves, but which goes into the world that we hold aloof from and by so going forms the so-called "public opinion" from which we suffer.

Let us undeceive ourselves from the hallucination that our problems are world problems. They are not! They are merely parts of humanity's problems and unless we join humanity in helping to solve the general problems, we have no right to expect that the little parts in which we are most vitally interested will attract enough attention to be handled with intelligent fairness. What right have we, as a whole, to protest against legislative injustice when we hold aloof from

the political world? What right have we to wail for legislative representation when instead of voting for a man because he is a druggist, we vote against him for that very reason.

How do we know that the medical or any other profession or class is worthy of our support unless we go into the world where that profession finds its leaders? What right have we to complain of an anti-trust or other National law or to say that a law is partially enforced when we as a whole keep our political power hidden beneath the head of a tack? When a blatant demagogue assails us, can we expect to conquer him with a mouse-like squeak from some dark corner? Why complain of long hours in the store when we refuse to take either thought or action outside of it, even when the store is closed? Why complain that worthy young men are tempted from clerkdom by inducements of the outside world when we refuse to go into that outside world to learn to equal those inducements by learning what they are?

Let us break away from the littleness of our own commercial planet by acknowledging the littleness and thus win a breadth of mentality that will fit us for a truly self-defensive part in the struggles of the economic universe. Let us combat the injustice of ignorance by going into the world where that ignorance is bred and there fight the battle.

If we crawl like flies around a decaying apple, is it any wonder that we learn to believe that it is the world and that all the world is corrupt? Were the larvae within a cocoon endowed with intellectual faculties it is easy to suppose that it possibly believes that its dark cell is all the world and a gloriously wonderful world at that; but when it is freed to fly on zossamer wings over the beautiful spring-clad earth, it would not only learn what real life on earth is, but would glory in the beauty and power that have come to it with its own rebirth. So, however satisfactory, beautiful and good our own little world may be, let us break from our own cocoons, not selfishly, not vindictively, not despotically, but for life, light and justice!

#### MEMBERS OF THE PHARMACEUTICAL ASSC. OF RICHMOND UNIVERSITY COLLEGE OF MEDICINE.

RICHMOND, Va., May 1.—The Pharmaceutical Association of the University College of Medicine closed its session recently with an address by Dr. George E. Barksdale. The officers during the year were: President, F. D. Culpeper; vice-president, L. T. Ford; secretary and treasurer, W. L. Grimes. During the session a valuable series of addresses and debates have been held.

Members of the association shown in the group picture are: H. J. Davie, W. H. Huffman, R. B. Shelar, H. Huddle, R. E.

Monroe, Prof. A. Bolenbaugh, W. A. Maiden, L. H. Botts, R. L. Gaddy, W. M. White, W. M. Ballard, M. M. Stephenson, J. B. Perry, W. P. Taylor, P. C. Jones, A. L. Winnie, R. M. Thompson, L. W. Barbage, R. C. Rice, C. R. Butler, L. T. Ford, R. Royal, L. C. Morgan, R. L. Mason, J. W. Wilson, C. L. Coleman, H. M. Petrus, F. D. Culpeper, Miss Louisa M. Shield, W. L. Grimes, P. M. Massie, F. P. Fletcher and Prof. W. F. Radd. The chairman of the picture committee of the class was F. P. Fletcher, Jr.

#### Opposed to Stamp Tax on Patent Medicines.

NEW ORLEANS, April 30.—The Orleans Pharmaceutical Association, at its monthly meeting, went on record as opposing an internal revenue tax on patent medicines and instructed the secretary to write the members of the Louisiana delegation in Congress asking their co-operation in opposing such a measure. The meeting was well attended and reports received showed that the propaganda work is bringing good results to the profession in New Orleans.

#### Taft Authorizes Chemists to Represent U. S.

Dr. Harvey W. Wiley, Prof. Charles Baskerville, Dr. Lee Baekeland, Prof. W. L. Dudley, Dr. W. H. Nichols, Prof. Morris Loeb, Albert Plant and Dr. Maximilian Toch, who will attend the seventh meeting of the International Congress of Applied Chemistry which will be held in London May 27 to June 2, have been appointed by President Taft to represent the Government and invite the Congress to hold its eighth meeting in the United States in 1912.

## Original and Selected

### COMMENTS ON SOME FEATURES OF THE NATIONAL FORMULARY NOMENCLATURE.\*

By L. F. Kebler, Chief, Division of Drugs, U. S. Department of Agriculture, Washington, D. C.

It is with the utmost reluctance and diffidence that I undertake the task assigned me of criticizing the nomenclature of the National Formulary, a recognized Federal law standard. I have a keen perception of the high ideals, sterling integrity and noble purposes of the members of the committee which compiled this volume, and to adversely comment on the work of men who have had a much larger experience in some lines than I have had, might be considered impetuous impertinence on my part. I feel, however, that it is the duty of every member to point out such defects and shortcomings as come to his attention; otherwise progress would indeed be slow. I further realize that there are few members in the pharmaceutical profession who have been brought so intimately in contact, in a matter-of-fact way, not only with the excellent features of the National Formulary, but also with the shortcomings of its nomenclature, as the writer, and it is some of the information and experience gained during the past few years that I desire to put in evidence.

Many changes have been wrought during the last few years. What was considered permissible to a certain degree ten years ago—yes, three years ago—might be in violation of the present law, and the leading association of the pharmaceutical profession should be in the lead in rectifying such transgressions. The argument is at times advanced that some of the titles may be slightly inconsistent or misleading or even deceptive, yet they have long been in use and for that reason are entitled to recognition. This hereditary argument is interesting but invalid. In this communication I shall utilize largely representative, practical illustrations met with in my work.

#### Name of Drug Versus Its Constituents.

Soon after the Federal law was enacted a manufacturer desired to know whether the use of the name "Mandragerin" was permissible under the Act. He was advised that if the preparation was mandragorin in fact, prepared from mandragora root, such name would be considered proper; otherwise, its use would be misleading and therefore forbidden. He then informed us that the product to which he was applying the name "Mandragerin" is a mixture, containing, among other ingredients, the alkaloids present in mandragora root, but that the preparation was not made directly from this root and he was advised that the use of the name "Mandragerin" for such a mixture was improper. The question raised in connection with this product was the authoritative nature of the National Formulary and whether the principles embodied in its nomenclature would be restricted to N.F. preparations, or if they would be applicable to other products. Attention was called to the fact that "Elixir of Cinchona" synonym "elixir calisaya" was prepared by dissolving salts of the three principal alkaloids of cinchona bark in aromatic elixir and coloring the mixture to imitate an elixir prepared from cinchona bark proper. Without continuing the subject further, suffice it to say that the name "Mandragerin" is no longer applied to the mixture in question, but there is no gainsaying the fact, that the manufacturer here has a good basis for an argument.

A moment's reflection will convince even the skeptic that the principle in question would open the field for innumerable improper, if not absolutely deceptive and misleading practices; for example, according to this principle it would be perfectly proper to prepare "Tincture of Nux Vomica" by dissolving a suitable quantity of strychnine sulphate in a proper strength alcoholic solution and coloring the same with burnt sugar. Again, it would be just as logical to dissolve a certain amount of vanillin in a suitable menstruum, color the mixture with caramel and call the product "vanilla extract." Again, a tablet containing any salt of the alkaloid berberin could justly

be named "Hydrastis Tablet." From this, it is only a step to the "formerly" so-called "bitterless quinin" preparations which did not contain any quinin at all but cinchonin or possibly some other cinchona bark alkaloid. The above products are plain imitations, the sale of which, in the case of drugs, is declared illegal by the Federal and many State laws. No hesitation would be entertained in bringing a prosecution against a dealer of such commodities. In fact, so-called vanilla extracts, consisting of vanillin, with or without coumarin dissolved in a suitable menstruum and colored in imitation of genuine products, have been adjudged adulterated and misbranded by the courts in that such articles were not real vanilla extracts, but imitations designed to deceive the public. A case of this character is reported in Notice of Judgment No. 14 of the United States Department of Agriculture.

Elixir of cinchona is, however, only one of a number of preparations of this class found in the National Formulary. This same principle underlies eight other elixirs of which the name "cinchona" constitutes a part of the title. Other examples are: (1) "Wine of Beef, Iron and Cinchona," synonym "Beef, Wine, Iron and Cinchona." There is no cinchona whatever in this product, but it is represented by the sulphates of quinin and cinchonidin. (2) "Tartro-Citric Lemonade." This preparation is a sweetened, aqueous mixture of tartaric acid, citric acid and sodium bicarbonate. I see no good reason whatever for appending to this product the name "lemonade," either qualified or otherwise. (3) "Emulsion of Petroleum." This product does not contain any petroleum whatever, but "petrolatum album." The chief active agent of this preparation appears to be the expressed oil of almond. Petroleum proper and kerosene are believed by some to be of service as remedial agents, but the writer personally questions very much whether any medicinal value that may be ascribed to this emulsion is due to the petrolatum it contains. The name certainly is not in harmony with its composition, and is therefore misleading.

#### Use of Word "Compound."

It has long been the practice to name medicinal preparations after a valuable constituent, even though such constituent is only one of a number, and is frequently present in small quantities and in some cases not at all. In view of recent legislation, it soon began to be realized that such names were improper and information was sought relative to the proper use of the word "Compound" in connection with certain mixtures. It is clearly evident that the naming of a preparation after a constituent which is either not present, or is virtually inactive or is present in such a small quantity as to impart little if any activity to the product, a practice formerly not uncommon, with or without the use of the word "Compound," is improper and misleading. This subject calls to mind many improper and deceptive names, for example, "Castor Oil Pills" and "Castor Oil Tablets," with little if any castor oil, except such as may have been used in lubricating the machinery. "Copaiba Pearls" with only a nominal amount of copaiba quinin products where the quinin has been largely substituted by other cinchona alkaloids, etc. I desire also to direct attention to a protracted correspondence in connection with a so-called "Rattlesnake Oil Liniment," the object of which was to justify the use of the term "Rattlesnake Oil" as a part of the name of the preparation. The reason why the dealer was so anxious to use the term "Rattlesnake Oil" was that the oil is believed by many to be of great efficacy in the treatment of rheumatism. It finally developed that the preparation contained one-third of 1 per cent, or one ounce of the oil to 30 ounces of the finished product. This amount of rattlesnake oil in the liniment appears certainly to be small justification for the name the preparation "Rattlesnake Oil Liniment," either with or without the word "Compound," and its use has been discontinued.

On referring to the National Formulary we find that in the manufacture of "Compound Syrup of Irish Moss," only one-tenth of 1 per cent, or one part in 1000, of Irish moss, which at most possesses only demulcent properties, is used. If the name "compound syrup of Irish moss," which represents and a trivial amount of Irish moss, is correct, why is not "Rattlesnake Oil Liniment Compound?" As can readily be seen, the above involves a very important principle. The Irish moss preparation may be a comparatively innocent, and some or says "an isolated case," but it should be remembered that it is practically impossible to draw a line of demarcation where

\*Read before the March meeting of the Washington Branch of the American Pharmaceutical Association.

precedent is established. This is exceedingly difficult, even with the National Formulary preparations, to say nothing of the host of proprietary remedies involving this principle. It is not the ninety and nine that give the trouble, but the one black sheep. Compound syrup of Irish moss is, however, not he only offending "compounded" name in the National Formulary, as will shortly be seen.

Attention is now called to a personal interview which recently took place in connection with a headache remedy containing the word "celery" in its title. The manufacturer recognized the shortcomings of the original name and believed that the addition of the word "compound" would rectify the difficulty. He well realized that the celery present in the product did not constitute any material portion of the activity of the drug, and that its potent agents at different times were acetanilid, morphine, acetphenetidin and caffeine and other ingredients. When the question was raised as to the propriety of using the term "celery" in the name of this mixture, the manufacturer stated that a large proportion of the commercial value of the preparation resided in this word, in that the consumer had been taught from youth up that celery was a valuable remedial agent and the elimination of this word from the name of the product, when in use, would mean a serious loss. Reference was then made to the National Formulary "compound elixir of celery," which might more properly be called "elixir of coca and kola compound." The headache remedy represented a substantial amount of celery and the manufacturer was willing to increase it, if necessary. The principle involved in the two cases is apparently the same, and if it is proper in one it is difficult to see why it is not in the other. Another National Formulary preparation referred to at times in similar cases is "compound pills of colocyth." It can readily be imagined that paralogisms of the above character may at times become embarrassing.

After considering various schemes and numerous arguments presented by dealers relative to the origin and existence of deceptive and misleading names and the justifications offered for using the word "compound" to cover up the defects, it was decided on January 3, 1907, to address a letter to the chairman of the National Formulary committee, calling attention to the abuses which took shelter behind the nomenclature of the National Formulary, particularly in connection with the use of the word "compound," and ask that the committee make the subject under advisement and define its attitude on the question. In reply, on February 21, 1907, the writer received a letter from the chairman containing, among others, the following paragraphs:

"While the Committee deprecates and would discountenance the use of any misleading titles whatsoever, it does not concede at such exist in the National Formulary, and particularly not in which the term 'compound' is used. Although the pharmaceutical practice is not strongly defined while manufacturers do not always adhere to the generally accepted limitations of the word 'compound,' yet it is understood that the dominant medicinal agent, irrespective of its mere quantitative relation, gives title to the preparation, and that the other ingredients—the synergic, corrective or adjunctive—in a compound preparation, are the ones that come under the generic title 'compound.'"

"As regards the innovations of manufacturers, the Committee does not have the text of the National Formulary, but he held being conducive to the innovation of fraudulent titles, simply because, in connection with the titles of preparations there appear some well known and long used synonyms that are guilty inconsistent. It is respectfully submitted that manufacturers who can give as good reasons for the use of the term 'compound' as has been herein offered, may be allowed its use without jeopardy to the public."

From the above it was quite apparent that the committee did not intend to give much relief to the embarrassment. It not clear what is meant by the phrase "slightly inconsistent," but the committee can be assured that manufacturers with the aid of their attorneys give just as plausible reasons for the names they are using as any that have yet come to the writer's attention, justifying the use of certain National Formulary names. In order to relieve the situation it was necessary to issue a decision limiting the use of the word "compound" in connection with mixtures, and the following principles were set forth in Food Inspection Decision No. 63:

"In no case can a preparation be named after an ingredient drug which is not present. The word 'compound' should not be used in connection with a name which in itself, or together with representations and designs accompanying same, would be construed as a form of misbranding under the Act. It is held that if a mixture of drugs is named after one or more but not all of the active medicinal constituents (not merely present in a preparation, the word 'compound' can be

used in connection with the name, (a) provided the active constituent after which the product is named is present in an amount at least equal to that of any other active medicinal agent present. Example: If it is desired to make a mixture consisting of oil of sandalwood, balsam copaiba, and castor oil, and call this product 'Oil of Sandalwood Compound,' the oil of sandalwood should constitute at least 33.1-3 per cent of the entire mixture. Or (b) provided the potent active constituent after which the product is named is present in sufficient amount to impart the preponderating medicinal effect. Example: If a product is named after the active constituent, strychnine, the strychnine or one of its salts should be present in sufficient amount to produce the preponderating medicinal effect of the preparation."

If the above principles were adhered to there would be little improper use of this word. In order to provide for contingencies that were constantly arising in connection with the National Formulary nomenclature, it was necessary to include in this Decision the following paragraph:

"Or (c) provided the complete quantitative formula as outlined in the United States Pharmacopoeia and National Formulary, be given on the principal label."

The latter requirement eliminated controversies relative to the improper use of the word "compound" in connection with trade names bearing the name or names of one or more drugs. The manufacturer of proprietary remedies seldom voluntarily discloses such information and usually resorts to some other expedient. This proviso in Food Inspection Decision No. 63 cannot, however, be construed to mean that when the quantitative working formula is given, any form of compounded, deceptive and misleading name may be used.

At this juncture it is desirable to note the attitude of the highest court towards deceptive and misleading names, by quoting extracts from the opinion of the United States Supreme Court, in *Worden versus California Fig Syrup Company*, 1902, found in United States Reports, volume 157, page 516, et cetera:

"Upon this point the contention of the plaintiff is that its (the company's) preparation is not a syrup of figs, since it contains only a very small percentage of the juice of the fig, that the laxative ingredient in it is so small that the evidence shows that the compound is not a syrup of figs. It might more properly be termed a 'Syrup of Senna,' if the words were intended to be descriptive of the article. But, assuming this is not a syrup of figs, we are not with the inquiry whether these words, as applied to this preparation are not deceptive."

"The popularity of this medicine arises from the belief in the mind of the ordinary purchaser that he is buying a laxative compound, the essential ingredient of which is senna. The evidence shows, in fact, he is buying a medicine the active principle of which is senna."

"It has intended the public to understand that the preparation which it sells has, as an important medicinal agent as descriptive position, the juice of California figs. That has undoubtedly led the public into the purchase of the preparation. The statement is wholly untrue. Just a suspicion of fig juice has been put into the preparation, not for the purpose of changing its medicinal character, or even its flavor, but merely to give a weak support to the statement that the article sold is syrup of figs. This is a fraud upon the public. It is true, it may be a harmless humbug to palm off upon the public as syrup of figs what is syrup of senna, but it is nevertheless of such a character that a court of equity will not encourage it by extending any relief to a person who seeks to protect a business which has grown out of and is dependent upon such deceit."

"We are not impressed with the force of this attempted distinction. Even if it were true that, at the time the medicine in question was first made and put upon the market, the juice of figs was so largely used as one of the ingredients, as to have warranted the adoption of the name 'Syrup of Figs,' the change of the name of the medicine, that would be no justification for continuing the use of the term after the manufacturers and vendors of the medicine ceased to use fig juice as a material ingredient. Even if the term was honestly applied in the first instance, as descriptive, it would none the less be deceptive and misleading when, as is shown in the present case, it ceased to be a truthful statement of the nature of the compound. Nor are we disposed to concede that, under the evidence in the present case, the terms 'Syrup of Figs' or 'Fig Syrup' was properly used as a descriptive of the nature of the medicine when it was first made. Then, as now, the operative laxative element was senna, and the addition of fig juice was, at the best, experimental, and apparently was intended to attract the patronage of the public by holding out the name of the medicine as 'Syrup of Figs.'"

"Upon such allegations and the admissions of the complainant's principal witness, some of which are heretofore quoted, and upon the entire evidence in the case, and in the light of the authorities cited by the counsel of the respective parties, our conclusions are that the name 'Syrup of Figs' does not, in fact, properly designate or describe the preparation made and sold by the California Fig Syrup Company, so as to be susceptible of appropriation to a trade name, and that the mark and names used upon the bottles containing complainant's preparation, and upon the cartons and wrappers containing the bottles, are so plainly deceptive as to deprive the complainant company of a right to a remedy by way of an injunction by a court of equity."

(To be Continued.)

## QUESTION BOX

THE OBJECT of this department is to furnish our subscribers and their clerks with reliable and tried formulas, and to discuss questions relating to practical pharmacy, prescription work, dispensing difficulties, etc. Requests for information are not acknowledged by mail, and ANONYMOUS COMMUNICATIONS RECEIVE NO ATTENTION; neither do we answer questions in this department from non-subscribers.

In this department frequent reference is necessarily made to information published in previous issues of *The Era*. Copies of these may be obtained at 10 cents each, except a few issues which are out of print, for which we charge 25 cents each.

### Liquid Deodorant for Water Closet.

(T. E. B.)—Solutions used in "drip cans" for deodorizing and disinfecting water closets are prepared from substances which are supposed to possess aromatic and bactericidal properties. Various tar oils, the cresols, chlorides of metallic bases, etc., are extensively employed. Here are some formulas:

(1)

Coal tar .....	2 ounces.
Caustic soda .....	2 drams.
Water, to make .....	16 ounces.

Dissolve the caustic soda in 4 ounces of warm water, add the warm water and agitate thoroughly for a few minutes. Add the rest of the water and set aside in a warm place for seven days, agitating frequently. Decant the aqueous solution, filter it through a wetted filter paper, washing the residue with sufficient water to make up 16 ounces. The solution may be perfumed by adding a mixture of oil of turpentine and oil of eucalyptus.

(2)

Thymol .....	1 part.
Eucalyptol .....	4 parts.
Borax .....	40 parts.
Dissolve in, .....	
Glycerin .....	80 parts.
Camphor water .....	160 parts.
Tar water .....	410 parts.

(3)

Potassium chloride .....	5 parts.
Sodium chloride .....	5 parts.
Magnesium chloride .....	5 parts.
Zinc chloride .....	3 parts.
Aluminum chloride .....	3 parts.
Calcium chloride .....	6 parts.
Water, sufficient to make .....	100 parts.

Dissolve and saturate with methyl salicylate and oil of eucalyptus.

### Ink for Branding Stock.

(E. S. D. Co.)—The only formula for an ink for branding stock we have available is one contributed to this journal some years ago by Dr. J. H. Oyster, of Paola, Kan. It is as follows:

Shellac .....	2 ounces.
Borax .....	2 ounces.
Gum arabic .....	2 ounces.
Water .....	25 ounces.
Lampblack .....	sufficient.

Boil the borax and shellac in the water until dissolved. Remove the mixture from the fire and when cool add the gum arabic and sufficient water to make 25 ounces, then add enough lampblack to bring the whole to a proper consistence. For red ink use Venetian red instead of lampblack; for blue use ultramarine.

### Wood Fillers.

(O. R.)—There are many kinds of wood fillers, from thin glue size, linseed oil and whiting, up to scraping varnish—a varnish especially made for a filler. Patent fillers, mainly thin dilutions of shellac or other resins, in wood alcohol, are many in number, and most of them give very fair results. However, a filler that is said to give almost universal satisfaction for general purposes is one composed of equal parts of boiled oil,

Japan, and benzine, thickened with the best whiting. The Japan is added both to serve as a dryer and to insure more complete filling of the pores of the wood.

An English authority gives the following for a "liquid filler": Whiting, 6 ounces; Japan,  $\frac{1}{2}$  pint; boiled linseed oil,  $\frac{1}{2}$  pint; oil of turpentine,  $\frac{1}{2}$  pint; corn starch, 1 ounce; mix well, and apply to the wood. Add coloring if required.

What is known as "American wood filler" is made as follows: Pulverized starch, by weight, 5 parts; heavy spar, 3 parts; sicative,  $\frac{1}{2}$  part; mix with enough turpentine to the consistency of ordinary varnish. For dark woods add to the sicative  $\frac{1}{4}$  to  $\frac{1}{2}$  part of umber. Rub across the grain of the wood with a piece of felt fastened to a piece of wood. Let the wood to which the filler is applied dry about eight hours, rub with glass paper, then polish and varnish.

### Liquid Brass Polish.

(M. G. H.)—Try one of the following:

(1)

Levigated silica .....	10 pounds.
Kerosene .....	5 gallons.
Oleic acid .....	2 gallons.
Stearic acid .....	2 pounds.

(2)

Powdered kieselguhr .....	1 pound.
Oleic acid .....	1 pint.
Benzole .....	2 pints.

(3)

Oxalic acid .....	$\frac{1}{2}$ ounce.
Rottenstone .....	10 av. ounces.
Kerosene .....	30 fl. ounces.
Paraffin .....	2 av. ounces.

Pulverize the oxalic acid and mix it with the rottenstone; melt the paraffin, add to it the kerosene, and incorporate the powder; when cool, add oil of mirbane or lavender to perfume.

(4)

Kieselguhr .....	56 pounds.
Paraffin oil .....	3 gallons.
Methylated spirit .....	$\frac{1}{2}$ gallon.
Oil of turpentine .....	$\frac{1}{2}$ gallon.
Stronger water of ammonia .....	3 pints.

Pour the ammonia into the oil, methylated spirit and turpentine, add the camphorated spirit and mix with the kieselguhr. To prevent settling during filling into bottles, keep well agitated. The color may be tinted red by using a little sesquioxide of iron and less kieselguhr. Apply with a cloth, and when dry use another clean cloth or brush to polish.

### Filling for Cracks in Floors.

(O. R.)—By "crack and crevice filler" we assume you wish a formula for the preparation of the mixtures that are commonly used in filling the cracks in floors, etc., and we give the following as being likely to answer your purpose:

Putty for Floors of Soft Wood.

(1.) For floors that are to be scrubbed: Caseine, 1 part; water, 7 parts; spirit of ammonia,  $\frac{3}{4}$  part; burned lime,  $\frac{1}{2}$  part. (2.) Glue, 2 parts; water, 14 parts; cement, 7 parts; sawdust, 3 to 4 parts. Both putties should be prepared immediately before they are to be used.

Putty for Floors Which are to be Lacquered.

Glue, 2 parts; water, 14 parts; plaster of paris, 4 parts; litharge, 2 to 4 parts.

The *Scientific American* states that a very complete filling for open cracks in floors may be made by thoroughly soaking newspapers in paste made of 1 pound of flour, 3 quarts of water, and a teaspoonful of alum, thoroughly boiled and mixed. Make the final mixture about as thick as putty, and it will harden like papier mache. This paper may be used for molds for various purposes.

### Greek Letter Fraternities.

(Interested Subscriber) writes: "Will you kindly advise me through your Question Box of the names of Greek Letter fraternities in the United States, whose membership is restricted to those following the chemical sciences; also the names and addresses of the respective secretaries."

Can some reader supply the information?

Do not force your clerks to look to outsiders for sympathy. Teach them to come to you for advice and help—and give it to them.

# ADVERTISING for DRUGGISTS

## Advertisement Editing.

The original writing of an advertisement is merely the gathering of the building materials. It is the editing that erects the structure and it should be undertaken in an entirely different spirit than that in which the original writing is done. The first writing should be an expression of the thoughts just as they come to mind; but in the editing an impersonal point of view should be taken and the work be done in a comprehensive and analytical manner. The editing should be more than the mere arrangement of language or diction; the aim should be to produce an effective typographical picture. To successfully accomplish the latter, the proof must be edited. In the following will be illustrated some of the most common faults of retail druggists' advertisements, faults which are largely due to lack of proper editing.

## Superfluity.

Advertising space is like a piece of valuable real estate upon which one desires to erect a structure which will yield the greatest possible income for the least outlay. One does not place a fine structure in the center of a valuable lot and then surround it with coops, kennels and lean-tos. In some advertisements superfluous words and phrases represent the coops, kennels and lean-tos. As an instance, an otherwise good advertisement announces an event for "S. P. M. Saturday evening." "S. P. M." is always evening, and therefore the word "evening" as used in the expression is tautological and superfluous. An elegant expression would have been simply, "At S. P. M. Saturday."

In announcing a sale of rubber goods, the advertiser named sixteen items and used the word "rubber" in connection

with each article. He must have expected a patronage of "rubber-necks."

In another advertisement, taking up a double-column square, eighteen-point type is used to announce, "Hard rubber combs. Glass nursing bottles. Soft rubber nipples," and various things that are kept in every drug store. Aside from the foolishness of a mere announcement that such things were stocked, one is led to wonder if that druggist could in any possible way sell *soft* rubber combs, *wooden* nursing bottles or *hard* rubber nipples.

## Improper Classification.

Much advertising space is wasted by improper classification. One advertiser, in a four-inch, single-column space enumerated syringes among rubber goods; farther along he mentioned syringes and then announced glass, rubber and metal syringes of all kinds. Thus, he virtually made three repetitions of an indefinite statement and did not have room left to state a single price or other bit of real information regarding syringes. The hashed-up space was utterly wasted and the advertiser complained of lack of results. Heterogeneous classification or promiscuous assembling of the names of articles advertised often results in taking many inches to announce nothing more than that so-and-so keeps a drug store. Even strict material classification is not generally good advertising. Goods made of a certain material cover too wide a range of use. People buy an atomizer as such, not because the atomizer represents a combination of glass, metal and rubber.

## What Everyone Knows.

Sometimes advertisements from manufacturers are received which contain such bald statements that the druggist is led to exclaim: "The druggist who does not know that has not enough brains to understand any advertisement." Just so with the public. The farmer who does not know that "Paris green is for killing potato-bugs" is too much of a fool to know that the beetle is injuring his vines. What the farmer does want to know is the price and quality of the Paris green.

## Excessive Description.

"We have D——'s perfumes in ten, twenty-five, seventy-five cent and one dollar sizes with plain cork and fancy glass stop-

## ETHICAL WINDOW DISPLAY ADVERTISING COUGH REMEDY WINS ERA \$5 CASH PRIZE THIS WEEK.

Walter E. Stallsmith, Pharm.D., 179 Barney street, Wilkes-Barre, Pa., is the fortunate winner this week of the \$5 Cash Prize in the ERA'S Competitions, the judges having awarded the honor to him for the accompanying photograph of an ethical window display of a cough remedy which was forwarded in competition for Contest No. 2, which relates to the best photograph of a druggist's show window or any display of goods in a drug store. The conditions of the Competition will be found on advertising page 37 of the ERA of April 29.

Mr. Stallsmith says: "I enclose herewith a photograph of my cough cure window taken at night. In the window I was manufacturing my White Pine Tar and Wild Cherry Cough Syrup. The front of the window contains tin trays in which the various drugs entering into the syrup are displayed, with a card bearing the name on each. The back of the window is filled with five gallon bottles of Peppermint Water (the finest in this community), also sugar in 25 pound bags, three 50 pound cans of glycerin and one pound cans of tar, which together with the signs displayed make a striking window and which sold during the two weeks the operation was going on, nearly 200 bottles of the cough syrup. Trusting you will enter this in the ERA Prize Competition, as it may help some other druggist sell his goods. I am, yours truly,

"WALTER E. STALLSMITH, Wilkes-Barre, Pa."

pers, boxed and without boxes." "We have D—'s perfumes from ten cents to a dollar. All styles; plain and fancy," takes up much less space and gives all the necessary information.

#### Hot Air Space-Wasters.

"X—"s candles received fresh daily" when the whole town knows that you do not get a shipment per month; "The big City Druggist," in a town of two thousand people; "We bought fifty gross of this sarsaparilla compound," in an advertisement for a store that would hardly hold that much; "Must get rid of this to make room for new stock," when even a "faced" stock leaves entire shelves empty; telling about "the biggest drug stock in the State" in a one-inch, single-column space. No sane druggist would allow such statements to appear in print if he had put on his judicial thinking-cap for a few minutes. It is a strange fact that some druggists who make such statements are otherwise modest and truthful. They remind one of the man who was too modest to wear a colored tie, and yet expected people to believe that the hunk of glass in his shirt bosom was a diamond.

#### Proof Reading.

John Johnson has what would be an excellent four-inch advertisement if it were not for the type. The body of the advertisement is set in nothing but ten-point type and there is not a bit of rule or a break in it except the relatively small amount of white space produced by the use of many leads. At the bottom John Johnson has his name in big black, bold-faced type. There is no rule between Johnson's name and the next advertisement, and there is more space between his name and the body of his own advertisement than there is between his name and the hardware specialty advertisement below. Thus, it appears that "John Johnson, Druggist," is selling lawn mowers. Possibly somebody brought Johnson a prescription for a lawn mower, for the next week he lined the same four-inch space with a fancy border a half-inch wide and in the white bull's-eye within this frame he put all the reading matter that had been scattered over the entire space the previous week. John is one of the many who expect every typesetter to be an advertising expert. John gets his advertising ideas from the mailing wrappers of drug journals—he leaves the wrappers on the journals.

#### Fancy Initials.

Some country printers seem to think that the true ideals of their art can be most easily expressed, and that usually by means of square or fancy scroll initial letters. Some of these initials look like Greek monograms and others remind one of the game, "Button, button, where's the button?" The druggist advertiser should taboo puzzle pictures.

#### Those Fool Stock Cuts.

Just why a fat, black, brownie should induce a man to buy a new truss or why an impossible vase with a spavined unicorn roosting on top of it should add to the claims of tasteless castor oil, is hard to tell. Do not blame such things on the printer. The advertiser has the right to select the furniture for his own house.

#### Battered and Dirty Faces.

The hand proof cannot be expected to show up as well as an imprint produced by the run of a press, but if the face of the type be mashed or filled with last year's ink, the proof will show it. If the advertiser pays for such typography he has only himself to blame if "advertising does not pay." Why should a man buy damaged advertising goods when he refuses damaged drugs? A part of the lack of effectiveness of the advertisements printed in country papers is on account of worn type, poor ink and rickety presses, and so long as the space buyers locally patronize such plants, they alone are to be blamed. If your local printer will not produce good work with good tools, get your printing done away from home.

Mr. Drug Storist, if you will correct your advertisements as carefully as you correct your clerks and insist upon having as good a "run" from your printer as you do from your delivery boy, you will have solved one of the problems of making advertising pay.

#### Maine Ph.A. Will Enjoy Outing at Casco Bay.

Dr. M. L. Porter, of Danforth, secretary of the Maine State Ph.A., announces that a day's outing to Casco Bay will be a feature of the forthcoming annual meeting, which will be held at Portland, June 29 to July 1. Other entertainment will be provided and an excellent programme of papers is ready.

#### New Jersey College of Pharmacy Graduates Eighteen

The graduating exercises of the New Jersey College of Pharmacy were held Monday, April 26, in Wallace Hall Newark, and the degree of graduate of pharmacy was conferred upon 18 students. A number of prizes were awarded and a fine programme, consisting of addresses to the members of the class by well-known speakers, was carried out. A feature of the evening was the awarding of the scholarship prize to Miss Mabel S. Horning, of Roselle Park, who besides leading on the roll of honor also captured three other prizes for the highest average in as many subjects. Following are the members of the graduating class: Adolph R. Alven of Hoboken; Louis C. Arnold, of Newark; Louis Bell, of New York; Mabel Shipman Horning, of Roselle Park; Edgar P. Kastner, George W. Kraeuter, Bertha Lewit and Max Le witte, of Newark; William Francis Lind, of Orange; Thomas F. Maroney, of Bayonne; Mendel R. Mendelsolhn, of Newark; George Mezger, Jr., of Jersey City; Hyman Nisselson, of East Orange; Adrian E. Nuremberg, of Brooklyn; Mortimer P. Pepper and Charles Rutkin, of Newark; Eric Seifert, of Jersey City, and William E. Van Erde, of Paterson.

#### Class of '06, New Jersey C.P., Holds Reunion.

The fourth annual reunion of the class of '06 of the New Jersey College of Pharmacy was held recently at Hotel Broad Newark, where a banquet was served following a theatre party. Prof. Adolph F. Marquier addressed the class on the subject of "The Advancement of Pharmacy and the Present Conditions." Frederick W. Geimer, president of the class acted as toastmaster, and Meire Olshin, treasurer, described the formation of the Drug Clerks' Association. Among those present were Charles Reide, Bernard Simon, Jeremiah Harris J. Hain, Frederick W. Geimer, Prof. Adolph F. Marquier, Frank Scholz, DeWitt Slee, A. Shechtman, L. Galluba, M. Olshin, H. Patterson, J. Arhents, F. Smith and Charles Smith.

#### Baylor University Confers Pharmacy Degree.

DALLAS, TEXAS, April 30.—At the commencement exercises of Baylor University held last evening in Rush Temple the degree of Ph.D. was conferred upon the following: Birt C. Camp, Curtis A. Christian, H. A. Crofts, Ollie Morrison, E. B. Powers, Roger Q. Seely, Charlie Williams and Warren S. Williams. Prof. E. G. Eberle, dean of the Pharmacy Department, delivered an address.

#### Fine Programme for Washington Branch on Tuesday

"The N.F. and the Retail Druggist," "Pharmacists vs. the Internal Revenue" and other important topics are on next Tuesday night's programme for Washington Branch, A.Ph.A. in addition to technical papers.

## PERSONAL MENTION

—W. E. WARN, of Keypert, N. J., was a New York City visitor last week.

—R. L. JOHANNES has joined Sharp & Dohme's forces and has been assigned to southern Kansas.

—W. H. NEWTON, who represents Eli Lilly & Co. in Connecticut, visited friends in New York City last week.

—RICHARD P. WINKLER, of the export department of Parke, Davis & Co., leaves on Saturday on an exploring trip in South America.

—LEWIS W. BAIRD, Lilly's salesman in the Hudson River territory, was a visitor in the Metropolis last Friday and Saturday.

—PROF. JOSEPH P. REMINGTON recently visited Washington, where he was a witness before the tribunal which is endeavoring to solve the momentous question: "What is whisky?"

—MANAGER C. H. GODDARD and Prof. William C. Anderson, of the A.D.S., were recent visitors to Washington for the purpose of interviewing Dr. Harvey W. Wiley, of "pure food" fame.

—ROBERT M. DADD, manager of the Dadd Pharmacy at Milwaukee, was made chairman of the sick and relief committee at the recent State convention of the T.P.A. at Fond du Lac, Wis.

—F. C. BARNHART, northern Michigan representative of the Milwaukee Drug Company, with headquarters at Escanaba, Mich., called upon the Milwaukee offices of his company last week.

—D. A. HARRISON, who represents Farrand, Williams & Clark, of Detroit, along the line of the Michigan Central Railroad, has been elected eminent commander of Peninsular Commandery No. 8, of Kalamazoo, Mich.

—P. L. BREYER, who has been connected with the essential oil trade for a number of years, left last Monday as special representative of Ungerer & Co. to cover the principal sections of New York and the New England States.

—DR. GEORGE C. KILGORE and H. G. Bitters, special representatives of the H. K. Mulford Company, are spending this week at the Chicago branch. Dr. Kilgore entertained the Chicago representatives at a dinner on Tuesday.

—FRED EISOLD, of Athens; Ferdinand Wendt, of Juneau, and R. L. McDonald, of the McDonald-Strassberger Drug Company, of Manitowoc, were among the Wisconsin druggists who called upon the Milwaukee Drug Company last week.

—OTTO C. RHEIN, manager of the Hydrox Chemical Company, of Chicago, became very ill at his hotel in Cincinnati a few days ago, and was taken to the City Hospital in a dangerous condition. He has since recovered and has returned home.

—CHARLES T. BARTHOLOMEW, son of John Bartholomew, York street, Newport (Ky.) druggist, has returned home from the Southern University of California, where he is a student of theology.

—T. O. MCCORKLE, with Grier & Grier, Ninth street and New York avenue, N. W., Washington, D. C., is preparing a history of the McCorkle family in America. He wishes to get in touch with all those of that name who may be connected in any way with the American drug trade.

—W. W. ALBERS, of Wausau, Wis., president of the Wisconsin Pharmaceutical Association, took a prominent part in the 25th anniversary celebration of the Wausau Liederkranz. He was treasurer of the organization for many years and has long been one of the leading and active members.

—THE following representatives of Parke, Davis & Co. attended the Posting Class, conducted by N. Nicolia at the New York branch of the firm last Friday and Saturday: A. D. Howell, Joe Lister, C. H. Grow, of New York State; B. Cooling, A. J. Stout and H. K. Mundorf, of Philadelphia.

—DR. J. ALBERT ROSENHEIM, well known to the drug trade in Philadelphia and vicinity as the representative in that city of Bondy & Lederer, of New York, has been made sales manager for Goldsmith & Arndt, cigar manufacturers and distributors, of Philadelphia. Dr. Rosenheim was formerly president of the Retail Drug Clerks' Association of Philadelphia.

—R. L. DEER, manager of the Chicago branch of the H. K. Mulford Company, has returned from Minneapolis, where he

assisted in establishing a new branch for the H. K. Mulford Company. E. V. Clark, for many years in charge of the Northwest territory, is in charge of the Minneapolis branch.

—ARTHUR W. QUAN, pharmacist and head of the prescription department for many years at the Edwin Sumner pharmacy at Madison, Wis., has formed a partnership with Herbert R. Bird in the Badger Pharmacy, recently established by Mr. Bird at 1320 University avenue, Madison. Members of the new firm have long been friends.

—CHRISTOPHER KOCH, JR., of Philadelphia, recently appointed a member of the Pennsylvania Pharmaceutical Examining Board, is in charge of the prosecutions that are being instituted against the violators of the State Pharmacy Law. Mr. Koch has entered upon his new duties with a vigor and interest that is being highly commended by the exponents of honest pharmacy in the Keystone State.

—CONGRESSMAN JOHN M. REYNOLDS, of Bedford, Pa., will make the address of welcome to the members of the Pennsylvania Pharmaceutical Association who assemble at the annual meeting of that organization at Bedford Springs, Pa., June 22-24. Charles H. Marcy, the local secretary, was in Philadelphia recently and gave glowing accounts of the prospects for a large and interesting meeting this year.

—DR. WILLIAM SIMON, professor emeritus of the Maryland College of Pharmacy, has just returned from the mountains of North Carolina, where he did some climbing in company with Dr. Edward Hoffmeister, a Baltimore dentist, who is a graduate of the Maryland College also. Dr. Simon was much improved physically, and says he feels better than he has for a long time, an assertion amply borne out by his appearance.

—CHARLES J. LYNN, secretary and general manager of Eli Lilly & Co., gave a luncheon at the New York Drug Club last Saturday to a number of the company's local representatives. The salesmen present were S. W. Abel, A. M. Hopper, S. T. Douglas, Edw. F. Pfaff, Martin H. Kleine, H. L. Winner, of New Jersey; W. H. Newton, of New Haven; L. W. Baird, of Newburg, and C. R. Cosby, manager of the firm's New York branch.

### Marriage Mentions.

—GEORGE T. COOK, druggist, aged 22, and Dorothy C. Tutbill, of 496 Elwood avenue, both of Providence, were married by Rev. George H. Spencer at Everett, Mass., last week.

—REINHART ZECHEL, prominent young druggist at Manitowoc, Wis., was married at Milwaukee last week to Miss Lydia Planteo, of Manitowoc. The wedding was something of a surprise to the many friends of the couple.

—CHARLES A. BECKER, a prominent druggist of Norfolk, Va., was married April 25 to Miss Helen M. Rosendale, of Baltimore, at the residence of the bride's parents. The bride has been soprano soloist at the Catholic Cathedral in Baltimore.

—THEODORE AUGUSTUS RICHARDS, JR., a traveling salesman for James Bailly & Son, of Baltimore, was married recently at Raleigh, N. C., to Miss Lelah Shaw Douglass. They will make their home at Raleigh. The bride is an artist of merit, her paintings being much admired.

—CHRISTIAN SCHRIEZ, proprietor of stores at 1341 Elysian Fields avenue and 1242 St. Roch avenue, New Orleans, was married April 29 to Miss Helen Pitkin at St. Anna's Episcopal Church. The bride has been for several years society editor of the New Orleans *Times-Democrat*.

—FREDERICK SWEET STEARNS, of Frederick Stearns & Co., Detroit, was recently married to Miss Gertrude Boyer in St. John's Episcopal Church, Rev. William F. Faber, D.D., officiating. They are spending their honeymoon in California and after September will reside at Grosse Pointe Farms, a fashionable suburb.

—MR. and MRS. SOI BOEHM, of St. Louis, were hosts at a notable wedding at the Southern Hotel in that city when Miss Blanche Boehm, their daughter, was married to I. I. Spiro, of Chicago. Mr. Boehm never does things by halves and for that reason the ceremony was held in a hotel, rather than at the elegant Boehm home in Goodfield avenue.

—DR. JOEL J. BARNETT, head of one of the departments in the laboratories of Sharp & Dohme, Baltimore, and Miss Rachel Sills were recently married at Grace P. E. Church by Rev. Arthur Chilton Powell, C. C. Neal, superintendent of the Sharp & Dohme fluid extract department, and a classmate of the groom at Maryland C.T., acted as best man. Among the ushers was Mr. M. C. Cartney, of the New York office of Sharp & Dohme.

## QUESTION OF VERACITY AT C.R.D.A. MEETING.

Various Views Expressed Regarding Letter Written by Chicago Manager of Parke, Davis & Co.

CHICAGO, May 1.—At a special meeting of the Chicago Retail Druggists' Association on April 27 the Parke, Davis & Co. letter incident was taken up. Some time back Manager Bartlett, of the Chicago branch of Parke, Davis & Co., wrote to a Chicago customer discussing the retail price situation on the firm's products. The C.R.D.A. organ published this with a criticism of the firm. In bringing the matter before the special meeting Wilhelm Bodemann did not approve the publication without giving the firm a chance to explain its position.

Mr. Cannon, of the executive board, asserted he had seen a letter from President Ryan, of Parke, Davis & Co., approving the stand Manager Bartlett had taken. Editor Carr, who received the letter from President Ryan, denied that he has shown it to Mr. Cannon and furthermore stated that Mr. Ryan did not approve Mr. Bartlett's position.

Messrs. Wells and Ladish were of the opinion that the editor should have consulted the executive committee in the matter, while Frank Krammer felt that the attack was not as severe as it should have been. The issue finally seemed to resolve itself into a question of veracity between Editor Carr and Mr. Cannon. The incident was finally referred to the executive board for such action as may be deemed expedient.

A resolution was unanimously adopted protesting against the antitoxin bill pending in the Legislature. The association will send a committee of five to Springfield to appear before the House Appropriation Committee.

Chairman Holthofer, of the U.S.P. and N.F. committee, reported good progress in his province. He complained that the work was restricted by the failure of some druggists to do their part.

Chairman Sandkoetter, of the legislative committee, reported that at a joint meeting of the legislative committees of the C.R.D.A., the Illinois Ph.A. and the Chicago Branch of the A.Ph.A. it was decided that the time was not opportune to press the bill for higher requirements for registered pharmacists and less drastic requirements for apprentices and assistant registered pharmacists. A committee was appointed to prepare a revision of the present pharmacy law to be submitted at the next meeting of the Illinois Ph.A.

President Yeomans submitted his brokerage plan, which after discussion was referred to the executive board. The plan for the drug store limitation ordinance was discussed and referred to the legislative committee.

## C.R.D.A. President No Longer Executive Chairman.

CHICAGO, May 1.—The newly adopted constitution of the Chicago Retail Druggists' Association provides that the president of the organization shall not be the ex officio chairman of the executive committee, as was the case formerly. Hereafter the chairman of the executive committee is to be chosen by the committee itself from among the trustees. A further alteration in the constitution is that the president will not hereafter appoint the supervisors, but that they will be elected by the druggists of the respective districts of the city. A new province has been given the supervisors in that they will compose the nominating committee on officers. By these changes it is expected that the general body of the organization will come into closer touch with the work that is being carried on.

## Illinois Pharmacy Board in a Tangle.

CHICAGO, May 1.—Governor Deneen's appointments, which have been again held up, included two members of the State Board of Pharmacy: Joseph F. Shreve, of Jacksonville, to succeed himself; J. B. Michels, of El Paso, to succeed Bernard Schwartz. Mr. Shreve's term expired on January 1, 1908, more than a year ago, and Mr. Schwartz died more than three years ago. Mr. Avery's term expired last January, but the Governor has not yet got around to considering an appointment for this place.

## Chemical Company to Build Plant.

BALTIMORE, May 1.—The Davison Chemical Company, which manufactures sulphuric acid, will build a large plant at Curtis Bay, on land next to the Baltimore Yacht Club. A \$300,000 issue of first mortgage 6 per cent bonds has been authorized by the stockholders.

## NEW RAMSDELL STORE IN HOTEL SAVOY.

Everything of the Latest in Design and Improvement. Will Sell Contents of Old Store Soon.

The new store which was recently opened by the Ramsdell Drug Company in Hotel Savoy, on Fifth avenue, is without a doubt one of the finest pharmacies in point of elegance and beauty in Greater New York. Under the personal supervision of Clifford Ramsdell, president of the company, which is the retail successor to Daggett & Ramsdell, the store has been a success from the start, and the visitor is at once impressed with the thorough order and arrangement which prevails in every department.

A departure from the usual is characteristic throughout; the fixtures are unique, the goods effectively displayed, while the commercial and ethical features of the store are so balanced that the one does not suffer at the expense of the other. The prescription department is arranged along the most practical lines. The shelf bottles and containers are placed in booths within convenient reach of the compounder and no articles used in dispensing prescriptions are kept outside of this department. In the store proper only specialties and merchandise, such as perfumes, toilet preparations, etc., are displayed. The basement is about twice the area of the store and extends to the curb line of the street. Here all the manufacturing and cleansing is carried on, while a large portion is used for storing stock. It is as neat as the store.

Regarding the discontinuation of the 34th street store, Mr. Ramsdell stated in a recent interview that the change of location was made with the idea of being better able to handle more conveniently their growing uptown trade in the large residential section surrounding Central Park. Mr. Ramsdell also stated that the handsome mahogany fixtures of the older store, which contained three separate outfits, as well as the stock and an Innovation fountain, would be offered at auction the latter part of this month. This store for years has been noted for the elegance of its appointments and the sale will undoubtedly attract considerable attention from the drug trade of the entire city and vicinity.

## Scientific Section Will Consider Ergot.

PHILADELPHIA, May 1.—Prominent physicians and pharmacists will be the guests of the Scientific Section of the Philadelphia Branch of the A.Ph.A. May 13 when the meeting will be devoted to the consideration of ergot. Dr. H. C. Wood, Jr., will discuss "The Chemical Assay of Ergot"; Dr. Clarence A. Hoffer will speak on the "Physiological Assay of Ergot," and Dr. Charles E. Vanderkleed, whose subject will be "Some Notes on Ergot Testing."

## Bravery Costs Wholesaler a Broken Arm.

CHICAGO, May 3.—James Stevenson, of Robert Stevenson & Co., suffered a fractured arm as a result of an act of bravery at a fire last week. The confusion alarmed a horse and it ran away. Mr. Stevenson grasped the bridle and held on until he stopped the animal, in doing which he was thrown against an elevated railroad support, breaking his arm.

## Druggist-Editor Starts His Second Newspaper.

P. E. Dowling, druggist of Eveleth, Minn., for the last 15 years, has disposed of his pharmacy to Hayes & Casey, of Chisholm, and will devote his attention hereafter to the newspaper business. He has been the owner of the Eveleth *Star* for some time and will start another paper to be called the Gilbert *Booster*.

## Petition in Bankruptcy Against Valhalla Druggist.

VALHALLA, N. Y., May 1.—A petition in bankruptcy has been filed against William A. Holley, a druggist, by three creditors whose claims amount to \$3579. It is alleged that Holley is insolvent and on December 21 made an assignment for the benefit of his creditors to Celestine J. Reilly, of New Rochelle.

## President Albers in New Insurance Company.

WAUSAU, May 1.—W. W. Albers, president of the Wisconsin Pharmaceutical Association, is one of the organizers of the new Wisconsin Fire Insurance Company which is being formed here with a capital stock of \$100,000.

## WEST VIRGINIA P.H.A. MEETS IN MORGANTOWN IN JUNE—DRUGGISTS WHO WILL GREET MEMBERS

MORGANTOWN, May 1.—Preparations are being made to entertain the members of the West Virginia State Pharmaceutical Association who will meet here in annual convention on June 2 and 3. The entertainment committee, pictured herewith, is sending post cards to druggists bearing their pictures, with "Welcome" in big type and "Morgantown Retail Druggists' Association" in smaller letters. The local committee is being aided by the Travelers' Auxiliary, and President E. Bruce Dawson, of Wheeling, is taking an active interest in the plans for making the meeting a success.

The Morgantown druggists are preparing to entertain over 200 visitors. The hotels will not be able to take care of the visitors and arrangements are being made to house them in private rooms. The entertainers are planning several features for the convention. The business sessions will be held in Commencement Hall, where lectures will be delivered by prominent druggists and doctors. On the evening of the first day a banquet will be given and on the evening of the second day the convention will close with a ball. An automobile trip for the women members and the wives of the druggists has been arranged. The West Virginia Board of Pharmacy will conduct an examination June 1, the day preceding the convention.

E. W. Harrison, president of the Travelers' Auxiliary, makes a happy report of nearly 100 members now affiliating with the auxiliary, which speaks well for the officers, and places this association in the front rank of similar associations.

T. J. Johnson, field representative of the N.A.R.D., was visiting in West Virginia recently agitating the slot telephone, which means revenue for the retail druggists instead of expense and abuse in business.

Clarksburg Retail Druggists' Association held a joint meeting with the Harrison Medical Association recently, when U.S.P. and N.F. propaganda work was the main subject of discussion.

### Kentucky Proceedings Issued—Outing Next Month.

The Kentucky Pharmaceutical Association will hold its annual outing this year at Cerulean Springs, and hundreds of druggists are expected to be present. The dates are June 15-18, which is just before the formal opening of the popular health and pleasure resort for the summer. Already arrangements are being made for the entertainment of the guests. In the proceedings of the 1908 meeting, just issued by Secretary J. W. Gale, is given a list of the registered pharmacists of the State.

### New Branch for McMonagle & Rogers.

MIDDLETOWN, N. Y., May 3.—McMonagle & Rogers have purchased the pharmacy of the Union Drug Company at Suffern, N. Y., and will conduct it as a branch of the big store at Middletown. This will make the third branch of McMonagle & Rogers' store.

C. Stanley Meyers has resigned his position with D. W. Dusenberry to accept the position as manager of an extensive jewelry department which is to be opened by McMonagle & Rogers at their drug store in Monroe.

### N. Y. Deutscher Apotheker-Verein Meets Tonight.

The regular monthly meeting of the New Yorker Deutscher Apotheker-Verein will take place this evening at the club rooms, 192 Third avenue. The feature will be a discussion on the preparations of the National Formulary. The subject will be introduced by E. C. Goeftling. The entertainment committee has partly completed arrangements for the annual summer outing which will take place at Witzel's Pavilion, College Point, on July 8.

### Prof. Coblenz on Pharmacopoeial Revision.

Prof. Virgil Coblenz will be the speaker of the evening at the meeting of the New York Branch of the A.P.A., to be held at 830 Monday, May 10. His subject will be "The Chemical Work of the Revision of the Pharmacopoeia."

From left to right, front row: C. A. Fowler, W. A. Ream, T. J. Casey; back row: Fenton Dent, Guy Dent, Walter H. Myers.

### HYDE PARK DRUGGISTS PRAISED BY CHIEF.

**Police Head Declares Conditions in Relation to Sale of Intoxicants Were Never Better Than Now.**

BOSTON, May 3.—Members of the medical profession came to the support of the druggists of Hyde Park, one of the Boston suburbs, last Tuesday evening, and it may be that their influence will be sufficient to offset that of the Anti-saloon League of Hyde Park, which appeared before the board of selectmen to oppose the granting of sixth class liquor licenses to druggists. The opponents of the druggists were clergymen and members of church men's clubs.

Just as things seemed to be going the way of the opposition, Dr. Charles Sturtevant, of the Hyde Park Medical Club, said that he was authorized by the Medical Club to state that the board favored the granting of sixth class licenses, and would oppose the granting of the eighth class licenses, the kind which the opponents preferred should be granted, if at all. Dr. Sturtevant emphasized the fact that the sentiment he expressed was not his own merely, but that of the Medical Club.

Thomas F. Fallon, proprietor of two drug stores in Hyde Park, denied the charge of the opponents that it was possible for a person to obtain all the liquor desired in Hyde Park drug stores, and he was followed by the chief of police who stated that Hyde Park druggists conducted their business properly, and that conditions were the best they had been in the eight years he has been chief of police.

Meanwhile the selectmen have taken the matter under advisement, but Druggist Fallon has been almost criticized by the business men of the town for not having notified them that the matter was to come up, so that they might have appeared in behalf of the druggists.

### College of Pharmacy of University of Iowa.

—Alvin H. Kohl, '09, of Mechanicsville, enjoyed a visit from his father recently.

—W. D. Ralston, '11, of Paulina, enjoyed a visit from his father and mother recently.

—Alvin H. Kohl, '09, of Mechanicsville, represented the Nu Chapter of the Phi Chi Fraternity at the Grand Council held at Chicago.

—H. E. Van Duzer, city solicitor for Hartz & Balansen, of Rock Island, Ill., recently favored the students with a second lecture on the underlying principles of successful salesmanship.

—M. F. Selleck, ex-'07, of Onawa, was an over-Sunday guest in Iowa City recently. He was entertained at the Sigma Chi house. His brother, E. C. Selleck, ex-'04, is now located at Milner, Idaho.

—Announcements have been received at Iowa City of the marriage on March 10 of Miss Josephine Marie Van Stigt, of Earlham, to Elmer L. Scar, ex-'04, at the home of the bride's mother, Mrs. G. Van Stigt.

## TWO ATTACKS ON CONSTITUTIONALITY OF LAW.

### Federal Pure Food and Drugs Act Upheld in Test Case in Chicago—Other Just Begun in Ohio.

CHICAGO, Ill., May 1.—Federal Judge Sanborn, in a test case questioning the constitutionality of the Federal Pure Food and Drugs Act, upholds the validity of the law, holding that the Crescent Manufacturing Company, of Seattle, makers of "Mapleline," misbranded their product, inasmuch as this substitute for maple syrup contained no maple juices. The defense, aside from attacking the constitutionality of the law, alleged that the name was justified by the flavor of the product. "Mapleline" consignments in various parts of the country are said to be in jeopardy of seizure. The case will be appealed.

CINCINNATI, May 1.—The Corn Products Company, of Chicago, has attacked the constitutionality of the Federal Pure Food Law in an answer filed in the United States District Court to the allegations of United States District Attorney McPherson, who caused the United States Marshal to seize 46 packages and bags of sugar manufactured by the company and found on the premises of the Gerke Brewing Company, in this city. The Government alleges that the sugar was labeled "pure sugar," whereas it was adulterated. The seizure was made under the Pure Food and Drugs Act.

### Referee Board's Legality Officially Promulgated.

WASHINGTON, May 1.—The Secretary of Agriculture has promulgated as Decision 107 of the department, the opinion of Attorney-General Wickersham upholding the legality of the Referee Board of Scientific Experts, as reported on page 386 of the ERA of April 22.

Friends of Dr. Wiley who had threatened injunction proceedings against the Secretary to prevent him from adopting the conclusions of the Referee Board overruling Dr. Wiley in the administration of the Food and Drugs Act, have decided not to go into the courts.

### Commencement of Albany College of Pharmacy.

ALBANY, N. Y., May 1.—State Geologist John M. Clarke, delivered the address at the commencement exercises of the Albany College of Pharmacy. The graduates are: Gracia Naomi Ansonbe, Saratoga; Anna Lucia Caldwell, Hagaman; Charles Edgar Collins, Johnstown; Walter Cook, Troy; Howard James Copeland, Glencoe; Sister John Joseph Duffy, Troy; Daniel Cornelius Fitzgerald, Glens Falls; William Walker Gibson, Albany; Arthur Lynn Goldsmith, Oneonta; Paul August Hespelt, Johnstown; LeRoy George Matthews, Catskill; Walter Finn Murdoch, Plover; William James Murphy, Fulton; Harry Sumner Noel, Williamstown, Mass.; Logan Kniffen Palmatier, Albany; Frank Smith Park, Woodhull; Edward Charles Rotalick, Albany; James Louis Roark, St. Johnsville; Gilbert George Roberts, Schenectady; Elsie Emma Sautter, Albany; Rocco Spina, Utica; Philip Swartz, Albany; Raymond Ford Westbach, Albany.

### Graduates Receive Degrees in Jersey City.

On April 28 the degree of graduate of pharmacy was conferred upon the young men who have been students in the Department of Pharmacy, University of the State of New Jersey, for the past two years. The commencement exercises were held at the Scottish Rite Temple, Jersey City, and an excellent programme, consisting of musical numbers and speeches by prominent men, together with the conferring of the degrees, was carried out. The officers of the graduating class were as follows: President, Max W. Friedman; vice-president, William S. Kinkensieper; secretary, Henry F. Kuhn; treasurer, Solomon Jaller; sergeant-at-arms, John J. Parentini; editor, Luke C. Hines; executive committee, Edward Fisher, George E. Ferber, Isidore Shinitter, Leo Rosenbauer.

### The Revolt of the British Drug Clerks.

LONDON, April 23.—Qualified pharmaceutical assistants have not been slow to realize that the New Poisons and Pharmacy Act improves their position, for every drug store is now required to be under qualified management. On Good Friday, a meeting was held at Birmingham, at which it was decided to form an organization under the name of "the National Union of Assistant Pharmacists." At present the membership

is only 200 but the promoters are very energetic and the membership will no doubt increase. The objects of the Union are various but the principal ones are the fixing of a minimum wage for qualified assistants and the limitations of the hours of labor.

### Federal Authorities Prosecute Wholesale Druggist.

John W. James, of Towns & James, wholesale druggists of 174 Fulton street, Borough of Brooklyn, New York City, was arrested on April 27 by United States Marshal James Proctor and arraigned before Commissioner Morle on a charge of shipping drugs from one State to another without properly marking the ingredients on the label. Mr. James waived examination and was released on \$500 bail to await action of the Federal grand jury.

The complainant in the case is Inspector George Adams, of the Department of Agriculture, who charged in his complaint that Mr. James had sent from New York State to Massachusetts three one-pound bottles of hydrogen peroxide which contained acetanilid, although that fact was not noticeably displayed on the label, in violation of the Pure Food and Drugs Law.

### Pharmacy Legislation in Missouri.

ST. LOUIS, April 24.—Henry O. A. Huegel, of Grand and Park avenues, St. Louis, has been acting chairman of the Missouri Pharmaceutical Association legislative committee while the bill now passed by the House of Representatives and with excellent prospects of passing the Senate, was in preparation and pending. C. M. Wright, of Webb City, Mo., was appointed chairman of the committee, but he asked Mr. Huegel to act for him because of the advantage of a St. Louis location and because of Mr. Huegel's interest in the legislation. Mr. Huegel has been very energetic in getting out letters explaining the bill and checking up the support given to it.

### \$500 Fine Imposed for Selling "Near Beer."

PITTSBURG, Pa., May 1.—The sale of "Rikk," a so-called near beer, has been frowned upon by the Superior Court of Pennsylvania, Charles H. Burns, a druggist of Chester County, being refused a rehearing after having been convicted in his home county and sentenced to pay a fine of \$500 for violating the Brooks Law.

Under this decision all druggists and others purporting to sell non-intoxicating beverages, such as "Rikk," can be prosecuted for selling liquor illegally. This is one of the "near beers" made to sell in local option districts, and an analysis of it showed that it contained 3.90 per cent alcohol.

### 5000 Invitations Sent to Meeting of Texas Ph.A.

GONZALES, Texas, May 1.—R. H. Walker, secretary-treasurer of the Texas Pharmaceutical Association, recently sent what was probably the largest number of letters to be mailed in one day by an individual in the history of the Gonzales post-office. There were in all 5000 letters addressed to druggists of Texas, notifying them of the meeting of the association which takes place in the Alamo City, San Antonio, June 15 to 17, and the batch of mail was hauled to the post-office in a delivery wagon.

### Pittsburg Druggist Gets Verdict of \$40,000.

The jury in the libel suit in the United States Circuit Court brought by Samuel Dempster, of Pittsburg, against Col. Wm. D. Mann, editor of *Town Topics*, tried last week in New York City, brought in a verdict for \$40,000 in favor of the plaintiff. The suit was for \$100,000. The offensive article accused Mr. Dempster of social irregularities in his home town.

### Delegates to the New York State Ph.A.

President Butler, of Columbia University College of Pharmacy, has appointed the following delegates to the New York State Pharmaceutical Association, which meets at Richfield Springs in June: Dr. George C. Diekmann, chairman; J. Leon Lascoff, Thomas P. Cook, Hugo Kantrowitz and L. W. DeZeller.

### Live Chickens in Easter Window Display.

A. L. Moore, of Elm Grove, W. Va., had a unique Easter display in his window, consisting of two white Wyandotte hens and a prize winning cockerel.

## RECENT ELECTIONS OF RETAIL ASSOCIATIONS—THREE ACTIVE OFFICERS OF ORGANIZATIONS.

J. M. MILLER, Bloomington, Ill.,  
Pres. McLean County Druggists' Assn.

F. R. BEASON, Decatur, Ala.,  
President Tennessee Valley R.D.A.

DR. WILLOUGHBY H. REED,  
President Norristown (Pa.) R.D.A.

### NINETY PER CENT OF ELIGIBLES MEMBERS.

Excellent Showing of the Retail Druggists' Association of Montgomery County, Pennsylvania.

NORRISTOWN, May 1.—With every section of the county represented, the annual meeting of the Montgomery County Retail Druggists' Association was one of the most successful in the history of the organization. The principal feature of the business was the election of officers, which resulted as follows: President, Dr. W. H. Reed, Norristown; first vice-president, M. M. Osborne, Elkins Park; second vice-president, Dr. Theodore Jacobs, Norristown; secretary, Joseph Lowenbura, Norristown; treasurer, Samuel N. Yeake, Norristown; executive committee, chairman, Walter Rothwell, Hatboro; W. L. Harbaugh, Haverford; T. P. McCoy, Conshohocken; M. M. Osborne, Elkins Park; G. W. Bailey, Royersford; H. R. Stallman, Royersford.

The reports of the officers showed that approximately 90 per cent of the druggists of the county were members of the association in good standing and that the organization in all likelihood continues to hold the record in the N.A.R.D. for having the largest percentage of eligibles in one county, identified with the association. A letter was sent to L. L. Walton, president of the Pennsylvania Pharmaceutical Association and a member of the Pennsylvania Pharmaceutical Examining Board, commending him for his attitude in opposing certain proposed amendments to the State Pharmacy Law.

Delegates to the Pennsylvania Pharmaceutical Association meeting at Bedford Springs in June were named as follows: Thomas F. McCoy and Walter Rothwell; delegates to the N.A.R.D. convention at Louisville in September, Walter Rothwell and Harry R. Stallman; alternates, Thomas F. McCoy and George Freshel, of Wynnewood. Dr. Reed presided at the annual banquet which followed the business meeting.

### J. M. Miller Again Heads McLean County D.A.

BLOOMINGTON, Ill., May 1.—In addition to discussing various matters of importance the McLean County Druggists' Association, at its recent annual meeting, elected the following officers: President, J. M. Miller; vice-president, David Hayes; secretary, J. L. Bonnett; treasurer, Harry L. Frey; trustees, J. J. Quinn, Fred H. Haering, L. L. Walton.

### Election of Davenport Pharmaceutical Association.

DAVENPORT, IOWA, May 1.—The Davenport Pharmaceutical Association has re-elected Will Laze as president. J. E. Klenze is vice-president, Walter Shedd secretary and A. Riepe treasurer.

### "PROFITS TOO SMALL IN THE DRUG BUSINESS."

Distiller Rose Abandons Intention to Enter Into the Wholesale Drug Trade. But Will Make Soap.

CHATTANOOGA, Tenn., May 1.—Randolph Rose, Chattanooga's most widely advertised distiller and liquor dealer, who announced some time ago that he would go into the wholesale drug business as soon as prohibition became effective in Tennessee, stated today that his plans had been changed and that he would be the head of a company to build a \$500,000 soap manufacturing plant in Chattanooga in a few months. The plant will employ about 100 people.

Mr. Rose states that after a careful study of the drug manufacturing industry he has decided that the profits are too small.

### St. Clair County Druggists Elect Officers.

BELLEVILLE, Ill., May 1.—At the recent annual election of the St. Clair County Retail Druggists' Association, held in East St. Louis, the following officers were elected: President, W. J. Ridgely, East St. Louis; vice-president, J. J. Weinlaender, Belleville; secretary, Walter J. Kohl, Belleville; treasurer, T. A. Wilson, Lebanon. The meeting was very interesting.

### Heavy Fines for Selling Intoxicants.

GAITA, Ill., May 1.—Five hundred and ten dollars in cold cash was the price paid by L. B. Mansell, a resident of Chicago, who has been conducting a drug store in this city, as the penalty for the illegal sale of liquor here. Mr. Mansell entered a plea of guilty on eight counts.

MARIETTA, O., May 1.—Will S. Richardson, prominent druggist, was fined \$200 and costs by Mayor McKinney under a charge of illegal selling of intoxicating liquors.

### Burglar Caught and Plunder Recovered.

ST. CROIX FALLS, Wis., May 1.—Isaacson's drug store was recently robbed of pocket knives, razors and watches to the value of more than \$100. Next morning the burglar was caught at Taylor Falls and the goods recovered.

### Northeastern Druggists Elect Officers.

GADSDEN, Ala., May 1.—The Northeastern Druggists' Association has elected the following officers: President, W. P. Thompson, Guntersville; vice-president, G. W. Walker, Attalla; secretary, Lee Whorton, Gadsden; treasurer, James Nowlin, Alabama City.

## LAST ATTACKS ON MODEL PHARMACY MEASURE.

### Coterie of Brooklynites Fear That Brown Bill Will Work Injury to Them, Because Fines Are Doubled.

Numerous druggists in Brooklyn Borough are receiving roughly printed circulars denouncing the Brown Pharmacy Bill, just passed by the Legislature, and asking them to write to the Governor to veto it. In order to give weight to their attacks they are using the name of the "Greater New York Pharmaceutical Society," the existence of which is shrouded in mystery. In view of the strong support given the Brown Bill by the leading pharmacists of the State and by all of the known associations the attack by the new and unknown association created a slight ripple of surprise. The chief fear seems to be that the board under the new law will rigidly enforce the provisions penalizing druggists for violations of the statutes, which would work a hardship on those caught not complying with the law, for the penalty has been raised from \$25 to \$50. Here are some extracts from this remarkable document:

"The Brown Bill arranges for a reappointment of the present members of the Board of Pharmacy by the Regents without consulting any one, then the members for the Brown Board of Pharmacy are to be elected by the Regents, from a list selected by the so-called New York State Pharmaceutical Association."

"Afterwards, the so-called New York State Pharmaceutical Association directs who shall be appointed from their own membership."

"Give the new Brown board an opportunity to levy tribute. Will they do it?"

In regard to the Board of Pharmacy the circular states as a bona fide "fact" the erroneous newspaper statements regarding the recent cream of tartar case, repeating the untruth that \$100,000 was illegally collected from grocers who were "frightened" by threats and promptly paid, also that "thousands of dollars are annually collected from druggists for technical violations, etc.," and that when the board has need of funds any druggist can easily be fined on a technical violation. Several alleged arguments are presented as follows:

"Why should the Brown Bill place 10,000 or 12,000 pharmacists in the State of New York under the control of the so-called New York State Pharmaceutical Association, which only meets once a year and is virtually owned and controlled by a few members—some even beg contributions for it from smaller pharmaceutical organizations?"

"If the Brown Pharmacy Bill becomes a law what are the druggists to expect? If the fines are to be \$50 instead of \$25 and the druggist is called upon to pay \$50 for each sample of volatile and unstable article he might sell to the board's inspectors would not the Brown board in a short time own many of the drug stores in New York State?"

The circular bears the following signatures: E. Wizen, Nevins and Schermerhorn streets; George Broover, 426 Court street; Albert Leo, 125 Corona avenue, Corona; M. Friedman, 677 Evergreen avenue; M. Kramer, Bedford and Lexington avenues; S. L. Neier, 122 Schenectady avenue; C. R. Avery, 84 Fourth avenue; Gustave E. Biot, 468 Seventh avenue; A. Samrock, 270 Irving avenue; S. Rubin, 961 De Kalb avenue; Wm. T. Cragan, 425 Court street; Emil C. Krasche, 251 Wyckoff avenue; N. Broadman, Maspeth, L. I.; Thomas Lamb, 84 Court street; W. Wisendanger, president; A. H. Witze, secretary.

Some prominent Brooklyn druggists were interviewed regarding the circular and were not inclined to consider it seriously. Several commented upon the misspelling, as well as the crudeness of style and expression. As to the "Greater New York Pharmaceutical Society," none of those interviewed although they have been connected with drug matters of the borough for a number of years knew of the existence of the organization.

The Brown Bill has been indorsed by all of the known pharmaceutical associations of the State of New York.

### Hearing on the Brown Bill Next Tuesday.

ALBANY, N. Y., May 3.—Governor Hughes has decided to give a hearing to the advocates and opponents of the Brown Pharmacy Act which was passed by the Legislature last week. The hearing will be held in the Executive Chamber at the State Capitol on Tuesday, May 11, at 3 p. m.

### Formal Opening of New Home of Stewart Company.

INDIANAPOLIS, May 3.—The Daniel Stewart Company has occupied for several weeks its spacious new building, specially designed, as recently described in the ERA, to meet all the modern requirements of a wholesale drug business, but the "official" opening did not take place until the last day of April. Flowers and plants throughout the building from turret to foundation stone, lively music by an orchestra, the glad hand of welcome and floral and other favors to more than 2000 guests. Not only was every Indianapolis retail druggist present, but guests came from western Ohio and eastern Illinois. This is the oldest wholesale drug house in Indianapolis and in the State, having been established in 1840, so that early in 1910 it may celebrate its 70th birthday. The officers of the company are: William Scott, president and treasurer; Mrs. Martha Stewart Scott, daughter of the late Daniel Stewart, vice-president, and Henry L. Brown, who looks 60 years old but will be 80 in a few weeks, secretary. The secretary has been with this house 35 years.

### Druggist-Comptroller Recovery From Illness.

ALBANY, May 4.—Druggist Charles H. Gaus, Comptroller of the State, who has been seriously ill for some months, is now reported to be mending and his complete recovery is expected. Public interest in Mr. Gaus' illness has been heightened during the past few days owing to the publication in a local paper that an effort was being made to induce him to resign while the Legislature was in session, to prevent the possibility of the appointment of his successor by the Governor without check from the Senate. The report brought forth from Mr. Gaus an indignant denial and he states that he never thought of resigning and expects to be well enough to take up the duties of the office in a short time.

### Inventive Druggist Gives First Aid to Farmers.

Albert Izor, a retail druggist at 511 West Washington street, Indianapolis, has for 14 years been engaged in perfecting a binder for wheat that will do away with binding twine (which now costs the farmer from 30 to 50 cents an acre) and will bind the sheaf for practically no cost and make the farmer independent of the binder trust. The "straw binder," as it is called, is woven from the lower part of the wheat stem and will pick up 90 per cent of the bundles. Mr. Izor during all his years of experimenting has been financially helped by Augustus Kiefer, of the A. Kiefer Drug Company, Indianapolis.

### Notes of Highland Park College.

- Fred Barney, '05, was a recent caller.
- Mrs. Rose, nee Miss Dollimand, was a recent visitor.
- Edna Zook has a position with Wehrle Franck at Van Horn, Iowa.
- John Becker is located at Hot Springs, S. D., at the Battemount National Sanitarium.
- Raymond Wilson, '05, is teaching science and chemistry in one of the Council Bluffs high schools.
- Mrs. E. Ernst, formerly Miss Anna Wilson, '09, has been elected to the chair of materia medica and pharmacy in the Medical Department of Washburn College, Topeka.

### Miss Dow to Have Offices Over Bank.

CINCINNATI, May 3.—Miss Cora Dow, owner of nine retail drug stores here, has engaged a suite of office rooms on the second floor of the big bank and office building which is being erected at Seventh and Vine streets.

### Clerks Hear About Drug Store Indexing.

CINCINNATI, May 3.—At the last meeting of the Cincinnati Central Drug Clerks' Association, William Brittain read a paper on "Drug Store Indexing." A social session followed.

### One of the Evans' Branches Sold.

PHILADELPHIA, May 3.—George B. Evans' branch store at 2330 North Front street has been sold to I. S. Reice, of 919 West Girard avenue.

### Druggist Koerner Now at Home in His New Building.

Harry Koerner, of Jefferson, Wis., has moved his pharmacy into his recently completed brick building, where his facilities are much improved.

## MINSTREL SHOW A HIT IN PHILADELPHIA.

**Druggists in Burnt Cork Delight Their Audience With Songs, Jokes and Take-offs of Prominent Men.**

PHILADELPHIA, May 1.—Representatives of the drug trade to the number of 800 greeted the members of the Philadelphia Association of Retail Druggists who on Monday evening last presented a minstrel show which for original and entertaining features surpassed anything of the kind ever attempted by the trade in this city. When the curtain rose, it disclosed 30 dusky singers, seated in a double row. Acting as interlocutor was "Eddie" Cassidy, while on either end were Frank W. Fluck, Harry G. Comp and J. H. Barlow as "picksin' tormentors," and Tom McGuire, J. G. Howard and H. A. Nolte. The tenors, baritones and basses included C. S. Gill, J. A. Garvey, E. J. Strunk, L. H. Davis, M. W. Mansfield, Otto Kraus, R. H. Lackey, E. H. Foley, Joshua Marsden, E. G. Eshelman, Dr. E. K. Boltz, F. M. Apple, Otto Kraus, Jr., W. McMurtrie, W. H. Ricker and W. M. Montgomery.

Opening with a medley to the music of a large orchestra, the chorus traveled with volume and harmony and when J. G. Howard was introduced by the interlocutor and after springing a few of the regulation jokes, sang "Somebody Lied;" he received an ovation. James A. Garvey made a similar hit in a sentimental ballad and then the P.A.R.D. organizer, J. H. Barlow, was called on. He had been worrying for several weeks over the possibility of forgetting some of his jokes and the verses of "Hinky Dee," but he carried the audience by storm as he put on the gridiron T. H. Potts, Charles Rehfsuss, Otto Kraus, H. C. Blair, S. W. Strunk, J. E. Marsden, S. B. Davis and a few more. C. S. Gill kept the fair ones on the front row on the anxious bench as he sang to first one and then the other, "I Wish I Had a Girl," but the laugh was on him later when among the flowers which he received was a huge bouquet composed of an immense head of cabbage embellished with a collection of early spring vegetables. H. A. Nolte kept the audience convulsed with laughter for nearly 15 minutes, as did President Fluck. The latter also made a hit with his song "Broke." "Tom" McGuire who, when he is not compounding prescriptions at 26th street and Lehigh avenue, is conducting or participating in a minstrel show or theatricals, in the opinion of the audience had something on the majority of the professionals in minstrelsy. His dancing, his jokes, his song "Alabama" and even his make-up all indicated ability of superior quality. The first part of the programme closed with a medley.

The second part consisted of a scene in the Drug Club where a sketch written by Frank W. Fluck was acted. It included some clever specialties among which was a banjo duet by Messrs. Comp and Montgomery and solos by Messrs. Strunk and Mansfield. The principal character was Professor Remislaus—a hit on Professors Remington and Stanislaus—and taken by President Fluck. Dancing followed.

Not all of the hard work that was done to make the occasion a success was applauded, for the entertainment committee had been working day and night in the interests of the association. This committee consisted of the following: J. E. Marsden, chairman; S. B. Davis, vice-chairman; H. A. Nolte, treasurer; E. G. Eshelman, secretary; G. B. Weideman, W. H. Ricker, R. H. Lackey, J. A. Garvey, W. H. Sutton, O. Zion, H. G. Comp and Dr. E. K. Boltz.

### Change in Austria's Patent Law.

The London *Financial Times* reports that by an enactment in Austria which will become effective in June patents will be revocable at the expiration of three years from date of publication, without notice, if the patentee neglects to work the patent in that country to an adequate extent. The new law is similar to the one which has been placed on the statute books in Great Britain.

## PROMINENT BOARD MEMBERS REAPPOINTED.

**Ephraim Bacon, of Maryland, and Otto J. S. Boberg, of Wisconsin, Named by Governors for New Terms.**

BALTIMORE, May 1. Ephraim Bacon, a druggist at Calvert and 30th streets, this city, has been appointed to succeed himself as a member of the Maryland Board of Pharmacy for another period of five years. Mr. Bacon has been secretary of the board for several years past and the reappointment is a tribute to him, since the rivalry for the place was quite active.

The appointee is a graduate of the Maryland College of Pharmacy. For some years he was a partner of Dr. George W. Truitt in the retail drug business at Roland Park, a suburb, but now he conducts the store at the place mentioned. By naming him the Governor really gives Baltimore three out of the five members of the board, the other two being John A. Davis, the treasurer, and Louis Schulze. This leaves the Eastern Shore with one member and western Maryland with one, the requirement that one member shall come from the central part of the State being met by choosing another city man.

MADISON, Wis., May 1.—Otto J. S. Boberg, well known pharmacist of Eau Claire, Wis., has been reappointed by Governor Davidson as a member of the State Board of Pharmacy for the term of five years. The news that Mr. Boberg will continue on the State board meets with the hearty approval of his drug trade friends about Wisconsin.

Edward Williams, of Madison, was elected president of the State board at the recent annual election held at Madison, and Henry G. Ruenzel, of Milwaukee, was elected secretary and treasurer.

### Iowa Board Reorganized.

DES MOINES, May 1.—B. F. Keltz, State Pharmacy Commissioner, has resigned, explaining that he could not do good work while at outs with the Governor. He was accused of irregularities in collecting his per diem, and was asked to resign by Governor Carroll. The executive council has withheld \$116.24 from Keltz's per diem and expense bills to cover alleged padding in bills filed since June, 1908.

The Governor later appointed I. W. Clements, of Marengo; David E. Hadden, of Alta, and Harry E. Eaton, of Shenandoah, members of the State Pharmacy Commission.

### Mrs. Kebler Gives a Tea.

WASHINGTON, May 3.—Mrs. Lyman F. Kebler, wife of Dr. Kebler, chief of the Drugs Division, Department of Agriculture, gave a tea at her Park road residence Saturday in honor of Mrs. M. I. Wilbert and her guest, Mrs. H. Donnelly, of Ardmore, Pa., and Mrs. J. Loyden White (Mrs. Joel Blane), of New York. There were piano solos by Miss Catherine Evans and Miss Mabel Kebler, violin solos by Miss Mary Evans and Master Victor Kebler and a vocal solo by Miss May Thompson. Miss Laura Shaw, a niece of the hostess, presided and was assisted by the younger set. Among those present were: Mrs. Edward Yarnold, Mrs. Wilson Thompson, Mrs. W. S. Richardson, Mrs. Henry Evans, Miss Ennice Bradbury and Miss Ruth Kebler.

### Uruguayan Drug Store and Pharmacy Law.

Vice-Consul Charles Lyon Chandler, of Montevideo, sends a translation of a law recently enacted by the Government of Uruguay applying to the drug stores, pharmacies and to pharmacists of that country. Two years after the promulgation of this act it will not be lawful to introduce into Uruguay, or to sell therein, medicines whose sale has not been authorized by the National Hygienic Council. Every pharmacy of the country is to be inspected at least once a year by a pharmacist designated by the National Hygienic Council. The full translated text of the law may be seen at the Bureau of Manufacturers, at Washington.

EPHRAIM BACON, Baltimore.  
Reappointed member of the Maryland  
State Board of Pharmacy.

## BOARD EXAMINATIONS

### New York—Middle Branch.

ALBANY, May 1.—Secretary Warren L. Bradt announces that at the Middle Branch's examination April 21-22 there were present 28 candidates. The following were successful:

**PHARMACISTS**.—Leon L. Reed, Candor; Thomas A. Weaver, Rome; John P. White, Oneonta; Stephen E. Cook, Green Island; Harry S. Noel, Williamstown, Mass.; James L. Roark, St. Johnsville; Elsie E. Sautter, Albany; Gracia N. Ansecombe, Saratoga; Harold H. Mather, Albany.

**DRUGGISTS**.—Burr U. Rathbun, Whitney's Point; Frank S. Park, Woodhull; Douglass R. Spiers, Walton; Logan K. Palmatier, Albany; Michael J. Brennan, Waterbury, Conn.; Charles F. Mohan, Albany.

### Missouri.

ST. LOUIS, May 1.—Charles Gietner, secretary of the Missouri Board of Pharmacy, has announced the 51 successful candidates of the 105 applicants for State registration who appeared at the examination held in Kansas City in April. Mr. Gietner says that an exceptional number of elderly men are appearing before the board, many of them having been employed in stores where a registered pharmacist was in charge, but are now getting in the clear for more strict control if the proposed bill pending in the Legislature should become a law. Mr. Gietner adds that as a rule these men pass good examinations. The next regular examination will be held at Joplin, June 14, the occasion being the meeting of the Mo.Ph.A. October 11 an examination will be held in St. Louis. Those successful at Kansas City were:

Kansas City.—Raymond Alderich, Frank R. Bryant, L. V. Davison, Orville Egbert, W. Cudney Eastmann, James C. Flournoy, Wendell E. Green, Charles E. Gilliland, John P. Hinker, Harold B. Hedrick, Fred E. Miller, Clair G. Martin, Frederick Melcher, A. T. Meyers, Leigh Milligan, P. L. Mullen, William J. Mills, E. O. McClanahan, J. C. Neal, R. S. Parker, Mrs. Anna Smith, William L. Sharp.

St. Louis.—E. B. Collard, C. L. Marx.

St. Joseph.—George W. Bennett, J. M. Hepburn, R. W. Kinnison, C. J. Wachendorfer.

Other Missouri Cities.—Robert T. Kaempfer, Koshkonong; Thomas D. McGee, Worth; Felix J. Papin, Ste. Genevieve; E. H. Roper, Mount Vernon; Benjamin M. Scotten, Sedalia; Lawson Stamper, Sedalia; E. G. Starr, Kirksville; Joseph Sharp, Cole Camp; G. C. Smith, Sparta; Oron E. Snow, Jacksonville; T. Vickers, Joplin; J. W. Wallace, Macon; Launt Campbell, Princeton; J. P. Doyle, East Prairie; L. M. Edens, Cabool; Raymond A. Edmonds, Miami; Joseph G. Gresham, Queen City; Frank E. Miller, Thayer.

From Other States.—Charles W. Clarke, Washington, Kan.; Ralph V. Jarrett, Quincy, Ill.; William McDaniel, Valley Falls, Kan.; Charles Warble, Lawrence, Kan.

### California.

SAN FRANCISCO, May 1.—Charles B. Whilden, secretary of the California State Board of Pharmacy, announces that the following applicants were successful at the April examinations:

**ASSISTANTS**.—Otto W. Berdrow, Emile A. Simons, Roy Alton Stauffer, Harold Preston Darling, Benjamin H. Dill, E. Allen Heller, Oke Meyerhofner, Henry L. Pingel, Della B. Rogers, Ralph H. Glezen, Adolph Schulte, Jr., Thomas Franklin Ashley, Leon Brink, Charles Lincoln Eby, Harry M. Emes, James R. Filgate, John A. Flynn, Frank Healy, Frank McCarly.

**LICENTIATES**.—Frank Arrigo, Jr., Perry Leroy Fallis, Jerome J. Green, G. L. Irwin, George V. Morrison, Clara E. Nichols, Winona M. Nielsen, Marvin B. C. Rounds, Charles Daniel Taylor, George S. Adams, Ralph C. Amssen, Donald J. Buckley, N. W. Clinger, W. Sinclair Coleman, W. Bert Corner, Arthur Davis, William Francis Hall, Johannes Jensen, Thomas C. Kennelly, Hugo G. Lagan, James R. Laird, Earl A. MacDonald, Percy E. Mackey, D. B. Martin, Grover C. Mathews, Lewis J. Renshaw, Ralph H. Rogers, A. L. Simons, Henry Radcliffe Wells.

**CREDENTIALS**.—A. W. Boggs, Reuben M. Coffin, Jabez T. Crane, George E. Cravens, P. M. DesMarais, Henry H.

Forline, Samuel Franklin, O. A. Griffin, J. E. Jones, Emil Klinkowstroem, Lars Peter Knos, B. W. McCandless, Steven D. Nill, T. G. Scales, George Blake Stewart, George B. Weiss.

### APOPLEXY TAKES NEW JERSEY VETERAN.

Eugene Hartnett Stricken Just After Moving Into His New Pharmacy, the Largest in Jersey City.

Eugene Hartnett, of Jersey City, died of apoplexy Sunday at his home, 289 York street. He was born in Ireland on April 9, 1844, and came to America with his parents when a small boy. He started in the retail drug business in New York City at the age of 12 and conducted a store in the old Bible House for many years. He moved to Jersey City in 1883 and established a pharmacy at Warren and Montgomery streets.

On Thursday last he moved his business to 21 Newark avenue, where he opened the largest drug store in Jersey City. While sitting at his desk on the first night of his occupancy of his new pharmacy he was suddenly stricken with apoplexy and taken home in a coach. He never regained consciousness.

Mr. Hartnett was formerly a member of the directorate of the Second National Bank of Jersey City, now known as the Union Trust Company. He was second vice-president of the New Jersey Pharmaceutical Society and a member of the College of Pharmacy of New York City. He belonged to the Union League Club of Jersey City.

Mr. Hartnett is survived by his wife and four children, Maj. Eugene H. Hartnett, of the Medical Corps of the United States Army; Harriett A., Emily H. and Edward.

### Obituary Notes.

—R. H. ELMORE, for 28 years a druggist of Red Bluff, Cal., died recently, leaving a widow and daughter.

—JAMES R. WIGHT, assistant secretary of the General Chemical Company, Chicago, is dead of asthma, aged 48.

—EUGENE P. BRAUN, for more than 30 years in the drug business in Mobile, Ala., is dead of paralysis. A daughter and four sons survive.

—SIMON J. HIVELEY, for many years Chicago manager of E. H. Sargent & Co., is dead after a long illness at Riverside, Ill. A widow survives.

—GABRIEL BEAKES DUNNING, of Newton, N. J., formerly in the retail drug business and for a long time Surrogate of Sussex County, is dead, aged 67.

—O. G. HUDSON, a prominent druggist of Springfield, Ill., died suddenly of heart disease recently while visiting in Lincoln. He was 34 years old and leaves a mother, brother and sister. He had two drug stores.

—JOHN T. HILLHOUSE, of New Haven, Conn., is dead of paralysis, aged 68. After serving in the Civil War he entered the drug business, opening a store in New Haven 27 years ago. A widow and two sons survive.

—DR. A. D. SCRUGGS, who died recently at his home in Knoxville, was born in 1842. He served in the Confederate Army and graduated from Jefferson Medical College, Philadelphia, in 1867. His son, D. H. Scruggs, was associated with him in the drug business at Sweetwater, Tenn., to which place he had soon expected to move his family. A widow and two daughters also survive.

### Arranging for the Trip to Los Angeles.

ST. LOUIS, May 3.—Dr. H. M. Whelpley, who is organizing the A.Ph.A. party from St. Louis for Los Angeles, is much encouraged over the number that are bespeaking accommodations. The St. Louis party will leave here over the Missouri Pacific and proceed by the Santa Fe route. The Eastern party is also going by the Santa Fe and Dr. Whelpley is now making an effort to get them to make their route via St. Louis so all will go on together. Otherwise there is the risk of not making connections at Kansas City.

### Graduates of 1894 Will Hold Reunions.

ST. LOUIS, May 1.—The St. Louis College of Pharmacy class of 1894 celebrated its 15th anniversary by a meeting of resident members during the 1909 commencement season and organizing with intent of holding annual reunions. The officers are Martin J. Noll, 925 Goddellow avenue, president; William Treitchler, first vice-president; Henry Klosterman, second vice-president; William Pilkington, secretary; Charles Stockhausen, treasurer. Mr. Noll is anxious to hear from all members of the class.

## NEW SUIT TO STOP CUTTING OF PRICES.

**Dr. Miles Medical Co. Starts Legal Proceedings in the U. S. Court Against a New Jersey Druggist.**

NEWARK, N. J., May 3.—Appearance has been entered on behalf of the defendant in the office of the clerk of the United States Circuit Court, in Trenton, in a suit brought by the Dr. Miles Medical Company, of Elkhart, Ind., against Charles W. Menk, a Market street druggist, to restrain the cutting of prices of certain proprietary medicines compounded by the complainant company. This proceeding will be followed, it is said, by a demurrer to the bill by Guild, Lum & Tamblin, counsel for the defendant. Notice has been given of a motion to apply for a temporary injunction in Trenton.

A similar suit tried in the Federal Court for the Eastern District of Kentucky, on a bill almost identical in material allegations with the one here, resulted in the granting of an injunction to prevent cutting prices, but on appeal to the United States Circuit Court of Appeals for the Sixth Circuit the decision was reversed. The case has since been carried to the United States Supreme Court, where it is yet pending.

The bill against Mr. Menk, filed by McDermott & Enright, of Jersey City, describes the system adopted by the complainant company "for the prevention of price-cutting and the consequent demoralization of its trade." Then it goes on to explain that "the object of its system of contracts, serial numbers, cards, and stamping is to identify and trace sales of its goods, control the sale and prevent price-cutting. The plaintiff claims this procedure is reasonable and lawful. The installation of the system, the company says, cost \$20,000, and does not affect other concerns. According to the bill, 400 jobbers and wholesalers and more than 25,000 retailers have signed the contract.

The bill asserts that the company is entitled to maintain its system and contracts and sales, and to prevent the marketing of its product except in conformity with its system. The defendant, according to the bill, has not signed the contract, but has obtained the remedies from agents, who have executed contracts and sells them at cut prices.

### Druggists Enjoy Shad Fishing.

PHILADELPHIA, May 1.—Such trifles as rain, snow and hail in no measure affected the enthusiasm with which a party of well known figures in the drug trade on Thursday last made the annual pilgrimage to the shad fishing ground at Bridesburg in response to a warm invitation from William H. Morrette, "the druggist" of Bridesburg. The latter, besides being an all-round good fellow, apparently is the commodore of the fishing fleet and a power generally in his community, and not only he and his wife contribute to the enjoyment of the visitors on these annual trips, but his friends and even Fred, Reitz, the policeman-sportsman of Bridesburg, help all they know how.

The party that made the trip on Thursday included Thomas H. Potts, secretary of the N.A.R.D., who was spending a few days at his home here; Nathan A. Cozens, secretary; George W. Fehr, treasurer, and David J. Reese, vice-president of the P.A.R.D.; William A. Carpenter, who as chairman of the membership committee of the latter organization, broke the long-distance record at the April meeting with 61 applications; William H. Sutton, of the executive committee; H. A. Kalbach, N. F. Weisner, H. H. Notter, Z. T. Wobensmith and L. H. Davis. Pinochle, a sail to Beverly, N. J., and a shuffleboard tournament in which Secretary Potts carried off the honors as usual, were followed by an elaborate shad dinner at the Morrette homestead, in which Mrs. Morrette demonstrated that she could prepare shad for the table just as well as her husband could catch them.

## CHICAGO BRANCH DISCUSSES N.F. REVISION.

**Pittsburg Branch's Protest Regarding Internal Revenue Interference With Druggists is Laid Over.**

CHICAGO, May 1.—At the April meeting of the Chicago Branch of the A.Ph.A. the programme consisted of a continuation of the discussion on the revision of the National Formulary, comprising preparations that should be omitted, criticism on the nomenclature and improvements in formulas. Professor Hallberg read a list of preparations that had been proposed for admission, including the following:

Carbasol, a general formula for the preparation of aseptic cotton, together with formula for such medications as are in common use; a similar formula for medicated cotton, also borated, mercurial, etc.; a general formula for preparing sterile solutions with especial reference to those intended for hypodermic use. The latter, it was thought, would be very desirable, since there are no directions in any of the textbooks or general works of reference to the pharmacist bearing on this subject.

With reference to the criticism that has appeared on the nomenclature of the N.F., the following principle, adopted at the last meeting to guide in the revision, was read:

That nomenclature, titles and synonyms should be in conformity with the U.S.P., or with modern ideas, should be descriptive of composition and that therapeutic or anatomical titles should be discouraged.

The recent criticism [see page 429 of this issue of the ERA] by Dr. Lyman F. Kebler, it was asserted, was of no great consequence, since in some instances, as in the case of compound anise powder, a synonym for anisated powder of rhubarb and magnesia, left the question of whether or not the oil of anise was as important medicinally as the other ingredients, because the synonym must often be retained for popular use, while the Latin title should be more carefully selected.

It is impracticable to avoid the use of therapeutic titles for some of the old-time remedies, such as cathartic pills and diarrhea mixtures.

How would it be possible, for example, to frame a descriptive title for anti-neuralgic pill of Brown-Séquard? Again in the case of compound powder of kino, while the mixture contains 5 per cent of opium, the opium is not named in the title, first because it is taken from the British Pharmacopoeia where it appears under this name, and secondly, it is not always policy to name a preparation containing opium, in writing prescriptions, for reasons that are not well known, but ethically sound.

It is believed that the nomenclature of the N.F. should be based on no absolutely hard-and-fast lines; that is, should be more flexible than that of the U.S.P., in which the titles should adhere as closely as possible to scientific terminology as well as orthography.

T. H. Potts suggested that the criticism on the N.F. nomenclature has been caused by the apparent violation of the Food and Drugs Act, which required that potent drugs should be named on the label.

Mr. Schaper suggested that a formula for liquor ammoniac anisatus is highly desirable, since it is extensively used.

T. C. Scheipe inquired why Burrow's solution did not appear as a synonym for liq. alumin acetatis, adding that he had received prescriptions for it under this name and had some difficulty in finding it.

Mr. Becker referred to the difficulty in making this solution in larger quantities, it being often called for by the gallon, for irrigating purposes, when Mr. Scheipe suggested that the old German method of preparation by interaction of lead-acetate and aluminum sulphate in solution in the cold, may be preferable.

Mr. Schaper, referring to the difficulties in the preparation

### Will Investigate Proprietaries.

L. E. WARREN.

of Hillsdale, Mich., chemist and later Food and Drug Inspector at Washington, whose appointment to investigate proprietaries for the Journal of the A.M.A. was recently announced in the Era.

## PATENTS, TRADE MARKS, ETC.

## PATENTS.

Granted April 27, 1909.

- 919,319—Amos Calleson, Brooklyn, N. Y., assignor of one-half to Benjamin Adriano, Brooklyn, N. Y. Bottling machine.  
 919,335—Emil Fischer, Berlin, Germany, assignor to Farbenfabriken vorm. Friedr. Bayer & Co., Elberfeld, Germany, a corporation of Germany. Magnesium salt of dibrophenic acid.  
 919,376—Elias G. Pearlman and Martin M. Pearlman, Philadelphia, Pa. Apparatus for recovering zinc compounds and ammonia.  
 919,406—Harley W. Warren, Cuyahoga Falls, Ohio. Surgeon's glove.  
 919,468—Edwin C. Royer, Colwyn, Pa. Bottle.  
 919,517—Max Anacker, Berlin, Germany, assignor to American Thermos Bottle Company, Rochester, N. Y. Double-walled bottle.  
 919,583—John D. Houck, Toledo, Ohio. Coffee percolator.  
 919,614—Christian W. Meinecke, Jersey City, N. J., assignor to Whitall Tatum Company, New York, N. Y., a corporation of New Jersey. Hot water or ice bag.  
 919,664—August V. Westerlund, New York, N. Y., assignor to Westerlund-Ludner Bottle Company, a corporation of New York. Non-refillable bottle.  
 919,666—Thomas J. Whelan, Hawthorn, near Melbourne, Victoria, Australia. Reversible label and address holder.  
 919,685—Milton B. Bionke, Chicago, Ill. Distilling apparatus.  
 919,750—Victor Perlezeich and Gustav Rosenbusch, Zurich, Switzerland. Solidified alcohol and process of making same.  
 919,762—Curt Philipp, Dresden, Germany, assignor to Chemische Fabrik von Heyden Aktienengesellschaft, Dresden, Germany. Process of producing isobornyl esters.  
 919,832—Henri Diamanti and Charles Lambert, Paris, France. Apparatus for recovering vapors from volatile liquids.  
 919,872—Charles P. Jenkins, Washington, D. C., assignor by mesne assignments to Single Service Package Corporation of America, a corporation of New Jersey. Cap for bottles.  
 919,987—The Crescent Oil Company, Minneapolis, Minn. Class 6. Petroleum jelly.  
 919,745—Practicum Syndicate, Ltd., Splotland, Cardiff, Wales. Class 6. A veterinary remedy for distemper in dogs.

919,945—D. R. Bradley & Son, Pleasantville and New York, N. Y. Class 6. Perfumes, toilet water, toilet powder, sachet and talc powder.

919,975—Prew Stranahan Hussy Company, Boston, Mass. Class 6. Disinfectants.

919,875—Gustavus C. Johnson, Dillon, S. C. Suspensatory.

919,918—Patrick J. McElroy, Cambridge, Mass., assignor of one-half to the Randall-Faichney Company, Boston, Mass., a corporation of Massachusetts. Syringe.

919,937—Henry A. Olsson, Brooklyn, N. Y., assignor to Multi-Seal Manufacturing Company, Brooklyn, N. Y., a corporation of New York. Bottle closure.

919,943—Peter J. Peterson, Oakland, Cal. Liquid measuring device.

919,987—Richard L. Williams, Birmingham, Ala. Bottle.

920,008—Albert Baumgarten, Freeport, Ill.; Johanna Baumgarten, executrix of said Albert Baumgarten, deceased. Cork puller.

920,048—Emery J. Godman, Jersey City, N. J., assignor to Sterling Seal Company, a corporation of Maine. Bottle-sealing machine.

920,068—John L. Kilvan, Boston, Mass. Combined cover and handle for milk bottles and the like.

## TRADE MARKS.

Published April 27, 1909.

34,635—Parker Chemical Company, Chicago, Ill. Class 6. A solid germicide or disinfecting composition.

35,905—Clas Julius Enebuske, New York, N. Y. Class 6. Antiseptic preparations for general use as a mouth wash.

36,617—Farbwerke vormals Meister Lucius & Brüning, Höchst-am-Main, Germany. Class 6. A medical compound particularly used for the treatment of diseases of the eye, nose, and ear, and in surgical operations to stop the flow of blood.

37,061—Milford Chemical Company, Milford, Del. Class 6. A preparation for the treatment of rheumatism, neuralgia, etc.

38,194—Erick A. Johnson, Duluth, Minn. Class 6. A liquid remedy for eczema and other diseases of the skin, a tonic and an ointment.

38,247—Crown Distilleries Company, San Francisco, Cal.; New York, N. Y., and Cincinnati, Ohio. Class 6. Wine having medicinal properties.

39,135—Wyeth Chemical Company, New York, N. Y. Class 6. A hair tonic.

39,765—Sarah Habbard, New Orleans, La. Class 6. A remedy for stomach troubles, Bright's disease, rheumatism, neuralgia, etc.

# BUSINESS RECORD

**Changes in Ownership, New Drug Stores, Incorporations, Fires and Other Commercial Matters of Interest to Wholesale and Retail Merchants.**

## Supplement to The Era Druggists' Directory.

**CALIFORNIA**—DIAMOND—Philip & Philip have opened a new drug store.  
LOS ANGELES—J. G. Vance has opened his new store at Eighth and Spring streets.  
MARYSVILLE—Charlotte Drug Store; destroyed by fire.  
SAN FRANCISCO—S. A. McDonnell & Son have moved from their temporary location, at 1630 Fillmore street, to the S. E. corner of Powell and Geary streets.  
**COLORADO**—DENVER—Neubert Drug Company, 16th and Champa streets; out of business.  
**GEORGIA**—UNION POINT—W. O. Flunker; store destroyed by fire.  
**IDAHO**—TETON CITY—The Dean Drug Company have opened a new store here.  
**ILLINOIS**—CHICAGO—J. S. Link, 649 West 21st street, has been succeeded by H. Stulik.—H. T. Oelrich, 141 31st street; deceased.—H. Sach's, 915 West North avenue, has been succeeded by Charles I. Powell.—Louis A. Schmid, 4800 Ashland avenue, has been succeeded by Lypski & Ruben. Mr. Schmid has opened a new store at 844 South Halsted street.—F. E. Stolze has opened a new store at 1951 North Robey street.  
OAK PARK—J. S. Link has opened a new store at 6801 West 12th street.  
PALESTINE—W. M. DeLay; store damaged by fire.  
ST. LIBORY—Dr. A. M. Kohl has opened a new store here.  
**INDIANA**—COALMONT—Miller Drug Company has been succeeded by the Co-operative Drug Company.  
OTTERBEIN—Burns & Davis Drug Co., incorporated; capital, \$10,000. Wholesale and retail.  
PARKER—Dr. Dedrick has opened a new drug store here.  
WHITING—Whiting Drug Company have been succeeded by B. N. Boyer & Co.  
**IOWA**—COUNCIL BLUFFS—Schaefer Cut Price Drug Store, 231 Main street, has been succeeded by William Knuth.  
MARSHALLTOWN—Alexander Drug Company have been succeeded by Beunert Drug Company.  
OSAGE—Samson & Sanders have been succeeded by W. B. Lamberson & Co.  
**MICHIGAN**—ALPENA—Ware Drug Store has been succeeded by Foley & Stepler.  
CENTERVILLE—F. E. Lehr has been succeeded by Roy D. Lehr.  
SOUTH RANGE—L. A. Lundahl has been succeeded by Dr. Anderson.  
**MINNESOTA**—CHISHOLM—F. H. Gillie has opened a drug store, corner of Lake street and First avenue.  
VERDALE—W. M. Morrell; store destroyed by fire.  
**NEW HAMPSHIRE**—LACONIA—Clarence W. Plummer Company, incorporated; capital stock, \$2700.  
NEWPORT—The Willey Pharmacy will be succeeded by Weeks & Seward, of Exeter, N. H.  
**NEW JERSEY**—BERNARDSVILLE—George W. Burns, incorporated as the Somerset Pharmacy; capital, \$10,000.  
VINLAND—Baker House Pharmacy, incorporated. Joseph G. Morris, president and treasurer.  
**NEW YORK**—BROOKLYN—B. H. Mark, \$302 Third avenue, has moved his stock of drugs to 9201 Fifth avenue.  
HAYNES FALLS—Karl E. Hahn has opened a new drug store.  
MARLBOROUGH—C. S. McConrt has opened a new drug store.  
**NORTH DAKOTA**—BISMARCK—Boardsley & Finney have dissolved partnership. Bert Finney, buying his partner's interest, will continue the business as Finney's Drug Store.  
DEVIL'S LAKE—B. J. Ness will open his new drug store here May 1.  
**OHIO**—OXFORD—Clifford Brown has opened a new drug store here.  
WILMINGTON—J. J. Parker has bought the Charles Halker

stock of drugs at this town and moved it to Lynchburg, where he will open a store.  
**PENNSYLVANIA**—WASHINGTON—The City Drug Store and H. W. De Normandie have combined their stocks at 157 and 159 South Main street. Style of firm will be De Normandie Drug Store.  
**RHODE ISLAND**—WOOSOCKET—F. B. Simmons has been succeeded by H. W. Hanson.  
**SOUTH DAKOTA**—PIERRE—Black Hawk Drug Company have been succeeded by F. L. Vilas.  
**TEXAS**—HARWOOD—Dr. L. G. Dexter; store destroyed by fire.  
MIDLAND—Midland Drug Company and Taylor Drug Company; stores destroyed by fire.  
STRAWN—Perry-Walker Drug Company, incorporated; capital stock, \$5000.  
**UTAH**—SPANISH FORKS—City Drug Store; style of firm changed to City Drug Company.  
**VIRGINIA**—ALEXANDRIA—Ebbitt House Pharmacy, incorporated; capital stock, \$6000. Charles O. Rice, proprietor.  
**NORFOLK**—The Strole Drug Company, incorporated, are now opening in their new store, corner of Granby and Charlotte streets.  
**WISCONSIN**—BROWNSTOWN—C. A. Allen has been succeeded by S. C. Holland.  
FOND DU LAC—E. E. Drake has opened a new drug store in the new Forest Avenue Hotel.  
KAUKAUNA—William C. Wendt has been succeeded by the Pomberton Drug Company.  
MADISON—The Luckey Pharmacy is the style of the new drug store in the Trumpf Hotel Building. C. C. Luckey, proprietor.  
MEXASIA—The Barnett Drug Company is the style of the new drug store here.

## Price Schedule Adopted by St. Louis Association.

ST. LOUIS, May 1.—The April meeting of the St.L.R.D.A. was given over to consideration of a price schedule, which was adopted after much discussion. The prices named are 23, 47 and 89 cents. The schedule has previously been considered by the sectional city associations and also by the downtown men in conference with the price committee of the general association, but that did not prevent a lively discussion which extended into three hours. The new feature of the list is the leaving of several articles on an "open list" which can be used as feelers by those who care to. No territorial lines are drawn in this list. The idea met with much favor after it had been thoroughly considered.

## Local Option Litigation Proves Costly.

PAW PAW, Mich., May 1.—Charles H. Van Alstyne, a South Haven druggist, who, it is alleged, tried to evade the local option law in Van Euren County, is in a heap of trouble as a result. The Supreme Court recently affirmed a judgment for \$750 obtained against him and the sheriff has just collected the amount on an execution, with an additional \$150 for costs. Two other damage suits are pending against Mr. Van Alstyne for the alleged illegal sale of liquor. One of the plaintiffs, Mrs. Bertha Kashiske, asks \$10,000. She says the druggist illegally sold whisky to her husband.

## Successful Opening of Fine Long Island Pharmacy.

The Raeder Pharmacy in the White Building, Cedarhurst, Long Island, which was recently opened is one of the finest on the island. On the opening day the store was so crowded that it was difficult to obtain entrance and secure a plate of ice cream, which was served "on the house" to every customer, besides numerous varied souvenirs. A feature was the giving of three prizes, of an aggregate value of \$15. E. M. Raeder is the proprietor and W. B. Meyers is manager of the new store. Mr. Raeder also owns a store at Lawrence.

## Aguinaldo's Neighbor Visiting New Bedford.

BOSTON, May 1.—Hon. William J. Bullock, mayor of New Bedford and one of the best-known druggists in the State, is entertaining this week his nephew, George Whiting, supervisor of the Munoz Agricultural School in Neuva Ecija, Philippine Islands. The mayor's guest has been the recipient of much attention, because for many months he was next-door neighbor to Aguinaldo.

# THE PHARMACEUTICAL ERA

PUBLISHED EVERY THURSDAY

VOL. XLI.

NEW YORK, MAY 13, 1909

No. 19

D. O. HAYNES & CO. - Publishers

90 WILLIAM STREET, NEW YORK

Telephone, 2457 John.

Cable Address: "Era, New York."

Western Office:

Room 500, Dickie Building, 40 Dearborn St., Chicago

Telephone, Central 5888

## SUBSCRIPTION RATES.

United States, Cuba, Hawaii, Porto Rico, the

Philippines, and Mexico

..... \$2.50 a Year

To Canada, postpaid

..... 3.00 a Year

To Foreign Countries in Postal Union

..... 4.00 a Year

Single Copies ..... 10 Cents.

ALL SUBSCRIPTIONS ARE PAYABLE STRICTLY IN ADVANCE

Published every Thursday at 90 William Street, Borough of Manhattan, New York, by D. O. Haynes & Co., a corporation; President and treasurer, David O. Haynes; vice-president, Ezra J. Kennedy; secretary, Edward W. Drew. The address of the officers is the office of this publication, and the title is registered in the United States Patent Office.

Entered at the New York Post-Office as Second Class Matter

## Re Photographs for "Era Album"

### Illustrated Section

Each subscriber to The Pharmaceutical Era is entitled to representation in this work, and is invited to send us his photograph. We do not require a subscription from each partner and clerk. If the firm or proprietor is a subscriber, the other partners and clerks may have their portraits included for \$1.50 each. To secure all of the Album sections one must be a subscriber to The Era in his own name.

In sending photographs be sure that each one is distinctly labeled with the name, address, business, profession or occupation of the person, written clearly on the back of your photograph. A good plan is to write it on a printed label and stick it on the center of the back of your photograph. Here is a good specimen:

#### FOR ERA ALBUM.

Fred S. Rogers, Middletown, N. Y.

McDonaghe & Rogers,

Ex-Pres. N. Y. State Phar. Assn.

When additional photographs of partners and clerks are sent, each one should have written on it the name of the subscriber who sends it, as well as the name of the person in the photograph.

### Cabinet Photographs Only

The style of photograph we require is the so-called "cabinet" size, with the head about two inches long. If other sizes are furnished they interfere with our plans for keeping the files uniform, also prevent us from classifying the cuts by localities.

In view of the great amount of work we are assuming, to have each of our subscribers properly represented in this Album, we feel that we are not asking too much when we request each subscriber to supply us with the size and kind of a photograph which will facilitate our work and best enable us to do him credit.

In forwarding photographs for the Album, see that they are distinctly addressed as follows:

THE PHARMACEUTICAL ERA,

For Era Album

90 WILLIAM ST., NEW YORK.

## PROBLEMS FOR THE PROPRIETORS.

Four days instead of the usual two days will be required this year to transact the business of the Proprietary Association of America which is in session this week in New York City. The meeting is more important than many of its predecessors and naturally there is a good attendance, for the subjects before the association are of more vital moment than any of recent years with the exception of the occasion of the enactment of the Pure Drugs Act of 1906. In fact some of the present time problems are more or less sequels to the placing of that law upon the Federal statute books.

Objectionable legislation is constantly being presented to legislatures for consideration and is urged by doctors and some newspapers. One of the serious menaces is the tendency to try to forbid by law the publication of patent medicine advertisements in the newspapers. Minnesota already prohibits the publication of advertisements of certain kinds of medical goods and some newspapers in other States do not now accept advertisements of proprietary remedies. This tendency towards restriction of publicity will no doubt receive serious attention and further plans to fight it will doubtless be formulated. The great mass of the people are not ready for the official banishment of ready-made panaceas for their ills.

## TOBACCO TRUST'S NEW MOVE.

Two events of interest to druggists in connection with the cigar side-line are reported in our news columns. One of the most interesting is the announcement that one of the largest of the prominent chains of drug stores has decided to abandon the sale of all kinds of tobacco and use the space for lines closer to the drug trade and more productive of profit. The managers are thoroughly practical business men and their example will set other drug store owners to thinking.

The other event recalls the attempts of the Tobacco Trust to invade the drug trade three years ago, for methods were then threatened which are similar to those now being put into operation in New York by a subsidiary concern of the octopops. This time newsdealers who do not sell Trust cigars are the objects of attack and no concealment is made of the intention to force them to stop selling anti-trust goods. The newsdealers are well organized and the fight will be a hot and bitter one.

## TALK IS NOT ALWAYS CHEAP.

Congress is demonstrating in the slow progress being made with tariff tinkering that the old saw

"talk is cheap" is not always true, for the situation at Washington is keeping the importers and other merchants affected upon pins and needles of uncertainty and causing serious losses to many of them. The debates only further add to the uncertainty and the newspaper reports from day to day present a panorama of legislative see-sawing that causes everybody to wish it was all over. Some business men realize the predicament of the prisoner who said that he might as well be hanged as scared to death every other day.

Aside from the tariff uncertainty there are disturbing reports regarding the possible imposition of inheritance, income and other taxes to make up for any deficiency in the tariff schedules as finally adopted. Some of the States already have inheritance taxes and with a Federal tax added only the rich would have much of anything left of bequests which might be made to them. An income tax also would operate to the disadvantage of people in the middle class and in the poorer walks of life. They would have to pay not only their own taxes, but indirectly the taxes of the rich would come from the same sources. The lawmakers at Washington should discard theory and work along practical lines, giving all the chance to enjoy citizenship upon terms and conditions of comparative equality.

#### CLEARING A BROOKLYN MYSTERY!

The cat is out of the bag in Brooklyn and in our news pages will be found something about the new "associations" which have sprung into existence in that borough of New York City to fight against pharmacy reform in the shape of the Brown All-State Bill. The members appear to have gotten together because they did not like the old associations and felt in need of "protection" against the machinations of the Board of Pharmacy. The wonder is that none of the hundreds of members of the regularly established associations, or of the State Pharmaceutical Association, have ever found it necessary to split away from these societies in order to obtain "protection." However that may be, we now know something about the authorship of the furious attacks upon the bill which doubles the penalty for violating the law relating to the sale of impure and adulterated drugs.

These new associations change their names so often that it may be difficult to keep track of them, but in the case of the association which is conducted with so much secrecy that even the names of its members are withheld there would seem to be occasion for further investigation.

#### REORGANIZATION OF THE IOWA COMMISSION.

That the Iowa Pharmacy Commission was in need of drastic reorganization was made evident by the bills which were presented for payment for services which it is claimed were never given to the State, besides an indulgence in the activities of practical politics which caused the newspapers to comment on the "flying squadrons" of the pharmacy commission which helped to make nominations for public office and decide elections. The new commission has been

appointed to enforce the pharmacy law, not to manage political campaigns, and we believe that under the careful and conscientious leadership of the new president, Harry E. Eaton, that result will be accomplished.

The change for the better is due in a large measure to Mr. Eaton, who, when he was appointed to a vacancy a few months ago, declined to be a party to the old spoils system and set about doing his duty as it should be done. He is entitled to credit for the course he has pursued and with a continuance thereof the Iowa Pharmacy Commission will be rehabilitated in the public esteem as a body of professional men working solely for the betterment of pharmacy and of the public.

#### DEDICATING THE EBERT MONUMENT.

An event of National interest will be the dedication on May 21 of the monument in Graceland Cemetery, Chicago, to the memory of the late Albert E. Ebert. No finer tribute could be given to this "Grand Old Man of American Pharmacy" than the observance which is planned for the formal presentation of this memorial by the Chicago Veteran Druggists' Association to the estate of the departed pharmacist.

Friends of distinction, including officials high in the American Pharmaceutical Association and other bodies representing the best that there is in pharmacy, deans of pharmaceutical institutions and others will take more than passive interest in the ceremonies, while the general body of those who are expected to attend will form an assemblage without precedent of its kind in this or any other country. But better than any monument, better than the best of the oral tributes, or the shaft of stone, is the shining example which the distinguished leader set by his life for the emulation of all followers in his footsteps.

#### REMEMBER THE 19TH OF MAY.

Pharmacists in New York City should bear in mind the date for the joint meeting of pharmacists and physicians which will be held on the evening of May 19 at the Academy of Medicine in Manhattan Borough under the auspices of the New York Branch of the American Pharmaceutical Association and of the New York County Medical Society.

A similar meeting a year ago was productive of a great deal of good in the way of a better understanding between the practitioners of the two professions and the meeting next Wednesday night promises to be of even more interest and importance. There should be no vacant seats.

#### TWO COMMENCEMENTS THIS EVENING.

Two of the most interesting events in the educational circles of pharmacy in the metropolitan district will occur simultaneously, but in different boroughs of this city, tonight. Large classes will receive their diplomas from both the New York College of Pharmacy of Columbia University and the Brooklyn College of Pharmacy. Interesting programmes

have been prepared and the attendance at each event will be large and appreciative.

Both institutions have won reputations for the thoroughness with which instruction is imparted to their students and the graduation of each new class is reason for congratulating the members of the faculties, as well as the fortunate young persons who have had the benefit of the tuition given in these schools.

Active work continues on the part of the membership committee of the New York State Pharmaceutical Association and the result ought to be apparent in a much longer muster-roll at Richfield Springs on June 22. The committee is sending out letters to non-members, pointing out the advantages of affiliating with the association. As a matter of direct, personal benefit no pharmacist can afford to remain outside of the State association. The dues in New York are only 82. The same statement applies to all pharmacists in all of the States, without reference to whatever may be charged for dues.

Few boards of pharmacy, even some that have been dominated too much by political leaders, have been able to pile up such an unpleasant record as has been left behind by the Iowa State Pharmacy Commission of 1908, and in some respects no board has ever come anywhere near approaching it. A culmination came when one of the commissioners last year deserted his wife and family and fled from the State. It was then that Governor Carroll became aroused and made an investigation which resulted in his request for the resignation of two other members.

In filling the place of the missing druggist on the commission the Governor brought out of private life a man who has played a conspicuous part in the reorganization of the commission and who in the coming struggle for the respect of the citizens has been made the leader. This pharmacist, Harry E. Eaton, first went into the board last December and began by declining to participate in what has been characterized as the "grafting" of some of his predecessors. His ideas of enforcing the pharmacy laws and serving the State were different from those of others and he naturally attracted attention by his conformance to the general notions of the proprietaries.

When Governor Carroll realized the real condition of affairs he promptly demanded the resignations and finally obtained legislation which gave to Iowa this month a new commission. Mr. Eaton was renamed as one of the members and at the organization was made the president. That both the new head and the other members of the commission have a serious task confronting them in re-establishing the commission's standing is undisputed, but the Governor has confidence not only in their ability to run the affairs of the board in a business-like manner, but he has faith in their personal and moral integrity.

President Eaton is a druggist of experience and has an excellent reputation as a business man. His first experience in the drug trade was in 1888 when he served as a clerk in Essex, Iowa. In the following year he entered the State University at Iowa City, where he continued until the spring of 1892, when he received the degree of Ph.G. In the fall of that year Mr. Eaton went to Denver, Colo., where in company with Dr. Moore, he established a new drug store at 17th and Downing streets. In the spring of 1893 he sold his interest to his partner and returned to Essex, Iowa, where he clerked for two years, until in 1895 he again embarked in business for himself, forming the company of Quist & Eaton, which continued for 12 years. A year ago Mr. Eaton left the drug business, except for occasional temporary service, to become connected with the Henry Field Seed Company, of Shenandoah, a position which his business qualifications fitted him

for and which has been less arduous than the constant application required in a drug store.

Mr. Eaton has made a great many friends and they look upon his choice as head of the pharmacy commission to be an opportunity which he will embrace to further demonstrate his belief that citizenship entails its obligations of faithful public service, as well as the enjoyment of the benefits to be derived from an honest and conscientious administration of those duties by others.

More than 53,000,000 gallons of creosote and nearly 19,000,000 pounds of zinc chloride were used in preserving timber in the United States last year. Small quantities of crude oil, corrosive sublimate, and other chemicals were also used. These figures are based upon reports to the United States Forest Service of 44 firms which operated 64 timber treating plants. Assuming that on an average one gallon of creosote, or one-third of a pound of zinc chloride, will protect a cubic foot of timber from decay, more than 100,000,000 cubic feet of creosotes, pills, poles, mine, and other timbers were given a treatment that will greatly increase their life and usefulness.

Never since timber treating began on a commercial scale in the United States has the domestic supply of creosote been equal to the needs of the industry. With the rapid development of wood preservation in recent years, the insufficiency of the home production of creosote has become more marked. In 1908 almost seven-tenths—to be exact, 69 per cent—of the creosote used by the treating plants was imported, and but 31 per cent was obtained from domestic sources.

Nearly three-fourths of the imported creosote comes from England and Germany, some is obtained in Nova Scotia, and some in Scotland and Holland. The domestic creosote used by the treating plants was obtained chiefly in New York, Philadelphia and other large cities. Creosote is distilled from coal-tar a by-product in the manufacture of illuminating gas and coke from bituminous coal. Not more than 20 per cent of the coke used in the United States is made in by-product ovens. No coal-tar is recovered from the bee-hive ovens in which most of the coke is made; consequently the total production of coal-tar is far less than it would be with more conservative operations.

In the British Navy mice are employed as signalling agents on submarine boats. If any leakage of naphtha occurs in hidden sections of the boat the mice give warning by incessant squeaks, to signalize the presence of the odor which they so greatly dislike, says the *Boston Globe*. An allowance is actually made for the maintenance of mice, who have the honor of being carried on King Edward's naval list and of increasing the admiralty estimates.

One year has elapsed since Surgeon B. L. Wright, U.S.N., treated the first case of tuberculosis at the naval hospital at Las Animas, Colo., with the mercury treatment, the surgeon's own discovery. During that time statistics of the hospital show that of those cases where marked improvement was noted 100 per cent took the mercury treatment, and none took routine treatment solely. Of the fatal cases, 31 per cent took the mercurial treatment and 68 per cent took the routine treatment only. From this favorable showing Surgeon Wright has recommended that mercury be adopted as the regular treatment for tuberculosis at Las Animas, making it compulsory at the discretion of the hospital staff. Of the 127 tuberculosis patients at the hospital at present, 92 are voluntarily taking the mercurial treatment.

German Apothecaries' Society, in voting \$50 towards the expenses of the forthcoming meeting of the New York State Pharmaceutical Association at Richfield Springs, follows the new custom which promotes the proprietaries by making the State association independent of contributions from those with

HARRY E. EATON, of Shenandoah, Pres. Iowa State Pharm. Commission.

whom the members should deal only as individual business men. No association should be dependent upon advertisements or contributions from wholesale dealers in drugs, or manufacturers, for the expenses attending their annual or other conventions.

The annual husband fair of Europe will be held this year, May 31, at Ecaussine-Lalain in Belgium. Special trains will be run from Paris and from all the chief towns of Flanders and Wallonia. The unmarried girls of the pleasant little Belgium town invite bachelors from the world over to be their guests that day.

According to the programme, the bachelors will muster at the railroad station at 2 o'clock in the afternoon and march to the town hall, where they will be received by the maids of Ecaussine. There will be speeches of welcome by an unmarried girl or two and mutual introductions. Then luncheon—champagne and Hainault cakes and other good things. Concerts, open air balls, fireworks fill the long evening programme.

This husband fair has become one of the "sights" of Europe. Numerous American parties have already been made up and will motor to Ecaussine in time for the fair. Candidates to matrimony come from England, Germany, Italy, Holland and even from Australia.

The president this year is Mlle. Victorine Cœcke, a chestnut-haired beauty of twenty. She has mustered a phalanx of 30 young girls, all ready to be wooed and won.

A truly successful man not only acknowledges the success of his rivals; he also concedes his obligations to them as his instructors.

The Paris police have a prisoner in custody of whose guilt there is no question, but it will probably trouble the court to decide what to do with him, says the *Utica Press*. Miguel Androval, an acrobat attached to a traveling circus, called at a large establishment and asked to be shown some jewelry. While he was examining the goods the store detective observed the head of a tiny monkey emerge from Androval's coat pocket. Then the monkey's paw shot out and while the salesman's attention was diverted the animal seized several valuable rings and withdrew to its hiding place. Androval was arrested, but he protests that he did not steal the rings, and there is no legal evidence that he was concerned in the theft. Tests made after the arrest proved the monkey to be an accomplished pickpocket and shoplifter.

Clerks should beware of employers who overlook faults to save the trouble of correcting them.

Some of the most eminent physicians of England, including those of the King, have agreed to make a very severe test of what the discoverer, William Doig, claims to be a cure for tuberculosis. For ten years past Mr. Doig has been treating free of charge persons suffering from tuberculosis of the joints, and, according to the evidence of various hospital physicians, he has had considerable success.

Last year he tried his treatment on a patient suffering from tuberculosis of the lungs under the observation of a well-known London physician. This case has been certified as cured, a fact that had much to do with making the thorough test as planned. It has been decided to take six consumption cases from the London hospitals and allow Mr. Doig to treat them under the closest observation.

The Doig treatment consists of drawing the disease from the lungs to the surface. A radius of inflammation is set up from the surface of the skin to the lungs by means of chemical heat. The pus travels to the surface through this ray, which is kept open and all the pus is drawn out until the lung is clear.

Her Friend—I don't see how you can appear in such a costume.

Burlesque Favorite—It's very easy unless you happen to be lame. All you have to do is to walk from the dressing room to the stage.

Progress has been made in the manufacture of paints and varnish, and the high grade quality manufactured in this country stands second to none, says the *Detroit Free Press*. An idea of the proportions of this industry may be seen when

it is remarked that the business of several Detroit manufacturers amounts to very large sums each year.

Sixty years ago painters ground their own white lead and made their own putty. One machine these days turns out more putty of a better and more even grade than all the hands of all the painters and carpenters then. Formerly, when painters ground their own colors a stone slab and muller formed the entire apparatus, but now, when grinding has become a separate industry, efficient machinery has been devised for grinding and its collateral operations.

Everything is being manufactured for the consumer's use and comfort. Formerly the carpenter had to prepare his own wax and his stains for the wax floors. Today he is shown blocks of wood at the paint store finished in different styles. He can buy materials to duplicate the effects.

So has the artist been assisted. In the old days he had to make his own canvas. When colors were first put up they were dealt out to him in a little bladder. The artist would prick a hole in the skin, squeeze out the required amount of paint and tie up the end of the receptacle with a string. Now he is provided with collapsible tubes.

The manufacture of paint has happily become modernized and the grade infinitely improved. The selling price is cheaper for the quality involved than ever in the history of the industry.

"Why does she look so downcast?"

"Her son-in-law has lost his hearing."

Dr. Margaret Buchanan, of London, is trying to interest women in Europe and America in pharmacy, holding that it is one of the most congenial and remunerative occupations open to them. Dr. Buchanan is president of the British Association of Women Pharmacists, and she says all experience shows that women are peculiarly fitted for prescription work. She invites women to the work in a long article, which ends as follows: "The handling of drugs, known perhaps 1500 years B. C., which formed part of the holy oil of the high priest, or of the embalming spices of the Egyptians, is a link with ages long past which has its imaginative spur to all women. Other drugs are reminders of the warm air of the West Indies and of the memory of those plucky explorers of the New World; and possibly we are handling at the same time the newest thing in serums or toxins, or called on to dilute and dispense some substance measured by minute fractions. The human interest, too, is large and varied, and the woman would be dull and unsympathetic who would not distil therefrom some sweetness for herself."

No oil painting can be hung where it will receive the proper natural light at all times. It is the same with human nature. To study it successfully we must view it from various points at different times.

"Bertie says he has even his hats made to order."

"Has to, I suppose, to get one large enough."

A Hartford physician praises alcohol as electricity's commercial rival. There is a vast amount of hard work ahead for the inventors before electricians will take to alcohol to any extent.

Stout—How did Fox get the reputation of being such a profound thinker?

Slim—By talking on subjects that nobody understands and thereby avoiding the chance of having his arguments definitely refuted.

The drug business may be compared to a wheel of which ideas represent the hub, actions the spokes, results the rim and profits the tire. Each part must be so used as to contribute to the strength of the whole.

Reggy—She treated me just awful, doncher know. She hasn't a good word to throw at a dog.

Peggy—Don't anticipate, Reggy; you are not a dog yet.

Irate Citizen—I am going to kill you, sir, for calling me a liar.

Western Editor (calmly)—That won't change my opinion at all.

# The Magician's Wand.

By Emma Gary Wallace.

It was a dubious looking assortment. The stock-room had not had such a going-over in years, and it wouldn't have had it now, if the Woman Clerk had not felt in her veins the restless stirring of those house-cleaning germs peculiar to the eternal feminine.

Rows of well-ordered shining shelves marked the advance of the three workers. There had been some undertone crumbling at first, but the Woman Clerk was so radiantly happy that her two assistants gradually became infected with the same spirit and forgot to joke stupidly about the warpath and its lustless trail. Then, too, the crowded shelves and cluttered closets suddenly became roomy and self-respecting as the reeding continued. It was plain that the work could not be rusted to incompetent hands that would disarrange the stock hopelessly.

Again and again the Woman Clerk paused reflectively by the long table loaded with an increasing pile of goods of most doubtful salability.

## Money Tied Up in Unsalables.

"That stuff represents a lot of money," the Proprietor remarked, as he came in and viewed the collection, "and the worst of it is, it has been tied up anywhere from twelve months to twelve years."

"What do you think best to do with it?" the lady addressed anxiously.

"Oh, it is entirely hopeless for the most part," he replied, "nothing short of a magician's wand would turn some of those odds into money. Part of the articles might be sold, if they were displayed long enough and almost given away, but it is a question if the amount they would bring would equal the expense it would entail. It would be like some of the prize receipts in the cookery columns where fifty cents worth of good material is spoiled to use up five cents worth of left-overs. I now for I've been practiced on," and with a chuckle at the collection he hurried out.

The Woman Clerk looked worried. There was a good deal of truth in what she had just heard, and yet here were hair brushes of substantial make but unattractive appearance; oil combs of a peculiar, speckled color which had not proved at all salable; ends and odds of lines of soaps with soiled wrappers—one lot had been badly spotted by the breaking of a bottle of some dark brown liquid; talcum powder in old-fashioned ugly boxes; almost an entire purchase of complexion brushes fearfully and wonderfully made which no one ever had the courage to try; half a case of nursing bottles of shape no longer popular; a motley collection of rubber, and rubber goods fittings; goods that were unseasonable and never could be seasonable again; several dozen packages of an infant food for which the call had suddenly ceased, etc., etc.

## Left-overs Furnish Food for Thought.

Most of the assortment was in reality as serviceable as ever, and by removing soiled wrappers and freshening them up generally could be made a little more attractive. The Woman Clerk estimated that the furnishings of that table represented an original outlay of not less than three hundred dollars. She vent home that night and gave the subject of those store left-overs most careful thought.

It surely was not too much to expect that goods of the character of those under observation might have been turned over three times a year. If the entire lot represented a tie-up of three hundred dollars for a time average of six years, together with the loss of profits to be derived from turning the stock over eighteen times, it was evident that the longer it was allowed to lie fallow the greater must be the sacrifice. Better, then, to release what portion of the investment was possible and set it to work again, than to allow it to continue building up additional losses.

Valuable space could not be given up very long to such a

collection; clearly the only way to dispose of the goods to any advantage was by a Sale. The Woman Clerk had always contended that a Sale of any kind must have a logical excuse for taking place or the public will take no stock in it at all. That if a merchant with an article readily salable for one dollar offers it for fifty cents the people will scoff at his supposed philanthropy, but on the other hand, if they are shown some good reason why he is willing or compelled to sacrifice because of a fortunate purchase or fire or water or too heavy a stock or by reason of being hard pushed for money, then those same people are ready to fall over each other to share in the benefit forced upon them by a kind (?) providence.

## Finding a Good Excuse for the Sale.

No better reason for this sale could be found than a simple statement of fact. If the Proprietor was willing it should be a

SPRING CLEARANCE SALE  
OF STOCK-ROOM  
ENDS AND ODDS AND BROKEN LINES

The next and most difficult part would be to get people interested. Here the Woman Clerk longed to try an experiment. She had always noticed that ninety-nine people out of every hundred were simply unable to resist the appeal of a free cash value.

She remembered the time a noted revivalist had come to the city and in spite of fame, eloquence and personal magnetism was unable to attract other than audiences of insignificant size. He decided to employ the method of admitting by ticket only. The seating capacity of the hall in which he spoke was five thousand. He advertised to give free tickets to the first five thousand who would apply for them for each service. No others were to be admitted. People who had not dreamed of going before hurried downtown to be among the lucky number, and if events turned so that they could not go they almost invariably gave them to some one who could and urged their use. For the remainder of his stay the revivalist spoke to full houses. The advertising schemes employing coupons with a cash value when accompanying an order are eagerly snapped up for the same reason. Perhaps, the Woman Clerk reasoned, this fondness on the part of the public to get something for nothing, or to take advantage of a free cash value could be used to dispose of those goods to everybody's satisfaction.

The next morning she was at the store early and when the Proprietor arrived she was ready to lay her plan before him.

"It has to do with those Clean-Ups, I'll wager," he declared with a smile.

"It certainly has," she responded with animation. "This is my plan. We'll use dodgers. I know the dodger is in ill-repute, but that is because of the poor quality of paper and work usually employed and the careless manner in which they are distributed. We are in a residential neighborhood and if dodgers were well printed on fairly good paper and placed in addressed sealed envelopes and put in the house letter-boxes, they would bring results. My plan is to list part of the goods to be cleared up, such as brushes, sponges, disinfectants, soaps, etc., at a fair retail price. At the bottom of each dodger there will be three coupons printed, having a cash value of twenty-five cents, fifty cents and one dollar, respectively.

## Means Bargains at Half the Usual Price.

"Each coupon is to be accepted as half payment on a purchase of twice the amount. Coupons to be presented at time of sale. The rest of the printed matter will set forth attractively and briefly the opportunity to make assortments of household necessities at half price."

"Do you know that the Sunshine Pharmacy has a window full of such goods at the present time?" the Proprietor inquired.

"I believe our idea is a winner," the Woman Clerk remarked confidently. "People having those coupons will pass that store to come here to use them."

"All right, go ahead," the Proprietor answered; "we'll test the idea. It will not cost a great deal. I heard my sixteen-year-old daughter longing for some way to earn some money this morning. I'll give her the job of addressing the envelopes."

The Woman Clerk went straight to work. She prepared the subject matter for the dodger with as much care as if it

were a bit of high-class advertising. Superfluities were cut out, nothing was misrepresented, and yet there was a direct appeal to the imagination of the buyer. The copy was approved and sent to the printer with the instruction not to sacrifice appearance for speed.

Her next care was the window. In the center she stood an old-fashioned clock. From a calendar were cut the names of the twelve months, plainly printed. Beginning with one o'clock the strip bearing the word January was pasted over the Roman numeral one, and so on until the names of the months took the place of the hours. On the glass door below the face were the words:

Necessary Articles for Every Month  
in the Year, CUT in TWO in PRICE.

And beneath that was a dollar bill cleanly cut in half and each part fastened lightly to the glass by one corner with label paste. Of course later this bill could be joined with transparent mending paper or stage money might have been used.

Two large sign-cards duplicated the dodger and in the enlarged coupons of each were fastened a bright silver quarter, a new half dollar and a crisp one-dollar bill. The rest of the window was given up to displaying the most salable of the goods to be disposed of at this time.

#### Experiment Proves a Great Success.

The Sale was to commence on the day following the distribution of the dodgers and to last three days only, whether the goods were sold or not. People began to come at eight in the morning, by ten the store was comfortably filled and assortments were made to bring purchases up to amounts sufficient to take advantage of the coupons. When the Woman Clerk got away to dinner about an hour and a half late, she left the store still well filled and she was interested to note that the Sunshine Pharmacy was anxiously devoting its entire energies to a single customer. When she returned an hour later a huge sign in their window announced "Sweeping Reductions on These Goods." There was not a soul in sight.

It was not so in the store to which she returned, for people were still buying. By night the goods in the window had to be used to piece out assortments and next day the stock-room was hastily searched for more "unsalables." People simply could not resist those free cash values. Many who had never been in the store before, came bringing the dodger choicely with them. Before noon the next day the entire lot was closed out. People had recognized two things, first a genuine reason for a Sale and second an element of value in the coupon itself; a count of the coupons returned proved this. There was no doubt that their use had increased the amount of the individual purchases. The returns of the Sale were entirely satisfactory considering what had appeared to be almost a dead loss. A very fair percentage of the original investment was released to be used as prudence dictated.

The Woman Clerk was pleased. She had put her idea to the test, and had proved to her own satisfaction that a knowledge of human nature may be a very practical magician's wand.

### ERA COURSE IN PHARMACY.

#### Graduates May, 1909.

Matriculation No.	Examination Grade, p. c.
5595. Chas. D. Myers, Three Oaks, Michigan.....	96
5679. Ray E. Kline, Springfield, Vermont.....	98
5719. Elmer J. McGuire, Kansas City, Missouri.....	98
5826. Edith Weller, Tacoma, Washington.....	98
5893. James W. Little, Clinton, Kentucky.....	96
5828. Amelia Sonnenberg, Baltimore, Maryland.....	95
5840. Sister M. Carmelita, Niagara Falls, N. Y.....	98
5841. Sister M. Regis, Niagara Falls, N. Y.....	98
5876. Samuel A. Wilson, Baltimore, Maryland.....	98

The above graduates will receive diplomas within a short time. A large and very handsomely engraved diploma, printed on artificial parchment, with the graduate's name engrossed, especially suited for framing, will be furnished to all those who request it for the sum of \$2. Those desiring the latter should forward the necessary fee to THE PHARMACEUTICAL ERA.

### 'Fraid Cat!

By Joel Blanc, Jr.

My papa is the awfult fraid cat you ever seen. A yuther day mama and me and papa was going to heer the Fillypeeno Konstably Band open the new swell drive over back of the White House were Bill the presydint lets Missis Taft keep a cow in Teddys tennis cort. Missis Bill and her husband and most of the swells coting us went in nawtynubbles but we went in a 5 sent trooley and walked most of the way. After papa gilletted his fase two get his beard off he looked out of the windo and seen a little teeny cloud over the part of the city ware the zoo is and he says a reien is coming shure and that we must be prepared for it. It was a awful hot warm day and mama sticked up her chiu like she does when papa gets nervus and she says her and me aint no eskymoses and if papa wants to talk awl our spare cloze be can carry them. Papa says he will do it rather than wrisk the lifes of his infant child and its impechus maternal parint and get hisself put in bad for a yuther docker bill when he cant pay what he alrdy oes.

Well, to draw to the clothes of the tragudy, we got there awl write. We hat to walk about a miled from the trooley to the place ware the Fillypeenoze was playing at sosity. Wen we arrived there the persiration was dizig Fainman canals in the talken powder on papas shave and he was sweating persiration like a fello at the June bridle awlter what cant find the wring. Mama and me just ignored papa after we seen that he paid the trooley fare awl rite. We got sets and herd them silvized savage Fillypeenoze play a knockturn in New York flat what was writ by a feller named von Soup. Then we got in the front ro and seen the first lady of the land when she brung Bill. But poor papa he just stood on the outshirts—I mean, outskirts, of nowhare a holding mamas coat and my coat and his own coat and 3 umbellers and he had his artics on and he had mamas rubbers in his pistil pocket and my rubbers in the uther side of his pants and he looked like a cloze horse or a wigum what Injuns lives in or something like that and the persiration was coming out of his artics in little catyracks and he kept his i on that cloud and it never dident rain a drop for a weak and when we got home papa he was a toil rock and he says mama and me has conspyred to bring his bald spot in sorrow to the crematory. But if papa dident always do such fool things as that me and mama wood call in the experts what runs millynnheir bug houses cause if papa wasent always doing crazy things we wood think he was insane.

Mama says that papa is just like the husbands of some uther druggists wives what she noze. They are always looking for trubble and thay get what is coming too them but it aint never the trubble what thay is looking four cause when thay is watching a cloud what may be a April shour in dizige a sikhkone comes along and hits them in the back of the nek.

We come here to get to a place ware thay is so much non-partysin, job holding polyticks that nobuddy woodent notis papa and knot no that he has fayed in bent sevinteen uther plaices and mama says he can start with a cleen sheet and uther bedcloze and turn over a new leaf et setery. But alrdy he is worryng hisself intwo a uther grave agen and doing awl sorts of fool things as yoususual.

When we started the new fowtwin papa says we must keep down the presher cause he is frayed that some of the pipes may be weak in there newz and uther joynts and he is frayed the blamed thing may blow up and murder the naberhood dead and so when we run soda it looks like somebody has throwed stander oil on the trubbled waters cause the soda is as flat as the Sarah dessert and aint got no more life in it than the Spinks of Egipt and our soda bizness is kweered for keeps. Then papa is worryd cause we are giving two much water for the munny and he turns on the presher and blows the hole roof off of the celler and it cost a hunderd \$\$ to repara the damidges and papa hat to pay it.

Then a feller come in and offered papa the soul agenty for a new spring tonik and papa says he is frayed it wont sell and he is frayed it dont kompli with Doc Wily and he is frayed that it wont be advertized and he is frayed that it may knead a licker lisens to sell it and that the District may go proibishen and the feller says it seams that papa is frayed of ewrthing cepting to here hisself talk and the feller give the agenty to our decest competeter and he is selling hole slews of it and mama is treeting papa like he was only a

cousin and papa is taring his last hair out.

And the N.E. soshiashun tells papa he better make up a gallun of antysepticuss alkali-Ike-ness and papa says he is frayed it wont sell and he will make up six ownces and he done it and that night he got too preskripsluns for a pint each and be aint got it and the peeples goze to our dearest compe-eteater for it and gets it with trading stamps.

And a boy what is a collidze chum comes to papa and he has a hole fist full of testymoneys and epytyns and things what tells what a brillint honest yuth he is and he says he will work for us for 4 \$ a week to make his time soze he can go beufore the bord to get his stiffeyt lisenze and papa says that is awful cheep but he is frayed he cant afford a uthor clurk and he is frayed the paper karackters what the boy has may be forged et setery and the boy goze away and the next week when mama and me has to help in the store to avoyd the rush papa sends for that boy and the boy sends back word will papa pleeze go to the warmest part of the infernal revynoo regins.

And that is the way it goze with poor papa awl the time and if it wasent for mama and me to pert-ekt him agenset the adversity of fait I dont no what wud becum of him. Mama is always warabing me knot to be like my mail parint and she says I mustent never tell the outsidewd world about his weeknesses but must ptertect his good name agenset awl comers and the awlso ran in the Maryanthony of life. So I spoze I cant tell you abowt what mama says but as neer as I can make it out it is that papa is like menny uthers what goze broke senti anyoulaze says they aint got the nury to risk a \$ do make a millyun cents to put in the bank. Mama says that peeples what is always frayed to raze the dust for feer a few speks will lite on thare noze is sure to get under the pile driver and have it strike a mash on them.

Mama says that druggists what is almost as bad as papa is frayed to let thare wifes have anyting but rag karpit cause they wud haf to get Pershin ruzes on the instalmint plan and dodge the kollekters and the rag karpit curls up at the edges and thare wifes falls over it and brakes the lower lim of her nee and it costs more for a cork leg for her than it wud for a hole roll of velvit karpit what has to be cut around the gas lope place.

Mama says thay is uthers like papa only not kwite so bad as bim what is frayed to stock anyting until sambuddy asks for it with a shoot gun and a tomhawk and that thay is uther druggists what is frayed to ask for a desent profit on anyting but goze along selling helo cost and says thay is biding up trade and will raze prices buy and buy and thare wifes folks has to raze munny to berry them. But I gess I must clothes cause mama said I mustent drag my maskolen parints name in the myer cause as long as he maniges to put up a bluf and make the world think he is a genis and captin of industree and a Napoleon of fineaunts why it is up to us to shine in the reflected glory of his brass front. But I gess I will haf to clothes abruptlee cause mama says that fambly fairs shoold be sackrid and never repeatid so that the ryeballad throng or bigballed throng or something like that cant drag my sires name in the sawdust.

P.S.N.B. Speshul notis: When we rentid this store the landlor says the rent will be 3 \$ a month less if papa will sine a least for 5 years but papa says he is fraid to take the risk and gesses he will rent from munth two munth and just while I was writing the landlor comes in and say he has least the store for ten years to a sawsdee bucher and we well haf to move nex week. Papas wifes folks wont haf us no more so I dont no ware to tell you to forward my male but he let you no when we get thare. Wheel soon be on our way.

## NEW BOOKS.

LUNGE, G. "Technical chemists' handbook: tables and methods of analysis for manufacturers of inorganic chemical products." New York: D. Van Nostrand Co. 276 p. 12°, leath., \$3.50.

MUNSTERBERG, HUGO. "Psychotherapy." New York: Moffatt, Yard & Co. e. 114-401 p. O., cl., 82.

OLNEY, L. "Textile chemistry and dyeing: a manual of practical instruction in the art of textile bleaching and coloring." Chicago: American School of Correspondence. e. 114-342 p. il. pls. por. diagrs. 8°, cl., \$3.

WAIRD, ARCHIBALD ROBINSON, AND JAFFA, MYER E. "Pure milk and the public health: a manual of milk and dairy inspection by Archibald Robinson Ward; with two chapters by Myer E. Jaffa; with 17 illustrations." (Ithaca, N. Y.: Taylor & Carpenter. e. 114-218 p. figs. O., cl., 82.

## QUESTION BOX

THE OBJECT of this department is to furnish our subscribers and their clerks with reliable and tried formulas, and to discuss questions relating to practical pharmacy, prescription work, dispensing difficulties, etc. Requests for information are not acknowledged by mail, and ANONYMOUS COMMUNICATIONS RECEIVE NO ATTENTION; neither do we answer questions in this department from non-subscribers.

In this department frequent reference is necessarily made to information published in previous issues of *The Era*. Copies of these may be obtained at 10 cents each, except a few issues which are out of print, for which we charge 25 cents each.

### Seidlitz Powder as a Synonym for Compound Effervescent Powder.

(A. C. D.)—The effervescent powder of sodium bicarbonate, Rochelle salt and tartaric acid, ordinarily known as "Seidlitz Powder," received the latter name from the Seidlitz Saline Springs of Bohemia, whose aperient properties this powder was supposed to simulate. In no other particular, however, does the powder resemble the Seidlitz mineral water which owes its purgative properties to the magnesium sulphate which it contains. The water of the Seidlitz Springs is said to have been discovered by Hoffmann about 1725.

We are unable to state specifically when the term "Seidlitz Powder" was adopted as the synonym for the effervescent powders of the U.S. Pharmacopoeia, but we have evidence which leads us to believe that it was about the beginning of the last century. In 1825 the name was current in the literature of that period. Under the name of "Patent Seidlitz Powders," Paris (Pharmacologia, 3d American Edition, from the 8th London Edition, New York, 1828) gives the following information: "these consist of two different kinds of powders, the one contained in a white paper, consists of 2 drams of tartarized soda and 2 scruples of carbonate of soda; that in the blue paper, of 35 grains of tartaric acid. The contents of the white paper are to be dissolved in half a pint of spring water, to which those of the blue paper are to be added; the draught is to be taken in a state of effervescence. The acid being in excess it renders it more grateful, and no less efficacious as a purgative." Paris also quotes from the *Codex Medicamentarius* of Paris that "there are two formulas for the preparation of a water which may resemble that of Seidlitz, the one differing from the other merely in the proportion of sulphate of magnesia." We should also state that Seidlitz Salt was formerly used to some extent as a synonym for Epsom salt or magnesium sulphate.

Seidlitz powders became official for the first time in the United States Pharmacopoeia of 1860 under the title, "Pulveres Effervescentes Aperientes" or "aperient effervescent powders." This title was continued in the Pharmacopoeia of 1870, but in the Pharmacopoeia of 1880 the title was changed to *Pulvis Efferveescens Compositus* (compound effervescent powder) which was also continued in the revision of 1890. This you will note, changes the grammatical form of "powders" to "powder." In the present Pharmacopoeia (8th Revision), the Latin and English titles appear in their places over the formula, but the synonym "Seidlitz powder" has been relegated to the index where it appears with a reference to the Latin title.

### Manufacture of Bug Poison.

(A. B. R.)—No license is required by the State from those who would engage in the manufacture of "bug poison," and except as to labeling, the pharmacy law does not apply "to the sale of paris green, white hellebore, and other poisons for destroying insects," the words quoted we have taken directly from Section 139 of the Public Health Law. In some of the cities, however, there are local ordinances which prohibit the manufacture, sale or use of insecticides which emit inflammable vapor below a certain temperature, the standard for this city (New York) being 100° F. when the compound is tested in the open air or in a closed Tagliabue pyrometer. This, of course, rules out the ordinary mixtures made by dissolving naphthalene in benzol or products made with certain

petroleum solvents. This ordinance does not apply to the manufacture and sale of such old "stand-bys" as

(1)		
Corrosive sublimate	4	ounces.
Sal ammoniac	4	ounces.
Water	1 1/2	gallon.

(2)		
Alum, powdered	100	parts.
Lampblack	2	parts.
Ethereal oil of sage	1	part.

This can be used either as a powder or mixed with water into a paste and then put into the crevices of the walls and woodwork. It is said to be very effective (*Drog. Zeit.*).

#### Toilet Water.

(J. F. S.)—The term "toilet water" is rather elastic and may be consistently held to cover a wide range of perfumed spirituous preparations. However, the following are typical formulas for the more common preparations of this class:

##### Lilac Water.

Oil of bergamot	1 1/2	drams.
Oil of lemon	6	drams.
Terpineol	2	drams.
Oil of orange	2	drams.
Oil of rosemary	2	drams.
Tincture of benzoin	1	ounce.
Orange flower water	12	ounces.
Alcohol, to make	1	gallon.

##### Lavender Water.

Oil of lavender	4	drams.
Oil of bergamot	1	dram.
Oil of orange	2	drams.
Oil of neroli	1 1/2	dram.
Coumarin	1 1/2	dram.
Tincture of benzoin	1	dram.
Water	1	pint.
Alcohol	7	pints.

##### Florida Water.

Oil of lavender	2	drams.
Oil of bergamot	1	dram.
Oil of orange	1 1/2	dram.
Oil of neroli	1 1/2	dram.
Oil of cassia	1	dram.
Oil of caraway	15	minims.
Oil of spearmint	15	minims.
Tincture of benzoin	1	ounce.
Water	1	pint.
Alcohol	7	pints.

##### Violet Water.

(1)		
Ionone	2	drams.
Oil of sandalwood	4	drams.
Oil of neroli	1	dram.
Oil of bitter almond	8	minims.
Oil of spearmint	15	minims.
Heliotropin	1	dram.
Musk (artificial preferred)	2	grains.
Tincture of civet	4	drams.
Water	2	pints.
Alcohol	6	pints.

##### (2)

Oil of sandalwood	4	drams.
Oil of bergamot	4	drams.
Oil of rose geranium (Algerian)	1	dram.
Oil of neroli	1	dram.
Oil of bitter almond	15	minims.
Musk (artificial or natural)	1	grain
Tincture of benzoin	4	drams.
Powdered orris root	2	drams.
Water	3	pints.
Alcohol	5	pints.

#### "Iodine Petrogen and Iodine Vasogen."

(M. C.)—Both "petrogen" and "vasogen" are pharmaceutical specialties, the first named being manufactured by John Wyeth & Sons, Philadelphia, and the second by E. F. Pearson & Co., Hamburg, Germany. We cannot give the formula for either preparation, although Coblenz (Newer Remedies) states that "vasogen is an ointment vehicle claimed to consist of oxygenated hydrocarbons, obtained by treating

heavy hydrocarbons in the presence of alkalis, with oxygen under pressure, neutralizing finally with oleic acid. Vasogen is a slightly alkaline, yellowish brown, thick fluid of sp. gr. 0.890, emulsifying with water. Used as a vehicle in endermic medication."

A vehicle which possesses similar properties to the last named is "liquid saponated petroleum" or "liquid petrox," of the National Formulary, "a yellow, oily liquid in which iodine, salol, salicylic acid and many of the alkaloids dissolve readily; which mixes with chloroform and with volatile oils, and which forms a permanent emulsion with water, in almost any proportion, before and after such addition." The N.F. also gives a formula for a similar preparation in solid form to be used as an ointment base, by substituting hard petrolatum for the liquid.

#### Auburn Hair Dye.

(O. R.)—We cannot improve upon the formulas for non-metallic hair dyes for dyeing the hair a chestnut or brown color, given in the ERA of April 15 and 22, 1909, pages 350 and 374. For producing darker shades we can do no better than to recommend the use of silver nitrate which is as harmless as almost any dye that can be used and is quick in action. Here is a formula which has been recommended by a manufacturer for a "two bottle" dye which may be used for either black or brown:

##### No. 1.

Pyrogalllic acid	2	ounces.
Distilled water	80	ounces.
Cologne spirit, 95 per cent.	16	ounces.

Mix. For large bottle.

##### No. 2.

Silver nitrate	4	ounces.
Distilled water	24	ounces.
Ammonia water, 16°, q. s. or about.	8	ounces.

Dissolve the silver nitrate in the distilled water; add the ammonia water slowly with frequent shaking until the precipitate first formed is dissolved. For small bottle.

Solution No. 1 may be dispensed in 1 ounce bottles and No. 2 in 1/2 ounce bottles. To apply, first clean the hair from all oil or grease, by washing well with soap and water and well rinsing the hair to remove the soap, then when dry apply the contents of the large bottle thoroughly (with a small brush is best), then when again dry use the contents of the small bottle (with another brush, a tooth brush will be found most convenient). If a brown color is desired, add a few drops of soft water to the contents of the small bottle. When the dye is well set, wash with clean water. If the skin is soiled wipe it off immediately with a wet cloth. This hair dye is instantaneous in its effect and is claimed to be not injurious to the hair. Use in daylight.

#### Hair Colorer.

(B. N. M.)—The effect of pyrogalllic acid solution as a hair colorer may be somewhat darkened by combining it with sodium hyposulphite, as in the following formula:

Pyrogalllic acid	30	grains.
Dilute alcohol	1	ounce.
Sodium hyposulphite	1 1/2	ounce.
Water	3	ounces.

Dissolve the pyrogalllic acid in the alcohol and the sodium hyposulphite in the water and mix the solutions. See also answer to "O. R." elsewhere in this department.

#### Books on Poisons and Their Antidotes.

(J. W. P.)—The following are named as being "medium priced" standard works on poisons and their antidotes: Kobert, "Practical Toxicology for Physicians and Students," \$2.50; Brundage, "Manual of Toxicology," \$1.50; Riley, "Nature, Effects and Detection of Poisons with the Diagnosis and Treatment of Poisoning," \$1.50.

#### Was He a Prophet?

Laurence Sterne died in 1768; but he appears to have foreseen what it would oftentimes mean to "compound" a prescription in the present intellectual age. In "Tristram Shandy" he used the following words: "Shall we forever make new books, as apothecaries make new mixtures, by pouring only out of one vessel into another?"

**AVALON BAY, ON FAMOUS CATALINA ISLAND, WHICH A.P.H.A. MEMBERS WILL VISIT NEXT AUGUST.**

*Entertainment Committee having in charge the forthcoming Los Angeles convention has planned a trip to these wondrous sea gardens, on the Pacific Ocean. The distance is 60 miles from Los Angeles and of it 50 miles will be traversed on the ocean. The natural beauties of the scene are said to completely baffle all attempts at adequate description.*

LOS ANGELES, May 8.—Local pharmacists, through their committees chosen for that purpose, are actively arranging for the coming conventions of the California Pharmaceutical Association and the American Pharmaceutical Association, which will be held in Los Angeles in August. The dates for the State meeting are Friday and Saturday, August 13 and 14, and the National meeting, August 16 and 20, inclusive.

The railroads have made special rates for delegates, the round trip tickets having been fixed at one and one-third the regular charge for one way ticket. A large sum of money will be required to carry out the plans already outlined and a committee is at present at work securing this fund to which many business houses have already contributed.

Hotel Alexandria has been selected as the official headquarters, and special rates have been granted by the management. Other hotels, including the Lankershim, Angshus, Hayward, Westminster and Hollenback, have also given special rates to the delegates. In addition the Alexandria has contributed its banquet hall as an exhibition room.

The entertainment committee, of which Alden W. Skinner is chairman, has arranged for one day's excursion to Catalina Island, and one day in Pasadena, with numerous short trips to beaches and the near-by missions.

Business sessions will be held in Blanchard Hall. It is anticipated that these conventions may bring about the largest gathering of pharmacists ever held. Numerous inquiries are arriving daily asking for information as to local accommodations, climatic conditions, railroad rates, etc. T. W. Jones, secretary, at 300 North Los Angeles street, is busily engaged executing the plans of the executive committee.

#### Meetings of State Associations.

Arkansas State Ph.A. is in session this week at Pine Bluff. The local druggists made preparations to give the visitors a royal entertainment.

Montana Ph.A. meets next Monday at Bozeman. In addition to the regular business there will be a visit to the Government fish hatcheries at Bridger Canyon, a reception, promenade and concert, pharmacists' ball, smoky, refreshments and visit to the Pharmacy School of Montana University.

Louisiana Ph.A. is meeting this week in New Orleans. Missouri Ph.A. will meet at Joplin June 15-18. Chairman V. B. Kerns, of the transportation committee, predicts that this will be the banner meet of the association.

## Original and Selected

### COMMENTS ON SOME FEATURES OF THE NATIONAL FORMULARY NOMENCLATURE.

By I. F. Kebler, Chief, Division of Drugs, U. S. Department of Agriculture, Washington, D. C.

*(Continued from page 420, ERA, May 6, 1909.)*

#### Priority in Name.

The Federal and a number of State laws specify that if an article is sold under a name recognized by the National Formulary, such article is adulterated if it differs from the standard of strength of this authority, excepting in such cases where its own standard of strength, quality or purity is plainly stated upon the box, bottle or other container. From this it follows that a preparation bearing a National Formulary name must be prepared either in accordance with the formula recognized by this authority, or give its own standard of strength, quality, etc., upon the label. If, for example, "Essence of Pepsin" (or "Pepsine") should be prepared by any other method than that prescribed by the National Formulary, there appears to be only one course left, and that is to plainly state its own standard of strength, quality or purity upon the label. Soon after the enactment of the law several manufacturers who had marketed preparations under certain trade names many years before the third edition of the National Formulary was published raised the question as to the status of such names. There appears to be no difficulty whatever in supplying authentic information to the effect that certain trade names had long been in use by certain manufacturers at the time the titles were incorporated in the National Formulary; for example, "Plenol Sodique" according to United States trade mark No. 47,704 has been in use since 1863; certainly sufficiently long to acquire a property right that a court in equity would protect. It is well established that a proper trade mark, whether registered or not, is protected by common law and it is highly questionable whether any court

in equity would entertain a case in criminal prosecution where such a trade mark had been appropriated for use by the National Formulary, and subsequent legislation required either that the manufacturer disclose the nature of his manufacturing process or employ the National Formulary formula. It should be noted that in "errata" issued by the committee in 1907 it is directed to strike out "Phenol Sodique" but whether this will relieve the difficulty is not clear. In a number of instances the State courts have held that in case the United States Pharmacopoeia is specified an authority by law the edition in force at the time the law was passed is legal and no other.

Another trade name similar to the one above found its way into the National Formulary, namely, "Essence of Pepsin." This name cannot be trade-marked in the United States because of its descriptive or generic character. The name, however, has been long in use by at least two different manufacturers for distinctive products, in one case for about 30 years. An article made according to the National Formulary formula is furthermore not an "Essence of Pepsin" but a solution of pepsin and rennin. Many labor under the impression that owners of proprietary remedies deserve little consideration, but I submit that they have rights which should be respected and which are deserving of at least a square deal. The Federal as well as a number of State laws are mandatory relative to the proper use of National Formulary names and those directed to enforce them have no option. It is the plain duty of the committee to apply a suitable remedy.

#### Geographical Names.

It has been a common practice to use a geographical name as part of a trade name even though the preparation to which such name is applied has no connection whatever with the geographical locality indicated by the name. For example, "German Diphtheria Remedy," "Swedish Asthma Cure," "Japanese Oil," etc. The use of such names is misleading and a number of regulations were promulgated forbidding their use. One regulation permits the use of any name recognized in the United States Pharmacopoeia or National Formulary, while another forbids the use of a geographical name in connection with a drug product which is not manufactured or produced in the place where such name indicates that it is manufactured or produced. On referring to the National Formulary we find two geographical names, viz., "Canada Linctum" and "French Mixture," which complicate the regulations referred to above. There appears to be little justification to retain these names.

In order to indicate the attitude of the courts relative to the improper use of geographical names, many years before the Food and Drugs Act became effective, extracts from several court decisions will be cited.

In *Connell vs. Reed*, 1880, 128 Mass., p. 477, an effort was made to establish an exclusive right to the words "East Indian." The opinion of the court in disposing of this case contains the following statement:

"The conclusive answer to this suit is \* \* \* that the plaintiffs have adopted and used these words to denote, and to indicate to the public, that the medicines were used in the East Indies, and that the formula for them was obtained there, neither of which is the fact. Under these circumstances, to maintain this bill would be to lend the aid of the court to a scheme to defraud the public."

In a Supreme Court decision, *Manhattan Medicine Co. vs. Wood*, local citation, the above case with others is cited with approval in the following language:

"The doctrine enunciated in all these cases is founded in honesty and good sense; it rebukes fraud and encourages fair dealing with the public. In conformity with it, this case has no standing before a court of equity."

The United States Supreme Court (1883), *Manhattan Medicine Co. vs. Wood*, 117 U. S. Reports, 108, p. 218, in its opinion relative to granting the exclusive right to a certain trade mark, says:

"A court of equity will extend no aid to sustain a claim to a trade mark or an article which is put forth with a misrepresentation to the public as to the manufacturer of the article, and as to the place where it is manufactured, both of which particulars were originally circumstances to guide the purchaser of the medicine."

It is admitted that whatever value the medicine possesses was given to it by its original manufacturer, Moses Atwood. He lived in Georgetown, Massachusetts. He manufactured the medicine there. He sold it with the designation that it was his preparation, "Atwood's Vegetable Physical Jaundice Bitters," and was manufactured there by him. As the medicine was tried and proved to be useful, it was sought for under that designation, and that purchasers might not be misled, it was always accom-

panied with a label, showing by whom and at what place it was prepared. These statements were deemed important in promoting the use of the article and its sale, or they would not have been continued by the assignees of the original inventor. And yet they could not be used with any honest purpose when both statements had ceased to be true. It is not honest to state that a medicine is manufactured by Moses Atwood, of Georgetown, Massachusetts, when it is manufactured by the Manhattan Medicine Company in the City of New York."

The extracts contained in this communication, taken from the court decisions, are clear, succinct, to the point and do not need any comment.

#### Suggestive Therapeutic Names and Habit-Forming Drugs.

A number of preparations are named either after some anatomical portion of the body or suggest some diseased condition; for example, "Pectoral Tincture," "Mistura Pectoralis," "Anti-Neuralgic Pill," "Catarrh Powder," etc. Are these suggestive names intended for the benefit of the physician or the druggist? In either case they are unequal for, particularly in view of the fact that most of the preparations contain habit-forming agents. The practice of concealing these insidious drugs by various innocent names should be looked upon with disfavor. In my opinion, preparations of this class are responsible for many cases of drug addiction.

#### Medicine versus Bracers.

There is a host of commodities on the market which owe their virtue chiefly to the alcohol contained therein. They are usually sold under general names, such as medicinal wines, bitters, tonics, vermuths, etc., many of which contain only traces of certain medicinal agents, such as extract of cinchona, gentian, beef, columbo, various combinations of iron, etc., or very small amounts of one or more of the cinchona alkaloids. One of the products recently examined was found to contain not more than 1-40th of a grain of total alkaloidal matter to the fluid ounce. Another preparation contained very small amounts of cinchona extract and iron salts. The dealer was requested to show cause why his preparation should not be adjudged a misnomer. One of the arguments presented to justify the use of his name was the National Formulary "Beef, Wine and Iron" product. A careful comparison showed that the amount of actual iron compound present in the product under consideration was less than the amount represented by the National Formulary product but not sufficient to warrant holding one misbranded if the other was not. The former was intended largely for beverage purposes and it is well known that the Commissioner of Internal Revenue seriously considered classing "Beef, Wine and Iron" as a beverage also. The point raised in connection with these two products is an exceedingly important one and requires adjustment. If it is permissible to add simply enough of an agent to merely suggest a certain physiological action, be it ever so remote, primarily for the purpose of using the name of a substance possessing recognized medicinal properties, in conjunction with the trade name of a commodity, one helpful feature of the law would be largely negated and an ever increasing number of so-called medicinal products of the most absurd character can be placed upon the market. When it is remembered that the best element of the pharmaceutical profession is making strenuous efforts to remove the odious name "liquor dealers" from their ranks it is difficult to comprehend why products of the type referred to above should be retained in an authorized publication of any pharmaceutical organization. The above should not be construed in any manner as referring to liquor proper when sold and used as such for medicinal purposes.

In conclusion, I desire to state that the National Formulary nomenclature contains many excellent features which are not referred to in this communication, because its chief purpose is to call attention to the shortcomings of the nomenclature, leaving the good features to others. I fully realize that the criticisms are largely of a general character, but if carefully applied will rectify many undesirable features existing at present.

#### Her Way.

"I can always beat my husband in an argument."  
"Indeed! You must be a great logician."  
"No logic about it. I just cry."

The mental condition of the successful druggist is midway between the inert and the volatile.

# ADVERTISING for DRUGGISTS

## Screen Window Trims.

Recently we described several window trims that were well adapted for warm weather use in windows of limited area or in windows through which it was desirable to admit the light unobstructed. Opposite conditions often prevail and it is sometimes wise to lessen the glare of summer sunlight and by so doing lessen the damage which may be caused by flies, or fading of goods, and conduce to the coolness of the store. We will endeavor to give a few descriptions of a number of simple trims of the class indicated.

## Circle Recesses.

Cover the window with green or yellow tissue paper set close to the glass. The colors suggested are the tints least likely to fade. In the lower part of the window within the average line of vision, cut circles from the paper. The diameter of these circles depends upon the size of the articles to be exhibited behind them. Twelve inches behind the glass make a network of wire, cord, or strips of wood, sufficiently close to hold a contrasting cover of tissue, such as purple or orange. Upon this paper backing fasten the articles to be exhibited, one article opposite each aperture in the front paper. The articles should be small and the openings so far apart that only one object may be seen through each. Toilet goods, medical specialties and stationery novelties may be advantageously displayed.

## Fairyland.

Cover the window glass with irregular pieces of contrasting tissue of brilliant colors, so as to give the glass a stained or mosaic effect. At a proper height for easy observation cut an eight-inch circle in this paper. Over the floor of the window make irregular piles of clear and smaller boxes and cover them with white tissue or two or three thicknesses of white cheese-cloth. Press the paper or cloth into the irregularities of the box piles. Next, place a number of pocket mirrors or broken pieces of looking glass, with their edges so covered with white paper that they will appear as pools of water in the interstitial spaces between the boxes. In other interstices place a few articles of small, daintily encased merchandise and over and around the whole entwine artificial vines of ivy, morning glory or clematis. Such vines may be bought for a few cents per yard and used repeatedly. Over all scatter mica dust. Close the back of the window with a lath trellis painted white or covered with white paper, and entwine it with artificial vines. When viewed through the small opening this display, under the various colored lights reflected by the many tones of tissue, presents a most beautiful appearance.

## A Bank of Disks.

Secure a number of barrel heads or other wooden disks and cover them with contrasting colors of tissue. Pleat the paper from center to circumference as described in the ERA of February 4, 1909 (page 112). Fasten to the center of each disk one of the articles to be exhibited. The exhibit may consist of different toilet articles, or articles of a similar kind, such as bottles of a drive line of remedies or cakes of a special line of soap. Small price or information cards may be attached as desired. Stand a row of these disks close to the front of the window, another row back of and above the first, and upon stands or suspended from wires continue to place other rows of disks until they are banked from front to the rear top of the window.

## The Bill-poster's Dream.

Cover the floor of the window with excelsior or saw dust dyed green. Upon it place a sleeping doll dressed in paste-spattered overalls and shirt, with a miniature bucket of paste and brush by its side. Make a cheese-cloth covered frame sufficiently large to almost close the back of the window. Upon this paste all sorts of advertisements of things sold in the store. Use show cards, circulars, calendars and magazine advertisements and covers, anything that will do for a "bill."

## POST CARDS DEPICT BEAUTIES OF NEW STORE.

*Prospective patrons could scarcely resist such an invitation to become better acquainted with E. M. Roeder and his new pharmacy, recently started at Cedarhurst, L. I., as reported in the ERA. Mr. Roeder appears in the picture. W. B. Myers is the manager. Only one corner of the pharmacy is shown.*

Place the advertisements in irregular mosaic with edges overlapping. So far as may be possible, arrange them to make ridiculous statements. For example: Paste a dog-soap advertisement over a chewing-gum poster so that the reading will appear: "Chew Smith's Dog Soap."

When the bill-board is ready fix it across the back of the window. Use a show card on which appears "The bill-poster's dream," or a similar phrase. "He is a little mixed, but we have everything he dreams of. Come in and we will interpret the dream for you."

## Big and Little.

Take any line of goods in boxes you wish to drive and of which you have a large stock. Empty boxes, if you have them, may be used as well as boxes which contain goods. Soaps or cigars answer well, or you may even use the wooden cases of some proprietary specialty. With the boxes of goods or containers, such as we have suggested, make a solid, high wall at the back of the window. Upon this wall hang a large card of a color contrasting with the prevailing tone of the wall. Letter the card "Great in quality and quantity, but in price really insignificant. Only." Have the phrase "Great in quality and quantity" in large letters; "but in price" in even larger letters, and the words "really insignificant" and "Only" in very small letters. Beneath the Only fasten a coin or coins to represent the price.

## Hot and Cold.

Upon the glass of the upper left-hand corner of the window paint the single interrogative word "HOT?" with red, water paint. Make the letters at least a foot high. Cover all of the window glass with a dark, contrasting paper, such as purple or olive. From the lower, right-hand corner cut a 12-inch square of this covering paper. Take a wooden box measuring 12 inches across the inside and line it with white crepe paper and whisks of cotton upon which mica dust has been scattered. On the bottom, or back, of the interior of the box, letter

the one word "COLD!" Within the box stand a soda glass with dummy contents such as has been described several times in both the *ERA* and *The Soda Fountain*. Place the box and its contents so that the open side of the box corresponds with the edges of the paper where the square was cut out.

If desired, the box may be lettered "Cool off!" and toilet waters and other bathing requisites may be used in place of the soda glass.

#### Keep It Dark.

Directly against the window glass, at a proper height for close inspection, fasten a single package of some very small article to be advertised. This may be a corn plaster, headache powder, or some other small specialty. Beside this fasten a small or calling card, lettered "Keep it dark! This corn cure really cures and it only costs—". Attach a dime to the card to show the cost. After the article and card are fastened to the glass, drape the entire window with black or dark paper or cloth.

#### A Waterfall Window.

A Savannah druggist had his window so arranged that it was one of the sights of the city. The floor of the window was lined with sheet lead and the edges turned up and soldered at the corners so as to form a tank or aquarium about nine inches deep. The outlet pipe was connected so that it permitted the water level to stand about an inch from the top of the tank.

Across the top of the window, set close to the glass was a thin, perforated pipe with the perforations so placed that the minute streams that issued therefrom struck the glass with a downward flow and prevented splashing. When turned on there was a thin, rippling film of water constantly flowing over the glass. At the bottom of the window the water flowed into the tank, the edges being so turned against the frame that the water could not pass between glass and lead.

#### A Beautiful Sight.

In the center of the tank was an ornamental rockery, with aquatic plants surrounding it and gold fishes swimming in the water. Above the inner edge of the tank a long, narrow box held growing vines. These vines were trained up the sides of the window and then allowed to droop from the ceiling a few inches behind the film of flowing water. Whether viewed from within or without the store, the sight was truly beautiful.

In cold weather the fishes, plants and rockery were removed, the water turned off and the window used for general purposes.

#### Mrs. Calver Visits Cincinnati and Pittsburgh.

CINCINNATI, May 8.—Mrs. Nanette Calver, of Washington, D. C., official organizer of the W.O.N.A.R.D., spent several days here recently, having come here to address the members of Queen City Chapter, and to inspect its work. The meeting was the largest in the history of the organization here, all the members and many of their friends and prospective members wishing to hear Mrs. Calver's address. Mrs. Calver spoke of the good work which is being accomplished by the Philadelphia, Chicago, St. Louis, Boston, Mobile and other chapters of the W.O.N.A.R.D., along literary and other lines, and complimented the Cincinnati members upon the work they have accomplished. The chapter announced that it expects to broaden the scope of its literary work next winter. Mrs. Calver was entertained by Mrs. Otto Groenland, an officer of the local chapter, and enjoyed her visit very much. She left Cincinnati Monday for Pittsburgh and other way points on her return home. The local chapter has decided to attend in a body the N.A.R.D. convention in Louisville in September.

#### Commencement of Mercer School of Pharmacy.

MACON, Ga., May 8.—Dean M. A. Clark delivered the address at the recent commencement of the School of Pharmacy of Mercer University. Diplomas were awarded to E. T. Arnold, Philomath, Ga.; I. C. Barnett, Commerce, Ga.; P. H. Carmichael, Goodwater, Ala.; J. L. Green, Wilmington, N. C.; Livingston Henry, Macon; I. G. Prim, Saltpa, Ala.; J. B. Warthan, Warthan, Ga.; G. W. Williams, Juliette, Ga.

The Bayne medal in materia medica, given by S. E. Bayne, of Macon, and the faculty medal for general excellence, were both won by G. W. Williams. The speakers from the class were Messrs. Green, Henry and Williams. The graduating class attended a banquet given by the faculty in honor of the graduating young men.

## The Battle for Success.

*Thomas Reese, Jr., Wins Era \$5 Prize.*

*In Contest No. 4 of the ERA'S Cash Prize Competitions this week the judges have unanimously awarded the cash prize of \$5 to Thomas Reese, Jr., of 409 West Berrien street, Savannah, Ga. This contest, as will be observed by reference to advertising page 35, is for the best article of practical helpful value to drug clerks. Mr. Reese's prize article is concise and to the point. It is as follows:*

A man starting out with a mortar and pestle to battle for success must carry ambition and honesty with him.

Winning his employer is his goal, for therein lies his success. As getting customers is the chief way of gaining the appreciation of his employer, a drug clerk should fortify his battlefield (the store) to wage his campaign to get customers.

Cleanliness is the fortification he must employ; ability and attention will finish his conquest as a victory.

Nobody appreciates attention more than the lady customer, and unusual stress should be laid in showing her this.

Such attention as opening and closing the doors, and proffering the wrapping of packages (of convenient size) bought elsewhere with packages purchased of him are remembered by the drug store's best advertisers, the ladies.

Children should be treated with as much consideration as the older customers, then the future will make them good adult customers.

Modesty is admired by refined people.

Accuracy is another customer winning possession.

No more time should be taken than is absolutely necessary to properly fill a prescription, as customers are generally anxious to return to their sick ones as soon as possible, notwithstanding how slight their illness might be. In fact, customers like quickness intelligently used in all work.

Being able to wrap neatly is of great benefit, as people often buy articles from a drug store solely because of the expectancy of a neat package.

The great customer winner confidence, is hard enough to gain without the handicap of a lack of sobriety.

A drug clerk who thoroughly understands the line, can by the ready answers as to the nature of the drug, habit, dose and last but by no means least the price when goods are delivered makes a satisfied and call again patron.

Abstinence from smoking while in the store should be maintained as smoking is offensive to many, and it must be remembered that smoke remains in the store to nauseate long after the tobacco is in ashes.

As he is liable to lose the chance of making a customer, the drug clerk should not let his stock run low, which can be prevented by frequent recourse to the want book.

The show window when properly dressed is a magnet that attracts people into the store. So if time is available, window dressing is a help.

A drug clerk cannot win his employer if he does not show confidence in him who enables him to earn his daily bread, and gives him the reward of merit when reward is due, and the drug clerk should defend him at all times.

Using that precious, unregainable (when lost) time the employer pays him for in useless talk to friends, is poor taste to win his employer by.

A conscientious regard as to profit on all goods pushed should be had.

Punctuality is also appreciated by the employer, and upon the arrival of the hour that he is expected to start to work, a drug clerk should let that hour find him on hand ready for work.

#### City Chemist a St. Louis C.P. Trustee.

ST. LOUIS, May 10.—Thomas A. Buckland, city chemist and an alumnus of St. L.C.P., was elected a trustee of that institution at the annual meeting this month. He succeeds Henry Fischer, who death was noted in the *ERA* a few weeks ago. There were no other changes at the annual meeting. L. A. Seitz is president; Dr. R. E. Schlueter, vice-president; Wm. K. Illhardt, recording secretary; Sol. Boehm, treasurer; Dr. J. C. Falk, corresponding secretary; Edward Mallinckrodt, Thomas A. Buckland, Edmund P. Walsh, Dr. F. Claus, H. F. Rohlfing and Theo. Hazenow, trustees.

## PERSONAL MENTION

—WALTER McCURDY, of Lane, S. D., is happy in the possession of a new automobile.

—CALVIN KARLINS has accepted a position with H. F. Burke, of Clarksburg, W. Va.

—SAMUEL BRIDGES, pharmacist at Crystal Falls, Mich., was a recent visitor at the Milwaukee Drug Company.

—JOHN S. DAVIS, formerly of New Brighton, Pa., has accepted a position with A. W. Tetric, Clarksburg, W. Va.

—WALTER MYERS, of Morgantown, W. Va., has purchased an automobile and is getting more enjoyment out of life than formerly.

—CHARLES A. SMITH, manager of the Jacobs Pharmacy Company, of Atlanta, Ga., visited several friends while in New York City last week.

—JOHN ROBINSON, Southern representative of the Powers-Weighman-Rosengarten Company, was a caller in the New York City last week.

—CARL G. BUCHTA, formerly in charge of a pharmacy at Clinton, Wis., is now connected with the drug store of J. F. Collins, at Lodi, Wis.

—W. E. DAY, whose pharmacy was recently burned at Hopkinton, Mass., will travel in New England for the Chamberlain Medicine Company.

—CHARLES J. LYNN, general manager of Eli Lilly & Co., was in Chicago recently making one of his periodical visits to the local Lilly branch house.

—LEO HANNON, formerly connected with the O. N. Falk & Sons pharmacy, at Stoughton, Wis., will soon enter the employ of a druggist at Neenah, Wis.

—J. T. DOSTER, president of the Doster-Northington Drug Company, Birmingham, Ala., visited friends in the New York City wholesale trade last week.

—VERN J. FULLER, proprietor of the Pepin Pharmacy, at Pepin, Wis., was a recent guest at the home of his brother, O. L. Fuller, at Merrillan, Wis.

—LEE DUNN, a druggist of Masontown, Pa., will spend his spare time this summer in automobilizing, as he has recently purchased a fine new touring car.

—C. V. NEWELL has been engaged to represent Sharp & Dohme in southern Iowa, and B. W. T. Tobin will represent the same firm in southern New Jersey.

—A. J. KEARCHER, a prominent druggist of Pittsburg, Pa., is in a hospital in that city as the result of injuries sustained in an accident in his store a few weeks ago.

—DAN M. CHAMBLISS, manager of the W. D. Kuhlman & Co.'s stores of Knoxville, Tenn., was in Indianapolis recently and visited the laboratories of Eli Lilly & Co.

—HENRY SCHIEWE, employed in the Weichman Pharmacy, at Wausau, Wis., was a recent visitor at Merrill, where he was formerly connected with H. E. Kluetz, druggist.

—FRANK BLAND has resigned his position with the H. B. Gilpin Company and will hereafter be found at the H. B. Harrison Company's store in Clarksburg, W. Va.

—AUGUST WEINGARTNER, a druggist, 1751 Wrightwood avenue, Chicago, was knocked down by an automobile in Clark street last week, but fortunately escaped serious injury.

—LAWRENCE KELLMURRY, formerly with the John H. Sheehan Company, wholesale druggists of Utica, and lately in Buffalo, is now a traveling salesman for Daniel Sabine.

—JULIUS LOOK, of Milwaukee, formerly with the Herman Emmerich pharmacies at Milwaukee, is now doing relief work at the drug store of Frank Kretlow, at Rhinelander, Wis.

—W. A. CAPERTON, manager of the traveling service of Eli Lilly & Co., has returned to Indianapolis from one of his regular visits to the Lilly salesmen and jobbing trade of the Southeastern States.

—EUGENE RINGLER, for many years engaged in the drug business on the west side of Saginaw, Mich., but now retired, recently celebrated his 54th birthday. He is in good health and active for his years.

—D. E. BRANSOME, the hustling chairman of the entertainment committee of the Drug Club of Philadelphia, announces an entertainment and dance for the members and their friends at the club house on the evening of May 19.

—J. A. REXBOAT has been made drug clerk at the J. E.

Wilkinson pharmacy, at Walworth, Wis., taking the place of Claude Aleyr, who was obliged to resign because of ill-health.

—GEORGE H. BREUER, a Pittsburg pharmacist, with his wife, was called to Mount Clemens, Mich., recently on account of the death of Mrs. Breuer's father, L. A. Guette, a prominent citizen and one of the pioneer settlers of that section.

—JOHN HADLEY, JR., of the Opera House Drug Company, at Superior, Wis., is taking a three months' course in pharmacy at Minneapolis. Mr. Hadley later expects to take the examinations before the Wisconsin and Minnesota boards.

—DR. WILLIAM JAY SCHIEFFELIN, president of the 'Citizens' Union, was among those present at the meeting held in this city on Tuesday to start a movement for the election of an anti-Tammany Mayor at the next New York City election.

—C. F. CURTIS has succeeded R. L. Winchester as manager of Sharp & Dohme's St. Louis branch office. Mr. Winchester resigned to devote his time and energy to the further development of some valuable mining property near Phenix, Ariz.

—A. R. MILBY, who for years conducted a pharmacy at Lexington street and Fremont avenue, and later served as manager for the Reservoir street store of Downes Brothers in Baltimore, has accepted a clerkship with Dr. George W. Truitt, in Roland Park, a suburb.

—J. M. MILLER, who was recently elected president of the McLean County (Ill.) Druggists' Association, is a prominent pharmacist of Bloomington, having been in business in that city for 30 years. He is 54 years old and his drug trade experience dates back for 40 years.

—DR. LOUIS HERGENRATHER, JR., a druggist of Towson, Baltimore County, cut a big figure at the annual convention of the Baltimore County Volunteer Firemen's Association on Wednesday of last week. He turned out in the parade, and was elected treasurer of the association.

—WILLIAM LOW, regarded as the dean of retail druggists in western Pennsylvania, as far as length of time in the business is concerned, has disposed of his store at Mount Lebanon, Pa., to L. B. Finley. He was also the proprietor of a grocery and filled the office of postmaster at Mount Lebanon.

—CLARENCE M. KLINE, who has charge of the laboratory of the Smith, Kline & French Co., of Philadelphia, and is a son of Mahlon N. Kline, president of the company, was painfully but not seriously injured recently by being thrown from the carriage he was driving when his horse ran away.

—THOMAS VOGELI, of Minneapolis, and ex-president of the N.A.R.D., was a visitor in New York City last week and called upon many friends in the trade. Mr. Vogeli is a member of a committee of business men from Minneapolis, out investigating various water works systems of a number of eastern cities.

—H. R. SAUNDERS, head of the promulgation department of the New York branch of Parke, Davis & Co., with which house he has been connected for more than 13 years, recently resigned to take a similar position, together with that of assistant manager, with the Hoffmann-LaRoche Chemical Company, New York City. Mr. Saunders enters upon his new duties on May 17.

—LOUIS K. LIGGETT, president of the United Drug Company, of Boston, recently gave a dinner to Detroit friends and business associates at the Pontchartrain Hotel. Mayor Breitmeyer was among the 25 guests. The occasion for the dinner was the opening of a new store in which the company is interested in Detroit. President Liggett at one time resided in Detroit and has many friends there.

—W. H. LAMONT, of St. Louis, chairman of the entertainment committee of the Missouri Pharmaceutical Travelers' Association, spent several days in Joplin last week looking over the arrangements for the Mo.Ph.A. meeting which will be held there June 15 to 18. Every indication is for an excellent meeting and many strange faces are expected among the attendants, as this is the first session to be held in that part of the State for a number of years.

—A. J. STEPHENS, Lou Treat and George M. Dorrance, of New York; C. A. McCormick, E. Ross, L. Leitheiser, J. Carberry and E. Morris, of New Brunswick, N. J., with D. E. Bransome and A. Swisher, of Pennsylvania, representative of the financial department and the general superintendent's office of Johnson & Johnson, constituted a jolly party which last Friday laid aside the cares of business and spent three days at Mr. Dorrance's bungalow at Branchville, near Silver Lake, N. J. The trip was made in several big touring cars. Mr. Treat this year was the guest of honor.

## PURE FOOD LAW DECISION IS FAR-REACHING.

"Mapleline" Case Relating to Misbranding, Regardless of Purity, Considered of Great Importance.

CHICAGO, May 10.—The jury in the "Mapleline" suit, heretofore reported in the ERA, has found a verdict against the manufacturers, by direction of Judge Sanborn in the United States District Court, which is expected to have a far-reaching effect in the enforcement of the Federal Pure Food and Drugs Act.

When a suffix, such as "line," is added to the name of a food product to designate some other food product which contains no part of the product bearing the name to which the suffix has been added, the derivative name cannot be legally allowed on the container and the product so named is misbranded, according to the result in this case.

The case grows out of the seizure of 10,800 bottles of Mapleline at the W. H. Nicholas & Co. docks, Chicago. The bottles, which were contained in 300 cases of three dozen bottles each, were shipped by the Crescent Manufacturing Company, of Seattle, to the Louis Hilfer Company, Chicago, agents of the Crescent Company, who are the manufacturers of Mapleline. The entire shipment was declared misbranded and ordered condemned, but the execution of the judgment was withheld, pending the 60 days' time allowed for appeal.

The case presents a new phase in the food controversy and has a most important bearing on the future enforcement of the Food and Drugs Act. It also forms a precedent which in the future may be used in governing the sale of many kinds of commercial products.

The trial by jury, a rather unique departure in such cases, was demanded by the defendants, who endeavored to prove that the suffix "line" conveyed the impression that the product was an imitation, which was all they claimed for Mapleline. They admitted that the product contained no particle of maple, but was a substitute used to give a maple flavor.

The Government admitted that the product was harmless, and the trial of the case was based entirely on the implied meaning of the suffix "line." Hence the chemical composition of the product did not enter into the case at all. The main question involved was how far a manufacturer may go in using the name of a food product by adding a suffix such as "line" to that name, and using the derivative word of two or more syllables thus formed as the name of another food product which may contain little or none of the product designated by the word when used without the suffix.

Attorneys Long and Lamson, representing the company, vigorously attacked the constitutionality of the Food and Drugs Act in general, especially in relation to the provision in Section 8 governing misbranding. The court held the law constitutional and so instructed the jury.

It was indicated that an appeal will be taken based on a technical ground growing out of the court's charge to the jury, which involved the purity of the product, wherein there was no testimony on either side bearing on the purity, and, it was declared, the labeling was the only point involved.

### Maryland Druggists' Joint Meeting on May 20.

BALTIMORE, May 8.—The projected joint meeting between the Maryland Pharmaceutical Association, the Baltimore Branch of the American Pharmaceutical Association, the Baltimore Drug Exchange and the Baltimore Retail Druggists' Association will be held May 20 in the rooms of the Merchants' and Manufacturers' Association, and promises to bring out a large attendance. President William M. Fouch, of the Maryland Ph.A., is expected to preside and legislative matters will doubtless be the principal subject.

### Can Sell Pure Alcohol to Druggists.

LYNCHBURG, Va., May 8.—Judge Christian, in the Corporation Court here, on an appeal, decided on Tuesday that the Strother Drug Company, a wholesale house, is not breaking the Ryd Law by selling pure alcohol to druggists to be used in compounding drugs.

### Baltimore Wins in Bowling Tournament.

The tournament of the Inter-City Drug Trade Bowling League held at Atlantic City last week, resulted in victory for the Baltimore team, the standing being: Baltimore, first; Philadelphia, second, and New York, third.

## EBERT MONUMENT TO BE DEDICATED MAY 21.

Prominent Pharmacists From Various Sections of the Country Will Participate in the Ceremonies.

CHICAGO, May 8.—The monument erected under the auspices of the Chicago Veteran Druggists' Association to the memory of the late Albert E. Ebert will be dedicated at the grave in Graceland Cemetery on May 21, at 2 p. m. Mr. A. E. Ebert was born in Bavaria, Germany, December 23, 1840, and died in Chicago November 20, 1906.

The programme includes the presentation of the monument by the president of the Chicago Veteran Druggists' Association, O. E. Fuller, and its acceptance on behalf of the trustees of the Ebert estate, by Dr. T. N. Jamieson, naval officer at the port of Chicago. An acceptance on behalf of the American Pharmaceutical Association will be made by the president, Prof. Oscar Oldberg, dean of Northwestern University School of Pharmacy.

The following brief addresses will be delivered: "The Trustees U.S. Pharmaceutical Convention," by Dr. Henry M. Whelpley, St. Louis; "The Illinois Pharmaceutical Association," by the president, J. E. Huber, Peoria; "The Chicago College of Pharmacy," by Prof. Carl S. N. Hallberg; "The Philadelphia College of Pharmacy," by Prof. Joseph P. Remington; "The Pharmacists of America," by Prof. J. H. Beal, Pittsburg.

The exercises will close with an address by the historian of the Chicago V.D.A., Wilhelm Rodemann.

### Secretary Potts at Rock Island Meeting.

CHICAGO, May 8. Secretary Potts, of the N.A.R.D., and George P. Mills, the chairman of the State U.S.P. and N.F. committee, attended the first get-together meeting of the Rock Island County Medical Society and the Rock Island County Retail Druggists' Association at Rock Island May 6. After a very excellent banquet those present discussed the relations between physicians and druggists from their different points of view and every one present profited from the talks. The meeting was considered very successful from every standpoint.

### New Medical Journal in Chicago.

CHICAGO, May 8.—A new medical journal of a unique character has appeared in the Chicago field. Its title is *Hygiene, Diet and Long Life*. Dr. Karl von Klein is the managing editor and Dr. Horace Bird Frost is the associate editor. Its object according to editorial announcement is "to be the medium between the medical profession and the laity, teaching the duty of the public to the physician and of the physician to the public."

### Actress Gets Judgment for Loss of Voice.

CHICAGO, May 8.—Miss Grace Reals, an actress, has secured a verdict for \$5000 damages against A. W. Adamick, a druggist, at 233 North Clark street, for an injury to her vocal chords alleged to have been caused through a mistake in the filling of a prescription for her by one of Adamick's clerks. She alleged that ammonia was mixed with castor oil. Miss Reals sued for \$25,000 damages. The case will be appealed.

### Druggists to Oppose Free Antitoxin.

CHICAGO, May 8.—The following special committee has been appointed by Chairman Sandkoetter, of the legislative committee of the C.R.D.A., to appear before the appropriations committee of the Legislature in opposition to the free antitoxin bill: S. C. Yeomans, T. E. Cannon, James P. Crowley, I. M. Light and Mr. Sandkoetter.

### Two Store Ownership Not a Success.

CHICAGO, May 8.—The South Park Drug Company, operating two stores, one at 35th street and South Park avenue, and the other in 43d street, have been closed on a chattel mortgage. The 43d street store has been taken over by H. C. Michaels, a former Chicago druggist.

### Ladies' Night for Social Drug Club.

CHICAGO, May 8.—The Social Drug Club is arranging for a "ladies' night" May 24 at the Masonic Temple drill hall. The programme will consist of a vaudeville performance, after which there will be a dance.

## TWO MEMBERS OF N. A. R. D. PROPAGANDA COMMITTEE—CHAIRMAN OF CHICAGO R. D. A. WORKERS.

W. C. GORDON, Wheeling, W. Va., member propaganda committee of the National Assoc. Retail Druggists.

J. B. SCHMIDT, Omaha, Neb., member propaganda committee of the National Assoc. Retail Druggists.

H. P. SANDKÖTTER, of Chicago, Chairman U.S.P. Com. Chicago R.D.A.

## MANUFACTURERS ARGUE AGAINST BROWN ACT.

**Large Delegation of Representative Pharmacists From All Over the State Supports the Measure at Hearing Before Governor Hughes, Held at Albany on Tuesday Afternoon.**

ALBANY, May 11.—A large and representative assemblage of pharmacists from all parts of the State appeared this afternoon at the hearing given the Brown All-State Pharmacy Act by Governor Hughes, most of them favoring the enactment.

Representatives of the manufacturers and of the new Greater New York Society appeared against it. The opposition was first heard. Assemblyman Conklin, whose similar bill was defeated, argued that the Brown Bill was loosely drawn and would permit the free sale of cocaine. Charles M. Woodruff, of Detroit, attorney for Parke, Davis & Co., representing the drug manufacturers, argued against the Act on account of the effect of the guaranty clause and will submit a brief later. Thomas P. Cook, of the Drug Trade Section of the New York Board of Trade, opposed the measure for similar reasons. Wm. A. Jenner, of the Anti-Narcotic League, and Messrs. Crenshaw, Lamb, Gehris and Hill, of the Brooklyn Greater New York Ph.A., also appeared in protest.

In support of the Brown Act, which was declared to be a model of pharmacy legislation and a great advance in reform, there appeared among others, the following pharmacists:

Peter Diamond, of New York City, president of the New York State Pharmaceutical Association; Dr. William Muir, of Brooklyn, N. Y., representing the State Ph.A. and Kings County Pharmaceutical Society; Thomas Stoddard, of Buffalo, for and with resolutions passed by the Erie County Ph.A. favoring the measure; Fred S. Rogers, ex-president State Ph.A., for Orange County Ph.A.; Felix Hirsman, president of the German Apothecaries' Society of New York City; George Page, representing Rochester R.D.A.; Chas. L. McBride, ex-president State Ph.A., and for Kingston Drug Club; H. C. Connolly, Jr., of Kingston, for the Ulster County Drug Club; E. S. Dawson, president Syracuse R.D.A.; Frank Richardson, treasurer State Ph.A., for Cambridge pharmacists; Warren L. Bradt, for the Albany Drug Club; George Kleinman, for the German Apothecaries' Society of New York City.

The reform features of the bill were exploited by those in favor of the measure. It was declared that the sale of narcotics would be made free and the objections to the guaranty clause made by the manufacturers were answered by the statement that they were not well-founded. One of the objections made by the opponents that the bill was unconstitutional in giving the appointing power to the Regents was ridiculed.

## BROOKLYN OPPOSITION TO PHARMACY REFORM.

**New Associations Formed to Fight Against the All-State Act of the Legislature—Protests Sent to the Governor at Albany—Secret Meetings Held by Mysterious Protective Association.**

Following the open attack on the Brown All-State Pharmacy Bill in a circular which was distributed among the Brooklyn druggists last week by the new Brooklyn Greater New York Pharmaceutical Society, as reported in last week's ERA, a meeting for the purpose of taking further and immediate action against this bill was held Wednesday evening of last week over Cunningham's beer saloon, State and Smith streets, Brooklyn.

Thomas Lamb, of 84 Court street, and H. P. Hill, vice-president of the society and associated with the Paddock Drug Company, of 392 Gates avenue, were prominently active in looking after the details and enlisting the co-operation of the other members. Besides Messrs. Lamb and Hill, the numbers present were reinforced by eight other members, among whom were: George J. Duerr, 66 Wyckoff street; P. S. Gehris, 72 Henry street; S. L. Neier, 122 Schoenckady avenue; S. Rubin, 961 DeKalb avenue, and Andrew H. Witze, secretary, associated with Mr. Lamb.

After a discussion regarding the most effective method to use to defeat the bill, it was decided to have copies of the following letter printed and sent to every drug store in Kings County, together with a request that the druggist sign and mail the same to Governor Hughes:

*Gov. Chas. E. Hughes, Executive Mansion, Albany, N. Y.*  
Excellent Sir.—The passing of the Brown Bill by the Assembly and the Senate is a great disappointment to me, as I believe it to be to my fellow druggists, inasmuch as it provides that the Board of Pharmacy shall be appointed from men named by the organization to which so few of us belong. This denies to us any voice in the selection of men who will have supervision over our business.

The use of Wood alcohol in medicinal preparations which would be made legal in this State by said bill is I believe detrimental to our profession and harmful to the public.

You are earnestly petitioned to use your executive power in vetoing this bill. Respectfully,

The following resolution, carrying the signatures of the president and secretary and the seal of the society, was unanimously adopted and a copy ordered sent to the Governor:

Resolved, that we the members of the Greater New York Pharmaceutical Society do unanimously protest against the act of the Senate and Assembly known as Assembly Bill 2285 introduced by Mr. C. E. Brown, believing that it would injure the best interests of the druggists for the following reasons:

First. The bill provides that the Board of Pharmacy shall be appointed from men named by the New York State Pharma-

ceutical Association, the membership of which comprises a very small portion (about 10 per cent) of the active retail druggists in the State. This fact deprives the large majority of druggists the right to a voice or vote in the selection of the men who regulate their profession.

Second.—The bill permits the use of methyl or wood alcohol in medicines or toilet preparations for external use (sec. 237—adulterations).

Third.—Under sec. 240, (violations,) a druggist may be sued for any number of violations before he has had the knowledge that he has committed one offense; and, he is further—

Resolved, that the Greater New York Pharmaceutical Society do as a body and individually, petition the Governor to use his powers to prevent the bill becoming a law.

S. L. Gehris, chairman of the legislative committee, announced that he would attend the hearing on the bill and appointed Messrs. Lamb and Hill to accompany him to Albany. The opinion was expressed that possibly it would be a wise thing to take along a good speaker, and it was decided to secure the attorney of the society, Peter P. Smith, to prompt the members and also make a strong argument against the bill.

#### Brooklyn Retail Druggists' Protective Association.

Following the stir that has recently developed in pharmaceutical circles and the activity on the part of a number of Brooklyn Borough druggists, especially in the lower downtown district, it has been learned that in the Retail Druggists' Protective Association there really centers the powers which have brought about considerable of the commotion in connection with the opposition to pharmacy reform at Albany.

This association is composed of 40 to 50 members, according to the statement of Thomas Lamb, who is the treasurer and the only member known as officially connected with it. Names of the other members are kept secret as well as all that transpires at the meetings which have been held at frequent intervals during the winter. The purpose of the association, as stated by the treasurer, is simply to fight so-called technical violations brought by the Board of Pharmacy against members and to take care of other matters which could not be divulged. Mr. Lamb stated that checks were pouring in and that there was a neat sum in the treasury.

In giving a history of the organization, Mr. Lamb said that it was a continuation of the Campaign Committee of the Brooklyn Pharmaceutical Association, which some five months ago placed in nomination as a candidate for a member on the Board of Pharmacy the name of William T. Creagan. This committee, however, has been abolished, as it was considered that more efficient work could be accomplished by working more "on the quiet," as it might be stated. The following were the officers of this committee: Samuel Rubin, manager; Emil C. Krausche, poll clerk, and Thomas Lamb, secretary.

About January 1, by a resolution, the committee resolved itself into the Retail Druggists' Committee, and became a secret organization. At a meeting held on April 29, it was decided to adopt the name of the Retail Druggists' Protective Association, because of being more in harmony with the purpose of the association. At this meeting a number of druggists, pledged to certain principles, were admitted to membership. The place of meeting of the association is not made public.

One of the matters brought about by the Retail Druggists' Committee was the organization of the Greater New York Pharmaceutical Society, which was incorporated February 18 by the following, all of whom are drug clerks: Andrew H. Witze, James F. A. Dawson, Charles G. W. Reid, Charles L. Webb and Henry M. Borchers. There are, however, a number of proprietors who are members, and it seems dominate the society.

It is claimed that the society has 125 active members scattered about in all of the various counties under the jurisdiction of the Eastern Branch of the Board of Pharmacy, and only licensed pharmacists of these counties are eligible to membership. The purpose of the society is to secure the privilege to vote for candidates for membership on the Board of Pharmacy. It has been stated that a number of its members were unable to secure recognition of their views on some matters in the Brooklyn Pharmaceutical Association and the Kings County Pharmaceutical Society, and therefore formed the new association. There is only one regular meeting a year, that being on the first day of January, when officers are elected. The monthly meetings which have been held are known as special meetings.

Following are the names of the officers: Ulrich Wiesen-danger, president, Yonkers, N. Y.; Henry P. Hill, first vice-

president, 332 Gates avenue, Brooklyn, N. Y.; Frank Parker, second vice-president, Islip, N. Y.; Thomas Johnston, third vice-president, Freeport, N. Y.; S. Rubin, treasurer, 961 DeKalb avenue, Brooklyn; A. W. Witze, secretary, 84 Court street, Brooklyn; Peter P. Smith, attorney, 44 Court street, Brooklyn.

#### 21ST STORE OF RIKER CHAIN IN BOSTON.

Useful Souvenirs for Patrons at the Opening—Oil Paintings Above the Fountain.

Boston, May 8.—The eighth drug store in the Riker-Jaynes group in Boston, and the 21st in the chain throughout the country of this combination, was opened today at 128 Tremont street, opposite the Park street entrance to the Subway. Liberal advertising had its reward, and the store, spacious though it is, was packed full of people all day long. Souvenirs were given away to every purchaser. The scheme was as follows: To every purchaser of goods to the amount of 25 cents, was given a small box of Foss' chocolates; to every purchaser of goods at the toilet counter to an amount of 25 cents was also given a box of tooth powder; to every purchaser of 25 cents' worth of goods at drug, patent medicine or sick room supply counters, was also given a cake of violet soap, while at the cigar counter every purchaser of 25 cents' worth of goods was given a 10-cent cigar.

William J. Coughler, who was assistant manager of the Bedford street store of the Riker-Jaynes Company, has been appointed manager of the new store. Over 30 clerks were employed on the opening day. The soda fountain, of original design and of the iceless system, made by the L. A. Becker Company, of Chicago, is a feature. It has a 30-foot counter and is 12 feet high. It is largely of onyx, with the numerous pillars of onyx supported and capped with bases and capitals of bronze. Large mirrors occupy the back, while above them are oil paintings. The counter top is of onyx, and the side of pavanazzi marble, while the base is of alps green marble. All the doors to the cabinet are of wired glass. Umbrellas form one of the lines of the new store.

#### Preparing for Massachusetts Ph.A. Meeting.

Boston, May 10.—The annual convention of the Massachusetts State Pharmaceutical Association will be held again this year at the New Ocean House, Swampscott, under the same delightful auspices as last year. The dates will be June 22 to 24. The Traveling Men's Auxiliary will also hold their annual convention at the same place and time, and at meeting of the executive committee held Saturday plans were projected for making the entertainment feature a bigger thing even than that of last year, when the traveling men fairly astounded the druggists by the wealth and cordiality of their reception. The committee is as follows: George H. Thompson, chairman; Thomas F. Mullen, Fred P. Wright, D. E. Lochman, C. H. Thompson, W. H. Henderson, F. S. Lovis, M. E. Murray, J. A. Baader, C. H. Perry and Chas. H. Field.

#### N.Y.C.P. Commencement at Carnegie Hall Tonight.

At the commencement exercises of the New York College of Pharmacy, Columbia University, this evening, M. P. Gould, of New York, will deliver the address to the students. Rev. Edwin F. Hallenbeck, minister at the Fifth Avenue Presbyterian Church, will offer prayer, opening the exercises of the evening. The degree of Ph.G. will be conferred upon about 70 students, who have completed the two year course. The students of the food class do not graduate until June and have the degrees conferred at the university exercises. As usual, the exercises will be held at Carnegie Hall, Seventh avenue and 57th street, Borough of Manhattan, New York City. The graduates will enter at 8.30 o'clock.

#### B.C.P. Commencement and Alumni Reception Tonight.

The commencement exercises of the Brooklyn College of Pharmacy will be held this evening at the Baptist Temple, Third avenue and Schermerhorn street, Brooklyn. Between 50 and 60 graduates will receive the degree of Ph.G., while the Ph.D. degree will also be conferred upon some of the students of the advanced classes. Immediately following the exercises, the Alumni Association will hold its annual dinner at Cafe Ramb, Nevins street and Flatbush avenue. The dinner will be followed by a dance.

## TOBACCO TRUST FIGHTS THE NEWSDEALERS.

United Cigar Stores Company, a Subsidiary Concern, Inaugurates Methods Similar to Those Which Were Practiced Against Independent Dealers and Once Menaced the Retail Druggists.

The American Tobacco Company has gone into the business of newsdealing in New York City, says the *Editor and Publisher*, and the small dealers who have spent years building up their small trades are intensely aroused. They say they are face to face with destruction, for they cannot alone combat the millions of capital in the Tobacco Trust.

The United Cigar Stores Company, which is a subsidiary concern of the American Tobacco Company, has commenced the invasion of the newsdealers' field by opening five stores in the Riverside and Harlem sections of Manhattan.

It is said they propose to open 200 stores in New York where magazines and periodicals will be sold together with cigars and tobacco. With each purchase of a periodical, "certificates" or "coupons" are given the purchaser exactly as in the purchase of cigars, cigarettes and tobacco. The same coupons are used for cigars and magazines. The great majority of the small cigar stores have managed to keep alive against the competition of the Trust by selling periodicals and stationery. It is not concealed that the purpose of the United Cigar Stores Company in going into the news business is to kill all competition in the cigar business.

The newsdealers held a meeting and asked the American News Company to state its attitude toward the newcomers. The company declared itself strongly opposed to the Tobacco Trust entering the news field. General Traffic Manager Dean, of the American News Company, is quoted as follows by the *Editor and Publisher*:

"The United Cigar Stores Company is operating its newsdealing stores under the firm name of Davis & Cline. When this was called to our attention by the publishers, we immediately stopped supplying them with periodicals. The publishers do not want the retail price to be cut. The United Cigar Stores Company, by giving free 'coupons,' is actually cutting the price.

"They show that they do not care about the profits on the sales of periodicals. They only care about the cigars. The newsdealers say that the Tobacco Trust, by this move, is attempting to cut the heart out of their business and drive them out entirely.

"I do not know where the United Cigar Stores Company is getting its supplies of periodicals. We have tried to trace the source of the supply, but cannot find out. At present, with but a few stores, the supply is inconsiderable."

"If the charter of the United Cigar Stores Company limits its business to the selling of tobacco, will there be litigation over the practice of selling periodicals in those stores?"

"I imagine there will be."

## Riker Drug Company to Quit Retailing of Cigars.

Announcement has been made by the Riker Drug Company that it will stop the retailing of cigars, cigarettes and tobacco in its stores as soon as the present stock of this class of goods is disposed of. It is said that the space in the various stores required for the transaction of the cigar business was not bringing as large returns as those devoted strictly to the display and retailing of drug merchandise, and it is understood that the other departments are to be extended into the extra space afforded by this change.

## Bad Failure of a Virginia Druggist.

NORFOLK, May 8.—P. Gating, pharmacist, has filed a petition in voluntary bankruptcy. Liabilities, \$7621.43; assets, \$75.

## PHILADELPHIA A.R.D. FOR PURE DRUG ACT.

Association Overrides Executive Committee's Action and Urges Governor to Sign Measure—Fight With Newspapers Not Settled—Progress Made for Propaganda—To Name Delegates.

PHILADELPHIA, May 8.—The newspaper situation and the straightening out of a rather embarrassing tangle caused by the association endorsing the Pure Drug Bill now in the hands of Governor Stuart for his signature or veto and the executive committee later, asking him to veto it, were the features of the May meeting of the Philadelphia Association of Retail Druggists held yesterday at the Philadelphia College of Pharmacy. The attendance was above the average for there had been general discussion prior to the meeting on both questions.

When the Pure Drug Bill (House Bill 225) came before the meeting in February, the association endorsed it and instructed its legislative committee to work for its passage. This was done and the bill passed both houses with little opposition. At the April meeting of the executive committee, upon the representation that the bill was solely in the interests of the jobber and the manufacturer, the executive committee passed resolutions urging the Governor to veto it.

When the legislative committee heard of this action, the members expressed themselves emphatically and the result was that yesterday Chairman William L. Cliffe moved that the report of the executive committee referring to House Bill 225 be referred back with instructions to rescind its action. After much discussion this motion prevailed and in the interests of time, a telegram was ordered sent to Governor Stuart, informing him that the original action of the P.A.R.D. endorsing the bill had been reaffirmed, canceling the protest. Another motion which was carried, directed that a committee of three, consisting of Frank W. Fluck, president of the association; William T. Burke, chairman of the executive committee, and Theodore Campbell, of the legislative committee, wait upon the Governor and explain how this reversal of the position of the association came about.

The opposition to the bill at the meeting of the executive committee, it appeared, resulted from the claim that but six preparations, viz., those of opium, iodine, peppermint, camphor, ginger and ethyl nitrit, had to be made according to the U.S.P. and N.F., and that all other preparations could be made up as the manufacturer pleased, provided the percentage was stated on the label. The stipulation on these six drugs was made because they were the preparations commonly sold by country store-keepers and others having no knowledge of the ingredients. For other preparations such as were not generally sold by others than druggists the latter would be guided entirely by the statement on the label. It was claimed that there were practically no preparations regarded as household remedies and which were generally sold by druggists, which were not included in the above-named preparations.

It was this bill, as explained by Mr. Cliffe, which was originally formed in 1907 by representatives of practically all of the pharmaceutical institutions and organizations of Pennsylvania. He denied that the jobber and the manufacturer had received any more consideration in the work for the bill than that to which they were entitled as parties interested. The retail interests had predominated in the personnel of the committee and it was the public and the retail druggist that had received first consideration. The situation was thoroughly discussed by Theodore Campbell, Charles Rehffuss, S. B. Davis, W. T. Burke, F. M. Apple, S. W. Strunk and others.

The majority of the 90-odd branch offices of the newspaper that has broken away from the contract between the dailies and the druggists who received want advertisements on a com-

E. A. RIDGELY, Ph.G., proprietor of Ridgely's Prescription Pharmacy, East St. Louis, Ill., was recently elected president of the St. Clair County R.D.A. He takes an active interest in the welfare of his fellow druggists and spurs no efforts in furthering the work of the organization.

mission of 25 per cent, no commission on any one ad. to be less than 7½ cents per insertion, were represented either by the proprietors or by their expression when Chairman Charles Rehfuss, of the telephone and press committee, reported on the matter. It was evident that not only were the agency members standing solidly in opposition to any change, but that the newspapers needed the assistance of the druggists and that the attitude of the papers was by no means unalterable. The impression prevailed very strongly that if the druggists stood together in their opposition to any reduction in commissions the newspapers would see the danger of injuring their business by the methods proposed.

Secretary N. A. Cozens read several letters from physicians showing the high regard they have for the propaganda movement. Chairman J. E. Marsden announced that the profits on the recent entertainment would be slightly over \$400, information which was greeted with applause. It was announced that the Italian pharmacists of the city had organized and wished to be recognized and to affiliate with the P.A.R.D., as an organization. The request was referred to the executive committee.

Harry R. Binn was elected to membership and the resignation of B. C. Waterman, who has retired from business and who made a generous cash contribution to the association, was accepted. Delegates to the Pennsylvania Ph.A. will be named at the June meeting of the P.A.R.D. The nominating committee will meet during May to name the delegates to the N.A.R.D. convention.

### DRUGGISTS AND SALESMEN ENJOY ATHLETICS.

Opening Day of Season of Philadelphia Association is Well Attended and Proves Thoroughly Enjoyable.

PHILADELPHIA, May 8.—Retail druggists and the salesmen who supply them took a day off on Tuesday to attend the opening events of the summer season of the Philadelphia Drug Athletic Association on Stenton Field. The aim of this organization is to get the hard-working druggist away from the confinement of his store and give him an opportunity to take needed exercise in the fresh air with congenial companions. It was evident by the size and the enthusiasm of the gathering on Tuesday that these policies are most popular with the retailers.

The principal event was a ball game in which the original players were early relieved by substitutes, who in turn were replaced by others, for there were few besides "Charley" Willis who were able to last an entire game. The latter pitched, batted and circled the bases with his accustomed skill. John B. Scheinberg, attired in a natty uniform, started off well in his effort to take off 20 pounds during the summer, while W. A. Johnson was just as well satisfied with the result of his opening attempt to take on that amount of avoirdupois before October 1. The rendition of "Barbara Freitchie" between the innings by John Duffy, the veteran, in his well-known masterly manner, was all the more impressive by the declaration by Mr. Duffy's press agent, Edward T. Hahn, that "John knew the heroine of the poem when she was a little girl." One of the loquacious and most popular men on the field was "Dapper John" Kelley, who in addition to his duties as secretary, acted as steward.

These outdoor meetings will be held every Tuesday afternoon. During the past year, the association lost by death its president, W. Fred Steinmetz, one of its most popular and active members, and his successor has not yet been elected. Dr. A. T. Pollard is the treasurer of the association, which has about 100 hundred members.

### Preparing for Commencement Phila. C. of P.

PHILADELPHIA, May 8.—Arrangements are already being made for the reception of prominent alumni of the Philadelphia College of Pharmacy from all over the country who will attend the annual commencement exercises which start on Sunday, May 16, with the baccalaureate sermon to the 88th graduating class. As usual, this sermon will be preached at the Church of St. Luke and the Epiphany by the rector, Rev. David M. Steele. From then on until Thursday afternoon, there will be meetings and exercises in which the alumni will participate. Thursday the commencement exercises proper will be held in the Academy of Music at 8 p. m. A feature of the week will be an exhibit at the college of articles of particular interest to pharmacists.

### REVISION INFORMATION FOR N. Y. BRANCH.

Interesting Discourse by Professor Coblenz—Invitations Received to Attend Meeting of Pharmacists at Atlantic City During Convention of A.M.A.—Joint N. Y. Meeting.

Some of the difficulties encountered, together with a number of interesting facts involved in a revision of the chemical features of the Pharmacopoeia, were ably presented by Professor Virgil Coblenz, chairman of the section on chemicals of the U.S.P. Revision Committee, at the meeting of the New York Branch of the American Pharmaceutical Association last Monday evening.

Professor Coblenz's introductory remarks related to the text, and the difficulty of preparing this so that it would be practical and concise. As to atomic weights, he explained that at the time of the last revision the majority of eminent chemists considered that the adoption of hydrogen as 1 instead of oxygen as 16 would be the better unit to use, and the former was therefore adopted as the standard for the Pharmacopoeia by the revisors. However, said the speaker, this standard will probably be reversed in the next edition as oxygen as 16 is coming into general use.

The attitude of the manufacturers toward the revision committee previous to the enactment of the Pure Food and Drugs Act was commented upon and Professor Coblenz said that it was either indifferent or antagonistic, but that the condition of affairs had changed considerably during the past three years and now the manufacturing interests were extending valuable assistance in every way and working in co-operation with the committee.

Several tests for the detection of impurities in various chemicals, especially those for arsenic, were explained in detail, and Professor Coblenz stated that several of the best tests were too sensitive for the use of the pharmacist and required expert chemists to accurately carry them out. He intimated that some of these tests would be dropped or modified in the next revision.

Afterward the subject was discussed and Dr. George C. Dickman stated that in regard to the re-bagging of synonyms to the index he thought that this act of the revision committee a very unwise one, and the system had proven in several instances to be a handicap for the work itself as well as the people who had to use it. Professor Coblenz coincided with Dr. Dickman in the matter, as did several other members who expressed opinions.

The subject of the relegation of all formulae from the Pharmacopoeia to the National Formulary and the U.S.P., to be kept as a book of simples, which was recently discussed at the Baltimore Branch, was also brought up and several phases of the subject were brought out by Chairman Jacob Diner, who highly favored such a course. Otto Raubenheimer, a member of the Revision Committee of the National Formulary, in a humorous way stated that he opposed it on the ground that the members of the committee would have to burn too much midnight oil.

William C. Alpers declared that the phenol on the market at present required more water for liquefaction than that in common use several years ago. It was stated that the difference was due to the present product being made artificially from benzol while the acid made by the older process from coal tar contained more cresols rendering the crystals softer.

Several communications relating to the coming meeting in Atlantic City at the time of the A.M.A. convention and a telegram from the Philadelphia Branch inviting the members of the New York Branch were read. The section of pharmacology of the A.M.A. is to meet on June 10 and the Philadelphia Branch the following day. Members were invited to take in both meetings.

George H. Hitchcock, chairman of the special committee on the joint meeting of the branch with the New York County Medical Society reported that all the arrangements were complete for the meeting which would be held in the Academy of Medicine May 19, commencing at 8:30 p. m. The announcements were being printed, said Mr. Hitchcock, and about 2400 would be sent to the members of the Medical Society, while arrangements would be made to supply the various pharmaceutical associations. Treasurer Joseph Weinstein reported a balance on hand amounting to \$46.55.

## RECENT APPOINTMENTS MADE TO BOARDS OF PHARMACY IN LOUISIANA AND WISCONSIN.

GUSTAVE SEEMANN, New Orleans, chairman examining committee of the new Louisiana State Board of Pharm.

EDW. H. WALSDORF, New Orleans, recently appointed a member of the Louisiana State Board of Pharmacy.

OTTO J. S. ROBERG, of Eau Claire, whose reappointment to Wisconsin Board was announced in the Era.

## NEW BOARD AND NEW DRUG LAW IN IOWA.

**Commissioner Eaton Elected President—Druggists Must Hereafter Number Liquor Sales Consecutively.**

DES MOINES, May 8.—At the organization meeting held by the new Iowa Pharmacy Commission, Harry E. Eaton, of Shenandoah, was elected president and Clarence W. Larson secretary. The latter is not a member of the board. The other two new commissioners are David E. Hadden, of Alta, and I. W. Clements, of Marengo. Resolutions were adopted praising the retiring secretary, C. W. Phillips, who was not a candidate for reappointment.

Commissioner Hadden is a scientist of considerable note. He is a member of the Royal Astronomical Society of London, a fellow of the Iowa Academy of Science, and a contributor to scientific journals. He is a graduate of Morningside College at Sioux City.

Receipts of the commission for the year ending April 30 reach \$34,567, an increase of \$1655.50 over those of last year, according to the figures of Expert Accountant Charles Heer. Itinerant vendors' licenses at \$100 each yielded \$28,000. The next largest item was \$392 annual renewals at \$1. \$4392.

Senator Hammill's bill requiring druggists to number consecutively all applications for liquor has been signed by the Governor, the last of the temperance measures to pass through his hands. It provides that after July 1 the numbered applications must be filed each month with the county auditor, and they must correspond with stubs to be kept by the druggists open to inspection at any time.

By looking over the numbered applications a county attorney will be able to discover just how much liquor has been sold by each druggist, and how many times sales have been made to the same person. The bill specifies the form or application that must be used. Unknown applicants must have witnesses.

No more misbranded or adulterated drugs can be sold in Iowa without risk of prosecution. The Newberry Pure Drug Act gave druggists until April 1, 1909, to dispose of goods not complying with the law, and it is now in full force. Under the Iowa law any preparation containing alcohol must state the exact amount on the package. A similar provision is made as to morphine, chloroform, opium, acetanilid, heroin, chloral hydrate and cannabis indica. A penalty is provided for removing the contents of a package and replacing them with another preparation or for placing any misleading statements concerning ingredients on the label. The sale of any preparation containing wood alcohol or denatured alcohol is absolutely prohibited. A penalty of not exceeding \$100 is provided for violation of any provision of the law.

## BOARD EXAMINATIONS

## New York—Western Branch.

BUFFALO, May 8.—Secretary George Reimann announces that at the last examination of the New York State Board of Pharmacy held in Buffalo, April 21 and 22, the following were granted licenses to practice pharmacy in New York:

PHARMACISTS.—Henry P. Diehl, Buffalo; Damon W. Walrath, Syracuse; Grace W. Wilson, Buffalo.

DRUGGISTS.—A. H. Bender, P. S. Demers, W. W. Farnum, H. P. Hawks, G. B. Heckman, A. F. Hendrickson, A. G. Hoffman, B. C. Leenhuis, L. H. Rice, H. H. Rider, F. G. Rounds, Nathan Sandler, H. A. Trotter, B. M. White, all of Buffalo, and H. S. Mosher, of Niagara Falls, and C. F. Wood, of Batavia.

## Virginia.

ROANOKE, May 8.—Of 82 applicants only the following 22 passed the recent examinations of the Virginia State Board of Pharmacy:

REGISTERED PHARMACISTS.—M. V. Ponce, Charlottesville; G. N. Harrison, Petersburg; P. D. Williams, Sowers; W. G. Overstreet, Roanoke; A. L. Winne, Manchester; R. C. Rice, Marion.

ASSISTANT PHARMACISTS.—L. B. Jones, Charlottesville; J. A. Florence, Manassas; C. R. C. Johnson, Manassas; R. H. Behler, Rocky Mount; P. C. Wray, Danville; R. L. Yves, Norfolk; Harry G. Murphy, Norfolk; Joseph A. Catlin, Norfolk; S. D. Hope, Jr., Norfolk; Horace C. Hadle, Norfolk; Percy M. Massie, Richmond; Robert A. Klor, Newport News; Wm. P. Harrison, Richmond; H. J. Davis, Norfolk; S. C. Bowman, Harrisburg, and J. B. Perry, Macon, N. C.

## Minnesota.

ST. PAUL, May 8.—Eleven candidates for full registration as pharmacists passed the April examination of the State Board of Pharmacy held at the College of Pharmacy, University of Minnesota. Twenty-five others passed the examination for assistant registration. The list of successful candidates follows:

FULL REGISTRATION.—Harry Broachirmer, St. Paul; John A. Bush, Exota; V. J. Haydon, Minneapolis; August E. Jaehn, Minneapolis; Charles M. Jacobson, Hankinson, N. D.; W. A. King, Minneapolis; S. M. Kennedy, Minneapolis; R. R. Lam-

bert, Royalton; N. L. Larson, Minneapolis; A. E. Lenz, Osakis; L. R. Lord, Minneapolis.

**ASSISTANT REGISTRATION.**—Rudolph Berghund, Minneapolis; R. E. Butterfield, Minneapolis; W. A. Bohland, St. Paul; E. A. Holton, Elgin; M. J. Hodapp, Mankato; W. A. Kerker, Minneapolis; Miss Cora I. Norris, Detroit; R. O. Pfefferle, New Ulm; Miss A. M. Remes, New Prague; J. M. Sansby, St. Paul; W. H. Schram, Herman; William Nelson, Minneapolis; C. W. Zemlin, Minneapolis; John A. Anderson, St. Paul; E. A. Biersdorf, Minneapolis; A. H. Clements, Minneapolis; F. F. Couche, Winona; E. A. Engebretson, Hendricks; A. R. Hall, St. Hilaire; E. H. Hubbard, Minneapolis; B. Jansen, Minneapolis; E. E. Komstadus, Hoffman; E. H. Perry, Minneapolis; F. W. Riesland, Milaca; Le Roy Sweet, River Falls, Wis.

#### Oklahoma.

**ARMORE, May 8.**—Secretary J. C. Burton announces that at the April examination conducted by the Oklahoma State Board of Pharmacy there were 38 applicants for registration as pharmacists. The following were successful: M. J. Buford, Sulphur Springs, Texas; R. L. Bowyer, Chickasha; I. L. Cummings, Oklahoma City; J. P. Cox, Ardmore; Joe M. Davis, Hugo; Gay W. Elkins, Hackett, Ark.; M. S. Faulkner, Oklahoma City; Edward L. Henry, Westville; William M. Hamilton, Buckner, Ark.; Earl L. McBride, Stillwater; Jesse C. Mooney, McLoud; Paul M. Mooney, Booneville, Ark.; Ben F. Payne, Caddo; H. C. Plummer, Oklahoma City; F. M. Pearson, Oklahoma City; William C. Pendergrast, Carney; J. J. Reed, Hulbert; O. B. Sheery, Shawnee; O. N. Stogsdill, Waukomis; E. C. Sherer, Coalgate; R. E. Sawyer, Bokchito; James W. Twigg, Choctaw, Ga.; O. S. Thompson, McAlester; H. W. Weedin, Norman; Glenn S. Webber, Oklahoma City.

The board granted registration on diplomas from recognized schools of pharmacy to the following: Schooley D. Ault, Charleston, W. Va.; James C. Andrews, Carl Junction, Mo.; Allen P. Bethel, Pittsburg, Pa.; George R. Bible, South Pittsburg, Tenn.; Otto W. Bergmeyer, Dayton, Ky.; William A. Crawford, Forest City, Mo.; Frederick J. Cernak, Cleveland, Ohio; A. Stinson Coody, Oxyka, Miss.; Marion S. Dantzer, Elmore, S. C.; Morris Dunn, Oakdale, Pa.; M. D. C. Dunaway, Concordia, Kan.; O. L. Ferrell, Gilmer, Texas; Paul Grace, Grayville, Ill.; Guy Hall, Wilkinsburg, Pa.; Joseph B. Hecker, Kansas City, Mo.; Charles R. Housh, Hobart; Annie Kirksey, Cache; C. L. Katz, Anthony, Kan.; Netaniah Link, Oklahoma City; W. L. McBeth, Charlotte, N. C.; J. E. McDennell, Sidney, Iowa; Charles L. Perry, Peebles, Ohio; E. S. Patten, Carbondale, Ill.; G. O. Steyh, Burlington, Iowa; J. W. Stewart, Spadra, Ark.; R. W. Shaffer, Basin, Wyo.; R. C. Wright, Parsons, Kan.; J. R. York, Kingsfisher.

An examination will be held at Muskogee on May 18.

#### Montana.

**HELENA, May 8.**—At the April examination of the Montana State Board of Pharmacy 20 of the 24 applicants were successful, as follows:

**PHARMACISTS.**—F. C. Sheeran, of Butte; A. Crawford, of North Dakota; C. J. Knox, of Big Timber; A. C. Hawley, of Harlowton; L. C. Schen, of Glasgow; Benjamin Borreson, of Mondak; A. W. Lindstadt, of Butte; G. A. Dunn, of Big Timber; William F. Fagan, of Anaconda; Gus Swander, of Butte.

**ASSISTANTS.**—J. S. Ellis, Hillyard, Wash.; W. Fred Hornecker, Anaconda; N. P. Walters, Jr., Helena; W. W. Harris, Butte; Fred Cullen, Livingston; O. E. Potter, Great Falls; Charles E. Rice, Butte; Chester E. Pool, Townsend; S. L. Burnvold, Butte.

The next meeting will be held in Helena in October.

#### Indiana.

**VALPARAISO, May 3.**—A. F. Heineman, secretary of the Indiana Board of Pharmacy, announces that the following qualified as registered pharmacists at the April examination: G. D. Alward, Ann Arbor; Sam W. Applegate, South Bend; Carl Baker, Greenville, Ohio; Harvey R. Belton, John G. Borrey, Indianapolis; Edw. W. Brandt, LaFayette, Ind.; K. A. Brewer, Greenwood, Ind.; Hubbs E. Brown, Ada, Ohio; Thos. L. Cantrell, Valparaiso; Ralph S. Cosner, Greencastle, Ind.; H. B. Crabbs, Ada; W. E. Darnell, Indianapolis; Harry Dickson, Jamestown, Ind.; Charles Dittman, Indianapolis; R. J.

Drew, Argos, Ind.; Robert Etter, R. R. Feagans Indianapolis; Andrew Fraser, Elkhart; Herman J. Fritz, Indianapolis; H. A. Gladish, Oakland City, Ind.; Cecil Gough, Muncie; A. F. Hazinsky, South Bend; Frank D. Hastings, Indianapolis; Alice Held, Martin, C. Hoban, South Bend; R. E. Hoover, LaFayette, Ind.; Arthur Illingsworth, Muncie; L. Interblitzen, Indiana Harbor, Ind.; Walton Joachims, Belmont, Ill.; August L. Johnson, Lancaster, Ohio; George W. Johnson, D. A. Keffler, Indianapolis; Charles J. King, Terre Haute; Charles E. Phelps, Indianapolis; Thurman E. Porter, Parker, Ind.; Marti Regadan, Fort Wayne; Carl E. Reichel, Indianapolis; Earl S. Ritter, LaFayette; J. C. Roe, Valparaiso; Herman Riebling, Indianapolis; Roy Skinner, Hudson, Ind.; Frank W. Snelker, Lake Odessa, Mich.; Byron B. Thorpe, Michigantown, Ind.; Lawrence P. Upton, Evansville; S. D. Weldy, Noblesville, Ind.; E. E. Williamson, Ward Wilson, Indianapolis; H. H. Woodruff, Bone Gap, Ill.; Carlos A. Wooley, Ada, Ohio.

**REGISTERED ASSISTANT PHARMACISTS.**—E. C. Crider, Jess Dunwoody, LaFayette; Earl Forrest, Huntington, Ind.; Chas. Jones, Mitchell, Ind.; John A. Kahn, Michigan City, Ind.; Bessie Koon, Logansport; Harry C. Matthews, South Bend; H. B. Miller, Martinsville, Ind.; Albert M. Mitchell, Terre Haute; C. C. Riddell, Fred Schoeneman, Indianapolis; Earl Shields, Bainbridge, Ind.; James E. Stoops, Greencastle, Ind.; Oren A. Walker, Lerna, Ill.

#### Vermont.

**BARRE, May 8.**—D. F. Davis, secretary of the State Board of Pharmacy, has given out the names of the successful candidates, who recently took the examinations at Montpelier. Certificates as registered pharmacists have been granted to J. F. Beaulac, of Montpelier; Harry P. Woodman, of Barre; A. G. Vincent, of Burlington, and James W. Field, of Hinsdale, N. H.

#### New Hampshire.

**CONCORD, May 8.**—Secretary Frank H. Wingate, of the New Hampshire State Pharmacy Board, announces that of the class of 12 present at the recent examination, all being in the senior grade, only these two were successful: Ernest E. Haglund, of Manchester, and Edward W. Clark, of Boston.

#### California.

Secretary Whilden announces that the next meetings of the California State Board of Pharmacy will be held at Los Angeles July 19 and at San Francisco July 26.

Governor Gillett has reappointed H. O. Buker, of Fresno, as a member of the board.

#### Maine.

**LEWISTON, May 8.**—The following list of successful candidates out of the 46 who recently appeared before the Board of Pharmacy for examination has been announced: J. Fred Riley, Bangor; Ernest W. Everard, Bath; Orrin L. Miller, Carmel.

#### Aids in Enforcement of Local Option Law.

**LANSING, Mich., May 8.**—The State Board of Pharmacy is making an effort to assist in the enforcement of the local option law which recently went into effect. With that end in view, Inspector F. L. Henderson and his aides have been touring the State.

#### Charges Not Sustained Against Druggist Breitman.

David Breitman, a druggist at 156 Vernon avenue, Brooklyn, who was arrested some time ago on a charge of felonious assault and held in \$1500 bail, on the charge of having compounded a prescription of ten times the strength specified by the physician, was recently discharged and pronounced innocent of any negligence in connection with the filling of the prescription. It was alleged that the prescription called for only one tablet of morphine and atropine, with the directions "take at once," but was compounded by Breitman with ten tablets, which the patient swallowed.

#### Burglar Walks Away With Telephone Cash.

**DETROIT, May 8.**—The drug store of J. Lipsinski, 156 Gratiot avenue, was entered by a burglar, who climbed in through a transom, unlocked the door and walked out with two telephone cash boxes, which he broke open and rifled in the alley. He secured only a small sum.

## PATENTS, TRADE MARKS, ETC.

## PATENTS.

Granted May 4, 1909.

920.121—Arthur J. Farmer, Detroit, Mich. Means for extracting the contents of bottles.

920.150—Charles F. Jenkins, Washington, D. C., assignor by mesne assignments to Single Service Package Corporation of America, a corporation of New Jersey. Liquid-holding paper vessel.

920.184—Albert L. Rudolph, Jr., Camden, N. J. Non-refillable bottle.

920.224—Friedrich S. Valentiner, Leipzig-Plagwitz, Germany, assignor to the firm of Valentiner & Schwarz, Leipzig-Plagwitz, Germany. Process of manufacturing nitric acid.

920.306—Emil Fischer, Berlin, Germany, assignor to Farbenfabriken vorm. Friedr. Bayer & Co., Elberfeld, Germany, a corporation of Germany. Strontium salt of dibrom-benzenic acid.

920.335—Louis S. Hughes, Joplin, Mo., assignor to Picher Lead Company, Joplin, Mo., a corporation of Missouri. Method of manufacturing litharge.

920.336—Louis S. Hughes, Joplin, Mo., assignor to Picher Lead Company, Joplin, Mo., a corporation of Missouri. Method of manufacturing zinc oxide.

920.337—Louis S. Hughes, Joplin, Mo., assignor to Picher Lead Company, Joplin, Mo., a corporation of Missouri. Method of manufacturing zinc oxide.

920.338—Charles A. Hunt, Jr., Lexington, N. C. Bottle stopper.

920.550—William S. Dorman, Brooklyn, N. Y. Bottle-neck-forming tool.

920.562—Paul O. E. Friedrich, New York, N. Y., assignor to Caloris Manufacturing Company, a corporation of Delaware. Heat and cold non-conducting bottle or receptacle.

920.564—Sigmund L. Goldman, Chicago, Ill., assignor to E. Goldman & Co., Inc., Chicago, Ill., a corporation of Illinois. Bottle-soaking machine.

920.590—Michael Lofrus, Chicago, Ill. Non-refillable bottle.

920.598—Bulow W. Marston, Shreveport, La. Insecticide.

920.601—Otto Meurer, Cologne, Germany. Process of making metal sulfates.

920.610—Ignacy Moscicki, Freiburg, Switzerland. Process and apparatus for producing oxides of nitrogen by means of a rotary flame.

920.622—Michael Nester, Kansas City, Mo. Turn table for bottle molds.

920.771—John Melisch, Granite City, Ill., assignor of one-fifth to Steve Santha, one-fifth to Alek Ory, one-fifth to Steve Lazlo and one-fifth to Charles Hedrich. Bottle closure.

920.791—August Tonini, Grand View, Ind. Bottle strainer.

920.794—Georg Waldmann, Geestemünde, Germany. Closure for bottles.

920.824—Eva J. Clark, Glendive, Mont. Face bleach.

920.881—Johannes Reitz, Schmargendorf, near Berlin, Germany, assignor to the firm of Paul Simon, Plauen, Germany. Radium compound and process of making the same.

## TRADE MARKS.

Published May 4, 1909.

33,693—Luke H. Logan, Loco, Okla. Class 6. Remedies for catarrh, lung trouble, head ailments and stomach trouble.

36,395—Vereingte Chininfabriken Zimmer & Co., Ges. mit beschränkter Haftung, Frankfurt-on-the-Main, Germany. Class 6. A remedy for arterio-sclerosis and attendant diseases and a diuretic.

37,421—George N. Payette, Washington, D. C. Class 6. A remedy for the treatment of eczema and other skin diseases.

38,441—Arthur H. Leach, Chicago, Ill. Class 6. Remedies for excessive alcoholism.

38,786—Vereingte Chininfabriken Zimmer & Co., Ges. mit

Copy of any PATENT or TRADE MARK, 10 cents.  
Author of copyrighted work on Protective Trade Marks.  
Food and Drugs Act, and Valid Patents.  
G. H. DAVIS, Attorney, 908 G St., Washington, D. C.

(Continued on Next Page.)

beschränkter Haftung, Frankfurt-on-the-Main, Germany. Class 6. A remedy against gonorrhea and cystitis.

29,012—Edgar Levy, Natchitoches, La. Class 6. A tonic and stimulant for the hair and scalp.

29,057—Eletero Company, New York, N. Y. Class 6. Toilet ammonia.

29,058—Eletero Company, New York, N. Y. Class 6. Sea salt for the bath.

29,059—Eletero Company, New York, N. Y. Class 6. Toilet water.

29,069—Same as preceding.

29,213—Wallace A. Briggs, Sacramento, Cal. Class 6. Tooth washes, tooth paste, tooth powder.

29,221—Frank G. Ramey, Dallas, Tex. Class 6. A remedy for asthma and catarrh.

29,900—Lemare Pharmaceutical Company, New York, N. Y. Class 6. A remedy for catarrh and headache.

40,371—E. W. Vacher, New Orleans, La. Class 6. A remedy for croup.

40,416—Julius Roder, Union Hill, N. J. Class 6. Pharmaceutical preparation for treatment of the hair.

#### FORTY DRUG STORES EXPECTED TO CLOSE.

**Police Chief Predicts a Great Diminution in Pharmacies Under New Kansas Prohibition Law.**

TOPEKA, May 8. "There will not be over ten drug stores in town a month after the new prohibition law goes into effect," said Chief R. W. Eaton recently. "At present, there are nearly 50, 41 of which have permits to sell liquor. Three druggists, all of which are alleged to have been carrying on an extensive liquor business, have left the last week, and many more are preparing to close out their stocks."

"On June 1 there will be a host of bargains in Kansas drug stores. A real estate man told me today that he has 300 Kansas drug stores listed with him for sale. The hasty manner in which the druggists are quitting the business proves conclusively that a large part of them have lived entirely from their liquor trade."

#### Mr. Dawson Again President—Changes in Syracuse.

SYRACUSE, N. Y., May 10.—The Retail Druggists' Association met Friday in annual session. Edward S. Dawson was re-elected president, E. L. Weston, vice-president, and George E. Thorpe, secretary and treasurer. Herbert Walker, George Hourigan and H. E. Plum were elected an executive committee.

The past few weeks have witnessed more than an ordinary number of changes in the drug business in this city. F. B. Sherman has moved his stock from the corner of East Adams and South State street to Savannah, N. Y., and the Price Drug Company has established a store at Grape and Cedar streets. Weston & Cook, who have a store in the Empire House block in North Salina street, have established a second store, located at Court and Spring streets. H. D. Dwight & Co. has been transferred to the Dwight-Nye Drug Company; Thomas W. Dalton's store to the Weld-Dalton Drug Company; and Charles S. Ives' store to his head clerk, Charles F. Holley. Robert Bodden, who had a store at 709 South Geddes street, now has the store at Midland avenue and West Colvin street, formerly conducted by R. B. Jones.

#### Veteran Druggist Champions Patent Medicines.

MADISON, Wis., May 8.—Patent medicines came in for more than their share of opposition at the recent annual conference of the Dane County physicians and druggists held at Turner Hall. In fact, patent medicines would have received the worst of the discussion had it not been for Edwin Sumner, the veteran Madison druggist, who acted as a staunch champion against the onslaughts of the doctors.

Dr. M. P. Ravenel, of the University of Wisconsin, marshaled the opposing forces with a paper on patent medicine advertising in which careful aim was directed toward fraudulent information offered to the unsophisticated concerning causes, symptoms, seriousness and results of ailments and diseases. The relation of the druggist to the physician and vice versa was ably discussed by Mr. Sumner.

#### To Oblige the Patron.

"Waiter, there's a chicken in this egg!"

"Right, sir. I'll fetch a knife and fork, sir."

#### PROPRIETARY ASSOCIATION IN SESSION.

**Membership is Now 212, Including 168 Actives—Business All to Be Finished Within the Four Days.**

The 27th annual meeting of the Proprietary Association of America was called to order by President Frank J. Cheney, in the East ball room of Hotel Astor, New York, last Tuesday morning, shortly after 11 o'clock. President Cheney made no formal address, but in a few remarks requested prompt transaction of business and called the attention of the members to the fact that it was the intention to clean up all pending matters, for which purpose the time of meeting had been extended to four days, instead of two.

The report of Secretary Orient C. Pinckney showed a total membership of 212, of which 168 are active, and 44 associate members. During the year the following firms were admitted to membership: Orator F. Woodward, Le Roy, N. Y.; C. G. Hanford Manufacturing Company, Syracuse, N. Y.; The Judge & Dolph Phar. Co., St. Louis, Mo. It was stated that there were several applications for membership to be acted upon by the executive committee at this meeting. The resignations of Andrew Jergens Company, Cincinnati, Ohio, and Olney & McDavid, Clinton, Iowa, were reported.

President Cheney appointed W. A. Talbot, of Warren, Pa., chairman of the nominating committee which is to report this morning the names of the candidates for next year's officers.

Tuesday afternoon was devoted to the reports of the various committees and several informal discussions.

David Watson, president of the Proprietary Association of Canada, addressed the meeting yesterday on the subject of the Canadian Proprietary Act and explained a number of disputed phases of the law.

There is a fair-sized attendance, and considerable work has been accomplished, so an early adjournment is looked for tomorrow. The informal dinner is to take place tomorrow evening.

The officers of the association whose terms expire this year are: President, Frank J. Cheney, Toledo, Ohio; first vice-president, John W. Kennedy, Chicago; second vice-president, A. H. Beardsley, Elkhart, Ind.; secretary and treasurer, Orient C. Pinckney, New York.

#### Medicine Company Sued for Death Damages.

MILWAUKEE, May 8.—Suit will be started at once by Shelby County against a patent medicine company of Jackson, Mich., to recover damages for the death of Martin Hilger, aged 24 years, of Adell, Wis., alleged to have been caused by the taking of a medicine advertised by the Michigan company.

It was revealed at the inquest of Mr. Hilger that he had given up treatment under his family physician after receiving circulars of the marvelous cures made by the patent medicine in question. It is claimed that he sent for several bottles of the mixture and began taking the doses as directed, but that he continued to fail rapidly, according to the testimony of witnesses at the inquest. An investigation by the coroner and relatives of the deceased revealed the fact that the physician at the head of the medicine company was not registered and at the advice of the Michigan State Board of Health, suit will be brought by the coroner of Shelby County.

#### Fort Worth University Has Commencement.

FORT WORTH, Tex., May 8.—At the graduating exercises of the Medical and Pharmacy Departments of Fort Worth University held in St. Paul's M. E. Church on Tuesday evening, the degree of Ph.D. was conferred upon the following students who had successfully completed the course of study: Harry T. Thornberry, Young R. Anderson, Robert M. Russell, John T. Carlton, William David Butler, Edward E. Crawford and J. Howard Christian.

#### Prof. Jurrjens Made Laboratory Assistant.

MADISON, May 8.—John C. Jurrjens, a graduate of the School of Technology, Amsterdam, Holland, has been made laboratory assistant in the department of feed and fertilizer inspection in the College of Agriculture at the University of Wisconsin. Professor Jurrjens has specialized in sugar chemistry and has held the position of chemist in sugar factories in Austria, Germany and at various points in the United States.

## GERMAN APOTHECARIES DISCUSS THE N.F.

**Paper by E. C. Goetting and Otto Raubenheimer Displays Samples of Preparations to Be Included in the New Edition—All-State Pharmacy Act of Legislature Unanimously Approved.**

The meeting of the New Yorker Deutscher Apotheker-Verein, held last Tuesday evening, was one of interest from start to finish. The subject under consideration was an exhaustive paper on the preparations of the National Formulary, presented by E. C. Goetting, and which was afterward actively discussed by a large number of the members present, among them several who took a leading part in the compiling of the original work, the New York and Brooklyn Formulary, which subsequently developed into the National Formulary.

Emil Roller, chairman of the scientific committee, introduced Mr. Goetting after a brief reference to the importance of the subject, which he referred to as especially timely, due to the fact that revision was now going on and recommendations together with criticisms of value to the revisers could be discussed. Mr. Goetting reviewed in a most exhaustive manner the history of the work from its inception down to the present and quoted opinions and various views written about the work by eminent pharmacists and scholars. Mr. Goetting also stated that there were different opinions as to whether the book was recognized by law and stated that with the exception of the supplement the other parts of it were.

Most of the members who took part in the discussion coincided with Mr. Goetting regarding what he brought out in his paper. President Felix Hirsman and W. C. Alpers, as well as others, favored a revision of the Formulary at least every three or four years, considering that period lengthy when it was considered that the book should contain the newer medicines. The injection into the Formulary of imitations of proprietary remedies was strongly condemned, and H. L. Reiss referred to a lecture held several years ago before the society in which the speaker expressed the opinion that there were too many professors on the revision committee and too few practical pharmacists, and this view was indorsed by a number of members.

Otto Raubenheimer, the New York member of the National Formulary Revision Committee was present, and exhibited a number of samples of preparations to be included in the forthcoming edition of the work. Mr. Raubenheimer stated that he attended the recent meeting of the revisers in Philadelphia and outlined what was accomplished. Through Mr. Raubenheimer, invitations were given the members by Professor Remington to attend the annual convention of the American Medical Association in Atlantic City on June 11.

Mr. Roller requested members to join the scientific committee, of which he is chairman, and Mr. Alpers, Mr. Goetting, Mr. Raubenheimer and Carl F. Schlössner did so.

A communication from President Peter Diamond, of the New York State Pharmaceutical Association, relative to the All-State Pharmacy Bill, evoked a discussion on the merits of the bill. George Kleinman, chairman of the legislative committee, offered several objections to the measure but withdrew opposition on being informed by Dr. Alpers the meaning of the paragraphs which did not suit him at first. President Hirsman stated that he was heartily in favor of the measure and also believed that it would be signed by the Governor. The bill was finally unanimously indorsed, after a strong recommendation by President Hirsman.

Otto P. Gilbert, chairman of the entertainment committee, announced that arrangements were being made for the annual summer outing of the society, at Witzel's Pavilion, College Point, L. I., on July 8. The committee will visit the pavilion on June 10 for an informal outing and requested the members to attend.

Dr. Alpers urged all members to be present at the joint meeting between the New York Branch of the American Pharmaceutical Association and the New York County Medical Society in the Academy of Medicine, on May 19. The tentative programme of the papers to be presented at this meeting was read by Dr. Alpers.

An invitation written in a humorous style from William Bodemann, of Chicago, requesting the members to be guests of himself and John Block, referred to as the two Dronio secretaries of the Chicago V.D.A., on Jamieson Day, June 21,

elicited considerable laughter. President Hirsman advised the members to accept the invitation.

The memory of Gustav Bischoff was honored by the members, who rose in a body while President Hirsman made several remarks and gave some reminiscences of the life of the deceased, who was the messenger and collector of the society for more than 23 years.

A warrant for \$50 was ordered sent to the treasurer of the State Association to help defray expenses during the coming meeting at Richfield Springs. Emil A. Bischoff, of Bay Side, L. I., was elected a member.

## OBITUARY.

**Conrad D. Maurer.**

PHILADELPHIA, May 8.—Conrad D. Maurer, head of D. Maurer & Son, manufacturers of insect powders, died at his home at Abington on Wednesday, aged 46. Too close attention to business is attributed by his friends as the primary cause of his breakdown two weeks ago. Originally the business was at 119 Race street, but as it grew the present building at 329 North Eighth street was purchased. He is survived by his widow and two children.

## Obituary Notes.

—H. J. ARTHUR, Webster City, Iowa, is dead.

—W. H. COLLINS, Kansas City, Mo., is dead, aged 60.

—H. F. C. BIERMANN, Taylor, Texas, is dead. He was from Indiana and leaves a wife and child.

—BUNTING S. HANKINS, retired, Bordentown, N. J., is dead, aged 78. He leaves a widow and two children.

—DR. FRANCIS HENRY PUTCHOFF, Civil War veteran and former druggist, is dead at Hamilton, Ohio, aged 68.

—DR. HENRY MARSHALL PINKARD is dead in Washington, D. C., aged 72. He was a Confederate Veteran and a Mason.

—FREDERICK G. CORBIN, formerly of Binghamton, N. Y., is dead in Brooklyn, aged 53. A widow and three children survive.

—EDWARD C. PARAMORE, a widely known chemist of Philadelphia, is dead as the result of injuries sustained by being struck by an automobile.

—CHARLES DUNHAM DESHLER, who died recently, aged 90, at New Brunswick, N. J., was a druggist early in life, but became a newspaper man.

—FRANK A. SIDLES, retired, is dead in Lincoln, Neb. He went West from Pennsylvania in 1871 and was 68 years old. A widow and two sons are left.

—C. A. LAMBRUM, DeFuniak Springs, Fla., is dead. Mason and Confederate Veterans attended his funeral. A widow and six children survive.

—WALTER L. RUSH, prominent druggist of Bessemer, Ala., is dead, aged 42. He recently resigned as mayor on account of ill-health. He leaves a widow and four children.

—DR. DAVID H. MILLER, for 40 years engaged in the drug business in Franklin, Ind., is dead, aged 67. He served in the Civil War and leaves a widow and married daughter.

—W. W. CUBBISON, for many years proprietor of a drug store in New Castle, Pa., is dead of pneumonia. He had been fire chief and held other offices. A widow and three children survive.

—MAJOR JULIUS G. RATHBUN, aged 75 years, long one of the best-known druggists in New England, died in the home of his daughter, Mrs. Charles G. Stone, in Hartford, Conn., recently. Besides the daughter, a widow and one son survive him.

—WILLIAM W. KNEESHAW, a veteran druggist of Philadelphia, died at his home at Wissahickon, aged 66. He was a graduate of the Philadelphia College of Pharmacy, class of 1866, and was formerly in the chemical firm of Kneeshaw, Norris & Co. His widow and two daughters survive him.

## Baltimore Men at Medical Association Meeting.

BALTIMORE, May 8.—The local branch of the American Pharmaceutical Association will be represented at the meeting of the section on pharmacology of the American Medical Association in Atlantic City by Dr. John P. Hancock, Dr. E. F. Kelly, the secretary of the branch; William M. Fouch, Charles L. Meyer and H. A. B. Dunning. These five were appointed delegates of the branch. Some other Baltimoreans are expected to go, however.

# THE DRUG MARKETS

## FEW NEW FEATURES SINCE LAST REPORT.

### Opium Higher in Primary Markets. But Lower Here Owing to Competition—Inquiry Good on Quinine.

NEW YORK, May 10.—Market conditions are practically as noted in our last report, and general business continues of moderate volume. Opium is easier here, but higher in primary markets. Serpentina root is scarce on the spot, and with a good demand, tendency is upward. Juniper berries of good quality are decidedly firmer, with sales of large lots at advanced prices. Insect powder is more active, and conditions are favorable for a higher market. Citric acid is easier in the open market, but manufacturers' prices are unchanged. Refined camphor is in demand but no change in prices; Cannabis indica is firmer, and an advance in values may be looked for. Buchu leaves, short, are tending upward; Norwegian cod liver oil quiet. Sulphate of quinine is unchanged, but there is some inquiry for good-sized lots.

OPIMUM.—Cable advices from Smyrna report the weather as unfavorable for the crop, and the market there is fully 10 to 15 cents per pound higher. Our own market, however, is weaker, owing to competition, and the price for case lots for the present is \$4.25 per pound, but this may be advanced at any time. Powdered and granulated remain at \$5.25 per pound for lots of 25 pounds or over. The arrivals in Smyrna for the week ending April 16 amount to 2047 cases, against 1378 cases at same period last year.

QUININE SULPHATE.—Manufacturers' prices are unchanged, and the demand has been confined to jobbing parcels only, and while there has been some inquiry for 5000-ounce lots, no orders have been reported as being executed for these lots. The regular monthly sale of cinchona bark was held in Amsterdam last Friday, and the unit price reported \$2.20, as against 3.15 for the previous auction. The quantity sold was said to be three-fourths of the offerings, and since the sale went off firmer it is inferred in some local circles that the remainder was withdrawn. The trade does not look for any material change in value. The shipments of cinchona bark from Java to Europe for the month of April amount to 1,280,000 pounds, against 1,305,000 pounds for the corresponding month last year.

NORWEGIAN COD LIVER OIL.—The market is very quiet, which is not unusual for this season of the year. There is no change in value, and an active market is not looked for until the fall season. The total yield of all the fisheries in Norway to the 3d instant amount to 45,700,000 fish, producing 38,035 barrels of oil. The result as compared with previous years is as follows, 1907, 38,500,000 fish, producing 32,940 barrels; 1908, 37,900,000 fish, producing 42,330 barrels.

BUCHU LEAVES, SHORT.—The market is not well supplied and consequently prices have an upward tendency. The quotations are at present 32¢@35¢, per pound in bale lots for green, as to grade and seller. At the regular drug auction in London last Thursday, only seven bales were offered, and nearly all was purchased for American account at 1s. 3d.

VANILLA BEANS.—An active demand continues with strong markets reported for all descriptions, and similar conditions are noted at primary sources of supply. Advices received recently from Mexico indicate unfavorable weather conditions for the 1909-10 crop, owing to drought, and it is estimated that the output will be only 25 per cent of the preceding crop.

CANNABIS INDICA.—Under the influences of decidedly stronger markets abroad, local dealers recently advanced prices to \$1.25 for prime East India tops and report sales at this figure.

JUNIPER BERRIES.—A limited stock is still available at 4¢@4½¢, as to quantity, but the tendency is upward, as there is a fairly good consuming demand, and supplies of desirable grades are steadily diminishing.

CITRIC ACID.—Owing to keen competition among sellers this article is easier. Manufacturers continue to quote 39¢, per pound for barrels and 39½¢, for kegs, but there figures are more or less nominal, as business is being done by second hands on a lower basis.

ASA-FETIDA.—Desirable grades are reported very firm at 25¢@26¢, in large quantities, and bids only a shade under the inside figure were recently refused.

MENTHOL.—A better demand is reported and the tone of the market is slightly firmer. Quotations, however, are unchanged at \$2.15¢@2.20, as to brand and quantity. All cheap lots recently offered are said to have been bought up.

BALSAM FIR, CANADA.—This article is again higher and now held at \$7.50 per gallon in 5-gallon cans. Oregon balsam is in better supply and the market is lower, the price for barrels being now 90¢, per gallon; in 5-gallons cans, \$1.00 per gallon, inclusive.

## DRUG TRADE SECTION OPPOSES BROWN BILL.

### Fear Expressed That State Guaranty Would Work

#### Hardship to Accused Jobbers and Manufacturers.

The Drug Trade Section of the New York Board of Trade and Transportation at its meeting on May 5 discussed legislation. As certain provisions of the Brown Pharmacy Bill relating to the guaranty of proprietary medicines were objectionable to the jobbing and manufacturing trade it was decided to offer opposition to the measure at the public hearing announced to take place on May 11.

The members of the section are opposed to what is known as the "State Guaranty," which they say will necessitate an additional guaranty on their goods if properly enforced, in conjunction with the National guaranty. The sponsors of the bill, however, state that a guaranty on the invoice will be all that is necessary in order to live up to the provision if the Act becomes a law.

The feature relative to having all articles under U.S.P. names of the strength specified in the Pharmacopoeia, and allowing no deviation even if so stated in the label, as is permissible under the National law, is also one that conflicts with the views of the manufacturing interests who want the provision affecting this matter to be similar to the Federal Pure Food and Drugs Act.

The manufacturers also contend that there is a possibility of other States enacting legislation along the same line which would require them to secure different guarantees in every State in order to do business. When the Brown Bill was amended in the Senate and the provision stricken out requiring outside manufacturers to appear in New York courts to defend violations it was thought by the local interests acting for the manufacturers, that the chief objectionable features had been eliminated, but on a closer study of the bill the manufacturers say that the amendment did not relieve them from requirements with which it will be impossible to conform.

Relative to propositions submitted to the section by G. O'Neill to establish a special committee to promote trade with Latin-America the executive committee to whom the matter had been referred reported adversely to the appointment of such a committee, as it was considered an undertaking impracticable of accomplishment at the present time.

Thomas P. Cook presided in place of Chairman George W. Kemp, who was unable to attend.

Chairman Kemp has appointed a committee to revise the official rates. This committee consists of Irving McKesson, of McKesson & Robbins; Joseph H. Velsor, of Peck & Velsor; S. M. Monneypeuny, of National Aniline & Chemical Co.

### Too Overdose Strychnine, Summons Aid With Pistol.

Herman Powers, a research chemist, and graduate of the New York College of Pharmacy, recently saved his own life in a most novel manner. Powers had been ill for several months and one evening last week was taking strychnine under the care of a physician. He largely increased the dose himself and became too weak to summon aid. Before becoming unconscious he managed to secure his pistol and fire several shots, which attracted attention so that an ambulance was secured which took him to a hospital where antidotes were administered. The physicians say that it was a narrow escape. Powers was formerly a druggist.

### Druggist Wartman an Advocate of City Parks.

The Bay View Civic Club, of Milwaukee, recently held a successful meeting at the Wartman Pharmacy, the proprietor of which is interested in the work of outdoor art and is advocating park improvement for his section of the city.

# THE PHARMACEUTICAL ERA

PUBLISHED EVERY THURSDAY

VOL. XLI.

NEW YORK, MAY 20, 1909

No. 20

D. O. HAYNES & CO. - Publishers

90 WILLIAM STREET, NEW YORK

Telephone, 2457 John.

Cable Address: "Era, New York."

Western Office:

Room 500, Dickey Building, 40 Dearborn St., Chicago

Telephone, Central 5888

## SUBSCRIPTION RATES.

United States, Cuba, Hawaii, Porto Rico, the

Philippines, and Mexico . . . \$2.50 a Year

To Canada, postpaid . . . 3.00 a Year

To Foreign Countries in Postal Union . . . 4.00 a Year

Single Copies . . . 10 Cents.

ALL SUBSCRIPTIONS ARE PAYABLE STRICTLY IN ADVANCE

Published every Thursday at 90 William Street, Borough of Manhattan, New York, by D. O. Haynes & Co., a corporation; President and treasurer, David O. Haynes; vice-president, Ezra J. Kennedy; secretary, Edward W. Drew. The address of the officers is the office of this publication, and the title is registered in the United States Patent Office.

*Entered at the New York Post-Office as Second Class Matter*

## Re Photographs for "Era Album"

### Illustrated Section

Each subscriber to The Pharmaceutical Era is entitled to representation in this work, and is invited to send us his photograph. We do not require a subscription from each partner and clerk. If the firm or proprietor is a subscriber, the other partners and clerks may have their portraits included for \$1.50 each. To secure all of the Album sections one must be a subscriber to The Era in his own name.

In sending photographs be sure that each one is distinctly labeled with the name, address, business, profession or occupation of the person, written clearly on the back of your photograph. A good plan is to write it on a printed label and stick it on the center of the back of your photograph. Here is a good specimen:

#### FOR ERA ALBUM.

Fred S. Rogers, Middletown, N. Y.

McMonagle & Rogers.

Ex-Pres. N. Y. State Phar. Assn.

When additional photographs of partners and clerks are sent, each one should have written on it the name of the subscriber who sends it, as well as the name of the person in the photograph.

### Cabinet Photographs Only

The style of photograph we require is the so-called "cabinet" size, with the head about two inches long. If other sizes are furnished they interfere with our plans for keeping the faces uniform, also prevent us from classifying the cuts by localities.

In view of the great amount of work we are assuming, to have each of our subscribers properly represented in this Album, we feel that we are not asking too much when we request each subscriber to supply us with the size and kind of a photograph which will facilitate our work and best enable us to do him credit.

In forwarding photographs for the Album, see that they are distinctly addressed as follows:

THE PHARMACEUTICAL ERA.

90 WILLIAM ST., NEW YORK.

For Era Album

### A CASE OF TOO MUCH SECRECY.

It is a hopeful sign that the Proprietary Association of America is awakening to the fact that too much secrecy and too much aloofness is standing in the way of the advancement of the interests of its members and that means are being devised to remedy this ill advised condition. At the session just ended in New York, which was as secret as any of its predecessors, resolutions were passed proclaiming the importance of publicity and arranging for an aggressive campaign for elevating the business and raising the qualifications for membership in the association. This ought to have been done years ago and it would have done no harm to have shown evidence of sincerity last week by opening the doors of the convention to the newspaper men.

Retail druggists have always viewed the secret meetings of the proprietors as being productive of compact of and by the manufacturers that might be expected to work to the disadvantage of the retailers. Whether true or false in this suspicion the secrecy gave color to the thought and the refusal to give any information even to the trade journals set the druggists to conjuring up what might have happened, when the simple telling of the truth would have prevented all misunderstanding.

### INTRODUCING PROPRIETARY REMEDIES.

Both clumsy and costly is the old way of introducing patent medicines to the general public through the means of enormously expensive advertising campaigns in the newspapers. The new way is exactly the reverse, for it is as simple as it is inexpensive and contemplates the use of the natural agent in introducing remedies, the same being the retail druggist. In one of its forms, that of selling the goods at auction to the druggists of the country there is offered an excellent way of making attractive profit producing inducements to druggists who are invariably inclined to push the remedies of the proprietors who work the hardest to fill the pockets of the retailers with the increment of wealth.

One concern that has tried the new auction method of introduction has found that it pays better to give the money to the retail druggist rather than to pay it to the newspapers for advertising. It is a custom that can be used with equal advantage by the manufacturers of old remedies as well as by the promoters of new articles. Those employing it are in the position of enjoying some advantage over their rivals by practically paying their selling agents more for their services and it need not require a wise mind to discern the inevitable results. The value of general newspaper advertising for medicines has never been

absolutely demonstrated. No doubt some sales are made solely through this medium, but the great bulk of the public is only influenced in a collateral way by these announcements. Almost everybody who wants a remedy, advertised or unadvertised, goes to the drug store to obtain it and is more often than not amenable to the advice of the druggist. The druggists themselves sell fully 90 per cent of the proprietary medicines and as a matter of fact these retailers should enjoy the profits instead of the newspapers. There is food for thought in all of this for the proprietors who are now bent on "elevating the business."

#### HOW TO ACHIEVE A REPUTATION.

In the drug trade, manufacturing, wholesale and retail alike, one of the chief factors in continued success is reputation. It is a jewel of intrinsic worth, it can never be fully measured by the money standard, but it is as indispensable as the air we breathe. Acquiring a good reputation is a work of long continued effort, especially in business. Essentials of equal importance are fair dealing and advertising. Neither alone can win. In the matter of advertising the ERA has aided many important firms in obtaining the recognition which reputation gives to those who acquire it. In all efforts in that direction the best means is constant iteration. In a terse epigram, which strikes a key-note in successful advertising, Arthur Brisbane, the famous New York editor, says:

..... :  
: Reputation :  
: is :  
: Repetition. :  
..... \*

These three words give both cause and effect in a nutshell explanation of the presence in our advertising columns week after week, year after year, of the announcements of the leading merchants who have trade dealings with the retail druggists of the country. No more triteful truth has ever been so concisely expressed.

#### A TYPE OF THE UNIVERSITY REGENTS.

The recent election by the Legislature of Chester S. Lord as a member of the Board of Regents of the University of the State of New York is of particular interest to pharmacists in view of the relation which that body will have to the New York State Board of Pharmacy, if the Governor approves the new Pharmacy Act. Mr. Lord was born in Seneca County, New York, his father having been a Presbyterian clergyman and a fighting chaplain in the Civil War, serving in the 110th Regiment. Chester Lord finished his education in Hamilton College, '73, and after a short service on newspapers in Oswego, Utica and Syracuse came to this city. In 1880 he was made managing editor of the New York *Sun*, a post which he continues to hold. Mr. Lord is one of the few men who have made conspicuous successes of whom it may be said that he has thousands of friends, but no enemies. Able to a supreme degree, he has been both kind and just in his intercourse with others. The

*Sun* is a monument to his untiring, conscientious and well-directed efforts.

With men like Chester S. Lord on the Board of Regents there is much more than a mere assurance that appointments to the Board of Pharmacy will be well considered and eminently satisfactory.

#### INTERNAL REVENUE AND THE DRUGGISTS.

Mr. Pritchard, of Pittsburg, by his paper on the Internal Revenue Department and the druggists, has brought forth from the Acting Commissioner a very direct and comprehensive statement of the relations of the two in the matter of dispensing alcoholic compounds, as will be found on page 477 of this issue of the ERA. The fact that the department is not a police bureau, but is solely a medium for the collection of revenue, is clearly set forth and at the same time the communication describes what must be done to enable druggists to avoid conflict with the law in the handling of articles containing alcohol.

One noteworthy result of the controversy is the declaration of Washington City Branch against the use of "booze" in all medicines. The position taken is emphatic and if followed by a large number of druggists will do much to clear away the clouds created by the traffic in alcohols and near-alcohols which is carried on by many of them under the guise of selling legitimate medicines.

#### STRANGLING THE BROWN ACT?

If Jacob Diner's prophecy that the Brown Pharmacy Reform Act will be choked to death in the Executive Chamber shall be fulfilled nobody will be greatly surprised, although thousands of earnest workers for the betterment of professional conditions will be grievously disappointed. With practical politicians arrayed against it, with men who fear the imposition of penalties opposed to it and with wounds made by secret thrusts in what ought to be the house of its friends there will be cause for wonder if the measure survives all of the assaults upon it and becomes a law.

But perhaps Mr. Diner, who is credited by many with the paternity of the ill-fated Conklin Bill, may be looking through opaque glasses, for the Brown Act was drawn to meet Governor Hughes' wishes, was submitted to him for approval several times and was revised under his direction before it was presented for passage in the Legislature. If he shall now see any faults in the Act it will be due to the activities of the opponents of the reforms which the measure seeks to bring into existence.

If the "Mapleine" Pure Food Law decision, reported in the last issue of the ERA, is appealed to a higher court the result will be watched with interest, for the verdict marks a new step forward in the fight against adulterations. Purity of product was conceded and the only issue was whether the label was misleading, which the jury decided in the affirmative.

Propaganda work by the New York State Ph.A. is progressing satisfactorily if the recent up-State meetings of physicians and druggists can be taken as a criterion. Under the leadership of Dr. Anderson the results obtained are distinctly practical.

Dr. Wiley, who sailed for England last week, will be a nota-

ble figure in the Chemical Congress to be held in London. It is by no means surprising to learn that he is expected to divide the honors with King Edward in opening the great gathering.

Rockford (Ill.) is growing better, if we are to judge by the decrease of liquor sales by druggists in that city. For March the number was 628 less than in the corresponding month of 1908.

One effect of Canada's new law prohibiting the distribution of samples of medicine either by messengers or through the mails will be either a considerable saving of money to the manufacturers or its availability for other and more valuable forms of publicity. It is doubtful if the promiscuous scattering of free samples has ever been really remunerative.

The worst enemies of a book, theory or drug are those who claim infallibility for it.

Willard A. Smith, of Richfield Springs, N. Y., who is the local secretary for the forthcoming meeting of the New York State Pharmaceutical Association at that interesting point, was one of the original members of the organization, his connection with it dating back to 1870. Mr. Smith has been an earnest worker in behalf of the association and for the elevation and advancement of pharmacy, as is also shown by the fact that his membership in the American Pharmaceutical Association dates back to 1890. Mr. Smith needs no introduction to the pharmacists of the State and they all are expecting the hearty greetings that will be extended by him and his associates to the sojourners at Richfield Springs during the convention period of June 22-25.

Associated with Mr. Smith on the committee, as heretofore announced in the ERA, are W. H. French, of Worcester; George S. Shinde, of Ontario; Charles A. Scott, of Cooperstown; Wm. H. Whitehead, of Herkimer; J. V. Downs, of Ilean; Frank H. Howard, of Mohawk; Charles J. Zipp, of Utica; J. G. Black, of Richfield Springs. The membership committee also is working vigorously to recruit the ranks, and taken altogether the coming convention of the New York State Pharmaceutical Convention at Richfield Springs next month promises to be one of the largest, most interesting and best in its history. As the showmen would say: "The report of the legislative committee alone will be well worth the price of admission."

With each succeeding year scientists are giving more attention to the house fly as a menace to health, and in New Jersey the Department of Labor has gone so far as to issue an order that on or before May 20 of each year all bakeries in the State shall have doors and windows screened so as to keep flies from coming in contact with foodstuffs in course of preparation. The Legislature of Kansas has enacted a law of similar purport.

In dealing with flies the first consideration is to keep them off the premises, and to do this screens are all important. In addition, this precaution may be supplemented by keeping the rooms dark, for darkness forces a fly to seek a safe landing place, in which he will remain until he sees daylight again.

But, in spite of all this, flies will enter the house, and they must be caught. Unsightly as it is, the old-fashioned fly paper is the most effective thing that comes for the purpose. The sweetened, sticky stuff is a certain lure to the insects, and they never escape from the entanglement. The paper has its drawbacks, for many a time and oft have the grown-ups of the house inadvertently placed hands or elbows on it, and baby has often eluded the mess to its hands or face. One excellent way of meeting these objections was described under the caption "Fly Drums" in the ERA of April 22, page 376.

The poisoned black paper which is placed in a saucer of

water, which becomes impregnated and is supposed to kill the fly that slips it, is not a great success, for the fly, even if it takes the poison, lives long enough to get behind a picture or something else out of sight, where it lies indefinitely after death.

But fight the fly in the house as you would a pest, for that is exactly what it is.

American girls who wear puffs, curls, switches, rats and so forth will be interested to know that these contrivances are made mostly from the hair of Chinamen, gathered in the interior of China and exported from Hong Kong. Interesting also is the fact that the vogue of false hair has increased to such an extent in America that, while in 1907 there were 56,133 pounds of human hair shipped from China, in 1908 the shipments increased to 207,214 pounds.

These facts are made public in a special report of Vice-Consul General Stewart J. Fuller, of Hong Kong. After quoting the figures given above, Mr. Fuller says: "In 1907 all the hair was stored before shipment, but in 1908 the demand was so much greater that a heavy proportion of the shipments were fumigated and disinfected instead of being stored."

One hundred immense floats, which, it is said, will surpass the splendor of any ancient or modern spectacle, are to be displayed in the processions attending the Hudson-Fulton celebration in New York City this autumn. As a part of the celebration, which will commemorate the 300th anniversary of the discovery of the Hudson River and the 100th anniversary of the application of steam to navigation by Fulton on the same river, one historical pageant and a carnival parade will be held on Tuesday, September 28, and another on Saturday night, October 2. Each parade will have 50 immense floats. The first 50 are nearly finished.

W. A. SMITH, Richfield Springs, N. Y., Local Secretary for the meeting of the New York State Pharmaceutical Association June 22-25.

HAS FRIENDS.  
"Don't fool yourself."  
"I won't. I don't have to."

Having rejected the American quick-bunch with scorn, the Londoner is to be given an opportunity of trying the British quicker bunch—in other words, the automatic quarter-bunch, as supplied by the New Automatic Food Supply Company. This British invention consists of a machine which, when a shilling is inserted, delivers a paper mache tray containing a meal of several courses and the necessary condiments and table implements. Each machine holds 30 trays, which the customer may inspect before purchasing. The machine tests the inserted coin, and if it is a bad one cuts it in halves and throws out the pieces.

The menus include salmon, salmon mayonnaise, oysters, cutlets, chops, steaks and sausages. In the summer there will be ices, fruits and cream, and cooling drinks. The machines are to be installed, for a start, on race courses, in music halls, railroad stations, trains and big city offices.

The chief of one of the leading hotels in Berlin states that kangaroo flesh is the delicacy now most in demand by pampered palates. As the carcasses have to be brought from Africa, and never can be procured in large quantities, exorbitant prices are charged for a portion.

One of the many novelties exhibited at the Chicago electric show was the time-a-phone. Attached to one of the posts of a booth was a small device about the size of a watch case, but looking like a small telephone receiver. This receiver was connected to a small green cord of insulated wire, says the Philadelphia Record. When this device was held to the ear and a button pushed the listener could hear the exact time of day.

A set of musical chimes strike the hour, a set of double gongs give the quarters and a high pitched bell tolls off the

minutes. To a man in the dark the time-a-phone tells the time to a minute. It is planned to use this invention in hotels where each room will be provided with one of the instruments, connected to a master clock in the basement. The time-a-phone is placed under a pillow, and any patron wishing to know the hour has only to apply the receiver to the ear and press a button.

Every ambitious drug store clerk will find something worth his while in the following words from a recent issue of the *Grocery World*, which are in the main even more applicable to the retail drug trade than to the grocery business:

"One of the first things I am reminded of is the use of the telephone and the many, many customers and friends of the store that are lost each year by reason of the treatment they have received over the 'phone."

"I have been in stores all over the country, and the impatience displayed by some clerks when taking orders or answering questions about deliveries, is something awful. A customer won't stand for it. You shouldn't expect him to. You wouldn't yourself. It's the unpardonable sin."

"It is not only necessary not to be gruff, or short, or show signs of impatience, but it is absolutely necessary for the good of the business, which means your good, to go out of your way to be just as pleasant as possible over the 'phone."

"The customer likes it—the chances are you will hear of it, for people will naturally boast if you please them, and they can't help but say to their friends or to the boss, 'It's a pleasure to give an order to so-and-so over the 'phone,' or something to that effect. And little things like this count big in your favor."

"I talked with a clerk once with whom I am pretty well acquainted who had just been guilty of knocking the store and himself over the 'phone, and tried to show him the error of his ways. He replied: 'If you knew the man I was talking to you would have been just as gruff. And we've got a half dozen more just like him.'"

"We went into it a little deeper then, and he admitted that he was badly out of line. He had never tried to be a little more than pleasant with any of them over the 'phone."

"Sometimes a customer will complain of his treatment over the 'phone, and in rare cases the trouble is remedied, but more frequently the customer says nothing, but simply quits trading with you and goes elsewhere."

"There are two ways of talking to a customer over the 'phone—a right way and a wrong way! When you answer a ring don't grab the receiver and yell 'well?' or 'what is it?' Never under any circumstances address a person over the 'phone any different than you would if you met them face to face in the store."

"The proper way would be to say, with a rising inflection of the voice, either 'yes?' or (according to the spirit of the store), 'hello!' or 'what can I do for you?' or 'what is it, please?' or something equally polite and agreeable to listen to. Be sure to remember the rising inflection."

"You are certain to find that the customer's reply will be just as polite and agreeable. The rest of your conversation, whatever may be the subject, should be along the same lines. Even if he is as mad as mad can be, your gentlemanly and polite manner in opening the conversation drives his mad away. In straightening out the kick your battle is already half won."

"If you are in doubt about the system working, just try it out."

"It pays to make friends over the 'phone, and it's easier done than in the store."

H. Gordon Selfridge, of Chicago, whose great stores at a single bound have taken a premier position in the forefront of London's finest establishments, has taken such an uncompromising firm stand on the "tipping" question that something very like a revolt began to spread among the employees, especially among those in the tea room and restaurant. On pain of instant dismissal every penny pocketed was instantly to be disgorged.

The employees protested and threatened to walk out in a body. Mr. Selfridge insisted and asked whether they preferred losing permanent situations for the uncertainty of a few charitable coppers. Gradually the Selfridge argument prevailed and a pile of coppers and small silver was placed on a table. Altogether some \$30 was collected, which was promptly

sent by Mr. Selfridge to a prominent children's charity. This welcome destination for the "tips" inspired the waitresses and now, when any monetary tribute to the excellence of the service is left behind, it is promptly dropped into a box and devoted to Mr. Selfridge's pet charity.

Four-year-old Paul Montfort, who was killed recently by falling through a window of a South Side elevated train to the sidewalk in Chicago, was known among his friends as "the most photographed boy in America."

His father, A. W. Montfort, is a photographer, who does a large amount of commercial work, and whenever a firm wished a baby boy's picture to advertise its goods Mr. Montfort used his little son as a model. Some of the firms using the boy's picture are National advertisers, and thus the face of the lad has looked from streets, newspapers, magazines and billboards upon residents of hundreds of cities and towns. In one of his most widely known poses the boy is smiling as a brand of soothing powder is being shaken over him. In another noted pose he is playing with a safety razor and laughing. Millions of persons have seen his picture taken while seated upon a tin bath tub amusing himself with a cake of soap.

Some druggists are so busy discovering the weaknesses of their clerks that they have no time to discover and develop their own strength.

To recent volcanic disturbances is attributed the appearance of "the well of death" in a stream near Puebla, Mexico. The Mexicans are terrorized by it. The place has been known as a bathing resort for many years, but recently when a man jumped in for a swim he sank and was drowned almost immediately. Two psons on the bank jumped in to save him and also perished. Investigation disclosed that a gas spring has broken out in the bottom of the pool and the waters are full of its poison. Now the natives avoid it as if it were a devil's creation.

Though "one-half the world doesn't know

How the other half lives," no doubt

The feminine half of that half

Is doing its best to find out.

Boston *Herald* gives the following interesting account of liquor sold in a "dry" Massachusetts city: "With the close of Worcester's first year of no license the police liquor squad has made a report of liquors brought into the city by express companies; also the number of sales of liquor made at the license drug stores, of which there were seven until May 1."

"The figures show that the shipments of liquors by express through wholesale dealers, who have an agreement out of the city for shipments, average 650 cases and 130 eight-gallon kegs of beer a day for 306 days, Sundays and holidays being eliminated. Added to these figures are 150 gallons of hard liquors, all being classed under the head of whiskey."

"The slips from the licensed drug stores show that to persons who signed for the liquor to be used for medicinal purposes there were 110,000 sales, which the police say mean 29,080 quarts, 87,243 pints."

A druggist who is doing business on a tallow candle standard may have plenty of "tass," but it is never of the illuminating sort.

The Radium Institute of Heidelberg will be the first to commence actual work, as an endowment has been secured for it, and it is to be opened for work before the end of the year. Radio-active material is close at hand, as there are sedimentary deposits in the springs in Kreuznach, from which radium-containing substances can be obtained.

The London County Council has taken a dislike to ragtime music and has barred it from the programmes of the park bands. To make up for the loss of these popular items the public is to be supplied with gramophone performances. The Council is spending several hundred dollars per season on the hire of talking machines and records.

The drug store clerk who talks about the ease with which he fools women patrons is the one who fools away a great deal of time with them.

## The Prosperity of Zwebend.

By Emma Gary Wallace.

The rocky island of Zwebend had been independent such a little while that strong men bent zealously over their labors in order to supply the public need, and thrifty women toiled cheerfully at their housewifely tasks.

Each worker for the public good chose him a Cell in which to work, entirely apart from his fellows, and fearing further distractions placed the windows quite too high for any purposes of outside observation. In this condition of isolation they labored with great industry from week's end to week's end, until many of the strong men became less strong

and all looked like unto vegetation which had grown under a board. A strange and mysterious ailment began to develop which the men of much learning pronounced to be the fearsome disease known as Grouch.

The products of this system of individual labor were of varying degrees of excellence. Some of it was carelessly planned and executed in a slipshod manner. Some of it was exceedingly good and honestly wrought, but few—very few produced their best. "What is the use?" the majority inquired, "these stupid Zwebenders will never know the difference, much less appreciate our most highly skilled efforts!"

Just at a time when ennui had overtaken all, a fine traveler appeared wearing a gold-laced coat, a hat with a long white feather, and riding a coal-black steed. He stopped at each Cell, shook hands heartily with its lone occupant, wiped away a frequent fear of sympathy, and then drawing forth from his capacious saddle-bags attractive samples of whatever style of goods his host had been in the habit of making, urged in lulet tones the advantages of buying from him. He pointed these out so convincingly and in such a charming manner that his hearers were invariably impressed and they straightway bought and then sat them down to rest.

Next came a tall silent man, who although quietly attired, also rode a dark horse. He cantered slowly along, pausing at the Cell doors and gazing earnestly into each. In some of them he saw men who regarded him sleepily, in others those who were entirely indifferent to his presence, and in still others those who appeared altogether too busy to give him a thought.

"Those who are asleep have no trade to lose," he murmured, "those who are indifferent do not care, and those who are so rushed that they cannot even glance up should be willing to share with others and even be grateful for the assistance."

At the Inn where he paused for refreshment he registered as the Prince Serve-All, Philanthropy Park. Continuing his journey he came into his own estate and calling forth his steward gave orders for the erection of a Mammoth Emporium, which was to offer under one vast roof all the wares offered by the small bazaars. He then created a brand new office and electing a proper incumbent caused him to be called the Lord of Publicity. This personage was instructed to let every person on the island know that the new Emporium was to be stocked with absolutely the best and lowest priced goods on earth, and that each dame who did herself the honor to deal with the Emporium should have her picture enlarged free of cost. There would be a trifling and not-worth-to-be-mentioned charge for a massive frame of dazzling brightness.

Now as the homes of the Islanders were exceedingly bare, even to baldness, and as the strong men and the pale men and the men with the awful disease Grouch were seldom at home—for which latter fact the Lord of Publicity was all on account of the habit they had formed of staying continuously at the Cells, the women took great heed of this fine offer.

It was a pious and worthy object, the dames decided, to make their homes beautiful by getting something for nothing. So well did the Lord of Publicity do the work assigned to him that the Emporium aisles were promptly blocked with an eager throng.

The silent Prince Serve-All rubbed his hands gleefully and

prepared a new gift (oh, when all should have secured the "speaking likeness." To be sure, some complained that the pictures looked strangely alike and insisted that they were inartistic, but they were silenced by the argument that art could not improve on nature. Others grumbled that the frames quickly tarnished and the goods were no better nor cheaper than those in the little bazaars, and yet the throngs continued to come, grumblers and all.

Many of the keepers of the Cells did not see the crowds going thitherward nor that their own wives and daughters were among the number. Again a stranger came. It was an emissary of the honorable government of Zwebend, who announced a heavy tax on all that the roads to the Emporium might be made more passable. Then indeed some awoke and wailed loudly finding not the wherewithal to pay the tax to pave the way to their competitor's door.

Many men with gold-laced coats now traveled the country and more Emporiums were opened and the man became rich and powerful who composed the beautiful song.

Pray, make not for yourselves the goods you can buy.

You can't do as well, however hard you may try.

The day of things that are home-made is over.

The ready-made user lives in deep clever.

So, it was not strange that skilled hands lost their cunning and more taxes were demanded for more roads to the new Emporiums. Great was the discouragement in the land and some declared that the knife was not only being driven deep into the vitals of commerce but that it was being twisted ruthlessly around.

Then arose six or seven of the suffering ones and cried out: "Truly, alone we are weak, but united, who can measure our strength!"

Some answered heartily to the call, many sulked behind closed doors and beneath cob-web hung windows. A jealous one said snarlingly: "He who talks, would feather his own nest!" Some vowed that "it was better to let well-enough alone." Others said indignantly: "We have endorsed these wild ideas three whole weeks and we have received no appreciable benefit, we will have no more of it." Still others, "Why should we pay eleven gold pennies a year to support a forlorn hope, and that, too, when our children need shoes?"

Those who labored heed not, and lo, as they worked their own sense of hopelessness slipped away like a garment. They called in the workers in wood and stone and had their windows lowered so that they could see out and the sun could shine in upon them.

They found some willing to labor for the common good and they found many more who were like horses in a burning building, refusing to be led out of danger into safety. The keepers of the Emporiums and the men in the gold-laced coats at first paid little heed to the agitation, but after a time it was noticed that they redoubled their efforts to hold their own and this encouraged the little band of earnest men nightly, and they were often heard to whistle and sing.

Quality products with service to match

Unlulls the stout string of Prosperity's latch.

The women ceased to be fascinated with the sniffling pictures and the scatchily-voiced talking machines, and having listened to their husbands and fathers they said: "These are indeed strange things. Can it be possible that the high standards of Zwebend have been thus lowered? We women-folk will likewise awake and form a Circle which shall embrace every woman on this green island, and such was their earnestness that they did it right speedily.

"Now," said they, "we will appoint a Committee of Seven of the fairest minded dames of Zwebend, and shall ask them to establish a 'White List,' and nowhere else shall we purchase our hominy or linsey woolsey or the Hiera Piera for our children than of these good men and true whose names appear on this honorable List. This List shall be our guarantee."

At first many laughed, others pranced excitedly to and fro in their offices, but in three weeks 80 per cent of the retail dealers of Zwebend had complied with the requirements of the "White List," and the other 20 per cent were so nearly dead with the Grouch by this time that it did not matter about them anyway.

Trade being thus turned into its normal channels, the organization for the Readjustment of Business Conditions and

the Maintenance of Public Confidence became so strong that much good was accomplished for themselves and for others.

They came to see that the man who lives in a Cell with the windows too high to see out of, is little better than a blind man. That to consider self alone is usually to be left to self—and too often the company is none of the best. That the public good often demands temporary sacrifice to insure future safety. That the most symmetrically rounded personalities can never be developed by isolation. That the best work is done by the best equipped, and proper equipment calls for the association of a BROTHERHOOD OF UNITED INTEREST.

They also recognized that merchant princes, middle-men and taxes all have a part in the evolution of conditions. That if an individual goes to sleep or sits calmly by while some one else appropriates his means of support, he has no one to blame but himself. That Progress, Publicity and Preparedness are all in the same class, and that the help of the women who are the buyers for the homes is not to be underestimated.

The evil days had passed forever in Zwobend, simply because its people had awakened to the Power of Organization. No legitimate business could be hand-shipped if it complied with the regulations of the "White List."

Long live the Prosperity of Zwobend.

## FORMER PUPILS HONOR LATE PROF. PARRISH.

Interesting Exercises at Presentation of Picture to Philadelphia C.P., of Which He Was President.

PHILADELPHIA, May 15.—In the presence of many former pupils of Prof. Edward Parrish, who died in 1872, and who at that time was president and professor of pharmacy at the Philadelphia College of Pharmacy, on Monday gathered at the college to honor his memory as well as to participate in the exercises which marked the presentation of a large crayon portrait of Professor Parrish by Prof. James M. Good, of the St. Louis College of Pharmacy. The same day a party consisting of representatives of three generations of descendants of the well-known educator, as well as former associates, attended the anniversary of the laying of the corner-stone of Swarthmore College, of which institution Professor Parrish was the first president.

The formal presentation of the picture was made by Professor Good. It was accepted by President Howard B. French, Prof. H. P. Hynson, of the Baltimore College of Pharmacy, paid a beautiful tribute to the memory of Professor Parrish and referred to his accomplishments. Thomas McElhenie, of Brooklyn, a former pupil, and Thomas Wiegand, librarian of the college, gave some interesting reminiscences of 40 years ago, while members of the Parrish family from Brooklyn also spoke briefly.

Professor Parrish was elected to the chair of materia medica at the College of Pharmacy in 1864. In 1867 he became professor of theory and practice of pharmacy, which position he held until his death at Fort Sill, Indian Territory, in 1872, when he was succeeded by Prof. Joseph P. Remington, the present dean. He was widely known as the author of Parrish's Practical Pharmacy.

## Prescriptions Compounded While the Trains Pass.

SYRACUSE, N. Y., May 15.—George E. Thorpe, proprietor of the Yates Pharmacy, has acquired a rapidly growing popularity with New York Central railroad trainmen who apparently seem to know where to stop to have a prescription filled when in a hurry. Four times recently trainmen have jumped off the front end of an eastbound passenger train in front of Mr. Thorpe's store and run in to have a prescription filled in a hurry. Each time the man had his purchase in his pocket when he jumped onto the rear end of his train. One prescription contained four drugs. A fifth prescription Mr. Thorpe had to refuse because of a short train and a lengthy prescription.

## Wedgeood Club Entertains Dr. Caspari.

BALTIMORE, May 15.—At the Wedgeood Club's last monthly social session Dr. Charles Caspari, Jr., was the guest of honor and made an address, others following with remarks in a light vein. John R. Thomas presided. Charles Steyer, Jr., the Baltimore representative of the Whitall Tatum Company, was initiated to the entertainment of all the Wedgeoodites who have gone through the mill.

## Sky-Lights and Brick-Bats.

By Joel Blanc.

Once upon a time there was a husky youth who was enjoying himself by throwing brick-bats upon the roof of his home. After having thrown an unusually large slice of baked clay, he rushed into the house to get a slice of bread and lasses. He got the slice all right! The slice of brick crashed through the sky-light and fell through the stair-way just in time to take a slice out of the young athlete's scalp, keeping him under the influence of its forceful anesthetic while a peck of falling glass traced a map of Boston on his phiz. This reminds me of

some druggists who are very glib in handling the "clerk problem." I shall now interrogatively and hypothetically proceed to exhibit a choice collection of broken sky-lights.

A number of years ago there was a boy who was clerking, or rather, "boy-ing," in one of the Mississippi Valley cities. He appeared to be a bright chap and I came in contact with him often enough to watch him grow. For a year he worked for six dollars per month because he was being "prepared for college" by his employer. From all I could see and learn, the "preparing" consisted of delivering packages and cleaning the store. At the end of the year the boy entered college and his wages were reduced to five dollars per month on account of the time used in college attendance. But it did not matter much about the pay, for the boy's mother had some money and was determined that he should be a professional man and she considered it a rare privilege to have her boy employed by one who sported Phar.D. after his name. At the end of the year the boy left college. He could not keep up with his classes and his employer told him that he could pass the board just as well after he had made his time by two years more service in the store. Other druggists said that the boy would have had as much pharmaceutical training in a glue factory as he received under that Phar.D. He went before the board and failed, and then tried and failed again. Then he jumped the traces and secured a position with a lawyer who was neither a gronch, a grafter nor a "skin." That boy came out of law school as an honor man and is now a brilliant lawyer with a large practice. Does the history of this case prove that competent young men are tempted from the drug business by shorter hours or that the employer of this boy was merely a grafter of cheap labor?

I have in mind the dean of a small college of pharmacy who, at the time of which I write, was the occupant of the chair of commercial pharmacy. He was supposed to teach the young men how to keep store. The dean's own store was looked upon as a joke by many and as a shame by a greater number. The front part of this store was kept in only fair condition; but the back room, which was nearly as large as the front, was indescribably filthy. Every student in the college knew what sort of store-keeping was done by his dean. Will you tell me that examples of this kind have nothing to do with making clerks "disorderly, unclean and generally deficient in business knowledge," as they are said to be?

In another part of the country I heard a druggist say that clerks as a class were so deficient in chemistry that urinalysis was beyond most of them. The man who made the statement was a trustee of a college with a toilet room so unsanitary and unclean that it would not have been tolerated in a railway station. In this room was gathered the material for instruction in "practical work" in urinalysis, the manipulations being performed with ancient, heavy, acid-stained hydrometer jars through which the readings of the urinometer scale could not have been seen with a microscope and a search-light. Is not that which is permitted in a college, virtually taught? May I ask if pharmaceutical etchies—But perhaps we had better pass this.

Some time ago I read a letter in which the writer complained that clerks do not take a lively interest in the affairs

of their employers, that they resent instruction and avoid the acquirement of knowledge of business details and that their only thought is to avoid both mental and physical effort so far as that may be possible.

The gentleman who made this accusation keeps no books except upon his check stubs and his memoranda of credit sales are dotted down in a ten-cent, manila paper scratch book. He has no cash register, his stock has never been inventoried, he has no store index or any stock system, he never checks prices on his merchandise invoices and he tells travelers not to call between 11 and 3 or after 5.30, because he is trying "to make up for the rest and recreation he lost when he was a clerk." Will some one kindly tell me what sort of business instruction such a man is qualified to impart?

Some months ago a certain successful druggist complained that clerks were becoming specialists and were unwilling to make themselves generally useful as he claimed he had to do when he was a clerk. This druggist has a large business in a small city. He employs from six to eight hands. He has two registered men and two qualified assistants at all times and says that his prescription business demands them. He rarely keeps a clerk for three months or, to be exact, it is rarely that a clerk stays with him three months. In his store there is a work table upon which there are at all times labels to be trimmed, specialty materials to be assembled, drugs to be measured into counter-sales packages, and so on. Employees are expected to be occupied every minute while on duty, and as there is generally a shortage of help registered man, assistant, soda dispenser, boy and colored porter are compelled to work side by side at that work table. Will those gentlemen who are in favor of a post-graduate course in pharmacy kindly inform me if such a course should include bottle-capping, cork-pressing, powder-folding and label-trimming?

A member of a board of pharmacy states that evidence of the general deficiency of clerks is shown by their low averages in practical pharmacy in board examinations. I have seen this board member jam a filter paper into a funnel without folding it. I have seen him use an acid-tainted graduate for a prescription containing an alkali and then get in a rage about "impure drugs." In his store, the blades of the spatulas are as black as the handles. Mortars, graduates and pill tiles are dumped into the sink and left there until wanted and the sink faucet furnishes all the "aqua destillata" that is used in the store.

I was fairly familiar with the criticisms heaped upon those who may be said to have been included in the past generation of clerks and they were criticized just as much as the present generation is. But although many of them are now store owners they appear to have forgotten past criticisms. Were they better than the present generation? Did the majority of them experience some miracle of eldritch when they became store owners? Did the toppers become saints and the dopers become deities? If the standard of intelligence of the clerks of 15 and 20 years ago was no higher than the standard of clerks of today, is it safe to assume that the standard of the druggists of today is relatively higher than the standard of clerks when the druggists were clerks or of clerks now?

Is not the standard of the instructed dependent upon and controlled by the standard of their instructors? Is a faculty better than its college or a business better than its owner?

If the human product of pharmaceutical theory is inferior to the ideals of the theorists, who is responsible, the theorists or the product? Does the druggist who does not train his minor help properly expect some other druggist to properly train senior help for him? If the store training and the college training fail to balance each other is not one or the other detrimental instead of advantageous to the candidate for board examination? Is not each generation mobbed by the example of its teachers as well as by the character of their instruction? Is it not human for the boys to copy the practices of the men who pay them rather than to follow the theories of the instructors whom they pay?

Is it not true that clerks as a class suffer by comparison with their exceptional degenerates while druggists as a class profit by comparison with their exceptional pargons?

#### Druggists Guests of the Doctors.

COVINGTON, Ky., May 15.—Druggists were among the guests at the recent joint meeting of the Campbell and Kenton County Medical Societies. F. C. Hauser, of this city, read an interesting paper on the "United States Pharmacopoeia."

## QUESTION BOX

**THE OBJECT** of this department is to furnish our subscribers and their clerks with reliable and tried formulas, and to discuss questions relating to practical pharmacy, prescription work, dispensing difficulties, etc. Requests for information are not acknowledged by mail, and ANONYMOUS COMMUNICATIONS RECEIVE NO ATTENTION; neither do we answer questions in this department from non-subscribers.

In this department frequent reference is necessarily made to information published in previous issues of *The Era*. Copies of these may be obtained at 10 cents each, except a few issues which are out of print, for which we charge 25 cents each.

#### Syrup of Garlic; Syrup of Onion.

(W. H. C.)—Syrup of garlic was formerly official in the U. S. P. of 1890 and the formula appears in the appendix of the N. F. (See page 229). A so-called "artificial syrup of garlic" may be made from the following formula, credited to Thomson's practice:

Tincture of asafetida .....	1 fl. dram.
Concentrated acetic acid .....	6 fl. drams.
Simple syrup .....	16 fl. ounces.

According to King's American Dispensary, a syrup of onions is often prepared extemporaneously for coughs by slicing one or two onions, and laying the slices upon each other with sugar between. This is set by the fire in a saucer or glass vessel, and kept there until the juice of the onion and the sugar have, by the aid of heat, formed a syrup in the vessel. It may be given freely.

#### Lotion for Removing Freckles.

(N. W. R.)—Try one of the following:

(1)	
Ammonium chloride .....	2 drams.
Zinc sulphocarbonate .....	20 grains.
Glycerin .....	2 fl. ounces.
Orange flower water .....	5 fl. ounces.
Elder flower water .....	20 fl. ounces.

(2)	
Mercuric chloride .....	10 grains.
Glycerin .....	2 fl. drams.
Rectified spirit .....	2 fl. ounces.
Rose water .....	20 fl. ounces.

(3)	
Lactic acid .....	1 fl. dram.
Glycerin .....	2 fl. drams.
Ammonium chloride .....	30 grains.
Boric acid .....	15 grains.
Tincture oforris .....	1 fl. ounce.
Tincture of benzoin .....	2 fl. drams.
Elder flower water .....	20 fl. ounces.

Mix the tinctures and pour them into the elder flower water in which the other ingredients have been dissolved.

#### Thymol as a Taenicide.

(J. M. Y.)—"Will you kindly publish in the Question Box of the next *Era* what vehicle is the best to use in the administration of thymol to infants from one to five years old. I desire to know in what liquid the thymol could be used most favorably. The child is the victim of tapeworm and I would like to know the maximum dose for an infant two years old."

This seems to be a case for the physician rather than the pharmacist, for while thymol as an anthelmintic is especially recommended for the destruction of the tapeworm, its use is attended with some danger. The usual method of administration outlined by medical authorities is for the patient to begin by taking four teaspoonfuls of castor oil in the evening, following it the next morning by two drams of thymol, well triturated, in 12 doses, 15 minutes apart, and giving 20 minutes after the last dose four teaspoonfuls more of castor oil. Of course, this dosage is recommended for an adult, but according to Roth (*Modern Materia Medica*) "such large doses are risky, even when, as is recommended, their administration is combined with stimulants such as rum or brandy, in

order to prevent a lowering pulse, temperature and respiration."

Thymol may be suspended with acacia in almost any aqueous syrupy liquid, but its administration should be under the direction of a competent physician. The average adult dose as given by the Pharmacopoeia is two grains; on the basis of Young's rule for computing the dosage for children the average dose of thymol for an infant two years old would be two-sevenths of a grain.

#### Face Powders.

(J. S.)—"Fatty" face powders have a small percentage of fat mixed with them in order to make the powder adhere to the skin. "Pharmaceutical Formulas" gives the following formula for "lanoline toilet powder which is good and workable, and fairly typifies the manner in which any powder may be made 'fatty.' It is theatrical people generally who require this class of powder."

Anhydrous lanoline .....	1 dram.
Magnesium carbonate (light) .....	3 drams.
Ether .....	4 drams.

Put the lanoline in a mortar and dissolve in the ether, add the magnesia, and mix well. Dry and add the following:

French chalk .....	2 ounces.
Starch .....	1½ ounces.
Boric acid .....	1 dram.
Perfume .....	a sufficiency.

Mix well. A good perfume is:

Coumarin .....	2 grains.
Otto of rose .....	2 minims.

Here are two formulas of the type of face powders in general use:

#### (1)

Zinc oxide .....	3 pounds.
Precipitated chalk .....	18 pounds.
Talcum .....	3½ pounds.
Rice flour .....	6 pounds.
Perfume .....	4 ounces.

For flesh tint color with a little carmine, while brunette is produced by burnt umber. This should be bolted through cloth to get the best results.

#### (2)

Precipitated chalk .....	23 parts.
Powdered talcum .....	24 parts.
Bismuth subcarbonate .....	7 parts.
Zinc oxide .....	17 parts.
Corn starch .....	30 parts.
Oil rose (or rose geranium to suit).	

#### Compound Elixir of Glycerophosphates.

(D. H. H.)—The following formula which appeared in the ERA last year produces an elixir which contains no sugar:

Calcium glycerophosphate .....	128 grains.
Sodium glycerophosphate .....	128 grains.
Iron glycerophosphate .....	16 grains.
Manganese glycerophosphate .....	16 grains.
Quinine glycerophosphate .....	8 grains.
Strychnine glycerophosphate .....	1 grain.
Glycerin .....	4 ounces.
Alcohol .....	1 ounce.
Lactic acid .....	45 minims.
Water, sufficient to make .....	1 pint.

Rub the calcium glycerophosphate to a smooth paste with 1 ounce of glycerin; add 3 ounces of water and 30 minims of lactic acid. Dissolve the iron and manganese glycerophosphates by heat in 1 ounce of water, to which 15 minims of lactic acid has been added. In this solution dissolve the quinine salt and add the whole to the calcium glycerophosphate solution. The sodium glycerophosphate is dissolved in about one ounce of hot water; the strychnine glycerophosphate is also dissolved in a little water, and both are added to the above solution. The remainder of the glycerin and all of the available water and alcohol are mixed and then added to the solution of the glycerophosphates.

#### Fined \$200 and Jailed for Sixty Days.

Str. Johns, Mich., May 15.—Clifford U. Smith, an Elsie druggist, pleaded guilty in Circuit Court to having violated the local option law, and was sentenced by Judge Searl to 60 days in the county jail in addition to paying a fine of \$200.

## Original and Selected

### THE COMPARATIVE COLOR VALUE OF TURMERIC

By W. A. Pearson, Philadelphia.

Turmeric enters our market in two forms, as "fingers" and as "splits." The so-called fingers are the rootlets and the splits are the roots.

Four samples were furnished us by Mr. H. B. French. No. 1, splits; No. 2, Pubna fingers; No. 3, Madras fingers; No. 4, Pubna fingers from another firm.

The samples were powdered separately. The splits gave a yellowish brown powder. The powders from the Pubna fingers were both brownish red and a much deeper shade than either of the other varieties. The powder from the Madras fingers was of a bright yellow color and of much superior appearance to any of the other samples.

Five grams of the powder from each sample was placed in a Gordin extraction percolator and extracted with alcohol, about 125 cubic centimeters was required in each case. The percolates were all made to a volume of 125 cubic centimeters and the colors compared.

The tincture from sample No. 1 splits is the least colored of all and resembles the tincture made from sample No. 3 Madras fingers in intensity and color, with the exception that it has a slight greenish shade and is not so bright a yellow.

The tincture from sample No. 3 Madras fingers is a beautiful bright yellow. The tinctures from both samples of Pubna fingers were of a brownish red appearance and the color was about two and one-half times as intense as the other two.

The Madras fingers are of a much higher price and gave a better color to alcohol, but only about two-fifths as intense as Pubna fingers. The color of the powdered Madras fingers is also more desirable.

We have been informed that powdered turmeric is now on the market artificially colored with a yellow aniline dye. This adulteration could undoubtedly be detected by applying the double stain test given in Official and Provisional Methods of Analysis of the Association of Official Agricultural Chemists, and by noticing the characteristic changes with boric acid and ammonia.

### AROMATIC ELIXIR.

By Ralph R. Johnston, Phar.D., Bucyrus, Ohio.

Aromatic elixir is officially recognized in the U.S.P. as an aromatic, sweetened, spirituous preparation, containing compound spirit of orange 1.2 per cent, syrup 37.5 per cent, alcohol 23.8 per cent and water 37.5 per cent. This elixir has an agreeable taste and odor, and was introduced into the U.S.P. to be used as a pleasant vehicle with therapeutic value almost nil.

While this elixir was intended to be used in U.S.P. and N.F. preparations and in prescription work simply as a pleasant and harmless diluent, it is actually true that in many instances the principal activity of the elixir is due to the alcohol and this has often proved injurious. This objection has also prevented an extensive official recognition of elixirs, the U.S.P., 8th Revision, recognizing but three, only one of which—elixir of iron, quinine and strychnine phosphates, is intended to be used for its therapeutic value.

Aromatic elixir contains 23.8 per cent of alcohol and this proportion of so active an ingredient will at once be recognized as rendering it objectionable for use as a harmless diluent and vehicle. With this thought in view, a series of experiments were conducted to develop a preparation which should be equally as efficient as the official aromatic elixir, yet one which should contain so small a proportion of the objectionable ingredient as possible.

First a quantity of aromatic elixir was made according to the U.S.P. and used as a standard for comparisons. Then 1000 Cc. of elixir (Sample No. 1) was made in every respect according to the official formula for aromatic elixir except that glycerin was used in place of the alcohol. This preparation was found to be very sweet and syrupy, and decidedly unpleasant to the taste.

Sample No. 2 was made in a manner entirely foreign to

the U.S.P. method. Instead of making a solution of the compound spirit of orange and the alcohol and to this adding the syrup in small portions at a time, and afterwards adding the water and mixing the tale with this liquid and filtering, the method was changed by adding the compound spirit of orange to the tale and triturating thoroughly. To this was added the glycerin (238 Cc.) in several portions, triturating after each addition. In like manner the syrup (375 Cc.) and finally the water (375 Cc.) were in turn incorporated with the solution. The liquid was then filtered through a wetted filter. Lastly the filter was washed with a mixture of one volume of glycerin and three volumes of distilled water. In making the elixir in this manner the method was found to be very expeditious, simple, practicable and altogether satisfactory, producing as fine a preparation as the U.S.P. method and that in considerably less time.

This method of manufacture being found to produce such satisfactory results, it then remained to find the right proportions of glycerin, alcohol and water to be used in attaining the desired purpose of making a preparation which should contain the least possible alcoholic contents. On the other hand, the elixir was required to contain enough alcohol to make its "keeping qualities" permanent and its taste agreeable. In order to ascertain this point a large number of samples of aromatic elixir were made. Four were made by adding the glycerin to the U.S.P. formula; that is, glycerin was added to 12 Cc. compound spirit of orange to make 250 Cc., then syrup (375 Cc.) was added to this solution in divided portions, the mixture being agitated after each addition, after which there was added to it in the same manner, a mixture of glycerin, alcohol and water in various proportions, as follows:

Sample No. 4. Alcohol 5 per cent, glycerin 20 per cent, water 75 per cent.

Sample No. 5. Alcohol 10 per cent, glycerin 15 per cent, water 75 per cent.

Sample No. 6. Alcohol 15 per cent, glycerin 10 per cent, water 75 per cent.

Sample No. 7. Alcohol 20 per cent, glycerin 5 per cent, water 75 per cent.

The tale was then added to this liquid, the solution filtered through a wetted filter, the first portions of the filtrate being returned to the filter and run until a transparent liquid was obtained. The filter was then finally washed with a mixture of alcohol, glycerin and water in the same proportions as those used in the previous sample, to make 1000 Cc. None of these four samples (Nos. 4, 5, 6 or 7) were found to be as aromatic or nearly so satisfactory as Sample No. 2, which was made according to the "revised" method.

Four more samples were then made according to this "revised" method, the ingredients varying only in the quantities employed. In these samples the compound spirit of orange was added directly to the tale, triturated thoroughly, the syrup added to make 375 Cc. and finally adding glycerin, alcohol and water, not in a mixture, but in proportions as used in the previous lot of four samples, as follows:

Sample No. 8. Glycerin 20 per cent, alcohol 5 per cent, water 75 per cent.

Sample No. 9. Glycerin 15 per cent, alcohol 10 per cent, water 75 per cent.

Sample No. 10. Glycerin 10 per cent, alcohol 15 per cent, water 75 per cent.

Sample No. 11. Glycerin 5 per cent, alcohol 20 per cent, water 75 per cent.

These solvents were added in the order named, the solution, after each addition, being triturated thoroughly. It was then filtered and the final product brought up to the required amount (1000 Cc.) by mixing the glycerin, alcohol and water in the proportion previously used.

In order to test the "keeping qualities" of these preparations a "bacteriological" method was used. In this, conformity to the conditions which these elixirs would be under in the average drug store, was the principal object. This was accomplished by testing about 5 Cc. of each of the last eight samples of elixirs and one sample of the U.S.P. aromatic elixir in as many test tubes. Six specimens were taken from each of these nine elixirs. Two of these six specimens were inoculated with a spore-producing organism, two were inoculated with an organism which would produce a mold growth, using *Bacillus subtilis* for this purpose, while the remaining two were not inoculated. Six specimens of each of the nine

elixirs were taken, making a total of 54 test tubes in the lot. These were then plugged with cotton and put into a closet, where they were kept at a temperature of 30° C. for two months. Two specimens of each sample were used for comparison so that one would act as a check on the other.

Another lot of these specimens, each selected from the nine samples of elixirs, was treated in the same manner, in sterile test tubes only, the object being simply to ascertain if sterilizing the container enhanced the keeping qualities of the contents. These experiments not being conducted "under drug store conditions," but little stress was put on the results.

At the end of two months, after having been kept in the heated closet continually, the specimens were taken out and the following results noted: Samples Nos. 4, 5, 6 and 7 were all found to have developed mold growth in both of the specimens which had been inoculated with the spore and the *B. subtilis*, while the specimen which was not inoculated also showed a mold growth but not to such a marked degree. These specimens ranked from a very pronounced mold growth to one not so noticeable, the growth apparently depending upon the per cent of alcohol each contained, the quantity of mold decreasing as the alcoholic strength increased.

The other series of specimens, Nos. 8, 9, 10 and 11, showed far better results. These contained besides the syrup and compound spirit of orange, alcohol 5, 10, 15 and 20 per cent, and glycerin 20, 15, 10 and 5 per cent, respectively, and water 75 per cent, used in the menstruum. The first one (containing 5 per cent of alcohol) was a little cloudy from mold growth, but all of the others were in excellent condition, showing that they had withstood the tests and were permanent preparations.

Sample No. 9 was the first one containing the least amount of alcohol to come through these series of tests in a perfect condition. This was taken as the basis of the final experiments which contained 12 Cc. of the compound spirit of orange, 363 Cc. of syrup, and alcohol 10 per cent, glycerin 15 per cent and water 75 per cent, to make 1000 Cc.

With one more step overcome, a large number of elixirs were made in order to improve their aromatic properties. In all of these preparations the "improved" formulas with the above percentages of alcohol, glycerin and syrup were used. Oils of cinnamon, clove, nutmeg, orange, lemon, cardamom, etc., were used in all possible proportions and combinations in order to take the place of the compound spirit of orange. The aromatic qualities of these preparations were tested by numerous "martyrs of the cause" who happened to come into the laboratory. As a result of these tests the consensus of opinion was that the aromatic qualities of the compound spirit of orange used in the official preparation could hardly be improved upon.

Finally, in summing up all of these points the following formula and method of preparing an "improved" aromatic elixir is submitted:

Compound spirit of orange.....	12 Cc.
Purified tale .....	30 Gm.
Syrup .....	363 Cc.
Glycerin .....	98.7 Cc.
Alcohol .....	62.5 Cc.
Water .....	468.7 Cc.
Mixture of alcohol 10 per cent, glycerin 15 per cent and water 75 per cent to make .....	1000 Cc.

To the 30 Gm. of tale add the compound spirit of orange. Triturate thoroughly and then add the syrup in several portions, triturating the mixture after each addition. In the same manner add the glycerin, alcohol and finally the water. When thoroughly mixed, filter the liquid through a wetted filter, returning the first portions of the filtrate until a transparent liquid is obtained. Lastly wash the filter with a mixture of alcohol 10 per cent, glycerin 15 per cent, and water 75 per cent, until the product measures 1000 Cc.

### A Popular Dye.

A small boy was one day sent for a pennyworth of indigo dye. He stopped to play marbles on the way, and quite forgot what he was sent for. As he was determined to get it, he went into the chemist's shop and said to the assistant:

"What have people been dyeing with lately, please?"

"Influenza," was the answer.

"Ah! that must be it," said the boy. "Please give me a penn'orth!"—*Illustrated Bits.*

# LETTER BOX

## "Question of Veracity at C.R.D.A. Meeting."

Editor The Pharmaceutical Era:

In your issue of the 6th instant you publish an article dated Chicago, May 1, stating in part as follows: "Mr. Cannon, of the executive board, asserted he had seen a letter from President Ryan, of Parke, Davis & Co., approving the stand taken by Manager Bartlett." In this worthy Chicago informant has misstated the facts.

Mr. Cannon, however, did state that he had seen a copy of a letter written by President Ryan, of Parke, Davis & Co., in which Mr. Ryan had endorsed the action of Mr. Bartlett. The article further states that Mr. Carr denied that Mr. Ryan approved Mr. Bartlett's position. The undersigned can hardly believe that so careful a man as Mr. Carr would make such a statement under any circumstances and particularly when he knows that the facts are out.

I quote you in part from an article written by Mr. Carr and intended for *Notes* publication, but later suppressed by Mr. Putts, as follows: "Notes wrote P. D. & Co., requesting a Cascara Tablets, 5 grain, the druggist pays the jobber 24 cents. Most fair minded druggists will testify that a charge of 65 cents when an unbroken bottle of tablets costs 24 cents is simply handed out over the counter is *too much*."

Mr. Bartlett says in his letter to Mr. Born, which has since become notorious as the "P. D. Letter": "Any druggist who charges you 65 cents for 100 Tablets in our original bottles, overcharges you." Now, kind reader, if Mr. Ryan does not sustain Mr. Bartlett, what does he do?

The writer would gladly call your attention to the statement of your Chicago informant which proves his total disregard for the truth. He says: "The incident was finally referred to the executive board for such action as may be deemed expedient." What actually happened at this stage of the proceeding was this: It was voted on motion of Mr. Cannon to concur in the action of officers in connection with the publication of the "P. D. Letter." There was but one dissenting vote on this proposition. In conclusion, I would respectfully commend the author of your information to the tender mercies of Theodore Roosevelt for final disposition as a ranking member of the Ananias Club. Yours truly,

Chicago, May 10.

T. F. CANNON.

## "Wanted—A Man."—Qualifications a la Oswego.

Editor The Pharmaceutical Era:

Noticing the very interesting address delivered before the Prescott Club at Ann Arbor of a successful man in the drug trade I am moved to ask you to insert the enclosed advertisement for me.

A. B.

Oswego, N. Y.

### MAN WANTED!—A THINKING DOER.

I want to hire a man I want him to know more than I do but he must be careful so that he doesn't let me know that he THINKS he knows more; also he must be a good salesman and sell more of My Remedies than I do; I want one who is a quick, handy man anywhere, one who never loses his temper, must be a good dresser and mixer but of course I expect him to work the same hours that I do. I, personally, never have time to mix much because I'm always tending to business.

I don't want a steady man or one that has been long out of a job; it's the steady worker that does the most. I don't want a man just from college, they're too smart and haven't had long enough experience; I'd like one that had been a manager or head man in some big city store so I could really learn from him. I think maybe, that the man who wrote about things sometimes almost as they ought to be, might do, but I don't suppose he's got a N. Y. State license.

I don't want any fellows, or any sickly fellows, but I want a good live MAN, one that knows when to talk and when to shut up and if I can get such a man, why darn the expense, I'll go as high as fifteen dollars a week. Address, Me, HERE.

## Mr. Bacon Resides in Roland Park.

Editor The Pharmaceutical Era:

On page 431 of your issue of May 6 I find an article written in reference to myself which is misleading. It stated that our Governor gives Baltimore three members of the Board of Pharmacy, leaving out the central part of the State. I wish you would correct that in your next issue, as I live at Roland Park, Baltimore County, Md., and have lived there for

the last ten years, with the exception of about one year, and then in 21st street, Baltimore City.

Roland Park, Md.

EPHRAIM BACON.

[The Era correspondent did not say specifically that the Governor had given three members of the board to Baltimore, but mentioned the fact that Mr. Bacon conducts drug stores both in Baltimore and in Roland Park, which is a suburb of Baltimore. Mr. Bacon's residence is in Roland Park. He has given most excellent service in the board and the question of residence with such a pharmacist ought not to be material.

Ed.]

## Sees Trouble Ahead in the Propaganda Evolution.

Editor The Pharmaceutical Era:

I do not believe in the N.F. propaganda and base my reasons for such disbelief upon admissions made by its warmest supporters.

I was recently in a county-seat which has six drug stores and 17 physicians, and the physicians dispense to such an extent that the druggists do not average one prescription a day. One of the druggists of this town declares that it is possible to convince the physicians that if they would stop dispensing and write prescriptions for N.F. preparations that they would secure as patients a large number of those who now buy patent medicines from the druggists. But this druggist acknowledges that the additional patients which the doctors would thus gain would not yield so great an income as is now received from the medicines which the doctors themselves dispense. I do not believe the physicians will go into any such self-sacrificing scheme.

I was recently in a city which has about 200 druggists and in which it is claimed that the N.F. propaganda is making great headway. I know that many N.F. prescriptions are being written in that city. However, the leader of the propaganda acknowledges that about a third of the druggists are too ignorant or too stoutheaded to make their own preparations. He says that they are buying the N.F. preparations which they dispense and he acknowledges that such purchased preparations are fully as good and even more uniform than the store-made preparations. This gentleman furthermore acknowledges that the small druggist can buy the manufactured N.F. preparations just as cheap as he can make them.

Finally, this propagandist says that when an N.F. preparation of a certain make is prescribed that he feels in honor bound to dispense that make.

Considering these admissions and the well-known fact that large and reputable proprietary manufacturers are already soliciting physicians to prescribe certain brands of N.F. preparations and also considering the fact that the propagandists are urging physicians to prescribe N.F. preparations in place of well-known proprieties which, it is claimed, are similar to or precisely like the N.F. preparations, I can only reach one conclusion, and that is: The N.F. preparation is already becoming a proprietary with its advertising value dependent upon the name of the maker instead of a trade marked name; that it will be prescribed as a proprietary with the make specified; that many druggists do not now and never will consider it except as a proprietary and that as a proprietary it will be sampled to and sold to self-dispensing physicians. The obvious conclusion is that this propaganda will merely result in adding more proprietaries to the stocks of the already over-burdened druggists and make it easier and more profitable for the self-dispensing physicians to continue their practices.

Yours truly,

Optimism, Iowa.

DOUBTING THOMAS.

## Thirty-five Graduates at Kansas City.

KANSAS CITY, May 15.—Thirty-five graduates were given diplomas at the 24th annual commencement of the Kansas City College of Pharmacy. Rev. G. P. Baiy, pastor of the Westport Avenue Presbyterian Church, delivered the address. The names of the graduates follow:

Joseph Amatorelli, Frank B. Bengelman, James E. Buckner, Frank R. Cole, Benson C. Culp, Earle E. Devosse, Charles P. Dykes, Herbert P. Eastman, George T. Frank, Joseph Freedman, Benjamin A. Gillespie, Ralph E. Gray, Archibald A. Hale, Samuel A. Harshaw, Harold B. Hedrick, John P. Hinkle, Russell L. Hodge, John M. Hogan, Elmer E. Jones, Otto H. Keuther, Edwin L. Kinder, Charles G. Martin, Lathrop L. Milligan, Jay C. Neal, Randolph S. Parker, Philip S. Pope, Hal T. Robertson, Salvatore A. Romeo, Amos Saunders, George A. Scott, Parker B. Thomas, Walter T. Walker, William C. White, George M. Whitney, John R. Williams.

# ADVERTISING for DRUGGISTS

## "Cutting" and Cutting.

As a general proposition we do not believe in price-cutting nor do we believe in advertising prices of goods which bear a printed price and which are supposed to cost all druggists the same price for the same quantity. In fact, it is only upon such goods that real cutting can be done. Neither do we believe that retail druggist readers should be advised to aid their giant competitors by a taboo placed upon the money-making advertising methods used by their competitors. A careful perusal of the advertisements of the so-called "cutters" shows that much of their loudly acclaimed "cutting" is not cutting at all. How far these advertisements deceive the public we do not know; but so far as the deception may go, it is often self-deception, for many of the strongest and most alluring statements made in such advertisements are not untruthful in fact, and therefore they are not in themselves deceptive. Really, the value of these advertisements is owing chiefly to the fact that the men who write them understand typesetting and a great part of the merit of such advertisements lies in their typographical make-up.

In this article an effort will be made to describe some of

the profitably peculiar points of such advertisement, and readers must judge for themselves whether this class of advertising is worthy of being employed by them.

## Free Lime Water.

As part of a full page advertisement appeared the following:

*LIME WATER GIVEN AWAY*

*Free! Any quantity! Free!*

*We only charge for the bottle*

"We only charge for the bottle" was in 10-point, the other lines in 36-point type. The "charge for the bottle" was 10 cents a pint and 17 cents for a quart. Here is another of similar make-up:

*Hand and Face Lotions at Cut Prices*

This line was set in bold-faced type and following it were enumerated several of the largely sold face preparations without mention of price. Then followed:

*Handi Lotion      Facio Lotion*

*Regular 25c. size, two for 25c.*

"Handi" and "Facio" were the names of the druggist's own preparations and he probably put them up expressly to sell at half the printed price, which would still permit him to make a good profit, but the staple preparations which were men-

WINDOW DISPLAY ILLUSTRATING THIS FORM OF ADVERTISING FOR DRUGGISTS TAKES \$5 PRIZE.

In the ERAS Cash Price Competition this week the judges have awarded the \$5 cash prize in Contest No. 2 to B. A. Cueny, druggist and pharmacist, 903 Main street, North, Chicago, Mich. Mr. Cueny submitted the accompanying photograph of a window display which was prepared by his clerks, George Gable and Anthony Koschek. Mr. Cueny writes us follows:

"The window represents a miniature blacksmith shop, with three moving figures. One man is employed pumping the bellows, another is hammering on the anvil and the third is shoeing a horse. The goods displayed are stock foods placed on the floor of the window and also at the sides of the shop to the right, making the background. The power to run the figures is furnished by a 1-10th H.P. motor, geared to reduce the speed. I hope this window will interest ERA readers."

tioned in the advertisement were sold at 22 cents for 25-cent sizes.

.....  
 \* ROSE OR VIOLET TALCUM 23 CENTS A POUND \*  
 \* Contains four times as much as the average 25-cent \*  
 \* box. Why pay for a fancy box? \*  
 \* WE WEIGH IT BEFORE YOUR EYES \*  
 \* .....

And the druggist weighed the package before the customer's eyes and it weighed 18 ounces. They explained that the box weighed two ounces. That performance made an excellent impression. The box, a tight, mill-board, slip cover box, was cheap, and the perfumed talc had been bought in bulk. Over 500 pounds were sold in a week and it gave a liberal profit.

.....  
 \* STANDARD CATARRH REMEDIES AT \*  
 \* CUT PRICES \*  
 \* Among others is DOBELL'S SOLUTION. Doctors \*  
 \* prescribe it \*  
 \* A full pint for 30 cents \*  
 \* .....

How is that for a "cut price"? Examine the following:

\* 30 cents for a full bottle—100—Bland's Iron Pills. \*  
 \* A blood tonic. One bottle may do you more good \*  
 \* than a dozen bottles of St. Sarsaparilla. But if you \*  
 \* prefer Sarsaparilla, we sell dollar size for 69 cents \*  
 \* .....

Can you not sell Bland's Pills at that price? Can you not make money on your own Sarsaparilla "at 69 cents for dollar size"?

Is the following entirely untrue? Can you not avoid even the appearance of prevarication, meet the price and make money?

\* Other druggists prefer to sell Castile Soap by the \*  
 \* cake. They can charge a higher price that way than \*  
 \* by the pound and they say that they have to charge \*  
 \* for the waste and labor of cutting. Why not cut it \*  
 \* yourself and see if there really is any waste. We are \*  
 \* offering \*  
 \* GENUINE IMPORTED CASTILE SOAP \*  
 \* AT 23 CENTS PER POUND BY THE BAR \*  
 \* .....

A department store manager thought it worth while to give two inches of double-column space to the following:

\* COUGH CURES AT AMAZING PRICES \*  
 \* .....

(Several leaders were named at average prices  
 of 45 cents for 50-cent sizes and 23 cents for 25-cent  
 sizes.)

\* SPECIAL!! SPECIAL!! \*  
 \* We have purchased a large quantity of the \*  
 \* GENUINE BROWN MIXTURE \*  
 \* which we offer at the before unheard of price of 40 \*  
 \* cents for the full pint size. This is an old, reliable \*  
 \* and much used cough remedy. \*  
 \* .....

Are you not willing to make and sell brown mixture at that price?

#### Not So Much Baiting as Formerly.

If readers will carefully peruse the so-called "cut-rate" drug advertisements of department store and store-chains of the present, they will find that the naming of well-known proprietaries as baits has largely passed. In the average two-column or larger advertisement, old-line goods or those now being hoarded have but little space given to them. When they are advertised with price, it is rarely that they are quoted extremely low.

The competing druggist is apt to pay more attention to a single line in eight-point type announcing some staple dollar patent at 67 cents than he is to two inches devoted to a non-secret. Not so with the public, however. The very make-up of the advertisement proves that. Aggressive advertisers have learned by experience that they sell most of that which they

most prominently advertise. If the consumer demands something other than the prominently advertised article the demand is for a well-known article, no matter what the price may be.

The character of the bait has therefore been reversed. Instead of using the widely known specialty to make trade for non-secret substitutes, it is the non-secrets that are advertised so that whether the sale be for the advertised article or a well-known patent, a profit can be made.

#### Substitution Not the Real Object.

Public agitation in the lay press and otherwise, has made it exceedingly difficult to substitute against trade-marked goods, especially in the larger stores.

The successful advertiser of today advertises only what he wants to sell and that only at the price he is willing to sell. He may, it is true, advertise a leader or so at less than actual cost; but the object is not to sell substitutes for it, but to induce sales in other lines.

If there is any class of druggists who should not advertise, they are the ones who sneer at side lines. An examination of over a hundred large advertisements of department and other stores of "cut-rate drugs" shows an average of 80 per cent of the space given to confectionery, cigars, stationery, fancy goods and things in no way used as remedial agents within or upon the human body.

A superior quality of genius and rare intelligence were not required to make up an advertisement that consisted merely of a schedule of well-known patent medicines at cost prices or less, for such as was the custom eight or more years ago. Today, however, the advertising of the cutters shows the work of real experts and the retail druggists who feel such competition should carefully study the advertisements of these experts.

The individual must judge for himself how much of these methods he can conscientiously and profitably adapt to his own use.

There seems to be little doubt, however, that some druggists are permitting an artificial standard of pharmaceutical and commercial ethics to make their advertising ineffective.

#### Informal Supper Ends Dancing Season.

PHILADELPHIA, May 8.—The Druggists' Dancing Class which has been such an important and enjoyable a factor in the many social events of the retail drug trade of Philadelphia during the past winter, last evening held its final session and disbanded for the summer. An informal supper was served. Professor and Mrs. Fricke, who have been so successful in instructing the druggists how to "skip the light fantastic," were the guests of the members. The successful termination of this new feature of the social life of the drug trade in this city reflects great credit upon the committee, Mrs. Charles and Mrs. J. E. Marsden, ably assisted by Mrs. William E. Lee, president of the W.O.N.A.R.D., as well as of Chapter No. 6, of this city.

#### Local Handbook an Advertising Medium.

Thomas Ross, proprietor of the Economical Drug Store, Elgin, Ill., has compiled and had printed a complete handbook of Elgin containing 100 pages. It is full of valuable information and contains four maps of Elgin and vicinity, and will be valuable especially to autoists and visitors. It is neatly made up and is bound with a handsome cover.

#### Roses Frozen in a Block of Ice.

A. E. Curtis, of Rock Falls, Ill., recently arranged a novel window display for his pharmacy, consisting of a large bunch of roses, tied with a dainty ribbon and frozen in a huge block of ice. A drain pan was arranged to catch the water that dripped from the melting ice display.

#### Alligators Used to Advertise a Pharmacy.

Salmon A. Darrow, of Columbus Junction, Iowa, have originated a new scheme for advertising their pharmacy. They have secured two large alligators about six feet long which attract the attention of every stranger who visits Columbus Junction.

#### The New School.

The doctors used to bleed mankind  
 For every ill that they could find,  
 But now they're wiser, so 'tis said,  
 And "bleed" the pocketbook instead.

—Trenton Times.

## PERSONAL MENTION

—E. C. YETTO now represents Sharp & Dohme in northern Illinois and Indiana.

—FRED J. CARTER, of Meyer Brothers Drug Company laboratory, St. Louis, was a recent New York visitor.

—F. P. O'BRIEN, of Parke, Davis & Co.'s Chicago branch, is home from a short spring vacation spent in Wisconsin.

—EDWARD PITROWSKI, of Pitrowski & Kowalski, Grand Rapids, Mich., is recovering from a recent operation for appendicitis.

—O. C. STOCKMEYER, a former druggist at Two Rivers, Wis., now located at Fond du Lac, Wis., was a recent visitor at Two Rivers.

—MILTON WREN has resigned his position with the Lukenbach Pharmacy at Marinette and is now connected with a drug store at Neenah, Wis.

—E. J. GALLOWAY is a recent addition to the sales force of Parke, Davis & Co., and is covering the territory in and about Syracuse, N. Y.

—GEORGE KOELLER, who has been in the employ of a pharmacy at Wausau, Wis., has resigned and will accept a traveling salesman position at Milwaukee.

—WALTER LUKENBACH, a former resident at Oconto, Wis., and lately employed in a Chicago wholesale house, is now connected with his father's pharmacy at Oconto.

—C. H. DEFORD, formerly representing Parke, Davis & Co. in Connecticut, is now devoting his energies to the Progressive Drug Company, of his home city, New Haven.

—HARRY T. CARVER, of Farrand, Williams & Clark, Detroit, has just returned from South Londonderry, Vt., whither he was called by the serious illness of his father.

—HON. CHARLES L. DEAN, ex-mayor of Malden, Mass., and a member of the firm of Dean, Foster & Co., has been elected a member of the Boston Merchants' Association.

—DR. J. HARVEY SPURANCE, candidate for the Democratic nomination for mayor of Wilmington, was for 12 years a member of the Delaware State Board of Pharmacy.

—C. S. CAMERON, a well-known Philadelphia druggist, is serving his neighbors and fellow-citizens as the president of the Fifty-second Street Business Men's Association.

—MAX HOUCK MATTHEWS, son of a Shenandoah druggist, and a nephew of Paul W. Houck, has been appointed an assistant engineer of the Pennsylvania State Health Department.

—E. T. CURTIS recently succeeded R. L. Winchester as manager of Sharp & Dohme's St. Louis branch. He is a brother of C. E. Curtis, who represents the same concern in Chicago.

—W. C. SHURTLEIFF, of Morrison, Plummer & Co., and F. L. De Witt, of Fuller & Fuller, Chicago, are in St. Louis attending a meeting of the Supreme Council of the Royal Arcanum.

—W. W. SOLLIDAY, sales manager for E. R. Squibb & Sons, was a recent visitor to Washington, and he toured the parks and drives of the National capital in the motor car of Druggist S. L. Hilton.

—FREDERICK C. KURZ, druggist at Rush street and Walton place, Chicago, has gone West for a time on account of his wife's health. In his absence the business is in charge of Adolph Reeder.

—CLARENCE RAETZ, a recent graduate of the College of Pharmacy of the University of Illinois, visited at his home in Appleton, Wis., last week. Mr. Raetz has accepted a position with a Chicago drug firm.

—JAMES STEVENSON, of Robert Stevenson & Co., is spending a few days at French Lick Springs, Ind., recuperating after his exciting experience when he broke an arm in stopping a runaway horse, as reported in the ERA of May 6.

—E. W. McKEOWN, who was manager for the Bancroft store at Park Place and Washington avenue, Borough of Brooklyn, this city, for nine years, is now with Bernhard von Rappaport, Rogers and Leferts avenues, Brooklyn.

—ALBERT BONDI LAMBERT, president of the Lambert Pharmaceutical Company, St. Louis, and widely known as an aeronaut, has been ill at his home for ten days from a very painful attack of neuritis, complicated with an attack of the grip.

—THOMAS VOEGELI, of Minneapolis, was recently a visitor

to the National capital. He is a Park Commissioner of his home city and visited Government officials in connection with matters concerning the water supply for Minneapolis parks.

—WILBER B. HUMPHREYS, president of the Humphreys' Medicine Company, of Baltimore, has returned to his desk after a trip to Chicago, Ill., where he spent two weeks, having been called there in regard to establishing a branch office.

—E. F. TOWNSEND, a former druggist of Detroit, Mich., has returned from a sojourn of several months in Florida, much improved in health. He will engage in the drug business out in Michigan as soon as he can find a desirable location.

—WILLIAM G. COOK is the happy father of a son which was born last week. Mr. Cook is all smiles and reports that mother and child are both doing very nicely. Congratulations are also being showered upon Thomas P. Cook, who is now grandfather.

—MRS. ADELAIDE M. GODDING, wife of J. G. Godding, one of Boston's best-known druggists, and who is president of Boston Chapter No. 1, W.O.N.A.R.D., has been elected vice-president of the Daughters of New Hampshire, whose headquarters are in Boston.

—HENRY RENZEL, well-known Milwaukee druggist and a member of the Wisconsin Board of Pharmacy, has been elected vice-president of the Milwaukee Western Electric Railway Company, a corporation which will erect a new line from Milwaukee to Beaver Dam, Wis.

—S. J. CLARK, of Cornwall, N. Y., is not only a druggist and a dentist but devotes some of his time to raising poultry. One recent achievement of his henery was the hatching of 15 chickens from 12 eggs, a case, his neighbors say, of there having been twins in the bunch.

—DR. W. B. CHRISTINE, a prominent physician and pharmacist of Philadelphia, with Frank W. Smith, secretary of the Drug Club, was among the Philadelphians who visited Atlantic City and witnessed the matches rolled in the annual tournament of the American Drug Trade Bowling Association.

—B. W. T. TOBIN is in charge of the offices opened by Sharp & Dohme, at 510 Arch street, Philadelphia. John L. Wertz has been selected to succeed Mr. Tobin as traveler in southern New Jersey. H. F. Ross and J. E. Douglass are newly appointed Philadelphia salesmen for the company.

—FRANKLIN M. APPLE, Dr. J. A. Bolin, Dr. A. S. Erney, Dr. C. H. Gubbins, H. A. Nolte and G. S. R. Wright, were well-known Philadelphia druggists named to act as vice-presidents at a mass meeting of the citizens to protest against the withdrawal of the six-for-a-quarter tickets by the Philadelphia Rapid Transit Company.

—A. C. MEYER, of Meyer Brothers Drug Company, and George R. Merrell and Murrell T. Wallbridge, of the J. S. Merrell Drug Company; Charles E. Lane, of the Allen-Troffler Chemical Company, all of St. Louis, were among the business men of that city who started last Sunday to tour the South-west on a special train in the interests of the jobbing trade.

—JOHN COLEMAN, the Wheeling (W. Va.) pharmacist, is in Philadelphia this week attending the graduation of his son, George J., at the Philadelphia College of Pharmacy, where the young man has won high honors, including a \$200 microscope offered for the highest average in chemistry. George will have charge of the chemical laboratory in the Coleman Pharmacy.

—DR. ALBERT OETTINGER, who for 22 years conducted a retail drug store at 967 North Fifth street, Philadelphia, has retired from business and will in the future devote his attention to Christ's Home for Children, of which he is one of the founders and most active supporter. The institution recently attracted considerable attention by refusing a State appropriation, preferring to carry on its work entirely by the voluntary subscriptions of an appreciative public.

—IN recognition of his appointment as a member of the Pennsylvania Pharmaceutical Examining Board, the faculty of the Department of Pharmacy of the Medico-Chirurgical College, of Philadelphia, tendered a reception and dinner to Christopher Koch, Jr., at the Bellevue-Stratford Hotel. Dr. I. V. S. Stanislaus, dean of the department, presided, and those present were Dr. George H. Meeker, Dr. Soneca Egbert, C. H. Kimberly, C. E. Vanderbloed, Dr. F. E. Stewart, Joseph L. Turner, W. F. Ritter, Willard Graham, W. A. Pearson, F. A. Genth and Ambrose Hunsberger. J. G. Carruth, a member of the board of trustees, was also present.

## BROOKLYN COLLEGE OF PHAR. COMMENCEMENT.

Degrees Conferred by Dr. Anderson on Seventy-four Graduates in Baptist Temple.

Brooklyn College of Pharmacy, class of 1909, held its 18th annual commencement in the Baptist Temple, in that borough, on Thursday evening, May 13. Dr. William C. Anderson, dean of the faculty, conferred the degree of Graduate in Pharmacy on 68 members of the graduating class, among them being four ladies, and also conferred the degree of Doctor of Pharmacy on six members of the post-graduate class.

Alexander Jabrow won the post-graduate gold medal for having the best general average of his class. The senior gold medal was awarded to Paul Rademacher, who also won the junior silver medal last year; the senior silver medal for second general standing, Zachary Sagalowitz; the senior bronze medal, Boris Malisoff. The Anderson gold medal, offered annually by Dr. Anderson, for the highest standing in the theory and practice of pharmacy, was won by Miss Elvira Kalkbrenner, and the alumni prize by Nathan Kantrowitz.

The honor roll, comprising those members who have attained a general average of 90 points or over for the year, and in the final examinations, is as follows:

Elvira Kalkbrenner, Pasquale Aquaro, Philip Garasch, Israel Ross, Frank J. Beck, Meyer Briggan, Louis Cooper, Edwin C. Gay, (valedictorian), Victor Gayda, Louis H. Goldstein, Alexander Holzborg, Nathan Kantrowitz, Max Levy, Morris Lipschitz, Ralph P. Litchman, Davis Litvin, Boris Malisoff, Herman Nishewitz, Paul Rademacher, Zachary Sagalowitz, Meyer Shepard, Jacob Spector, Nathan Spector, Samuel Wolf.

Hon. Norman S. Dike, in an address to the graduates, paid an excellent compliment to the profession. He said: "In the course of my official duties as a judge with criminal jurisdiction, I have been called upon many times to pass sentence upon 'rich-man, poor-man, beggar-man, thief, doctor, lawyer, merchant chief,' but I have never had to sentence a pharmacist." The music was excellent, the soloists being Mme. Maris Steinhart and Mme. Mulford-Hunt, sopranos; Mr. Paul Du-fault, tenor, and Mr. Frank Croxton, bass, Kleins's Orchestra furnishing the instrumental music.

Edwin C. Gay, the valedictorian, chose as his topic "True Success," and delivered a very timely address. The following is a list of the graduates:

Post-Graduate Class, David Baker, Henry Bramower, Nathan Gellberg, Richard L. Heaslip, Alexander Jabrow, Philip Mininberg.

Graduates of Pharmacy, Isabella M. Bonden, Emma M. Jacke, Elvira Kalkbrenner, Sarah Rosenfeld, Samuel Adler, Isaac Altshuler, Pasquale Aquaro, Philip Garasch, Israel Ross, Frank J. Beck, Edward W. Benjamin, Nathan Berner, Louis Berker, Meyer Briggan, Abram Cohen, Edwin D. Cook, Louis Cooper, John E. Denny, Nathan Ellenberg, Joseph E. Esposito, Karl England, David R. Fraser, Edwin C. Gay, Victor Gayda, Joseph F. Gennaro, Louis H. Goldstein, Frank Gotsman, Koren R. Hayman, David Herschberg, Alexander Holzborg, Harrison M. Jones, Israel Josephberg, Joseph H. Kohnsky, Nathan Kantrowitz, Frank S. Knappe, Herman M. Kriep, Otto Lappal, Samuel Laxerlied, Max Levy, Morris Lipschitz, Ralph P. Litchman, David Litvin, Boris Malisoff, Solomon Mamlikin, Joseph M. Mandel, Thomas A. Murphy, Herman Nishewitz, Andrew D. Philip, Philip H. Pipher, Benjamin Green, Paul Rademacher, Joseph Reifman, Max Rosenfeld, Jacob Spector, Philip Spitzer, Zachary Sagalowitz, Meyer Shepard, Benjamin Silberstein, Leopold Sisselman, Jacob Spector, Nathan Spector, Max Spitzer, Louis Stemple, Michael E. Troy, Hove R. Turnbull, Paul H. Wagner, Samuel Wolf, Moses I. Zeffin.

Following the exercises, the Alumni Association held its annual dinner at Cafe Raub, Nexius street and Flatbush avenue. The covers were raised at 11:30 and all present had an enjoyable time. William H. Weygant acted as toastmaster. During followed.

### Penobscot Valley Druggists in Session.

BANGOR, ME., May 15.—At the recent annual meeting of the Penobscot Valley Pharmaceutical Association the following officers were elected for the ensuing year: Charles A. Fowler, president; Ara Warren, vice-president; F. H. Tunper, secretary, and treasurer; C. H. Davis, member of executive committee. The meeting was well attended and the members enjoyed a banquet.

### Automobile Proves an Unwelcome Visitor.

PICACU, KAN., May 15.—A large automobile dashed into Harry Schulz's Red Cross Drug Store without waiting for any ceremony. The machine smashed through the door and damaged the fixtures inside \$300.

## PROPAGANDA WORK IN DISTRICT OF COLUMBIA.

Working Also for Better Remuneration for Handling Telephone Business—Joel Blanc Honorary Member.

WASHINGTON, May 15.—The District of Columbia Retail Druggists' Association held its regular monthly meeting Tuesday, May 9. A large and enthusiastic number were present. The report of a committee on preparation of samples was taken up and the recommendations of the committee discussed as to methods of preparation of the six N.F. preparations selected for propaganda work at the present time. It was recommended that no coloring matter be used in making these preparations except where directed in the formula proper, in order to insure uniform appearance of these preparations in the District of Columbia.

The consensus of opinion was that Elix. Gent. Glyc. was too sweet and that the use of saccharin therein was not wise. But no changes seemed possible until the formula was officially changed.

Chairman S. L. Hilton, of the telephone committee, reported that the resolutions in favor of increased remuneration for druggists had been sent to the telephone company, but thus far there had been no time to carry negotiations farther. He also stated that copies of the resolutions had been sent to the Baltimore R.D.A. and plans were being formed whereby the two cities might co-operate in telephone matters.

There was some discussion upon the low prices made by some Washington druggists and there were those who suggested retaliation. However, decisive action was deferred to enable Chairman Hurlbans to hold further conferences with the discrediting parties.

Mr. Hilton made a motion that the first honorary membership of the organization be conferred upon J. Leyden White (Joel Blanc). The motion was unanimously carried. Mr. White, who was present, acknowledged the honor in an appropriate speech, saying he would feel more at home, if possible, now that he is one of the association.

### Planning to Go to N.A.R.D. Meeting at Louisville.

EVANSVILLE, Ind., May 15.—At an enthusiastic meeting of retail druggists Tuesday night it was decided to charter a steamboat and attend the N.A.R.D. convention in Louisville, September 5, with a big delegation from all parts of southern Indiana and the adjacent towns in Illinois and Kentucky. A band will be secured and the delegation will sleep aboard the steamboat during the week they are in Louisville.

A committee was appointed to awaken interest in the project. Louis Tepe, John F. Petersheim and Theodore Gerke were appointed. This committee will visit all nearby towns and urge druggists to join the Evansville delegation. The officers of the local association are: John Wyttenbach, president, and Louis Tepe, secretary.

### Norman H. Colby Elected President.

MANCHESTER, N. H., May 15.—At the recent 25th annual meeting of the Manchester R.D.A., L. G. Gilman, of East Manchester, president, and the following officers were chosen: President, Norman H. Colby, of Jamaica; vice-president, Leon D. Tufts; secretary and treasurer, Fred G. Porter; executive committee, A. J. Prescott, J. H. Marshall and Henry Boire, of this city proper, Charles G. Dunnington, East Manchester, and J. Albert Marshall, West Manchester. The membership of the association is large and the financial condition is good.

### Alabama Druggists Elect Officers.

FLORENCE, Ala., May 15.—The druggists' association of Florence, Sheffield and Tusculum met recently in the Tri-Cities Park and elected the following officers for the coming year: James Miller, of Florence, president; G. M. Drisdale, of Tusculum, vice-president; A. D. Givens, of Tusculum, treasurer; R. W. Butler, of Sheffield, secretary.

### Retailers of Temple Meet to Organize.

TEMPLE, TEX., May 15.—A meeting of the retail druggists of the city was held recently with a full attendance to effect a local organization. Fred P. Hamill was elected president and C. L. Reynolds secretary. A committee composed of J. J. Booker and J. V. Dallas was appointed to draft a constitution and set of by-laws.

## COMMENCEMENT OF COLUMBIA UNIVERSITY COLLEGE OF PHARMACY AND SENIOR CLASS OF 1909.

Carnegie Hall was a scene of splendor last Thursday evening, on the occasion of the 34th annual commencement exercises of the New York College of Pharmacy of Columbia University, and many favorable impressions were carried away by those who saw the programme carried out and the class of 1909 pass into history.

The large audience cheered as the graduates entered. Prayer was offered by the Rev. Dr. Edwin F. Harlebeck. Vice-president Prof. Charles F. Chandler briefly reviewed the history of the institution and told about the present satisfactory condition of the college and the advantages to pharmacists of being among the ranks of university men. The college, said Professor Chandler, had graduated over 2500 trained pharmacists. The degree of Graduate of Pharmacy was conferred upon the members of the class by Professor Chandler, following the reading of the roll by Secretary Thomas F. Main:

Graduates: (Residents of New York City where not otherwise specified.) Maurice Ackerman; Le Roy R. Adams, Plainfield, N. J.; Otto Alpers; Fred E. Barth, Greenpoint, L. I.; James J. A. Bauman, Maupert, N. J.; Francis L. Bean, McGray, N. Y.; Samuel Bernsteih, Louis E. Boehme, Ernst F. A. Boffeler, Malsboroug, Prussia, Germany; James J. Brady, Woodcliffe, N. J.; George I. Branover, Solomon Branover; Clarence J. Brett, Newport, N. Y.; Jacob Burstam, Middletown, Del.; Alexander Cohen, Abraham Cooper; Stanley D. Cornish, Carmel, N. Y.; Leonard D. Nolfo; Jacob Egerman, Yonkers, N. Y.; Jacob Etlar; Jacob Feldman; Gerald Frucht; Vincenzo Giacalone; Harry Gluckman; Max Golob; Joseph Gordon; Hyman Grodinsky; Joseph Guardi; Lewis Gussman, 1291 Rockaway Avenue, Brooklyn; Herman Hosen; Chester A. Heuss, Ossining; Samuel Hines; Nelson Y. Hull, Plainfield; Ralph C. Jennings, Summit; George Johnson, Jr., West New Brighton, S. I.; Benjamin Karpman; John J. Kinder-garn; Kurt R. Klebe, Yonkers; Mortimer V. Kleinmann; Emil

F. Krapp; Anthony Lacovari; Frances Levitch, Brooklyn; Isidor Liehtenstein; Seman Linnick, West Hoboken; Leon J. Lindsley, Coney, Pa.; Morris Low; Charles A. McBride, Rutherford, N. J.; John M. McFarlane, Fishkill-on-Hudson; James P. McManis, Towners, N. Y.; Anthony Martocci; Noah Minkin, Brooklyn; Wilson B. Morrison, Lisbon; Oliver Thill A. Mundano; William Master, Paterson; Edward B. Oates, Paterson; Samuel Pearl-mutter, Dominick M. Pischli; Kenneth B. Pryor, Wappingers Falls, N. Y.; Constantine Psakki; George C. Reed, Oswego; Morris Regelson; Michael Rosenblum; Nicholas Salinitto; Samuel W. Salomons; Isidor A. Saphiro; John Scharer; Moses Soud, Newburg, N. Y.; John A. Steffens, Brooklyn; Raymond J. Stockhammer; Herman J. Stockhoff, Rutherford, N. J.; Samuel Stroder; Frank P. Stroel; Paterson; Leon Tartak; Nicholas Tow, Siegfried Tow; Meyer Tinnan, Brooklyn; Francis J. Lland; Harvey Weinschenk; Elmsing; Frieda C. A. Westermeyer; Port Chester, N. Y.; Benn Windt; Solomon Zevay.

II. A Herold, president of the Alumni Association, awarded the alumni prizes, consisting of gold, silver and bronze medals, to the three students having attained the highest averages. They were Siegfried Tow and Nicholas Tow, to whom were awarded the gold and silver medals, respectively, and Leon J. Lindsley, who received the bronze medal.

There was much cheering following the announcement of each name on the roll of honor, which was read by Dr. Anton Vorisek. On this roll were the names of the 13 students whose general averages were the highest during the last course of study. Their names and percentages follow:

Siegfried Tow, 93.04; Nicholas Tow, 92.06; Leon J. Lindsley, 90.58; Samuel Stoller, 90.25; George I. Branover, 89.55; Francis E. Bean, 88.11; Jacob Etlar, 88.27; Noah Minkin, 87.95; Ernst Boffeler, 86.60; Benn Windt, 86.50; Solomon Branover, 86.00; John A. Steffens, 85.95; Jacob Burstam, 85.78.

In his address to the students, M. P. Gould advised them

to employ long hours in thinking rather than manual labor, and cited examples of successful persons in the pharmaceutical field and in other callings who had progressed by using their brains.

Considerable enthusiasm was shown when Dr. George C. Diekmann awarded the trustees' prizes of \$100 each to the students qualifying as the highest in the following subjects: Materia medica and pharmacognosy, pharmacy and chemistry. The presentation of the first two were made to Siegfried Tow and Nicholas Tow, respectively, and evoked great applause from the audience, as did also the award of the chemistry prize to George I. Branover.

Preceding benediction and the distribution of flowers which completed the programme, John A. Steffens delivered the valedictory address, bidding the faculty, trustees and officers farewell, as well as dwelling both on reminiscences and possibilities of the future.

The stage was beautifully decorated with flowers, palms and the class and national colors. On the edge were numerous bouquets and floral designs, the presents of friends to members of the class. Music was furnished by the Seventh Regiment Band. The commencement committee was composed of Hieronimus A. Herold, Ph.G., chairman; William C. Alpers, D.Sc.; Thomas P. Cook, William H. Ebbitt, Ph.G.; Charles S. Erb, Ph.G.

The students who are taking the Food and Drug Course were among the numbers on the stage, but they will not graduate until June, when the regular university commencement will be held. They are: Edwin M. Davis, Elizabeth; George A. Geiser, West Orange; Charles F. Gaspard, New York City; Laura E. Hornby, Phillipsburg; Edgar A. Prosser, New York City.

#### Prizes Awarded to New York College Juniors.

The annual reception given to the junior class by the Alumni Association of the Columbia University College of Pharmacy was held in the lecture room Wednesday evening of last week. There were over 700 present and an excellent programme, consisting of musical numbers by the Columbia University Philharmonic Orchestra, together with features by professional talent, was carried out.

The roll of successful juniors was read by Dr. F. A. Leslie and the roll of honor by Dr. George C. Diekmann. The following alumni prizes were awarded to the three highest: A torsion balance, copy of the National Dispensary and a copy of Culbreth's Materia Medica. The names of the students on the roll of honor, with their percentages, are as follows: Walter Reznant, 95.42; Earl W. Blake, 93.08; Alvin Kuhlmann, 92.50; Samuel Baron, 91.92; Alexander Lamouree, 89.00; F. Yappa, 88.33; C. R. Hanks, 88.17; H. T. Cartwright, 86.08; C. W. Lindsey, 85.50; Herman Vogel, 84.25; Arthur E. Cole, 83.75; Harry B. Hansen, 83.50; L. H. Richless, 83.17.

Dancing followed at the close of the entertainment programme and refreshments were served.

#### University College of Medicine, Richmond.

RICHMOND, VA., May 18.—At the commencement of the University College of Medicine in the Academy of Music this evening the address was by Joseph D. Eggleston, Jr., State superintendent of education. Dr. Stuart McGuire, the president, conferred the degrees. The graduates in pharmacy are:

Degree of Ph.G.—Samuel Otis Blair, St. Albans, W. Va.; Jacob T. Blount, Ayden, N. C.; Harry M. Burch, Danville, Va.; E. Crawley Williams, Amherst, Va.

Degree of Ph.B.—W. Marion Ballard, Copeland, Va.; Landon W. Burbage, Como, N. C.; Charles Reddin Butler, Salesburg, N. C.; Frank D. Cuipepper, Spring Hope, N. C.; Frederick F. Fletcher, Jr., Richmond, Va.; Lucy Floraton Ford, Roseville, W. Va.; Percie M. Massie, Bryant, Va.; Roger E. Monroe, Purcellville, Va.; J. Brame Perry, Macon, N. C.; Henry Magnum Pettus, Chase City, Va.; Ralph Mortimore Thompson, Purcellville, Va.; Landon L. Whitman, Edinburg, Va.; John Walter Wilson, Lewisburg, W. Va.

Class officers—E. C. Williams, president; S. O. Blair, vice-president; H. M. Burch, secretary and treasurer.

#### Gasoline Explosion Wrecks Pharmacy.

TOMAH, WIS., May 15.—The explosion of a gasoline lamp at the Rosshardt drug store recently narrowly missed starting a serious fire. As it was, the entire prescription department of the pharmacy was destroyed and the rest of the building was saved by the timely arrival of the fire department.

#### TWENTY-THREE AT MASSACHUSETTS C. OF P.

Extremely Interesting Exercises at Graduation of New Class—Attendance at Hop More Than 400.

BOSTON, May 15.—Twenty-three young men and women filed upon the platform of the assembly hall of the Massachusetts College of Pharmacy Thursday afternoon and received from the hand of President Irving P. Gammon the degrees which represented that their efforts in college had been successful. Eighteen, among whom were two young women, received the degree of Doctor of Pharmacy, and five received the degree of Pharmaceutical Chemist.

The address of welcome at the class exercises was fittingly spoken by Daniel Oliver Wolf, of Boston, the class history was told by Walter Adam Kruszyna, of North Adams; the class oration was by William Alexander Burlbert, of Provincetown; the class poem by Winthrop Morris Quinlan, of Needham; the class prophecy by John Grant Molineaux, of Somerville; the class will by Frank Graham Sherman, of Calais, Me., and the farewell address was by Lloyd Henry Webster, of Grafton. Musical selections were interspersed, an orchestra playing the opening and closing numbers, and the graduates singing two class songs. One of these, "Boys from M.C.P.," was to the tune of "Solomon Levi," and the other, "Alma Mater," was sung to the tune of "Juanita."

Light refreshments were served in an adjoining hall at the close of the class exercises and half an hour later the company and grades assembled for the formal and dignified commencement. Hon. Robert Luce, of Somerville, gave the address, in which he called attention to the peculiar temptations which would beset the graduates who were about to enter the profession of druggist, and that the temptation would come from the victims of drug and liquor habits, who, for money, would tempt them to give them more of the things which were causing ruin.

William H. Puffer, of Milton, called the roll of graduates and each received from President Gammon the coveted parchment. Music brought the exercises to a close. The list of graduates is as follows, the added honor of having taken elective courses in bacteriology, in addition to the requirements for graduation, being mention in the case of Miss Cullinan:

Degree of Doctor of Pharmacy.—Thomas Leslie Aiken, Maurice Brody, Katherine Mand Cullinan, Robert Aloysius Grimes, William Alexander Harbert, Walter Adam Kruszyna, John Grant Molineaux, Winthrop Morris Quinlan, Sagie Ibrahim Saad, Frank Douglas Salisbury, Jennie Hosmer Sargent, Frank Graham Sherman, Philip Monroe Smith, Leon Albert Thompson, Clarence Hathaway Upton, Lloyd Henry Webster, Charles Walter White, Daniel Oliver Wolf.

Degree of Pharmaceutical Chemist.—Peter Philip Mitchell, Elos Albert Ray, Arthur Winfield Scott, Lewis Olds Tayntor, Howard Graves Tuttle.

The graduating class became the guests of the Alumni Association of the college in the evening, at a dinner given at Young's Hotel, which was attended by about 150. President William H. Doherty presided and addresses were made by Hon. William J. Bullock, mayor of New Bedford, and by Robert Luce. Vocal and instrumental music formed part of the programme.

On the night before, Wednesday, the class of 1909 held the commencement hop in Horticultural Hall. It was a magnificent success, the attendance reaching 400. The patronesses were Mrs. Irving P. Gammon, Mrs. J. W. Baird, Mrs. W. H. Puffer, Mrs. Elie H. LaPierre, Mrs. J. G. Godding, Mrs. F. S. Schmidt, Mrs. W. F. Sawyer, Mrs. H. J. Perry, Mrs. C. A. Stover, Mrs. Arthur Tripp, Mrs. T. J. O'Brien and Mrs. C. F. Nixon. The hop committee consisted of Daniel O. Wolf, Frank G. Sherman, Miss Jennie H. Sargent, William H. Harbert and John H. Crowley. Other committee members were as follows: Reception, L. A. Thompson, George A. Bridges, Thomas Aiken, C. W. White and H. G. Tuttle; executive, E. A. Ray, Walter A. Kruszyna and L. H. Webster.

#### Druggist Saves a Boy From Drowning in River.

DALTON, MASS., May 17.—Charles H. Cooper last Wednesday plunged into the Housatonic River and rescued Martin Fox, aged 10, who had fallen into the stream while fishing for trout. The current at the point of accident is very swift and the lad would surely have drowned had not the druggist, who is an expert swimmer, made his leap into the stream without waiting to divest himself of any clothing. Mr. Cooper's friends consider him a candidate for a Carnegie medal.

**A. B. HUESTED, VETERAN DRUGGIST, RETIRES.**

**Had Been in the Business Since 1856 in Albany and Was an Organizer and President of the N.Y.Ph.A.**

ALBANY, N. Y., May 15.—A. B. Husted & Co. will be dissolved, and Mr. Husted, head of the house, is to take a long rest. His son, James E. Husted, of the firm, is at present undecided as to his future. G. V. Dillenbeck, the third member, is to continue the business, having as his partner Edward Loeb, brother of William Loeb, Jr., Collector of the Port of New York.

The name of Husted has long been identified with the drug business in this city. The first store was at Hudson avenue and Eagle street. For the past 21 years it has been at State and Eagle streets. Recently it was visited by a fire, which did damage to the extent of \$10,000. The insurance was \$8000.

In 1856 Mr. Husted became a drug clerk in the store of Dexter & Nellegar, at State and Pearl streets, and remained there for four years, when he took up the study of medicine. At the breaking out of the War of the Rebellion he enlisted in the 113th Infantry (Seventh Heavy Artillery), and left for the front as hospital steward. He was mustered out in 1863 and returned to Albany, where he finished his course in medicine, graduating from the Albany Medical College. He again entered the army and became first lieutenant and assistant surgeon in the 25th Cavalry. He served with this command until 1896, when he was discharged at the expiration of the regiment's service. He entered the retail drug business in 1897.

Mr. Husted was one of the charter members and was the second president of the New York State Ph.A. He also was president of the old New York State Board of Pharmacy and has been a member of the A.Ph.A. since 1879.

**KINGS COUNTY SOCIETY MEETS.**

**Changes in By-Laws Proposed and Paper Read by Mr. Raubenheimer.**

Adrian Paradis, reporting for the committee on supervision of the Brooklyn College of Pharmacy at the meeting of the Kings County Pharmaceutical Society held Tuesday, May 11, announced that a very satisfactory condition of affairs had prevailed in the institution for the class year just concluded. Mr. Paradis stated that there would graduate 68 students from the senior class and six from the advanced three-year course, besides a class of 91 juniors had been advanced to the second year.

The trustees and faculty of the college were complimented by President Jacob H. Rehfuss, of the society, for the good showing. Mr. Paradis also stated that the trustees of the college favored amending Article 5 of the by-laws relating to the election of officers and introducing a resolution that the number of officers be increased from 9 to 12, and abolishing the office of third vice-president. Under the rules the subject was laid over to be acted upon at the next meeting.

Oscar C. Kleine requested the members to attend the joint meeting of the New York branch of the A.Ph.A. with the New York County Medical Society and outlined the tentative programme agreed upon by the committees in charge.

The report of the treasurer, Mr. Kleine, showed the balance in the society account to be \$147.84 and the college treasury \$2817.47.

Otto Raubenheimer, chairman of the committee on pharmacy and a member of the N.E. Revision Committee, read a paper entitled, "Suggestions as to the Improvement of U.S.P. and N. F. Formule." He stated that descriptions of galenic preparations should be included in the next Pharmacopoeia and the temperature of making determinations reduced from 25° to 15° because it was difficult to secure apparatus graduated to conform with the higher temperature. An interesting discussion followed the reading of the paper.

**STRONG ACTION AGAINST "BOOZE" MEDICINES.**

**Dr. Wiley and Internal Revenue Officers Discuss Mr. Pritchard's Attack—No Liquors in Pharmacy.**

WASHINGTON, May 15.—The May meeting of the Washington City Branch, A.Ph.A., was devoted to a discussion of National Formulary questions, not the least interesting of which was the desirability of eliminating from the up-to-date pharmacy, certainly from the pages of the National Formulary, every preparation that might be classified as "booze" medicine.

A communication from B. E. Pritchard, of Pittsburg, entitled "The Pharmacist vs. the U. S. Internal Revenue Department," in which the latter was accused of dealing unfairly with retail druggists, was read and a set of five resolutions, emanating from the Pittsburg Branch of the A.Ph.A., were submitted for discussion and approval.

The communication was discussed by Messrs. Hilton, Bradbury, Mankin and Dr. Wiley, who denounced "alcoholic fakes." P. S. Talbot, a representative of the Internal Revenue Department, read a communication from Deputy Commissioner J. C. Wheeler, which is as follows:

"This office acknowledges receipt through you of copies of an article which appeared in the *Western Pennsylvania Retail Druggist*, a paper read before the Pittsburg Branch of the A.Ph.A., and resolutions adopted by said Pittsburg Branch.

"The matter under consideration relates to the action of this office in enforcing the law requiring the payment of special tax by liquor dealers. That law defines such dealers as every person who sells, or offers for sale, foreign or domestic distilled spirits, wines or malt liquors." It will be noted that there is no question of alcoholic percentages, or use to which the spirits sold are to be put, but every person who engages in such business must pay the tax, including druggists, unless they bring themselves within the exemption under Section 3246 R. S., by first compounding the wines or spirits into medicines.

"This office has uniformly held that in order to secure the benefit of this exemption the spirits or wines used must be compounded with drugs sufficient in character and amount to have a therapeutic effect other than would be obtained by the use of spirits or wine un compounded, and sufficient to render the compound unsuitable for use as a beverage.

"It is a fact, known to every person in the slightest degree cognizant of existing conditions, that the spread of prohibition has induced unscrupulous manufacturers to place upon the market numerous alcoholic compounds insufficiently medicated to render them unfit for use as beverages, to be sold for such use in places where liquors cannot be openly purchased, under the guise of medicines.

"It seems hardly necessary to state that it is this change of conditions which has forced this office to take cognizance of the situation and to scrutinize more closely the alcoholic patent and proprietary preparations on the market, and not the unworthy motives attributed to the officers of this bureau by the author of the address.

"His ire appears to have been especially aroused by the action of this office relative to the widely sold preparation known as Beef, Wine and Iron. A number of samples of this compound were forwarded to this office, which on analysis were found to contain little beef or iron, and which were in fact little more than a poor quality of port wine. In view of the widespread manufacture, sale and use of this compound, it was deemed necessary, in the interests of druggists as well as this office, to fix a standard of what would be considered sufficient medication in such a preparation. Analyses were therefore made of samples of the preparation, as put out by some of the leading manufacturing chemists, and also of samples prepared according to the formula given in the U.S. Dispensatory. Based upon the results of these analyses, it was held in Treas-

F. P. HAMILL, Temple, Tex.,  
elected president of new Temple Retail  
Druggists' Association.

ury Decision 1358, not that Beef, Wine and Iron should be made in accordance with the formula in the National Formulary, as stated in the newspaper clipping, but that, in order to be classified as a medicine, it should contain at least the percentages of beef and iron which that formula called for.

#### Official Standard is the U.S.P.

"The question of what constitutes sufficient medication of spirits or wine to change its character and render it unsuitable for use as a beverage is a very difficult one to determine in many cases, and in order to be perfectly fair and impartial to all, this office has adopted as a rule of guidance the principle that in a medicinal compound an ordinary dose should contain at least approximately a U.S.P. dose, either singly or in combination, of some drug or drugs recognized by materia medica as having a genuine medicinal value, and giving a therapeutic effect apart from the ordinary effect of the spirits or wine used, and that the percentage of alcohol present should be no more than is necessary to extract the properties, and preserve or hold them in solution, since the use of alcohol noticeably in excess of the amount necessary naturally creates the presumption that it is used for its own sake, and not for the legitimate purposes intended.

"The paper submitted seems to admit an axiomatic truth that the Executive Departments are created for the purpose of enforcing all laws upon the statute books.

#### As to Attacks Upon Public Officers.

"It is an easy matter and quite popular with some people to assail executive officers for performing their sworn duty, especially when such officers are not in a position to defend themselves. This is common in cases where enforcement of the laws comes in conflict with the unlawful practices of persons acting in utter disregard of consequences in violation of existing statutes.

"The Internal Revenue laws are enacted for the purpose of securing revenue for the support of the Government. They are not police laws aimed to correct the morals of the people. This is left for local authorities, State, county and municipal. In the execution of the Internal Revenue laws no interference with local authorities is intended or permitted.

"The slurs cast upon executive officers, direct and indirect, in the paper sent me can be ascribed to one of two conditions, malicious misrepresentation or lack of knowledge of what the writer is talking about.

#### Unbiased Treatment of All Taxpayers.

"Impartiality in the collection of Internal Revenue taxes is a cardinal principle with the Internal Revenue Bureau and all concerned in the administration of the laws. All taxpayers look alike to and are so treated by Internal Revenue officers. When the law provides exemption of any particular class from taxation those exemptions are as carefully guarded as possible in order that the favored class may have the full benefit.

"The law, while requiring every person who sells or offers for sale foreign or domestic distilled spirits, wines or malt liquors to pay special tax as retail liquor dealer, makes an exemption in the case of apothecaries as to wines and spirituous liquors which they use exclusively in the preparation or making up of medicines. If undue advantage is sought to be taken by reason of this specific exemption it becomes the duty of revenue officers to use their best efforts to protect the interests of the Government."

"The question was freely discussed and, on motion, the following resolutions were approved:

#### Would Divorce Liquors and Pharmacy.

Resolved, That the sale of intoxicating liquors, whether simple or compounded, for beverage purposes, should be entirely divorced from the practice of pharmacy, and that it is the duty of members of the A.P.A. to give their efforts to the accomplishment of this end.

Resolved, That we recognize the propriety and justice of such proper restrictive measures as may be necessary to prevent the surreptitious sale of alcoholic liquids for beverage purposes under the disguise of medicinal or pharmaceutical compounds, and that the members of this branch will give their aid and support toward the enactment and enforcement of all just laws for this purpose."

The second, third and fourth paragraphs of the Pittsburgh resolutions were rejected and the members of Washington City Branch went on record as being opposed to the sale of any alcoholic liquids that could be or are used for beverage purposes, quite irrespective of what they might be sold for in good faith.

A vote of thanks was extended to Deputy Commissioner

J. C. Wheeler and to Mr. Talbert for their courtesy in defining the methods of the Internal Revenue Department.

#### "Commercial" Alcohol Defined by Dr. Wiley.

A member inquired regarding the difference between alcohol and so-called "commercial" alcohol, asserting that some dealers mark all of the alcohol furnished to retail druggists commercial.

Mr. Talbert explained the revised regulations regarding alcohol and pointed out that the material that is usually labelled "commercial" consists of the heads and tails, or the beginning and the end of the ordinary run of a still.

Dr. Wiley pointed out that "commercial" alcohol does not respond to all of the tests of the Pharmacopoeia and the pharmacist should not allow himself to be imposed upon. He asserted that for but a slight increase in price it is possible to secure a spirit, or pure alcohol, that will comply with all of the requirements of the U.S.P.

### SUGGESTIONS FOR BETTERMENT OF THE N.F.

#### Valuable Papers Read on Subjects Pertinent to Revision at May Meeting of the Washington Branch.

WASHINGTON, May 15.—Valuable papers were read at the May meeting of the Washington City Branch of the A.P.A. One of these was by Lewis Flemer, whose subject was "The use of fluidextracts in elixirs of the National Formulary and some suggestions on the National Formulary in general," in the course of which he pointed out that the three cardinal requisites, for all medicinal products, from a pharmaceutical point of view, should be uniformity in potency, permanency and appearance. He doubts if all or any of these requirements can be obtained in elixirs if fluidextracts are used in their preparation.

Augustus Carrier Taylor presented a communication on "Some Superfluous Preparations in the N.F.," in the course of which he pointed out a number of actual or apparent duplications of formulas and asserted that the National Formulary could be much simplified by eliminating all of the formulas that are but seldom used or for which no distinct need is evidenced.

M. I. Willert presented a communication on "Some of the changes that have been proposed by the Committee on the National Formulary," in which he pointed out that unless the pharmacists of this country took an active interest in and co-operated in the revision of the National Formulary this book cannot be made more representative of the best in American pharmacy and will not reflect, as it should, the most advanced practices in the science of medicine.

#### Invitation to Atlantic City Meeting is Accepted.

WASHINGTON, May 15.—An invitation from Philadelphia Branch to the members of the Washington City Branch to take part in the meeting of the former in Atlantic City, during the week of June 7, was accepted with thanks at the last meeting of the Washington Branch.

#### Massachusetts Likely to Legalize Sunday Soda Water.

BOSTON, May 15.—The bill to permit the sale of soda water, confectionery and fruit on Sundays had a most unusual experience this week, at the hands of the State Senate. The House had passed the bill by a large majority, after a debate which ranks as one of the warmest of the session. The bill came up in the Senate on Wednesday, when, without a word of debate the bill was refused a passage. Before night the cars of the Senators were made to tingle, and on Thursday a motion to reconsider was made and carried, and then the Senate passed the bill to be engrossed by a vote of 21 to 14. It is generally expected now that the bill will become a law.

#### Directory Swindlers Are Under Arrest.

MILWAUKEE, May 15.—With the capture of Frank Burton and Charles Neff, the Milwaukee police believe that they have secured two of the principals of an organized band of swindlers who have been operating in large cities of the United States, gaining thousands of dollars by employing the "directory swindle." Few druggists were "roped in" by the game, but the E. Dohmen Company, wholesale druggists, were the losers for the price of a small advertisement in the fake "directory."

## ASSEMBLYMAN CONKLIN HITS STATE BOARD.

**Tells Manhattan Ph.A. That Health Department and Regents Will Replace Board of Pharmacy—Cream of Tartar Case Explained by Lawyers—Delegates to Los Angeles and Richfield.**

Assemblyman Robert S. Conklin made a short address relating to the recent agitation in pharmaceutical legislation to the members of the Manhattan Pharmaceutical Association at its meeting last Monday evening. He referred to the controversy over his bill as being a most unfortunate matter and predicted that developments would now lie in the direction of placing the inspecting and police power of the Board of Pharmacy under the Health Department and the examining branch in the hands of the Regents.

Jacob Diner, chairman of the legislative committee, reported that the Conklin Bill had died a lingering but not peaceful death in committee and by inside information he had learned that the Brown Bill was being slowly and silently choked to death in the executive chamber.

George H. Hitchcock predicted that the Board of Pharmacy would not make many more prosecutions, for he had learned, he asserted, that steps would be taken to have some other State department usurp this function of the board.

Counsel for the Board of Pharmacy, Jerome Steiner and Henry A. Petersen, explained the recent decision of the Court of Appeals in the grocers' cream of tartar case, declaring that had the case been prosecuted as a violation of Section 164 of the agricultural law the defendant would probably have been fined \$100 as provided in Sections 40 and 41 of the public health laws. This was the decision of the court, which simply held the defendant immune from prosecution as not being a violator of the pharmacy law. The board could give evidence of violation to the department of health, said Mr. Steiner, and treat the grocery cases in that manner.

The portions of the Brown Act and also those of the Conklin Bill, relating to adulterations were declared by counsel to be very defective and under the provisions, they stated, it would be almost impossible to secure conviction for adulteration, while a pharmacist could easily comply with the law and if he wanted also easily violate it and remain immune from prosecution. The present pharmacy law was a much superior measure to the Brown Act, said Mr. Steiner. It was easier to secure convictions than it would be under the new Act, should it become a law. A resolution was adopted that the association recommend to the State organization that the various incongruities and imperfections in the pharmacy laws be remedied as soon as possible, and a careful revision be made so that a pharmacist would not be placed at any disadvantage, compared with a grocer, in the sales of chemicals and other articles enumerated under Section 199 of the present pharmacy law.

The following committees were appointed by President Dickman: Legislative, Jacob Diner, chairman; Joseph Weinstein, Charles S. Erb; finance, Messrs. Enelin, Bakst, Porr; trade interests, Messrs. Alpers, Conzelton, Porr; grievance, Messrs. Weinstein, Blomder, Collins; membership, Messrs. Lascoff, R. K. Smith, Elbbitt; press, Messrs. Tobin, Timm, Sprigues; entertainment, Messrs. Berger, Borggreve, Klingman.

The delegates appointed to attend the meeting of the New York State Ph.A. at Richfield Springs are: C. O. Bigelow, J. Diner, J. L. Lascoff, G. H. Hitchcock, L. Berger. Those appointed delegates to the A. P. Ph.A. convention are Dr. William C. Alpers, C. O. Bigelow, Arthur C. Searles.

It was decided to dispense with the meetings during the months of June, July and August.

Druggists find Erc's Price List to be invaluable.

## PROPRIETORS RE-ELECT THEIR OLD OFFICERS.

**More Publicity Favored—President Watson, of Canadian Association, Explains New Dominion Law. Advertising Subjects Discussed—Not Much to Fear by Honest Manufacturers.**

One of the most important matters acted upon by the Proprietary Association of America, at its 27th annual meeting, held at Hotel Astor, New York City, last week, related to extending the scope of work of the association in a way that is calculated to bring about many effective results. It is understood that an aggressive campaign for elevating the proprietary business will be instituted and the qualifications for membership in the association also will be materially raised. In other words, the members intend to place their business above reproach and beyond attack from every side. Economies in advertising and continuance of friendly relations between the association and newspaper publishers, and the bringing about of such plans as will enable press representatives to obtain whatever information they may desire from the association itself and its members. Resolutions were unanimously adopted in this direction and J. A. Patton, secretary of the Chattanooga Medicine Company, Chattanooga, Tenn., was appointed chairman of a committee with power to appoint sub-committees which are to become active at once.

In order to clean up all business it was announced at the time of calling the meeting that a four days meeting would be held if found necessary, but matters were hastened and adjournment was taken late Wednesday afternoon. There were no entertainment features outside of the several addresses. The informal dinner was eliminated because the majority of the members left before any arrangements could be made and those remaining decided that their number was too small for such an affair.

George L. Douglass, counsel for the association, occupied the entire session of Wednesday forenoon and gave an extended resume of legislative matters, covering all of the important bills and acts of the various State legislatures during the past year. Mr. Douglass dwelt upon the importance of securing uniform food and drug legislation and called attention to several important acts relating to the advertising of proprietary remedies.

The work accomplished at the Chicago headquarters was reported by Mr. Douglass and E. F. Kemp, chairman of the press committee. Regarding publicity and advertising the opinion prevailed that inasmuch that publishers were not opposed to proprietary medicine advertising when a product was placed on the market in good faith and by reliable manufacturers, no concern need be entertained in that direction. It was brought out that as a general rule the tendency was toward clean, conservative advertising copy in all lines of business and that the advertising used by proprietary houses was on par with that employed in other lines of trade. Mr. Douglass was presented with a handsome gold watch at the session on Wednesday afternoon. J. A. Patton made the speech of presentation.

David Watson, president of the Canadian Proprietary Articles Association, explained various provisions of the new Canadian Patent and Proprietary Medicine Act. It was the opinion of Mr. Watson that the Act had considerably improved the proprietary business, placing it on a better basis than ever before because of strict regulation of a beneficial nature to legitimate manufacturers.

According to Mr. Watson's interpretation of the guaranty, the law will not permit the sale of goods in Canada bearing a United States guaranty, and in regard to samples, Mr. Watson explained that with the exception of supplying a person at his own request either personally or by mail, this practice was absolutely prohibited. The ban was on against indiscriminate sampling either by distribution by means of agents

FRANK J. CHENEY, of Toledo, O., who was re-elected president of the Proprietary Association of America.

or through the Dominion mails, said Mr. Watson.

L. S. Levee, secretary of the Canadian Proprietary Articles Association, also addressed the committee and a few of the members on the subject of trade conditions in Canada. Mr. Levee stated that the Dominion was enjoying an era of prosperity and that the influx of people of the better classes continued unabated. He looked for an extensive business in the near future and said that a good impetus had been given to trade in the development of the farm land of the country.

The officers whose terms expired were all re-elected with the exception of H. E. Bucklen, president of H. E. Bucklen & Co., who is replaced by J. H. McPatrick, M.D., of the Murine Eye Remedy Company, both of Chicago. The officers and members of the executive committee are as follows: President, Frank J. Cheney, Toledo, Ohio; first vice-president, John W. Kennedy, Chicago; second vice-president, A. H. Beardsley, Elkhart, Ind.; secretary and treasurer, Orient C. Pinckney, New York; executive committee, Frank J. Cheney, John W. Kennedy, A. H. Beardsley, Orient C. Pinckney, John R. Hinds, Baltimore; R. R. Land, Binghamton, N. Y.; D. M. Newbro, Detroit; T. W. Chelf, Richmond, Va.; J. A. Patten, Chattanooga; William H. Gove, Lynn, Mass., and J. H. McPatrick, M.D., Chicago.

An informal address was delivered to the members at one of the sessions by F. E. Holliday, of the National Wholesale Druggists' Association.

The advertising conditions of today and those of the past were interestingly reviewed by J. T. Wetherald, of the Chester Kent Company, of Boston. Mr. Wetherald also told about numerous of his experiences in the handling of various patent medicine advertising.

The executive committee passed upon various recommendations and applications for membership, which were laid over.

Several of the officers expressed themselves as well satisfied with what had been accomplished and intimated that considerable good would result from the meeting as there was a representative attendance and members took much interest throughout.

## PHILA. BRANCH TO MEET AT ATLANTIC CITY.

**Suggestions Wanted for Formulary Revision—Interesting Papers are Discussed at the May Meeting.**

PHILADELPHIA, May 15.—Every member of the Philadelphia Branch of the American Pharmaceutical Association will be asked to submit suggestions relative to changes to be made in the National Formulary at the coming revision. This course was decided upon at the final meeting before the summer recess. The committee on National Formulary was instructed to send out a circular letter immediately and it is expected that the replies will be of considerable value in the work of revising.

It was also decided to hold a meeting of the local branch at Atlantic City in connection with the exhibit of U.S.P. and N.F. preparations there during the coming annual meeting of the American Medical Association. Members of other branches as well as the visiting physicians will be invited to attend the meeting. In reply to a communication from the Philadelphia County Medical Society it was decided to take up the subject of the declaration of the prescription upon which the local branch has already committed itself, each organization being represented by special committees.

The committee of the local branch consists of Prof. Joseph P. Remington, Prof. I. V. S. Stanislaus and Franklin M. Apple.

Upon motion of William L. Cliffe, a committee will be appointed to draft suitable resolutions upon the death of Jacob H. Rodsecker.

The topic of the evening was "Some Additions and Corrections in the Coming Edition of the National Formulary," and the following interesting programme was discussed: "The Compound Powder of Pepsin and the Compound Elixir of Pepsin of the National Formulary," by George M. Beringer; "The Syrups of the National Formulary," by Prof. E. Fullerton Cook, and "Foreign Formularies Compared with Our National Formulary," by Otto Raubenheimer, of Brooklyn. Mr. Raubenheimer exhibited the formularies of nearly every country in the world and in a most interesting manner discussed their features and compared them with that publication in the United States.

## BOARD EXAMINATIONS

### Illinois.

SPRINGFIELD, May 15.—At the April meeting of the Illinois State Board of Pharmacy, in Chicago, 30 out of a class of 80 applicants for registered pharmacist, and 40 of the 71 candidates for assistant pharmacist passed successful examinations. Their names follow:

**REGISTERED PHARMACISTS.**—Francis L. Abbott, G. A. Anderson, Bruno A. Bolz, Leo E. Elliott, Clyde Gardner, Aaron Gekofsky, Edward H. King, Abraham Kohn, Michael L. Leon, Otto J. Lorenz, C. A. Loefelbein, Paul L. Matthei, Thomas Osborne, Adolph V. Pavlicek, Hans C. Petersen, Andrew V. Plummer, Samuel G. Prentice, Herman L. Ranschert, Alexander C. Rizos, Herbert W. Smith, M. A. Stahlfeldt, Emmet B. Switzer, M. W. Thompson, James A. Toomey, Richard Van Dusen, G. R. Waskow and John W. Zea, all of Chicago; A. L. Adams, Winnetka; Ralph H. Walker, Kankakee, and Abbie N. Thorsen, Newark.

**ASSISTANT PHARMACISTS.**—Arthur S. Arnold, George Eckhardt, Charles F. Fruehling, Edw. C. Glennon, Raymond Greeley, James S. Honeyman, H. Frank Isted, Adolph M. Kishon, Chris W. Lee, Harold J. Lincoln, Solomon Loeffel, Sophus Lynch, Irvin H. Miller, Edward Miller, J. J. Michalak, Wm. J. Mueller, Walter I. McEbrath, Olof H. Olsson, Edw. J. Pelikan, Martin A. Roth, Felice J. Savoie, Rose P. Schmid, Wm. A. Schoen, Walter C. Seibert, Charles A. Shuntan, T. C. Stiles, Earl E. Sweet, James B. Simpson, Abraham Victor, D. T. Walker and Oscar Woltersdorf, all of Chicago; C. C. Cummings, Lena; Joseph D. Ernest, Joliet; Cyril C. Folkord, Quincy; Lloyd Goveia and Henry A. Herter, Springfield; M. A. Lapijansky, Toluca; Jacob Sanford, Du Quoin; Brewster C. Sawyer, Springfield; George A. Williams, Gardner.

The next meeting for the examination of assistant pharmacists and registered pharmacists will be held in Springfield on Tuesday, May 25. The following meeting for the examination of assistant pharmacists will be held in Chicago on Tuesday, July 13. An examination will be conducted the following day, July 14, for registered pharmacists. The next apprentice examinations throughout the State will be held on Friday, July 2.

### South Dakota.

DELL RAPIDS, May 15.—The results of the examination recently held at Brookings by the State Board of Pharmacy were as follows:

Passed as licentiates in pharmacy with full registration and relative standing: Edward Hoffelt, Esteline; Christian Flugum, Watertown; Guy S. Abbott, De Smet; A. N. Clement, Flandreau; N. J. Sauter, Minneapolis; Mrs. Jean M. Kenaston, Homestead; F. M. Wilson, Brookings; J. A. Bush, Rochester, Minn.; E. R. Buck, Brookings; P. J. Enlberg, Dell Rapids; I. L. Hamby, Miller; W. C. Voight, Corona; L. J. Crosby, Hirtshoeck; H. J. Werner, Wesley, Iowa; J. W. McCarthy, Meadow; J. W. McCann, Dallas; M. E. Crockett, Bird Island, Minn.; G. A. Runkill, Madison; E. S. Bowman, Clarinda, Iowa; F. R. Gibson, Esmond; H. C. Trowbridge, Minneapolis; Roy Woodman, Mitchell; B. T. Dett, Salem; A. L. Walker, Bird Island, Minn.; C. T. Schweitzer, Mapleton.

Passed as assistants: L. F. Chladek, Tyndall; Neil Thompson, Watertown; H. C. Smith, Raymond; Seeley Bennett, Aberdeen; Earl Owen, Vienna; Ed. Schenkenberger, Avon; O. R. Hiltibrille, Miller; M. P. Even, Humboldt; Miss A. Austin, Milbank.

### California Board Aids Anti-Opium Fight.

SAN FRANCISCO, May 15.—Inspired by a desire to act in harmony with the Federal Government in suppressing the smoking of opium in this country, the State Pharmacy Board caused inquiries to be made of Collector of the Port Stratton as to the exact amount of the drug arriving just before the law prohibiting its importation went into effect on April 1. Under the recent State law any one found with smoking opium in his possession after May 1 is guilty of a misdemeanor, and it is the purpose of the board to search all drug shops of the Oriental quarter and enforce the statute.

## PATENTS.

Granted May 11, 1909.

920,902—Thomas H. Bartlett, Los Angeles, Cal. Hair tonic.  
 920,931—George A. Donnelly, Chicago, Ill. Dispensing apparatus.

920,968—George J. Lewis, St. Paul, Minn. Perfumed pin-cushion.

921,000—Isaiah L. Roberts, Lockport, N. Y. Manufacture of water, acid and alkali-proof articles.

921,009—William L. Schulz, New York, N. Y. Non-refillable bottle.

921,055—Moses Aliber, Des Moines, Iowa, assignor of one-fourth to Edward D. Lewis, Chicago, Ill. Bottle stopper.

921,130—Benjamin F. Lockwood, Newburgh, N. Y. Syringe.  
 921,251—Elton M. Howell, New York, N. Y. Process of extracting essences and tinctures from vanilla beans.

921,329—Oskar Zahn, Berlin, Germany. Process of making sodium sulfate and sulfuric acid.

921,387—Edward E. Erer, Turtle Creek, Pa. Nursing bottle.

921,654—Henry Pein, Jersey City, N. J., assignor by direct and mesne assignments to United Condrink Manufacturing Company. Liquid measuring apparatus.

## Claim Pineapple Extract Was Not Pure.

MOBILE, Ala., May 15.—Affidavits have been filed in the United States Court against the Mobile Drug Company, charging it with a violation of the Pure Food Laws. It is alleged that the company sold an extract of pineapple to be pure, and that an examination by a chemist showed it to be otherwise. This is the first arrest in this district under the Pure Food Law.

## Only One Pharmacy Open Each Sunday.

BOZEMAN, Mont., May 15.—An arrangement has just been completed by the Bozeman drug stores by which all but one will be closed each Sunday. Formerly all the drug stores kept open during certain hours on Sunday. Hereafter only one of the stores will be open. The owners will agree during the week as to which store shall be kept open.

## TRADE MARKS.

Published May 11, 1909.

36,818—C. D. Smith Drug Company, St. Joseph, Mo. Class 6. Insecticides and disinfectant used for destroying lice and other vermin, a powder for killing lice, mites and cock-  
 roaches, preservative for meats, a remedy against flies and mosquitoes and a dip remedy for live stock.

37,478—Ochobless Chemical Company, Providence, R. I. Class 6. Cleansing, deodorizing, antiseptic toilet wash for external application.

38,827—Amanda Moffett, Gordon, Wis. Class 6. Salve.

38,876—Waterbury Chemical Company, Des Moines, Iowa. Class 6. Tonics, diuretics, antiseptics, cathartics, poultices, and remedies for asthma, bowel irregularities, external pains and eczema.

39,098—Elsto Company, New York, N. Y. Class 6. Toilet cream.

39,689—The King Manufacturing Company, Topeka, Kan. Class 6. A poultry powder, a hog-cholera remedy and a condition powder.

40,691—Louis A. Mackintosh, Philadelphia, Pa. Class 6. System tonic and blood purifier.

40,767—F. E. Attieaux & Co., Boston, Mass., and Jersey City, N. J. Class 6. Hyposulfite of soda and sulfid of sodium in their various crystalline forms as chemicals for technical purposes in the industrial arts and manufactures.

40,828—F. W. Hovey & Co., Worcester, Mass. Class 6. A remedy for rheumatism, colds, earache, acne in the face, dysentery, corns, blains, chapped hands, sprains, lame joints, want of sleep, weak back, and bites and stings.

40,870—Herman Faul, Baltimore, Md. Class 6. A cough remedy.

40,987—Pond's Bitters Company, Chicago, Ill. Class 6. Ginger-zin, a remedy for diseases of the bladder and kidneys.

41,218—Sharp & Dohme, Jersey City, N. J., and Baltimore, Md. Class 6. A granular effervescent salt.

41,336—Rochester Germicide Company, Inc., Rochester, N. Y. Class 6. Disinfectants.

41,357—Same as preceding.

41,345—Rochester Germicide Company, Inc., Rochester, N. Y. Class 6. Insecticides.

## ACTIVE UP-STATE PROPAGANDA WORK.

**Big Attendance of Both Doctors and Druggists at Banquet in Olean—Meetings Soon in Other Places.**

More than 50 pharmacists and physicians from Olean, Salamanca, Portville and several other places in the immediate vicinity were present at a banquet held in Olean on Tuesday evening of last week for the purpose of a joint discussion on U.S.P. and N.F. preparations. The doctors were guests of the druggists.

The subject was introduced by Dr. William C. Anderson, of Brooklyn, chairman of the propaganda committee of the New York State Pharmaceutical Association and dean of the Brooklyn College of Pharmacy, who read a paper entitled "The Relation of the Pharmacist to the Physician."

A reply to this paper on behalf of the physicians was made by Dr. Edward Torrey, of Olean, who stated that he endorsed the propaganda work being carried on by the pharmacists. In a general discussion following the banquet, those taking part expressed themselves also in the same vein as Dr. Torrey.

There was exhibited a line of U.S.P. and N.F. preparations made by the Olean druggists which won favorable comment several times during the evening, the physicians declaring that they were on par with those from various supply and manufacturing houses. The physicians were a unit in expressing themselves in favor of returning to more ethical conditions and stated it was their opinion that the work was of great benefit to the patient, physician and pharmacist.

The tables were decorated with carnations and greens and during the banquet music was furnished by an orchestra. F. R. Brothers, chairman of the committee of the local druggists, acted as toastmaster. The following ladies were present: Dr. S. P. McGraw, Salamanca; Dr. Mary Jepson, Olean; Miss Gertrude Keenan and Miss Anna Hearons, of Olean, pharmacists.

Arrangements are now under way for the holding of meetings at Auburn, Ithaca and Corning during the latter part of this month. These meetings will be held under the auspices of the State association with the propaganda committee in charge.

## One Dead, One Ill—Took Medicines Improperly.

MILWAUKEE, Wis., May 15.—Pills eaten by mistake caused the death of one child in Wisconsin last week and nearly resulted in the death of one other. Edna Carlson, the two-year-old daughter of a farmer living near Beloit, died from eating pills which she thought were candy. The two-year-old son of Frank Lupter, also of Beloit, discovered a bottle of morphine pills and the work of several doctors were required to save his life. In neither case was the blame attached to the distribution of free medicine samples.

## Druggist's Baby Dies of Acid Burns.

Murray Goldstein, the year-and-a-half-old son of Leo C. Goldstein, druggist at 107 Avenue C, Manhattan, New York City, recently picked up a bottle of carbolic acid from the floor of his father's pharmacy and toddled out in the street with it in his arms. The baby was a block away from the store, when he held the bottle above his head, the stopper came out and the acid poured over his face. Several persons standing near heard the child's screams and physicians were called, but he died shortly afterward.

## Obituary Notes.

—JONATHAN JONES, former druggist until 1884, and later a well-known pastor of Mazomanie, Wis., is dead, aged 77 years, of apoplexy.

—JAMES EMBERT, probably the oldest active druggist in northern Ohio when he retired recently, is dead of rheumatism of the heart at his home in Sandusky, aged 80.

—LOUIS M. MAXXEN, a druggist, is dead at his home, 650 Washington street, Brooklyn, N. Y. He was born in Germany and studied chemistry in Heidelberg. He had to give up all business two years ago because of ill-health. He was 53 years old.

—RICHARD E. CALAHAN, of Wyandotte, Mich., died suddenly of apoplexy, Friday, at the age of 57. He had been engaged in the drug business in Wyandotte for 30 years. He came to this country from Ireland with his parents when six years old. He never married.

## CHICAGO RETAILERS PUSHING PROPAGANDA.

**Association Votes \$500 More for Work and Closes the Bartlett Letter Incident With Dr. Helfman.**

CHICAGO, May 15.—The executive board of the Chicago Retail Druggists' Association met at the Northwestern University Building May 11. Otto Neithammer, treasurer of the U.S.P. and N.F. Committee, made a report showing the excellent progress of the work and as the appropriation had been about exhausted he requested an additional \$500. This was unanimously voted. Chairman Holthofer, of the committee, also made a statement about the work of the committee and said that the physicians were more alive to the benefits of the movement than many of the druggists.

Dr. Helfman, of Parke, Davis & Co., appeared before the board by invitation to explain the position of the firm in relation to the so-called Bartlett letter incident. Dr. Helfman stated that Parke, Davis & Co. had about 8000 products in their catalogue and on not one of these was there a price fixed at which the retailer should sell. President Yeomans asked Dr. Helfman about the firm's discounts and the speaker stated that preferred customers who had qualified by a \$500 purchase during a single year received 40 per cent off the list; others who had made larger purchases receive something more while the other trade bought on the basis of 25 per cent off.

Dr. Helfman maintained that no sales were made to doctors direct, but were always billed through the preferred customers whom the doctor nominated. As a remedy to prevent future controversies, Dr. Helfman said he would recommend to the board that a letter be sent to all branch managers stating the position of the firm in such clear terms that such another instance as the present could not arise. The discussion resulted in the satisfaction of all concerned and the matter is now considered at an end.

## Druggists Have a Base Ball League.

CHICAGO, May 17.—U. R. Herzberg, president of the Chicago Retail Druggists' Base Ball League, states that six clubs compose the league and they will play ball every Thursday afternoon in Washington Park on the South Side and on St. Vincent's grounds on the North Side. Nines representing the North, South and West Sides, as well as Englewood and the Social Drug Club, are entered.

## Drug Trade Outlook is Encouraging.

CHICAGO, May 17.—Representatives of a number of jobbing drug houses were in Chicago during last week, coming from Illinois, Wisconsin and Iowa. They took the opportunity to meet together and discuss the general outlook which they found encouraging and satisfactory.

## Convicted on Second Trial of Selling Cocaine.

CHICAGO, May 17.—Adolph Brendelcke, the druggist, in a second trial, has been found guilty of selling cocaine in violation of the law and has been fined \$200 and costs. A new trial has been demanded and arguments will be made on May 22.

## Big Riker Store for Pennsylvania Tunnel Zone.

The William B. Riker's Sons Company last week leased for a term of 21 years, with renewal privileges the building at 433 and 435 Seventh avenue, New York, and a small house at 168 West 24th street, the entire parcel surrounding the southeast corner of the thoroughfares mentioned. It is understood that the rental considerations will amount to between \$25,000 and \$30,000 per year. The buildings are old ones and will probably be replaced by a modern structure which will contain a large drug store. The Riker interests do not take possession until January 1910.

## Detectives Catch Three Cocaine Vendors.

Oscar E. Allen, of 4 Doyers street, Manhattan Borough, New York City, was arrested last Sunday on a charge of giving away cocaine and held in \$500 bail for examination. Allen was shaking some crystals from a bottle labelled cocaine, onto a paper held by a man who lives in the same building. Two detectives were in hiding and secured the bottle and contents, and analysis is being made of the crystals to ascertain their composition. Last week two other arrests were made in the same building, as reported on page 484 of this issue of the Era.

# London Drug Market

## Effect of the Budget on Prices.

LONDON, May 1.—(*Delayed in transmission*).—The one topic of conversation is the Budget, and the proposals outlined by the Chancellor of Exchequer on Thursday will result in a material advance in the prices of a large number of drugs and medicinal preparations. In addition to the customs and excise duties now payable on spirit there will be an additional duty of 3s. 9d. per proof gallon, but on perfumed spirit the duty will be 6s. per gallon and on liquors, cordials, mixtures and other preparations entered in such a manner as to indicate that the strength is not to be tested, 5s. 5d. per gallon. The result of this increase in duty will be an advance in the price of tinctures, spirituous preparations and all preparations in which pure spirit is used in the manufacture. Ether (B.P., S.G., 755) has been advanced from 5s. to 6s. 5d. per pound; ether (Purified, B.P., S.G., 720) from 5s. 8d. to 7s. 2d. per pound; ether (rectified, S.G., 750), 4s. 10d. to 6s. 2d. per pound; Acetic ether, 3s. 3d. to 3s. 10d. per pound. Compound spirits of ether, sweet spirit of nitre, and aromatic spirit of ammonia have been raised in proportion. Infusions have been advanced 2d. per pound, rectified tinctures 10d. per pound, decoctions 4d. per pound, liquid extracts in proportion. In addition to the increased tax on Spirit the customs duty on certain articles in the manufacture of which spirit is used has been proportionately raised; the old and new duties are as follows:

	Old Customs duty.	New Customs duty.
Chloral hydrate, pound,.....	1s. 4d.	1s. 9d.
Chloroform, pound,.....	3s. 3d.	4s. 4d.
Collodion, gallon,.....	6s. 3d.	£1 11s. 11d.
Acetic ether, pound,.....	1s. 11d.	2s. 7d.
Butyric ether, gallon,.....	16s. 5d.	£1 11s. 10d.
Sulphuric ether, gallon,.....	7s. 5d.	£1 16s. 6d.
Ethyl iodide, gallon,.....	14s. 3d.	19s.
Ethyl bromide, pound,.....	1s. 1d.	1s. 5d.
Ethyl chloride, gallon,.....	16s. 5d.	£1 1s.

Industrial alcohol is not affected by the new tariff and the above may therefore be regarded as protective taxes.

## Predicted Advances Materialize—Consternation in Market.

LONDON, May 8.—The advance in the customs and excise duty on spirits of wine and the consequent advance in the prices of all spirituous preparations mentioned in the last report, has caused considerable consternation among pharmacists and from all parts of the country the Chancellor of Exchequer has received requests to grant a special rebate on all spirit used in medicines. The Chancellor of Exchequer would no doubt be willing to do this if it were shown that there was a way of doing it without running a very great risk of loss to the Revenue as a result of the use of medicinal spirit for other purposes. It has been suggested that tinctures, etc., should be manufactured in bond, but retailers are not keen on this proposal, for it would be impracticable for them to take advantage of such a concession. At a representative meeting of manufacturers held this week it was decided by a large majority not to approach the Chancellor. In many districts pharmacists have decided to advance the price of tinctures 2 cents per ounce.

The price of Chloroform made from duty-paid spirit is now 5s. 8d. per pound, but the price of Chloroform made from Methylated Spirit is unchanged. Chloral Hydrate has been advanced to 4s. 1d. per pound of which 1s. 9d. is customs duty. Apart from prices affected by Budget, changes in value have been few. It is interesting to note that the Convention which, for some years past, has regulated the selling prices and terms of Morphine and its salts has come to an end, and makers are consequently free to quote their own figures to intending buyers. Makers are therefore asking for enquires and in the course of a few days we shall see how the market is likely to go, for as the arrangement has only just terminated it is hardly possible to give any idea of the trend of prices at present. On the spot a small business has been done in Opium at barely steady prices for shipping kinds; druggists' kinds, however, tend dearer. The Camphor market

is quieter and the spot price for China crude is 145s. per cwt. Business has been done in Boujee Japanese tablets at 1s. 9d. per pound.

American Peppermint Oil is quiet at 8s. 9d. per pound for H.G.H. and 6s. 3d. for Wayne County in tins. Essence of Lemon is easier at about 3s. 7d. per pound "spot." A small business has been done in Menthol at 7s. 1d. per pound for "Kobayashi." Buchu Leaves are badly wanted and high prices would be realized for any good green offered. Cold Liver Oil is dull. Gum Tragacanth is in good demand for Persian kinds at fair prices. Oris Root is again dearer at 37s. 6d. for good bold Florentine. Quinine continues quiet. Cream of Tartar tends easier.

At the Spice sales forced sales of Jamaica Ginger were made at about 2s. per cwt. cheaper. Oil of Cloves is lower at 3s. 2d. per pound. Higher prices are expected to be asked for the new crop of French Lavender Oil when it comes along, and the same applies to Oil of Neroli. Shellac is lower.

Fairly heavy supplies were brought forward at this week's drug auctions, the main feature of which was the large offering of Sarsaparilla, of which 150 packages were catalogued. Notwithstanding the large supply good prices were obtained and gray Jamaica realized up to 1s. 5d. per pound, native up to 1s. 2d. and Lima up to 1s. 1d. Honey was also in good supply and practically all sold at firm prices. Cape Aloes was in small supply and not in request and only one lot sold. For Curacao 34s. per cwt. was realized for dark brown. Soft to liquid Zanzibar in skins sold cheaply at 30s. per cwt. Balsam Tolu sold cheaply at 92d. per pound for fair hard slightly drossy. Oil of Casarea Sagrada 100 bags (1907) sold at 40s. per cwt. Dominican Cassia Fistula realized 17s. 6d. per cwt. Guava realized 5s. per pound for fair Bombay tops. Gamboge sold at 214 15s. per cwt. for fair Siam pipe, part blocky. Ipecacuanha realized 5s. 1d. to 5s. 2d. per pound for Rio. Gentian Root sold at 19s. per cwt. for fair. Tinnevely Senna, of which 250 bales were offered, sold at later rates for common specky leaf, but find hold realized up to 7d. per pound, good greenish 42d. and fair 3d.; fair pods sold at 4d. to 42d. per pound. Gum Benzoin was slow of sale. Cardamoms were easier for Ceylon, but dearer for Indian. A case of Clondy Balsam Copiba sold at 1s. 8d. per pound. Jamaica Wax was 2s. 6d. to 5s. per cwt.

## DRUG IMPORTERS GET BENEFIT OF DOUBT.

### Federal Pure Drugs Act Governs in Case of Conflict With the Customs Act of 1848 in Philadelphia.

PHILADELPHIA, May 15.—Complications on the hembane question which had been caused by the holding up of several importations of that drug by the Customs House officials because it was found upon analysis that it did not conform to the standards of the U.S.P., has been adjusted for the time being at least by the importers placing themselves under bond and certifying that the importations in question were not to go into the open market but were to be made up into tinctures and other preparations at once.

This decision conforms with the regulations of the Pure Food and Drugs Act of 1906, but, it is declared, is in opposition to the ruling of the Act of 1848, which would have made it impossible for any drugs that did not conform to Pharmacopoeial standards to come in at any port of the United States.

The solution of the matter is entirely satisfactory to all concerned, although some claim that this inconvenience to importers must eventually be done away with, as it is not always possible to get certain drugs which meet all the Government requirements.

## Big Seizure of Cactus Beans is Burned.

LAREDO, TEX., May 5.—William H. Johnson, chief special officer of the United States Indian Office, recently seized 200,000 peyote cactus beans, known as the mezcal bean, which had been shipped from Mexico to the Indian tribes in this country, at the little town of Los Ojuelos, 30 miles from Laredo. He has condemned and destroyed them, paying \$2.50 per thousand.

These beans have been shipped under the name of Japanese buttons. They are not only a strong intoxicant, but produce partial anesthesia as well. The Government will prosecute in the future any one found selling this peyote, the penalty being two years in the penitentiary.

# THE DRUG MARKETS

## DEMAND ROUTINE AND FOR JOBBING LOTS.

**Normal Business for This Season of Year Yet Unreached; Tariff a Restraining Influence.**

NEW YORK, May 17.—Nothing of special interest or importance has transpired in the drug and chemical market during the week with the exception of an advance in glycerin and jalap root. Other leading articles are practically unchanged, but holders generally are firm in their views with no disposition shown to reduce quotations. There is a fairly good demand for seasonable goods in a jobbing way, but little inquiry for large parcels. Conservatism, due to the uncertainty of tariff legislation, is generally noted and it is hoped that Congress will soon be able to agree on the schedules.

**OPICUM.**—The market has a quiet appearance, but there is some inquiry for case lots, and sales are being made at \$4.25 per pound. Powdered and granulated in lots of 25 pounds are held at \$5.25 per pound. The arrivals in Smyrna for the week ending April 23 amount to 2050 cases, against 1392 cases at same period last year. About 150 cases have changed hands in Smyrna, 125 of which are for this country. The market there is very firm with no disposition shown to dispose of further lots at the moment, and unless favorable news concerning the crop should be received, an easier market cannot be expected.

**QUININE SULPHATE.**—The monthly sale of cinchona bark held in Amsterdam on the 6th instant went off at unchanged prices. About seven-eighths of the quantity offered was sold at 3¼ Dutch cents. In Batavia last Thursday about 120,000 ounces of Java brand of quinine were sold at florins 10.50, the same as previous sale in April.

**COD LIVER OIL, NORWEGIAN.**—There is no change in quotations, but the primary markets are easier owing to the good result of the fishing. Cable reports to 10th instant give the total yield as 48,700,000 fish, producing 39,050 barrels of oil. As compared with previous years the figures are as follows: 1907, 40,900,000 fish, producing 34,360 barrels of oil; 1908, 39,000,000 fish, producing 42,870 barrels of oil. The total product this year to the 10th instant is now only 3820 barrels less than last year, and as the fishing will be continued until late in June there is a probability of the total yield being equal to the year 1908, which was a record-breaker.

**CITRIC ACID.**—The demand is quite active, probably owing to the expected increase in the consumption as the season advances. Manufacturers are holding firmly at 39c. per pound for crystals in barrels, and 39½c. per pound for kegs. There does not seem to be any probability of a decline in price at the present time, as crude material is reported higher.

**GLYCERIN.**—The market is very firm and higher prices may be established later on. The demand is unusually good for this season of the year when a quieter market is generally looked for. A slight advance has been made on drums.

**JALAP ROOT.**—An advance to 43c. per pound in 200-pound bales has been made and it is the lowest market price at the present time. Some holders are asking 50c. per pound, and the general market may move up to this figure. There is very little stock outside of a few holders.

**EGG CUCUMBERS.**—As intimated in previous reports, an advance has taken place. Choice green leaves are held at 35c. per pound by the bulk, an increase of about 3c. per pound.

**SANTONIN.**—Crystals are scarce, and much difficulty is experienced in obtaining supplies from the primary market for prompt delivery.

**PITCH HERB.**—After a long period of dullness there has been quite an active demand for this article, which has advanced from 18c. to 30c. per pound; and as the market is being cleared of all cheap lots it is now very firmly held at 30c. per pound in bales of 112 pounds.

**CANNABIS INDICA.**—An advance in the price of this article for which there has been an unusually large demand may be looked for. The market in India is much higher and the London market without stock.

**BALSAM PERU.**—A stronger market is noted owing to tight available supplies, and also to scarcity in the country of

production. Local dealers have advanced quotations for prime to \$1.70/\$1.75, as to quantity.

**COLOCYNTH.**—Spot prices are firm but unchanged at 25¢ @ 28c. for Trieste, U.S.P., but the London Market is stronger with the bulk of the stock held at advanced prices.

**BALSAM OF PIR.**—The market for Oregon balsam is firmer, and after making sales of several barrels at 90c., the sellers advanced their quotation to \$1.00 and for cans to \$1.10. Canada balsam is unchanged and continued scarcity influences a decidedly strong feeling among holders of the limited stock, as they can offer only in a small way at the ruling quotation of \$7.50 in large quantities.

## TREASURY RULINGS REGARDING ALCOHOL.

**"Alcoholic Compounds" Need Not be Stamped on Porto Rican Product—Five-Gallon Decision Modified.**

Two Internal Revenue rulings recently issued are of interest to the drug trade. Treasury Decision 1481, provides that "tax-paid stamps, issued for alcohol or other uncompounded distilled spirits, brought from Porto Rico, are not required to have marked thereon the words 'alcoholic compounds.'" The decision says in part:

You are informed that these distinctive tax-paid stamps are required by regulation issued pursuant to an Act entitled "An Act to impose a tax on alcoholic compounds coming from Porto Rico, and for other purposes," approved February 4, 1909, and are not intended to be so distinctively marked for alcohol, or other uncompounded spirits, brought from Porto Rico, as all such spirits are, under the provisions of Section 3 of the Act of April 12, 1890 (known as the Foraker Act), taxable as distilled spirits, the same as if produced in the United States.

Ordinary tax-paid stamps, having imprinted thereon the words "Porto Rico," or the letters "P. R.," heretofore prescribed, may therefore be used for all such uncompounded spirits; and the collector of your district will be so notified.

Treasury Decision 1489 modifies Decision 1476 requiring "all packages capable of containing 5 gallons or more of spirits to be stamped." So many protests have been made that Acting Commissioner Williams has issued this modification:

This office is unwilling to enforce a regulation which is not an imperative requirement of the law and which the interests of the Government do not seem at this time to absolutely demand, the ruling is hereby modified and glass and earthenware containers, wicker covered or otherwise, will be exempted from the operation of T. D. 1476.

It should be understood, however, that the law will be rigidly enforced in the case of any unstamped container of 5 gallons or more which is found filled with distilled spirits to its full capacity.

Of course, also in any case where there is reason to believe the spirits are untaxed and they will be subject to seizure and forfeiture without regard to the kind of container.

## Three Arrests Follow Raids on Cocaine Vendors.

Detectives of the Health Department of New York City recently made three arrests in connection with raids on alleged vending places of cocaine in the Chinatown district, Borough of Manhattan. Following the purchase in a Pell street apartment of what is alleged to be cocaine by a lobbyist whom the detectives furnished with a marked dollar bill, a woman known as Mattie Smith was seized and 25 bottles labeled cocaine and valued at \$200 were found in a hollowed-out place in a window sill. The woman was held in default of \$1000 bail on the charge of selling cocaine. The detectives are looking for a negro, George Patterson, who is alleged to be an accomplice of the woman.

The other two arrests were those of Chu Wah, of 4 Doyers street, and George Murray, a janitor, of 42½ Division street, who were also held in \$1000 bail each for trial on charges of selling cocaine.

## Will Be No Overproduction of Ginseng.

WAUSAU, Wis., May 15.—That there will soon be an overproduction of ginseng is a popular fallacy in the opinion of J. H. Koehler, president of the Wisconsin Ginseng Gardeners. The reports show that the quantity of ginseng exported in the year ending June 1, 1898 was 2.25 times as much as that exported in 1908.

## Bill to Print Formulas on Paint is Killed.

LANSING, Mich., May 15.—The Waters Bill, requiring paint manufacturers to print on the labels on packages of their products the formula of the contents, has been killed in the House. It was alleged that the bill would benefit the so-called "white lead trust."

# THE PHARMACEUTICAL ERA

PUBLISHED EVERY THURSDAY

VOL. XLJ.

NEW YORK, MAY 27, 1909

No. 21

D. O. HAYNES & CO. - Publishers

90 WILLIAM STREET, NEW YORK

Telephone, 2457 John.

Cable Address: "Era, New York."

Western Office:

Room 500, Dickey Building, 40 Dearborn St., Chicago

Telephone, Central 5888

## SUBSCRIPTION RATES.

United States, Cuba, Hawaii, Porto Rico, the Philippines, and Mexico	\$2.50 a Year
To Canada, postpaid	3.00 a Year
To Foreign Countries in Postal Union	4.00 a Year
Single Copies	10 Cents.

ALL SUBSCRIPTIONS ARE PAYABLE STRICTLY IN ADVANCE

Published every Thursday at 90 William Street, Borough of Manhattan, New York, by D. O. Haynes & Co., a corporation; President and treasurer, David O. Haynes; vice-president, Ezra J. Kennedy; secretary, Edward W. Drew. The address of the offices is the office of this publication, and the title is registered in the United States Patent Office.

Entered at the New York Post-Office as Second Class Matter

## Re Photographs for "Era Album"

### Illustrated Section

Each subscriber to The Pharmaceutical Era is entitled to representation in this work, and is invited to send us his photograph. We do not require a subscription from each partner and clerk. If the firm or proprietor is a subscriber, the other partners and clerks may have their portraits included for \$1.50 each. To secure all of the Album sections one must be a subscriber to The Era in his own name.

In sending photographs be sure that each one is distinctly labeled with the name, address, business, profession or occupation of the person, written clearly on the back of your photograph. A good plan is to write it on a printed label and stick it on the center of the back of your photograph. Here is a good specimen:

FOR ERA ALBUM.

Fred S. Rogers, Middletown, N. Y.

McMonagle & Rogers.

Ex-Pres. N. Y. State Pharm. Assn.

When additional photographs of partners and clerks are sent, each one should have written on it the name of the subscriber who sends it, as well as the name of the person in the photograph.

### Cabinet Photographs Only

The style of photograph we require is the so-called "Cabinet" size, with the head about two inches long. If other sizes are furnished they interfere with our plans for keeping the faces uniform, also prevent us from classifying the cuts by localities.

In view of the great amount of work we are assuming, to have each of our subscribers properly represented in this Album, we feel that we are not asking too much when we request each subscriber to supply us with the size and kind of a photograph which will facilitate our work and best enable us to do him credit.

In forwarding photographs for the Album, see that they are distinctly addressed as follows.

THE PHARMACEUTICAL ERA,

For Era Album

90 WILLIAM ST., NEW YORK.

## A KNOCK-OUT FOR PHARMACY REFORM.

In disapproving the Brown Pharmacy Reform Act, as reported in our news columns on page 498, Governor Hughes says it is unnecessary to consider any objections to the measure except the one which gives the New York State Pharmaceutical Association the privilege of nominating a list of pharmacists from which the Board of Regents shall appoint members of the State Board of Pharmacy. That seems to be the vital, paramount objection in the mind of the executive, an objection overshadowing all of the good features of this reform measure.

The Governor's course is quite as incomprehensible as was his disapproval a year ago of the Whitney-Wainwright Act which provided for up-to-date legislation in the sale of drugs. His reason for disapproving that measure was that a board elected by the pharmacists of the State was not a proper body to enforce the pure drugs provisions of the Whitney-Wainwright measure. Now he objects to the Brown Act because he does not believe in the policy of entrusting the power of enforcing the law to "persons designated by a private organization," meaning the New York State Pharmaceutical Association.

At this time extended comment is unnecessary, but these questions are bound to arise: Why does the Governor object to having the pharmacists of the State, either in local incorporated organizations, or through its State association, have a voice in maintaining the high standard of this important board? Are not the practical politicians, who want the spoils of office, really behind all of this opposition to measures which would take the board out of party politics? Or can it be that prospective law breakers are interested in tearing down the safeguards that should protect the integrity and ensure the efficiency of the board?

## TWO SIDES OF PROPAGANDA MOVEMENT.

Both friends and critics of the U.S.P. and N.F. Propaganda will peruse with interest Mr. Kaczorowski's paper read before the Louisiana State Ph.A. this month and printed on page 494 of this issue of the ERA. While all will not agree with much that is said by the New Orleans pharmacist there are several suggestions which he makes that are food for thought. Theoretically the propaganda work is a good thing and should aid in advancing the interests of both the professions of medicine and pharmacy, but in practice there are many difficulties to confront the propagandists.

As a basic principle education of the physicians must be considered and there is a hopeful augury in that respect in the expansion of the curriculums of

the leading medical colleges. To break the old timers of their bad habits is a difficult task, particularly at long range and through pedagogic application of principles. Local effort of the friendly, co-operative, personal nature is almost invariably essential to success in conducting a crusade of this kind, for unless diplomatically approached professional men in any line are not eager to admit, in fact they will rarely confess, that men in other professions are qualified to assume a pedantic or dictatorial attitude when preaching to them that methods taught in their alma maters were all wrong.

Properly approached, the average physician is willing to listen to argument presented in a courteous and convincing manner by an acquaintance, but the same man is likely to resent being bombarded with stock literature emanating from strangers and inferentially reflecting upon his professional attainments. Primarily the best results are based upon the pharmacists' efforts with physicians of their acquaintance and next through the conferences or get-together meetings arranged under local auspices, or by city, county or State associations, these assemblages affording the personal introductions which are essential in most cases to the advancement of propaganda work. Campaigns conducted on these lines have been very successful in New York State and the propaganda committee of the State Ph.A. has made remarkable progress through the activity, earnestness and diplomacy of its members.

#### THE INTERNAL REVENUE AND DRUGGISTS.

Commissioner Wheeler's letter ament the Beef, Wine and Iron controversy, published on page 477 of the last ERA, furnished a clear and comprehensive exposition of the relation of the Internal Revenue Department to the druggists of the country, as well as to the citizens and taxpayers generally. It reiterates what has been said before and should be carried in mind, that the department is merely an agency of the Government for the collection of taxes and that it is not a moral censor, nor a police power. Its function in the matter of imposing and collecting a tax upon the use and sale of alcohol and its compounds is simply to see that the Government gets what the law provides shall be paid in the way of revenue. In doing this Mr. Wheeler makes it clear that there is no disposition to impose any hardships, but, on the contrary, fairness and impartiality are "cardinal principles" with all concerned in the bureau in the enforcement of the law.

In dealing with the Beef, Wine and Iron matter the commissioner throws new light on the causes which led to the promulgation of Treasury Decision 1358. There is not much that can be said in defense of druggists or others who palmed off inferior brands of port wine with little or no medicinal content as being a curative agent and it appears to have been impositions of this kind prepared for use as beverages which provoked the order. The status of the real article, used medicinally and not as a beverage, does not appear to have been disturbed, for the communication points out that pharmacists by compounding the wines or spirits into medicines, bring themselves

within the exemption provided by Section 3246 R. S., but to secure the benefit of this exemption the spirits or wines must be compounded with drugs sufficient in character and amount to have a therapeutic effect other than would be obtained by the use of spirits or wines uncompounded, and sufficient to render the compound unsuitable for use as a beverage.

So long as druggists or others shall undertake to evade the revenue or local option laws by selling tonics and other preparations containing alcohol in quantities sufficient to furnish the means of intoxication just so long will there be trouble of this description. If a druggist wishes to sell Beef, Wine and Iron or any similar preparation let him comply with the Formulary requirements and with any local or other laws governing the sale. Except in wide-open communities there is danger in catering to the alcoholic trade, for the tendency toward heavy fines and jail sentences for doing a liquor business is growing throughout the country.

#### SELLING PERIODICALS IN PHARMACIES.

With the approach of the vacation season special attention is freshly directed to the reasonable demand for magazines and periodical literature and the peculiar adaptability of the average pharmacy for satisfactorily handling this attractive and profitable side-line. We have on several occasions pointed out the many advantages to be derived by pharmacists from carrying magazines in stock for their patrons and many drug stores have installed this feature. All that has previously been said applies at the present time, but with the additional argument that the approaching summer season will witness a larger sale than heretofore for light, interesting and entertaining literature of the magazine variety.

In our advertising pages some timely and pertinent announcements are made this week by the American News Company and by the *Ladies' Home Journal*, both of which are commended to the consideration of druggists who sell periodicals as well as to those who have yet to be introduced to this side-line. To the latter we would add that there is no time like the present to make the plunge into this branch of trade.

According to one who is in a position to speak with authority, the two, four, eight propaganda of the N.A.R.D. has cost the druggists a great deal more than it has benefited them. This individual states further, that in his judgment fully twenty proprietary preparations have been advanced to conform to this schedule where one has been reduced, and the unfortunate part of the matter is that most of the preparations advanced were not large sellers and were generally sold by druggists at their full retail prices, so that the additional cost comes out of the druggists' profits.

If the meeting of the Brooklyn Pharmaceutical Association the other night restores harmony in the ranks of the druggists of that borough there will be cause for congratulation. Evidence of a disposition to "let the dead bury the dead" was noticeable. Let the outsiders do the fighting.

A wasted winter at Albany has taught some of the pharmacists that when the politicians are after spoils one excuse is as good as another.

It is doubtful if Congress will go any further than it has in the way of paternalism for denatured alcohol and the two

bills recently introduced, one providing for a bounty and the other for a new experimental station, will probably rest in committee, to which they have been consigned with the understanding that nothing will be done prior to the regular session which assembles in December. Meanwhile the denatured alcohol industry is making strides, the April production having reached 444,965 gallons, a gain of 43 per cent over a year ago. With this exhibit of increase there does not appear to be any necessity for giving a bounty to the producers.

The druggist who boasts that his first impressions are always right, is merely bull-headed.

"The Two Largest Diamonds in the World"—both found within the last twenty years, are the stones known as the Excelsior and the Cullinan. The romantic story of their finding, cutting, and disposition has been written for the *June Century* by Dr. George Frederick Kunz, gem expert and one of the authors of "The Book of the Pearl."

It does not pay to be too busy. Intelligent actions only follow the devotion of time to intelligent thought.

As a pharmaceutical center Baltimore has claimed and still can claim many pharmacists whose influence has extended far beyond her geographical boundaries. A list of their names would be a long one, but it would be sure to include that of Dr. Henry P. Hynson, of the retail drug firm of Hynson, Westcott & Co., a member of the American Pharmaceutical Association, professor of commercial pharmacy in the Maryland College of Pharmacy, president of the American Conference of Pharmaceutical Faculties, ex-president of the N.A.R.D., ex-president of the Maryland Pharmaceutical Association, in fact, any complete record of his professional affiliations would take up more space than is usually devoted to such enumerations in the *Era*.

With all the duties devolving upon him as a member and officer of these many organizations, he still devotes much time to the practical affairs of a successful retail drug business. His friends also say that he is a big man in Baltimore County and de facto mayor of Roland Park, a palatial suburb in which he lives. Only recently he was made foreman of the Baltimore County Grand Jury for the May term, his duties for the present requiring his presence most of the time at Towson, the county seat.

Professor Hynson is a native of the Eastern Shore of Maryland and practically has been identified with pharmacy most of his life. He graduated from the Maryland College of Pharmacy in 1877, winning both the first college prize and the alumni prize. Besides conducting a drug business he delivered lectures before the College of Physicians and Surgeons and the Women's Medical College, later becoming a member of the faculty of his alma mater, the Maryland College of Pharmacy. In this position he has devoted much energy to impressing upon his students the value of a thorough mastery of business detail and practical drug store work. In a biographical sketch it would be difficult to name the predominating characteristics of Professor Hynson's personality, but his versatility and interest in the progress of pharmacy are reflected in the many papers he has each year presented to the American Pharmaceutical Association and other organizations with which he is affiliated.

A rubber ball weighing 1118 pounds, the biggest in the world, was shown in the window of a rubber company in Broadway, New York, recently, on its way to the first rubber exhibition in London. It had been exhibited previously in Para. It was prepared by the rubber cutter Henrique I. Dos Santos and his two sons, both under age, and they used 800 bottles or 1800 pounds of rubber juice or milk to make the prize ball. Dos Santos and his boys are experts and work in

Seringal da Boca do Rio Zinho for Señor José Maria Dias Pereira, who owns plantations in the Acre region and sends 250 tons of rubber annually to Para. It took 25 days to transport the big ball from the plantation to the river bank of the Acre and it was the only cargo of a small boat.

"It is astonishing to note how some men can imbibe the most fiery liquids as easily as the average citizen can toss down a glass of lemonade," said Capt. George F. Rainey, of Del Rio, Tex., at the Hotel Kernan, says the *Baltimore American*. "I have a neighbor who is so used to drinking whisky of extraordinary high proof—130—that when he indulges in that blistering essence of rye he follows it up with a glass of 100 proof—the standard—as a 'chaser,' quite as most men take water to mitigate the ardent stuff. In my country it is no uncommon thing for old frontiersmen to drink alcohol that has been slightly diluted, and I have seen not a few who could pour the raw article down their throats in seeming enjoyment."

Sir Robert Ball, in an address on "Modern Views of the Origin of the Earth" at the University College, London, recently, said that the general truth of the nebular theory of the origin of the earth was becoming more and more firmly accepted every day. The great difficulty about it was the enormous periods of times they were called upon to consider. They could look through the universe and see objects here and there which exhibited various phases through which our own system had gone in its transformation from the original fire mist to the form in which they now had it. The existence of the whole human race was but a flutter compared to the stupendous periods which geology opened up to their vista.

The fire mists flattened down and contracted and began to revolve, and then 16 take spiral form. In the central part of the spiral nebulae the sun formed. It was now generally believed that the sun and the earth all formed part of a spiral nebulae.

The theory of Dr. Herman Swoboda, a noted Viennese physician, that all men suffer from physical exhaustion at regularly recurrent periods of 23 days, or multiples thereof, and that nearly all natural deaths occur at one of these critical periods, is attracting much attention in London.

Dr. Swoboda says that men suffer one of these "bad days" without having committed any excess of any kind. A "bad day" comes to a man without any appreciable external cause. He may suffer from headache, palpitation of the heart, indigestion, nervous excitability or lassitude. An eminent London specialist says Dr. Swoboda's theory is consistent with his own experience and observation.

"Is he given to blowing his own horn?"

"Oh, no. He has a chanfleurr."

A substitute for oyster shells, ground, for stimulating the egg-laying proclivities of the American hen, is being sought by Prof. J. G. Halpin, of one of the departments of the University of Michigan, and Dr. Alfred C. Lane, head of the geological survey.

The absent-minded professor returned home one evening, and, after rining his front doorbell for some time to no effect, heard the maid's voice from the second-story window: "The professor is not in."

"All right," quietly answered the professor; "I'll call again." And he hobbled down the stone steps.—*Jour Lippincott's*.

Among the German Crown Prince's most treasured possessions is a scrapbook containing over a thousand pages of adverse newspaper criticism. The first 500 pages are in

DR. HENRY P. HYNSON,  
of Baltimore, Md.

scribed with a gold lettered heading "I hope I am not like this!" Some of the most outspoken comments, says the *Gentleman*, are accompanied by marginal notes in the Prince's own handwriting—such as "the enemy's voice is no less interesting than the friend's."

The second and third parts of the book deal respectively with the Crown Princess, her children and the Grand Duchess Anastasia, the Princess' mother. This volume is considered of too private a nature to be available to all and sundry, so it is sealed by a massive lock, keys of which are possessed only by the Crown Prince and his wife.

Dr. Fox: "Now, my dear sir, I can't cure you unless you promise to do everything I tell you."

Mr. Sickeligh: "I promise."

Dr. Fox: "Good! Now, first of all, pay me my last year's bill."

Someone has well said that "advertising should contain little black matter, more white matter, but a great deal of gray matter." It is pathetic to see how many advertisers crowd their space in order to economize, not realizing that less text, more display, and selected material will "pull" infinitely more.

Judge—What? Aren't you the man I let off yesterday on your promise to keep sober?

Prisoner—Yes, your honor. I celebrated the event.

A feature of a recent convention in New York was some interesting information about the oyster industry. Said A. F. Merrill, of this city, president of the National Oystermen's Association:

"During all the investigations at Washington of oysters from the Gulf of Mexico to the State of Massachusetts, the oysters which carried the best, had the best flavor and showed the best condition at the end of the long journeys, came from within a radius of 100 miles of New York.

"In round numbers there were handled in the State of New York last year 1,000,000,000 bushels of oysters, valued at \$5,275,000, and the total amount of money invested in the industry is estimated at \$10,000,000.

"In 1875 there was shipped by one concern to California, 3250 barrels of oysters. In 1907 there was shipped by the same concern to California 66,000 barrels of oysters. The greater portion of this seed came from Long Island Sound, whereas formerly they were caught in Staten Island Sound."

Mrs. Jones—And she told me not to mention it to a living being.

Mr. Jones—Huh! And you tell it to me.

Mrs. Jones—Yes. She said nothing about dead ones.

Consul General William H. Michael, of Calcutta, reports that there are eight paper mills in operation in British India, and that most of the white and blue foolscap and much of the blotting paper, note paper and envelopes used in the government offices are obtained from the Indian mills. Nevertheless, the native mills produce only about one-third of the entire amount consumed, and this in spite of the fact that India has better and cheaper raw materials than most paper manufacturing countries.

The fellow who brags of his college

And all his great learning's a bore;

The man who is "proud of his knowledge"

Is badly in need of some more.

Considerable surprise and great interest have been caused throughout England by the discovery in Cornwall of large quantities of pitchblende, from which radium is produced, after the extraction of uranium, says the *Boston Globe*. Heretofore the tailings from the Cornwall mines have been regarded as useless, but it has recently been found that the residuum is the mother of radium.

Pitchblende ore is chiefly obtained in the Erz-Gebirge, in Bohemia, and so valuable are the finds that the Austrian Government has prohibited further exportation from that country.

The process of extracting radium from the ore is extremely tedious and expensive, tons of pitchblende yielding only the minutest quantity of the precious metal, which is theoretically worth \$30,000,000 a pound. The total world production thus

far has not equalled one grain, or 1-480th of a pound. To be appreciably cheaper it must be derived from uranium minerals, when obtainable in large quantities from surface deposits. The Cornish mines are already fitted with machinery for the treatment of the residuum as ore, and the company contemplates the treatment of pitchblende.

"I believe in sticking to my job," remarked the sheet of fly-paper complacently.

"I don't," retorted the glass graduate, "my theory is to have a rattling good time, so here goes!" and he took a header into the stone sink.

A society having for its purpose the extermination of such rich land owners and merchants as have incurred the enmity of its members has been formed at Manzanillo, Mexico. When the death of a person has been determined upon the members meet, and from a basket of lemons each takes one in turn until a marked lemon is taken out. The man who draws this lemon is the one to slay the selected victim. The lemon is then sent to the doomed person as a notice that he is to die. Comisario Político Nicasia Gonzales, of the town of San José del Gonzales, was the first victim of the society. Juan Cincac Ria has been arrested as his assassin.

"I'm two edged," bragged the spatula.

"And a dull proposition at all," sneered the lance.

One of the most curious instances of longevity is found in Miss Louisa Courtenay's "Notes of an Octogenarian," says the *Denver News Times*. A witness in a will case in which Belden-Ker, the great English conveyancer, was engaged, was asked if he had any brothers or sisters. He replied that he had one brother who died 150 years ago. The Court expressed incredulity and documentary evidence was produced in support of the statement.

This showed that the witness' father, who was married first at the age of 19, had a son who died in infancy. The father married again at the age of 75, and had a son who lived to appear in the witness box at the age of 94, and made the above startling statement.

Friedrich Theil, a peasant of Randa, in Saxony, whose leisure hours have been devoted to the study of Greek, Latin, Hebrew, Sanskrit, Arabic and Gaelic, is 75 years old. He is beginning to study the English language. Theil is in correspondence with some of the leading philologists of the day.

"Did you ever meet any one more conceited than Bragg is?" "Well, there's one thing about him. He certainly has a loyal tongue."

"Loyal tongue?"

"Yes. It's always saying nice things about its owner."

As a result of the almost bloodless conflict with Spain, the actual hostilities of which lasted less than six weeks, the United States paid in 1908 \$3,471,157 in pensions, with assurance of an annual increase for many years to come, and the rolls of the Pension Office today bear the names of 24,000 pensioners, over 19,000 of whom are invalids and survivors of this war. More than 18,000 addition claims are now pending, although the total of the Cuban army of invasion was only 20,000 men. In 1907 the United States paid in pensions a total of \$116,000,000. For 1908 the appropriation was increased to \$151,000,000.

In all the wars in which the United States has engaged disease has been responsible for more than 70 per cent of the mortality, more than one-half of which could have easily been prevented through organization and preparedness.

Preventable disease, more than wounds, swells the pension lists. Through the Museum of Safety and Sanitation, it will be shown how to lessen this loss. Statistics of the Pension Office prove that if this unnecessary loss had been avoided the saving in pensions alone would have paid the cost of the resulting wars every 25 years. Aside from the sorrow of the homes made desolate, consider the economic value of the 70 per cent of lives now uselessly sacrificed that might be saved as bread-winners in industrial pursuits.

Some clerks appear to believe that they can increase their pharmaceutical knowledge by studying the "form sheets" of horse racing.

## The Anton Partnership.

By Emma Gary Wallace.

Jeremiah Anton had held forth at the same old stand for forty years. For some reason or other he felt that the change in his local surroundings and the change in business methods generally were a sort of personal affront to himself, and that only as he—Jeremiah B. Anton—stood his ground and waved the flag of defiance at the grand march of the endless procession of modern ideas, did he prove his loyalty to his own somewhat meagre success of earlier years.

Business was not even what it used to be, however, and that fact coupled with the scarcity of satis-

factory help caused Juliet Anton to enter her name as a student of pharmacy. In this decision she received no parental encouragement, neither did she meet any special opposition. Having inherited her father's temperament of dogged persistence together with his native love for the business, she pursued the course she had undertaken with studious earnestness.

In the meantime clerks came and went and Jeremiah Anton found himself taking his meals in his store with irritating frequency. Sam, the errand boy, was the only one who seemed to stay "put" with Anton, and even he referred nonchalantly to his employer as "The Headsman," "The Executioner" and "The Annihilator" when that worthy was well out of hearing. Sometimes Sam was at a loss to understand his own long and uninterrupted term of favor, but he had a theory, up to which he lived with praiseworthy diligence. This theory consisted in never doing anything unless specifically directed to do so, and then in doing his level best and that without any unnecessary delay. He had learned some lessons by watching his superiors in office come and go. Sam stayed.

There was Albright, for example, who had come highly recommended and he certainly was brimful of enthusiasm. He was chock full of what Anton called new-fangled, fool ideas and he, Anton—did not propose to be dragged at the tail of any such an uncertain kite. He had done business on the ground forty years and was strenuously opposed to attempting air-ship methods now.

Albright had rearranged the contents of the shelves in the Back Room in what he considered a sane and logical order. The confusion to others had been fairly good order to Anton who had made room for new purchases as occasion demanded. When he lost a sale because he couldn't lay his hand on the article wanted, he was provoked, and when the very next customer likewise went out without having her simple want supplied, he was, in the graphic but inelegant language of Sam, "Fit to be tied."

The new clerk returned from supper just in the nick of time to receive a somewhat heated statement of his own errors of omission and commission. He listened quietly without removing his coat, requested his pay and departed with the parting shot, "As an annihilator of honest enthusiasm, Mr. Anton, I hope never to meet your equal—Good evening."

The next man found the stock manufacturing in urgent need of attention, but the working apparatus was wholly inadequate to the performance of good work. He pointed this out gently to his employer and received the assurance that it had been good enough for him for 40 years, that it would do a while longer, and that it was a deal easier to call on new things than to pay for them, besides much of the stuff could be bought about as cheaply as made anyway. The subject was dropped, Margat deciding that he had no call to worry about it if the owner did not.

When he proposed a regular window cleaning day with a series of window trims, advertising the store's Own Specials, Jeremiah Anton expressed fresh disapproval at the wastefulness of time and goods likely to be involved, and declared that if people wanted a liniment or a tonic, they had tongues in their heads to come in and ask for them, and that if they

failed to do so it was not his fault, and as for spending a good half-day a week washing and dressing a window it was ridiculous, and an idea probably concocted by a parcel of folks who rather play than work any day.

Margat proposed no more innovations. When the window became altogether too shabby, it was cleaned and anything handy put in to fill up space. He did what came his way and was as leisurely about it as possible. "No use tiring one's self," he confided to Sam. "Anything I'd propose, he'd kill from force of habit. Might as well take it easy. That is what he seems to want and pay goes on just the same." Sam grinned. He had heard that argument before.

It was the calm before the storm and when the sky cleared, Margat found himself hunting for another place, smarting from a sense of injustice at the final thought of the kind of a recommendation he might expect to receive.

The next comer was a popular fellow with his numberless friends, to whom he was fond of giving inside prices, and he, too, soon lost his head. Then came the Smasher. He worked, Anton said, "like all possessed," but a trail of costly breakages blazed his path. The smashing of the second show case was the last straw that fractured the none-too-patient camel's back. It had been so unnecessary to slam down the great, heavy pile of Sunday newspapers on the fragile glass surface as though it had been made of iron.

Anton dined sumptuously off the office desk for a week. Juliet was graduated and although nothing could have dragged the acknowledgment from him, Jeremiah Anton was heartily glad that his daughter had elected to study pharmacy. She was daily expected home and would doubtless need a couple of days to rest, after which he'd see what sort of mettle she was made of.

Contrary to his expectations, the very next morning after her arrival she appeared at the store, and he noticed with admiration with what quiet confidence she bore herself, and observed for the first time how firmly her mouth and chin were molded.

"I have come to talk business," she said. "Are you willing to consider taking a partner, Father?"

Jeremiah Anton drew in his own bearded chin, and looked over his glasses with astonishment.

"I've got along forty years without any partner, and I reckon I can pull along without one the rest of the way. I'm neither a chicken, exactly, nor yet in my dotage, and so we'll drop that idea for good and all. I am in need of help, however, and I'll hire you at the same rate I paid that last one, the Smasher, a regular battering ram he was, too."

His daughter shook her head firmly. "I shall be satisfied with whatever interest in the business you think is fair," she said. "And I am willing to put in one-half of Grandmother Anton's legacy to me, but I must have an interest if I am to stay, or in fact to come at all. Demister across the Square is advertising for a capable, trustworthy assistant. I believe I am both. He pays more than you can afford to, and if I am to be merely a clerk here on a most uncertain footing, the proposition does not appeal to me at all."

Anton snorted with indignation and paced impatiently back and forth.

"What put such a crazy notion as a partnership into your head?" he demanded.

Juliet Anton opened her hand-bag without a word and drew therefrom a carefully folded paper. When opened out it was about four feet long and it was dated some five years before. Stepping to the wall she hung it upon the nail sacred to the office calendar. Her astonished parent advanced to inspect this strange document.

To the left were the names of all help employed in the intervening time and who had been either discharged or who had left of their own volition. To the right was a brief analysis of the qualifications, virtues and failings of each, also the real—not the assumed—reason why the business relationship had been severed.

Sometimes it hit the employer and sometimes the employee. Evidently the writer had spoiled no story for relationship sake. Juliet Anton smiled as she watched her father read line after line. She almost wished that she had not been quite so brutally frank in some cases, but she knew that she had told the truth. How good to her he had always been! The money to keep her in college had pulled. She knew, too well, how hard it had been, and yet he had spared her little

legacy intact. Bless his rough ways. He should have the benefit of it now, even if it had to be forced upon him. Perhaps—

"Well, what about it?" her father's tone was vibrant with accustomed resistance. Had she, too—his little curly-headed Juliet—turned against him with the rest?

The despairing note of that tone struck home to the girl's heart. For a brief moment it flashed upon her how a surgeon must feel, who for measures of future health must inflict present suffering.

"Father," she said evenly, "some of those men merited exactly what they got. Some did not. Encouragement, guiding and a real personal interest would have steadied many of them. If you had taken pains to understand them or had allowed them to come near enough to understand you, it might have made your business way much easier. One by one they were dropped, and every time you sent away a good man, or one in whom the possibilities for good existed, you strengthened competition against yourself by weakening your own position.

"I do not propose to join that list, nor yet to be unhappy in my chosen work. The business needs much new equipment to bring it up to date. We must get out of some of the deeply worn ruts that have given our competitors the advantage, but it will take money and energy to do it, and unless we are ready to work together in a spirit of hearty co-operation there is small hope of success. I believe that the opportunity is as good for us right here as for any retail druggist in this city. Let us go in together and develop it. I shall be ready to listen to the wisdom of your experience, and I shall expect you to listen to my plans for practical improvement. Do I stay?"

There was a twinkle in the old man's eyes. "How much interest do you want, Juliet?" he asked, using the pet name she had not heard for years.

"Whatever you say, Daddy," she responded happily. "It isn't the amount of my interest I care nearly so much about as it is security for some of my pet ideas. I don't propose to have them annihilated, and I just want you to watch the bank account of Jeremiah Anton and Company grow."

"No more Back Store meals, Daddy mine; your latest incumbent has come for keeps!"

And Jeremiah Anton passed out into the Front Store to wait on a customer who could have been taken care of equally well by the junior clerk. He wanted to hide the pride and delight which fairly radiated from his rugged countenance. Juliet was his own daughter, a chip of the old block, he told himself, and he was no end proud that the metal rang true.

#### "Shall Our Children Become Pharmacists?"

WASHINGTON, May 22.—The May meeting of Washington Chapter No. 4, W.O.N.A.R.D., was held at the residence of the president, Mrs. Charles J. Fuhrman, on the 20th. The chapter received a new member, Mrs. Boyer. Favorable collection of dues was reported. "The children of druggists" was the topic of conversation. In leading the discussion Mrs. Fuhrman was earnest in expressing her desire that her sons should become pharmacists. She stated her belief that by the time her boys should graduate that present progress would have led to a realization of the best ideals of real harmony and professional independence. Other members voiced their agreement in this belief. The frank conference which followed Mrs. Fuhrman's expression of bright optimism was of real value to those present and gave them a broader outlook upon the field of organization effort. Refreshments were served, after partaking of which the meeting adjourned subject to the call of the president for the purpose of electing delegates to the National convention in Louisville.

#### Respectfully Declined.

Uncle Zebulon was on a visit to his nephew in the big city, and the two had gone to a restaurant for dinner. They had given their order and were waiting for it to be filled when the younger man, who had been glancing at a paper that lay on the table, said:

"By the way, uncle, did you ever have cerebro-spinal meningitis?"

"No," replied Uncle Zebulon, after a few moments' mental struggle with the question, "and I don't want any. I'd rather have fried liver and bacon any day."—*Philadelphia Ledger*.

## Gathering of the Gods.

By Joel Blanc.

At the end of each Olympiad or four years, Jupiter gathers the gods around his throne on Mount Olympus to listen to reports upon their labors for the four years just closed. For each Olympiad he assigns them to some particular field for investigation and correction.

On this particular occasion the gods were slow to gather and as they arrived it could be seen that they were worn and weary and extremely ill-natured. For four years they had been on that planet of discord known as "The Drug World."

Icarus was the only one who smiled. Jupiter, noting his good nature, remarked that for once the wax must have kept his wings on.

"Oh, no," replied Icarus. "I came up in the elevator called Pharmaceutical Ethics. It makes it as easy to reach your Olympian throne as to ascend to a convention hall on the top of a Louisville hotel."

After Jupiter called the meeting to order with a new thunderbolt ravel which Vulcan had just forged for him, Venus made trouble by darting down the side of the mountain to embrace a handsomely dressed mortal who was ascending between Scylla and Charybdis. Venus was always looking for a new beau. This one was named Drummer and though he smiled upon Venus, he could not escape from between the Scylla called "Loss" and the Charybdis called "Customer." As they led Drummer up the mountain they alternately pummeled him and at the same time listened to the fish stories which he told them.

When the assemblage was at last in order Prometheus took the floor and announced that he had brought a box containing all the Drug Trade Problems. Prometheus was a pretty slick individual, so he put down the box and skipped. When Jupiter saw the box he turned pale, for he himself had loaded it and sent it to Prometheus as a punishment for stealing fire from the chariot of the sun. Before Pluto could get the box down cellar in Hades, Prometheus' sister-in-law, Pandora, prompted by a woman's curiosity, opened the box and out swarmed many noxious and venomous insects and reptiles. Among them were Cut Prices, Self-Dispensing, Best Quantity Discounts, Substitution and Dues Collections. Poor Pandora was all stung up and Venus was bitten on the hip by the serpent called Bargain. Although Venus and her sisters have worn the armor called Corsets, ever since that time, Bargains still pursue and sting them. Pandora's Box looked so much like a crate of vegetables and other hats that Juno said the whole business was a trick of mean man. So she took all the goddesses into the sun-parlor and organized a suffragette society known as the W.O.N.A.R.D.

After Neptune had restored order by turning the hose on Helen's beau Paris, who was scheming to be made an honorary member of the W.O.N.A.R.D., Morpheus took the floor and petitioned the throne to permit him to change his name some more. He said that he had no sooner registered in a Chicago hotel than an old mortal named Rodemann had him pinched for peddling dope and that after Phoebe bailed him out he wandered into Chinatown and was all smoked up. He said that all his party had had trouble. Icelus had gotten into a fight with each of the seventeen, "one and only originators" of the Iceless Soda Fountain. Somnus was mistaken for a breakfast food and carted off to the Department of Agriculture where they distilled him into a new sort of "Imitation Whisky" or saw-dust alcohol, and Oneirus was baled before the medical society for selling spectacles without an M.D.'s license because he tested eyes with a machine, instead of with ten days of atropin at four dollars per day.

"1," said Bacchus, "have a grievance not unlike that of Morpheus. I, too, have suffered for my name; for two of

them, in fact. I landed upon the mortal planet in a province named Prohibition and when I sent my cards into the druggists they sent back word for me to sneak in through the back door and keep my eyes open for strange beings known as 'Drys' and a vaudeville actress named Carrie Nation. But the populace approached me with strange winks and grimaces and when I attempted to cheer them with the juice of the grape a magician called Mazistree transformed me, first into a blind tiger and then into a blind pig. So I fled to New York and in that part which is in both Europe and Asia and called East Side I took one of my other names, that of Bromius. The intoxicated ones of the populace tried to swallow me, mistaking me for something called Bracer and they asked if my family was either Seltzer, Lithia or Caffeine."

While Bacchus was still speaking there was a chorus of harks and yelps from the rear and with the cry of "Dog fight," the gods rushed off to bet on the scrap. As might have been expected, the trouble came from Cerberus, that pup of Pluto's. As usual, its three heads, Retailer, Wholesaler and Manufacturer, were quarrelling as to which one should wag the tail named Public. The fight was ended when Esculapins and some other doctors cut off the tail and ran away with it.

Scarcely had order been restored when a mild-eyed Centaur named Chiron trotted up to the throne. This was the great physician who instructed Esculapins and Achilles. Said Chiron, "Great disappointment awaited me on the Drug World. I had supposed that druggists had something to do with physicians and that physicians had something to do with prescriptions. Great was my error! I found that the science of medicine consisted of tablets and politics and impossible surgical operations for newspaper purposes only. I found that the science of pharmacy was concerned chiefly with forcing the manufacturers to sell to retailers at jobbers' prices, and at the same time keeping the wholesalers and manufacturers from selling to the public and the physicians at retailers' prices. When I mentioned that there seemed to be something slightly inconsistent in the science I was told that I was only an old horse and that I had best go and eat grass. However, there was a new light dawning before I left. The organ of the National Retail Druggists' Association was vociferously demanding a 'Return to first principles.' As I originated the first principles and as they consisted of dried blood of a strangled infant, pickled toads' eyes, powdered monkey teeth and candied lizards' tails and other infallible simples, I hope to see them incorporated in the next Pharmacopœia along with pepsin and sorbims."

Castor, the god of Laxatives; Amalthea, the real discoverer of malted milk, and Aristæus, the discoverer of the process for extracting the oil of olives, were then appointed a Committee on Pure Drugs. Jupiter asked for their report. Aristæus said that all they had found out was that a Pittsburg concern was paying for half-space spaces in the papers to print a new version of "Ben Bolt," the refrain of which was:

"We don't"  
"Ben zoate."

Amalthea added that they had discovered that some one named Wiley was "One of the 57." Jupiter asked if Wiley was a pickle. Castor replied that he most certainly was not. He said that a number of embalmers had endeavored to hand lemons to Wiley, but that he was still a large jar of well-preserved Ginepro.

When Castor had finished, Jupiter noticed a long procession of Shades coming from the café. Their spokesmen came forward and addressed the throne thus: "Most High of the Enthroned! Great god of gods! I am the persimmons of this bunch. Get off the throne and let me sit there. We, the Shades whom you see were Earth Members of the American Medical Association, the National Association of Retail Druggists, the American Pharmaceutical Association, the National Wholesale Druggists' Association, the Proprietary Association of America and the Board of Revision of the Pharmacopœia. We never had a joint meeting in The Drug World, which the physicians owned, and we have therefore decided to hold one right here and now. You with your gods, goddesses and godlets may occupy the top gallery if you think that"—But already the gods were tumbling over each other to get out of danger. Apollo slid down the elevator cables, Saturn hid behind the radiator and Jupiter disappeared via the fire-escape. Only Mars, the god of war, remained. He was used to it.

## QUESTION BOX

THE OBJECT of this department is to furnish our subscribers and their clerks with reliable and tried formulas, and to discuss questions relating to practical pharmacy, prescription work, dispensing difficulties, etc. Requests for information are not acknowledged by mail, and ANONYMOUS COMMUNICATIONS RECEIVE NO ATTENTION; neither do we answer questions in this department from non-subscribers.

In this department frequent reference is necessarily made to information published in previous issues of The Era. Copies of these may be obtained at 10 cents each, except a few issues which are out of print, for which we charge 25 cents each.

### Emulsion of Balsam Fir.

(S. E. M.)—Some months ago Dr. J. T. Davidson contributed to an exchange the following formula for a balsam of fir emulsion which he highly recommended. A stock balsam mixture consisting of balsam of fir, 1 part; Venice turpentine, 1 part, and olive oil, 2 parts, is first prepared. Then take of this—

Balsam mixture	48 minims.
Oil of wintergreen	30 minims.
Powdered acacia	3 drams.
Spirit of chloroform	4 drams.
Tartar emetic	$\frac{1}{2}$ grain.
Diluted hydrocyanic acid	6 minims.
Syrup	12 drams.
Water, enough to make	8 ounces.

Make an emulsion. The proportion of balsam mixture may be varied somewhat to meet individual requirements.

### Carbon Tetrachloride.

(S. E. M.)—Carbon tetrachloride which has come to the front in recent years as a solvent and cleaning fluid, may be obtained from almost any jobber. For a description of it and its properties we can do no better than to reprint the following notes by Gane and Webster in a recent issue of *Drug Topics*:

As found in commerce it is a heavy, colorless, transparent liquid, usually having a rather objectionable odor due to the presence of sulphur compounds of carbon derived from the bisulphide from which it is manufactured. When these are removed the liquid has an odor somewhat resembling that of chloroform. Its specific gravity is about 1.62, so that a gallon of it will weigh about 13 pounds. It boils at 77° C. (170° F.) and does not freeze even below zero. It is non-inflammable, in fact, the vapor acts as a fire extinguisher and it has been recommended as a filler for the hand grenades used in putting out small fires. Carbon tetrachloride is insoluble in water, diluted alcohol and glycerin. It is readily soluble in acetone, glacial acetic acid, carbonic acid solutions, alcohol, fixed oil, chloroform, carbon bisulphide, benzole, ether, aniline, oleic acid, turpentine, kerosene and petroleum oils, and in fixed and volatile oils. It is one of the best solvents and is used largely as a solvent for fats in laboratory work and in the arts, especially in the manufacture of oil cake. It dissolves oils, fats, resins, some waxes, gutta percha, caoutchouc, cerasin, stearic acid, varnishes, paints, asphaltum, coal and pine tar, pitch, and some soaps. It may also be used to dissolve certain organic compounds like menthol, thymol, camphor, salicylic acid, etc. It is not decomposed by aqueous caustic alkali nor by strong acids, but alcoholic caustic alkalis convert it into potassium chloride and carbonate. It is coming largely into use as a solvent for many of the so-called varnish gums and we give herewith the solubility of the most important. Cammar, elemi, gutta percha, Venice turpentine, readily soluble in the cold; copal, kanri, softened but not dissolved, as with other solvents; benzoin, sandarach, shellac, insoluble, but soluble in a mixture of equal parts of alcohol and carbon tetrachloride; anime, dragon's blood, very slightly soluble.

Carbon tetrachloride is used to some extent also to reduce the inflammability of other solvents. It is unburnable itself and mixtures of turpentine or kerosene with an equal volume of the tetrachloride cannot be ignited under ordinary condi-

tions. An addition of 60 per cent renders gasoline unflammable at ordinary temperatures. Retail druggists find a ready sale for this substance as a cleaning agent for clothing of various kinds. A great advantage is that it does not affect even the most delicately colored fabrics. The purified product has further been recommended as a solvent for use in disinfecting the hands of surgeons prior to operations. Its penetrating power insures thorough disinfection, especially if about 1 per cent of iodine be dissolved in the tetrachloride and the hands well brushed with the solution. For pharmaceutical purposes in general it may be used in place of chloroform, except for internal use.

#### Compound Elixir of Sumbul.

(G. E. D.)—According to the Standard Formulary two quite dissimilar mixtures are dispensed under the name of "compound elixir of sumbul." You can take your choice:

Fluidextract of sumbul	2 fl. ounces.
Fluidextract of scullcap	1 fl. ounce.
Fluidextract of valerian	2 fl. drams.
Alcohol	1 fl. ounce.
Adjuvant elixir to make	16 fl. ounces.
Purified talcum	$\frac{1}{2}$ av. ounce.

Mix the fluidextracts and the alcohol, add the talcum, shake well, then add the elixir, shake again, and filter. Each fluidram represents  $7\frac{1}{2}$  grains of sumbul, about 2 grains of scullcap and about  $\frac{1}{2}$  grain of valerian.

Fluidextract of sumbul	2 fl. ounces.
Alcohol	1 fl. ounce.
Elixir of ammonium valerianate	8 fl. ounces.
Simple elixir	5 fl. ounces.

Mix the fluidextract and alcohol, add the two elixirs, and filter through talcum. Each fluidram represents 1 grain of ammonium valerianate and represents  $7\frac{1}{2}$  grains of sumbul.

#### Glove Cleaner.

(P. W.)—Try one of the following:

Curd soap	1 ounce.
Water	4 ounces.
Oil of lemon	$\frac{1}{4}$ dram.
French chalk	a sufficiency.

Shred the soap and dissolve in the water by heat, add the oil of lemon, and make into a stiff paste with the French chalk. If desired, the oil of lemon and chalk may be omitted, and replaced by finely powdered orris root.

White soap	4½ drams.
Hot water	2½ drams.
Rub into a paste and add,	
Solution of chlorinated soda	2½ drams.
Water of ammonia	20 minims.

Put the glove upon the hand and apply the paste with a piece of flannel, rubbing the kid from wrist to tip of fingers.

#### Reading an Obscure Prescription.

(B. B. F.)—We cannot satisfactorily reproduce the prescription you submit, owing to the fact that it is faintly written in pencil. However, we are satisfied that the following is a correct solution:

Fluidextract of glycyrrhiza	3 drams.
Ammonium chloride	3 drams.
Water, enough to make	3 ounces.

Directions, one teaspoonful every 4 hours.

This prescription closely follows the type laid down by many authorities, and Hare in particular (Practical Therapeutics), who states that ammonium chloride is preferably given with licorice and water to mask the taste. Mixtures of ammonium chloride are frequently employed in the treatment of bronchitis, the object being to stimulate the bronchial tubes and increase the volume of liquid poured out, thereby easing the inflammation of the mucous membrane of the bronchia.

#### Viavi Cerate.

(W. J. H.)—We cannot give you the formula for the proprietary article.

## Original and Selected

### SUPERNUMERARY FORMULAS OF THE NATIONAL FORMULARY.\*

By Augustus Carrier Taylor, Washington, D. C.

Oliver Wendell Holmes says: "Medicine appropriates everything from every source that can be of the slightest use to anybody who is ailing in any way or like to be ailing from any cause. It learned from a monk how to use antimony, from a Jesuit how to cure agues, from a friar how to cut for stone, from a soldier how to treat gout, from a sailor how to keep off scurvy, from a postmaster how to sound the eustachian tube, from a dairy maid how to prevent small pox, and was taught the use of lobelia by the American savage. It stands ready today to accept anything from any theorist, from any empiric who can make out a good case for his discovery or his remedy."

During one of the meetings of the American Pharmaceutical Association 'way back in the '70s, a speaker alluded to the then growing delusion as the "elixir nuisance." This expression, coming entirely from the pharmaceutical side of the question, meant that a detail man from any one of the manufacturing establishments would capture a certain number of physicians by his smart logic and his samples, and thereby create a demand which the pharmacist was called upon to supply. This nuisance grew from special formula elixirs until demands were created for special formula syrups, emulsions, solutions, pills, tablets and, worst of all, mixtures of every conceivable nature. The detail man had taught the physician a new school of medicine, "Price List Therapeutics."

It is not hard to show that the success of this nuisance was due to two factors, extensive advertising, and a certain convenience to the physician in having his prescription written and put up for him by a manufacturer who thus supplied him with his materia medica as well as with the therapeutics upon which it was to be applied.

It was the cupidity of trade and not true therapeutics that caused the National Formulary to be published in 1887 by the American Pharmaceutical Association. Another great factor to give use to the necessity of publishing the National Formulary was the enormous development of the United States. The vast increase in population has brought to our shores a great variety of people from every country in the world. They have brought with them ideas of every kind.

You must expect to feel the influence of the German Pharmacopœia in a section settled by Germans; of the British Pharmacopœia in an English settlement, and so of the Codex where you find the French predominating. These people are all acquainted with one or more preparations authorized by these books, and demand them when they arrive in this country. Demand governs supply. It is business for the pharmacist to supply that demand. This has caused a great confusion and duplication of formulas under different names. A condition that existed—not having a law to enforce the adoption of our National standard—was responsible for a great deal of the confusion. Since the Food and Drugs Act has made the Pharmacopœia and the National Formulary official, we may expect more radical changes in the future editions of these books.

The first edition of the National Formulary contained nearly 500 formulas for chemical and pharmaceutical preparations needed to supersede the many private formulas then in use. That committee did well to keep the number down to 500. I would have expected 5000.

This book is to supply the needs of physicians and pharmacists of this vast country of ours, not of one State, city or section of a city. In a recent paper read before this branch, a writer referred to Comp. Elix. of Tar as a formula he thought should be dropped because, as he said, he had not had a call for it in ten years. In my section, it is very popular, and called for almost daily. I mention this to call attention to the difficulty of selecting what formulas should be dropped from the National Formulary at the next revision. But while

\*Read at the meeting of the City of Washington Branch of the A.P.A., held May 11, 1909.

studying this book during the U.S.P. and N.F. propaganda work as carried on by the D.C.R.D. Association, I have run across a few formulas that I think are superfluous. In a very humble way, I beg to offer these few suggestions to the Revision Committee through the medium of this paper.

The first formula in the book, Aromatic vinegar, I do not believe, was ever prescribed by a physician, unless it was "Woodbury, the beauty doctor." I take the stand that the National Formulary is going to become more and more a text book in the medical schools, a therapeutic text book, a book that is to show the young student how to write prescriptions for combinations of various remedies, a book of suggestions on prescription writing, rather than a book of set prescriptions.

If I am right, formulas of this kind have no place in this book. This article belongs to a large class of toilet preparations that the pharmacist will have demands for from the public, and he must know how to prepare them. Possibly we need a third book—a druggist's receipt book, or are we to continue the Appendix and relegate all such formulas to that part of the book? I favor dividing the Formulary into two parts and designating them as Parts 1 and 2.

In speaking with a professor of therapeutics in one of the medical schools of the District on the subject of more attention being paid to the National Formulary in his branch of teaching, he said: "Simplify the book, separate the part you want the physician to know from that which is of no interest to him. We hesitate to give the medical student anything more to learn."

Following close upon the formula for aromatic vinegar is one for saccharated citric acid. This is strictly a pharmacist's working formula, and belongs in Part 2; likewise saccharated tartaric acid, saccharated sodium bicarbonate, all of the fluid-extract, unless it is the compound fluid-extracts of buchu and stillingia, cochineal coloring, and a number of others throughout the book.

Compound tincture of benzoin, U.S.P., is a simplified preparation intended to replace traumatic balsam, Tarrington's balsam, Friar's balsam, and is sold as such in nine-tenths of the pharmacies. This formula should be discarded, retaining the above names as synonyms of the compound tincture of benzoin.

The N.F. formula for boroglyceride should follow the U.S.P. formula as an alternative process, and be dropped from the Formulary.

Of colloidions, we find four in the Pharmacopoeia and four in the Formulary. They should all be in the Formulary. This situation is continually confronting you in a study of these two books, and I would like to state right here that I favor removing all compounds from the U.S.P. This separation of similar formulas in some cases borders on a dangerous situation, for example: In the Pharmacopoeia we have liquor sodii arsenatis, dose 3 minims, a one per cent solution of the dried salt. In the Formulary we have liquor sodii arsenatis, Pearson, just one-tenth as strong. If necessary to retain both of these formulas, which I do not recognize the need of, they surely should be in the same book, so that the physician cannot miss being made aware of the existence of both.

Compound decoction of aloes should be relegated to the Appendix or Part 2, as I will continue to call it throughout this paper.

The formula for elixir adjuvans, U.S.P., is fluidextract of licorice 120 cc. to 880 cc. simple elixir. Elixir licorice, N.F.,

is 125 cc. fluidextract licorice, 875 cc. simple elixir. They are almost identical, and one or the other could be dropped without being missed.

Must we continue to have elixir of phosphate of iron and elixir of pyrophosphate of iron, which are therapeutically identical?

But that brings us to another more serious confusion of formulas. We have in the Pharmacopoeia, elixir of phosphate of iron, quinine, and strychnine containing 1-60 gr. strychnine to the fluidram, while in the Formulary we have elixir of iron, quinine and strychnine containing 1-128 gr. strychnine to the fluidram. With this great variance in strength of such a potent ingredient as strychnine, I think it rather dangerous, to say nothing of the confusion that must arise in the mind of the physician who wishes to use one or the other of these. Mr. Flemer, as chairman of one of the committees of the District of Columbia R.D. Association, has made some inquiry among physicians to determine which they intend when writing for elixir, iron, quin. and strychnine, or elixir I.Q. and S., and finds that almost to a man they have wanted the elixir of the phosphates of iron, quinine and strychnine, U.S.P. I trust both N.F. formulas will be dropped at the next revision.

We have elixir of hypophosphites, and syrup of hypophosphites. The solution is an agreeably flavored preparation containing glycerin instead of sugar, very similar to the syrup, but differs a little in strength, and should replace the elixir, allowing the latter to be dropped. I would make the same recommendation as to compound syrup of hypophosphites, U.S.P., and compound solution of hypophosphites, N.F.

We have formulas for solution of phosphorus, dose 10 minims, representing 1-150 gr. phosphorus; spirit of phosphorus, dose 8 minims, representing 1-100 gr. phosphorus, and elixir of phosphorus, dose 1 fluidram, representing 1-60 gr. phosphorus. The trouble with all liquid preparations of phosphorus is the fact that phosphorus soon decomposes and you have simply a solution of phosphoric acid. This condition is least likely to occur in the spirit of phosphorus. I recommend that the spirit be retained and that the other two formulas be dropped. A weaker preparation can be made extemporaneously by simply adding the spirit to some of the elixir. Of the liquid preparations of pepsin, we have essence of pepsin, glycerite of pepsin, aromatic solution of pepsin, elixir of pepsin, and wine of pepsin. The two solutions, as well as the wine and elixir, are simply dilutions of the glycerite. In the case of the first three, some extra hydrochloric acid is added; could we not direct the physician's attention more towards the glycerite, and let him form his prescriptions therefrom, thereby doing away with these four unnecessary formulas?

Solution of strychnine acetate, N.F., is about 1-5th of 1 per cent in strength, while the British Pharmacopoeia gives solution strychnine hydrochloride with a synonym "solution of strychnia," a one per cent solution. It would be better not to have any official solution of strychnine, but impress upon the physician the necessity of always specifying the strength desired when writing for simple solutions of such strong remedies.

Mistura rhei composita, N.F., and mistura rhei et sodii, U.S.P., differ very little in combination. We can get along without the N.F. formula.

Syrupus senne aromaticus, N.F., contains senna, rhubarb and jalap; syrupus senne compositus, N.F., contains senna, rhubarb and frangula. Find which of these two is preferred

Group of University of Michigan Seniors (1909) taken outside of the Laboratory—In the Center is the Veteran "Mike" Condon.

by the doctor and drop the other.

I submit a list of preparations of which rhubarb is the important ingredient, and in most cases the only important ingredient: Extract of rhubarb; fluidextract of rhubarb; tincture of rhubarb; aromatic tincture of rhubarb; aqueous tincture of rhubarb; vinous tincture of rhubarb; tincture of rhubarb and gentian; elixir of rhubarb; elixir of rhubarb and magnesia acetate; compound mixture of rhubarb; mixture of rhubarb and soda; powder of rhubarb compound; unsated powder of rhubarb and magnesia; compound pills of rhubarb.

I think at least half of these formulas could be dispensed with, but if nothing better, put most of them in Part 2.

In the titles for the Dermatologic Pastes, I think the names of Unna and Lassar should be omitted; that is, instead of *Pasta Ichthyoli Unna*, it should read *Pasta Ichthyoli*. The physician writes for Unna's Paste or Lassar's Paste, compelling the pharmacist to call up the physician to find out which paste is intended.

Syrup of morphine sulphate, N.F., is not entitled to a place in the Formulary for the same reasons that I gave for dropping the solutions of strychnine.

There is no reason for continuing the formula for fluid-extract of cascara, bitterless, of the N.F., when the formula for fluidextract cascara, aromatic, of the Pharmacopoeia is almost identical. The U.S.P. formula contains magnesium oxide instead of lime as called for by the N.F. formula.

We have elixir of cascara and elixir of frangula—a useless duplication of formulas. While at this point, I would recommend that fluidextract of juglans be omitted from the formula for compound elixir of cascara. A fortified elixir is in demand, but this will never be popular while it contains juglans. Likewise elixir of gentian with tincture of chloride of iron, and elixir of gentian and iron phosphate are therapeutically identical.

Elixir of coca is never used. The doctor writes for the fluid-extract or for cocaine. If he wants a weaker preparation, he has it in the wine of coca, U.S.P., or the aromatic wine of coca, N.F. I even think the N.F. wine of coca is a useless duplication. Magendie's solution of morphine: The fact that this solution requires the addition of salicylic acid to preserve it, should be enough to condemn the formula. The hypodermic tablet has displaced such solutions, and even if we need a hypodermic solution of morphine, it should be and can be freshly prepared, and the doctor should state the strength desired.

We have aromatic syrup of yerba santa and aromatic elixir of yerba santa—both intended chiefly as vehicles for quinine. The syrup disguises the taste of quinine better than the elixir, because of the very small amount of alcohol that it contains. That being the case I would discard the elixir.

If I was writing a temperance paper, I would devote a good deal of time to the wine of beef and wine of beef and iron, both convenient tipples and that is all.

A thing that often occurs to me when preparing N.F. preparations is the need for better vehicles. I believe this point needs close observation during the next revision; I believe we need a class of preparations to be designated as vehicles.

## U.S.P. AND N.F. PROPAGANDA RUN MAD.\*

By A. O. Kaczorowski, Ph.G.

After considering all that has been said and done in reference to this much vaunted Propaganda work, I am prompted to take issue with those who look upon it as a panacea for everything that is wrong in the drug business at the present time. In taking up this discussion, I do not wish to speak disparagingly of any individual or set of individuals, because I believe that those who have taken part in the work have done their best, but I simply wish to point out to the advocates of this work the absolute fallacy, impracticability and injustice of the entire methods pursued and ultimate object aimed at.

Before entering into the discussion proper, however, I want to say that there is one great fault with druggists, and that is they are too prone to follow a few leaders who happen to stand high in association matters, and they do not give their individual thought to subjects which come up for consideration. In other words, they allow a few individuals to do their thinking and to execute matters in which, perhaps, a great many do

not concur, and simply because they will allow themselves to be led. Now this does not only apply to propaganda work, but to everything pertaining to association matters, and particularly as applies to the workings of this association. In other words, gentlemen, have an opinion of your own, and do not allow yourselves to be led by others, unless you really believe as they do. If you would only practice this doctrine of thinking, speaking and acting for yourselves, I predict that we would have a greater, more influential and better association than you have ever dreamed of before.

Now, to go back to the subject matter of this paper, I want to say that there are three fundamental reasons why the propaganda work cannot be successful. In the first place, gentlemen, you must not lose sight of the fact that doctors are constituted the same as anybody else, and, therefore, do not like to be told what they should do and what they should use in the practice of their profession, any more than you would like for them to tell you how to conduct your business. This being the case, I hold to the opinion that you cannot expect to go to physicians who have been practicing medicine for years and get them to take up the study of the U.S.P. and N.F. and familiarize themselves with something which should have been taught to them as students. Do not lose sight of the fact that doctors are governed by what they have been taught at college, and also by keeping up with current literature as obtained through the medical journals of this country and of Europe; that is the reason why the pharmaceutical houses spend so much money to introduce their specialties by advertising in such mediums. I claim, therefore, that the only practical way of introducing those two standard works to the medical profession is by the combined efforts of the American Medical Association and the American Pharmaceutical Association, which should see to it that these works are adopted as text-books by every school of medicine in this country and thereby educate the future doctors to formulating their own prescriptions. This, I say, is the only practical way to proceed with a work of this kind, and those behind the scheme should not try to accomplish wonders in a day by adopting the plan of pharmaceutical houses of detailing the doctors and only making a faint attempt at accomplishing results. In other words, this work is not different from any other, and therefore you must begin at the beginning and instill into the embryonic doctor that which you think is right and which ought to be part of his make-up.

Had this work been started ten years ago in the manner I have described, you would have today a large percentage of practicing physicians following your plan and who would be thoroughly familiar with it in every detail. But instead of doing that, you rush in on a campaign of education only to meet with failure and, worse yet, to have your very motive and sincerity questioned, as was done a short time ago right here in this city, and that editorially by the *New Orleans Medical and Surgical Journal*. Now, I have no doubt that some of you will say that if the pharmaceutical houses do detail work successfully, why can we not do it? In answer to the question I will say, because they are original in what they detail, because you have not gone at it in the right way, and because you have no money back of the movement; three very good reasons, I believe. So much for the introduction.

We now come to the next obstacle in the way of success, and that is originality. Remember, I said a moment ago that the specialty houses were successful in their work because they were original. What a contrast between that and what the propagandists are attempting. You go to the doctor and tell him that he should not prescribe proprietary remedies, but you offer him instead, as a substitute, an imitation of the real article which you condemn, and you actually expect a practitioner to discard remedies which he has used for years with good success and adopt your imitations, just simply because you present them.

Now, gentlemen, above all things, let us be fair and just to those who originally devised and discovered those new formulas and give them credit for their discovery, the same as you would expect to receive if you had a preparation which was being used by the medical profession, but do not condemn such remedies and then ask to have the same thing prescribed under another name.

In other words, the editors of the U.S.P. and N.F., with all due respect to their high attainments, should be original; they should not rely on imitations of standard proprietary remedies to make the works as successful as they would like to have them. You must either recognize or ignore those remedies, and

\*Read before the Louisiana Pharmaceutical Association, New Orleans, May 11-14, 1909.

I tell you that the physicians will never ignore or discard them, because they have merit, have given results and that is what counts with practitioners. Remember, too, that no article is imitated unless it possesses merit, and the moment you imitate it you acknowledge it to be good.

I am one of those who believe in giving credit where credit belongs, and therefore I cannot approve of this propaganda movement which consists chiefly in knocking meritorious articles and offering poor imitations as substitutes. You know as well as I do, that all those remedies have come to stay, so have the pharmaceutical houses with all their specialties. So that in order to get the co-operation of our medical friends we must offer them something original and not lay stress on the fact that most of our formulas are intended as substitutes for standard proprietary remedies. When we do that we defeat the very object that we aim to accomplish, by admitting that these very remedies possess merit. I want to emphasize the fact, that I believe in the N.E. as much as any of you, but I do not believe in copying all the most prominent proprietary preparations and then openly boasting of it. At any rate, there is no limit to where this thing will end; the object being, evidently, to imitate any new preparation which doctors seem to take to and accordingly, to discourage investigation and research instead of encouraging them.

Can it be possible that we are going backward instead of forward, and becoming imitators instead of originators? Don't you know that this condition of which you complain is a natural condition which you cannot stop, but one which will continue to grow in spite of your efforts to curtail it? Wake up to the fact that we are doing business in an advanced age and according to advanced methods, and do not expect to carry on your business as your forefathers did. Do not be blind to the fact, that as long as pharmaceutical or specialty houses continue to put up high-class preparations and to place them before the physicians in the proper way with their reputation back of them, that preparations will be very much in demand, because doctors will not hesitate to specify what they want, any more than you will when you give out your daily wares.

The next reason why you will not meet with the success you anticipate is, that while you have made a feature of substitutes for well-known and largely used proprietary remedies, your Formulary contains but an infinitesimal part of the number of such preparations used by the medical practitioners of today; therefore, even if it was the intention of doctors to discontinue the use of all such remedies, you could not offer a substitute for each and every one of these preparations, and as a consequence your efforts would only be in vain. Therefore, I reiterate what I have said before, that I cannot approve of this work, and in the name of justice and fair play I challenge any of you to tell me that those remedies should not be used because they are not good, or not reliable. In conclusion, I will say that whatever you do, confront the issue, but speak the truth.

#### Should Unite Against Enemies of Scientific Progress.

Boston, May 22.—That even the medical profession in Massachusetts with its society dating back for more than a century and a third, is not as strongly organized as it should be, was the opinion expressed by former President Charles W. Eliot, of Harvard University, in an address made to the Medical Alumni Association last night. He declared that a strong need existed for every member of the profession to organize and co-operate in the movement against persons and cults who oppose the progress of medicine and surgery. President Eliot said:

"There are now obstructions to scientific progress in medicine, new groups of persons who actually oppose, and the profession needs to work as one body against these opponents of medical and surgical progress. This is often difficult because the opponents are often called 'humanitarians.' It is for the medical profession to show that the members composing it are the real humanitarians. The obstacles to scientific progress must be subdued, and this can only be done by reaching the public through the channels of instruction."

#### New Members of Kings County Society.

At the last meeting of the Kings County Pharmaceutical Society, Clarence S. Abrams and Hyman Friedland were elected to membership, and applications received from Tracy E. Clark and John J. Gillen.

#### Home-made Racks and Stands.

From his inspection of dry goods, jewelry and other stores, the druggist has learned that an almost endless variety of novel and beautiful racks and stands for the exhibition of goods in interiors as well as windows may be purchased. Much as he would like to possess them, the average druggist feels that they are beyond his means. However, a little cheap material, ingenuity and a little labor may produce home-made substitutes which will answer every purpose.

#### Pyramid Bases.

As an aid in the erection of pyramids of bottles either in windows or upon counters or floor, the following simple contrivance will be found of great use. From a good, unwarping 12-inch board, one-half inch in thickness, cut triangles with 12-inch sides. To keep these from warping after being put to use, glue to each side a cleat of sufficient length and one-half by one-quarter inch thick. The triangular forms may be finished to match the store fixtures by sand-papering and staining. Or, they may be covered with gold paint or even temporarily covered for each separate use with crepe paper. In the same way, make other triangles with nine and six inch sides. To use, place three bottles so as to serve as legs for the largest triangular shelf. Upon this shelf place three bottles as legs for the nine-inch triangular shelf, and again on the latter stand three bottles to support the smallest or six-inch triangular shelf. Of course, the spaces between the bottle legs may be filled with other bottles of the same size, with smaller bottles, or with other goods. Two of these wood triangles placed edge to edge will form a diamond-shaped pyramid. Three of them placed around a fourth will form a three-pointed star pyramid and so on in endless variety and size.

For malts, mineral waters and other heavy, round bottle goods a very firm and attractive pyramid may be made by boring in each corner of each triangle a hole large enough to admit the neck of the bottle and thus permit the triangles to rest upon the shoulders of the bottles. In boring the holes in triangles of various sizes they should be so placed that when pyramided the bases of the second tier of bottles will stand within the necks of the first tier and the third within the second.

#### A Mushroom Rack.

Take a 10-inch piece of broom-stick or wood of about the same dimensions. Round off the ends and sand-paper carefully. Lengthwise around this stick fasten eight pieces of one-eighth inch brass or coppered iron wire. Do not use copper wire. For appearance sake brass wire is preferable; but if it is not procurable use copper-coated, stiff iron wire. If the latter cannot be procured, plain iron wire may be used and gilded. These strips of wire should be 30 inches long and fastened around the stick at equal intervals with small wire staples. The wires should extend six inches beyond one end of the stick and 14 inches beyond the other end. Bend the six-inch ends outwardly in one-quarter circles so as to form feet which collectively form a firm stand for the rack. Bend the 14-inch ends outwardly in one-half circles and turn the points upward so as to form small hooks. Either gild or bronze the stick to match the wires. Brushes, combs, cutlery and other light articles may be suspended from the hooks to produce a most attractive display. If considered desirable the number of wires may be increased until the stick is covered, and by making them of different lengths, two or even more tiers of the hanging arms may be made. When not in use the wires may be turned in the staples and brought close together, thereby permitting the stand to be stored in a small space.

#### An Adjustable Stand.

Take a piece of broom-stick eight inches long or any other length suitable for the purpose. Take a disk of wood one inch thick and five inches in diameter. Fasten the stick to the

center of the disk with a single screw or glue, preferably both. The disk forms the base of the stand. To the other end of the stick screw a washer of the same diameter as the stick. Sandpaper and paint, stain or gild the whole. Take several pieces of one-eighth inch copper wire, about eight inches long. Bend each wire one-quarter of an inch from one end so as to form a square or right-angled hook. Loosen the screw in the washer just enough to permit two or more wires being passed beneath the washer and the end of the stick; when the wires are properly adjusted tighten the screw so as to hold them firmly in place. To hold a box of stationery extend one wire from one side of the stick and two wires from the opposite side, in such a manner that their hook ends will be about four inches apart. Before tightening the screw see that the distance between the hook of the single wire and the hooks of the other two wires are the same as the length of the box to be held. When the screw is tightened the box may be put in place by springing the hooks over its upper and lower ends. The copper wires may be bent so as to hold the exhibited articles at any desired angle, or so as to face the glass of the window or outside edges of the show-case. When properly adjusted the wire hooks may be snapped around circular or rectangular slabs of glass or pieces of cardboard or wood to hold them in horizontal position, thereby forming small tables or shelves upon which small articles may be exhibited.

#### Adjustable Shelves.

Get from a blacksmith a four-foot iron rod, one-half inch in diameter. For this make a heavy base as follows: Take or make a circular cardboard box or mold, its inside dimensions being eight inches across and four inches deep. Place this mold on a level surface and then swing the rod above it so that it hangs in a perfectly perpendicular position, with its lower end just over and close to the exact center of the bottom of the mold. Carefully pour in plaster of paris paste and allow to set so that it will hold the rod in proper position; allow the base to become perfectly dry before moving the rod or tearing away the mold.

Cut six or more shelves of the desired dimensions from half-inch wood, and preferably in graduated sizes. The largest may be 12 x 18 inches and the smallest 4 x 6 inches. Across the grain of each of these shelves glue two thin cleats to strengthen and keep them from warping.

In the exact center of each shelf bore a hole an inch in diameter. Make a number of hardwood wedges an inch long and tapering from a sharp edge to a half inch base. Slip the top of the iron rod through the hole in the largest shelf. Hold the shelf at the desired height from the base and wedge it into position with two of the wedges, one on either side of the rod and inside of the hole. The wedges should point upward and the shelf be forced down upon them by alternately tapping the sides with a hammer. It is not necessary to use great force in fixing the wedges because the weight of the exhibited goods, when properly distributed upon the shelf, will maintain the pressure upon the wedges. Above the first shelf arrange other shelves in graduated sizes and at such distances apart as may be necessary to admit the goods to be exhibited. Paint or gild the whole contrivance.

With a single rod and base a variation of the display may be effected by having circular as well as square shelves. An arm rack also may be made by causing small, hardwood disks to take the place of shelves and attaching to them extending wire or wooden arms.

#### Attractive Exhibit of Herbs and Medicinal Plants.

Boston, May 24.—The show windows of the Woodward Drug Company at 102 Tremont street have been attracting unusual attention the past week by reason of a most creditable and educational exhibit of herbs and medicinal plants. The display included the plants in their growing state, and in the commercial form, and then in the manufactured state, either as a powder or extract. Countries the world over contributed to the display. Rolls of sarsaparilla, peruvian bark, cardamoms, gum of benzoin, pods of opium, Ceylon cinnamon, slices in the round, licorice, nut vomica, sage, tansy, hops, elm bark. The standard preparations of the drugs and herbs as made by Spillb and Parke, Davis & Co. were also shown.

Trouble conquers the man who looks for it fearfully. Yet one must look to find where trouble lies in order to overcome it.

## A-B-C's for Drug Clerks.

### G. W. Hague Wins the Era's \$5 Cash Prize.

In the ERA'S Cash Prize Competition this week the judges have awarded the \$5 Cash Prize in Contest No. 4 to George W. Hague, of Freeport, Long Island, N. Y., for his paper of suggestions to drug clerks. Mr. Hague has boiled his ideas down into small compass, thereby making each one tell its story convincingly, so that all drug clerks may at a glance easily absorb pointers that may be wholly or in part new to them. Every drug clerk should read the paper, whether he thinks he need to do so or not:

#### Practical Helpful Hints for Drug Clerks.

By George W. Hague, Freeport, L. I., N. Y.

How may the drug clerk improve his position and at the same time be of greater service to his employer? This question I will endeavor to answer, but not in the same old worn-out way that they all say, "Be honest, be steady, be faithful," and a lot of other axioms that every boy ought to know. We will assume that the clerk is honest, sober, polite to customers, of average ability, and desires to make himself more valuable to his employer. This is my advice:

1. Learn the location of every item in your employer's store.
2. Learn the price of every item in the store, so that you can give it to customers right off the reel.
3. Learn the names of the customers.

The clerk who possesses these qualifications to a greater degree than the employer really holds the latter at his mercy. A clerk with these qualifications can do as much work as two salesmen. An employer can trust his store to the clerk's keeping without worrying. It is an insult to customers to trade with a store for a long time and then not to have any one enough interested in them to remember their names. These are only a few of the good arguments.

Now, next in importance to the above, comes some other outside ability, which does not in any way conflict with what has been previously mentioned, and its importance I will rate as follows:

- a. Learning to speak some foreign language.
- b. To make attractive displays (windows and show cases).
- c. To write advertisements.

- a. Comparatively few pharmacists realize the value of controlling some foreign trade. Foreigners usually pay in cash, seldom ask credit and want goods delivered. Lastly, they always patronize those who can speak their language.

- b. The value of window and show case dressing is too well known to require any explanation at this time.

- c. To be able to write advertisements for your employer will in all probability increase your earning capacity 100 per cent. This is a thing very few can do, neither clerk nor proprietor, and if a clerk can accomplish this, he will soon outgrow his place in a small store.

*Conclusion.* There are, perhaps, as many ungrateful proprietors as clerks, but this does not exonerate the clerk from doing his duty. Two wrongs do not make a right. You, as drug clerks, ought always to do your best work, even if it is not appreciated by the boss. Some other druggist is doubtless watching you. A clerk might become lazy, indifferent or careless, but he is hurting himself more than his employer. If your position does not suit you, or if your employer is unreasonable, get another position; but do your duty and fulfill your end of the contract before you leave.

#### Druggists in Legislature Divided on 8-Hour Question.

Boston, May 24.—Druggists in the Massachusetts Legislature were divided the past week on the question of sustaining the Governor's veto of a bill to make eight hours a legal day's work for public employees. Although all four druggists are R-republicans, as is the Governor, they went on record as divided on the question. Representative Bonney, of Wakefield, voted to pass the bill over the veto, while Representatives Bonvier, of Fall River, and Whittemore, of Ashland, both voted to sustain the veto. Representative Thompson, of Somerville, who is still on the sick list, was absent and was unrecorded. The veto was sustained by a vote of 96 to 126, although among the 96 in opposition were not less than 42 R-republicans.

## PERSONAL MENTION

—JAMES B. PORTER has returned to Pittsburg from an extensive trip South and West.

—CHARLES A. SCHILLING has recently opened a new pharmacy in Franktown avenue, Pittsburg.

—S. B. DAVIS, of Philadelphia, spent a day with relatives and friends at Millville, N. J., last week.

—CHARLES E. RINGER, having sold his drug store in Pittsburg, is rusticiating in Texas and Oklahoma.

—DR. H. M. WHELFLEY, of St. Louis, was the guest of Chicago friends last week, including Sunday.

—J. W. SCOTFIELD, secretary of the Fuller & Fuller Co., Chicago, is in Mount Clemens, Mich., for a short stay.

—FRANK RYAN, president of Parke, Davis & Co., Detroit, visited the New York branch of the firm last Monday.

—MRS. C. G. BECHTA, wife of the druggist who recently located with J. F. Collins at Lodi, Wis., has also moved to Lodi.

—MIERS BUSCH, of Philadelphia, spent several days recently in Asbury Park, N. J., on business for his house, Shoemaker & Busch.

—JOHN S. MUTH, of Muth Bros. & Co., Baltimore, returned last week to his desk after spending ten days at Atlantic City.

—R. H. BOGGS, who looks after the interests of Frank M. Prindle & Co., in Pennsylvania and vicinity, was a Pittsburg visitor last week.

—A. F. MENGES, druggist at Madison, Wis., is erecting a handsome eight-room house which will be ready for occupancy by early summer.

—CHARLES KARNATZ, formerly druggist with the L. S. Walker Company, at Almond, Wis., is again connected with the establishment.

—CLARENCE HELLAND, formerly in charge of Dr. Holland's pharmacy at Mount Horeb, Wis., is now connected with a drug store at Fort Atkinson, Wis.

—CHARLES J. LYNN, general manager and secretary of Eli Lilly & Co., has returned to Indianapolis from one of his regular visits to the New York branch.

—LUKE B. CUBRAN, of Newport, R. I., and wife spent a vacation recently with Mr. and Mrs. William A. Halloran, of Rutledge street, Brooklyn Borough, this city.

—GEORGE M. KEECH, for the past three years pharmacist at W. H. Draper's store in Gouverneur, N. Y., has accepted a position with C. C. Herrick & Co., at Watertown.

—A. VON TROTT, well known former druggist of Milwaukee, has returned to Milwaukee after a six weeks' visit with his son in Alabama. Mr. von Trott is greatly improved in health.

—JAMES H. ALLAN, president of this year's graduating class of Philadelphia College of Pharmacy, has accepted a position to represent the H. K. Mulford Company in North Carolina.

—MAYLON N. KLINE, president of the Smith, Kline & French Co., of Philadelphia, last week attended and took a prominent part in the proceedings of the International Peace Conference at Mohonk, N. Y.

—OSCAR CROCKER, pharmacist at the City Drug Store at Superior, Wis., has returned from Spooner, Wis., where a house on his farm was recently burned. Another residence is now being erected by Mr. Crocker.

—GEORGE H. BENKHAUD, who is identified with the Smith, Kline & French Co., of Philadelphia, greeted old friends among the physicians who last week attended the annual meeting of the Maryland Medical Society at Baltimore.

—HENRY H. LAMB, representing the Michigan Drug Company, while in West Alexandria, Ohio, recently discovered fire in a building adjoining a hotel and by his promptness in giving the alarm prevented a disastrous conflagration.

—F. C. HUMPHRIES, who has been doing special work for the H. K. Mulford Company in Baltimore and other South-eastern cities, has been transferred to Richmond, Va., to succeed A. T. Gray, who is going into business for himself.

—L. L. WALTON, of Williamsport; Dr. Charles T. George, of Harrisburg, and Christopher Koch, of Philadelphia, members of the Pennsylvania Pharmaceutical Examining Board, on Friday last entertained about 35 pharmacists of that city

at a luncheon at the Bingham Hotel. The guests had acted as examiners at the State Board examinations at the College of Pharmacy on that day.

—J. W. PLYOR, of Barneveld, Wis., and Mr. Herries, of Herries Brothers, Muskegon, Mich., were among the visitors at the establishment of the Milwaukee Drug Company last week, with headquarters at Manistee, Mich., accompanied Mr. Herries.

—J. K. LILLY, president of Eli Lilly & Co.; William Scott, president of the Daniel Stewart Company, and John N. Carey, of the Stewart-Carey Glass Manufacturing Company, all of Indianapolis, are enjoying their annual May fishing trip at Lake Wawasee.

—PROF. HENRY CARLIHETT, head of the department of physics at the University of Michigan, has resigned and the title of professor emeritus of physics has been bestowed on him. He is the first one to make application to the Carnegie Foundation Fund at the university.

—WILLIAM B. STRONG, vice-president and treasurer of the Milwaukee Drug Company, was a member of the committee of the Merchants' and Manufacturers' Association of Milwaukee which entertained a party of 450 Michigan visitors, headed by Governor Warner, of Michigan.

—F. E. STEWART, M.D., director of the scientific department, and Charles E. Vanderkleed, Ph.D., chief chemist of the H. K. Mulford Company, attended the recent meeting of the American Therapeutic Society at New Haven, Conn. Dr. Stewart read a paper on the "Standardization of Materia Medica Products."

—WILLIAM S. PEARCE, retired, of Waukegan, Ill., and wife recently celebrated the 56th anniversary of their wedding, which occurred in Chicago. The planting of an arbor vitae tree was the feature. Children and grandchildren attended. Mr. Pearce is 86, hale and vigorous, and Mrs. Pearce is some ten years younger.

—MISS HELEN RYAN, daughter of Frank G. Ryan, of Detroit, who, with her father, attended the commencement exercises last week of the Philadelphia College of Pharmacy, was the guest of 13 ladies of Philadelphia at a box party at the Forrest Theater. The hostesses were the wives of fellow-graduates with Mr. Ryan in the class of '84.

—JOSEPH HEALY, manager of the H. K. Mulford Company's New York branch, has been elected president of the New York section, Georgetown University Alumni Association. In addition to being an alumnus of this well-known university, Mr. Healy is also a graduate of the Philadelphia College of Pharmacy and takes an active interest in the New York section of the alumni of that institution.

—J. HYL BOBBITT, president of the Bobbitt Chemical Company, of Baltimore, is a proud man these days, his son, L. B. Bobbitt, a sophomore in the Johns Hopkins University, having won the \$50 prize offered in the name of the International Arbitration Conference for the best essay on international arbitration by a student of an American college or university. The award and presentation were made last week.

—CHARLES REICHUSS, of Philadelphia, a well-known figure in pharmaceutical circles, has successfully qualified as the pilot of the motor boat Carolyn and expects to spend his summer vacation in navigating the waters of Barnegat Bay in the vicinity of Seaside Park, N. J. Other members of the same crew are "Rear-Admiral" Samuel B. Davis and "Steward" Otto Kraus, both prominent Philadelphia druggists.

—C. S. MCCANDLESS, who has represented the Crown Cordial Company for many years, making his home in Pittsburg, will move to Newnan, Ga., after June 1 and give his entire attention to the States of Georgia, Florida and Alabama, where he also has traveled during the last 15 years. After two years of severe illness from various kinds of fever he hopes to regain his former health in the sunny South.

—WILLIAM L. CLIFFE, of Philadelphia, entertained the following alumni of the College of Pharmacy at a luncheon at the Drug Club, of which he is the president: Frank G. Ryan, Detroit; A. L. Ballinger, Mendville, Pa.; J. J. Coleman, Wheeling, W. Va.; J. F. Williams, Burlington, N. J.; W. J. Kelly, Chester, Pa.; W. H. D. Headley, Lancaster, A. J. Wenner, Wilkes-Barre, Pa.; Joseph Crawford, Lansdowne, Pa., and C. B. Lowe, F. N. Moerk and W. A. Rumsey, of Philadelphia. All of these men who are prominent figures in pharmaceutical circles, were fellow-members with Mr. Cliffe of the class of '84 of the college and all of them were present at the commencement exercises last week of their alma mater.

## GOVERNOR DISAPPROVES THE BROWN ACT.

**Calls the New York State Pharmaceutical Association "a Private Organization" and is Unwilling to Entrust it With a Voice in Naming Members of the State Board of Pharmacy.**

ALBANY, May 25.—Governor Hughes has written a memorandum disapproving Assemblyman Brown's Pharmacy Reform Act, which was passed by the Legislature last month. The effect is to continue the present State Board of Pharmacy in office for at least another year and postpone the enactment of the pure drug legislation which the pharmacists of the State have been trying to secure for several years and which passed the Legislature of 1908, but was disapproved by the Governor.

The disapproval of the Brown Act comes as a surprise to those who have watched this measure, for it was only introduced after repeated conferences with the Governor and his legal adviser and was understood to meet all of his objections. The provision to which the Governor makes especial objection, it is understood, was inserted with his approval, if not at his suggestion, "to show," as he has been quoted, that he "entertained no personal feeling against the members of the old board," or against other pharmacists.

The memorandum of disapproval is as follows:

In my annual message to the Legislature at the beginning of the last session I recommended the revision of the laws relating to the State Board of Pharmacy and proper amendments to secure such additional restrictions with regard to the sale of drugs as might be advisable. It was pointed out that the present system of supervision was faulty, and that while it was not intended to criticize the present members of the board it was not compatible with a proper theory of State administration that there should be a State board exercising important State powers which was not properly accountable to State authority and over the selection of members of which the State had no proper control.

The present bill provides for a new Board of Pharmacy to consist of nine examiners to be designated by the Regents of the State University. While so far as examinations and licenses are concerned it might be proper to have the board constituted in this way, the advisability of investing such a board of examiners with the broad powers provided for in the bill is open to serious question.

It is provided, however, that the first examiners are to be designated from the members of the present board and that in appointing their successors the appointments by the Regents shall be made from the names of six candidates to be submitted to the Regents by the Pharmaceutical Association. Thus the powers given by the bill are to be exercised by a private organization. It is not believe in this policy. Even so far as examinations and licenses are concerned it is open to one of the objections upon which I disapproved the optometry bill of two years ago, which provided that the Board of Examiners in Optometry, to be appointed by the Board of Regents, should be selected from those nominated by the Optical Society. In the light of this objection it is unnecessary to consider the other grounds which have been urged by those who have opposed the bill.

## OBITUARY.

**Former President Jacob H. Stein, of Pennsylvania Ph.A., Succumbs After Wife's Death.**

READING, May 22.—Grieving over the loss of his wife, a son-in-law and a brother, all of whom died within four months, Jacob H. Stein, Reading's oldest druggist, passed away at his home, 1407 Hill road, on Monday. His age was 63 years.

Mr. Stein entered Mercersburg College in 1860. Some months later he secured a position in the drug store of Dr. Joseph L. Lemberger, at Lebanon. In this way he received much practical experience in the business. Later he attended Philadelphia C.P., from which he graduated in 1869. He was among the honor men of his class.

After spending several months traveling through the West, he settled in Reading, in 1870, and two years later opened his own pharmacy. At one time he owned five drug stores. Mr. Stein was president of the Pennsylvania State Ph.A. in 1890-91. He had been a member of the A.P.A. since 1878. Three daughters survive.

## Cancer of Tongue Kills Rexall Druggist.

CENTRALIA, W. T., May 22.—Will J. Blythe is dead of cancer of the tongue, a malignant developed while he was attending the Rexall meeting last August. He was born in Palmyra, Ill., June 16, 1850. In 1879 he entered the employ of Ward Brothers, wholesale druggists, Indianapolis, and in 1881 he bought the store of Dr. Roberts, in Centralia, which

he has since conducted successfully. A widow survives. He was a member of the Masonic fraternity and was frequently honored by local pharmaceutical societies.

## Druggist's Bride a Suicide.

WASHINGTON, May 22.—Mrs. Violet G. Nelson, who was married only six weeks ago to Dr. John H. Nelson, a druggist at First and C streets, northwest, gathered her letters and other mementoes prized by her together last Thursday, burned them in a bath tub and then took a fatal dose of poison. She left no explanation. Her body was found by a brother-in-law. It is believed her mind was affected. She was 35 years old and had been a trained nurse. On the evening before her death Dr. and Mrs. Nelson visited friends, and at that time she seemed to be in excellent spirits.

## Obituary Notes.

—DR. A. H. ROSCOE, formerly of Nashville, Tenn., died recently at his former home, Goodlettsville, aged 87.

—TRISTRAM H. BAILEY, of Toledo, Ohio, is dead, aged 61. Until four years ago he was engaged in the drug business.

—M. M. MANSON, who for 35 years had conducted a drug store at Hudson, Mich., is dead after an illness of less than one week. He was born in Centerville, N. Y., in 1831.

—HENRY JAMES HAYDEN, a druggist in Chicago before the great fire and afterwards a pension attorney in Washington, died recently and was buried at Indianapolis. He was 62.

—MRS. ELIZA H. WELLS, wife of E. W. Wells, pioneer druggist of Eureka, Cal., died recently. Mr. and Mrs. Wells went from Pennsylvania to California about 35 years ago. Willard Wells is their son.

—MILTON CULBERTSON, traveling salesman for E. R. Squibb & Sons, of this city, was found dead in bed recently in a hotel in Woodland, Cal. While the coroner thought death might have been due to poison there was no reason given for suicide. Mr. Culbertson's home was in San Francisco and he is highly spoken of by his employers. He was formerly a city salesman for Meyer Brothers Drug Company in St. Louis.

## MARRIAGE MENTIONS.

—GUY B. KINNEY, representing the crude drug department of the Chicago branch of Parke, Davis & Co., is to be married on June 1.

—IRA SWEET, a former resident of Big Spring, Wis., now engaged in the drug business at Crockett, Texas, was married recently to Miss Hortense LeGroy, of Crockett.

—E. J. SCHALL, proprietary buyer for Meyer Brothers, St. Louis, and Mrs. Schall, have announced the wedding of their daughter, Miss Leonora Rebecca Schall, to Jeremiah J. Murphy, a merchant of that city.

—JOSEPH COTTEREL, a well known young Pittsburg druggist, made two important moves recently. One was his marriage to Miss Lucella Doverspike and the other his purchase of the Daniel C. Baker pharmacy at Oakmont, Pa.

—JOHN DETTRY, who graduated with honors last week from the Philadelphia College of Pharmacy, also stepped from the ranks of single blessedness the day before commencement. Mrs. Dettry was formerly a leader in the younger social set in Germantown, Philadelphia. The young husband is assistant manager in the pharmacy of Charles Rehniss.

—EARL DONOVAN, of Appleton, Wis., recently a student in the School of Pharmacy of Marquette University, at Milwaukee, was wedded more than six months ago to Miss Laura Hayes, a popular young lady, also of Appleton, but the secret was kept until Mr. Donovan passed the examinations of the State Board of Pharmacy.

## River Outings of St. Louis Pharmacists.

ST. LOUIS, May 24.—The first outing given by the St. L. C.P.A.A. was a boat excursion May 20 and such a pleasant trip was enjoyed that arrangements were immediately concluded for a second and similar outing June 24. The first outing of the St. L. R.D.A. will be a boat excursion June 6. L. A. Seitz is chairman of the R.D.A. entertainment committee. The entertainment committee of the A.A. is: W. H. Lamont, chairman; Hy. O. A. Huegel, Theod. F. Hagenow, Henry F. Sinn, Eugene H. Kurtz, Robert J. Pfeffer, J. C. Thumser, Dr. Otto F. Claus, Lorenz A. Seitz, Charles W. Stockhausen.

## LOUISIANA STATE P.H.A. WITHDRAWS FROM N.A.R.D.—CONDEMNS GOVERNOR, ENDORSES BOARD.

E. L. McCLUNG, Natchitoches.  
Elected President of the Louisiana  
State Pharmaceutical Association.

ADAM WIRTH, New Orleans.  
Retiring President of the Louisiana  
State Pharmaceutical Association.

G. W. McDUFF, New Orleans.  
Re-elected Recording Secretary of the  
Louisiana State Pharm. Assc.

NEW ORLEANS, May 22.—One of the most important annual meetings of the Louisiana State Pharmaceutical Association ever held occurred last week in the rooms of the New Orleans College of Pharmacy, which had been decorated for the occasion. Adam Wirth, the president, introduced Mayor Martin Behrman, who, on behalf of the city, welcomed the members. A. di Trapani, chairman of the executive committee, delivered a response. Speeches were made by F. C. Godbold, president of the New Orleans Branch A.Ph.A.; Lucien Lyons, representing the National Wholesale Druggists' Association; John E. Scott, on behalf of the N.A.R.D.; M. Stolzenthaler, vice-president of the Orleans Ph.A., and F. A. Dicks, of the N.W.D.A. The addresses of welcome were answered by M. Bernstein, of Shreveport.

The following new members were elected: C. A. H. Otto, H. J. Bangoras, F. A. Hendricks, G. A. Flash, A. M. Monendez, Thomas E. Schafer, New Orleans; Ferrier Pierre Blanchard, Donaldsonville, and Max Wolfson, New Orleans.

The following were accepted as delegates from the N.W.D.A.: Lucien E. Lyons, Arthur D. Parker, F. A. Dicks.

Addresses were made by J. S. McDonald, of the Bell Telephone Company, Chicago; H. V. Army, of Cleveland, Ohio, a charter member of the L.S.P.A., and a communication was received from Secretary T. W. Jones, of the Los Angeles R.D.A., sending the greetings of that body.

The annual report of President Wirth was read and referred to the following committee: George V. Claren, M. Bernstein and Dr. A. Nohs.

At 2 p. m. the members were the guests of Parke, Davis & Co. at their store, 322 Common street, Manager S. G. Steiner, City Representative A. E. Breslin and the following representing the hosts: C. L. Kerr, F. J. Offer, Henry J. Gonzales, N. H. Georg. Refreshments were served by these young ladies: Misses Corallie Schuber, Grace Barrow, Mary Cannon, Nora Gschwing, Bessie Dolan, Anita Tesson, Aimee Tesson, Irene Johnson, Katie Kennedy, Alma Bartelley and Irene Discon. Speeches were made by President Wirth, Mr. Steiner, Mr. Breslin and M. Bernstein. The last named gentleman, overcome by the presence of so many young women, forgot his speech of thanks and confined himself to explaining why he is a bachelor and bald.

On the second day, Dr. D. Harvey Dillon, president of the State Board of Health, which is charged with enforcing the pure drugs code, outlined the policy of the board to be one which will inflict no hardships on the drug trade, and urged the druggists to co-operate with the board in securing the enforcement of the law, particularly in regard to the sale of narcotics except on a physician's prescription. Dr. Ham-

ilton P. Jones, chemist of the State Board of Health, spoke of the operation of the pure drugs code, explaining several technical violations for the information of the members.

J. A. Guidry, chairman of the committee on adulteration and deterioration of drugs, and the committee on president's address, reported. The latter endorsed President Wirth's suggestion regarding early and Sunday closing, and recommended adopting the suggestion making members of 25 years' standing honorary life members.

A paper, read by A. O. Kaczorowski regarding the propaganda work, was discussed at length. (It appears on page 494 of this issue of the ERA.—ED.)

The executive committee reported on the conditions for the Arthur D. Parker prize for the best essay on propaganda work, and recommended votes of thanks to L. L. Lyons & Co., Parker-Blake Company, Finlay, Dicks & Co., Sharp & Dohme, Eli Lilly Company, Parke, Davis & Co. and the New Orleans College of Pharmacy.

George V. Claren reported for the committee on trade interests, and H. V. Army read a paper on "Synthetic and Natural Perfumes."

Luncheon was served by Sharp & Dohme, at their store, the firm being represented by Manager J. A. Wellington, J. P. Ipsor, J. T. Davis, J. A. Ipsor, William Dohmeier, Joseph Seeley, Jake Seeley, Cornelius Masson, Charles Jengle, Harry Baxter, Tom Baxter and Misses Lydia Leroy and L. Courtney. Speeches were made by Messrs. Wellington, Wirth, Bernstein and others.

A snoker at the New Orleans College of Pharmacy, arranged by a committee of which W. J. Sbisá was chairman, was an interesting feature. The following were on the programme: W. E. Berryman, H. Michel, Jack Ryan, J. F. Ross, Ike Samuels, W. J. Sbisá, M. Gonzales, George Krumm, Ed. Fitzgerald, Harry White, Joseph Ipsor, "Billy" Summers, Caris, Schriever, Louis Smith and others.

On the third day the members and their friends boarded the steamer St. James and went 30 miles up the Mississippi River to a sugar plantation, where the day was spent picnicking. The arrangements for the outing were in the hands of John E. Scott, chairman; C. D. Sanyinet, George S. Humphreys, Adam Wirth, George V. Claren, George W. McDuff, J. B. Baltar, A. di Trapani and W. J. Sbisá.

Two features of the day were games of base ball between the country and city members and between the married and single ladies. The men's country team was composed of B. H. May, Ryan Sbisá, Jack Ryan, E. Ronnyson, J. Harly, A. E. Breslin, Dr. P. Deverges, J. T. Baltar, L. E. Blanchard, G. G. Duntrey, W. M. Levy, J. E. Picarte. The city men's

team was composed of J. Vigo, P. C. Weillacher, Irvine Lyons, A. Corcor, A. Purlos, Ed. Dammann, H. J. Gonzales, J. Lissio, Ben Shiba, George W. McDuff.

The married ladies' team was composed of Misses W. Kuhnell, A. Tropler, N. Stevens, J. Berry, W. Mason, J. Dupre, A. Tolodano, J. McCarthy, S. di Trapani, L. di Trapani, A. di Trapani. The young ladies' team was composed of: Misses A. DeLanza, J. Moss, M. E. Tesson, G. Szabary, J. Franchina, B. Dolan, Irene Johnson, N. McDuff, E. Potazou.

One of the principal discussions of the last day of the meeting was on the report of the committee on president's address. The address condemned Governor Sanders for disregarding the recommendation of the association relative to the appointment of the State Board of Pharmacy. A compromise resolution was adopted endorsing the new Board of Pharmacy but condemning the Governor for disregarding the recommendations of the association.

The association decided to withdraw from the N.A.R.D. because of excessive per capita taxes.

A paper on "Specific Examination of Water" was read by Mr. Lohmoller.

The following officers were elected and committees and delegates named: President, E. L. McHugh, of Natchitoches; first vice-president, John E. Scott, of New Orleans; second vice-president, Joe Baltar, of New Orleans; treasurer, George S. Brown (re-elected); recording secretary, George W. McDuff (re-elected); corresponding secretary, J. W. Patterson; executive committee (all re-elected), A. di Trapani, C. D. Sauvigne, George V. Claren, M. Stolzenhaller and J. N. W. Otto; delegates to the U.S. Pharmaceutical Convention, Dr. Philip Asher, F. C. Godbold and Adam Wirth; alternates, J. A. Legendre, A. O. Kaczorowski, M. T. Breslin; delegates to the A.P.A., M. Bernstein, Dr. Philip Asher and F. C. Godbold; delegates to the N.W.D.A., F. A. Dicks, A. D. Parker and J. W. Phillips.

## NEW ORLEANS COLLEGE COMMENCEMENT.

Dean Asher Praises Anti-Patent Medicine Crusade of the N.A.R.D.—Educational Facilities Increased.

NEW ORLEANS, May 22.—The ninth annual commencement of the New Orleans College of Pharmacy took place at Tulane Theater before a large audience, including members of the Louisiana State Ph.A. Following a preliminary address of welcome, Philip Asher, M.D., dean of the college, introduced George M. Eldredge, of Louisiana, who delivered the salutatory for the graduating class. Regarding the question of pharmaceutical education, Dean Asher said:

"In recent years it has become evident that the standard of pharmaceutical education must be raised; the march of progress has demanded that the pharmacist be given his proper position in the community."

As a result of increased attendance, Dean Asher said that the college had been able to add much new equipment, and the dispensary had been greatly facilitated in its work. During the year more than 2000 prescriptions were filled by members of the senior class. He applauded the N.A.R.D. for its work against the use of patent medicines and urged that the association be supported.

Degrees were conferred upon the following:

G. J. Comeaux, George M. Eldredge, A. V. Grenillion, C. Kette, S. B. Shurt, M. Montfomagne, A. Holloway, A. L. Landry, M. J. Vallon, H. C. Thomas, A. R. Taylor, J. A. Kelly, S. Lopez, J. A. Triche, L. C. Sess, E. B. Toup, A. Domestevy.

Certificates—J. A. Nelson, F. A. Perot, E. Caffero, E. C. Ellzey, E. Rothlinghouse, A. L. Frank, N. Parmentel, Jr. Annual gold medal, presented by J. R. Argel, to F. A. Kelly, of Texas; faculty medal, presented by Jules Lazard, M.D., to B. S. Beall, of Mississippi; L.S.P.A. medal, presented by Mike Bernstein, to George M. Eldredge, of Louisiana; certificate of membership in L.S.P.A., presented by Dean Asher, to L. C. Sess for scholarship.

The address was delivered by H. Garland Dupre, Speaker of the Louisiana House of Representatives. He declared that the pre-requisite graduation clause which the pharmacists last year sought to have incorporated in the pharmacy law, should be enacted, and urged that the pharmacists persist until the law be so amended. He promised his assistance in any effort tending to elevate the business of the pharmacist, which, he declared has, in the eyes of the world, ceased to be a mere business and is now a profession. The valedictory address was delivered by Joseph A. Nelson.

## BIG CLASS AT PITTSBURG UNIVERSITY S.P.

Dean Whelpley, of St. Louis, Delivers Address and Chancellor McCormick Confers the Degrees.

PITTSBURG, May 22.—At the annual commencement exercises of the University of Pittsburgh School of Pharmacy at Carnegie Hall, 94 young men and one young woman received diplomas for having successfully completed the two-year course of the school. Chancellor S. B. McCormick, in his address, called attention to the fact that the graduating class this year is the largest in the history of the university.

Dr. Henry Milton Whelpley, dean of the St. Louis College of Pharmacy, delivered the address to the class on "Keep Abreast of the Times."

The valedictory was delivered by Daniel Webster Livengood, who ranked fourth among the honor students. The class roll was called by Vice-Dean James H. Beal, and the degrees were conferred by Dr. McCormick. Miss Hettie Edna Byers, of San Francisco, is the only young woman graduate of the class. The male members are:

Graduates in Pharmacy—Howard Bergert, Clarence Russel Bonar, James Otto Cunningham, Walter Lovell Green, Lloyd Curtis Harlan, Samuel Willard Patton and Samuel Schimp, Jr. Pharmaceutical Chemists—Robert Clifford Hartung, Edward Monroe Nelson and Albert Ora Stephenson.

Certificates of Proficiency—Stanley Foster Caldwell, John Elliott Hamilton, Marmaduke Matuau, Joseph Charles Rovinsky and Albert Alvin Wohlwend.

Graduates—Arthur Wayne Allen, Leslie Earl Albert, Howard John Alexander, William Charles Arnold, Earl Bailey, Alfred Conrad Boerner, James Erroll Brown, M.D., Arnold Johnston Burkett, Edgar Reed Burns, Robert Franklin Campbell, Frank Patch Carter, Harry Adams Connell, Jacob Crantz, Ray Johnson Crowthers, William Dammiller, Willis Curtis Dice, Wallie Valentine Elder, Jr., John Joseph Eiben, Louis Emanuel, Jr., Stewart Patterson Ferner, Frank Fleckenstein, John Frank Grabowski, Grover Cleveland Garber, Frank Roger Griffith, Charles Jacob Grove, Emil August Grodecur, Samuel Joseph Hannum, Clarence Edwin Hartman, Wilson Donelson Hartman, Edward Francis Heinrich, James Harrison Henderson, Morris Honigberg, Leon Horvitz, Frank Elton Holme, Thomas Francis Jackson, Charles Emil Kuehling, C. C. Kuehling, Arthur Benjamin Lawrence, Ralph Lipton, Daniel Webster Livengood, Oscar Hunter Levler, Rudolph Alexander Lundgren, Ralph Marine, Alfred Russell Marshall, Frank Henry Mervis, Halsey Crawford McCholand, Harry Alexander McChompy, Charles Clair Osburn, Richard Coulter Osterwise, Edmund Thomas Parrish, Clarence LeRoy Payne, Harry Wilson Pegz, Robert Lee Peel, Harry Edgar Pontius, Edward William Pyfer, Raymond William Schoonover, Saul Seegmann, J. Raymond Shamb, Isadore Spann, Fred Earl Silvens, Floyd Howard Sont, Charles Philip Sohn, James Sutton Sutton, Paul Thomas Squitieri, Edgar Allen Swart, Raymond, LeRoy, Thomas, Frank Glenn Thompson, Robert William Timm, William Edgar Vanne, Charles Frederick Weyels, Burford Cecil Windom, Theodore Fredinghausen White, John Herman Wurdack, Robert Oliver Young, Harry Andrew Fowler, Chester Merle Rainley.

Chancellor McCormick awarded the J. H. Beal scholarship prize to John Herman Wurdack, who will receive the income of a \$5000 endowment.

## Commencement of Barnes College.

ST. LOUIS, May 22.—The usual round of banquets and class meetings preceded the annual commencement of the Barnes College of Pharmacy, but these exercises take place in connection with those of the medical school. The haccalaureate address was by Rev. Dr. William F. Andrews and the diplomas were delivered at the Olson. Dean Friedewald and other members of the faculty all have a good word for this class and each of those graduated had a position waiting for him. Those receiving diplomas were:

Graduates in Pharmacy—Henry A. Altheide, Peter J. Basler, Martin M. Bradley, William J. Bude, Charles A. Jost, Lillian K. Kohlberg, H. J. Lander, Thomas B. Mansfield, Martin Mehrie, Virgil H. Newell, George M. Rinehart, Charles F. Remington, E. C. Orchard, Frederick H. Rosenberg, Alex. H. Shore, C. F. Vernehl, E. E. Winor.

Bachelor in Pharmacy—Earl R. Bogan, Ralph Cook, James M. Dunaney, Frances Catherine Hameister, John Olsen, Frederick Rock, Robert S. Wilson.

There is still a prospect that the college will become a department of Missouri State University. At last report, half a dozen juniors had enrolled for next year.

## Dinner for Seniors After Plant Inspection.

The senior class of the Indiana University School of Medicine in Indianapolis recently visited the laboratory of Eli Lilly & Co. A half-day was spent in inspecting the plant. At 6 p. m. the class and officers of the faculty were guests of Eli Lilly & Co. at a dinner at the Claypool Hotel.

## JOINT MEETING IN NEW YORK A FINE SUCCESS.

Interesting Papers. Profitable Discussions and Convincing Demonstrations Mark the Proceedings at Academy of Medicine—Physicians Recognize Importance of Propaganda Movement.

There was a large and very enthusiastic attendance of physicians and pharmacists present at the joint meeting of the New York County Medical Society and the New York Branch of the American Pharmaceutical Association on Wednesday evening, May 19, in Hoosie Hall, New York Academy of Medicine.

The programme carried out consisted of papers and practical demonstrations, all bearing upon the efficiency and reliability of professional pharmacy, the standard remedies, and also the ability of the pharmacist to meet the physician's demands in the proper compounding of reliable drugs.

The first speaker of the evening was Dr. R. A. Hatcher, who in his paper entitled "The Sufficiency of the Standard Remedies for the Prescriber," reviewed a number of official remedies and compared them to various proprietaries in the same therapeutic class. The impression of most physicians regarding the pharmacists were that it was beyond the latter's domain to prepare a proper preparation or any equal to those placed on the market by manufacturing houses, said Dr. Hatcher, but it had been generally proven, he contended, that many preparations of the pharmacists were superior to the vast number of proprietary remedies. Dr. Hatcher stated that there was need of a careful study of the best of the standard remedies, but no necessity for any more new ones; and predicted that the physician who continued to use the various secrets and nostrums would finally find himself out-distanced by his colleagues who prescribed standard medicines.

Dr. W. A. Bastedo treated the subject of "The Physician's Demands of the Retail Pharmacist," and enumerated several, such as proper checking, honesty and an ethical attitude toward patients. Dr. Bastedo thought that the medical student of today would come to appreciate good pharmacy to a much greater extent than his predecessor, as he was being taught the underlying principles of pharmacy and would consequently discriminate closer than when lacking in this knowledge. The physician was glad to welcome the facilities of the pharmacist, said Dr. Bastedo, as extemporaneous prescribing would expand the doctor's therapeutic skill and benefit him in that direction.

Dr. H. H. Rusby, as drug expert for the United States Government, forcibly brought out the necessity of the Pure Food and Drugs Law by describing conditions which existed before the enactment of this law. "The importation of spurious and adulterated drugs," said Dr. Rusby, "was the rule rather than the exception only a few years ago, and the pharmacist was not always to blame for the quality of his medicines in those times, as it was impossible even for the largest manufacturers to get the drugs wanted." A great improvement could, however, be noted in the quality of drugs now being imported, said Dr. Rusby, and the violators had either been driven out or reformed, conditions being reversed. The application of the law to both food and drugs together with the objects contemplated by its enactment were interestingly but briefly outlined by Dr. Rusby.

Dr. George C. Diekmann spoke concerning the educational and practical requirements demanded of candidates before they are licensed to practice pharmacy. The qualifications of ten years ago and those of the present were compared by Dr. Diekmann, and the standing of the influential factors, such as the American Conference of Faculties, which had brought about the higher standard, was exploited. Dr. Diekmann summed up by declaring that the trained pharmacist of today was much better prepared than ever before to meet the demands of the physician. The established qualifications, he added, were continually being raised and the physician could now place all confidence in the graduated pharmacist.

Following the reading of the papers, practical demonstrations in extemporaneously preparing tablets, cachets, tablet triturates and various other pharmaceuticals by simple apparatus were made by Jacob Diner and J. Leon Lascoff with the mortar, pestle, and tablet triturate machine. The samples were passed around the room for inspection. Mr. Diner commented upon the simplicity of the apparatus used and emphasized that elaborate machinery, the slogan of many a pro-

## THIS IS NOT COLONEL ROOSEVELT IN AFRICA.

*That former President Theodore Roosevelt is not the only mighty hunter is proved by the accompanying illustration which shows a retired New York pharmacist, L. F. W. Seifert, a member of the German Apothecaries' Society, standing beside a vanquished denizen of the forests of Quebec. Mr. Seifert is one of the twelve members of the Sagsigata Hunting Club which controls a tract of 250 square miles in the Province of Quebec about 100 miles northeast of Montreal and near Lake Sagagata. Mr. Seifert's home is on City Island, this city.*

prior, was not vital to the making of good, palatable and elegant products.

Dr. William C. Alpers discoursed regarding incompatibles and prepared a number of prescriptions taken from his files and showed results obtained by compounding some commonly prescribed combinations. How many incompatibles could be reconciled and presentable and useable mixtures obtained by the use of various inactive substances was also shown by Dr. Alpers.

There was a short discussion at the conclusion of the official programme. Dr. Edbert LeFevre, dean of the faculty, Bellevue Medical College, stated that the demand among medical men was along the line of wanting the best of pharmaceutical service and he declared he had been impressed with what had been presented in the papers and demonstrations at the meeting. Remarks were made by several other physicians who coincided with Dr. LeFevre in their views on ethical pharmacy and the instructiveness of the matters brought out at the meeting.

Dr. William C. Anderson, chairman of the propaganda committee of the New York State Pharmaceutical Association, told of the general movement throughout the whole country for a return to more ethical codes for both the professions.

George H. Hitchcock, of the New York Branch of the A. Ph. A., was chairman of the committee in charge of arrangements, and H. Seymour Houghton, president of the New York County Medical Society, presided. The pharmacists were the guests of the physicians.

## NEW BOOKS.

COSGROVE, J. JOSE. History of Sanitation. Pittsburgh, Pa.: Standard Sanitary Manufacturing Co. 9+124 p. il. O. cl. \$1.50.

## BROOKLYN PHARMACISTS GETTING TOGETHER.

**Assemblyman Conklin, Dr. Muir and Others Discuss the Work at Albany Which Ended Abortively—Disposition to "Let the Dead Bury the Dead" and Fight in the Common Cause.**

What was evidently intended to be a rousing indignation meeting against the New York Board of Pharmacy and the legislative committee of the State Pharmaceutical Association was that held last Monday evening by the Brooklyn Pharmaceutical Association. The outcome, however, was contrary to the expectations of some of the members in that undoubtedly a much more harmonious condition was brought about than has existed in Brooklyn pharmaceutical circles for a number of months past.

Present by invitation was Assemblyman Robert S. Conklin, whose pharmacy bill was killed in the Senate committee, and who struck a responsive chord by declaring that the subject of the two pharmacy bills was past history and that there was a willingness to let the dead bury its dead. Mr. Conklin explained that he was inspired solely by the recommendations of the Governor in his message relative to pharmacy legislation and subsequently informed a number of his constituents in his district, whom he had kept posted on legislative matters, of his intention to draft and introduce a bill in accordance with the recommendations of the Governor.

Although Mr. Conklin stated that he enjoyed the personal acquaintance of a number of druggists in his district he said to begin with he was entirely in ignorance of the various organizations of pharmacists in both the local and State fields. Mr. Conklin stated that he had no more than introduced his bill, when he commenced to learn a number of things to his advantage. Later he comprehended that the support of these were essential, and was given to understand that the Manhattan association would back his bill. The Whitney-Wainwright Pure Drug Act was incorporated as an amendment to his bill at the request of Jacob Diner, said Mr. Conklin, and other pharmacists also made a number of suggestions, some of which, however, he would not allow to become part of his bill. Mr. Conklin also picked out alleged weak points in the Brown Act, making a short criticism of the provisions relating to the sale of narcotics, appointments, disfranchisement of present licensees, etc.

Dr. William Muir, president of the Board of Pharmacy, and a member of the State association's legislative committee, which drafted the Brown Bill, replied to Mr. Conklin and criticized the Conklin Bill, dwelling especially on the point that it did not provide for practical examinations. Mr. Conklin said that the part relating to examinations he had taken from the Medical Law. Dr. Muir then reviewed the history of the compiling of the Brown Act, naming the various interests consulted which he stated represented the pharmacists of the entire State as completely as was possible under present conditions.

Later Dr. William C. Anderson, Dr. Muir and William T. Creagan, the candidate for membership on the Board of Pharmacy from the Brooklyn Pharmaceutical Association, became engaged in a controversy over the inspectors employed by the board. Mr. Creagan took the position that the board was responsible for the doings of its inspectors and offered to give damaging evidence of craft and other inconsistencies of these employees. When requested for this information Mr. Creagan did not produce other than what was known generally, and which occurred some years ago. The board, said Dr. Muir, had eliminated the inspector named by Mr. Creagan, and did so as soon as the man was found out.

Relative to the proper manner in which any future pharmacy bills should be drawn, Mr. Creagan laid particular stress upon his opinion that the legislative committee of the State association should draw such bills and then submit them to the local associations for approval. Dr. Anderson opposed this idea, stating it would be impossible to secure results and claimed that the State association was the only proper and effective place where a consistent argument could be held and a decision reached beneficial to all. Mr. Creagan claimed that the proper results could not be obtained at the meetings, as claimed by Dr. Anderson, because only four per cent attended or had a voice or vote. To this Dr. Anderson replied that attendance in the local associations was always less than even

four per cent, and therefore they could not claim the right to regulate legislation, and in order to make the plan of Mr. Creagan really consistent such a bill would have to be submitted to every retail druggist in the State, at present an impossibility.

Charles Heimerzheim condemned in very strong terms the circulars which had been distributed without signatures relative to the Brown Act and the Board of Pharmacy. S. Rubin, treasurer of the Greater New York Pharmaceutical Association, explained that the matter was taken up after the first unsigned cards were sent out and a decision reached to attach names, thus to show that the previous cards emanated from the same source.

Mr. Heimerzheim also took issue with Mr. Creagan as to various slurring remarks made by the latter in a charge that the pharmaceutical workers at Albany were lobbyists. Mr. Heimerzheim thought the term a degrading one to apply to any one and said he felt much offended that a pharmacist would use the expression against a member of the same profession. A short discussion took place as to the appropriate use of the word and finally Mr. Conklin was asked to give a definition of what lobbying really was. In a good-natured way Mr. Conklin cleared the atmosphere and expressed himself in a way which left no doubt as to the use of the term and that it usually indicated some degree of degradation.

With the exception of a few who spoke, the remarks were principally confined to what should be done and the manner of its accomplishment. Dr. Anderson made a strong appeal for harmony in all sections, declaring that the profession had enemies in plenty on the outside, which necessitated combined strength from the inside to overcome, and suggested that as many of the members as possible attend the State Association meeting, together with the advice that the fight be devoted more to fundamentals, than petty details. These remarks seemed to meet with a hearty accord, and the expressions which followed with few exceptions all favored such a procedure, the outcome of which was that the association decided that three delegates be appointed to attend the coming meeting of the State organization.

There were present at the meeting a number of the leading spirits of the Greater New York Pharmaceutical Society, which issued the circular attacking the Brown Act and the Board of Pharmacy. This organization had its birth from the Brooklyn Pharmaceutical Association's campaign committee working for the election of William T. Creagan to the board. From this campaign committee sprang the Retail Druggists' Committee, which issued the first unsigned cards referred to by Mr. Heimerzheim. From the last named committee, the Retail Druggists' Protective Association, a secret organization, received its breath of life, but as far as known has not propagated as yet.

### Three Joint Meetings in State This Week.

Dr. William C. Anderson, chairman of the propaganda committee of the New York State Pharmaceutical Association, and dean of the Brooklyn College of Pharmacy, will deliver an address at a joint meeting of the Cayuga County Medical Society and the pharmacists of Auburn this evening. The druggists are the guests of the medical society. For tomorrow evening the druggists of Corning have invited the physicians to attend a meeting also to discuss the propaganda, with Dr. Anderson as speaker. A meeting at Ithaca was addressed by Dr. Anderson last evening.

### Cocaine Seller Refuses to Tell Names of Principals.

William Lewis, colored, of Brooklyn, was recently sentenced in the Kings County Court to serve a term of imprisonment of 500 days and pay a fine of \$500 on the charge of selling cocaine. He pleaded guilty at a hearing and intimated that he would involve certain Manhattan interests for whom he had been acting. Suddenly, however, he refused to say anything further about his principals, even with the threat of a heavy sentence. Non-payment of the fine will keep him in prison for almost three years.

### Fire Damages a Drug Store \$1500.

COXSACKIE, N. Y., May 15.—Fire in the building occupied by the Jordan Marsh Drug Company Thursday evening did damage to the firm to the extent of \$1500. Origin unknown; insured.

## PHILADELPHIA C. OF P. GRADUATES 128.

Large Attendance of Prominent Alumni From All Over the Country—A Busy Week for All Concerned.  
Long List of Winners of Valuable Prizes and Enthusiasm at the Exercises.

PHILADELPHIA, May 21.—Prominent alumni from all over the country last evening assembled in the Academy of Music to witness the exercises held in connection with the 88th annual commencement of the Philadelphia College of Pharmacy. The class numbered 128 young men and women. Following a prayer by Rev. Floyd W. Tomkins, Prof. Samuel P. Sadler, in the absence of Dean Remington, summoned the students to the stage, where in sections of about 40, they were presented with their diplomas by the president, Howard B. French.

Prolonged applause greeted Professor Sadler's statement that the coveted president's cup, awarded to the class surpassing in general excellence, the record of the previous holder of the cup, had been won this year by the Class of '09. Another class trophy was the cup offered for similar excellence by N. H. Martin, of Newcastle-on-Tyne, England, in memory of English and American pharmacists.

The present day opportunities for choosing a vocation, for acquiring one and for its application, were discussed in a most interesting manner by the Hon. William Gardner, of Michigan, the orator of the occasion. He paid a graceful tribute to Frank G. Ryan, '84, who was seated upon the stage and declared that he was proud to call him a fellow-citizen of the Commonwealth of Michigan. Mr. Ryan was a former member of the faculty of the college.

The various college prizes for proficiency in the respective branches were awarded as follows:

Procter prize, a gold medal and certificate, for highest general average with meritorious thesis, awarded to Mitchell Bernstein.

William B. Webb memorial prize, gold medal and certificate for highest general average in the branches of chemistry, operations, pharmacy and dispensing, awarded to George Joseph Coleman.

Pharmacy prize, gold medal, offered by Prof. J. P. Remington, for original pharmaceutical work, awarded to Richard Williams Cuthbert, Jr.

Chemistry prize, \$25, offered by Prof. Samuel P. Sadler, for knowledge of chemical quantitative analysis, awarded to Sinclair Sartorius Jacobs.

Materia Medica prize, \$25, offered by Prof. Clement E. Lowe, for best examination in materia medica and recognition of materia medica specimens with a meritorious thesis, awarded to Charles Selburn Herron.

Microscopical Research prize, a Zeiss-mayer microscope, offered by Prof. Henry Kraemer, for most meritorious thesis involving original microscopic work, awarded to George Joseph Coleman.

Analytical Chemistry prize, \$25, offered by Prof. Frank N. Moerk, for the best work in qualitative and quantitative analysis, awarded to John Moser, Jr.

Operative Pharmacy prize, \$20 in gold, offered by Prof. J. P. Remington for the best examination in operative pharmacy, awarded to Miss Mabel Charlotte Starr.

Malisch prize, \$20 in gold, offered by Jacob H. Redsecker, of Lebanon, Pa., for histological knowledge of drugs, awarded to William Raymond Kloppe.

Theoretical Pharmacy prize, a troemner agate prescription balance, offered by Mahlon N. Kline, for best examination in theory and practice of pharmacy, awarded to John Elias Faison Hicks.

Commercial Training prize, \$20 in gold, offered by Prof. J. P. Remington to graduate who passed best examination in commercial training at final examination, awarded to Charles Selburn Herron.

Instructors' prize, \$20, offered by the instructors of the college, for the highest term average in pharmacy, chemistry and materia medica, awarded to David Lee Houck.

Pharmacy Quiz prize, one year's membership in A.P.A., offered by Prof. Charles H. LaWall, for best term work in theory and practice of pharmacy, awarded to D. L. Houck.

Kappa Psi Fraternity prize, gold medal, offered by Eta Chapter, to the graduate making highest general average during his or her senior year, awarded to Mitchell Bernstein.

Sixteen States and two foreign countries are represented by the members of the class, Pennsylvania leading with 77. The graduates and degrees are as follows:

Doctors in Pharmacy—Pennsylvania: W. E. Andrew, H. M. Beaman, H. H. Bell, M. Bernstein, F. L. Black, Z. E. Bollu, M. A. Bossert, Ed. C. Brown, R. L. Bush, R. W. Cuthbert, Jr., G. C. Dapp, J. Davidowitch, H. C. Davis, P. M. Davis, J. E. Detrey, P. C. Dosch, C. Evans, J. R. Fulton, H. S. Godshall, H. M. Greim, B. C. Haines, K. F. Haines, A. M. Hall, D. E. Haller, J. R. Harner, C. C. Harvey, S. Herron, C. S. Hersh, C. E. Hoffman, J. L. Houck, R. T. Hunter, Jr., A. C. Keim, F. J. Keim, Jr., S. Kleckner, W. R. Kloppe, H. J. Kram, A. W. LeVan, G. M. LeVan, Miss Helen Frances Loughlin, W. Mathewson, E. A. May, J. E. Michael, R. J. Moeschlin, R. H. Mooney, E. A. Murray, E. A. Noedel, W. H. Oersing, H. W. Ott, S. A.

## PHILADELPHIA SHAD-FISHERS AT BRIDESBURG.

Party of Philadelphians who recently visited W. H. Morrette at Bridesburg and put in the day shad fishing on the Delaware River. See ERA, May 6, page 433. Left to right, top row: Captain Samuel Peters, A. A. Coxson, W. H. Morrette, T. H. Putts, A. T. Weisner, W. A. Carpenter, H. H. Netter, Z. T. Wolanowski and H. A. Kalbach. Lower row: W. H. Sutton, D. J. Reese, G. W. Fehr and L. H. Davis.

Pearson, T. A. Pfeiffer, A. A. Platt, L. W. Readhauber, F. E. Reigner, W. R. Sedell, W. H. Siemon, J. S. Simpers, J. W. Smith, B. Steiner, R. A. Stoffel, C. Stoyer, H. E. Strauss, G. S. Taggels, J. F. Triple, M. E. Tront, J. A. L. Vink, R. B. A. Wessler, J. Worring, W. A. Yeckle.

New Jersey: F. C. Beck, W. F. Cramer, Jr., H. L. Carr, G. S. Dunbar, J. F. Hughes, R. H. Quering, J. Rigg, H. S. Zahn; New York: M. B. Cady, G. R. Gallinger, A. Hutson, E. L. Kelly, Jr., A. McMahon, J. L. McMahon, Ohio: F. G. Fluery, La Verne English, J. A. Gorry, C. E. Schlenker, J. E. Wright, R. L. Mundhenk; Russia: Miss J. Block, P. Cantor, Mrs. L. L. Mandelbaum, Miss L. Perzin; Maryland: J. H. Allen, H. W. Eakle, I. Liehtenstein, H. E. Young; Connecticut: W. H. Pond, Miss Mabel O. Starr; North Carolina: C. B. Gallant, D. H. Hage; Massachusetts: J. R. Mahony; West Virginia: G. J. Coleman, J. Moser, Jr.; Iowa: F. S. Bonnell; Florida: L. R. Curtis; Utah: W. E. Ferron; Texas: E. R. Jones; Kentucky: W. K. Rhinear.

Pharmaceutical Chemists—Pennsylvania: Miss A. E. Bigart, H. D. Kresge, S. Rosenberg; New Jersey: R. B. Gron, J. K. Trickitt, N. W. Sollenberger; New York: F. P. Van Duynen; Russia: Miss A. Feinstein; North Carolina: J. E. F. Hicks; Massachusetts: B. C. Pittsinger; Mexico: A. L. Guerra; Georgia: S. S. Jacobs.

Proficiency in Chemistry—Pennsylvania: W. H. Free, H. J. Halliwell, D. J. Jones, C. D. Klingensmith, L. W. Walz; Connecticut: M. L. Hartwig.

Pure Food and Drug Course—Pennsylvania: M. M. Becker; Oregon: E. S. Rose.

Throughout the week the graduates and visiting alumni have been kept busy attending the various other events that are so important and interesting during commencement week. On Sunday afternoon, the senior class marched to the Church of St. Luke and the Epiphany and listened to the baccalaureate sermon, preached by the rector, the Rev. David M. Steele.

The Alumni Association on Monday afternoon held its annual meeting and in the evening tendered a reception to the Class of '09. The election of officers was the principal feature of the business meeting and resulted as follows:

President, Clarence H. Campbell; first vice-president, David J. Reese; second vice-president, G. W. Osterlund; recording secretary, Joseph W. England; corresponding secretary, John W. Frey; new members board of directors, Warren H. Foley, John J. Bridgeman and Paul L. McCoomby.

The class oration was delivered by Frederick Eli Reigner, the class poem was read by Jesse Thornley Hughes, the class history by Zera Exley Bollu, the class horoscope by John

E. F. Hicks and the valedictory by Charles Elbert Hoffman. Association prizes were awarded as follows, the last eight being for best examinations:

Gold medal for best general average, class of 1909, to Mitchell Bernstein; silver medal for best general average in examination, John Albert Butler; bronze medal for best general average in first year examination, Pierce Ray Carpenter; pharmacy, John E. F. Hicks; chemistry, David Lee Hough; materia medica, Charles Schellberg; general pharmacy, Allen Christian Keim; operative pharmacy, Miss Mabel Charlotte Starr; analytical chemistry, David Lee Hough; specimens, Mitchell Bernstein; dispensing pharmacy, Richard Williams Cuthbert, Jr.

Under the direction of Prof. C. B. Lowe, students and visitors on Tuesday morning visited many points of historical interest from a pharmaceutical standpoint. In the afternoon the final of the series of pharmaceutical meetings of the season was held at the college.

Prof. Joseph P. Remington presided at the alumni dinner at the Hotel Walton in the evening and among those who spoke was Thomas S. Wiegand, '14, the oldest living graduate and present librarian; Frank G. Ryan, president of Parke, Davis & Co., of Detroit; Joseph Jacobs, Atlanta, Ga.; Dr. J. H. Small and Warren H. Peley, Philadelphia; George W. Lupt, New York; Dr. A. B. Fleming, Tamaqua, Pa.; C. H. Bogert and J. H. Allen, of Baltimore, the latter being president of the graduating class.

On Wednesday the annual field day was held at the athletic grounds. A feature was the hand-driving contest which was won by Miss Anna Longhlin. Harry S. Godshall, president of the College Athletic Association, distinguished himself particularly by breaking the college record for the high jump by clearing the bar at 5 feet 5½ inches. In the afternoon, under the direction of Dr. Adolph W. Miller, there was a botanical excursion to Horticultural Hall, Fairmount Park. In the evening the students formally said good-by to their instructors at the banquet given by the faculty in the college museum.

#### Branch of Philadelphia Alumni Formed in New York.

A permanent organization of alumni members of the Philadelphia College of Pharmacy residing in the Metropolitan district was formed at a meeting of graduates which convened at Hausman House, Broadway and 30th street, Manhattan Borough, New York City, on May 18. William H. Raser acted as temporary chairman, and the following officers were elected: President, Caswell A. Mayo; vice-president, Samuel W. Fairchild; treasurer, Horatio N. Fraser; secretary, Joseph Healy. These officers, together with three additional members, Jacob H. Rehfuss, George W. Hackenberger and E. A. McFadden, were constituted a committee with power to prepare a constitution and by-laws.

During the serving of a supper, telegraph and telephone messages were exchanged with the alumni meeting in progress in Philadelphia. The rooms were decorated with the college colors and a phonograph dispersed speeches dictated for the meeting by members of the faculty and the president of the alumni association. A very enjoyable evening was spent by those in attendance, who were:

William H. Raser, '08; Thomas D. McElhenne, '72; Horatio N. Fraser, '72; Henry L. Schmidt, '73; J. L. Webster, '75; Dr. Robert A. Koppel, '76; David Costello, '79; F. W. Carpenter, '79; Eugene A. McFadden, '79; E. H. Hammer, '79; B. B. Hamilton, Jr., '81; Virgil Gebelitz, '82; H. E. Rosenzweig, '83; J. M. Makarewicz, '84; P. C. Caswell, A. Mayo, '84; A. Neham, '87; George W. Hackenberger, '90; Milton F. Schuck, '91; Marlborough Hall, '91; Edw. T. N. Stom, '91; Jacob H. Rehfuss, '93; Joseph Healy, '93; George R. Christ, '94; W. A. Spengler, M.D., '94; W. J. Geary, '94; John A. Seitz, '94; Robert C. Pursell, '01; Rayben Warslowsky, '01.

#### Mr. Ryan Gives Dinner to Old Friends.

PHILADELPHIA, May 20. Frank G. Ryan, formerly assistant to Prof. Joseph P. Remington at the Philadelphia College of Pharmacy, but now president of Parke, Davis & Co., in addition to playing the host at a dinner to a company of prominent Philadelphians on Monday night, incidentally played a joke on this same company. He contrived to have invitations issued to about 40 friends to be present at a gathering at Baxer's Café. The fortunate ones were under the impression that the occasion was the celebration of the anniversary of the birth of Harry L. Stiles, vice-president of the P.A.R.D.

There was no little merriment and surprise, therefore, when Mr. and Miss Ryan appeared and the toastmaster, Prof. Frank X. Moerk, announced that Mr. Ryan had wished to spring a

little surprise upon the friends who gave him a farewell dinner when he relinquished his position at the college nine years ago and departed for Detroit to accept a position in the pharmaceutical department of Parke, Davis & Co. Those present were:

Frank G. Ryan, Miss Helen Ryan, Mr. and Mrs. William L. Cliffe, Mr. and Mrs. Charles Leedom, Mr. and Mrs. D. J. McFerran, Mr. and Mrs. Theodore Campbell, Mr. and Mrs. Clarence Campbell, Mr. and Mrs. W. A. Runsey, Mr. and Mrs. Jacob Breyer, Mr. and Mrs. J. C. Perry, Mr. and Mrs. Frank X. Moerk, Mr. and Mrs. P. K. E. Stedem, Mr. and Mrs. A. J. Staudt, Mr. and Mrs. L. A. Wolcott, Mr. and Mrs. C. O. Meyer, Mr. and Mrs. H. L. Stiles, Miss Helen Hunter, Miss Helen Campbell, Miss Edith Muckenberger, Miss Thelma Staudt, Miss Kathleen Perry, Miss Catharine Stedem, Frank H. Moerk, Henry H. Stiles, Morrison H. Stiles, William Hobbie and J. H. Hahn.

#### Forming a Branch of Phila.C.P. Alumni.

SYRACUSE, N. Y., May 22.—Syracuse members of the Alumni Association of the Philadelphia College of Pharmacy have planned to organize a permanent Syracuse branch of the alumni. Tuesday night they held a banquet at the Hub Café, simultaneously with feasts for resident members in all of the larger cities. David Stolz, of Stolz Brothers, has been asked to serve as chairman of the organizing committee. The Syracuse graduates are: Edward S. Dawson, Jr., '74; Fred H. Fox, '84; W. B. Rissell, '85; W. B. Bunker, '91; F. J. Nye, '92; C. E. Ames, '93; Louis Stolz, '90; David Stolz, '03; William Ross, '04; Harry Plumm, '05; Mandell Light, '08.

#### Winona Technical Institute's 1909 Class.

INDIANAPOLIS, May 22.—The graduation exercises of the School of Pharmacy of the Winona Technical Institute will be held Saturday, May 29. The following are the graduates:

Carl Becker, A. S. Burns, John G. Berry, Ralph R. Case, Charles Dittman, Robert Etter, Herman J. Fritz, Forrest E. Graves, Clifford Hebble, W. H. Lang, Herman Keibling, H. L. J. Steffelt, C. E. Spencer, Ward Wilson, all of Indianapolis; Wilbur D. Derrill, H. A. Dickson, Glenn Roberts, all of Jamestown, Ind.; Henry T. Beckman, Lake City, Minn.; William Reid Gaddy, West Midway, Mass.; Charles Andrews, Cooperstown, Mich.; Carl Johnson, New Richmond, Ind.; George Johnson, Chester, W. Va.; Colch Roy McCulloch, Ypsilanti, Mich.; James Rodington, Yorktown, Ind.; Charles N. Reed, Enid, Okla.; Charles E. Phelps, Kokomo, Ind.; Delos Garner, Lebanon, Ind.; Henry J. Koebert, Wheeling, W. Va.

#### Thirteen Graduates at Marquette.

MILWAUKEE, Wis., May 22.—Graduation exercises will soon be held at Marquette University and a large number will be graduated from the various departments. The following will be granted diplomas in the School of Pharmacy (formerly Milwaukee Medical College School of Pharmacy):

A. H. Black, O. Bergen, H. A. Dreyer, E. Gisher, R. M. Hadley, A. F. Keith, M. Kerston, George E. Ludow, M. J. McGovern, A. F. Schneider, O. Stockinger, W. L. F. Schulz and B. Van Engel.

#### Graduates of Shaw University at Raleigh.

RALEIGH, N. C., May 22.—At the recent commencement of Shaw University the degree of graduate in pharmacy was conferred upon the following class:

Henry C. Rhoe, Shelley G. Brown, L. Gladstone Burwell, Henry H. Jackson, George T. Jones, Charles L. Mallette, Hiram A. J. Mosley, George T. Riley, Boston C. Sharp, William A. Smith, James B. Webb, Henry J. Whitehead.

#### Burglars Make Good Haul in La Crosse Store.

LA CROSSE, Wis., May 22.—Burglars recently made a good haul by ransacking the pharmacy of Charles Euler, State street and West avenue. The thieves made their entrance with a skeleton key and worked undisturbed. Besides rifling the cash drawer of \$5.50, they got away with more than \$25 worth of stock.

#### Beefsteak Supper for Detroit Chemists.

DETROIT, May 22.—The annual meeting of the Society of Detroit Chemists will be held May 28. Papers will be read by Dr. A. B. Lyons, Dr. C. H. Merrill, J. W. Matthews, F. G. Wheeler and Charles Lamont. A beefsteak supper will be served.

#### Wisconsin Pharmacist Sent to an Asylum.

TOMAHAWK, May 22.—John Hilt, registered pharmacist, has been adjudged insane and has been taken to the Northern Hospital for the Insane at Oshkosh. He is 34 and unmarried.

## PATENTS, TRADE MARKS, ETC.

## TRADE MARKS.

Published May 18, 1909.

- 29,620—Mystic Wine of Life Company, Bristol, Tenn. Class 6. Remedy for dyspepsia, headache, constipation, indigestion, pains, etc.
- 30,583—Miller Manufacturing Company, Lincoln, Neb. Class 6. A remedy for warts and moles.
- 35,062—Otto W. Tanke, Chicago, Ill. Class 6. Hair-tonic for dandruff.
- 38,505—Merrick Medicine Company, Waco, Texas. Class 6. A remedy for diarrhea, indigestion, cholera infantum and summer complaint in children.
- 38,583—Frank Thomas Edward Souter, London, England. Class 6. Preparations for the prevention of sickness on sea, on trains and the like.
- 38,990—Sherman, Werner & Co., Lima, Ohio. Class 6. Cold-cream and face-powder.
- 39,072—Eieto Company, New York, N. Y. Class 6. Toilet water.
- 39,524—Hegeler & Brünings, Fett-und Seifenwerke, A. G., Aumund, Germany. Class 6. Wool-wax, toilet cream, ointments and emulsions.
- 39,348—Ida Z. Koon, Columbia, S. C. Class 6. A remedy for hydrophobia.
- 39,524—Abbott Alkaloidal Company, Chicago, Ill. Class 6. A medicine to be used in acidosis, rheumatism, gout, etc.
- 40,304—Friedrich August Volkmar Klopfer, Dresden-Leubnitz, Germany. Class 6. A venereal remedy.
- 40,407—Ernst Bischoff, New York, N. Y. Class 6. Alkaloidal solutions used for injections in veterinary practice.
- 40,575—Henry O. Theobald, Binghamton, N. Y. Class 6. A hair tonic and shampoo.

40,679—L. A. Beebe, Yonkers and New York, N. Y. Class 6. Porous plasters, corn plasters, foot plasters, pile remedy, tooth powder, sachet powder, etc.

41,538—Mrs. Nettie Harrison Company, San Francisco, Cal. Class 6. Hair and scalp preparations.

41,540—Mrs. Nettie Harrison Company, San Francisco, Cal. Class 6. Face creams and face powders.

41,567—Mulhens & Kropff, New York, N. Y. Class 6. Perfume and toilet water.

## PATENTS.

Granted May 18, 1909.

921,809—Johnson C. Davis, Concord, N. C. Non-refillable bottle.

921,898—Edward E. Schultz, Chicago, Ill. Can filler.

921,899—Pauline I. Schenberg, New York, N. Y., assignor to Perfected Powder Puff Company, New York, N. Y., a corporation of New York. Powder-puff box.

921,907—Frank J. Stayton, Madisonville, Ohio, assignor to A. Nolen & Co., Cincinnati, Ohio, a copartnership. Perculator.

921,908—Frants C. Stöckel, Copenhagen, Denmark. Bottle closure.

921,927—Edith M. Waterman, and Nettie Brown, Centralia, Wash. Hair tonic.

921,444—Rudolph Berendes, Elberfeld, Germany, assignor to Farbenfabrik vorm. Friedr. Bayer & Co., Elberfeld, Germany, a corporation of Germany. Alkyl esters of methylene citric acid.

921,975—Ludwig Glaser, Berlin Germany, assignor to General Electric Company, a corporation of New York. Process of obtaining nitric acid from gas mixtures containing oxides of nitrogen.

922,003—Constantin Krauss, Westeregeln, Germany, assignor to Gesellschaft für Stickstoffdünger, Gesellschaft mit beschränkter Haftung, Westeregeln, Germany. Process of making ammonia.

922,031—John D. Pennock, Syracuse, N. Y., assignor to the

Copy of any PATENT or TRADE MARK, 10 cents.  
Author of copyrighted work on Protective Trade Marks,  
Food and Drugs Act, and Valid Patents.

G. H. DAVIS, Attorney, 908 G St., Washington, D. C.

Solvay Process Company, a corporation of New York. Method of making sodium sulfate.

922,040—Paul Reilander, Charlottenburg, Germany, assignor to Chemische Fabrik auf Actien (vorm. E. Schering), Berlin, Germany. Alkyl-para-aminophenol.

922,062—Simon Strauss, Chicago, Ill. Non-refillable dispensing can.

922,125—Paul O. E. Friedrich, Philadelphia, Pa., assignor to Caloris Manufacturing Company, a corporation of Delaware. Casing for vacuum bottles.

922,133—Byron B. Goldsmith, New York, N. Y. Thermoplastic compound of proteins.

922,139—Doris Landau, San Francisco, Cal. Stopper for bottles containing aerated liquids.

922,167—Paul Leinbrock, Copitz, near Dresden, Germany. Closure for bottles and like vessels.

922,174—John G. Lyman, Philadelphia, Pa. Vacuum bottle.

922,244—Otto Becher, New York, N. Y., assignor to American Metal Cap Company, New York, N. Y., a corporation of New York. Bottle and jar closure.

922,286—Lewis Kallings, Baltimore, Md. Sealing cap for bottles.

922,307—Charles E. Michael, Fostoria, Ohio. Atomizer.

922,326—Cortez R. Perry and Charles M. Finch, San Francisco, Cal.; said Perry assignor to said Finch. Filter.

922,331—Thomas M. Quarles, Washington, D. C., assignor of one-half to David B. Chamberlain, Washington, D. C. Hypodermic syringe.

922,335—Jean Rivière, Pittsburg, Pa. Antirefillable bottle.

922,363—Garry P. Van Wye, New York, N. Y., assignor to William Boyce Morrison, New York, N. Y. Vacuum insulated bottle.

922,364—Same as preceding.

922,369—George Walker, New York, N. Y., assignor to Homer T. Yaryan, Toledo, Ohio. Process of extracting resin and turpentine.

922,409—Walther Feld, Hönningen-on-the-Rhine, Germany. Process of recovering hydrocyanic acid.

922,413—Paul O. E. Friedrich, Philadelphia, Pa., assignor to Caloris Manufacturing Company, a corporation of Delaware. Vacuum nursing bottle.

922,435—John E. Lee, Conshohocken, Pa. First-aid package.

#### Delegates to N.A.R.D. Convention Nominated.

PHILADELPHIA, May 22.—The executive committee of the Philadelphia Association of Retail Druggists, at its meeting yesterday, recommended the payment of the balance of \$500 on the dues for 1909, guaranteed to the N.A.R.D. Prior to the meeting, the nominating committee met and the following names were placed in nomination as delegates and alternates to the N.A.R.D. convention at Louisville in September:

Frank W. Plink, William T. Burke, Charles Rehms, W. E. Supple, Joshua Marsden, W. E. Lee, W. A. Carpenter, G. W. Fehr, Charles Leedom, D. J. Reese, H. A. Nolte, Samuel B. Davis, Theodore Campbell, J. N. G. Long, D. G. Potts, N. A. Cozons, S. W. Strunk, R. H. Linckey, H. C. Blair, A. T. Pollard, S. C. Henry, R. T. Blackwood, O. W. Osterlund, F. M. Apple, Ambrose Hunsberger, Christopher Koch, W. L. Cliffe, C. G. Neely, G. W. Weidemann, N. S. Steltzer, W. H. Rieker and W. H. Sutton.

The next monthly meeting of the association will be held on the evening of June 4 at the Drug Club. Additional nominations will then be made and the delegates and alternates elected.

#### Frank A. Malkovsky Purchases Pharmacy in Brooklyn.

The William A. Van Duzer Pharmacy, 357 Fulton street, Brooklyn, has been succeeded by Frank A. Malkovsky, who for a considerable time was in charge of one of the departments of Hegeman & Co. at 200 Broadway and who also has served on the advertising staff of the ERA. Mr. Malkovsky is a capable and experienced druggist and that he will make a success of his new venture is the desire of his many friends in the metropolitan district.

#### Receiver for the Walter K. Schmidt Company.

GRAND RAPIDS, Mich., May 22.—Alleging that the Walter K. Schmidt Company, drugs and photo supplies, has been mismanaged; that the assets have been greatly diminished; that the liabilities have been increased, and that the corporation is unable to meet its obligations, as well as that the value of the stock has been destroyed, Henry Huber, Sr., George M. Leonard, Alfred E. Terpening, Mathias Richard

and Fred J. Fruch have filed a petition for the dissolution of the company. Mathias Richard has been appointed temporary receiver with bonds of \$20,000. The schedule attached to the petition shows assets amounting to \$49,428.41. The company must show cause why it should not be dissolved, on August 30 next, at 10 a. m. The petition sets up that the stock of the company is divided into 40,000 shares of \$10 each. All is fully paid in. The record of accounts and bills payable foots up to \$45,500.51, of which \$27,764.15 is in notes of the company, outstanding and \$7736.36 open accounts payable. The liabilities are almost all in very small accounts and include the supply houses with which business has been done.

#### GAS VS. ELECTRICITY FOR ADVERTISING USES.

Representatives of Both Systems Make Claims of Superiority at Boston Druggists' Meeting.

BOSTON, May 24.—The May meeting of the B.A.R.D. was held on Wednesday, a week later than usual on account of the commencement exercises of the Massachusetts College of Pharmacy, and the programme was of a novel character. L. D. Gibbs, special agent of the Edison Electric Illuminating Company of Boston, gave an address on the development and commercial use of electricity, with especial reference as to its use as an advertising factor for retail business men. He was followed by Mr. Fritz, special agent of the Boston Consolidated Gas Company, who from statistics undertook to show that the retail store-keeper could get more light and more advertising power from a smaller outlay for the use of gas than he could by electricity.

James F. Fineran, chairman of the legislative committee, spoke of the progress of legislation affecting pharmacy. His report was clear, comprehensive and encouraging.

Prof. E. H. LaBierre spoke of one of the theses which had been presented at the final exams at the Massachusetts College of Pharmacy on the preparation of tincture of iodine, and pointed out how nearly universal in Boston was the preparation of an article conforming to the U.S.P. The student had sent to a large number of drug stores and obtained small quantities of the tincture, all of which had been analyzed, with the result that the analyses showed a remarkable degree of uniformity with the U.S.P. requirements. Not so satisfactory results were found in the analysis of a number of suppositories. In some of the samples containing plumbi-acetate it was found that the preparation had not been well mixed, and that some of the suppositories from the same druggist, and in the same prescription, showed an unevenness in the percentage of plumbi-acetate, indicating careless or thorough methods of mixture.

Charles H. Davis, secretary of the association, spoke of the need of co-operation on the part of the druggists to raise the professional standard, and that more attention should be directed to the professional side rather than to the commercial side.

#### Brooklyn and Jersey City Stores for Hegeman Co.

Two new stores which will be opened by the Hegeman Corporation about July 1, will mark the invasion of Brooklyn and New Jersey territory by this concern. The Brooklyn Borough store will be located at 1065 Broadway, corner of Dodworth street. A long term of lease has been secured on the three-story brick building on this corner and extensive alterations will be commenced at once. The Jersey City store will be located in Newark avenue, directly opposite Keith & Proctor's Theater. Another store will also be started about July 1, at the corner of Tremont and Washington avenues, Borough of Manhattan, New York City, for which the building is now being remodelled. The store at 180th street and St. Nicholas avenue was opened a few weeks ago and is in charge of Mr. Mytrott.

#### To Sell Soda Water on Sundays in Massachusetts.

BOSTON, May 22.—Governor Draper has signed the bill to permit the sale of soda water, ice cream, confectionery and fruit on Sundays. The bill provides for the granting of a license of \$5 to a dealer in these articles on week days to keep his store open on Sundays. There is a referendum on its acceptance in the bill, so that outside of Boston the city council must accept the Act, and in towns a majority of the voters at a town meeting.

## PENNSYLVANIA'S NEW PURE DRUGS LAW.

### Provision Which Brought About Criticism and Opposition Not Antagonistic to Interests of Retail Druggists—State Pharmaceutical Examining Board the Enforcing Power.

PHILADELPHIA, May 15.—The "Pure Drug Act," while characterized by those opposed to it as a "measure solely in the interests of the jobber and the manufacturer" and designed to "prevent the manufacture and sale of adulterated or misbranded drugs, defining the word 'drug,' prescribing penalties for violation of the Act and the means for its enforcement," has been signed by the Governor and is now a law. It becomes effective October 1, 1909. The law is of particular importance to all departments of the drug trade and practically every organization, institution and interest identified with the drug trade in Pennsylvania, had a voice in its preparation.

This law is the outcome of a conference of representatives of the interests affected which was held at the College of Pharmacy in this city prior to the 1907 session of the Pennsylvania Legislature. The general outline of the bill was agreed upon and it was introduced at that session only to be withdrawn when opposition developed on the question as to the manner of its enforcement. In practically the same shape it was reintroduced at the 1909 session, and was passed. Just prior to its approval by the Governor, opposition developed among some retail interests in this city largely because of the following provisions of Section 3:

That for the purpose of this Act an article shall be deemed to be adulterated:

First: If a drug is sold under or by any name recognized by the United States Pharmacopoeia, the National Formulary or the American Homeopathic Pharmacopoeia it differs from the standard of strength, quality or purity as determined by the test or formula laid down in the United States Pharmacopoeia, the National Formulary or the American Homeopathic Pharmacopoeia, provided that no drug defined in the United States Pharmacopoeia, the National Formulary or the American Homeopathic Pharmacopoeia except oil of peppermint, oil of spearmint, peppermint, camphor, ginger and ethyl nitrite shall be deemed to be adulterated under this provision if the standard of strength, quality or purity be plainly stated upon the bottle, box, or other container thereof, although the standard may differ from that determined by the test or formula laid down by the United States Pharmacopoeia, the National Formulary or the American Homeopathic Pharmacopoeia.

Second: If its strength or purity fall below the professed standard or quality under which it is sold.

The idea was to enable country storekeepers to sell the common household remedies, even though they had no scientific knowledge of the preparations, and it was argued that discrepancies were taken by making it obligatory that such preparations containing the six above-mentioned drugs be of standard strength. Other preparations, such as are not sold by storekeepers but are handled by druggists and others with scientific knowledge, may under the new law be of lesser strength, provided the proportion of the drugs it contains are stipulated on the labels. This was the principal point at which the opposition was aimed. It was claimed that this provision was solely in the interests of the jobber and the manufacturer. This was denied most earnestly by the committee of the organizations which had been working for the passage of the bill.

Section 4 has to do with misbranding and stipulates that an article will be

regarded as misbranded when all drugs, the package or label of which shall bear any statement or design or device regarding such article or the ingredients or substance or substances contained therein shall be false or misleading in any particular, and if it be the intention of or offer for sale under the name of another article or if the contents of the package as originally put up shall have been removed in whole or in part thereof and other contents shall have been placed in such package or if the package fail to bear statement on the label of the presence of any alcohol, morphine, opium, heroin, cocaine, alpha or beta eucaine, chloroform, camphis indica, chloral hydrate, acetanilide, phenacetine, antepyrine or any derivative or any preparation of any such substances contained therein, provided that nothing in this paragraph apply to the filling of written prescriptions furnished by practicing physicians, dentists and veterinarians and kept on file by pharmacists or as to such preparations as are specified and recognized in the United States Pharmacopoeia, National Formulary or the American Homeopathic Pharmacopoeia which are made in accordance therewith and are sold under titles designated therein.

The enforcement of the law will be in the hands of the State Pharmaceutical Examining Board and for each violation of the law where guilt is proven, the fine shall be \$50. For subsequent convictions, the penalties are heavier.

Section 10 has to do with the responsibility of the manufacturer, the wholesaler and the jobber, and is as follows:

That in case it shall be made to appear at any hearing before the State Board or under the rules and regulations prescribed thereby that the dealer from whom any adulterated or misbranded article shall have been purchased or procured, purchased the same from any manufacturer, wholesaler dealer or jobber who has given a guarantee thereof to the dealer that the same is not misbranded or adulterated within the meaning of this Act, and if it shall be made to appear that the said dealer has kept and preserved the article in question in precisely the same condition as to quality and purity as when it was so purchased by said dealer, then and in that case the said Board shall direct proceedings to be commenced against the manufacturer, wholesaler dealer or jobber in the proper court for the collection of the penalty provided for violation of this Act, and if the penalty shall thus be collected from said manufacturer, wholesaler dealer or jobber, no further proceedings shall be commenced or continued against the dealer from whom the article in question had been purchased or procured, provided the sale of said article be discontinued by said dealer.

Section 11 provides that the misbranding provisions of the Act shall not apply to the distribution or sale of or to the possession with intent to distribute or sell by any dealer of such drugs as were in such dealer's stock in Pennsylvania on October 1, 1909, provided that the package or other container in which said drugs shall be contained shall be plainly and conspicuously marked with the words and figures "On Hand October 1, 1909."

In Section 13 (the closing section) all Acts or parts of Acts inconsistent with the new law are repealed.

## CAN'T SELL DENATURED ALCOHOL FOR BATHING

### Internal Revenue Ruling Declares Use is Against the Law—Can be Used to Manufacture Paint.

WASHINGTON, May 22. Acting Commissioner of Internal Revenue Robert Williams, Jr., in Treasury Decision 1495, declares that denatured alcohol may not be sold to be used for bathing purposes. He says in part:

"The use of alcohol for bathing purposes does not appear to be such as is enumerated in Section 1, but is rather authorized for which penalties are prescribed under Section 2, since the only object of bathing the body with alcohol must be to obtain its medicinal effect upon the skin.

"No penalties are prescribed in the Act—and manifestly the Government could not follow a person into his home to see whether he used completely denatured alcohol either for drinking or for medicinal purposes. Yet the uses are both obviously contrary to the purpose and intent of the law, and the aim is to prevent them, so far as it is possible to do so, by the penalties imposed in Section 2 upon manufacturers or dealers who knowingly furnish denatured alcohol for beverage or medicinal use.

"I am of the opinion, therefore, that completely denatured alcohol cannot lawfully be sold for bathing purposes, or for any medicinal use whatsoever."

The Commissioner has decided that denatured alcohol may be used in the manufacture of liquid paints. In a letter (T. D. 1496) to the collector in Cincinnati, Ohio, he says:

"You are informed that formula No. 1 (to 100 gallons of alcohol add 5 gallons of approved wood alcohol) is hereby authorized for use in the manufacture of liquid paints."

## New York Bowlers Entertain at Terrace Garden.

The 38th annual meeting of the Thursday and Friday Bowling Clubs, composed of members of the German Apothecaries' Society, held at Terrace Garden Bowling Alleys, New York, on the evenings of May 20-21, was characterized by good bowling, a good banquet and a good time generally. The programme included singing and recitations and the award of the annual prizes, the recipients of the latter being Messrs. Swann, Frasch and Albert, members of the Thursday Club, and Messrs. Hasselbach, Bruns and Siemann, of the Friday Club.

## Government Regulations for Sale of Viruses.

WASHINGTON, May 22.—Under date of May 11 the Secretary of the Treasury has promulgated the new regulations prepared by a board of officers composed of the surgeon-generals of the Army, Navy and Public Health departments for the sale of viruses, serums, toxins and analogous products in the District of Columbia and to regulate interstate traffic in the same.

## THE DRUG MARKETS

### TENDENCY MOSTLY TOWARD HIGHER PRICES

#### Spot Quotations Very Firm on Seasonable Articles.

##### Alcohol Advanced 4 Cents per Gallon.

NEW YORK, May 24.—General conditions surrounding the market for drugs and chemicals are without new features, but a moderate consuming demand continues for seasonable articles and the changes which have taken place during the week show a higher range of prices. Grain alcohol has advanced 4c. per gallon, but there is no change yet in the price of commercial alcohol, though an advance may be expected in the near future. Asafetida shows increasing firmness, and the tendency is toward higher prices as stocks are small, and owing to the troubles in Persia, no shipments are known to be on the way. Opium is unchanged, but firmly held with a better demand for consumption and manufacturing purposes. Norwegian cod liver oil is quiet, but without any change in value.

OPIMUM.—Primary markets report large sales for America, about 200 cases having been purchased for shipment to this country, resulting in an advance in the Smyrna market equal to about 15c. to 20c. per pound. Information received concerning the new crop is less favorable, and unless timely showers of rain occur, the crop is likely to be seriously damaged. The arrivals in Smyrna for the week ending April 30, amount to 2050 cases, as against 1385 cases at the same period last year, and in Constantinople 2039 cases, as against 442 cases at the same period last year. The stock in Smyrna at present is 1326 cases, against 1826 last year, and in Constantinople 162 cases, against 76 cases on the same date last year. Cases are held at \$4.25 per pound; lots of 50 pounds, \$4.27½ per pound; lots of 25 pounds, \$4.30 per pound, and smaller quantities, \$4.40 to \$4.50 per pound. Granulated and powdered in lots of 25 pounds are held at \$5.25 per pound.

QUININE SULPHATE.—The sale of Amsterdam brand of quinine in Amsterdam on the 14th instant was a trifle higher than the previous sale, and 50,000 ounces were sold at florins 10.56, as against florins 10.50 at the previous sale on April 28. In London on the 18th instant the regular monthly sale of bark took place, but there was no change in value. The local market is unchanged.

COD LIVER OIL, NORWEGIAN.—The market is quiet, but without any material change in value. Cable reports give the result of the catch and production of oil to the 17th instant as follows: Total catch, 50,600,000 fish, producing 39,815 barrels oil. The result of the two previous years were as follows: 1907, 42,600,000 fish, producing 35,730 barrels oil; 1908, 40,800,000 fish, producing 44,296 barrels oil. The production of oil during the last week has not been large, and the difference between this year and 1908 is 4451 barrels less.

GLYCERIN.—This is not the season of the year to look for higher prices, but the market has been steadily advancing during the past few weeks, owing to a good demand for manufacturing purposes and higher cost of crude material, and the tendency is still upward. The price for barrels is 17c. per pound; plain cans, 18c. per pound, and patent cans, 18½c. per pound.

CITRIC ACID.—The demand is increasing, and all cheap lots have been taken out of the market. Crystals in barrels is now held at 40c. per pound and kegs at 40½c. per pound.

CANNABIS INDICA.—As intimated in our last report, an advance has taken place, and \$1.50 per pound is now being asked, with lower prices contingent upon arrivals of new stock due in a few months.

PAPAIN.—Cases of about 50 pounds are offered at \$4.50 per pound. This article has been scarce for some time.

MATIOO LEAVES.—There has been a better demand for leaves of good quality, and the price has advanced to 20c. per pound. Some holders ask 22c. per pound.

ASAFETIDA.—Increasing firmness is shown under steadily diminishing stocks at all distributing points both here and abroad. Considerable business between jobbers has been reported with over 30c. paid, and quotations for U.S.P. have

advanced to 32½ to 35c. per pound in large lots, with the tendency still upward.

CHAMOMILE FLOWERS.—On the spot, quotations for the Hungarian variety are steadily held at 37 to 40c. per pound for desirable descriptions. The tone of the market is firm, owing to reports from abroad to the effect that weather conditions have been unfavorable to the new crop and that opening prices are likely to be comparatively high.

JUNIPER BERRIES.—Firmness in the foreign markets is reported and the spot market is strong in sympathy. There is a fair consuming demand and quotations for desirable grades are well sustained at 4 to 4½c. per pound, as to quantity, quality and seller.

RUCHU LEAVES.—Cables report that at the recent drug auction in London, about 20 bales were offered and sold at 1s. 4d., which is said to equal about 35c. laid down here. This is the general spot quotation for prime green, and in some quarters a 40c. market is predicted. Most holders are quoting 35 to 36c., with no tendency to shade prices, all cheap lots having been bought up and the available stock is under good control.

## London Drug Market

LONDON, May 15.—The market has been without special feature this week and business has been unusually quiet. Notwithstanding the termination of the Morphine Convention announced in last week's report, prices are unchanged and in view of the uncertainty of the Opium market, any material decline in the value of Morphine is not looked for immediately. The position of Codeine is unaffected by the breaking up of the Morphine Convention. In spite of the near approach of the principal consuming season Citric Acid tends easier and the demand for Tartaric Acid, on the other hand, is improving. Essence of Lemon is quiet at 3s. 7d. per pound "spot" for good brands.

Cubebæ are scarce on the spot and £5 5s. per cwt. is mentioned as the price of small quantity available. Cascara Sagrada is quoted at 45s. per cwt., but no business has been done above 42s. 6d. Although there are sellers of second-hand Glycerin below official prices, makers are very firm. A small lot of Buchu Leaves which appeared on the market was eagerly bought up at 1s. 3d. per pound for good round green. For good yielding Jalap, the spot price is 1s. 9d. to 1s. 11d. per pound. Oil of Male Fern tends dearer. Crude China Camphor is somewhat easier but refined Japanese continues scarce and one-ounce tablets are quoted 1s. 9d. per pound spot. Peppermint Oil is quiet; there are buyers of Wayne County Oil in this at 6s. per pound but sellers want 6s. 3d.; a small business has been done in Japanese dementholized at 4s. 8d. per pound for "Kolayashi."

### Gets \$2000 Verdict for Commissions.

BALTIMORE, May 22.—Luther W. Hopkins has obtained a verdict for \$2000 damages against Charles Willms in the Superior Court in his suit to recover commissions alleged to be due for getting Mrs. Greenleaf Johnson to invest \$40,000 in the Willms Sanitary Company, which was organized recently to manufacture sanitary appliances. Mr. Willms contributed his patents, and his son, Carl Willms, the sum of \$40,000. Mr. Hopkins contended that he was employed by Mr. Willms.

### Medical Graduates Guests at Lilly Branch.

The senior class of the Eclectic Medical and Surgical College of Kansas City were recently guests of the Kansas City branch of Eli Lilly & Co. The college graduates 22 physicians this year.

The senior class of the University Medical College of Kansas City was also entertained at the branch. O. B. Dickinson, the branch manager, did the honors of the occasion, which included refreshments.

### A Simple Matter.

"Does a dentist have much trouble in collecting his bills?" "No," answered the expert in teeth. "A man usually sees that his last account is paid before he has more work done. He takes no chances on an unfriendly disposition."

# THE PHARMACEUTICAL ERA

PUBLISHED EVERY THURSDAY

VOL. XLI.

NEW YORK, JUNE 3, 1909

No. 22

D. O. HAYNES & CO. - Publishers

90 WILLIAM STREET, NEW YORK

Telephone, 2457 John.

Cable Address: "Era, New York."

Western Office:

Room 500, Dicker Building, 40 Dearborn St., Chicago

Telephone, Central 3888

## SUBSCRIPTION RATES.

United States, Cuba, Hawaii, Porto Rico, the Philippines, and Mexico	\$2.50 a Year
To Canada, postpaid	3.00 a Year
To Foreign Countries in Postal Union	4.00 a Year
Single Copies	10 Cents.

ALL SUBSCRIPTIONS ARE PAYABLE STRICTLY IN ADVANCE

Published every Thursday at 90 William Street, Borough of Manhattan, New York, by D. O. Haynes & Co., a corporation; President and treasurer, David O. Haynes; vice-president, Ezra J. Kennedy; secretary, Edward W. Drew. The address of the officers is the office of this publication, and the title is registered in the United States Patent Office.

Entered at the New York Post-Office as Second Class Matter

## Re Photographs for "Era Album"

### Illustrated Section

Each subscriber to The Pharmaceutical Era is entitled to representation in this work, and is invited to send us his photograph. We do not require a subscription from each partner and clerk. If the firm or proprietor is a subscriber, the other partners and clerks may have their portraits included for \$1.50 each. To secure all of the Album sections one must be a subscriber to The Era in his own name.

In sending photographs be sure that each one is distinctly labeled with the name, address, business, profession or occupation of the person, written clearly on the back of your photograph. A good plan is to write it on a printed label and stick it on the center of the back of your photograph. Here is a good specimen:

FOR ERA ALBUM.

Fred S. Rogers, Middletown, N. Y.

McMongle & Rogers,

Ex-Pres. N. Y. State Phar. Assn.

When additional photographs of partners and clerks are sent, each one should have written on it the name of the subscriber who sends it, as well as the name of the person in the photograph.

### Cabinet Photographs Only

The style of photograph we require is the so-called "cabinet" size, with the head about two inches long. If other sizes are furnished they interfere with our plans for keeping the faces uniform, also prevent us from classifying the cuts by localities.

In view of the great amount of work we are assuming, to have each of our subscribers properly represented in this Album, we feel that we are not asking too much when we request each subscriber to supply us with the size and kind of a photograph which will facilitate our work and best enable us to do him credit.

In forwarding photographs for the Album, see that they are distinctly addressed as follows:

THE PHARMACEUTICAL ERA,

For Era Album

90 WILLIAM ST., NEW YORK.

## IS NEW DIVISION OF A.C.S. NEEDED?

On another page we publish a communication from Prof. Stevens in which he advocates the formation of a Division of Pharmaceutical Chemistry of the American Chemical Society. Upon its face the plan, as set forth by Prof. Stevens, has an attractive appearance, but in the light of the objections raised by the Philadelphia Branch of the American Pharmaceutical Association there would seem to be the necessity for giving the subject the most thoughtful consideration before the movement assumes such shape that retreat would be inexpedient for those interested in the formation of the proposed division.

No doubt many pharmaceutical chemists will feel that there should be no limit to the number of organizations devoted to the enrichment of the literature of research and discovery in their field, but there will arise the contention that there is a possibility of lack of real fruitfulness in a division of effort, while the point raised in Philadelphia that the movement threatens the future usefulness and standing of the American Pharmaceutical Association is entitled to the attention which its importance in possibilities certainly warrants. The subject is one which we commend to the serious meditation of the pharmaceutical chemists of the country.

## MINNESOTA'S NEW ADVERTISING LAW.

Executive approval having been given the act passed by the Minnesota Legislature to prevent the publication of certain kinds of medical advertisements the measure is now a law and will be enforced, it is said, by the authorities. While it does not interfere with legitimate remedies for proper purposes there is a question whether it may not be the entering wedge for subsequent legislation, so that these provisions will be read with interest:

Any person publishing, distributing or causing to be distributed or circulated any of the advertising matter herein prohibited shall be guilty of a misdemeanor and punished as provided.

The production of any advertisement or advertising matter published or distributed contrary to the provisions of this Act shall be of itself prima facie evidence of the guilt of the person or persons advertising to cure any such disease herein above mentioned, or of the publishers who publish any matter such as is herein prohibited.

Penalties for violations of the law are fines of from \$50 to \$500, or a maximum sentence of six months in jail.

## LOS ANGELES MEETING OF THE A.P.H.A.

That there will be a large attendance at the forthcoming meeting of the American Pharmaceutical Association in Los Angeles the third week in August is a foregone conclusion, for the far western scene of convention will afford an opportunity for hun-

dreds of pharmacists to be present who have in several recent years been unable to make the long journeys required to reach the cities in which the sessions have been held. With the California Ph.A. in session at the same place practically on the eve of the A.Ph.A. convention there should be a generous accession to membership from that quarter, while the attendance by the pharmacists of the Pacific Coast will no doubt be sufficiently large to show their appreciation of the selection of a city so convenient for them and thereby prove the wisdom of holding the 1909 meeting in Los Angeles.

Eastern members should make more than ordinary efforts to go to Los Angeles and the present moment is the time to decide and formulate plans by those who have not yet decided the question. The trans-continental trip is well worth the experience in itself alone, the expense in these days is not restrictive and the programme of mental, visual and physical entertainment will in addition well repay all who attend the annual gathering of the A.Ph.A. in what may well be called the Garden City of Golden California.

#### QUIZ MASTER INTRODUCED TO ERA READERS.

On page 513 of this issue of the ERA the Quiz Master makes his bow once more to our readers, to many of whom he needs no introduction, recalling, as they will, how valuable his advice, suggestions and compilations proved to them in attaining their present standing in the profession when this department was some years ago a feature of this journal. To students, apprentices and drug clerks the training made possible through the kindly offices of the Quiz Master is of more than ordinary value, for in seeking answers to the queries propounded by him there is the incentive to pursue research further than many would go if merely following the beaten path of study in pharmacy.

Interest in this department will by no means be confined to the neophytes, for many pharmacists who have long since received the finishing touches of their education will from time to time find the questions suggestive of ideas for investigation on their own account, either through curiosity or for the mere love of delving in their libraries seeking further information. But the department is primarily for the benefit of the younger generation who are growing up to be pharmacists and to them we now introduce the Quiz Master, commending his section of the ERA to them as an educational aid both interesting and instructive.

#### HOW THEY DO IT IN ENGLAND.

A recent issue of the *London Pharmaceutical Journal* contained the advertisements of three pharmacists who are candidates for election to the Pharmaceutical Council. One announcement, made by the president of the Thames Valley District Druggists' Association, occupies an entire page and sets forth clearly and in detail to the members of the British Pharmaceutical Association his views upon subjects that will likely come before the council. The other advertisements are smaller, but urge the support of the members for similar reasons. All are very much

like the cards printed in America by candidates for office at the regular political elections.

At first gasp the custom gives the American more or less of a shock, due perhaps to the prohibition of personal advertising by some of the medical and legal societies as being unethical and therefore unprofessional, but on second thought the declaration of principles set forth in this way through legitimate trade journals by candidates for professional honors seems both proper and sensible, besides being informative and instructive. No better plan could be adopted, probably, to show enthusiastic interest in the welfare of pharmacy, so here is success to the advertisers!

#### PAPERS AT THE STATE ASSOCIATIONS.

This year's crop of valuable papers at meetings of the various State pharmaceutical associations promises to be larger than ever before. The custom of preparing sets of subjects for papers, which is in vogue with many of the associations including Pennsylvania, New York, Wisconsin, Missouri and others, is a very helpful means of inducing members with ideas to break the ice of discussion and contribute their experiences for the benefit of their fellow pharmacists.

New members are often modest and backward and fearing that they may intrude or violate the proprieties in some way remain longer in the background than would be the case if they were given encouragement by their elders to participate in the proceedings. This custom of preparing sets of suitable topics is more than an invitation to prepare papers for consideration; it is at once an incentive to do so and it instructs the new members in the range of subjects that may properly be handled by them for the edification of the attendants at the sessions of the associations.

Federal authorities at Washington appear to have won an even greater victory than was at first apparent in the "Mapleline" misbranding case in which the manufacturers were convicted despite the conceded purity of the product, as reported on page 450 of the ERA of May 13. The defendants have concluded not to appeal from the Chicago decision and have been permitted to brand their food as provided under the Federal regulations. The case is an object lesson of the futility of fighting against the provisions of the National Pure Food and Drugs Act. An interesting account of the suit will appear in the June number of *The Soda Fountain*.

General regret will be felt for the death of Joseph Long at his home in Sherman, Texas, for people were at last beginning to appreciate the great value of the medicinal plant cultivation experiments which had been conducted during the last few years by this patient, modest and unassuming citizen. The seeds sown by Mr. Long will in more ways than one form a monument of his devotion to practical theories for the elucidation of which he was peculiarly fitted by the traits of character which we have mentioned.

That Arkansas University is to have a chair of pharmacy is a fresh indication of the tendency of State educational institutions to recognize the importance of pharmacy as a profession and the necessity of providing for the instruction of students who are attracted by its possibilities both professionally and commercially.

O'Neill, Neb., is going to put a stigma on all druggists who make a practice of selling liquor except upon legitimate physicians' prescriptions. In doing so the drug stores that offend

will be placed in the beer and whisky saloon class and will be compelled to pay the full license fees which are collected from grogeries. There will be no chance for masquerading and the druggists who cut out the grog end will be the ultimate winners.

Approval by Governor Hughes of the Act of the Legislature converting the springs of Saratoga into a State park or reservation, with provision for a bond issue of \$600,000 to cover the cost of purchasing the necessary land, means that New York State will have a great spa which should equal if not eclipse similar resorts in Europe and elsewhere. Pharmacists in Saratoga County have been active in promoting this public improvement and are to be congratulated upon the success of their efforts.

When a woman buries a husband who was an invalid for ten years you cannot blame her for looking for a second husband among doctors, druggists or millionaires.

It is better business to be held up by your customers once in a while than to hold your customers up all the time.

Prof. A. B. Stevens, of the University of Michigan School of Pharmacy, whose features are delineated on this page of the ERA, has long been known both as a practical pharmacist and an educator. Recently, however, he has further extended his acquaintance by his work in the American Chemical Society as chief abstractor in charge of pharmaceutical literature used in the society's publications. As chairman of a committee he has appealed to the pharmaceutical chemists of the country upon the advisability of forming a division of pharmaceutical chemistry of the American Chemical Society, and his advocacy of the plan is now being discussed with considerable interest by pharmacists, not all of whom seem to be in favor of the scheme. But whatever may be the outcome, the motive which has prompted Professor Stevens and the members of his committee cannot be construed to mean that the work of the A.Ph.A. has not been satisfactory, or that its membership fails to take a sufficient cognizance of this important branch of chemical work. There is no doubt that if such a division of the society is established that there will be drawn into it many pharmaceutical chemists who are not now members of the older organization.

Professor Stevens has long been known as one of the earnest and hard-working men in pharmacy and but few so ardently desired to place the calling upon a broad and solid basis. Graduating from the University of Michigan in 1875, he opened a store of his own in Detroit which he conducted with success until 1887, when he was called to take the chair of practical pharmacy in his alma mater. While in the retail business he served as first president of the Detroit Pharmaceutical society. In 1894 he filled the presidential chair of the Michigan Pharmaceutical Association, an organization in which he still feels no small degree of interest and of pride. In 1905 he returned from a two years' absence in Europe, taking the degree of doctor of philosophy in the meantime, his major study being pharmacognosy under the directorship of Professor Tschirch in the University of Berne. Dr. Stevens has been a frequent contributor to pharmaceutical literature.

Aeronauts are already gathering for the "Aviation Week," which is to be held near Rheims in Champagne from August 22 to 29. The field chosen is the military ground in the Plain of Betheny. Over \$40,000 in prizes will be given during the week.

Nothing so important has ever taken place in the history of aeronautics since the first men began to fly. There will be all kinds of competitions—for height, for speed, for turns, landing contests for spherical balloons, prizes for the aero-

plane carrying the largest number of passengers. The chief event will be the competition for the International Cup of Aviation, which is the Derby of the Air. The stewards of the meeting are all French, but contestants from almost all parts of Europe have already entered.

Another "sausage scandal" has been engaging the attention of the Criminal Court in Berlin. A sausage maker named Loewy, in a very large way of business, has been fined \$250 for transporting enormous quantities of sausages made of horse flesh to Munich, Gottingen, Brunswick and other places famous for the manufacture of the higher class sausages, having them dressed up there, and forwarding them as the real article all over Germany and to foreign countries as well.

Teacher: "What do you mean by the 'quick and the dead'?"

Boy: "Well, the quick get out of the way of the motor-cars, and the dead don't!"—*June Lippincott's*.

Lack of public demand for pasteurized milk has caused the discontinuance of the use of pasteurized machines by many of the milk companies and one of the largest experimental plants in New York City is now being dismantled. It was only a months ago that the

agitation concerning the heating and cooling of milk was the cause of hasty preparations on the part of certain firms to meet the applications for the specially treated milk which they believed to be imminent. For a time there was evidence of such a demand, and that certain of the companies have found there is no longer any such feverish anxiety over the milk question is evidenced by the fact that costly apparatus which was made for the pasteurizing process is now lying idle.

On the other hand, the merits of pasteurization are being freely urged by several of the large corporations which have invested considerable sums in apparatus and are charging an enhanced price for the product, which has the neatly printed guarantee of innocuousness on the paper cap. The constant agitation of the supposed necessity of pasteurization was depended upon to induce the public to insist upon a brand that has known a heat of at least 150° F.

By the companies and firms which have been obliged on account of the falling off of the public demand to discontinue pasteurization the whole matter is looked upon in accordance with business principles. An official of one of the largest companies said:

"We simply discontinued the process because many of our important customers declared they did not wish to have their milk treated. The question of expense was not considered, for we could very easily pasteurize all the milk and would not lose anything through the introduction of more apparatus."

"There is a certain taste in milk which is destroyed by pasteurization. Raw milk must have that rich flavor which is so characteristic or it cannot be sold. The pasteurization kills that taste."

"For business reasons, if the public insisted upon it we would supply the pasteurized article, although we would much prefer to sell the raw material and let the mothers pasteurize it to suit themselves."

The Berlin Medical Society states in its report on appendicitis, that the number of the cases is markedly increasing, and that in the city of Berlin the number has doubled within less than ten years.

Sweet—What is meant by the grave and the gay?

Weeks—Must refer to that deceased octogenarian and his pretty young widow.

Professor Wolff announced at the last meeting of the Berlin Medical Society, that photography by means of Roentgen rays

Prof. A. B. STEVENS,  
University of Michigan, Ann Arbor.

is the most reliable method known of diagnosing tuberculosis in the very first stages. In cases in which the usual symptoms of incipient tuberculosis, such as loss of weight, night sweats, and irregular breathing do not occur, the Roentgen photograph indicates the slightest change in the lung tissue with absolute accuracy. This method of diagnosing the dread disease has even superseded the serum injection with tuberculin, which, until now, has been considered almost infallible.

But numerous cases have recently been recorded in which the reaction from the use of tuberculin showed negative results, and nevertheless, a slight affection of the lungs had already taken place. A Roentgen photograph, however, leaves absolutely no doubt as to the presence of tubercular germs, and if they are not pictured on the negative, there need be no cause for alarm.

Dr. Wolf urged the practical application of this photographic method in all cases of lung catarrh which had given the slightest cause for suspecting tuberculosis, as the safest preventive. Numerous lantern slides illustrated the successful experiments that had been made.

He (passionately)—I never have loved before.

She—Dear me! And you're almost twenty-one, too. How your education has been neglected, hasn't it?

"That boy," said the second-hand book dealer, nodding toward a freckled-faced lad swishing a feather duster around promiscuously, "is a wonder in his way."

"Well, I don't care what he is in his way," responded a testy customer who frequented the shop, according to the Chicago *Inter Ocean*, "so long as he doesn't get in mine, which he does every time he can."

"I know, I know," sighed the dealer, "but what am I to do? He is my only stepson and he's got to have a job. Yesterday I gave him a copy of 'Dr. Syntax' to put where it belonged and did he do it? Oh, yes, he did it—nit. I found it today over there among those books marked 'Medical.'"

The testy customer grunted with a sort of satisfaction.

"But that is nothing to what he did a month ago," the dealer went on. "One day he came to me with a copy of 'The Reign of Law' and asked where he should put it. 'Don't you know where it should go?' said I, provoked that a boy of his size didn't know a novel by the feel of it. 'I wasn't sure,' said he, 'whether it ought to go under the head of 'Meteorological' or 'Legal.' Now, what do you think of that? He ought to know enough to go in out of the rain, oughtn't he?'"

The testy customer grunted again and chuckled.

"Let him alone, let him alone," he said. "He'll be a fine lawyer one of these days."

Teachers throughout the country have been invited by the United States Forester to co-operate with the Forest Service in an effort to obtain more definite knowledge of the characteristics of the most important forest trees of the United States. To do this it will be necessary to obtain a large number of volunteer observers who will collect material on the time of leafing, blossoming and fruiting of the various kinds of forest trees. On request, the Forest Service will be glad to send forms upon which to record data and a pamphlet containing full instructions as to the nature of the observations and how they are to be made.

President Taft delivered two addresses at the Howard University last week, one to the graduating class and the other at the laying of the corner-stone of the university library building, which is to be constructed with money given by Andrew Carnegie. The President at the corner-stone laying insisted on spreading mortar all over the top of the massive piece of granite. A silver trowel was handed him to perform this service. Much to the amusement of the crowd he dipped the trowel into a bucket at least 20 times, leaving little for the masons who were assigned to the task.

"Come up here, Ballinger," he said, addressing the Secretary of the Interior, "and help me out with this job."

Secretary Ballinger smiled, shook his head and left his chief finish the work.

Here is a translation of one of M. Perrin's fables. Perrin, says the Cincinnati *Commercial Tribune*, was a French author who lived many years ago. His little fables, popular a hundred years ago and much used in schools, are frequently ex-

cellent, although they seem to have been forgotten of late years. This one is entitled "The Carpenter and the Ape":

An Ape sat attentively watching a Carpenter who was splitting a piece of wood by means of two wedges, which he drove alternatively into the split. The Carpenter went to dinner, leaving his work nearly finished. The Ape, wishing to become a wood splitter itself, went up to the piece of wood and took out one wedge without putting in the other, in such a manner that the wood, no longer having anything to hold it apart, closed together again quickly, catching the foolish Ape by the two forepaws and holding it there until the Carpenter came back. He, without ceremony, knocked the Ape down for having meddled with his work.

Never meddle in the affairs of others without taking a great deal of precaution.

Lord George Hamilton, presiding at a meeting of the London Municipal Society, declared that the conditions in certain large English towns were producing a degenerate class, both morally and physically, and that unless this could be stopped our position among the great nations of the world must be a declining one.

Now sing a song of summertime

And raise a joyful shout—

The season of the speckled boy

And of the freckled trout.

—June Lippincott's.

*Tobacco* records that Julia O'Brien, who died recently at St. Francis Home and who had lived to be 103 years old, attributed her long life to her regular devotion to her pipe for more than three-quarters of a century. Mrs. Nellie Ryan, at 105, gave similar testimony in West Hoboken a few days ago. Other recent witnesses to the same purpose were Aunt Loria Cox, aged 106, of Bangor, Me., and the Señora Lugarda de la Rodega, aged 129, whose home was near Los Angeles. This association of tobacco and years for femininity has reached as far as the country is wide.

Possibly the daily newspapers scoffed with too ready courtesy the other day at Dr. Rachel Skidelsky's prescription of cigarettes for woman's nerves, says *Tobacco*. For this practitioner's sole mistake may have been that she did not go the whole smoke and name the pipe instead of the cigarette.

"Is it possible, doctor," asked the garrulous widow, "that one can be talked to death?"

"Certainly, madam. Have you not buried three husbands yourself?"

"I have often wondered," said a man who rambles all over town looking for bargains, according to the Boston *Herald*, "how the small merchants in the side streets and out of the retail districts manage to make their living. I know something about it now."

"A year ago I went into a little store to buy an article that cost me 12 cents when I finally got it. The first time I made my want known the merchant said that he had never kept the article, although it was in his line. He thanked me for calling his attention to it. He supposed that would not do me any good, but he would get it, for the chances were that some one else would ask for it."

"I did not call again for several days, and when I did I went out of my way ten blocks. He knew me as soon as I entered his store. He said he ordered the article and expected it any day. He asked me to leave my address, saying that he would send the article as soon as he received it."

"What was the result? I have been going out of my way ever since for anything in his line just because the merchant had been so obliging. We became very well acquainted and one day I told him how I had become one of his customers."

"Why," he replied, "that is the way I get my trade. If I didn't try to accommodate people who came in here I would have had to close up my place long ago."

An attentive clerk is desirable if his attention is exclusively imparted to all patrons, but not if it is bestowed givenly upon pet patrons among the dear girls.

Some druggists can generate almost enough gas with their mouths to charge a soda fountain.

**A MONTHLY SERIES OF PRACTICAL AND EDUCATIONAL QUESTIONS FOR DRUG CLERKS AND STUDENTS, WITH THREE CASH PRIZES EACH MONTH FOR THE MOST CORRECT ANSWERS.**

**Published Weekly with a New Series Each Month**

THREE PRIZES OF \$5.00, \$3.00 and \$2.00 respectively, will be paid each month to the three persons submitting the largest number of correct answers to each series of questions. This competition is open to all who may desire to compete.

ANSWER BY NUMBERS and write your answers upon letter size paper (one side only), with your Name and Address at TOP of each sheet. Also number your sheets.

ALL ANSWERS for each month's series of questions must be with us not later than the 20th of the following month.

WE INVITE our readers to send us their questions for publication in this department; particularly those connected with the practical work of drug clerks.

ALL COMMUNICATIONS relating to this department should be kept separate from other correspondence, and addressed to

### The Quiz Master

Care The Pharmaceutical Era 90 William St., New York

#### June Series 1909.

1—What is the reason for using glass or rubber stoppers for bottles containing Ammonia Water?

2—What is meant by filtration, and of what importance is the process to pharmacists?

3—Why in cleaning pharmacologic utensils is it best to separate those containing oily or greasy substances and wash them separately?

4—What would you dispense, if a customer called for Red Precipitate? Give some of the medicinal uses of this substance.

5—What is the objection to measuring Spirit of Camphor in a graduate wet with water?

6—What is the appearance of Licorice Root, and for what is it used? How does it taste?

7—How much U.S.P. Tincture of Opium would you sell for ten cents, if the retail price upon the stock bottle was marked \$1.50 per Oj?

8—What is the difference in chemical composition between Rochelle Salt and Epsom Salt?

9—How would you prepare a Seidlitz Powder to be taken immediately by a customer in the store?

10—Why is it of special advantage at this time of the year to be posted upon the method of preparation, dose and medicinal uses of Solution of Magnesium Citrate?

11—What is meant by U.S.P. preparations and U.S.P. strength?

12—What two systems of measuring liquids are found upon many graduates used in stores?

#### Druggist Denton Wins Prize.

(From the Springfield, Mo., Leader.)

C. E. Denton, the South street druggist, has received the prize from *The Soda Fountain*, the leading trade paper of the country, offered for the best soda fountain recipe. Mr. Denton won it on his Frozen Coconut Ball formula, over a large number of competitors.

Frozen Coconut Ball is one of Denton's popular specialties and has from the start been a favorite with Springfield people.

A little temper now and then is helpful to the best of men.

## The Antidote Factory.

By Emma Gary Wallace.

It was a balmy spring morning. The soft clear sunshine searched out the dusty, cobwebby office corners and by very contrast showed the dingy, work-a-day shabbiness of it all.

The click and rumble of the presses came through the frequently opened door; the building vibrated dully but uneasily. The City Editor was out of sorts. Inwardly he protested against the necessity for work on such a glorious day; audibly his remarks were tinged with biting sarcasm.

"A lady of leisure, eh, Miss Calamus," he remarked laconically, as he strolled along by her desk, "well, here is an assignment for you. We must have something local and newsy for the Sunday edition; do not return until you have secured it. We haven't given the druggist-people any attention for some time, and the advertising manager has just reported that a couple of our biggest medicine contracts are about up. He intimates that the right articles at this juncture will clinch the renewals. Get the point?"

Miss Calamus nodded.

"At the Club last night, a hint was dropped about an Antidote Factory that was being run out on the edge of Nowhere. Locate it and write it up."

Miss Calamus adjusted an immense hat before a tiny mirror, drew on her gloves and sallied forth. She had not the remotest idea in which direction to head, so she entered her favorite pharmacy and called for a glass of soda water.

"Do you happen to know of an Antidote Specialist in the city?" she inquired politely as she sipped her beverage with evident relish.

The soda dispenser grinned. "I've heard of such a person or place out at the end of the Bloomingdale street car line," he responded, "haven't had occasion to go there myself as yet though."

Miss Calamus smiled amiably. She had found her clue. Something like an hour later, as the Bloomingdale car slowed down near the end of the road, the conductor began banging the seats over noisily.

"Do you happen to know of a drug store in this neighborhood?" she inquired between the bangs.

"You don't mean the Antidote Factory, do you?" the man returned, pausing with a half-turned seat in his hand.

The reporter from the *Search-Light* assented eagerly.

"You follow this here street until you come to that there tall building yonder, then turn to the right. It is just around the corner."

The motorman eyed her curiously. "You can't miss it, lady," he assured her, "it is just around that corner."

"Spirit of Jupiter!" he ejaculated, as he watched the girl walking briskly away in the direction indicated. "Who would ever suppose she needed an antidote for anything."

"Maybe it is for some of her folks," the conductor ventured, "sort of absent-treatment like, you know."

"With a Fluffy Ruffles like that, it is more likely to be a case of heart-trouble of her own," he chuckled as he made preparations to start.

The reporter had reached the yellow building and turned the corner. Unexpected signs of activity met her. People whose appearance proclaimed them residents of other localities were coming and going. Several automobiles waited in front of the small drug store which boasted but one nine-pane window. The sole decoration of this window was a large card which bore the singular announcement:

ANTIDOTES OF ALL KINDS  
CONSTANTLY IN STOCK

Without further hesitation the girl opened the door and entered. The store was surprisingly roomy, well-stocked and as neat as a new pin. Evidence of the personality of a master-hand were immediately felt as well as seen. A cus-

tomers was being waited on by a slender, scholarly appearing man with clear, blue-gray eyes, finely chiseled features and head noticeably high above the ears. Others were in line and so the *Search-Light's* ambassador would be compelled to wait her turn.

"I should like," the customer said anxiously, "an antidote for the deadly habit of putting off until tomorrow the duty to which I ought to attend today."

The man behind the counter looked grave.

"I have the remedy," he said, "but the directions and requirements are so exacting that few who have contracted this unfortunate habit can ever be induced to persevere in its cure."

"But," complained the customer, "the habit has cost me some of the finest opportunities of my life. The advantage it has given the other fellow has always enabled him to outdo me. No matter how painstakingly I plan my business moves, some one else is sure to be just enough ahead, so that it appears that I am always the follower and never the leader."

"The remedy," the Apothecary said, "lies in the daily administration of the given number of units of this wonderful serum of Will-Power. The system assimilates it and changes it into Decision and Initiative. After you have used the contents of this tube the remedy hereafter lies within yourself, never without. Your success depends upon what you actually do, not upon what you plan to do, or even what you think you can do."

"I'll try it," the man said earnestly, as he took his medicine and turned slowly away.

A little, thin, sharp-featured woman stepped up to the counter next.

"I want an antidote for worry," she said crisply. "my husband has never amounted to a great deal, and I expect he never will. I've worried steady night and day for the last fifty years, and it hasn't done a mite of good. Now I have got so in the habit of it that I cannot help it. I worry for fear we'll come to want. I worry for fear he'll lose his place. I worry for fear the house will burn and the company refuse to pay the insurance, though why I should care, I don't know, with as crusty a landlord as we have. It is getting on my nerves, and I want an antidote."

The man behind the counter looked at her sadly. "This is serious, most serious," he declared. "You have children?"

"Lots of 'em."

"I suppose you fret and scold?"

"Can't help it," the woman snapped, "and my husband is mean enough to insist that scolding or nagging, as he calls it, is just a woman's way of swearing. No wonder I am worried to death."

"My dear woman," the Apothecary cried in a distressed tone, "I fear your case is chronic, and it will take a very long time to effect any marked improvement. Worry belongs to a most unlovely brood, of which impatience, anger, unjust estimates of others, envy and hatred are also members. They were all hatched out by the old hen Fear. Excuse me, but you are largely responsible for your partner's failure in life."

"I'd like to know how," she demanded. "I've urged that man to do different, no matter what he did. I made a point to urge that he do something different, and if I do say it as shouldn't, he never has got a bit conceited. I've kept right on showing him what we'd most likely come to. I'm discouraged."

"Doubtless he is, too," the Antidote maker responded dryly. "When your children went to school how were they instructed in the art of writing?"

"Why, by means of copies, and every last one of 'em writes a different hand. Some round, some vertical, some angular, and some with a queer, tipsy slant. Just as that particular teacher happened to write."

"Exactly." They initiated the copy or picture presented for them to follow, and my good woman, your husband has done the same. Your copy was continually before him, and it was a copy in some form of Fear. Fear of failure. Fear of poverty. Fear of everything until you both became hypnotized by its ugly form. Worry is no virtue, it is rather a grievous fault. I have here the antidote. It is the combined essences of Courage, Absolute Justice to all, and Optimism. Take this as directed three times a day, and when the deadly attacks are imminent do not hesitate to repeat with greater frequency. When you have absorbed this medicine into your

system, it will cause you to change the copy you are setting for those about you. Remember that the remedy lies within—it is the assembling of the elements of success. *It is what you are, not what you think you are.*"

The woman moved away without a word. There was a dazed look on her face as of being awakened from unpleasant sleep.

The next customer was a pale man with the many lines and curves of his face sagging heavily downward.

"I am a brother-in-arms," he said frankly, "I came out of curiosity, but I am interested, and I want an antidote for the effect of long hours, a remedy for the treadmill of the druggist's endless work. Our clerks leave us for positions with greater promise of leisure, and we are always strangers to our own families."

The Apothecary smiled as he extended his hand in cordial fraternal greeting. "I found the remedy some time ago, purely by accident. I prepare it in pill form. I will gladly give you the formula. Five grains of Independence of Action, two grains of Ability to Organize, two grains of Enthusiasm and one grain of the solid extract of Letting-go. *It is not enough to know what ought to be done, it is the doing that counts.*"

The next customer had been waiting for some time before the show case of toilet articles. She was noticeably plain, and deep scars marred the smoothness of her countenance.

"I desire an antidote for extreme plainness," she said in a low tone. "I am so tired being common-place, I long to be beautiful and popular."

The Antidote maker looked at her keenly as he handed her a semi-transparent porcelain jar. "I doubt me if you need anything of the kind," he said, "are you not the druggist's widow who came to us when we were poor, and alone—strangers in a strange place? Was it not you who nursed our little maid Caledula back to life? Was it not you, who gave of your own smooth, white skin to save that young mother's life who had been so fearfully burned?"

The customer did not reply, but the tears trembled upon unusually long, silken lashes.

"I was sure you were she," the man said simply. "The cerate which I have given you is Self-Appreciation. Few, very few need it. Apply it to your beautiful scars and remember that beauty is vastly more than skin deep. True beauty lies within, not without. *It is sweetness of purpose and unselfishness of service, which in the long run count, not simply admiration for these qualities.*"

The woman was no longer stooped and old. She went forth with head erect and eyes shining. She had found her antidote.

The reporter for the *Search-Light* came next.

"There is a man in our office," she said, "one of those in authority, and he has the most disagreeable temper. I'd like to get an antidote for his failing."

The Apothecary smiled happily. "Funny," he said, "but no one ever came for an antidote for bad temper for themselves. It is always some one else, and unfortunately my remedies are efficacious only when given direct. But how about, yourself—what about your own disposition?"

Miss Calanus smiled and blushed. "Why they used to say that it was fairly sweet, but of late the business I am in wears upon me, and the man of whom I spoke does not seem to realize that to get the most out of his help, he ought to make them feel the joy of a common interest, and the enthusiasm of real progress. He delights in making every one feel a groveling inferiority." Evident the reporter had a grievance.

The Apothecary smiled. "I have a room," he said, "into which I'll ask you to step, excuse me while I call my wife, she always assists me when I am obliged to use the Chamber of Emotions. It is well that no others await me."

An elderly woman with a face of singular charm immediately appeared. Together they entered a small room, completely lined with sheets of lead. The Antidote maker explained that electric conductors passed through a galvanometer and at a point below entered the earth. The galvanometer was so adjusted and so sensitive that the electric discharges from the mind could be accurately measured—joy, grief, anger, pleasure, anticipation and regret.

"I am sorry to be compelled to tell you," the operator explained, "that irritability, indignation and impatience are all varying forms and degrees of anger. The instrument here

measures these degrees so that the physician may prescribe accurately, for you must know that the emanations of an angry person are deadly poison. Violent angers causes curious pathological changes. An angry mother has killed her nursing babe, unreasoning anger has been known to destroy hearing, even life itself. Ah, you are simply irritable, you need a preventive remedy. If you could but see some one in this Chamber highly excited, I am sure the object lesson would be sufficient. The damage wrought is invariably way out of proportion to the cause.

"As it is, you must be fitted with glasses, the lenses of which will enable you to detect the false from the true, the weakening points of habit from the strengthening ones, and remember the true source of vision lies within, not without. Every temptation resisted adds the very strength of the temptation to your own resistive powers."

"The price?" Miss Calamus asked quietly, as she stepped from the lead-lined Chamber.

"It is without money and without price," the Antidote maker responded. "The profits of my regular business are more than sufficient, and the Antidote research is merely my philanthropic side-line."

Just before noon Miss Calamus entered the office of the *Search-Light*. The City Editor looked surprised to see her so soon. He frowned, but a second look at the face of the reporter did not betoken failure on her part.

"Well," he remarked brusquely, "I don't suppose you got an item worth a pica-yune, did you?"

The little reporter only settled her glasses in place, and smiled at the rasping tone, as she passed over the notes she had made on her way back to town.

The City Editor's eyes sparkled.

"Good," he exclaimed. "Great. Counter-prescribing, eh. We can rub it into the whole lot of them on that score. That ought to hold the advertising of the Cut-Rate Health Institute and the Woolscrap Remedy Company. Not many would have twigged this as I did. Nothing like a nose for news. I'll send Sam out this afternoon to get some pictures of the place. Really, Miss Calamus, you have done very well—that is, for you."

#### Frank J. Herty, Ph.G., Goes to Mobile.

WASHINGTON, May 22.—Frank J. Herty, Ph.G., for more than four years senior pharmacist at the Hygienic Laboratory of the Public Health and Marine Hospital Service, was given an unusual surprise Thursday when he was requested to see some people in the newly completed library of the laboratory. He found there the chiefs of the several divisions and their assistants and learned that they had gathered to express to him their appreciation of his services and to assure him of their esteem and respect. As a tangible evidence of this appreciation he was presented with an elaborately fitted traveling bag.

Mr. Herty has been in the service since 1895 and has served successively at Savannah, Ga.; in Porto Rico, at Vineyard Haven, Boston, and since 1904, at the Hygienic Laboratory, Washington. He has been relieved from duty at this station and ordered to report at the Public Health and Marine Hospital Service station at Mobile. Having been born and raised in the "Cotton States," this order meets his approval, though his associates at the laboratory might perhaps feel slighted at the alacrity displayed by him in accepting the new post.

#### Graduates of University of Minnesota.

ST. PAUL, May 29.—Following is the graduating class of the College of Pharmacy of the University of Minnesota:

Emil M. Biddle, Calvin Guy Bangbee, Hans Christian Colby, Archie George Doty, Charles Oscar Dressner, William Alexander Erickson, Theodore W. Fratzke, Nathalia L. Gjerdengen, Everhard Louise Green, Joseph E. Hawlish, Horace Leonard Hamilton, Walter G. Hohn, Elmer Lawrence Hovedt, M. Grace Heath, Albert Edward Kleinboizen, Albert J. Leikvold, Emil Louie Lyman, Hazel Maxwell, Agnes C. Peyton, Nelson William Root, Carl Randolph Rierson, Arthur Frederick Sievert, Harry W. Spieldel, Harold Arthur Tyrholm.

#### Too Much of It.

The Doctor—So there's bad blood between you and the new cook already, is there?

The Professor—Well, to tell the truth, she does serve the steak too rare.

## Human Icebergs.

By Joel Blanc.

he is, a regular iceberg. He never gives me a word of praise. Why should I praise him, and perhaps get sat on for my trouble?"

This is an illustration of everyday relations between men, not only between employers and employed but between fathers and sons, professional coworkers and between business partners. The icebergs drift over the seas of life and instead of being melted and blended in the sun-warmed waters, the warm currents turn cold and all humanity suffers.

In the case which the foregoing incident illustrates, I know that the "iceberg" is really a man of warm sympathies, tender emotions and generous instincts. Like many others, his nature is that of a commercial and social duality. The most prominent of his dual selves is coldly emotionless and therefore seemingly hard. Possibly his father was one of that large class of parents who erroneously believe that a child's character should be forged instead of molded; one of those who do not realize that it takes a strong father to praise his own child, and even a stronger one to apologize to his own son.

The majority of those men who are known as "cold propositions" are in fact yearning for a little praise and longing for that which they themselves do not know how to give. The few words of commendation that come to them are so scattered through the years that when such sun-halts do pierce their cold exteriors they do not know how to express themselves, and the warm ripples that for a moment have laved the boundaries of their souls are chilled and recede before they can be reflected from either lip or eye. This is peculiarly and pathetically true of those who, from wrong training in earlier life, have been led to cultivate a frigid business exterior, when in social life their true kindness of disposition is ever in evidence. Of all humanity there is none who tread a darker path than that they follow. Of all the things that man can give to man there is nothing so empty, so pathetically sad, as loveless respect.

Whether they be bonds of blood or only those of financial counterpoint of dependence that join the one or more to the human iceberg, his path, especially in the commercial world, is one of sombre solitude. Massive and grand, reflecting his own mental proportions in the self-gathered clouds above him and in the self-created currents of the waters that surround him, he drifts on in his loneliness, drawing others in his wake but gathering none into the ice-walled, yet warm, cavern of his heart.

Once I stood upon the deck of a ship and watched a giant iceberg as it drifted by. Like a mountain of veined onyx it majestically drifted southward. Hardly a ripple did it make as it rose and fell upon the Atlantic's swelling bosom, but the might of its weight, the force of its cold power awed me and with that awe there came a sense of fear; yet I knew that as that iceberg drifted gulward it would slowly, almost imperceptibly and yet surely disappear. Its power exerted for no good, its weight bearing no virtue, even until the last crystal of it was blended in its Creator's waters it would be ice—nothing but ice! Majestic, yet fearful, brilliant, yet mournful—ice; nothing but ice!

And so do these men of ice drift o'er the commercial seas.

Upon their frozen lives may be often reflected the mirage of success. Wealth may be theirs, the scepter of deserved power may rest within their hands, their lives may be pure and clean; they may be masters of their passions and worthy in their pleasures; and yet they command only honor without love, fear merited in pity. Onward they drift, and yet until the last drop of blood has ceased to circulate, until that incalculable something called Soul is again blended in the All from which it came they are ice, only ice! Pity them!

Thousands of others have used pen and lip to condemn these human icebergs. Millions have unwarrantedly feared them—and few have loved them! Every continent has acknowledged their power, every age has followed their lead, but few have walked hand in hand with them and none have laughed, loved and lived for them! Mine be the purpose to appeal for them. I plead for light and love for them.

If we will but compare them with instances of sad childhood which we see about us, with the struggles of youth in the world's glare, with the sorrows of early manhood and the bitterness of age, with the Nation nurtured greed for gold, we can but wonder that the heart of humanity is really as warm as it is and that there are so few human icebergs.

We do not know how cruel, how dissipated or how miserly the parents of such a one may have been. We may not be able to imagine how the man was scourged by a taskmaster in the early school of adversity. We do not know how bare a pittance may have been the only offering from one who was even colder than he himself has ever been. We do know, that some time, somewhere, when the years were few, when character was forming, that great Error crept into his being, that it shrivelled, compressed and embittered him and now, when he longs for the light of love, he does not know how to seek it, or how to accept it when it is proffered.

We do not illumine our light-houses to guide the mariner 'neath the clear noon sky; we do not light a candle to look for sunbeams, yet we carry the light of our lives to where light is and we take the warmth of our love to where the flame of love is burning. Natural this may be and not unpraiseworthy, but can we not turn our illumined faces toward and reflect the love-light into the dark places, even though those dark places be the crags and hollows of great mountains of ice that tower above and control us? If we dash our tears of disappointment, resentment and anger against these icebergs we but add the ice of frozen tears; but if we send our sunbeams of love upon them, even though they be but needles of light against mountains of ice, the surfaces are at least softened in tiny spots. Nor can we tell how far or how deep the sunbeam may penetrate into the heart of the ice. It may be reflected from plane to icy crag and thrown from one to another of many clouded mirrors of a frozen soul, each of which may be a magnifying lens, a burning glass. And the last reflection may turn the tiny sunbeam to a flame that will burn in, and for the first time in years it will illumine the real, the better heart of the man.

If we will persistently and yet gently throw our sunbeams of fraternal love upon just one of these human icebergs we will surely help ourselves and be repaid. Though the man of ice may not turn a brighter, kinder side to us, it may be that he will reflect our sunbeams into even darker lives than his own and at last return them to us as halos of refulgent glory.

It is so easy to criticize, so simple to abuse. Oaths live on the lips, but laughter must be gathered from the entire being. If, even only occasionally, we can turn anger to pity, hate to love, we do so much to keep ourselves from the regions of heart-cold, which even the best of us will sometimes reach. Let us try to remember that it is not always those who are materially beneath us that most need our help. I sometimes think that when the Master said: "A little child shall lead them" that he may have had in mind, among others, those who o'ershadow us in power and station and in material possessions, and yet who in many ways may be sad-hearted, lonesome, pitiful children. So, though they may lead us o'er the money-paved highways of life, it is for us to lead them in quiet paths to cool springs of manly love. We who have found something brighter than gold should persistently, unselfishly and patiently reflect its rays upon the human icebergs so that they may know from us the joy of mingling in the warm Gulf streams of life and not let one of them drift into the silent river, while still an iceberg.

## Original and Selected

### THE STANDARDIZATION OF ERGOT.

The Scientific Section of the Philadelphia Branch of the American Pharmaceutical Association devoted its second meeting exclusively to the consideration of ergot. Dr. Clarence A. Hofer and Dr. H. C. Wood, Jr., who have been investigating the intricate problems of ergot for some months, presenting the results of their research.

Dr. Hofer spoke of "The Standardization of Ergot Physiologically." He outlined the physiological constituents and their difference in activity. The unreliability of the cockcomb test was referred to and the details of his experiments given to warrant the conclusion that it could not be intelligently used. The method recommended for standardization is based upon the continued rise of blood pressure, using dogs, weighing five to ten kilograms.

The dog is given, hypodermically, about 0.05 gm. of morphine sulphate and five minutes later lightly etherized for operation. The ether is removed and the cannulas are put in place. After ten minutes, if the blood pressure is constant, he said, a quantity of the specimen is injected into the external jugular vein and the blood pressure observed for at least ten minutes. If no marked rise of pressure follows this dose, another dog should be given an injection twice as large.

Three or four tests on each specimen, he explained, should be made, and the average rise of the pressure, ten minutes after the intravenous injection, taken as the figure of potency; an elevation of 25 mm. or more, may be provisionally accepted as the standard for an active preparation. Many charts and actual tracings were shown to illustrate the method.

Dr. H. C. Wood, Jr., presented "A Chemical Method for the Assay of Ergot," and stated that some chemical method was desired because of ease of application and the estimation of some definite active principle. He was inclined to believe that the measure of the active desirable principle was sphacelic acid, a resinous principle, and proposed the following simple method of extraction for its estimation:

Ten cubic centimeters of the fluidextract are diluted with 20 cc. of water and shaken with several 10 cc. portions of benzol, until the benzol is colorless. Three or four extractions are usually sufficient. The benzol is evaporated to dryness, carefully dried at about 40° C., and the residue weighed.

The results of the blood pressure, physiological method, and the above chemical method, compare very favorably.

The main objection to the chemical method, he said, was that the residue, after extraction with benzol, is not absolutely inert, but this may be caused by other principles of minor importance. The resinous extract is a golden-yellow color, but on standing three or four days in dilute alcohol becomes green and is still active, the green resin may be a purer form.

Tests for the resin have been tried. With dilute sodium hydroxide and boiling, a cherry-pink is produced and later becomes brick-red corresponding to the properties Jacoby attributed to sphacelotoxin. While this method is not ideal, the results obtained by it seem to be comparable with the results obtained by the physiological method.

Prof. C. E. Vanderkleed read a paper on "Some Notes on Testing Ergot." He first defined the objection of pharmaceutical testing as a means of measuring therapeutic activity. While many methods used may be properly criticized, he said, the present methods must be used until more accurate ones are devised. The process of evolution is proceeding rapidly. The three important reasons of testing were given as follows: 1. Any method that determines some chemical principle capable of being estimated, and which bears a definite relation to the physiological action is valuable. 2. To guard against toxicity and inertness. 3. To value commercial drugs.

These tests may be made by two important methods, chemically or biologically.

"In the assay of ergot," continued Dr. Vanderkleed, "many methods have been suggested. The total extractive has been long proposed, but it may easily be shown that inert drug gives about the same amount of extractive as the potent drug. The Swiss Pharmacopoeia states that the fluidextract should contain 10 per cent of extractive, but this is required perhaps

only to insure the total extraction by the menstruum used. The total alkaloids have been determined and recommended as a method of value. Englehardt proposes the slight modification of shaking the drug with an extra portion of ether in an acid solution.

"Various physiological methods have been proposed, as the method of Houghton. Many competent pharmacologists recognize the unreliability of the cockscomb as a quantitative test, but believe it is an excellent qualitative indication of activity. Dr. Crawford says it leaves much to be desired. Dr. Edmunds thinks the gap between man and chicken is too wide for comparison of results. The results obtained with the total alkaloid method have been compared with the cockscomb method and the chemical method of Dr. Wood's has been compared with the blood pressure method, but all of the methods have been compared along with the direct action on the uterus."

Reference was also made to the work of Dohme and Crawford and the more recent work of Barger, Carr, Dale, Vallden and Kratz. Barger and Dale, he said, think that the proportion of ergotine and ergotoxin exist in a constant proportion of three of the former and one of the latter, and that the estimation of either constituent is advantageous.

A table was presented, showing the relation of the cockscomb test to the total alkaloid method. A series of very valuable results showing the advantage of other menstrua than the one used in making the U.S. Pharmacopoeia fluid-extract were given as follows: A drug showing 0.2 per cent cornutine was made into fluid-extract by four methods—

(1.) U.S. Pharmacopoeia method. This preparation tested 0.1 per cent of cornutine and contained 15.5 per cent extractive.

(2.) U.S. Pharmacopoeia, except 75 per cent alcohol was used. This preparation tested 0.16 per cent cornutine and contained 13.8 per cent extractive.

(3.) U.S. Pharmacopoeia method, except that 95 per cent alcohol was used. This preparation tested 0.18 per cent cornutine and contained 6 per cent extractive.

(4.) U.S. Pharmacopoeia method, except drug was at once macerated with 95 per cent alcohol. This preparation tested 0.137 per cent cornutine and contained 15.5 per cent extractive.

These samples are being tested by Dr. Wood both chemically and physiologically.

Dr. Henry Beates, in discussing the papers, said that the whole literature of therapeutics must be revised, for accurate and rational medication can only follow careful research. The practitioner has had to do a great deal of physiological testing at the bedside and found that he has had to depart from empirical methods, if the best results were to be obtained.

#### Druggists Will Have a Room in Doctors' New Building.

BALTIMORE, May 29.—The new building of the Maryland Medical and Chirurgical Faculty, in Cathedral street, was dedicated recently. Some distinguished guests were in attendance, among them Dr. William Osler, regius professor at Oxford. The event is of interest to druggists because of the fact that they were asked to subscribe to the building fund, their allotment being fixed at \$5000. In consideration of contributing this amount they are to enjoy the use of a room in the building for their meetings, and they will also have the benefit of getting into close touch with the medical profession. Dr. G. Milton Linthicum has been chosen president of the faculty.

#### Changes of Faculty at Mercer University.

Macon, Ga., May 29.—Mercer University School of Pharmacy is to lose members of the faculty at the end of the present term, the formal resignation of Prof. M. A. Clark, for five years dean, was sent in to President Jameson, to take effect with the conclusion of the work of the present year. Ben S. Persons, president of the Georgia State Ph.A., who has been a lecturer on materia medica, also leaves this time. A. J. Ayers, who has had active charge of instruction in the school, is already out, having accepted a position in New York.

#### Needed the Money.

"He says he has written a novel with a purpose."

"What is the purpose?"

"I think it is dollars and cents."

#### SNAPSHOT IN DR. STEVENS' OFFICE, ANN ARBOR.

*Prof. Julius O. Schlotterbeck, to the right, is dean of the School of Pharmacy of the University of Michigan. He is calling on Prof. Alvisio B. Stevens (seated behind his desk) of the same department.*

## QUESTION BOX

THE OBJECT of this department is to furnish our subscribers and their clerks with reliable and tried formulas, and to discuss questions relating to practical pharmacy, prescription work, dispensing difficulties, etc. Requests for information are not acknowledged by mail, and ANONYMOUS COMMUNICATIONS RECEIVE NO ATTENTION; neither do we answer questions in this department from non-subscribers.

In this department frequent reference is necessarily made to information published in previous issues of *The Era*. Copies of these may be obtained at 10 cents each, except a few issues which are out of print, for which we charge 25 cents each.

#### Tasteless Castor Oil.

(E. D. Co.)—Various formulas for the so-called "tasteless" castor oil have been printed in previous volumes of this journal. To help you out we reprint the following from the Canadian Formulary:

Glysude .....	7½ grains.
Sodium bicarbonate .....	7½ grains.
Chloroform .....	150 minims.
Oil of pimento .....	75 minims.
Oil of cassia .....	75 minims.
Oil of cloves .....	75 minims.
Castor oil, sufficient to make .....	40 fl. ounces.

Dissolve the glysude (saccharin) in the chloroform; add the sodium bicarbonate, then add the oils (which have been previously mixed) and shake vigorously. As said above, there are other formulas, but this is the only one of an official character that we recall.

#### Elixir of Lactated Pepsin.

(G. G. P.)—"I am enclosing formula for elixir of lactated pepsin. I have made this up in several ways, but on filtering I find the process rather slow, most of the powdered drugs apparently being left on the filter. For this reason I would appreciate a suggestion from you as to the best method of preparing this elixir."

The enclosed formula is as follows:

Powdered pepsin .....	128 grains.
Pancreatin .....	64 grains.
Diatase .....	9 grains.
Muriatic acid .....	6 drops.
Compound tincture of cardamom .....	2 ounces.
Lactic acid .....	12 drops.
Glycerin .....	2 ounces.
Aromatic elixir, enough to make .....	16 ounces.

This formula is a modification of the well-known "compound digestive elixir" of the National Formulary, the prin-

cipal objection to which is that the ferments, pepsin, pancreatin and diastase in liquid combinations mutually destroy one another. This objection was recently emphasized by the members of the Council on Pharmacy and Chemistry of the American Medical Association, who advised its removal from the N.F. Preparations containing the ferments named are claimed by many to have no therapeutic value whatever, yet, notwithstanding this fact, they are extensively prescribed by physicians. The formula submitted contains a greater quantity of alcohol than the N.F. preparation and which, no doubt, interferes with the solution of the ferments. Our advice would be to follow the N.F. formula. Filtration of pepsin solutions is accelerated by the incorporation of purified talc.

#### Carbolic Sheep Dips.

(L. Z. L.)—The following are typical formulas taken from "Pharmaceutical Formulas":

(1)	
Soap .....	1 pound.
Crude carbolic acid .....	1 pint.
Water .....	50 gallons.
Dissolve the soap in a gallon or more of boiling water, add the acid, and stir thoroughly.	

(2)	
Tobacco .....	13½ pounds.
Soda .....	8 pounds.
Freshly slaked lime .....	4 pounds.
Soft soap .....	8 pounds.
Crude carbolic acid (50 per cent) .....	4 pounds.
Water .....	66 gallons.

(3)	
Crude carbolic acid .....	3 pounds.
Caustic lime .....	2 pounds.
Potash .....	6 pounds.
Soft soap .....	6 pounds.
Water .....	70 gallons.
Mix and boil.	

#### Calox Tooth Powder.

(G & G.)—The "oxygen forming principle" in "Calox" tooth powder is calcium peroxide which, in contact with moisture, is claimed to liberate free oxygen. We cannot give you the formula but some information regarding the composition of this tooth powder may be obtained by reference to U. S. Patents Nos. 760,397, granted May 17, 1904, and 802,069, granted October 17, 1905, under which the same is manufactured and which would seem to prevent the use of calcium peroxide in the preparation of dentifrices by any other manufacturer. Trade-marked rights are also claimed in the name "Calox."

Calcium peroxide occurs as a white crystalline powder, almost insoluble in water, and may be kept in a dry state indefinitely. Like some other peroxides, it decomposes with the evolution of oxygen when stirred with water or in contact with organic substances.

#### Wants It Written in English.

P. A. Linnell Company, Superior, Wis., sends to this department the following note which shows the kind of competition some druggists have to meet: "A little girl came into the store and handed in a prescription for 'Perox. Hydrogen, 4 oz.,' with directions. She said, 'Please write this in English, so I can get it filled at the 10-cent store. They can't fill it the way it is written.' A true story; the incident happened today."

#### N.A.R.D. Cost Mark.

(H. D. Co.)—"Please give us the N.A.R.D. cost mark? This is the first time we have had any use for it, several prescriptions having come to us during the last few days with this mark upon them and we are not acquainted with it."

The word adopted by the National Association of Retail Druggists as a cost mark is "pharmaceutical," the several letters in the order in which they appear in the word representing the figures "1, 2, 3, 4, 5," etc. Thus, the amount charged for a prescription marked "mi" would be 50 cents.

#### Youthful Ingenuity.

"I want another box of pills like I got mother yesterday."  
"Did your mother say they were good?"  
"No—but they just fit my air-gun."—*Phlegmatic Blatter.*

## THEORY AND PRACTICE

### Determination of Succinic Acid in Fermented Liquids, in Presence of Other Fixed and Volatile Acids.

The following is recommended as being a rapid and fairly accurate process: A known volume of the solution is treated with a small quantity of gelatin, neutralized with ammonia, acidified with a large excess of acetic acid, and treated with barium chloride. The solution is allowed to stand for a short time to allow of complete precipitation, and then filtered, the filter being subsequently well washed. The filtrate is heated to boiling and treated with a considerable excess of lead acetate, whereby any albuminoid substances and tannins, not precipitated by the gelatin, are thrown out as well as phosphates and tartaric and citric acids, provided that sufficient excess of lead salt has been added; malic and succinic acids, if present, pass into the solution. The solution is now filtered, the filter being washed with water slightly acidified with acetic acid. The filtrate is treated with hydrogen sulphide to remove lead, filtered, then heated to boiling to expel the hydrogen sulphide. The solution, which now contains free malic and succinic acids, is acidified fairly strong with sulphuric acid, and treated while boiling with such an excess of potassium permanganate that at the end of the operation the liquid remains at least five minutes without becoming discolored. In this way malic acid and any trace of tartaric acid are destroyed. The boiling solution is decolorized with a small quantity of potassium bisulphite, the sulphuric acid being removed by a slight excess of barium chloride. The filtered solution is concentrated, made slightly ammoniacal and treated with excess of alcoholic barium bromide and with three volumes of 95 per cent alcohol. The precipitated barium succinate is collected on a filter, washed with alcohol of at least 60 per cent strength and ignited. The amount of barium carbonate thus obtained is then determined with N-10 hydrochloric acid (*Bull. Assoc. Chim. Sucr. et Dist., through Journ. Soc. Chem. Ind.*).

### Alkali, Alkaloid and Chloroform in Mixture.

Wyatt, in a paper read before the Liverpool Chemists' Association recently, gave the following prescription as an example of an extremely dangerous class of mixtures, viz.: those containing an alkali, an alkaloid tincture, and excess of chloroform:

Sodium bicarbonate .....	2 drams.
Oil of cajuput .....	24 minims.
Tincture of nux vomica .....	2 drams.
Comp. tincture of chloroform .....	3 drams.
Glycerin .....	1 ounce.
Water, enough to make .....	6 ounces.

The amount of tincture of chloroform ordered is equal to six drams of spirit of chloroform, fifteen ounces of chloroform water, and this excess of chloroform is capable of falling to the bottom of the bottle and carrying with it in solution the whole of the alkaloids from the tincture of nux vomica, so that the patient by carelessly shaking the mixture might have the whole of these alkaloids at one dose. It is most important to put a "shake" label on these mixtures, and to add a dram or two of acacia mucilage as well, so as to reduce this danger to a minimum.

### Formic Acid as an Impurity in Glacial Acetic Acid.

The occurrence of formic acid as an impurity in glacial acetic acid is frequent; of six samples of "chemically pure" acid examined five contained formic acid up to 0.5 per cent. The best method for determining the amount of the impurity is that of Wegener. Ten cc. of the acid is heated on the water bath with 50 cc. of strong sulphuric acid, which decomposes the formic acid into carbon monoxide and water. The air in the apparatus is first displaced by carbon dioxide and the mixture warmed for an hour. The carbon dioxide is then absorbed by potassium hydroxide. 100 cc. of carbon monoxide are equivalent to 0.2656 gm. of formic acid (*Apoth. Zeit., Pharm. Journ.*).

Every druggist should be a discoverer searching for new fields of effort within the confines of his own store.

# ADVERTISING for DRUGGISTS

## Outdoor Advertising.

This is the season of the year when druggists will do well to give some thought to paint, paste and tacks. Outdoor advertising may be done to advantage by all druggists except those in the very large cities. Wherever there is farmer or suburban trade worth going after, painted, posted and tacked signs are deserving of consideration. Of course there are some who have tried this sort of advertising and declared it "don't pay." The only reply to such a statement is that as in all other advertising, success depends upon how and not upon what is done.

## Card Tacking.

Card signs tacked upon trees, telegraph poles, fences and sheds offer many advertising advantages if the cards are worded, made and placed properly. When cards are so long that they encircle a telegraph pole or tree of corresponding average size, the people driving or walking past them must take both fore and aft views to decipher the lettering, an effort

they will seldom make. No card should be over 12 inches broad if it is to be tacked to a curved surface. If absolutely necessary, the height may be greater than the breadth, but such an enlargement should be made only for the purpose of increasing the size of letters and not to increase their number.

Cards made by the local printer are seldom worth having. The average printer has not the proper stock for sign cards. Tacking cards should be purchased from houses making a specialty of them. Such houses have stock and methods of finishing cards that will stand as much weather wear as a tin sign will. The stock is known as "ironboard." The trouble with most of the tacking cards used by retail merchants is that they contain too much lettering. Such cards should contain only such amount of printing that "those who run may read." Druggists who have been most successful with tacking cards have used those of moderate size and have placed thereon the name of some specialty or leader with only the druggist's name and address below. Thus, "Paris green. The best is at Downer's Drug Store, Mitchellville," or "Balmoline for Sunburn at Hitchen's Pharmacy, Avondale."

Cards should be tacked at a height of from 10 to 15 feet from the ground. Use very large, flat-headed tacks and plenty of them. First place a tack in the center of the top edge, one in corresponding position at the bottom and then stretch the ends tightly and tack them. When tacking large cards use one tack in center of card to prevent "bellying." Avoid white

**WINDOW DISPLAY ILLUSTRATING ADVERTISING OF DRUGGIST'S PREPARATIONS TAKES \$5 PRIZE.**

In the ERA'S Cash Prize Competition this week the judges have awarded the \$5 cash prize in Contest No. 2 to Charles W. Menk, pharmacist, 106 Market street, Newark, N. J. Mr. Menk submitted the accompanying photograph of a window display. He writes as follows: "We are this day mailing you the picture of a window designed and trimmed by C. W. Menk, Jr. In the back was placed a large globe, in front the different barks and roots contained in Sarsaparilla; from each root there extended a ribbon to the country from which the drug was procured. In front of the globe was placed a sign 'The Ingredients for Menk's Sarsaparilla come from all parts of the globe.' Many people stopped to read the names of the roots and then followed the ribbons to see where they came from."

and light shades in card and lettering. Do not have fancy letters or ornaments. Use a plain block letter on a contrasting background. Prime colors are best; violet on red or orange on green are good combinations. Do not use a variety of cards in either colors or wording. The virtue of card advertising lies largely in repetition. It is far better to place the cards thickly along one or two roads than to scatter the same number over the county. As all advertising should be collective and accumulative, it is best to use the cards to advertise some specialty or leader that you are also advertising or planning to advertise in other ways.

When cards are used in towns they should be placed on barns, sheds and high closed fences in preference to placing them upon the single boards of open fences. There is a not uncommon idea that only one card should be tacked upon a single shed or barn. This idea is wrong. It is not wasteful, but on the contrary, adds to effectiveness to place a number of cards together in a group. If they are arranged in pattern such as star or diamond, all the better.

#### Fence and Wall Painting.

Much that has been said in regard to tacking cards applies to painting. Simplicity, repetition and durability should be sought after. Do not hire a would-be artist for this work, for you or your clerk can do it better. Cover the space you have selected with a few large letters. Do not letter upon an unpainted, weather-beaten background. Mark off the surface of the whole sign and cover it thickly with a good, opaque paint and then, when thoroughly dry, letter upon the painted surface. Never use more than two colors. Do not paint on fence rails or open fences. Do not paint upon any surface giving less than 12 square feet. Choose surfaces that are least exposed to direct sunlight. Do not go into sign painting schemes whereby your advertisement will appear on one square of a large checker-board with 15 or 20 other advertisements around it.

#### Don't Stand for Graft.

In connection with this subject it may be well to digress from the general topic and warn druggists against paying for cards in hotel writing desks, barroom clocks, post-office directory boards and such schemes. As a general thing they are merely "hold-ups" and have little or no advertising value.

#### Paste and Paper.

Poster work, as generally understood, is beyond the reach of retail druggists. However, if one is pushing a specialty, it may be good business for him to have a thousand or so of plain and yet brilliant single sheet posters printed. He should not endeavor to put them all up at once. In fact, it may not be wise to have any of them placed on permanent bill-boards. Temporary fences around excavations, sheds and scaffolds in connection with new buildings and all such temporary structures afford surfaces which are likely to attract much more attention from the public than any permanent bill-board will do. It is well to secure control of such surfaces and post your paper upon them.

On such structures effectiveness may be added to by placing the posters in combination groups, as suggested for cards.

On circus days, during fairs, and at such other times as there are unusual throngs in town, it may be good business to have a large, prominent wall covered with white paper and a sign lettered thereon with water paint. Different tones of patent kalsomines or other wall finishes answer well for this purpose. Or for special occasion work of this nature, one may cut large letters from colored paper and paste them upon the white surface. One druggist who has been very successful with this sort of wall work covers the surface with a plain wall paper and letters it with cut-outs from gaudily contrasting wall paper. For the letters he uses floral and other papers of brilliant patterns.

#### Barrel-head Signs.

A Gulf Coast druggist kept all the barrel heads that came into his possession, cleaned them together, painted and then lettered them with a large stencil made for the purpose. He filled in the open joints of the stenciled letters and thus secured neat signs. These were nailed to trees along the country roads and proved to be very effective advertisements.

#### Paste Flyers.

A West Virginia druggist who has been very successful with a specialty of his own always has on hand a number of small posters about 6 x 24 inches. They merely give the name and

use of his remedy. These posters are kept for special occasions and temporary structures and are then plastered thickly upon them. They are placed on fences, watering troughs, ash barrels, sheds and any place where one will stick. Wherever one is pasted flat another is attached to it at one end so that it will flap in the breeze and thus attract additional attention.

### DRUGGIST WOULD CLEAN STATE CAPITOL.

As Comptroller of New York, Mr. Gaus Is Going to See That All Hands Perform Their Duties.

In a recent issue the New York *Press* had the following about a successful Albany druggist who is now one of New York's State officers: "State Comptroller Charles A. Gaus was Mayor of Albany for five terms, and before that was Street Commissioner for one term. Although not a politician in any sense of the word, he is one of those men politicians are lucky to find, and Gaus has been the best find William Barnes, Jr., ever made in Albany. As Mayor he was industrious, upright, tactful and courteous to all, with a happy faculty of avoiding friction, picking out the road of least resistance and winning friends."

"Gaus is a descendant of the old patroons, an Albanian to the manner born; and all the Albanians have enough of the love of Dutch ancestry left in them to feel very complacent about it when one of their number fills the chair of Harmanus Bleecker as Mayor of Albany. The fact that Gaus' gaunt physiognomy comports with a comfortable armchair and a flagon, after the manner of Hendrik Hudson's followers, has given an impression at times that he is easy-going and perhaps indifferent. Such misconceptions always end with a rude awakening."

"Not long after Gaus took offices on the lower floor of the old State House one of the officials overheard sent a requisition for help to have his rooms cleaned. There is a janitor in the building who has charge of seven scrubwomen. The Comptroller thought this force ample for the purpose, and sent for the janitor. After a sharp calling down, he told the janitor that if there were any more complaints he himself would take command of the scrubbing force early some morning and see what it could do. 'I may not meet the expectations of every one in the discharge of my duties as Comptroller,' he said, 'but I have no doubt that I should be able to keep the building clean. That's a good start at any rate.'"

#### Should Study Advertisements of Their Employers.

If the store you are connected with advertises, and if it is an up-to-date concern of course it does, it is highly essential that every man behind the counter should study the advertisements and know all about the goods advertised, so as to be able to talk about them to the best advantage when called for.

It is the usual custom of daily newspapers to furnish advance proofs of all advertisements to the store that advertises, and the clerks should secure one of these proofs and thoroughly familiarize themselves with the advertisement before it reaches the general public.

It certainly makes the clerk appear at a manifest disadvantage if a customer comes into the store and refers to some particular offer that has been mentioned in an advertisement and finds that the clerk is not thoroughly familiar with the matter.

How much more effective it would be if the clerk had all the details of the advertisement and of the particular goods advertised at his tongue's end and was ready to talk earnestly and effectively concerning them.—*Tobacco*.

#### Capitol Reproduced With Many Cakes of Soap.

In the show windows of a Scranton store is a fine reproduction of the National Capitol, made from more than 10,000 cakes of soap, according to a local paper. It is a very remarkable piece of work and gives one a very good idea of what the famous building is. In the toilet goods department of the same store is a reproduction of the Martha Washington monument which is also made from similar cakes of soap.

Every important detail of the Capitol is well presented to view. The front elevation, the mammoth arch of triumph, the chariot of progress, the ornamental columns of liberty, the great hall, flanked with smaller halls running through the entire building are shown.

## PERSONAL MENTION

—GEORGE W. SHAW, of Rochester, N. H., was a recent visitor to friends at Dover in the same State.

—A. A. LAWRENCE, of Lawrence & Merritt, Cuba, N. Y., made a business visit to Olean a few days ago.

—OSCAR MYERSON will leave shortly for Colombia, South America, where he will represent Parke, Davis & Co.

—CHARLES W. FALLAS, of Petoskey, Mich., made a trip recently to Florida, combining business with pleasure.

—C. S. STARBETT, of Dover, has gone to Laramie, Wyo., where he is now pharmacist at A. H. Cordiner's pharmacy.

—W. H. SNYDER, representing Parke, Davis & Co. as detail man in New Jersey, resigned from their employ on June 1.

—H. W. HACKBARTH, formerly located at Wausau, Wis., is now connected with the Herman Klurtz pharmacy at Merrill, Wis.

—A. A. CUTLER, formerly of Momence, Ill., but now making his home in Minnesota, was a recent visitor to friends in Kankakee.

—O. M. NELSON has gone from Faribault to Red Wing, Minn., to take charge of the store of the Reliance Drug Company.

—L. P. MERRITT, of Mayville, N. Y., has purchased a fine touring automobile and will make an extensive trip for health and pleasure.

—J. T. ANDREW, of Bowling Green, Ky., recently suffered a slight stroke of paralysis, but at last advices was well on the road to recovery.

—GEORGE FOSTER, formerly of Morrison, has moved to Paw Paw, Ill., where he is now registered pharmacist in W. A. Pratt's drug store.

—JOHN P. DIEHL, JR., of Buffalo, N. Y., is a candidate for the Democratic nomination for alderman in the 14th ward of that city.

—FRANK MURRAY, of Rhame, N. D., has gone to Grove City, Minn., where he has taken charge of the pharmacy of Lofstrom Brothers.

—GEORGE L. DOUGLASS, of Chicago, counsel for the Proprietary Association of America, was a visitor in New York City last Thursday.

—J. F. MEYER, former prescription clerk at the Dunlap pharmacy at Waukesha, Wis., has gone to Chilton, Wis., where he will open a new pharmacy.

—DR. LOEVENHART, professor of pharmacology and toxicology at the University of Wisconsin, is engaged to Miss Minnie Goldsmith, of Madison.

—J. K. McDOWELL, of Tecumseh, Neb., who recently sold his interest in a pharmacy to his partner, has become the agent for several makes of automobiles.

—C. R. McDOUGALL, of Harvey, Ill., was operated on at Blue Island Hospital recently for enlargement of the glands of his neck. He was doing well at last reports.

—D. JUDSON THOMAS, W. H. McGarrak and Dr. W. E. Keller, of Scranton, composed a fishing party which recently exploited the streams in the Stroudsburg region.

—G. B. RYLAND, of the May Drug Company, Pittsburg, and his wife and daughter were recent visitors at the home of his parents, Mr. and Mrs. S. H. Ryland, at Meyersdale, Pa.

—CLAYTON TUTTLE, a druggist of Tomah, Wis., is assisting at the Taylor Drug Store at Sparta, Wis., during the absence of Mr. Taylor, who is enjoying a short vacation.

—ELMER FALK, of Stoughton, Wis., recently visited friends at Boscobel and Soldiers' Grove, Wis. At Boscobel the druggist was met at the train by a contingent of his friends.

—AUGUSTUS S. SMITH, with Bruen, Ritchey & Co., New York City, is back at his desk after an absence of several weeks caused by the death of his father, late of Bethlehem, Pa.

—E. A. GENGLER, for a number of years with Mallinckrodt Chemical Works, St. Louis, has bought the Spring-Laclede Pharmacy, at the corner of the avenues appearing in the name, in St. Louis.

—C. R. COSBY, manager of the New York branch of Eli Lilly & Co., left last Saturday for Indianapolis, where he will visit the home office of the firm. Mr. Cosby expects to return within a week.

—S. H. CARRAGAN, assistant manager of the New York

branch of Parke, Davis & Co., left last Friday for a holiday sojourn in Saratoga, N. Y. Mr. Carragan took along his golfing paraphernalia.

—DR. GEORGE P. BARTH, a graduate of the School of Pharmacy of the University of Wisconsin, class of 1895, has been chosen examining physician for the Milwaukee public schools at a salary of \$2800.

—F. H. EGGLESTON and wife, of Laramie, Wyo., have started on an eastern trip which includes a visit to New York and their presence at the graduation of their daughter at Vassar College this month.

—JOHN P. REYMOND, for 30 years Kansas City manager of Parke, Davis & Co., will retire from business on full pay. He will apply himself to his books and curios in his workshop at his home, 4422 Main street.

—J. A. LARSON, senior member of Larson & Bruehler, of Bersford, S. D., recently received painful injuries through falling in his bath room. Several ribs were broken and his condition for a time was serious.

—THOMAS ROSS, who recently sold his drug store in Elgin, Ill., will make his future home in the Pacific Northwest. Mrs. Ross and daughter, Miss Pansy, have already gone to Portland, Ore., where a son of Mr. and Mrs. Ross resides.

—DR. LYMAN F. KEBLER, chief chemist of the Division of Drugs, United States Department of Agriculture, has recently returned to Washington from a professional trip to Chicago. While there he attended the Elbert memorial banquet.

—ROBERT HABERMANN, of New York City, has just been appointed from the civil service list as pharmacist at the hospital of the Soldiers' Home, in Bath, N. Y. He succeeds Otto Tannhauser, who lately resigned and removed to British Columbia.

—GEORGE BARTELL, of Seattle, Wash., has returned home from an extended trip which included Kansas City, Houston, Los Angeles and San Francisco. His tour was largely to arouse interest in the forthcoming Alaska-Yukon-Pacific Exposition.

—CHARLES E. KING, member of the Philadelphia R.D.A., and in business for 23 years at 2401 Master street, was asked by the Pennsylvania State Board of Pharmaceutical Examiners to assist in the practical examination at the Philadelphia College of Pharmacy on May 21.

—WILLIAM W. BARTLETT, former president of the Massachusetts Pharmaceutical Association, was a member of the reception committee which entertained the delegates to the recent Church Congress which was held in Boston under the auspices of the Protestant Episcopal Church.

—FRANK W. SMITH, secretary of the Drug Club of Philadelphia and president of the Traveling Men's Auxiliary of the Pennsylvania Pharmaceutical Association, surprised his friends last week when he appeared minus his flowing moustache. Many declared that he looked 20 years younger.

—WILLIAM READING, of Norristown, Pa., has not taken a vacation nor lost a day on account of illness for 24 years. During that time, however, he has had opportunity to pursue his studies and investigations in botany and natural history by excursions on Sunday afternoons, early in the morning and in the evening.

—PAUL GRACE, who for the past two years was manager of the A. F. Madden drug store, Grayville, Ill., severed his connection with that institution recently and accepted a position with the H. K. Mulford Company, of Philadelphia, Pa., as traveling salesman. His territory will be northern Illinois with headquarters at Chicago.

—LEON BROYER, well known to the drug trade through his long connection with the Mallinckrodt Chemical Works, St. Louis, has been putting in his spare hours studying Blackstone. He is a member of the graduating class of the Benton College of Law, whose commencement exercises are to be held in St. Louis this (Thursday) evening.

—GEORGE T. GRAVES, a pharmacist formerly employed by Robinson & McFarland, Mishawaka, Ind., who left the drug business to occupy a homestead in Montana, has written a letter in which he declares that next to Mishawaka his shack, five miles from Round Up, on Willow Creek, is the finest place in the world to live. Together with his brother from Albion, Ind., Mr. Graves left Indiana two months ago to take up a claim. After spending three weeks looking over the country they found some fine land and each have fled on a quarter section. He believes that his locality is going to be the garden spot of Montana.

## ERIE COUNTY MOURNS FOR CHARLES O. RANO.

Former President of New York State Ph.A., Prominent in A.Ph.A. and Active Worker for Pharmacy.

BUFFALO, May 29.—Charles Orlando Rano, a well-known Buffalo druggist, is dead of apoplexy, aged 65. For a long time Mr. Rano conducted a drug store at Amherst and Niagara streets and later another at Niagara and Carolina streets. He was also secretary of the Buffalo Pen Company. H. O. Sickler, treasurer of the concern, went to call on Mr. Rano and was surprised to find him dead in a chair. Mr. Rano is survived by his wife, who had been visiting in Michigan, a daughter and two sons.

Mr. Rano was one of the early members of the New York State Ph.A., having joined in 1880, and was its president in 1893. He had been a member of the A.Ph.A. since 1896 and was prominent for years in the deliberations of that body, besides having long been identified with the Erie County Pharmaceutical Association, which he served as president and in many other capacities. He was secretary of the old Erie County Board of Pharmacy during its existence.

Mr. Rano was a graduate of the New York College of Pharmacy and was a curator of the Buffalo College of Pharmacy. He was genial and helpful to others and possessed a magnificent physique, standing 6 feet 2 inches in his stockings and weighing 225 pounds.

The Erie County Ph.A. has taken the following action:

Charles O. Rano was for many years prominently identified with the practice of pharmacy in Buffalo and Erie County and was ever ready to contribute his efforts towards the elevation of our profession. His worth was recognized by his fellow pharmacists and the community at large by his elevation to the offices of president of the Erie County and New York State Pharmaceutical Associations and by repeated reappointments to the position of secretary of the Erie County Board of Pharmacy. In the latter capacity during a term of years much in connection with the enforcement of the law was necessarily delegated to him and he performed the duties of his office in a manner which won the respect of all concerned.

The members of the Erie County Pharmaceutical Association in special meeting assembled mourn his sudden demise and extend their sincere sympathy to his bereaved family.

## Joseph Long, Pioneer in the Cultivation of Medicinal Plants, Dead at His Home in Texas.

J. Long, well known to ERA readers for his letters on the cultivation of medicinal plants, died at his home in Sherman, Texas, after an illness of two weeks, following an attack of the grippe. He was a native of Ohio and settled in Sherman about 30 years ago. He had acquired considerable property and for the last six years had been engaged in the cultivation of medicinal plants and in the work of demonstrating the financial possibilities of growing such crops in Texas. Only recently he had succeeded in interesting the United States Government in establishing an experiment farm in his neighborhood. For many years Mr. Long was in the employ of the Hood Medicine Company. He was 56 years of age.

## Read a Letter and Then Shot Himself.

WINSTON-SALEM, N. C., May 29.—John W. Hill, aged 21, a traveling salesman for a drug house in Chattanooga, Tenn., committed suicide recently by shooting himself through the head with a pistol, near Kapp's Mill, Surry County. Hill stopped at the home of J. H. Thompson for his mail and dinner. After reading a letter he walked off, remarking "Good-by" to a friend. An hour later he was found lying on a rock near the Yadkin River, with a bullet hole in his head and a pistol clutched in his right hand.

## Drug Clerk Meets Death on Elevated Structure.

James H. Morton, a drug clerk employed in Brooklyn, was injured to an extent on the platform of the 125th street elevated station, in Manhattan Borough, New York City, Tuesday of last week, so that his death occurred in the Harlem Hospital several hours later. Morton was trying to board a train just as the gates shut and was caught between the platform and the car while the latter was in motion. He leaves a widow and three children.

## Obituary Notes.

—RICHARD KOETHE, well known Milwaukee druggist, 2405 Walnut street, passed away on May 24 after a short illness

as a result of a paralytic stroke. He was born in Germany in 1857 and went to Milwaukee in 1883. Mr. Koethe was a member of the Wisconsin State Ph.A.

—DR. S. R. BASS, prominent druggist of Campbellsville, Ky., died recently of rheumatism, aged 73. He was a leading citizen.

—F. E. PHANEUF, of Hudson, Mass., is dead of cancer of the stomach, aged 47. A widow and daughter survive. He was a member of many fraternal orders.

—JOHN L. BEAUCHAIN, secretary of the Moxie Nerve Food Company and superintendent of the Boston factory, is dead. He was born in Three Rivers, Quebec, in 1868. He entered the employ of the company as a salesman in 1886. Ten years later he secured an interest in the company, and became one of its directors. Mr. Beauchain was a consistory Mason.

—MORRIS L. HOLTON, retired, but until two years ago of the firm of Holton & Adams, died of apoplexy in his home at Monroe, Orange County, N. Y., on May 15. Mr. Holton was well known in the drug trade, having traveled for McKesson & Robbins, Hall & Ruckel and other pharmaceutical houses, having been later identified with McCafferty & Holton. He was 74 years of age.

—AUGUSTUS CUNNINGHAM, for 20 years the proprietor of a drug store in Inman square, Cambridge, Mass., died suddenly Friday at his summer home in Nahant. He had not been in good health for a year, and a few weeks ago went to Nahant in the hope of gaining rest. He was a native of Nova Scotia, 45 years of age, and is survived by a wife, two sons and a daughter. He was a member of the Massachusetts Ph.A.

## LOT OF MINERAL WATER SEIZED.

Misbranding Charged by Government Against the Thomas Taggart Company, of Indiana.

BALTIMORE, May 29.—Thirty-four cases of mineral water from the French Lick Springs in Indiana, the company controlling which has Thomas H. Taggart, the well-known Democratic politician, as president, were seized today by the Government at Camden Station under condemnation proceedings brought by the Federal authorities. Violation of the Pure Food and Drugs Law is charged.

Each case contained two dozen bottles of the mineral water. The allegation is made that each of the cases was misbranded "Two Dozen Quarts Pluto Concentrated." The bottles, it is charged, held only an average of one and three-fifths pints, instead of the quart which they should have contained, according to the label.

As will readily be seen, the case is of great interest to bottlers of all kinds. If the proceeding against the Thomas Taggart Company results in conviction the manufacturers and distributors of all other mineral waters, and of every variety of beverages can be prosecuted if the bottles they use are found not to contain the precise quantity stated on the label.

## Adulteration and Misbranding of Lithia Water.

Notice of Judgment No. 59, issued under the Pure Food and Drugs Act, deals with the confiscation of 75 bottles of liquid labeled "Basic Lithia Water." The judgment is that the liquid so labeled is not lithia water, that it is not qualified for medicinal purposes and does not possess the curative properties set forth upon the label, in addition to which it is adulterated with the presence of the colon group of organisms, being unfit for human consumption and deleterious to health.

## N. Y. Deutscher Apotheker-Verein Meets Tonight.

At this evening's meeting of the New York Deutscher Apotheker-Verein, which will be the last of the season until September, Assemblyman Robert S. Conklin will address the members on pharmaceutical legislation. Henry A. Petersen, of Steiner & Petersen, counsel for the Board of Pharmacy, will precede Mr. Conklin, explaining the present pharmacy law. The usual lunch will be served following adjournment.

## Considerate Robber Only Steals Cigars.

DETROIT, Mich., May 15.—It was a very considerate robber who broke into the Economy Drug Store, High and Beaubien streets, last night. He took only a box of cigars.

## ARKANSAS PH. A. DISCUSSES OWNERSHIP OF PRESCRIPTION: APPROVES A. P. H. A. LIQUOR RESOLUTION

O. O. LUMPKIN, of Pine Bluff, newly elected president of the Arkansas State Pharmaceutical Association.

R. A. WARREN, of Clarksville, elected first vice-president of the Arkansas Pharmaceutical Association.

F. G. SCHACHLEITER, Hot Springs, retiring president of the Arkansas State Pharmaceutical Association.

PINE BLUFF, May 30.—The 27th annual convention of the Arkansas Association of Pharmacists was largely attended and was very successful, there being about 200 delegates and visitors, including a number of ladies who accompanied their husbands and fathers, here. The sessions were held at the Bluff City Club.

Mayor W. L. Toney formally turned the city over to the visitors in his address of welcome and the response was made by Dr. John B. Bond, of Little Rock. E. G. Eberle, of Dallas, Texas, also addressed the convention. President Frank C. Schachleiter, of Hot Springs, delivered his annual address, in which he reviewed the work of the association during the past year and made some interesting reports.

One of the most interesting discussions during the afternoon session resulted when President Schachleiter asked the question: "Who owns the prescription?" Several prominent druggists were on their feet in an instant and the interrogation resulted in a discussion in which the subject was aired from every standpoint.

W. L. Dewoody, of this city, contended that the prescription belonged to the patient until it was placed with the druggist, in trust, to be held for his own protection. He said the druggist can give the patient a copy of the prescription if it is desired. He was at a loss to establish ownership of what he termed the "wire prescription" or those sent to the druggist over the telephone. Such orders placed a big responsibility on the prescription clerk.

J. F. Dowdy, of Little Rock, declared that the patient does not pay for the prescription, but for professional services. He also argued that the prescription was the property of the druggist. A copy could be given the patient, if desired.

Dr. John B. Bond, of Little Rock, expressed the same opinion. He contends that the prescription is the property of the druggist and that the original should remain in his custody. The patient has the right to demand a copy of the prescription and it shall be given him by the druggist, unless the physician requests that the prescription be not re-filled.

Henry Weimer, of Hot Springs, took issue with the previous speakers, declaring that in his opinion the prescription was the property of the patient; that the patient pays the physician for the prescription and when he does it belongs to him and not the druggist. M. A. Elsie, of Hot Springs, said that from a common sense standpoint the druggist, the doctor and the patient should settle the matter among themselves. It is a question, he said, that had never been satisfactorily settled in the United States Supreme Court and he compared the matter to perpetual motion, which, he said, would never be solved.

President Schachleiter named A. G. Beall, W. T. Brasher

and A. C. Parse as a committee on fraternal relations, with instructions to visit the Arkansas doctors when they meet in this city in annual session and assure them of the harmonious relations and good feeling that exist between the druggists and the physicians.

The liquor question was settled by the association by the adoption of a resolution indorsing the resolution adopted by the American Pharmaceutical Association, in which the sale of liquor in any form is prohibited except for medical purposes.

Dr. J. P. Runyan, of Little Rock, addressed the convention on the value of the chair of pharmacy which has been installed at the College of Physicians and Surgeons in Little Rock, and urged the druggists to cooperate with the college to make it a success.

The following officers were elected for the ensuing year: O. O. Lumpkin, Pine Bluff, president; R. A. Warren, Clarksville, first vice-president; Horace Crawford, Brinkley, second vice-president; Miss Mary A. Fein, Little Rock, secretary-treasurer; A. W. Stahl, member of the executive committee; F. G. Schachleiter, Hot Springs, John B. Bond, Sr., and W. L. Dewoody, Pine Bluff, delegates to the United States Pharmaceutical Convention, which meets in Washington, D. C., with J. D. Hodges, Little Rock, alternate.

Fort Smith was selected as the place for holding the next convention and the date fixed was May 2, 1910.

The members of the Arkansas Pharmacists' Travelers' Association also held their annual meeting and elected the following officers to serve for the ensuing year: Nat Harrison, of Nashville, Ark., president; J. C. Brown, of Little Rock, first vice-president; W. L. Carr, of Pine Bluff, second vice-president; G. W. Murphy, of St. Louis, third vice-president; B. F. Lewis, of Little Rock, treasurer, and I. W. Kuriz, of St. Louis, secretary. The Travelers held a little convention of their own during the pharmacists' meeting and had a big time. A street parade, headed by a brass band, was one of the features of the week's programme. The members of the pharmacists' auxiliary are known as the "White Cap Brigade."

The visitors were entertained by a reception and dance at Bluff City Club the first night and a banquet was served at the same place the next evening. The ladies were entertained with a card party at the home of Mrs. W. L. Dewoody and with a musical at the home of Mrs. J. H. Mann. Field sports at Forest Park also proved an attraction.

The committees in charge were as follows:

General Committee—W. L. Dewoody, chairman. Arrangements—J. H. Mann, chairman; V. J. McComb, W. T. Brasher, A. G. Beall, R. C. McMahon, J. C. Bond. Reception—W. L. Carr, chairman; A. C. Parse, J. H. Annum, J. H. Watkins, M. B. Barker, W. S. Ballard, E. T. Rucker, Phil

F. Crutcher, Fred C. Berbig, Albert Bacon, C. R. Healy, C. R. Counts, D. I. Mills, Henry Smith.

Entertainment—W. T. Seawell, chairman; O. O. Lumpkin, N. E. Brightwell, Noel McCain, L. M. Rohbitt, R. S. Toler, F. A. Pattison, Hugh Ryland, J. W. Everett, J. W. Kurtz, T. M. Liebig, Ike Kaufman, Sorrells Dewoody, James Whititt, A. H. Pendergras, E. Apperson.

## MARYLANDERS TO MEET AT OCEAN CITY.

**Majority Sentiment in Pharmaceutical Association Favored Going to the Seaside.**

BALTIMORE, May 29.—It has been finally decided to hold the next annual meeting of the Maryland Pharmaceutical Association at Ocean City, instead of the Blue Mountain House in the Blue Ridge. It had come to be regarded as a kind of unwritten law that if the association met one summer in the mountains, the next gathering would go to the seashore or some other part of the State, in order that all portions of Maryland might receive recognition. Under this arrangement the next meeting ought to have gone to the mountains. But so many members showed a preference for the seashore that the committee finally determined to change the programme, and Ocean City, Maryland's only seacoast city, was chosen.

The Hotel Plimlimmon has been selected as headquarters, and the sessions will be held there, likewise the indoor diversions. The sessions will begin June 22, continuing until the 25th. Legislation will receive special attention.

## Important Subjects on Missouri Ph.A.'s Programme.

ST. LOUIS, May 29.—The programme for the Missouri Ph.A. meeting at Joplin June 15 to 18 has been completed as far as the entertainment features are concerned and the outline of papers and queries sent the members by Prof. Francis Henan in soliciting contributions to the scientific side of the four days meeting promises very well. The study of U.S.P. and N.F. will be continued and legislative affairs, now that the State has a new law, will come in for a large point of discussion. State Representative Theo. F. Hagenow, who engineered the legislation, will be present to outline to the association the course that must be pursued to win the points lost in this law, the chief of which is the anti-itinerant vendors clause.

The entertainment is largely in charge of the entertainment committee of the Missouri Ph. Travelers' Association. W. H. Lamont, manager in St. Louis for Eli Lilly & Co., and chairman of this committee, was in Joplin a few days ago and completed local arrangements. The Connor Hotel will be the headquarters. Mrs. W. E. Price will extend the formal greeting to the ladies.

On Tuesday the first session will be held in the hotel parlors and Mayor Guy Humes will greet the pharmacists and Secretary H. M. Whelpley will respond for the association at the request of President D. V. Whitney, of Kansas City.

## Special Pullman to Pennsylvania Ph.A. Meeting.

PHILADELPHIA, May 29.—Extensive preparations have been made by the Traveling Men's Auxiliary of the Pennsylvania Ph.A. for the meeting at Bedford Springs, June 22 to 24. In addition to various plans for entertainment on one afternoon or evening of the session, a plan to have the members of the auxiliary from this section go on a special Pullman car, has been decided upon. It is expected that other Philadelphians will avail themselves of this opportunity to go to Bedford Springs under such agreeable conditions and a jolly party is assured. The train will leave Broad Street Station at 11:35 p. m., on June 21, but the car will be open from 9 o'clock. Secretary A. L. Wolcott, of the auxiliary, at 514 Arch street, is making reservations for the car and it is urged that members and others who desire to make the trip under these conditions at the usual rate communicate immediately with him.

## Daily Paper for Wisconsin Association.

MILWAUKEE, May 29.—The publication of a daily paper during the sessions of the Wisconsin Pharmaceutical Association at Elkhart Lake, June 22 to 25, will be a novel feature. It will be issued by the Wisconsin Pharmaceutical Travelers' Association and will include the daily programme and a running fire of jokes upon attending druggists and traveling men. Present plans are for making the paper a permanent affair to be published monthly by the traveling men. W. H.

Barr, of Milwaukee, local secretary, has issued a neat postal announcement of the coming convention to druggists and traveling men of the State. He is confident that the attendance this year will reach the 600 or 700 mark.

## Vaudeville Performance for Massachusetts Ph.A.

BOSTON, May 29.—The executive committee of the Traveling Men's Auxiliary of the Massachusetts State Pharmaceutical Association has made arrangements for the convention next month. It was decided to give a vaudeville performance in the big garage of the Ocean House at Swampscott on Tuesday evening, June 22, and to follow this with a Dutch supper.

## CHEMISTS' EXHIBITION IN LONDON.

**American Exhibitors Again Among Firms Represented at 15th Annual Show in Horticultural Hall.**

LONDON, May 22.—The Chemists' Exhibition which was held last week in the Horticultural Hall was as successful as any of its 14 predecessors, and the organizers, the *British and Colonial Druggist*, succeeded in getting together as exhibitors something like a hundred firms. There was a good attendance of pharmacists, especially during the last three days. Provincial pharmacists who are subscribers to the paper in question have part of their railway fare paid by the proprietors, while those living in London are provided with a coupon which is exchanged for cab fare on the holder alighting from a cab at the doors of the exhibition.

Among the American firms exhibiting were the following: Parke, Davis & Co., who save special prominence to their entymol preparations, elastic nebulizers and sprays, pepsin preparations and other selections from the firm's well-known standard products. Chesternan & Streeter, of Philadelphia, showed through their European agents, Howison & Co., Ltd., a selection of hard rubber, leather, elastic and wire trusses, suspensories, shoulder braces and abdominal supporters. The Seamless Rubber Company, of New Haven, Conn., who were also represented by Messrs. Howison, had a varied display of appliances, including Kelly's operating and obstetrical cushions, bed pans with inflated ring and tube outlet, stomach tubes, urinals, surgical gloves, atomizers, etc. The Charles H. Phillips Chemical Company showed their well-known "milk of magnesia," digestible cocoa and "phospho-muriate of quinine." F. J. Stokes Machine Company had a display of pharmaceutical machinery, including Stokes' Automatic Water Still and the "Enrka" hand tablet machine.

## Year's End at Medico-Chirurgical College.

PHILADELPHIA, May 29.—The commencement exercises of the Medico-Chirurgical College will be held in the Academy of Music June 5 at 9 a. m. Chauncey M. Depew, United States Senator from New York, will be the orator of the occasion.

The bi-ennial reunion of the class of '07, Pharmacy, will be held on Friday at the college. It will be followed by a banquet at the Bellevue-Stratford at 7 o'clock the same evening.

Prof. Carl S. N. Hallberg, of the University of Illinois, will deliver an address on "The Recent Propaganda of the American Pharmaceutical Association and the American Medical Association" at the tenth anniversary celebration of the Pharmaceutical Alumni Association.

## Pharmacy Chair for University of Arkansas.

LITTLE ROCK, May 29.—A chair of pharmacy will be installed at the University of Arkansas under an Act passed by the recent Legislature, despite the fact that the Act does not carry an appropriation providing for the salary of the professor of pharmacy, according to President Tillman, of the university. The Pharmaceutical Association of the State has agreed, it is understood, to furnish the \$5,000 necessary to pay the salary for two years. The university will furnish the room for the department and go as far as possible without any appropriation toward furnishing all other things necessary to make the department a success.

## New Building on Old Drug Store Site.

The Dr. Fancher drug store at Racine, Wis., is being moved from its former location in State street to Marquette street. A modern new structure will be erected at the former stand.

**MISSISSIPPI BOARD OF PHARMACEUTICAL EXAMINERS. WHICH IS NOW DOING VIGOROUS WORK.**

JACKSON, May 29.—The present Mississippi State Board of Pharmaceutical Examiners is making a vigorous effort to improve the standard of pharmacy as practiced in this State. The present board, the members of which appear in the accompanying illustration, effected an organization on March 12, 1908, by the election of J. B. Small president, and L. H. Wilkinson, Jr., secretary. The crusade against the non-registered druggists of the State began with the organization meeting and has been vigorously pushed since. The general average on examinations required by this board is 75 per cent, and with this raise in grade average comes an equal raise in the standard of pharmacy in Mississippi.

Throughout the commonwealth drug store after drug store was opened and run by parties totally incompetent to compound prescriptions or dispense poisonous drugs. It is this class mostly sought by the State Board of Pharmacy. Hundreds of the leading citizens of the State, besides the registered pharmacists, have joined in the good work and are rendering valuable assistance to the board in putting an end to the malpractice existing within Mississippi borders.

The board promises to stop this practice whenever and wherever they find the law is being violated. The people of the State generally have taken great interest in the good work being accomplished, knowing they are directly and vitally benefited.

Secretary Wilkinson, upon whom a vast amount of detail work has devolved, has proved himself to be as untiring as he has been assiduous in prosecuting the campaign mapped out by the board.

*Left to right: J. B. Bryan, Amory; L. H. Wilkinson, Indianola, secretary of the board; (seated) J. B. Small, Winona, president; H. B. Wellborn, Columbia; Oliver Eastland, Lake.*

movement to get a larger proportion of the receipts from pay telephones established in drug stores. He stated that Baltimore druggists got less than those of any other large city in the country, their compensation being only 10 per cent, while that of Chicago members of the profession was 50 per cent and of various other Western cities 33-1-3 per cent. This city, he explained, demanded 25 per cent, which, he thought, was a very modest proposal and one that took into account fully the local conditions. Mr. Kahn said that the pharmacists had it within their power to compel concessions if they brought their undivided influence into play.

Others making addresses were John B. Thomas, president of the R.D.A.; Charles J. B. Swindell, of the Swindell Glass Works, and Joseph F. Hindes, president of the Emerson Drug Company.

An excellent buffet luncheon and cigars were served to put the druggists in a good humor, the committee of arrangements having provided abundantly for the comfort of those at the meeting. Similar gatherings are to be held from time to time.

**Wisconsin Druggists Meet—E. B. Heimstreet to Retire.**

JANESVILLE, May 29.—Rock County druggists enjoyed a good dinner recently at the Hotel Myers, the following delegates being present: J. M. Farnsworth, C. A. Smith, Beloit; E. C. Ryall, Clinton; H. D. Stappenbeck, Edgerton; George E. King, E. O. Smith, E. B. Heimstreet, J. P. Baker, H. E. Ramons, Otto Smith, Janesville; W. P. Clarke, Milton; W. H. gates being present: J. M. Farnsworth, C. A. Smith, Beloit.

"How to regulate the sale of poisons given to avoid accident" was the principal theme, but other subjects of interest to the profession were taken up. E. B. Heimstreet gave the members a surprise when he stated that he intended to retire from business and that his drug store must be sold before July 1.

The association will meet the first week in August at Yost's Park for an all day meeting, to which the ladies are invited. J. P. Baker, C. A. Smith, H. E. Ramons, George E. King and H. D. Stappenbeck were appointed a committee of arrangements for the picnic, while J. M. Farnsworth, Frank Van Wart and C. H. Jones, of Beloit, were appointed a committee to furnish refreshments.

**Child's Mother Found Through Prescription Label.**

MILWAUKEE, May 29.—A prescription number on a medicine bottle was the clue which recently led to the discovery of a young woman who left her child at a boarding house in this city and never called for it. The Milwaukee detectives worked Janesville, Mount Horeb and Madison on the case which attracted wide interest. The clues to Janesville and Mount Horeb were found by the discovery of a labeled bottle of medicine. One label was pasted over the other and the first was steamed off and the lower one read.

**BALTIMORE DRUGGISTS IN JOINT MEETING.**

**Discuss Legislative Matters. Hear Discourses on Concerted Action and Telephones and Have Luncheon.**

BALTIMORE, May 29.—The joint meeting of the Maryland Pharmaceutical Association, the Baltimore Branch of the American Pharmaceutical Association, the Baltimore Drug Exchange and the Baltimore Retail Druggists' Association last Thursday evening brought out a large attendance and resulted in a most profitable interchange of ideas.

The meeting was called by President William M. Fonch, for the conference committee, which constitutes a sort of central body and was suggested to take the place of consolidation, which was deemed inexpedient. The gathering was of an informal nature. A. C. Meyer, of the Exchange, urged the adoption of the Federal Pure Food and Drugs Law for the State instead of the Maryland statute on the subject, arguing that the former was more equitable, effective and practical, besides promoting uniformity throughout the country, which was a very important consideration, especially to the manufacturers, who would necessarily be injured by a diversity of legislation, being put to much extra expense and interfered with in the distribution of goods.

R. E. Lee Williamson, secretary of the R.D.A., talked of the value of co-operation. He outlined the reasons which prompted the formation of the conference committee and pointed out that this committee could do much good by lining up the entire fraternity in the support of any movement designed to promote the general interest.

Dr. John F. Hancock discoursed on fraternal relations, counseling harmony and amity among the druggists, while H. A. B. Dunning spoke of good-fellowship and the fraternal feeling. He stated that much was to be gained by concerted action and by avoidance of discord, and he advised that druggists endeavor to lay aside all differences and meet each other in a spirit of sincerity and good will.

M. S. Kahn, as chairman of the committee on telephones, proceeded to advocate a general lining up in behalf of the

## NEW PLAN OF DIVISION OF AM. CHEM. SOCIETY.

Prof. Stevens, as Chairman of Committee, Advocates Formation of Pharmaceutical Division of the Society and Points out Advantages Which He Believes Would be the Result.

## Editor The Pharmaceutical Era:

The American Chemical Society has adopted the plan of organizing its members into divisions, each division to have charge of different subjects as, Organic Chemistry, Agricultural and Food Chemistry, etc. The President of the society has appointed the undersigned committee to consult with the pharmaceutical chemists of the country upon the advisability of forming a Division of Pharmaceutical Chemistry.

If the various branches of chemistry are to be represented by separate divisions, surely the interests and professional standing of pharmaceutical chemists demand that a Division in Pharmaceutical Chemistry be included. Such a division would give to the pharmaceutical chemists of the country an opportunity to become acquainted and exchange ideas. It would give them an organization of their own for the reading of papers and discussion of live topics of interest and importance. Supported by the great body of the American Chemical Society, composed of about 4000 American chemists, it would give a stimulus and afford a prestige never before presented to Pharmaceutical Chemistry in this country. By such co-operation Pharmaceutical Chemistry would be advanced and would be more highly regarded by chemists in other branches of our science, and many chemists engaged in our work at present without affiliations, would be drawn to our society.

The organization of such a division would follow the lines already successfully established by other divisions and the by-laws of the Division of Industrial and Engineering Chemistry may be regarded as a suitable model for the Division of Pharmaceutical Chemistry. The *Journal of Industrial and Engineering Chemistry* exemplifies also what may be accomplished by a division devoted to Pharmaceutical Chemistry, the recent articles on synthetic preparations being especially valuable.

The society now publishes three valuable journals, including one devoted exclusively to abstracts covering all chemical literature. This one journal alone is worth the price of membership, as it enables one to keep in touch with the advance of chemical science. All three journals are sent to members without additional charge. Present members incur no extra expense by the formation of this division and new members in this division enjoy the benefits of full membership in the American Chemical Society.

Will you kindly consider this a personal appeal and whether you are a member or not, please answer the enclosed questions at your earliest opportunity. By so doing the necessity of writing you again will be removed. Respectfully yours,

Ann Arbor, May 21, 1909.

A. B. STEVENS.

The committee mentioned is composed of John M. Francis, Edward Kremers, B. L. Murray, Joseph P. Remington, A. B. Stevens, chairman, and the questions to be answered are as follows:

Are you in favor of forming a Division of Pharmaceutical Chemistry in the American Chemical Society?

Will you attend the meetings in Detroit June 29, 30 and July 1, 2?

Will you contribute a paper for this meeting? State the name and address of any whom you think may be interested in the formation of such a division.

Suggest some subject for discussion or investigation.

## Strong Opposition to the Movement in Philadelphia.

PHILADELPHIA, May 29.—The executive committee of the Philadelphia Branch of the American Pharmaceutical Association has declared unanimously against the proposition to form a division of Pharmaceutical Chemistry in the American Chemical Society. The members expressed the opinion most emphatically that the proposed move would tend to disrupt the scientific sections of the local branches and the secretary was instructed to communicate with the other local branches of the American Pharmaceutical Association and ask them to take similar action regarding the proposition. The subject, while not one that came officially before the Philadelphia Branch, was presented to the majority of the individual members in a letter sent out by Prof. A. B. Stevens, of Ann Arbor, Mich., in which the project was strongly urged.

A letter drafted by Joseph L. Turner, the secretary, was approved and sent to Professor Stevens. The letter reviewed

the formation of the scientific sections of the A. Ph. A. branches and continues:

The reasons which decided in favor of our affiliation with the A. Ph. A. were as follows: Practically all the pharmaceutical chemists of the country are members of the A. Ph. A., but not all of them are members of the American Chemical Society. The work carried on by the scientific section of the first named body is most creditable and this section gives the A. Ph. A. a prestige and a standing which any other organization of pharmaceutical chemists completely lacks. By organizing an independent society or affiliating ourselves with the American Chemical Society we would have deprived the A. Ph. A. of that element, taken away many members who are pharmaceutical chemists and not pharmacists, thus seriously injuring a body in the successful existence of which every pharmacist and pharmaceutical chemist is deeply interested and which is of great benefit to the profession in general.

The above mentioned fact that the majority of the pharmaceutical chemists are already members of the A. Ph. A. obviates the necessity of enlisting new members, the membership already existing. By organizing them locally, we could achieve all those purposes which we desire to achieve by organizing a new society. That our presumption was correct was shown by the success with which our meetings have met.

The formation of a Division of Pharmaceutical Chemistry of the American Chemical Society does not seem to be the proper thing. The same reasons which were opposed to such a move previous to our organization of the local scientific section, are also valid now. Although we are members of the American Chemical Society, our loyalty to the latter organization should not only prevent our injuring this body in any way but what is more, we should concentrate our efforts toward making the A. Ph. A. the foremost scientific organization of those of those who are engaged in pharmacy in one way or another. Our aim should be not to make pharmacy a purely commercial pursuit but all of us who are able to do it, must apply our energies towards the elevation of pharmacy as a science primarily and as a profession secondarily.

By organizing a division of the American Chemical Society, we will deprive the A. Ph. A. of a very valuable membership and possibly of a very important section. But furthermore, the formation of a division does not answer the very purpose for which the organization of such a division is designed. Question No. 2 of the circular letter seems to indicate that you propose to hold only one meeting yearly. The scientific section of the A. Ph. A. accomplishes this very same purpose most admirably and I do not see in your move any progress whatsoever.

What we need are monthly meetings of pharmaceutical chemists where important and live topics can be discussed at once, without waiting a whole year for a chance to present a paper on a subject at a meeting where time for the discussion must necessarily be very limited.

Experience shows that scientific sections of local branches give ample opportunity to satisfy pharmaceutical chemists in every respect. Establishment of such sections in all cities where branches exist will contribute more toward the progress of pharmaceutical chemistry than any other organization. Such sections will attract to chemists locally and give each organization will give them "opportunities to become acquainted and exchange ideas." No society with one or two meetings a year can satisfy this demand for close contact of members of the same profession.

And, I, in my turn, beg you to consider this as a personal appeal not to start a movement which may become detrimental to the interests of the A. Ph. A., and at the same time would not fulfill the expectations of all those interested in the movement.

A feature of the discussion was upon the presence of the name of Joseph P. Remington, of this city, on the committee. When the scientific section was organized, Professor Remington was one of its most ardent supporters and the local members are interested to know his reasons for apparently backing a movement which they believe to be detrimental to the A. Ph. A. and its affiliations in this city. Professor Remington is now in the West and his views on the question it was unable to secure at the time of the meeting.

## Oppose Accountant Bill—Druggist an Alternate.

MILWAUKEE, May 29.—The Milwaukee Association of Credit Men has adopted resolutions condemning the certified accountant bill pending before the Wisconsin Legislature on the ground that it is monopolizing ability and would put the work in the hands of a few men.

Edward Roemer, of the Roemer Drug Company, was elected as one of the alternates to the coming National convention of the National Association of Credit Men.

## Temple University's Commencement.

PHILADELPHIA, May 29.—The Alumni Association of Temple University will hold an all-day celebration June 4. The commencement exercises will be held in the Academy of Music on Saturday at 2 p. m. Leslie M. Shaw, formerly Secretary of the Treasury, will make the address to the graduates. The first day class in pharmacy at Temple will be graduated this year.

## DEDICATION OF THE ALBERT E. EBERT MONUMENT AND GROUP OF PARTICIPANTS IN CEREMONIES.

*From left to right: Leo Eliel, William Bodemann, Murray Galt Matter, Charles E. Dohme, H. M. Whelpley, F. W. Meissner, Joseph P. Remington, Oscar Oldberg, Eduard Kremers, O. F. Fuller.*

#### Distinguished Pharmacists Among the Speakers.

CHICAGO, May 29.—About 300 pharmacists and numerous ladies were present on the occasion of the dedication of the monument erected to the memory of the late Albert E. Ebert under the auspices of the Chicago Veteran Druggists' Association. The ceremonies occurred on the afternoon of the 21st in Graceland Cemetery, where the distinguished pharmacist is interred. Those present included the trustees of the United States Pharmacopoeial Convention who were in the city holding a meeting.

After a luncheon given to the out-of-town visitors at the Union Hotel the journey was made to the cemetery. Arriving there, O. F. Fuller, the veteran president of the C.V.D.A., presented the monument to the trustees of the Ebert estate, the shaft being accepted on their behalf by Dr. T. N. Jamieson, naval officer of the port of Chicago and old-time druggist, who turned it over to the American Pharmaceutical Association, which will be its custodian in perpetuity. Prof. Oscar Oldberg, president of the A.P.A., accepted the trust in a graceful speech.

Addresses were also delivered by Professor Remington, of Philadelphia C.P., Professor Ebert's alma mater; by Professor Hallberg, of the University of Illinois C.P., in founding which Professor Ebert played an important part; by Professor Kremers, of the University of Wisconsin, for the pharmacists of America; by W. K. Forsyth for the Illinois Ph.A.; and, lastly, by William Bodemann, successor of Professor Ebert as historian of the C.V.D.A. and prominent in the work of causing the monument to be erected to his friend's memory.

The addresses were filled with reminiscences and eulogies of the "Grand Old Man of Pharmacy." In the evening the Chicago Branch of the A.P.A. gave a banquet to prominent out-of-town participants in the ceremonies and again the speakers told of their love for the departed pharmacist and recounted the efforts which he had made in behalf of higher development in pharmacy. The life history of Professor Ebert was practically told anew. The event was one of the most interesting and impressive which has ever occurred in this section in connection with pharmacy. The monument, an illustration of which appears on this page, is of unpolished granite, with a bronze tablet suitably inscribed.

#### Officers Elected by Chicago Veterans.

CHICAGO, May 29.—At their annual meeting last week the Chicago Veteran Druggists' Association elected officers for the ensuing year. W. C. Grassly was chosen president; W. K. Forsyth, vice-president; O. F. Fuller, honorary president for life. John Blocki and W. Bodemann, the two secretaries, had previously been elected to office for life.

The trustees of the United States Pharmacopoeial Convention were all elected associate members of the association, as were Leo Eliel, Dr. Oldberg and T. H. Potts. Professors Whelpley and Kremers had previously been associate members, so that having been voted in with the Pharmacopoeial body, they are now doubly members of the C.V.D.A.

#### Pharmacopoeial Trustees in Session.

CHICAGO, May 29.—The Board of Trustees of the United States Pharmacopoeial Convention met at the Congress Hotel here Friday and Saturday. The meeting was for the purpose of working upon the report of recommendations for the Pharmacopoeia. The sessions were entirely executive and nothing will be given out on the subject till the report is submitted to the convention proper.

#### Dean Meeker Guest at Banquet.

PHILADELPHIA, May 29.—Anticipating his departure for Europe on June 5, Prof. George H. Meeker, dean of the department of pharmaceutical chemistry at the Medico-Chirurgical College, with Mrs. Meeker, was the guest of a number of his friends at a farewell banquet at the French Club. Dr. I. V. S. Stanislaus was the toastmaster and those present were Dr. and Mrs. Meeker, Dr. and Mrs. Seneca Egbert, Prof. and Mrs. E. A. Genth, Mr. and Mrs. Christopher Koch, Jr., Prof. and Mrs. Charles H. Shaw, Prof. and Mrs. C. E. Vanderbleed, Prof. and Mrs. Ambrose Hunsberger, Mr. and Mrs. J. Gilbert Ruff, Mr. and Mrs. J. E. Marsden, H. C. Blair, Joseph L. Turner and guest and Dr. William W. McNeary and guest.

#### New Abode for a Pharmacy of Antigo.

The E. E. Williams pharmacy at Antigo, Wis., will soon occupy a new location in the Langlade National Bank building.

# BOARD EXAMINATIONS

## Massachusetts.

Boston, May 29.—A list of 57 candidates who had successfully passed the required examinations for registration was announced yesterday by the State Board of Registration in Pharmacy. Of this number 29 receive certificates as registered pharmacists and 28 receive certificates as assistants. The percentage of successful candidates was unusually large, the total number having been 81, showing the percentage of successful candidates to be 70. Following are those to whom were granted certificates:

**REGISTERED PHARMACISTS.**—Jeremiah E. Connell, Boston; Edward G. Crotty, Westfield; Francis J. McEnelly, Milford; Daniel J. Purcell, Boston; Emil H. Trumpold, Boston; Pierre N. Brunelle, Lowell; Andrew R. Newton, Boston; Herve D. Parthenais, Lowell; Oliver B. Small, Norwood; Charles W. White, Boston; George H. Boden, Cambridge; Alvan B. Chamberlain, Boston; Charles W. Craft, Somerville; Beverly N. MacCreedy, Boston; Joseph E. Mello, New Bedford; Samuel Philbrook, Lynn; Anthony C. Ventrone, Providence, R. I.; Ray F. Webster, Lowell; August H. Boehm, Springfield; Benjamin F. Connor, Boston; Maurice B. Moore, Cambridge; William A. Phillips, Boston; Alphonse B. Saulnier, Fall River; Guy K. White, Boston; Carl A. E. Alms-tron, Cambridge; Leon I. Chester, Boston; William A. Hurlbert, Cambridge; Joseph Martin, Boston; Frank G. Sherman, South Braintree.

**ASSISTANTS.**—Durward C. Adams, Lowell; George Bentley, Fall River; Stephen T. Brooks, Turners Falls; Albert H. P. Byers, Lynn; Herman N. Collins, Attleboro; Henry B. Crockett, Lowell; Louis L. DeSorgher, Boston; John J. Kane, North Attleboro; Clarence M. Lewis, South Framingham; James F. Maynard, Boston; Otto A. Wruck, Holyoke; Edward Wheelins, Whitman; Edward J. Linnahan, Waverly; Sydney Weinwald, Boston; Walter J. Tremblay, Northampton; Roland G. Wright, Jr., Malden; George H. Freeman, Waltham; Michael F. Kirby, Fall River; James F. Quealy, Hyde Park; Louis D. Turgeon, Lowell; Hector Jacques, Boston; Romio A. Bonin, Woonsocket, R. I.; Ambrose Donahoe, Fitchburg; Macdonald Smith, Worcester; Henry Barone, Boston; Jacob Chertkower, Philadelphia, Pa.; Harold W. Eugley, Marlboro; Mark Shaw, Lynn.

## Kentucky.

FRANKFORT, May 28.—At the April meeting of the Kentucky Board of Pharmacy held in Louisville, the following applicants passed: John D. Archer, Corbin; E. R. Bader, Hamilton, Ohio; J. A. Branhauser, Doub's Point; H. B. Crummuitt, Huntington, W. Va.; Winn Davis, Glasgow; H. H. Dunn, Morrow, Ohio; William Fredrick, Louisville; J. F. Gallaher, Franklin, Ohio; R. H. Gerbard, Cincinnati; J. B. Hatfield, Louisville; E. J. Hemenway, Covington; S. S. Lawrence, Portsmouth, Ohio; R. H. Lowery, Salem; G. J. Payne, Cincinnati; H. H. Pennywitt, Huntington, W. Va.; W. C. Perkins, Rocky Hill Station; I. R. Pope, Latonia; J. D. Quinn, Frankfort; H. W. Ratterree, Louisville; B. G. Roadcap, Goshen, Va.; C. W. Scott, Louisville; George Stintz, Cincinnati; S. A. Stirn, Cincinnati; G. A. Triplett, Bellevue; A. C. Wells, Latonia; J. E. Welsheimer, Cincinnati; G. C. Williams, Louisville.

The next meeting will be held at Dawson Springs, July 13. Applications must be filed with the secretary, J. W. Gayle, Frankfort, at least ten days before that time.

## New Jersey.

BRIKTON, May 28.—Governor Fort has reappointed David Strauss, of Newark, as a member of the New Jersey State Board of Pharmacy for a term of five years. The next examinations will be held in Trenton on July 15 and 16. The results of the April examinations are announced as follows by Secretary Henry C. Jordan.

**REGISTERED PHARMACISTS.**—Mitchell Bernstein, Philadelphia; James F. Bourne, Atlantic City; James C. Brigandell, Atlantic City; Edward A. Burroughs, Metuchen; John A. Butler, Collingswood; Hyram E. Coleman, Boonton; Charles

A. De Rosa, New York; David A. Eolis, Frenchtown, N. J.; John Fortmann, Weehawken; Richard P. Fitzpatrick, Mount Holly; Humbert J. Grassi, New York; Edgar P. Kastner, Newark; Floyd B. Kempte, Mount Holly; Hallam T. Koons, Jamesburg, N. J.; John Lefler, New York; Max Lewitte, Newark; Joseph A. McCann, Greenwich, N. Y.; William U. Meier, Butler, N. J.; Benjamin Meyer, Newark; Paul E. Nielsen, New York; Ernest A. Noedel, Atlantic City; Fred Plum, Atlantic City; Mortimer Popper, Newark; Isaac Raskind, New York; Isidor F. Ringler, New York; Morris Rudominer, Newark; Joseph R. Schnorbus, Trenton.

**REGISTERED ASSISTANTS.**—Louis C. Arnold, Newark; Arthur H. Carrington, Camden; William S. Finkensieper, West Hoboken; Emanuel Gerber, Newark; Edward M. Givens, Highlands, N. J.; Morris J. Hodes, Newark; Mabel S. Horning, Roselle Park; Floyd B. Kempte, Mount Holly; Raymond S. Killenberger, Perth Amboy; William C. Lloyd, South Orange; William F. Luther, Jr., Newark; John W. Smith, Troy, Pa.

## Nevada.

CARSON CITY, May 28.—Secretary F. J. Steinmetz, of the Nevada State Board of Pharmacy, announces that at the semi-annual meeting of the Nevada State Board of Pharmacy held at Reno, May 5, permanent certificates were granted to Wm. H. Hoenschler, La Crosse, Wis.; Wm. H. Otto, Goldfield, Nev.; Charles S. Briggs, Rawhide, Nev.; Wm. J. Robertson, Goldfield, Nev.; Ed. L. Forsyth, Rawhide, Nev.; H. F. Otte, Montpelier, Idaho; James H. Ketchersid, Kingston, Mo.; Francis E. Carpenter, Valparaiso, Ind.; Wm. F. Milz, Cresco, Iowa; Fred. C. Fergen, Cresco, Iowa; Wm. Boeling, Virginia City, Nev.; Warren M. Cave, American Fork, Utah; Abb. B. Hosey, Leadville, Colo.; Merton Bell, Carson City, Nev.; Lyman A. Kipper, Kingston, Mo.

Robert L. Prouty, of Tonopah, was elected secretary to succeed Mr. Steinmetz, who resigned the office.

## Louisiana.

NEW ORLEANS, May 28.—The State Board of Pharmacy has announced the result of the examination May 7-8 at the New Orleans College of Pharmacy. There were 45 applicants and of that number the following passed:

**REGISTERED PHARMACISTS.**—Lewis J. Baumann, Moise Clarence Conn, Paul F. Dastrique, Antonio Domestevet, John J. Dubourg, Charles E. Frechon, Mrs. John E. Jahn, F. H. Kelly, Theodore L. Miller, Emile Julius Pons, Steve D. Stuart, A. R. Taylor, Robert Cade Taylor, Michel T. Vallon.

**QUALIFIED ASSISTANTS.**—Raoul Beariel, Jake Blum, H. Custer Naylor, Jacob Smith Segura, Oliver H. Van Horn.

## Iowa.

DES MOINES, May 28.—The new State Pharmacy Commission has completed marking the papers for those who took its first examination, which is said was the hardest ever given to would-be druggists in Iowa. Out of a class of 57 only five passed, so Secretary C. W. Larson reports. The five successful ones are George Philip Steyh, of Burlington; W. R. Reed, of What Cheer; Alfred Nuttall and Roy McPhee, of Des Moines; Don C. Rawson, of Kalona.

## Doctors and Druggists Play Base Ball.

H. D. Delskamp has been elected president of the Doctors' and Druggists' Base Ball League of St. Louis for the season, and two games are now being played each Thursday afternoon at Kulace's and the Association parks. Other officers are H. L. Brenner, treasurer; A. W. Klosterman, secretary. The captains of the teams are: Dr. I. J. Harris, George Gibson, H. D. Delskamp and A. W. Klosterman.

## One Year in Prison for Cheating at Regents' Exams.

S. G. Christie, of Brooklyn Borough, New York City, who was arrested some time ago on a charge of helping young men to fraudulently secure certificates as having passed the Regents' examinations, was sentenced to one year in the penitentiary for the offense. Christie was a professor in a Brooklyn school.

## Drug Clerk Given Five Years for Assault.

CARLISLE, Pa., May 29.—Louis Spealman, a drug clerk of Harrisburg, has been sentenced to five years in Eastern Penitentiary for assaulting C. F. Reitting, a jeweler.

## PATENTS.

Granted May 25, 1909.

922,538—Eduard Sprünger, Frankfort-on-the-Main, Germany, assignor to Vereinigte Chmifabriken Zimmer & Co., G. M. B. H., Frankfort-on-the-Main, Germany. Santalol esters.

922,564—Kenneth M. Chance, London, England, assignor to The British Cyanides Company, Ltd., London, England. Manufacture of sulfocyanides.

922,571—Bernard Gallagher, Lynn, Mass. Machine for filling bottles.

922,596—John J. Kessler, St. Louis, Mo. Varnish gum and producing same.

922,692—Byron B. Goldsmith, New York, N. Y. Thermo-plastic keratin compound.

922,698—Walton Harrison, Bloomfield, N. Y. Siphon.

922,702—George W. Jopson, Meriden, Conn., assignor of two-thirds to Herman W. Hubbard and Floyd E. Hubbard, Meriden, Conn. Can-opener and bottle-capper.

922,758—Arthur J. Farmer, Detroit, Mich. Means for extracting contents of bottles.

922,766—Fritz Hoffman, Elberfeld, Germany, assignor to Farbenfabriken vorm. Friedr. Bayer & Co., Elberfeld, Germany, a corporation of Germany. Anhydride of acyl salicylic acid.

922,896—Chapman D. Henriques, Newark, N. J., assignor to Gotham Can Company, New York, N. Y., a corporation of New York. Can.

922,974—George A. Thornhill, London, England, assignor to The Machine Labeling Company, Ltd., London, England. Bottle-labeling machine.

922,982—Charles K. Volckening, New York, N. Y. Stem for bottle-washing brushes.

922,995—Lorenz Ach and Theodor Sutter, Mannheim, Ger-

many, assignors to C. F. Boehringer & Soehne, Mannheim-Waldhof, Germany. Salicylic acid derivative and process of making the same.

922,998—Carl A. Anderson, Vista Grand, Cal., assignor of one-half to Edward M. Stehn, San Francisco, Cal. Non-refillable bottle.

923,012—Carl Bosch and Alwin Mittasch, Ludwigshafen-on-the-Rhine, Germany, assignors to Badische Anilin & Soda Fabrik, Ludwigshafen-on-the-Rhine, Germany, a corporation of Germany. Production of cyanid and cyanamid.

923,088—Francis L. Stewart, Murraysville, Pa., assignor of one-half to Samuel E. Gill, of Pittsburg, Pa. Utilization of maize-cobs for the production of alcohol.

923,096—Frederick W. Wild, Jr., Baltimore, Md., assignor to Burt Machine Company, a corporation of Delaware. Labeling machine.

## TRADE MARKS.

Published May 25, 1909.

34,903—Ramón Velez, New York, N. Y. Class 6. Vegetable compound extracts to be mixed with other substances in the preparation of remedies for the treatment of diseased and disordered conditions of the blood, kidneys, etc.

35,615—Solomon Marculescu, New York, N. Y. Class 6. A toilet cream.

35,974—Olof Johanson, New York, N. Y. Class 6. A remedy for rheumatism.

37,320—Joseph J. Thomas, Houston, Texas. Class 6. An external application used as a remedy for itch, eczema, tetter, bites or stings of insects, etc., and a remedy in the form of an injection for gonorrhea and gleet.

39,396—The Wood Chemical Company, Helena, Ark. Class 6. Ointments.

39,432—Gardner Pharmacal Company, New York, N. Y. Class 6. Uterine tonic.

39,601—Pearson's Antiseptic Company, Ltd., London, England. Class 6. A combination of eugenol and albumen for

Copy of any PATENT or TRADE MARK, 10 cents.

40,506—Marietta Stanley Company, Grand Rapids, Mich. Class 6. Hair tonic and shampoo preparation.

40,611—Lanman & Kemp, New York, N. Y. Class 6. Liniments.

41,073—Arch Stanford, Carmine, Texas. Class 6. A liniment.

41,236—Ada B. Bradley, San Francisco, Cal. Class 6. A remedy for constipation.

#### Change in Registration of Labels and Prints.

Edward B. Moore, Commissioner of Patents, has issued a notice that the Act approved March 4, 1909, entitled "An Act to amend and consolidate the Acts respecting copyrights," which will take effect on July 1, 1909, repeals the Act approved June 18, 1874, under Section 3 of which labels and prints have been registered in the United States Patent Office. The registration of labels and prints in the United States Patent Office, therefore, will cease with the issue of June 29, 1909. Applications for the registration of labels and prints will not be filed in the Patent Office after June 25, 1909, and any received at the Patent Office after that date will be forwarded to the Register of Copyrights, Library of Congress.

#### MRS. C. A. STOVER HEADS BOSTON CHAPTER.

##### Organization Holds Successful Annual Function at End of Mrs. Godding's Three Presidential Terms.

BOSTON, May 29.—The annual meeting of Boston Chapter No. 1, W.O.N.A.R.D., was held yesterday at the Hotel Vendome, and proved not only to be a most delightful occasion in itself as a successful social function, but also as a fitting climax to the three terms of service which almost the entire board of officers, with Mrs. Adelaide M. Godding as president, have seen.

Mrs. Godding presided at the luncheon with which the celebration was opened. The tables were decorated with pink carnations and pink roses, and plates were set for 40. In beginning the postprandial exercises, Mrs. Godding took occasion to review the growth of the organization during the three years of its existence, and to speak with especial satisfaction of the delightful harmony which has prevailed, and of the steady and substantial growth of the Boston organization, as well as of sister organizations all over the country. She announced that she would not again be a candidate for the position of president, and then bespoke for her successor the same kind and generous spirit of co-operation of which she had been the recipient for these three years.

Mrs. Annie Kidder was presented as toastmistress and she filled the position with cleverness and brilliancy, some of the guests paying her the compliment of saying she was the best toastmistress they had ever seen. Toasts were responded to as follows: "Our Annual Luncheon," Mrs. Alice Wheeler; "The National Organization," Mrs. Jennie Waterhouse; "Pharmacy," Mrs. Nellie Connolly; "The Present," Mrs. Martha Morey; "Our Officers," Mrs. Gertrude Gammon; "The Future," Mrs. Adelaide M. Godding.

The annual business meeting followed, in which all officers submitted reports, and all of which were encouraging. Officers were elected as follows:

President, Mrs. Roxa K. Stover, wife of C. A. Stover, of Billings & Stover, Cambridge; first vice-president, Mrs. Anna E. Griffin, wife of L. W. Griffin, of S. Webster & Co., Brighton; second vice-president, Mrs. Josephine L. Christie, wife of James W. Christie, of Haverhill; recording secretary, Mrs. Martha Morey, wife of A. C. Morey, of Brookline; corresponding secretary, Mrs. Annie Kidder, wife of Albert W. Kidder, of Cambridge; treasurer, Mrs. Gertrude K. Ernst, wife of Frank F. Ernst, of Jamaica Plain; auditor, Mrs. Nellie Connolly, wife of Fred W. Connolly, of Connolly & Davis, Dorchester; directors, Mrs. Adelaide M. Godding, wife of John G. Godding, of J. G. Godding & Co., Boston; Mrs. Bertha Hubbard, wife of Fred A. Hubbard, of Newton; Mrs. Caroline Henderson, wife of William Henderson, of Malden; Mrs. Sarah Fineman, wife of James F. Fineman, of the Woodward Drug Company, Boston; Mrs. Adeline Partridge, wife of Edward Partridge, of Newton; and Mrs. Lillie M. Connolly, wife of F. J. Connolly, of Roxbury.

The luncheon arrangements were in charge of Mrs. Annie Kidder and Mrs. M. A. Boyden. Among others present were: Mrs. J. F. Tupper, Miss Ratigan, Mrs. William D. Wheeler, Mrs. D. A. Edmunds, Mrs. J. Arthur Bean, Mrs. Josephine

Kidder, Miss Minnie McAfee, Mrs. John Lowe, Mrs. Moore, Mrs. Elie H. LaFierre, Mrs. H. C. Blatchley, Miss Beatrice Whitney, Mrs. William Hamlin, Mrs. M. J. McIntyre, Mrs. Florence Arrington, Mrs. Gertrude Gammon, Mrs. Charles H. Davis, Mrs. Anella Kilburn, Mrs. Lilla Staples, Mrs. M. A. Boyden, Mrs. Jessie Waterhouse and Mrs. J. H. Green.

#### Mrs. Claus Elected President of St. Louis Chapter.

ST. LOUIS, June 1.—St. Louis Chapter, W.O.N.A.R.D., has elected the following officers for the coming year: Mrs. Otto F. Claus, president; Mrs. W. F. Itner, first vice-president; Mrs. F. Fricke, second vice-president; Mrs. Richard Kring, secretary; Mrs. Martin J. Noll, corresponding secretary; Mrs. A. S. Ludwig, treasurer, Mrs. Theo. F. Hagenow declining reelection.

The reports of officers reviewed a successful and pleasant year with splendid prospects for the coming year. Mrs. F. M. Haverman and Mrs. F. E. Layton were elected to membership.

A feature of the recent social campaign of the chapter was a dance at the beautiful Liederkrantz Hall, at which more than 100 couples were present. The arrangements were in charge of the president, Mrs. Claus. A member of the club was hostess to the ladies and their friends.

The Stoddard Travel Lectures, as read by one of the members, continue to be an interesting feature of the monthly meetings. The members study up on the countries in advance and quite a lively discussion frequently follows. The tour of the world will be completed in this way.

#### Outing at "The Orchard" of Philadelphians.

PHILADELPHIA, May 29.—What will doubtless be the greatest outdoor gathering of the drug trade of this city and vicinity that has ever taken place, is scheduled for June 18, when Chapter No. 6, W.O.N.A.R.D., the Drug Club and the Philadelphia Association of Retail Druggists will hold an outing at The Orchard, the beautiful summer home of the Athletic Club of Philadelphia, on the banks of the Delaware River a few miles below this city. A special train will convey the majority of the picnickers, but many more will run down by trolley and in automobiles.

There will be numerous athletic sports and games for which some very handsome prizes have been provided both for the old and young, fat and lean, women and men. At 6 o'clock a big course dinner will be served on the lawn under the grand old trees and later there will be dancing. It will practically be a holiday for the trade in this city for everybody that is anybody in the trade here is identified with or interested in one of the three organizations and of course they all have friends.

#### Outings of Druggists' Organizations.

The District of Columbia R.D.A. will hold an excursion and field day on July 9. It will be a "get-together" affair for both doctors and druggists. The entertainment committee is hard at work arranging details and making elaborate plans for a general good time for all participants.

St. Clair County (Ill.) R.D.A. will hold its first public picnic in Priester's Park, Bellefonte, June 27, for which invitations will be sent to all societies of druggists, dentists and doctors in southern Illinois.

Lorain (O.) druggists have planned an outing to be held during the coming week.

#### Miss Cora Dow Takes Over Two Serodino Stores.

CINCINNATI, May 29.—Miss Cora Dow, head of the nine Dow drug stores in Cincinnati, has just completed a deal whereby she has taken over the two Serodino drug stores. She is said to have paid Serodino Brothers \$20,000. She comes into possession of the lease and the stock of the drug store at Fifth and Main streets, and the stock of the store at Sixth and Race streets. She is operating the Main street store along with her string of pharmacies, but has leased the Sixth and Race street store site to a clothing firm. She has retained all of the Serodino employees of the two stores.

#### New Pharmacy for Fond du Lac.

The entire stock for the new Forest Avenue Pharmacy opened at Fond du Lac, Wis., was furnished by the Milwaukee Drug Company. R. A. Rehand, manager of the new store, was in Milwaukee recently purchasing the stock.

**RECEIVERSHIP ASKED FOR SANITOL COMPANY.**

**President Luyties Denies Allegations of Complaining Stockholders, Asserts Company is Prosperous and Will Fight Proceedings—Only 29 of 8000 Stockholders Appear in the Litigation.**

St. Louis, May 29.—Herman G. C. Luyties, president of the Sanitol Chemical Laboratory Company, blames Eastern brokers and discharged employees for a suit filed in the local Circuit Court asking a receivership for the company and the removal of Mr. Luyties as president and director; George A. Bowman, vice-president and director, and Robert E. Bowman, secretary and treasurer. Mr. Luyties added in his public statement that he thought the cases unimportant as only 29 of the 8000 stockholders were identified with the suit and one of these owns but \$20 worth of stock.

Charges are submitted in the bill that President Luyties has spent much of his time in pleasure trips; that he disposed of four trade marks to the company for \$200,000 of stock; that he got the company's stock at \$5 per share, whereas the par value was \$10; that stock was used and money was borrowed for the payment of dividends; that he was a member of a real estate company which sold the Sanitol Building at Boyle and Laclede avenues to the company, and that his salary was raised from \$6000 to \$70,000 a year.

The affairs of the Sanitol Company have been much talked about since the remarkably successful advertising campaign of two years ago when much stock was sold to druggists who became interested in the affairs of the company through the business created by the coupon redemption scheme. Of recent months, the local feeling has been much more friendly to the company and few complaints were heard.

Mr. Luyties in his statement says:

"There is no reason why a receiver should be appointed. The company is in good shape and is getting along nicely, though, of course, business lately has not been as good as in our banner year, 1907. I don't care to go into the details of a complaint of this character. If the creditors of the company were dissatisfied, it would be a different matter, but they are not. Our bills are being paid promptly.

"If it were necessary to appoint a receiver I, as the heaviest stockholder, would be the person most interested in bringing such an action. I am satisfied with the way in which the company is progressing and a great majority of the stockholders—dentists and druggists all over the United States—are also satisfied. These dentists and druggists earned their stock out of the profits which they made on the sale of preparations made by the Sanitol Chemical Laboratory Company."

Mr. Luyties' attorney, Albert Arnstein, said:

"As Mr. Luyties has said, there is no good reason, no justification, for this suit. Denial will be entered to all the allegations. I would not stoop to answer the charge that Mr. Luyties spends much of his time in riotous living, and pleasure trips. That charge is beneath notice.

"As to the allegation that Mr. Luyties took \$200,000 of the company's stock for four trade marks, I need only state that this exchange was approved by the board of directors. The sale of the property at Boyle and Laclede avenues to the company was effected at the actual value, and with the approval of the board. The charge that the amount of capital stock paid in was incorrectly reported is false. Mr. Luyties made an affidavit that one-half of the increase to the capital stock was paid in, and this averment was absolutely true. The other allegations, involving wrongdoing, we deny. The company is solvent. It is not at all embarrassed. The assets greatly exceed the liabilities. The company is in a prosperous condition."

The company was organized in February, 1897, with a capital stock of \$5000. The capital subsequently was increased to \$200,000, then to \$700,000, then to \$1,000,000, and in April, 1908, to \$3,000,000. Half of the increase was paid in, making the total outstanding capital \$2,000,000.

The 29 stockholders who ask for a receivership own stock in the company to the par value of \$20,000, according to their attorneys, Jamieson & Thomas.

The plaintiffs are: Mrs. Charles Rehffuss, Henry S. Morris, E. M. Haedrick, Nelson Fryd, W. B. Maratta, E. C. Palmer, Clifford D. Beale, C. L. Card, John P. Sager, P. E. Dunwoody, Frederick Sagers, S. E. Gilbert, J. F. Wassels, I. B. Gilbert, H. C. Hewish, William C. Marsh, J. F. Mayer, C. H. Scar-

borough, Kate H. Chandler, Emma Early, William H. Sand, C. A. Summers, George C. Anthony, D. B. McFadden, J. G. Lane, George T. Williams, Henry Curtis, T. F. Clifford, Augustus J. P. Muller.

**C. A. STORER HEADS NORTHWESTERN ALUMNI.**

**Committee Appointed at Annual Meeting to Arrange for Students' Club Room at University.**

CHICAGO, May 29.—The Alumni Association of the Northwestern University School of Pharmacy held its annual meeting yesterday. Charles A. Storer was elected president; Ralph H. Smith, first vice-president; M. M. Finlay, second vice-president; F. H. Elsner, third vice-president; George D. Oglesby, secretary; H. F. Shaper, treasurer. The trustees chosen were George C. Hanson and Thomas V. Wooten.

The members discussed the question of providing a students' club room and a committee was appointed to perfect arrangements for the use of a room in the university building. The reports of the retiring officers showed the association to be in a good condition in every way and it was decided to organize branch associations in other States where former students of the school are now located.

**Mr. Rowley is Chairman of C.R.D.A. Board.**

CHICAGO, May 29.—The executive board of the Chicago Retail Druggists' Association has elected James F. Rowley chairman under the newly adopted constitution. A number of Chicago jobbers had been invited to meet with the board on this occasion, but as only one of the number was present the invitation is to be renewed for a later date. President Yeomans, of the association, was not present owing to the serious illness of his father. Vice-President Larsen occupied the chair.

**Chicago Notes.**

—W. C. Shurtliff, president of Morrison, Plummer & Co., has returned from a ten days' visit to St. Louis.

—H. P. Phelps, of the special preparation department of Parke, Davis & Co., Detroit, spent last week in Chicago.

—Julius Levy, a drug clerk employed by O. G. Stolz, 60 Rush street, was arrested recently on a charge of robbing the cash register.

—The Douglas Park Druggists' Association gave a "grand May ball" Wednesday evening, May 26, at Pilsen Turner Hall, 821 South Ashland avenue.

—James R. Stevenson, of Robert Stevenson & Co., has returned from a visit to French Lick Springs, where he went to recover from the effects of a broken arm.

—Monday evening, May 24, was ladies' night at the Social Drug Club, the entertainment being held in the drill hall of the Masonic Temple. The programme included a vau-de-ville performance, a dance and a supper.

—Keystone Chemical Company, of Chicago, has been incorporated with a capital stock of \$2500, to manufacture and deal in chemicals. The incorporators are John C. Farwell, Lee Cohen and Andrew William Little.

—The Nicine Chemical Company, of Chicago, has been incorporated with a capital stock of \$2500, to manufacture and sell chemical preparations. The incorporators are Calvin T. Hood, Frank R. Crane, Jr., and Frank F. Gazzola.

—June 23 has been chosen as the date for the annual excursion of the employees of the Chicago branch of Parke, Davis & Co. The steamer Theodore Roosevelt has been engaged for the occasion and the outing will be to Michigan City and return.

—The Rethaler Surgical Supply Company has taken out articles of incorporation with a capital stock of \$25,000, to manufacture and sell surgical instruments and appliances. The incorporators are Louis Rethaler, Frederick Mueller and Edward W. Everett.

**Messrs. Heineman and Evans Form Baltimore Drug Co.**

Stevens-Harmonson Company, of Baltimore, wholesale druggists, have been succeeded by the Baltimore Drug Company. Charles J. Heineman and A. T. Evans are interested in the new concern, and were formerly connected with the Heineman-Evans Company, which some months ago was succeeded by the Henry S. Wampole Company.

# THE DRUG MARKETS

## TRANSACTIONS MOSTLY IN JOBBING LOTS.

**General Market Steady With Price Fluctuations Unimportant and Limited to a Few Articles.**

**NEW YORK, May 31.**—Although no material increase is noted in the demand for drugs and chemicals, the market has ruled firm with fluctuations in values limited to a small number of articles. Opium is steady but quiet. Quinine is unchanged with only a moderate consuming demand. Norwegian cod liver oil is easier, and a shade lower. Citric acid is in better demand at unchanged prices. Camphor is more active, but without any change in value. Oil almonds, sweet, is higher. Balsam copaiba, both South American and Para, is a trifle lower. Jalap root is firm at the recent advance in value, and without any prospect of a decline in the near future. Chamomile flowers, Hungarian, are scarce, and firmly held at a higher range of prices.

**OPIMUM.**—There is no material change in this market, and the generally quoted price for case lots is \$4.25 per pound, although in some quarters \$4.20 is being named with an intimation that \$4.15 would be accepted. The market is in an unsettled condition, and an upward change in value may take place at any time. Reports from primary markets say that rain is still needed, and while there have been showers in some districts, much more is needed to insure the successful turn of the crop. The arrivals in Smyrna for the week ending May 6 amount to 2058 cases, as against 1387 cases at same date last year.

**QUININE SULPHATE.**—The demand does not exceed actual requirements, and the market presents a very quiet appearance. The next sale of cinchona bark will be held in Amsterdam on June 10.

**CANNABIS INDICA.**—The market is very firm at \$1.50 per pound, and even higher prices are expected to prevail, as it is reported that the government in India is endeavoring to stamp out the traffic in the article.

**ACONITE ROOT.**—There is a shipment in port which is held at 11 cents per pound for single bales and in lots of five bales of about 200 pounds each, at 10 cents per pound. There has been some inquiry for this article which has been scarce on the spot.

**FLAXSEED.**—A sharp advance has taken place in whole and ground seed, and prices for whole seed have been advanced to \$7.50 per barrel, and ground in barrels to 4c. per pound. A further advance is not unlikely.

**COD LIVER OIL, NORWEGIAN.**—The market for this article is quiet, and quotations have been slightly reduced. The trade, however, does not look for much, if any, lower prices. Cable reports give the result of the catch and production of oil to the 24th instant as follows: Total catch, 51,700,000 fish, producing 40,370 barrels of oil. The result of the two previous years are: 1907, 43,900,000 fish, producing 36,650 barrels of oil; 1908, 42,500,000 fish, producing 45,610 barrels of oil. The production of oil during the past week has been small, and the difference between this year and last is now 5240 barrels less.

**CHAMOMILE FLOWERS, HUNGARIAN.**—The price will undoubtedly be very high this season and it is expected that good flowers will sell as high as 50c. per pound before the arrival of new crop, a month or more hence. The small quantities on hand in the local market are being held at 40c.

**CITRIC ACID.**—The demand is active, but there is no change in manufacturers' prices. Crystals in barrels are held at 40c., and in kegs at 40½c. per pound.

**IPÉACAC ROOT.**—On a steamer soon due there is an invoice of Rio, which is held to arrive at \$1.35 per pound, in large lots. For Carthagena in single bales, \$1.00 per pound is being asked.

**JALAP ROOT.**—Stocks are closely held and 50c. per pound in large lots is practically the minimum price quoted. The primary situation is also reported as very unpromising.

**TONKA BEANS.**—The Angostura variety for immediate delivery is nominally unchanged at \$1.40/\$1.45, as to quantity and seller. The arrival of a consignment of 269 barrels and

51 hogheads of new crop last week relieved the stringency to some extent, and dealers expect a decline in prices.

**ELM BARK.**—Bundles of select bark are fairly steady at 13½c. per pound, as to quality and quantity. An improved inquiry is noted with sales of 13¼c. for fair grades in large quantities.

**GUM ARABIC.**—Sorts have been cabled higher from abroad but no change has taken place in the local situation and business continues of average volume, with dealers quoting \$49¼c. for amber, and 13¼c. for white, as to grade and quantity.

**VALENCIA SAFFRON.**—The market is firm at \$7.25/\$8.00, as to quality and seller, and sales have been reported at the inside figure. Indications favor higher prices, as the outlook for new crop is said to be very poor.

**CUBEB BERRIES.**—Spot quotations for the better grades have been advanced to 23½c., as to quality, the higher figure being for fair grades. Powdered is quoted at 24½c. in large quantities. The markets abroad have also advanced and are very firm.

## London Drug Market

**LONDON, May 27.**—There was an improved tone at this week's public sale of drugs, but, unfortunately, this does not indicate that things generally are brighter, as the better demand was due to the fact that the next auctions will not be held for four weeks, and buyers therefore found it desirable to secure supplies with that circumstance in view. The offerings were moderate in quantity and prices on the whole were fairly well maintained. There was an exception, however, in the case of Gum Benzoin, of which about 60 cases sold at easier rates—namely, £6 to £6 10s. per cwt. for fair seconds and £5 5s. to £5 15s. for thirds. Thirty-three bales of Buchu Leaves were offered and sold with competition at full prices, good green round leaves selling at 1s. 3d. to 1s. 4d. per pound, and oblongs at 5½d. to 6¼d.

Rio Ipecacuanha was firm at 5s. 3d. per pound, but there were no bids for Carthagena. Senna was steady. Cardamoms were slow of sale and easier. Cape Aloes was firm at late rates. Balsam Tolu was barely steady at 9½d. per pound for fair. Jamaica Honey was in good request at steady rates. Dragon's Blood was not wanted. Myrrh was lower, 70s. per cwt. being accepted for native-picked Aden. Cuttlefish Bone was in large supply and cheaper at 4d. to 4½d. per pound for good bold. Sarsaparilla was firm for gray Jamaica, but barely steady for native. Cascara Sagrada was firmly held, 42s. 6d. per cwt. being refused for 1904 crop. Cassia Fistula realized 16s. 6d. per cwt. for good West Indian. Sixteen bags of Florentine Orris Root sold without reserve at 34s. 6d. to 35s. for good. Quince Seed, of which eight bags were offered and sold, realized 1s. 11d. per pound.

Privately, business in the drug and chemical markets is dull. Morphine is nominally no lower in value than it was before the Convention broke up and, in view of the firmer tendency in the Opium market, any material change in the price is not expected at present. On the spot a fair business has been done in Opium at at firm rates. Although it was understood that the termination of the Morphine Convention would not affect makers of Codeine, one maker is acting independently but has not reduced his price. A fair business has been done in Balsam Copaiba at 2s. per pound for B.P. Glycerin continues firm and in good demand. China crude Camphor is quiet at 145s. per cwt. Refined continues firm with enquiries for one-ounce Japanese tablets for America. Peppermint Oil is quiet and unchanged. The heavy supply of 1235 packages of Jamaica Ginger was offered at the spice sales and less than 200 found buyers at slightly easier rates, good hold hard selling at 63s. per cwt. and fair to good bright at 62s. to 65s.

At the Isinglass auctions 740 packages were offered of which about one-half sold at generally steady rates. At the Cinchona Bark sales only 515 packages were offered and the bulk sold at firm rates, the average unit being fully last Dutch sale parity. At the Vanilloes sale 369 tins were offered and practically all sold with good competition at an advance of 1s. 6d. to 2s. per pound for fine beans, and at an advance of 1s. to 1s. 6d. for the other qualities.

# THE PHARMACEUTICAL ERA

PUBLISHED EVERY THURSDAY

VOL. XLI.

NEW YORK, JUNE 10, 1909

No. 23

D. O. HAYNES & CO. - Publishers

90 WILLIAM STREET, NEW YORK

Telephone, 2457 John. Cable Address: "Era, New York."

Western Office:

Room 500, Dickey Building, 40 Dearborn St., Chicago  
Telephone, Central 5888

## SUBSCRIPTION RATES.

United States, Cuba, Hawaii, Porto Rico, the Philippines, and Mexico	\$2.50 a Year
To Canada, postpaid	3.00 a Year
To Foreign Countries in Postal Union	4.00 a Year
Single Copies	10 Cents.

ALL SUBSCRIPTIONS ARE PAYABLE STRICTLY IN ADVANCE

Published every Thursday at 90 William Street, Borough of Manhattan, New York, by D. O. Haynes & Co., a corporation; President and treasurer, David O. Haynes; vice-president, Ezra J. Kennedy; secretary, Edward W. Drew. The address of the officers is the office of this publication, and the title is registered in the United States Patent Office.

Entered at the New York Post-Office as Second Class Matter

## Re Photographs for "Era Album" Illustrated Section

Each subscriber to The Pharmaceutical Era is entitled to representation in this work, and is invited to send us his photograph. We do not require a subscription from each partner and clerk. If the firm or proprietor is a subscriber, the other partners and clerks may have their portraits included for \$1.50 each. To secure all of the Album sections one must be a subscriber to The Era in his own name.

In sending photographs be sure that each one is distinctly labeled with the name, address, business, profession or occupation of the person, written clearly on the back of your photograph. A good plan is to write it on a printed label and stick it on the center of the back of your photograph. Here is a good specimen:

### FOR ERA ALBUM.

Fred S. Rogers, Middletown, N. Y.  
McMonagle & Rogers.

Ex-Pres. N. Y. State Phar. Assn.

When additional photographs of partners and clerks are sent, each one should have written on it the name of the subscriber who sends it, as well as the name of the person in the photograph.

### Cabinet Photographs Only

The style of photograph we require is the so-called "Cabinet" size, with the head about two inches long. If other sizes are furnished they interfere with our plans for keeping the faces uniform, also prevent us from classifying the cuts by localities.

In view of the great amount of work we are assuming, to have each of our subscribers properly represented in this Album, we feel that we are not asking too much when we request each subscriber to supply us with the size and kind of a photograph which will facilitate our work and best enable us to do him credit.

In forwarding photographs for the Album, see that they are distinctly addressed as follows:

THE PHARMACEUTICAL ERA.

For Era Album

90 WILLIAM ST., NEW YORK.

## DOES HE DESERVE A DEATH SENTENCE?

Without knowing more about the case than the decision of the Appellate Division of the New York Supreme Court there is such opportunity for grave injustice being done to a pharmacist that the Era commends the matter to the attention of the German Apothecaries' Society as being more able than other organizations or individuals to make inquiries and take action which would either right a grievous wrong or hasten punishment for an offense which is repugnant to all decent men.

Albert Mayer, a pharmacist, was sentenced to from 16 to 20 years in Sing Sing Prison (practically a life sentence, as he is more than 60 years old), for an alleged assault upon a boy of 14. The conviction upon which this sentence was based has been set aside by the higher court and a new trial ordered on the ground that the defendant did not have a chance to obtain justice, even the "atmosphere" against him in the lower court being criticized by the justice who wrote the opinion. A new trial is ordered.

It is said for Mayer that he is a pharmacist of good repute in his native country, Germany, from whence he came to America in 1893 as a delegate to the World's Fair in Chicago, a fact which ought to indicate that he had lived a proper life and was respected by his fellow pharmacists. Of his subsequent career we have little information at this time, but we shall endeavor to learn the true facts. In this research the German Apothecaries' Society can be of great assistance. If Mayer is innocent, as the Judges of the Appellate Division seem to believe is possible, if not probable, a monstrous injustice has already been done to him. If he is guilty, the law will have to take its course.

## NO MYSTERY ABOUT THE BROWN BILL.

One of the opponents of pharmacy reform in New York State prates about the "mystery" due to the withholding of the Brown Pharmacy Bill from introduction in the Legislature for two or three months. While pharmacists generally know that there was no mystery at all about the delay in introducing the bill, it may be well to state that the reason was simply up to Governor Hughes, who held conferences with the members of the legislative committee of the New York Pharmaceutical Association and who on account of his numerous engagements and more pressing duties was forced to postpone appointments which he had made to meet them.

Another complaint of "mystery" urged by some one hanging onto the coat tails of progress and trying ineffectually to keep pharmacy in the old rut is that some gentlemen who had aided in drafting the

bill in January failed to recognize the "child" when it was passed in April. There is nothing wonderful about this, for the bill was submitted several times to the Governor and changes were made at his suggestion. When the draft became apparently of sufficient stability to have copies printed it was again gone over by the Governor's legal adviser and important changes were made. In this shape it was introduced. If it did not then represent the wishes of the Governor the blame must rest upon him and his legal adviser, not upon the friends of pharmacy reform and the advocates of pure drug legislation.

In Albany, as in other political and legislative headquarters, "it is not always what you see but what you *don't* see" that does the business and the persons who asked the question when the Whitney-Wainwright Act was vetoed a year ago repeating the query: "Who killed Cock Robin?" The answer is far away from Assemblyman Conklin, Mr. Diner, or the Brooklyn contingent. At the same time no stones should be thrown in attempts to hit any of the suspects in the wholesale drug district, or in the City Club. It would not be fair. Even this is not a mystery.

#### AMERICA WINS THE CHEMICAL CONGRESS.

Decision by the Seventh Congress of Applied Chemistry to hold the eighth congress in the United States is quite as much a recognition of the pre-eminent progress made in this country in recent years in chemical research in all its branches and the practical application of the results to the benefit of the profession and the public as it is of the efforts of the New York and Washington delegates who carried to London the invitation of President Taft to meet in Washington in 1912. To the delegates much credit must be given, for in their efforts they constantly forced to the front without ostentation the powerful force that has developed in this country in chemical and pharmaceutical progress.

More than 3,000 chemists attended the recent congress and its success scientifically was in proper proportion. The pharmaceutical division, judging by our London correspondent's report, was predominated by Americans. There is a significance in this fact which will readily be appreciated by our readers. It means that the congress of 1912 will bring to this country many bright men from foreign countries who will try to vie with our leaders in this line of research and endeavor to offer something new that will be worth while in the development of pharmaceutical chemistry.

#### MINNESOTA'S SILVER JUBILEE.

More than ordinary interest attaches to the meeting of the Minnesota State Pharmaceutical Association at Tonka Bay next week, for it will be the silver jubilee assemblage of the organization. With only half a dozen older associations in existence, Minnesota may well claim to be one of the pioneers in the National field. With little precedent to guide them, but a knowledge of conditions and the disposition to better them, the prime movers diligently sought the means and bravely overcame opposition, with a

result that the practice of pharmacy was placed upon a proper legal plane in Minnesota.

This association, like many others, was largely inspired by the necessity for protection in a commercial way through appropriate legislation, in Minnesota's case the creation of a board of pharmacy being the first achievement. With the development of pharmacy the State associations have all come to consider the professional side as being also of great importance and at most of the annual sessions the papers read are well worth listening to by all the members. As time and opportunity arrived the scope and usefulness of the State associations will further broaden and it is a duty owing to them and to themselves that every pharmacist should be enrolled with the organization in which he or she is entitled to membership.

#### NEW COPYRIGHT LAW IN EFFECT JULY 1.

After three years of labor by the patent committees of the House and Senate, with additional deliberation in Congress, the Smoot-Currier Copyright Law becomes effective on Saturday, July 1 next. The measure consolidates and revises previous legislation and it is believed by its framers to come as near being a model law as is possible, although persons whose ideas were rejected are naturally disappointed. This law substantially as enacted will undoubtedly govern copyright procedure in this country for a long time to come, as legislators will reluctantly approach any tinkering with a law which had been prepared with such great care after such a long period of inquiry, investigation and consideration of the interests now or likely to be affected in the future.

One of the chief provisions is lengthening the life of a copyright, the term being extended on the extension period, so that the protected article will be safe for 56 years instead of 42 years, the provision applying to existing as to future copyrights. Numerous other changes have been made and the treatment of the question of the reproduction of music by mechanical means, which is a recent problem, is an experiment which will be watched with interest, for it is about the only portion of the new law which is not based upon long observation and ample experience. It is impossible to go into the subject of all of the changes in this issue and it will be advisable for those who are affected by the law to obtain copies of it, or seek specific information, regarding its effect upon their interests. One of the changes, however, of special interest to the drug trade, is that after June 25 applications for the registration of prints and labels will no longer be received at the Patent Office, but must be sent to the Register of Copyrights, Washington, D. C.

"Why do men with a common interest allow themselves to be so blinded by selfishness as to refuse to co-operate with others to promote the general welfare?" is a question asked by the editor of the *American Grocer*, who thus discourses upon a topic of pertinent interest in the drug trade: "That is as hard to solve as to explain why the human family avoid the development of their higher over their animal nature. We are given brains to develop and exercise, but somehow it is difficult for the average man to get in the habit of thinking

in the right direction. If we can succeed in getting grocers, big and little, thinking on the benefits of organization for their community, for their business and for society in general, our aim will be accomplished."

"This is a drug in the market," grumbled the convalescent man, when he received the Apothecary's bill.

The St. Ives Consolidated Mines, Ltd., has sent to its shareholders a report on its Cornwall property by Sir William Ramsay, F.R.S., consulting chemist to the British Radium Corporation. Speaking of the ores he has examined Sir William says: "They are fully equal in their productiveness for radio-active materials and uranium compounds to any pitch-blende which ever came under my notice from any part of the world." He recommends the immediate installation of a plant for the extraction of the valuable constituents of the company's ore.

When a druggist finds that his son lacks ordinary common sense he warns the boy of the hardships of the drug business and makes a doctor or a lawyer of him.

Hon. Gorham D. Gilman, senior member of the wholesale drug firm of Gilman Brothers, of Boston, reached his 87th birthday on May 29, and as a part of its observance, the venerable merchant and publicist took part in the after-dinner discussion on Hawaiian affairs at the regular meeting of the Twentieth Century Club. With but one exception, and that one being the Rev. Dr. Edward Everett Hale, Mr. Gilman is the club's oldest member.

Having formerly resided in Hawaii and carried on business there for 20 years, and having also served as Hawaiian Consul in Boston for several years, Mr. Gilman was able to speak with authority. The occasion was the return home of Rev. Charles F. Doll, president of the Twentieth Century Club, after a visit of three months in Hawaii, and as a prelude to his account of his visit, Mr. Gilman spoke of Hawaiian affairs, saying:

"Those islands are the only spot where a pound of bread, a gallon of water or a ton of coal can be obtained in a voyage between the western shores of America and those of Japan, China or the Philippines. They are invaluable as an outstation of the United States, for no war vessel has yet been constructed which can carry sufficient coal for a trip across the Pacific, except by recoaling there.

"There are no more kind-hearted and generous people in the world than the Hawaiians, and their honesty is so well known that I never locked my door during the 20 years I lived there."

Mr. Gilman extolled the work of the missionaries and said that "to the missionaries, and especially the women among them, should be given all the credit for what Hawaii is today.

"The most serious question now is," he said, "whether the Hawaiian people are capable of self-government. It is doubtful if a legislature composed of them would be able to enact proper laws at present, but I believe this problem can be worked out in time."

Mr. Gilman is a native of Maine, but has made his home in Massachusetts for most of his life. He has served many years in public life both for city, State and nation. He has also been active in trade and business affairs, and has been honored in many ways.

A pretty woman can get credit and leave the druggist with the impression that he thrust it upon her.

Raymond Welch, manager of the Boissnot drug store at Broadway and 78th street, Manhattan, was turning on the lights the other evening when a touring car with three women and a man stopped at the door.

"My machine has broken down," the man said to Mr.

Welch, "and I have got to get it towed to my garage in East Orange. I have only \$10 and it will cost me \$25 in all. I do not want the women, who have been my guests today, to know that I have no money, and I should like to get \$15. I will leave this watch with you, and my valet will be over and get it the first thing in the morning."

The man pulled out what looked like a massive gold watch and Mr. Welch did not have the slightest doubt that he was as he represented himself to be, a broker. Any way, Mr. Welch gave him \$15 and the man thanked him profusely.

Mr. Welch looked at the massive watch an hour later. It was a combination of brass and tin, worth 30 cents, warranted not to run alone and to stand anywhere without hitching. Mr. Welch told his story to the police, and a general alarm was sent out for a suave automobilist with three well-dressed women in a touring car.

George—If I had an airship I'd fly away and seek my fortune.

Howard—If you had an airship your fortune would come to you.

The presence of 3000 delegates at the International Congress of Applied Chemistry in London testifies to the extraordinary development of industrial chemistry within a quarter of a

century as a popular and lucrative profession, says the *New York World*. By the census of 1870 there were in the United States 752 metallurgists, assayers and practising chemists. By 1880 their number had nearly trebled. By 1890 it was 4503, and in 1900, 8847 persons were returned as engaged in these occupations. Today no great industrial corporation, no mill, no city, can dispense with the aid of chemists. They are to be found in a thousand factory laboratories, testing steel, flour, sugar, oil, analyzing water and milk, wine and whisky. Mr. Carnegie has acknowledged his debt to his chemists. One aniline-color works in Germany employs a corps of 320 trained chemists.

They are industry's consulting experts. In a sense they hold the world's commercial future in their hands. It is they who by wresting secrets from nature by the aid of their test-tubes and retorts supply the basis on which great fortunes are built. They are not alone the manufacturers' best allies; they are also part of the public's best defenders against adulteration and disease.

Hon. GORHAM D. GILMAN,  
of Boston, Mass.

Mrs. Matthews bought a French cookbook. The book told her, among other things, how to make ragouts and farcies and navarins out of left-over steak, the ends of roasts, cold vegetables and so forth. This was delightful. Hash, which Matthews hated, would be banished, and yet, as before, nothing would be wasted in the Matthews home.

So one evening she set her hungry, tired husband down to a paper-frilled novarin a l'Escoffier. The dish looked grand from the outside, and the man's wan face lit up at sight of it, but as soon as he lifted the lid, the joy faded from his eyes.

"Ask the blessing, please, George," his wife reminded him.

"I think, dear," George answered wearily, "we've blessed everything here before."

"He is thinking of making his will."

"What's he got to leave?"

"Nothing, but it sounds like prosperity to talk about it."

London's most awe-struck visitor recently was an old man from Iceland, who was enabled to make the visit which he has wished for all his life owing to the vagaries of a fin whale. The creature, which belongs to a race both valuable and nervous, ran ashore near the Iclander's home and was promptly dispatched. The proceeds of its sale gave the finder the money for the trip.

"So many of our people talk about going to England," he

declared, "but few go. We are not rich, for it is part of our creed to supply the needs of others before we serve ourselves. Iceland is one of the few places in the world where nobody can starve."

"You are surprised that I speak English—but almost everybody does in Iceland! Would you believe that we know our Shakespeare better than the average Englishman? It is part of our education, and we owe it not to our schools, but to what we have learned from our fathers."

"What is it a sign of," asked the innocent maid, "when a young man begins to tell a girl his troubles?"

"It is a sign that he will soon ask her to share them," answered the pretty widow.

Frank Wentworth, a member of the Newton Club, a scientific organization of Winsted, Conn., says that 2,000,000 years hence the wheel and steam turbine will be combined in the new human whose method of locomotion will be on wheels elevated from the present ball and socket joint.

The waste of tissue will be provided for by nourishment by absorption through the joint or rather pivot, and they will be driven by hot air, exactly after the manner of steam turbine, the air issuing from orifices in the axles and impinging on the blades in the wheel. The present respiratory system will, of course, be entirely superseded.

The speed of the new man will be about 40 miles an hour. The evolutionist does not say how the thing will be brought about.

"Why do you keep two automobiles?"

"I use the second one to bring along the things I'm likely to need in keeping the first one in running order."

It will not be necessary hereafter for persons bitten by rabid dogs in Louisville (Ky.) to go elsewhere in search of a madstone, for Emanuel Meyer, Representative in the Legislature from the 50th district, and associated with his brother, Samuel Meyer, in the drug business at 13th and Walnut streets, is the proud possessor of two of the stones, which were sent to him by an admirer in Morgan County.

The madstones are of a dark brown color and were the first ever discovered in Morgan County. They are highly prized, as they have been tested and their efficiency fully established, it is said, one in a case of rabies and the other for a copperhead snake bite. Both have the characteristics of the genuine madstone, in that the outlines of a dog are plainly discernible on each, a bulldog on one and a foxhound on the other. Out in the State to own a madstone is a great distinction, and people who have been bitten by dogs travel many miles to visit the fortunate owner of one for its application to the bite. After the stone adhering and then falling off, it is said that the victim will experience no ill-effects from the bite of a rabid dog.

"Has your automobile frightened any horses?"

"No," answered the novice. "But every now and then some horse turns suddenly into the road and gives me a scare."

James Lightbody, who was famous as a college athlete and who recently began a journalistic career in Berlin, is confined to his bed with a dislocated knee, the result apparently of a simple accident in his room. He had won several running races at an athletic meeting in Berlin two days previously and met with no accident on the field. He threw his knee out of joint while seated in his room by simply tossing one leg over the other. His condition is so serious it is feared that he never will be able to compete in races again.

"He seems to be very fond of music," said an auditor.

"He isn't," answered Miss Cayenne, "for he would not try to sing."

Astronomers from all parts of the world met in Paris last month to take part in the International Congress of the Map of the Sky, under the presidency of the director of the Paris Observatory. The compilation of this map is one of the most colossal and at the same time most delicate tasks ever attempted by men of science. Seventeen observatories—those of Greenwich, Rome, Catania, Helsingfors, Potsdam, Oxford, Bordeaux, Toulouse, Algiers, San Fernando, Tachbaya, San-

tiago de Chile, Cordoba (Argentina), Perth, Capetown, Sydney and Melbourne have been at work in their respective spheres for the past 22 years charting the portion of the heavens under their observation, by means of photography.

No fewer than 22,054 negatives have been taken, and over 2000 of them have now been engraved on copper. When completed, the map will give the exact position, measurements and size of 5,000,000 stars of the first to the eleventh magnitude, and of 50,000,000 down to the fourteenth magnitude.

The principal use of the map and catalogue will be to determine by scientific comparison many of the laws of celestial mechanics which have hitherto baffled exact examination, and to correct errors which have crept into the mass of calculations made by different astronomers.

"Grouty surprised his wife on her birthday anniversary with a novel gift."

"Indeed! What did he give her?"

"A pleasant look."

It was raining as it has before in the spring, and the man who had hurried into a shop which deals in garments and contrivances for inclement weather had asked for a 98-cent umbrella, says the Providence Tribune.

"I want a cheap umbrella," he said. "I'm through carrying expensive umbrellas for the benefit of unscrupulous people."

"All right," replied the salesman, cheerfully, "but a 98-cent umbrella isn't cheap, you want to bear that in mind, my friend. It isn't cheap if you lose it or have it stolen the first crack out of the box; a 10-cent umbrella wouldn't be cheap if you were that careless with it and it isn't cheap if you don't lose it. Why?"

"Because it's no good. It isn't made to last and it'll torment you half to death. The catch that keeps it shut comes off; the ribs break or bend so that it'll give you an argument every time you try to open it; it'll leak the third or fourth time you carry it and the handle comes loose. It's a shabby affair."

"I guess you're right," said the man thoughtfully. "I've never had much luck with cheap umbrellas. Give me one of those dollar-and-twelve-cent umbrellas."

Mother—Stop that, Willie! Do you expect me to speak to you every five minutes about that?

Willie—Oh, no! You'll get tired after awhile.

They have a strange way of combating the evils of alcoholism in Holland; in fact, the methods of the Anti-alcoholic League would suggest at first sight that they rather encouraged drinking than otherwise. The league undertakes for certain fixed fees to look after the safety of those who have imbibed not wisely but too well, thus no doubt making considerable revenue from a failing whose eradication is supposed to be the sole object of its existence.

When the officials of the league come upon a man whose ambulatory movements are a matter of speculation from one moment to another they undertake instead of ducking him in the nearest lake to escort him home for the sum of 75 centimes. Should he wish assistance in negotiating the rougher parts of the journey he can pay another 25 centimes to secure the bestowal of extra care. If his legs have passed beyond his control 1 franc 50 centimes will purchase an easy journey in a seat carried by two stalwart attendants.

The next grade of transportation is a humble wheelbarrow with a rug, price 1 franc 75 centimes, specially recommended for those whose backbones have a nasty habit of throwing themselves out of the perpendicular when their owners have overindulged themselves. So the tariff progresses until finally we come to the donkey cart, a conveyance de luxe provided at 2 francs 50 centimes for those intoxicated persons whose obesity renders them more than ordinarily incapable of helping themselves.

"Of course she's not a pretty baby now. Our only hope is that as she gets older she'll grow handsomer."

"Yes. I guess there's nothing for you to do but believe in 'age before beauty.'"

One of madam's latest fads is to perfume the flowers on her hat. Now, if she would only use Paris green to sprinkle on the spinach and other vegetables which she plants upon her hat good times would come to the drug business.

## Striking a Balance.

By Emma Gary Wallace.

It was not until millions were lost by indifferent and uncertain methods in farming, that the Government awoke to the real economic necessity for teaching the farmer the science of agriculture.

Now, Government bulletins, experiment stations, multitudes of trade papers and numerous agricultural schools teach the would-be husbandman how to test his seeds to determine their powers of germination, how to rotate his crops so that the soil may not become exhausted, how to mill his feed through the dairy and test the milk for butter-fat and the means of making the

best use of the fertilizer—in short, he is being taught the science of intelligent, concentrated energy.

Already the tide is turning. Agricultural lands are being eagerly sought. Legalized standards of quality and purity have materially improved market prices and prosperity bulks big for the future. And all because the man behind the plow is learning to strike a balance between the debit and the credit sides of systematic effort, and having found that balance to analyze it and to understand its relation to his own bank account.

Whether it ever will be possible for the Government to take the same position in regard to commercial pursuits is doubtful. Should Uncle Sam appoint business examiners and expert lecturers to pass upon and advise concerning mercantile ventures, even as he does upon banking concerns and agricultural matters, there would go forth a hue and cry of interference with personal liberty. And yet slipshod mercantile methods are likewise a gigantic menace to public prosperity.

### Unnecessary National Loss.

According to reliable financial authority 77.5 per cent of all business failures occurring in the year 1908 were due to the direct faults of those who failed, as against 22.5 per cent of those whose failures were brought about through causes over which they had no control.

If to the names of those who failed through preventable means could be added the names of those who barely kept afloat and of those who made but mediocre use of their time, capital and opportunities, the list would be simply appalling.

There is as great National loss and waste here as there was through improper tillage of the soil, and in all probability as there is through the devastation of our timber lands and forestry resources. There is a direct re-action upon the community, the Nation, and the industrial and commercial place we are able to hold among other world Powers.

A wise person guards his health so carefully that ordinarily preventable disease has no terror for him, and should he be attacked by maladies beyond his power to prevent or control, he seeks skilled assistance to correct or combat the difficulty. The far-sighted individual likewise watches over the daily health of his business enterprise, by constant observation, by regularly sizing up conditions, and in most cases no one is better prepared to act as the business doctor than the proprietor himself, providing he is willing to Face the Facts.

This cannot be done during the rush of business hours, nor yet in the company of others. It is absolutely essential that it all be thought out in quiet and the credit or censure placed exactly where it belongs regardless of sentiment.

### Saved a Tottering Enterprise.

Not many years ago, ten—to be exact, a book-keeper came to a small town to work for a paper company. He soon saw that his employers were much worried. He was a quiet sort of a fellow, and after watching affairs for awhile, he concluded that he was likely to be out of a job before long, unless some way was found to steady the tottering enterprise. He did considerable thinking all by himself in the quiet of summer evenings. He took long walks and did much figuring. Later he went to his superiors and told them modestly his opinion

as to why their returns were so unsatisfactory, and he pointed out the remedy. They were wise enough to listen and to heed. The threatened failure was averted and prosperity smiled upon them.

To-day that young man, not yet thirty-five years of age is drawing a salary of some ten thousand dollars a year and he has still a prospect of more. Where ever a business in the chain is not up to the mark, he goes and faces the facts. He finds out the WHY, prescribes the remedy and business after business is restored to, or placed upon the foundation of sound financial health. That young man had no exceptional opportunities of any kind, but he took the occasion to do for others what they failed to do for themselves. He does nothing that the men at the heads of those businesses might not do themselves if they used the same time, study, and disposition to succeed that he brings to them. Too many drift. They do not take time to strike a true balance. They shirk facing the facts.

### The Value of Location.

Every business must be constantly located—most of the ones that fail are not, at least until it is too late. They have a street and number to be sure, but they have little idea of their real location on the chart of business health. There is no compass in constant daily use by which to adjust the best course of action.

It is a matter of frequent remark that almost every city and town contains many small stores, especially drug stores, which bear the unmistakable evidence of the struggle for existence. Part of these sooner or later become submerged, some manage to hold their own and to produce a living, and still others forge steadily ahead becoming great oaks of commercial and professional strength. Practically the same door is open to all, with its outside precinct, its threshold and its magic beyond.

The first class of stores usually accept the returns of a busy season as a special dispensation of Providence to be enjoyed lest it be not repeated—and they stay without. The second class will pay bills with the money and anxiously long for continued prosperity, lingering on the threshold. The last division will analyze the situation, foster the conditions which have proved profitable, and enter squarely through the open door.

The up-to-date farmer who has a big crop of potatoes or corn this year should not be satisfied with that fact alone. He should know what is necessary to repeat his success. If the unusual yield is because of having mixed lime with the cold, damp land thus warming and drying it and assisting germination, he should not rest until he has discovered the correct proportions to use and the time to use it. Theory is not sufficient. It must be tested and followed up by application.

### Currents of Trade.

There are as definite currents of trade and good will as there are of wind and tide. It is the part of wisdom to locate and make the most of them; to realize that the tomorrow of business is exactly what the foresight and courage of today make it. It is not a thing of chance. It is the result of the cultivation it receives, skillful or otherwise.

Plenty of people disregard these currents and counter currents and find fault with not being in the right place in life. They bemoan unfortunate surroundings and insurmountable difficulties not realizing that if they but FILL the place in which God has placed them, they will do well but no more than their duty; and that only as they become splendidly worthy of greater things can they hope to overflow their present position and be borne upward upon the tide of merited advancement.

### Calling a Halt.

In the suburb of a small city there was a drug store which was perilously near failure. It was an uncomfortable fact that had to be faced by the brother and sister who jointly owned the business. As children they had known no stronger compulsion than their own desires. An unpleasant duty was something to be turned away from, and they had never been trained in the clear-cut art of finishing things undertaken.

Together they canvassed the situation. They found that they were frightfully behind. There had been a sort of continuous performance from month to month. Money had been received and paid out as seemed convenient or used for personal pleasure. There had been none of the quiet sizing up that

makes for comprehension of the details of today and security for tomorrow.

They were overwhelmed with the injustice they had been caused to suffer by being allowed to go into business and not understand its sterner principles. They determined to right about face and make as dignified a retreat as possible. It was a hard rub for awhile but, as they said, there was only one way to do, and that was to DO IT. Today they have a business which is honestly prosperous and there are no loose, frayed ends to be found anywhere. In a locked drawer is a neatly written card which has grown little by little in its wisdom, and every day is gauged by its measure:

#### "We May Prevent

*Incompetence* in any department. Has there been any loss from this cause today?

*Inexperience* in the general management of the business. Has every effort been made to profit by our own past experience and that of others?

*Unwise granting of credit*, or lax methods of collection.

*Under Capitalization* of Money

Efficiency

Courtesy

Good-will, sufficient for holding old

customers and gaining new ones.

*Neglect of business* because of doubtful habits of employers or employees. We owe our customers this insurance of safety.

*Personal extravagance*. If indulged in, has it been worth while?

*Any questionable transaction* which will not bear the searchlight of high principle.

*Jeopardizing our growth* by not expending the correct proportion of effort to gain our share of public patronage.

*Danger from disaster and the failure of others* by being reasonably safeguarded. Are we?"

\*\*\*\*\*

Have we built well and cemented into place in the wall of Prosperity the brick of today's business?

Has this balance been conscientiously struck?

If not, WHY NOT? Descending unfavorable conditions simply increases their potency for ill. *Face the Facts! Strike the correct balance!*

#### Delegates Elected to W.O.N.A.R.D. Convention.

PHILADELPHIA, June 5.—One of the most interesting meetings of the year was the May session of Chapter No. 6, W.O.N.A.R.D., at the College of Pharmacy. In addition to a delightful entertainment programme, considerable business was transacted. Perhaps the most important was the selection of delegates and alternates to the annual convention of the National organization at Louisville in September. The election resulted as follows: Mesdames Lee, Gano, Shull, Hoffecker, Peacock, Potts, Burke, Clapham, Henry, King, C. Moore, Morrette, Streeter, Fehr, Miss Haydock and Mrs. Hetrick. Alternates, Mrs. Lyons, Miss Morrison, Mesdames Reese, Stadelman, Comp, Krans, Eckels, Steltzer, Zion, Miss Kessler, Mesdames Neely, Allen, Cuthbert, Hunsberger, McCoy, Rohlfuss.

This was the last meeting of the chapter until October and the reports from officers and committees showed a most encouraging condition. The treasurer announced a balance of \$500, which does not include a fund of \$200 in the hands of the entertainment committee. This amount will be devoted exclusively to social purposes. The entertainment programme included a piano solo by Mrs. Gebhart, the reading of an original poem by Mrs. Gano and a second poem by Harry G. Comp which was read by the president, Mrs. William E. Lee; violin solos by Mr. Whitehead and an address by Thomas D. McElhennic, of Brooklyn, who was attending the exercises at the college held in connection with the presentation of a portrait of the late Prof. Edward Parrish to the institution by Prof. James M. Gould, of the St. Louis College of Pharmacy.

#### Massachusetts Druggist Jailed on Liquor Charge.

WORCESTER, June 5.—Donald J. Grenier, proprietor of a drug store at Canterbury and Grand streets, was sentenced to three months' imprisonment and to pay a fine of \$150, and Jenn L. Grand, his clerk, was fined \$100 on the charge of liquor keeping, in the Superior Court recently.

## Original and Selected

### INTERNATIONAL CONGRESS OF CHEMISTRY.

#### Section of Pharmaceutical Chemistry.

(From Our Regular Correspondent)

LONDON, June 2.—For the first time since its formation the International Congress of Chemistry has held its triennial session in London, the honorary president being Sir Henry Roscoe and the acting president Sir William Ramsay. This, the seventh international congress, was honored by the patronage of His Majesty the King and H.R.H. the Prince of Wales and was opened on May 27 and remained in session until June 2.

In the Pharmaceutical Chemistry Section, of which N. H. Martin was president, a number of useful papers were contributed, among the most valuable being those from the United States. The following are brief abstracts from some of the papers:

"Chemistry of the United States Pharmacopoeia from 1820 to 1906" was the subject of a paper by Joseph P. Remington, Ph.M., chairman of the Committee on Revision. The author demonstrated how a study of the U.S.P. for the first edition in 1820 to the last in 1909, showed the changes, and records the developments in pharmaceutical chemistry during that period, and commented on the influence of organic chemistry in the last 20 years, seen in the introduction of synthetic chemical substances. Referring to the great improvements in methods of manufacturing and the introduction of more accurate chemical tests for identity or purity, the author remarked that these facts denoted the great progress in applied chemistry and the greater perfection of methods of manufacture. If the chemical substances used in 1820 and 1830 were to be offered for sale in the United States in the year 1909 they would be rejected without question as not sufficiently pure for medicinal use. The agitation which is now taking place throughout the world for still greater purity was one of the signs of educational advancement.

"The Toxicity of Acetanilid Mixtures" was dealt with in a paper by Worth Hale, of the Public Health and Marine Hospital Service, Washington. The author dealt with a series of experiments undertaken at the Hygienic Laboratory to determine to what extent the toxicity of acetanilid could be affected by administering it in combination with certain other drugs, particularly caffeine. In experiments, upon both warm and cold blooded animals, caffeine was found to exert a fairly marked antagonistic effect so far as the heart rate was concerned, but it had only a very slight action upon the lessened contractile power of the heart muscle. The antagonism was so very imperfect that it was probably of very little value in relieving the heart distress of acetanilid poisoning, despite the popular belief in its efficacy.

"Organic Compounds of the United States Pharmacopoeia" was the subject of a paper by Samuel P. Sadler (member the Committee of Revision) in which the author showed the progress in the use of synthetic and organic compounds and the advances made in this class of medicines.

"Proposed International Standards for the Physiological Assay of the Heart Tonics of the Digitalis Series" were dealt with by E. M. Houghton, Ph.C., M.D. (Detroit). The author stated that the heart tonics of the digitalis series were among the most important classes of medicinal substances used in therapeutics in all civilized nations, it was extremely desirable that uniform standards be adopted. Such standards should be based upon the physiological action of the crude drug or its equivalent fluid preparation. As a means of determining or adopting proper standards, the author deemed it desirable that an international committee be appointed, consisting of three or more members from each country desiring to participate.

"The Solubilities of the Salicylates of the U.S. Pharmacopoeia in Aqueous Ethyl Alcohol Solutions at 25° C." was the subject of a communication from Atherton Seidell, who had determined the solubility curves of salicylic acid, phenyl salicylate, ammonium salicylate, sodium salicylate, lithium salicylate and strontium salicylate in alcohol solutions varying

## TRIO OF ACTIVE NEW ORLEANS PHARMACISTS WHO ARE OFFICERS OF LOUISIANA STATE PH.A.

JOHN E. SCOTT, New Orleans,  
elected first vice-president of the  
Louisiana State Pharm. Assc.

JOS T. BALTAR, New Orleans,  
elected second vice-president Louisiana  
State Pharmaceutical Association.

JOHN W. PATTERSON, New Orleans,  
elected corresponding secretary Louisi-  
ana State Pharmaceutical Assc.

in concentration between 0 and 100 per cent  $C_2H_5OH$ .

"Progress in the Standardization of Pharmacopoeial Drugs" was commented upon by A. B. Lyons, M.D. (member of the Committee on Revision). The author recalled that 15 years ago only a few drugs, opium, cinchona and nux vomica, were required by leading pharmacopoeias to be stated standard strength, while today the principle has been extended to include the following: Aconite, areca, belladonna, cantharides, ceradilla, coca, colchicum, filix mas, gelsemium, granatum, guarana, hydrastis, hyoscyamus, ipecacuanha, kola, physostigma, pilocarpus, scopola, stramonium and veratrum, and there are also on the market standardized preparations of convallaria, digitalis, ergot, lobelia, podophyllum, sanguinaria, strophanthus and other important drugs. Proceeding, the author stated that assays of crude drugs and galenical preparations were necessarily difficult, but it was reasonable to require that the limit of possible error should not be greater than perhaps 10 per cent above or below the ideal standard. He criticized the assay processes for several drugs and made suggestions thereon, and expressed the view that it was highly desirable that standards for the same drug should be made the same in all countries.

"The Standardization of Potent Drugs" was considered in a paper by P. W. Squire and C. M. Caines. The authors set forth the standards which had been fixed by the international agreement respecting the unification of the Pharmacopoeial Formulas for Potent Drugs signed at Brussels in 1906, and showed how far foreign pharmacopoeias issued since the proposal had adopted these standards. The paper also dealt with standards generally, and reference was made to the additions and corrections in the U.S.P., which were considered to be necessary when the National Food and Drugs Act, 1906, established the Pharmacopoeia as the authority by which the purity or otherwise of drugs was to be decided.

"The Necessity for the Application of Botanical Knowledge to the Chemical Investigations of Plants" was the subject of a contribution by E. M. Holmes (curator of the Pharmaceutical Society's Museums). The author suggested that as chemical investigations of plant products were often founded upon the material obtainable in commerce, the material used should be guaranteed pure by a competent botanist and histologist before it was subjected to chemical analysis.

"Organic Arsenic Compounds" was the subject of a paper by W. Harrison Martindale, Ph.D., in which he reviewed the numerous relatively non-toxic organic arsenic compounds which have been tried in therapeutics up to the present time.

"Variations in the Activity of Certain Toxic Drugs" were dealt with by P. McEwan and G. P. Forrester. The authors

referred to the diverse opinions on the valuation of certain drugs of European origin, especially aconite, belladonna, digitalis and henbane, which illustrate pharmacologically distinct classes and showed that there was need of inquiry in respect to them. The paper dealt comprehensively with the subject.

### PLANS FOR THE ATLANTIC CITY MEETING.

Papers of Interest to Physicians, as Well as to Pharmacists, on Philadelphia Branch's Programme.

PHILADELPHIA, June 5.—In connection with its exhibition of drugs and pharmaceutical processes at the convention of the American Medical Association in Atlantic City, the Philadelphia Branch of the American Pharmaceutical Association will hold a scientific meeting for the purpose of presenting and discussing papers on topics relating to the U.S.P., N.F., and N.N.R. The meeting will be held on Friday morning, June 11, and will be in charge of the officers of the Philadelphia Branch.

Secretary Ambrose Hunsberger furnishes the following partial list of papers that will be presented: "U.S.P. and N.F. Preparations versus Nostrums," by Otto Raubenheimer, of Brooklyn; "The Relation of the N.N.R. to the U.S.P.," by M. I. Wilbert, of Washington; "Improvements in the N.F.," by George M. Beringer, of Camden; "The Tests of the U.S.P.," by Prof. I. V. S. Stanislaus, of Philadelphia.

Other papers, the titles of which have not yet been announced but which are related to the foregoing topics, will be presented by Prof. Joseph P. Remington, of Philadelphia, and Prof. H. P. Hyslop, of Baltimore. The various papers will be discussed by prominent pharmacists and physicians attending the convention.

Invitations to attend this meeting are extended to all who are interested in improving the standard formulas for medicinal preparations.

### Wanted—A Picture of Dr. Theo. Fay.

The St. Louis College of Pharmacy is quite anxious to secure a picture, print or photo, of Dr. Theo. Fay, professor of chemistry in the early seventies and the dean. H. M. Whelpley, 222 South Broadway, St. Louis, will appreciate any hint as to the whereabouts of a picture.

### Prescott Club Elects Officers for Next Semester.

ANN ARBOR, June 5.—The Prescott Club has elected the following officers for next semester: President, A. W. Frame; vice-president, E. T. Maynard; secretary, A. F. Schlichting; treasurer, F. E. Ingram; press representative, S. Greenbaum.

## Harrowed and Rolled.

By Joel Blanc.

It happened this morning. When I came into the room, Mama threw up her hands in horror, son rolled on the floor in a paroxysm of laughter and then asked if he should send for the "amberlance." My face felt as though it had been carved by a harrow, smoothed by a steam roller and then seared with hot irons. As the actions of my independent dependents indicated that my mugziognomy looked as it felt, I turned and gazed in the mirror. From below either ear and meeting at the point of my temperamental chin there was a wide band of white that

looked almost like the bandage that is sometimes used to keep shut the mouth of a valuable corpse. Above this, my mustache dripped brilliantine, liquefied pomade and witch hazel. My erstwhile brilliant orbs were clouded by veils of soap-induced tears and above all my massive brunette brow, in contrast with my chin, seemed like a thunder cloud above a white-capped bar. Last and most gruesome, adown my neck, beneath the band of white, my life blood ebbed in coral rivulets. I had been boss-harrowed!

The visit was by no means the first that I had made to that barbersorial parlor, but on previous occasions I had been renovated by either one of the three mere day-wagers and had come away refreshed and calmed. This particular morning, however, it was my fate to be "next" for the first chair, the one presided over by the boss. Now, it stands to reason that the man who is bright enough to become owner of a shop *knows how and can shave* and cut just as well as his hirelings. But be this as it may, all the while I was in that operating chair the boss was bossing. He divided his gaze between me and the occupants and operators of the three other chairs. Anon the boss hung his razor over my ear, with the edge inward, while he rung up the register and took in the coins. He watched and manuevered every shave except the one he was perpetrating upon me. He tried to look west under my left ear and at the same time tried to keep a steadfast gaze to the east, to prevent any one of his workmen from knocking down a tip. While he was chatting pleasantly with one of his "owns-his-own-mug" patrons, his bossness sacrificed the left gable of my jaw and in trying to repair the damage and at the same time pay the gas bill, he jammed a styptic pencil into my right eye. Thus I bled, and at the first opportunity fled.

Did you ever notice that while many men have favorite barbers and will pass several turns to wait for "Henry" or "Jacob," that it is seldom, if ever, that any one appears who craves the service of the boss?

The relation of the foregoing incident is intended to gently and inoffensively lead up to the statement that the antics of the demon boss barber are merely kitchish ways when compared with the high old hurricanatics of some drug store owners. While the damage was not corporeal, I have been a sad and silent witness on numerous occasions of harrowing and rolling by retail druggists. The most inefficient salesmen I have ever seen in retail drug stores have been the men who owned them. In using the word inefficient, I draw a little closer definition than old Noah did, for I do not mean incapable. It is possible, even probable, that these salesmenlike gymnasts were first-rate salesmen when they were clerks, but the family tree of the Buttinsky clan became dead wood when these druggists became store owners.

For heaven's sake, gentlemen, if you have a clerk let him clerk! Even if he is not entirely fit, do not magnify and expose his unfitness by going into fits yourself. Druggists who are in all ways thoroughly capable, sometimes show a lack of simple common sense in their performances behind the counter. In trying to be the whole show they certainly do make a holy show of themselves.

If you are pretending to wait upon a customer, Mr. Drug Boss, for pity's sake wait on him and do not expect him to wait while you are helping your clerks to serve several other patrons. Druggist Fidgets treats his clerks as if they were automatons with their machinery out of whack. He tells the Senior to show the lady that, instructs the Junior how to wrap this package and yells at the Boy to give less of that candy for a dime. In one breath he informs the patron before him that the price of the perfume is 40 cents an ounce and assures another party that he has something fine for bugs. He goes to the back of the store to secure the articles demanded by three different people and when he does come forward he gives sticky fly paper to the woman who wanted quinine pills, gives the pills to the woman who came for a nursing bottle, and hands the nursing bottle to a grouchy old bachelor. He yells at the clerk who has just sold an article, marked in plain, half-inch figures, "How much did you charge for that?" Just as two people take seats at the fountain he orders the dispenser to go down cellar and open a case of mineral water. When a clerk is quietly and gently showing rubber goods to a woman who stands at the far end of the counter, he butts in and at the top of his voice tells her all that the clerk has just told her, and if some one goes out without making a purchase, he chases her clear through the door to find out what was wrong with the clerk—and he does find out that the party only came in to ask the way to the post-office.

The strangest thing about this stripe of druggist is that outside of his store he is cool, calm and dignified. In relations with all but his clerks and patrons, he is respectful and non-interfering. Neither may it be said that this sort of druggist is invariably penny-pinching and in fear that a dime purchase may remain unmade. He is, as a general thing, anxious to be fair and just with both patrons and clerks. In fact, the trouble is that he is over-anxious.

Such a man drives business away from his store. That which in reality is but a sincere desire on his part to please, becomes by his insistence and manner irritating and grates upon the nerves. Commendable in intention as his zealotness is it, in effect, gives one the impression of attempting to force people to accept what they do not want. Although he may at heart really trust his clerks, his continual suggestion and persistent comment make the purchasing public lose confidence in the clerks and consequently in the business and its owner also.

Far be it from me to deny the value of the personal element in the retail drug business. It is a mighty valuable asset, but the personal element that makes the lasting impression is not one which scratches its characteristics upon everyone and everything around it. A man's personality should have its impressions transferred to others with a brush, not with a harrow and roller. A truly controlling personality is one which makes its magnetism felt as a silent force, not one which flies hither and thither like one of those impish little fire-works called a "nigger chaser."

Another way this sort of druggist gets himself into trouble is by his over-zealous effort to be sociable and sympathetic. He gets an idea into his head that he must have something of a personal nature to say to every one who enters his store and the first thing he knows he is mixed up in gossip and has a woman with a horse-whip and a man with a gun after him.

We know that at the presentation of every play on the stage there is a man in the wings with a prompt book. We do not see him and rarely do we hear his voice, but we know that he is there. Suppose that he flitted around the stage repeating a few lines for one actor, adjusting the head-dress of another, giving the orchestra leader his cue and spent the rest of his time yelling at the scene-shifters, electricians and supes, would we not think that he was spoiling the whole show by making a holy show of himself? Well, that is just the sort of a performance that many druggists give. It is true that the same antics are indulged in by grocers, butchers, jewelers, clothiers, hatters, barbers and misrepresentatives of many other classes of tradesmen. We know that the drug store man is not pleased with this kind of service when he gets it from the Jack-in-the-box keeper of another sort of store. Then why should he expect the same antics to appeal to his patrons? How can druggists break themselves of this objectionable habit? By remembering that the way to make clerks competent to attend to their own business is to show them that you know how to attend to what is strictly your business.

A MONTHLY SERIES OF PRACTICAL AND EDUCATIONAL QUESTIONS FOR DRUG CLERKS AND STUDENTS, WITH THREE CASH PRIZES EACH MONTH FOR THE MOST CORRECT ANSWERS.

Published Weekly with a New Series Each Month

THREE PRIZES OF \$5.00, \$3.00 and \$2.00 respectively, will be paid each month to the three persons submitting the largest number of correct answers to each series of questions. This competition is open to all who may desire to compete.

ANSWER BY NUMBERS and write your answers upon letter-size paper (one side only), with your Name and Address at TOP of each sheet. Also number your sheets.

ALL ANSWERS for each month's series of questions must be with us not later than the 20th of the following month.

WE INVITE our readers to send us their questions for publication in this department; particularly those connected with the practical work of drug clerks.

ALL COMMUNICATIONS relating to this department should be kept separate from other correspondence, and addressed to

### The Quiz Master

Care The Pharmaceutical Era 90 William St., New York

June Series 1909.

- 1—What is the reason for using glass or rubber stoppers for bottles containing Ammonia Water?
- 2—What is meant by filtration, and of what importance is the process to pharmacists?
- 3—Why in cleaning pharmaceutical utensils is it best to separate those containing oily or greasy substances and wash them separately?
- 4—What would you dispense, if a customer called for Red Precipitate? Give some of the medicinal uses of this substance.
- 5—What is the objection to measuring Spirit of Camphor in a graduate wet with water?
- 6—What is the appearance of Licorice Root, and for what is it used? How does it taste?
- 7—How much U.S.P. Tincture of Opium would you sell for ten cents, if the retail price upon the stock bottle was marked \$1.50 per Oz?
- 8—What is the difference in chemical composition between Rochelle Salt and Epsom Salt?
- 9—How would you prepare a Seidlitz Powder to be taken immediately by a customer in the store?
- 10—Why is it of special advantage at this time of the year to be posted upon the method of preparation, dose and medicinal uses of Solution of Magnesium Citrate?
- 11—What is meant by U.S.P. Preparations and U.S.P. Strength?
- 12—What two systems of measuring liquids are found upon many graduates used in stores?
- 13—Why should camphor be kept in a closely covered container?
- 14—What is the purpose of the divided scale at the top of the pill tile?
- 15—What is the difference between spirits turpentine and oil turpentine?
- 16—How would you clean a graduate in which glycerin was dispensed?
- 17—What is the meaning of an official preparation?
- 18—What systems of weights are used in dispensing prescriptions?

19—What causes stoppers sometimes to blow out of ammonia water bottles?

20—What change will carbolic acid crystals undergo, if exposed to the air for some time?

21—What is wanted when a customer calls for sal tartar; paregoric; sweet spirit of nitre?

22—What is the average dose of Epsom salt, and what are the medicinal properties of this salt?

23—Why should hydrochloric acid be handled with care, and be kept in glass-stoppered bottles?

24—What is meant by a chemical element?

25—What is distilled water? Why should it be used in prescription work?

26—What is the best solvent for quinine sulphate; potassium iodide; mercuric chloride?

27—Why are prescriptions generally written in Latin?

28—How many minims in a teaspoonful and how many teaspoonfuls equal a fluidounce?

29—How many grains in an apothecary dram; in an apothecary pound?

30—What would be an aid in reducing camphor to a fine powder?

31—What is meant by a crude drug?

32—What is a pill excipient and name three in general use?

33—What is a fluidextract? Do they vary in strength?

34—What what three kingdoms are drugs obtained?

35—How would you dispense an aqueous or alcoholic liquid prescription containing bismuth subnitrate?

36—What is blue ointment? Is it official?

37—What effect does carbolic acid have upon the hands?

38—What are the two solvents mostly used in pharmacy?

39—What are the ingredients of Basham's mixture?

40—What is the opium strength of laudanum; of paregoric?

41—What is the official English name for golden seal; sweet flag; flax seed; pink root?

42—How would you clean a pill-tile quickly and thoroughly, after making an ointment upon it?

43—Why should rubber tubing never be left for any length of time with sharp bends in it?

44—What is a corrosive substance?

45—At the prescription counter, why is it always best to clean the soiled utensils as soon as possible after using?

46—What is the objection to dispensing rancid ointments?

47—What is a common name for cypripedium; for matricaria; for quillaja; for pilocarpus?

48—What is an antidote?

49—What is the unit of weight in the metric system? How many grains in this unit?

50—For what do the following abbreviations stand: āā; ū.ū.; p.r.n.; post. cib.?

### COMPETITORS, PLEASE NOTICE!

The above fifty questions is the complete series for June, and all who desire to compete for the prizes should see that their answers are received by me not later than July 20.

Do not send in your answers in parts, but send them in all at one time, and be sure to follow the instructions given at the head of this page. If you do not write on letter paper (one side only) or if you fail to follow any of the printed instructions, your answers cannot be considered.

It is my intention to publish the correct answers to each series of questions in a subsequent issue, the dates of which will be announced later.

I wish to express my thanks for the interest our subscribers are already manifesting in this department. The letters so far received are most encouraging, and the indications are that these questions will prove of material help to the young men in drug stores who are ambitious to become proficient in the practice of pharmacy.

THE QUIZ MASTER.

# QUESTION BOX

THE OBJECT of this department is to furnish our subscribers and their clerks with reliable and tried formulas, and to discuss questions relating to practical pharmacy, prescription work, dispensing difficulties, etc. Requests for information are not acknowledged by mail, and ANONYMOUS COMMUNICATIONS RECEIVE NO ATTENTION; neither do we answer questions in this department from non-subscribers.

In this department frequent reference is necessarily made to information published in previous issues of The Era. Copies of these may be obtained at 10 cents each, except a few issues which are out of print, for which we charge 25 cents each.

## N.A.R.D. Cost Mark.

(H. D. Co.)—The N.A.R.D. cost mark is the word "P-H-A-R-M-A-C-I-S-T," not "pharmacist," as the types made us say in our reply to your query in last week's issue of the ERA, page 518. As before stated, the several letters in the order in which they appear in the word represent the figures "1, 2, 3, 4, 5," etc.

## Gas Igniter.

(E. C. G.)—We do not recall the previous description of the Japanese "fire sticks" to which you refer, but most of the "self-lighting bodies" for coal gas are the outcome of Dobeiner's discovery that spongy platinum is capable of igniting a mixture of hydrogen with oxygen or atmospheric air. Coal gas, however, cannot be ignited by spongy platinum, even when the latter is incandescent. Rosenfeld in 1888 discovered that a warm platinum wire becomes incandescent when held at the point of commingling of air and coal gas; by combining one or more platinum wires with some spongy platinum, he invented the first "self-lighter" for coal gas. Spongy platinum soon loses its highly porous character if exposed much to the heat of the flame, but this depreciation is minimized by using a porous refractory support for the finely divided platinum. To accomplish this end inventors have used different materials. One dipped "pills" of asbestos or merschaum into platinum chloride solution, dried them, and reduced the chloride to metallic platinum by means of reducing gases. These pills were used in combination with a platinum wire, on Rosenfeld's principle. Another inventor dissolved platinum chloride and thorium nitrate together, and by dipping into this a cotton fabric which had been woven with fine platinum wires, and then burning out the cotton, an effective body was obtained, consisting of platinum wires intertwined with a mixture of thorium and platinum black. Putzke stitched such a body to the top of an incandescent mantle and in addition applied an "igniting line" of iridium from the top to the bottom of the mantle.

Some other general information on this subject may be found in the ERA of January 10, 1907, page 35.

## Compound Syrup of White Pine.

(A. C. Ltd.)—A standard formula for compound syrup of white pine may be found in the National Formulary, and the preparation made from it is the only one entitled to the name without other designation under the Federal Food and Drugs Act. For the sake of uniformity you should use the N.F. preparation, but a formula in which fluidextracts are employed is the following:

Fluidextract of white pine	1 fl. ounce.
Fluidextract of wild cherry	1 fl. ounce.
Fluidextract of bloodroot	.56 minims.
Fluidextract of spikenard	.64 minims.
Fluidextract of balm of gilead buds	.64 minims.
Fluidextract of sassafras bark	.32 minims.
Morphine sulphate	3 grains.
Chloroform	.64 minims.
Purified talcum	2 drams.
Sugar	12 troy ozs.
Water, enough to make	16 fl. ounces.

Mix the fluidextracts with about six ounces of water and the purified talcum and stir or agitate about 15 or 20 minutes. Transfer the mixture to a wetted filter, and when the liquid

ceases to drop from the funnel, wash the contents of the filter with water until eight ounces of filtrate have been obtained. In this dissolve the sugar and the morphine sulphate by agitation and add enough water, previously passed through the filter, to make with the chloroform when added to the syrup, 16 fluidounces. Lastly add the chloroform and shake thoroughly.

## Color Change of Apomorphine Hydrochloride.

(T. D. C.)—"Will you kindly explain why an aqueous solution of terpin hydrate, heroin and apomorphine hydrochloride should turn blue on standing for a few days? I have had a mixture returned in this condition."

The color change noted in this mixture is primarily due to the apomorphine hydrochloride, a subject that was discussed at some length in this department of the ERA November 15, 1906, page 457. The dispensatories also give some information. Apomorphine hydrochloride is very susceptible to decomposition on standing in solution, a condition that is further accentuated if the glass bottle which contains the solution be slightly alkaline. Aqueous solutions of apomorphine also become green and decompose on standing, but this may be prevented by adding a few drops of hydrochloric acid.

## French Snuff: Freezing Lotion.

(J. M. G.)—"Please inform me through the Question Box something about a preparation called 'French snuff,' which produces severe sneezing, and another preparation called by various names, chiefly 'Hurry-up,' and used as a freezing lotion on animals."

We know of no specific preparations under the names given. If a tobacco snuff is wanted, here is a formula that has been printed under the name "French snuff":

Boil dried prunes, 8½ pounds; juniper berries, 1 pound; tamarinds, 1½ pounds; syrup, 3¼ pounds; sal ammoniac, 8¼ ounces; salt of tartar, 1 pound, and common salt, 12½ pounds, in 6 gallons of water, and then add ½ gallon of French brandy and 1½ quarts of wine vinegar. Moisten as much tobacco powder as possible with this mixture and pack the finished snuff in tin foil. The snuff improves with age.

By a "freezing lotion" we assume that some of the quickly evaporating liquids used in spray solutions to produce local anaesthesia is intended. Of these, carbon disulphide, thizolene, chloride of ethyl and other ethereal compounds have been employed. Thizolene boils at about 18° C. and is said to be well adapted for producing congelation of the blood in surgical operations. According to the National Standard Dispensary, H. J. Bigelow claims that by evaporation of thizolene in a common spray atomizer a temperature of -9° C. can be produced and hence it would seem to be well adapted for any purpose where a great degree of cold is desired.

Ethyl chloride as a local anaesthetic, as is well known, is sprayed upon the part which is to be anaesthetized, being driven, from a glass tube which contains it, through a fine opening at the end of the tube, the heat of the hand causing sufficient vaporization to produce pressure and to cause free escape of the liquid. Its rapid evaporation as it strikes the skin produces a momentary redness, followed by the sudden appearance of a white spot, which is due to freezing taking place, and, while this lasts, the incision is made. Of course, such anaesthesia is useful only in minor surgical operations.

## Removing Sweat Stains From Silk.

(E. M. S.)—Sweat stains may be removed from most fabrics by first applying a strong solution of soda and subsequently rinsing the fabric with water. A preparation made according to the following formula has also been recommended for the purpose:

Oleate of ammonia	2 ounces.
Solution of ammonia	2 ounces.
Ether	1 ounce.
Benzine	5 ounces.
Chloroform	1 ounce.

Mix the solution and oleate; shake well and add the ether; shake and add five ounces of benzine; agitate thoroughly. Allow to stand for a few minutes and shake at intervals, when a mixture having the consistency of cream and showing but little tendency to separate will result.

The only noticeable thing about some druggists is that they never seem to notice anything.

In the *ERAS* "Push Price Competition" column this week have decided to award the \$5 Cash Prize in Contest No. 2 to C. H. Hutschmiller, window dresser for T. P. Taylor & Company, 216 Fourth avenue, Louisville, Ky. The window, which is illustrated herewith, produced excellent results both in stimulating trade and in comment. It also shows what druggists can do in the way of window displays advertising toilet articles. Under the heading "A Unique Window" the local paper makes the following comment: "A display that has attracted a great deal of attention, from the fact that it is different from the many window displays usually seen in drug stores, can be seen in Taylor's Drug Store at 458 Fourth avenue. A handsomely gowned woman, standing before her dressing table, putting on the finishing touches preparatory to making a social call—a stylish hat, cloak and gloves ready to be donned. The box of American Beauties is evidence that she may be expecting company. In all, it is well arranged to call attention to the numerous toilet articles, which are tastefully displayed." The Taylor Company has two stores.

all nursing bottles, drying, polishing and placing a cork in them, and then separately wrapping each in tissue paper. This is what a New England druggist does and he almost controls the nursing bottle trade of his town.

This druggist not only sells from sample cards and books, such as have been previously described in the ERA, but he also sells nursing bottles, syringes and numerous other articles from samples. He sells nipples from a sample card and his stock of these goods is kept ready for delivery in antiseptic form. He has his boy use odd moments for separately wrapping each nipple in a bit of paraffin paper by twisting the edges and turning them into the opening of the nipple.

#### A Few Bits of Cotton.

This enterprising Yankee has a pledge of cotton placed in the joint end of every fountain and bulb syringe tube, and over the outlets of all such tubes a bit of cotton is wrapped and held in place with a rubber band. It is also the practice of this druggist to call the attention of the public, both in print and by word of mouth, to his precautionary measures.

#### "Germ Proof Washrags."

A druggist who believed that he was "stuck" on a large quantity of washrags adopted the suggestion of one of his clerks and enclosed each rag in a semi-transparent envelope and then sealed each envelope with red wax—using plenty of wax. These "antiseptic, germ proof washrags in hermetically sealed packages" sold rapidly at 15 cents or two for 25 cents. The former price had been 10 cents.

#### Counter Packages.

The enterprising druggist of the present does not weigh out each ounce or pound of counter drugs as called for. He has his salts, cream of tartar, acetic acid, and so on, ready put up in neat boxes or packages of various sizes. If he does, as he should do, put such goods in boxes, he will add much to their attractiveness and also at the same time secure great advertising by wrapping each box in transparent bond paper, shrunken on and pasted. The method of placing such wrappers was described in the ERA some weeks ago.

The druggist who serves counter goods so wrapped should and honestly can advertise that his drugs are put up in moisture, dust and germ proof packages.

#### The Cleanliness of Glass.

The inherent cleanliness of glass is fully comprehended by the general public. Therefore its unusual use as a counter is of great advertising value. A bunch of quill toothpicks, a small face sponge or charmois enclosed in a salt-water bottle that is tightly sealed, will sell for twice as much as without the bottle. The woman who comes in to purchase one nipple will generally buy half a dozen or even a dozen in a sealed glass package—and pay for the package.

#### Aluminum Cases.

A certain druggist built up a very large prescription business by using extreme care in making all his packages "antiseptic." All his prescription packages, whether bottles or boxes are first wrapped and sealed in paraffin paper before being inclosed in the outer wrapper. This druggist is liked by physicians because, aside from his pharmaceutical expertness and trustworthiness, his packages are such as to give the patient added respect for the physician. One of this pharmacist's special hobbies and one that has proved a fine advertisement is to enclose all suppositories, soft capsules and uncoated pills in aluminum boxes. The boxes are labeled with the information that the package is an "antiseptic, germ proof aluminum suppository, capsule or pill case," as the case may be.

All the world is dodging germs and the average husky six-footer is more afraid of a microbe than he is of a wild bull. Bear this in mind and use your legitimate skill and business ability to make this universal thought of the day a profitable advertising asset.

#### Sunday Closing Movement in New Jersey

PATERSON, June 5.—A State-wide programme, having for its object the ultimate closing of drug stores on Sundays, had its inception at the May meeting of the Paterson Pharmaceutical Association. A number of pharmacists from Newark, Jersey City and Elizabeth were present, and pledged their support in the closing movement. Steps were taken to have an association formed in Newark on lines similar to the Paterson organization.

## WORKING UP THE PROFITS IN POST CARDS.

### New York Drug Firm, by Means of Better Displays and Up-to-date Methods, Builds Enormous Business.

Those acquainted with the picture post card department of Reid, Yeomans & Cubitt, 140 Nassau street, Manhattan Borough, New York City, will not be surprised to learn that the little additional space recently secured by altering the entrance to this busy store, has been appropriated to the card department for display purposes. Almost one whole side of the store is now devoted to this line of goods which are so arranged, both in regard to price and subject, that any certain card can be located at a moment's notice.

As a matter of fact the firm was the first in the downtown district to attempt a display differing from the conservative methods in vogue preceding the "craze." The beginning was made with hangers in the window and two small racks in the rear of the store, with sales averaging 25 to 50 cents a day. The results, however, after the cards were given a conspicuous place indicated the possibilities of the business and aggressive methods were at once planned and carried into effect as required.

In two years the average daily sales of cards have gradually crept to over the \$30 mark; and to be exact the sales from January 1 to December 31, 1907, amounted to \$9084.41. Last year's figures were even higher. The following figures are of interest as showing the amount of sales during holidays: Easter, 1908, 10 days, \$486; Easter, 1909, 10 days, \$500.40; Christmas and New Year's, 1907, 10 days, \$1156.08; Christmas and New Year's, 1908, 10 days, \$1277.92.

The window and a large frame in the doorway are always in use for displays. In the store there are about 40 revolving racks, one alone holding 11,200 cards. On the top of two large cases, pyramids have been built with 500 cases. Besides these displays there are 52 large drawers full of stock alphabetically arranged by card system and a large stock of "season cards" on the second floor.

The cards are of all varieties, the price ranging from 1 cent to 75 cents. Over 200 city views are in one collection alone.

Mr. Yeomans in speaking of the methods used in this department stated that conspicuousness was the leading feature next to quality and appropriate goods.

"For convenience of customers all cards are neatly priced and an expert who is posted in every detail connected with the business is in constant charge," said Mr. Yeomans. "We do not pay much attention to any cards that take up much room, for instance, the folding cards, which also require time and attention to explain to the buyer. Every Saturday a 'special' from broken lots or older cards is put out in order to secure room for new goods and attract trade for the regular lines."

## ERA COURSE IN PHARMACY.

### Graduates June, 1909.

Matriculation	Examination
No.	Grade, p. c.
5874. Homer D. Jagers, Santa Rosa, Cal.....	95
5881. Charles J. Goetze, Baltimore, Md.....	98
5898. John A. West, Deming, Wash.....	98
5908. Paul N. Clancy, Syracuse, N. Y.....	98

The above graduates will receive diplomas within a short time. A large and very handsomely engraved diploma, printed on artificial parchment, with the graduate's name engrossed, especially suited for framing, will be furnished to all those who request it for the sum of \$2. Those desiring the latter should forward the necessary fee to THE PHARMACEUTICAL ERA.

### Candle Burning Contest a Good Advertisement.

Henry Seefeldt has been awarded the first prize for guessing the exact time which the big candle, displayed in the windows of the Eberle Pharmacy, Milwaukee, took to be consumed. The candle, 50 inches long and weighing eight pounds, burned 120 hours and 30 minutes. The contest aroused considerable interest.

### Has the Raw Material.

"Not every man is made a fool of," remarked the observer of men and things, "but every man has the raw material in him."

## PERSONAL MENTION

—RAY SCHEETZ, of Bath, Pa., was a recent visitor to his mother in Pottstown.

—J. B. PYNE commenced his duties as a representative for Parke, Davis & Co. in Connecticut last Monday.

—N. J. FINLEY, of Glen Cove, L. I., N. Y., was a caller in the New York City wholesale trade a few days ago.

—R. L. CANTER, formerly in business at Wilksburg, is now identified with the May Drug Company, of Pittsburg.

—J. FRANK LEHR, president of the St. Cloud Pharmacy Company, of Philadelphia, is improving slowly after a severe illness.

—C. J. HELLAND, of Mount Horeb, Wis., has accepted a position at the Eighmy Brothers pharmacy at Fort Atkinson, Wis.

—E. A. KEIFER, manager of the Henwood Pharmacy, Scranton, Pa., was in New York City last week renewing acquaintances.

—W. S. ELKIN, JR., of Atlanta, president of the N.A.R.D., has been elected president and general manager of the Bowden Lithia Springs Water Company.

—SAMUEL K. FISCHER, a well known Philadelphia pharmacist, who recently sold his store, has planned to take an extended trip to the Pacific Coast.

—BERT MULLIN, of the drug firm of Hargrove & Mullin, Rushville, Ind., is being urged by his friends for the Republican nomination for City Clerk.

—EDWARD F. PFAFF, of the New York City staff of salesmen of Eli Lilly & Co., has returned from a visit to the home office of the concern in Indianapolis.

—JAMES NICHOLS, a Cincinnati druggist, has been appointed as a clerk in the adjutant general's office at Columbus, Ohio, by Governor Harmon. He has assumed his new duties.

—GEORGE KOEHLER, formerly connected with the Kamps & Sackstedt Drug Company, of Appleton, is now traveling salesman for the Roemer Drug Company, of Milwaukee.

—DR. R. H. GIBSON, formerly of the United States Marine Hospital Service, has been appointed manager of P. L. Cusack's store, Baronne and Canal streets, New Orleans.

—W. T. WELLS, of the Columbus Pharmaceutical Company, Columbus, Ohio, is being pushed forward by numerous citizens for the nomination for mayor of the city on the Republican ticket.

—J. M. SCHORPP, a well known Philadelphia druggist, accompanied by his wife, celebrated the fifth anniversary of their wedding by an extended trip to various points of interest in Pennsylvania.

—LOUIS DOHME, president of Sharp & Dohme, Baltimore, was a New York City visitor during the forepart of this week. He was accompanied by W. A. Sailer, head of the firm's sales department.

—OSCAR H. LICHTENBERG has been secured as pharmacist by J. W. Boynton & Son at Stevens Point, Wis. Perry E. Boynton will leave for Milwaukee in a short time to complete his course in pharmacy.

—GEORGE MACKIE has just returned to New York from an extensive western trip in the interest of the importing department of Parke, Davis & Co. Mr. Mackie also covered a large area of Canadian territory.

—O. M. LENIGER, of Danville, Pa., has built a model houseboat in which to spend his summer vacation on the river. The boat draws but five inches of water and will be propelled by an eight horse-power gasoline engine.

—R. H. WALKER, of Gonzales, secretary of the Texas State Board of Pharmacy, has been selected to represent that body at the annual meeting of the National Association of Boards of Pharmacy at Los Angeles in August.

—GEORGE F. SWARTS, member of the Illinois Ph.A. and pioneer druggist of Freeport, has just celebrated the 40th anniversary of his beginning in his present pharmacy as proprietor. He has sold drugs now for 48 years.

—DR. H. D. HATTERY, of Logansport, who recently sold his pharmacy and retired from active business, was a pioneer physician and pharmacist of Cass County, Indiana. He is 64 years old and believes that he has earned a rest.

—DR. JULIUS A. KOCH, dean of the Pittsburg College of

Pharmacy, is spending the spring months, accompanied by his two sisters and two daughters, touring through France, Switzerland and Prussia. The party will return in July.

—W. B. KAUFMAN, of New York, head of the importing department of Parke, Davis & Co., returned to his duties last Monday after a long absence due to serious illness. A large bouquet of roses in honor of the occasion was placed on his desk by the employees.

—CLARENCE H. CAMPBELL, the recently elected president of the Alumni Association of the Philadelphia College of Pharmacy, was a New York visitor last week. With Mrs. Campbell, he was the guest of his brother, L. H. Campbell, a prominent patent attorney of this city.

—DR. I. V. S. STANISLAUS, dean of the department of pharmacy of the Medico-Chirurgical College of Philadelphia, was the guest recently of his friend, Harry C. Blair, a prominent pharmacist of Philadelphia, at his summer home on the Delaware River, at Edgewater Park, N. J.

—LOUIS K. LOGGETT, of Boston, who has been president of the United Drug Company of that city since 1903, was guest of honor at a dinner given by Minnesota and Wisconsin representatives of the company recently at the Hotel Nicolet, in Minneapolis. Thomas Voegelé was toastmaster.

—CHRISTIAN WIDULE, assistant postmaster of Milwaukee and well known druggist, celebrated May 31 as the 60th anniversary of the landing in Milwaukee of his parents, Mr. and Mrs. Gottlieb Widule, after coming to this country from Silicia, Germany. Both of the parents are now dead.

—G. A. STALL and Clarence G. Neuhauer, members of this year's graduating class of the Department of Pharmacy, University of Maryland, are employed at the pharmacy of Hyuson, Westcott & Co., Baltimore, and were presented with gold signet rings by their employers in honor of their graduation.

—NATHAN A. COZENS, secretary of the Philadelphia Association of Retail Druggists, will spend the summer amid rural surroundings at Haddonfield, N. J. Secretary Cozens is a native of New Jersey and his most enjoyable vacations are those which are spent amid the surroundings of his boyhood days.

—D. M. PENICK, president of the Strother Drug Company, of Lynchburg, Va., who is recuperating from a serious accident, and is now at his farm in Aioherst county, reports that fully a ton of honey will be taken from the bees kept on his place. The largest amount taken in any year heretofore was 1000 pounds.

—PROF. JOSEPH P. REMINGTON was a St. Louis visitor recently, stopping there for a half day enroute home from the Kansas Ph.A. meeting, to which he went from the Ebert monument unveiling in Chicago. A dozen or more local pharmacists met Mr. Remington during his stay in St. Louis and formed a jolly party at luncheon.

—WILLIAM B. STRONG, vice-president and treasurer of the Milwaukee Drug Company, was a prominent member of the party from the Merchants' and Manufacturers' Association of Milwaukee which took the annual outing of the organization this week. The trip this year was made by boat to Ludington, Mich., thence down the western coast of Michigan by rail.

—HARRY C. BLAIR, president of the Philadelphia Branch of the American Pharmaceutical Association; Prof. C. S. N. Hallberg, of the University of Illinois; Christopher Koch, Jr., and Dr. F. E. Stewart, of Philadelphia, have been given certificates of honorable membership in the Alumni Association of the Department of Pharmacy of the Medico-Chirurgical College of Philadelphia.

—S. C. JAMISON, for more than a quarter of a century prominently identified with the retail drug business in Pittsburg, has severed his connection with the firm of Hewitt & Jamison. L. E. Hewitt will continue the business while Mr. Jamison will devote his time to his duties as coroner of Allegheny County. He is seeking a renomination and has been assured the support of his friends in the drug business as well as a large number of his fellow citizens.

—JOSEPH P. REMINGTON, dean of the Philadelphia College of Pharmacy, is taking a well earned rest with his family at their summer home at Longport, N. J. Professor Remington, who but recently returned from attending the annual meeting of the Kansas Pharmaceutical Association and the Ebert memorial services at Chicago, declares that the past winter has been one of the most strenuous in his pharmaceutical career as the many calls that were made upon him, necessitated his frequent absence from the city.

# KINGS COUNTY SOCIETY RE-ELECTS OFFICERS.

**Dr. Tuthill Declines as Candidate for Board of Pharmacy and Dr. Anderson is Endorsed for Member.**

**Woman is a Delegate for First Time to Pharmacopoeial Convention.**

The satisfactory condition of affairs pertaining to the Kings County Pharmaceutical Society and the Brooklyn College of Pharmacy was forcibly brought to the attention of those who were present at the annual meeting of the society last Tuesday afternoon when the reports of the various officers and committees were read.

President Jacob H. Rehnuss presented separate reports for society and college and dwelt upon the matters conducive to the advancement of both, together with comments in regard to their past and future. One feature was the cancellation of the last vestige of debt on the institution by the payment within the year of over \$6500, making the society sole owner of the plant worth upwards of \$70,000. He recommended that the board of trustees take action in extending the facilities of the college, so as to meet demands which were imminent, stating that the session just ended had shown that extra accommodations were necessary.

The faculty and members of the board of supervision were given credit by Mr. Rehnuss for the excellent showing and growth of the institution as evidenced by the larger number of students and the healthy state of affairs both from a financial and educational point of view.

In the report bearing on work and progress the steady normal growth of the society's membership and general activity of the organization were indicated. Attention was called to the fact that at every meeting from two to four members had been admitted and that nearly every eligible pharmacist in the borough was now a member.

A recommendation that the compensation of the treasurer be increased from \$50 to \$100, embodied in the report, was later adopted by the society. Propaganda work, the legislative committee, the committee on pharmacy, were also given due consideration in the report, mostly in the way of commendation.

Treasurer Oscar C. Kleine announced the total receipts by the college as \$21,963.62 and expenditures of \$19,389.49; while the society receipts had amounted to \$8632.14 with disbursements of \$8242.27.

Secretary Andrew E. Hegeman, in his report on membership, stated that at present there were 489 active members, and that the average attendance at meetings, of which ten were held, had been 40.

Dr. William Muir, chairman of the committee on supervision, summarized the student roll of the last session of the college. The enrollment showed 109 juniors, 75 seniors and 9 post graduates.

Dr. Muir, as chairman of the legislative committee, stated that the importance and advantage of organization had never been better illustrated than during the recent controversy over pharmaceutical legislation. He reviewed the agitation for reorganization of the Board of Pharmacy resulting in the conferences leading up to the birth of the Brown Act, designed to meet the demands, and also gave a history of both the Act and the Conklin Bill in the Legislature.

The influences behind the Conklin measure could only be surmised, said Dr. Muir, and it was opposed by the members of the State legislative committee because appointments were left entirely with the Governor, a provision which some time might subject pharmacy to political juggling, while no practical examinations nor funds to carry on the work were provided for. The Brown Act did not meet the approval of the wholesale contingent, said Dr. Muir, they being opposed to a certain guaranty feature, while other influences were also brought about to secure its defeat.

Several other bills of minor importance which died in committees were also commented upon and in summing up Dr. Muir advised the retail druggists to stand united through the State Association, in making demands and in use of their efforts in the future.

Otto Raubenheimer, chairman of the committee on pharmacy, declared that with the U.S.P. recognized in Alaska and the Spanish edition in the Philippine Islands, while the West Indies and Mexico were also now in a position to be provided, the sun never more could set on the Pharmacopoeia of the

United States. The subjects and papers read during the year were outlined in the report, which contained recommendations that a post-graduate course of study be established by the society. It was advised that the college and society be each represented by three members of the faculty and practical pharmacists at the next U.S.P. convention. An appropriation was asked for the mailing and printing of cards and circulars to members regarding improvements that should be made in the N.F. The recommendations were adopted with exception of the first, which was later withdrawn by Mr. Raubenheimer, it being considered inadvisable to conduct such a course as one now exists in the college.

John G. Wischerth, chairman of the trade matters committee, in charge of the propaganda work conducted by the society, recommended that the work be continued on similar lines as in the past, with vigorous efforts to extend and conduct the campaign upon a larger scale. Mr. Wischerth said that the value of the work done by those in charge, including about \$800 spent in cash, could easily be estimated at \$1500. The major part of the service had been gratis and about \$500 out of the \$800 had been collected especially for the work, while the remainder was contributed by the society. The expressions of members were all to the effect that the work had been extremely beneficial in increasing profits and all were desirous of having the campaign resumed.

A damper was put upon the otherwise enthusiastic meeting by the announcement of Dr. Frederick P. Tuthill that he must insist that his resignation be accepted as a candidate for re-election to the Board of Pharmacy. Dr. Tuthill was indorsed by acclamation at a meeting of the society last January. He said he was impelled to decline on account of business circumstances and because of the light in which he had been placed by continual jibbering incompatible with his position as a representative of a certain large manufacturing house.

The declination was accepted with much regret and several members who stated that they had opposed the election of Dr. Tuthill to the board five years ago said they were now in hearty accord together with numerous others for his re-election, proclaiming him as fair minded and just throughout his term which they had watched with great interest.

Dr. William C. Anderson, dean of the Brooklyn College of Pharmacy, was unanimously elected to fill the vacancy caused by Dr. Tuthill's withdrawal. Dr. Anderson, in his speech of acceptance, outlined his platform and pleaded for a clean campaign. The election will take place at the Brooklyn College of Pharmacy on June 24. William F. Creagan, nominated by the Brooklyn Pharmaceutical Association, is the opposing candidate.

An amendment was unanimously adopted to the constitution abolishing the office of third vice-president and providing for three additional trustees. William F. Maass, who held the abolished office, was elected to the board of trustees. The other two new members elected to this board were Charles E. Heimerzheim and John G. Wischerth. The officers were all re-elected and are as follows:

President, Jacob H. Rehnuss; first vice-president, Clarence O. Douden; second vice-president, Henry B. Smith; secretary, Andrew E. Hegeman; treasurer, Oscar C. Kleine; elective trustees, William Muir, Benjamin Rosenzweig, William H. Bussenschutt, W. F. Maass, Charles E. Heimerzheim, J. G. Wischerth, Thomas J. France, William J. Hackett, J. H. Droge, Adrian Paradis, Charles L. Gesell, Charles A. Kunkel; committee of supervision and examination, William Muir, chairman; William H. Bussenschutt, Thomas J. France, Adrian Paradis, Andrew E. Hegeman; librarian, Thomas F. Raynow; counsel, William L. Perkins.

The delegates elected to attend the various meetings and conventions of other organizations are as follows:

American Pharmaceutical Association—Wm. C. Anderson, Otto Raubenheimer, Thomas J. Keenan, H. W. Schimpf, J. H. Rehnuss.

New York State Pharmaceutical Association—Wm. Muir, O. C. Kleine, A. Paradis, W. H. Bussenschutt, Joseph Kahn.

New Jersey State Pharmaceutical Association—F. P. Tuthill, Charles Heimerzheim, W. H. Bussenschutt.

United States Pharmacopoeial Convention—Otto Raubenheimer, Adrian Paradis, Miss Catherine C. Mahagan and three of the faculty of the Brooklyn College of Pharmacy.

## New York A.P.A. Branch Meeting Monday Evening.

At the New York Branch of the A.P.A. on Monday evening Frederick E. Niece will read a paper on "The Pharmacist, the Future Clinical Chemist," and conduct experiments in clinical chemistry. The discussion will be opened by George A. Ferguson and Joseph L. Mayer. The meeting will be held at \$30.

## LAW, LEGISLATION AND OUTING DISCUSSED.

**Busy Meeting of German Apothecaries' Association—Newspaper Reporter Sues Druggist—Outing.**

The greater part of the meeting of the New Yorker Deutscher Apotheker-Verein held last Thursday evening was devoted to legislative matters. Present were Assemblyman Robert S. Conklin, Jerome Steiner and Henry A. Petersen, the two latter being counsel for the Board of Pharmacy. Mr. Conklin addressed the members on pharmaceutical legislation in general while Messrs. Steiner and Petersen dwelt especially upon the recent cream of tartar decision of the Court of Appeals.

Mr. Conklin declared his sincerity toward pharmacists and said the object of his bill, introduced in the last session of the Legislature, was to improve conditions and regulate the practice of the profession in such a manner as to place it on a higher plane. He told how the Governor's recommendations as to reform in the laws pertaining to pharmacy had prompted him to draw a measure which in his estimation would meet requirements. He was given hearty applause.

Messrs. Steiner and Petersen described how a wrong opinion had been spread broadcast in regard to the Gasau Grocery Case, which the Board of Pharmacy lost in the Court of Appeals. The counsel said that prosecution had been made under the wrong law, hence the board's failure to win the case and had proceedings been conducted under the Agricultural Law a favorable verdict would undoubtedly have been secured.

Dr. William C. Alpers questioned counsel as regards the status of the pharmacist in the sale of commercial and U.S.P. hydrochloric acid, wishing to know if a distinction had ever been made where two grades of similar substances were involved. Counsel stated that no distinction had ever been made nor was there a parallel case on record from which deductions could be drawn, but it was to be inferred that the pharmacist would always dispense the U.S.P., unless otherwise directed.

Messrs. Kleinan, Rehse, Kessler, Gilbert, Hirsman, Raubenheimer, Goetting and Alpers took part in the discussion on Mr. Conklin's address and the points brought out by counsel in the Gasau case.

President Hirsman announced that William Bischoff, a grandson of the late messenger of the society, Gustav Bischoff, had been appointed to the office formerly held by his grandfather.

George Jarchow announced that he had received a notice from the Bureau of Combustibles in regard to containers for benzine and wished to be informed if the bureau had authority to determine the kind of container that should be used. Mr. Jarchow said that the bureau had notified him to keep the benzine in tin cans, whereas he preferred glass bottles. Members told him the bureau had the authority to determine the point at issue.

George Bley reported that a suit for damages had been instituted against him by an *Evening Journal* reporter who was expelled from his store following an accident case which was brought to his establishment. He said that proper request had been made to the reporter to leave with the crowd which thronged his store but to no effect, so force was used. The members showed great interest in the case and several stated that they considered Mr. Bley's action justifiable.

Otto P. Gilbert, chairman of the entertainment committee, reported about the annual outing scheduled for July 8, at College Point, L. I. Mr. Gilbert predicted that the members would have an enjoyable time.

## WILL MEET IN WASHINGTON CITY IN 1912.

**Dr. Wiley Welcomed at Seventh Congress of Applied Chemistry—Many Important Subjects Discussed.**

LONDON, June 2.—The invitation presented by Ambassador Reid on behalf of the American delegates, to hold the next triennial meeting of the International Congress of Applied Chemistry in Washington, was accepted by acclamation at the last session of the Congress, on Wednesday. Prof. E. W. Morley, of West Hartford, Conn., was unanimously selected to be honorary president of the 1912 gathering in Washington and Dr. W. H. Nichols, of New York, was made acting president.

The congress closed its labors by adopting a mass of resolutions advising international inquiry and action in the matter of many of the subjects discussed. Seventeen divisions were made of the congress, and in each some special branch of the chemical industry was considered and papers read and discussed.

In the section of Pharmaceutical Chemistry (see page 538 of this issue of the ERA), presided over by N. H. Martin, a number of papers were contributed by Americans, while the United States delegation was a strong one numerically and otherwise.

The section on legislative matters was presided over by Dr. Hugo Schweitzer, of New York, and upon his motion a resolution was unanimously adopted to appoint a committee to consider and draft proposals for joint international patent and trade mark legislation. These proposals will be drawn with a view to establish also international rules and regulations for the benefit of inventors, and are to be discussed and further acted upon when the congress meets in Washington.

Dr. Harvey W. Wiley, chief of the Bureau of Chemistry, Department of Agriculture, made a stirring address in replying for the United States to the address of welcome delivered by Sir Henry Roscoe, honorary president of the congress. Dr. Wiley dwelt upon the benefits of chemistry to mankind and the general importance of the science, remarking that if what chemistry conferred were withdrawn, the world's population would soon be half starved and half clothed.

The prevention and elimination from commerce of various species of fraud and misrepresentation, because of the chemists' ability to detect them, was also mentioned by Dr. Wiley.

Nathan Straus, of New York, in a communication urged the congress to exert its influence in assisting the cause having for its object the prevention of tuberculosis and other milk-borne diseases. He gave results of the American method of pasteurization, stating that its efficiency had been practically demonstrated in the saving of thousands of human beings from these infectious diseases.

The congress was formally inaugurated by H.R.H. the Prince of Wales, and was the first held in London. It was also the largest in numerical strength of the seven held so far, there being over 3000 delegates in attendance. The programme provided for four days full itinerary besides a round of brilliant social functions concluding with a mammoth banquet at the Crystal Palace attended by over 2000 of the guests.

## A Purpose.

Every department in the ERA is intended to serve some useful purpose. The purpose of the Quiz Master is educational and to assist drug clerks or apprentices in becoming better informed about the drug business. A few spare moments consumed in answering the Quiz Master's questions will be time well spent and cause renewed interest in every-day drug store work.

## Phi Gamma Sigma Fraternity.

CARL R. DANIELSON, Ph.C., of Chicago, was recently elected Supreme Grand Master of the Phi Gamma Sigma (Pharmacy) Fraternity. He was born at Spencer, Iowa, Dec. 16, 1885, is a member of Northwestern University Alumni Association, Illinois State Ph.A., etc. He is Past Grand Master of Alpha Chapter. Mr. Danielson is prescriptionist at Hodges' Pharmacy, 51st street and Grand Boulevard, Chicago.

Other officers elected: Supreme worthy master, Henry E. Hauth, Waverly, Iowa; supreme scribe, Herbert S. McDill, Port Neches, Texas; supreme treasurer, Herbert W. Smith, Quincy. The annual reunion will be held in Seattle, Wash., in September next.

## 23 NEW PHARMACISTS RECEIVE DIPLOMAS.

University of Maryland Holds Its Annual Commencement at the Academy of Music.

BALTIMORE, June 5.—The Academy of Music was thronged on Monday by friends of graduates of the several departments of the University of Maryland, with the graduates of the Department of Pharmacy well to the front. The playhouse was prettily decorated, and among those present were the members of the several faculties and many prominent citizens. The class in pharmacy was the 54th to be sent out and in point of standing, as well as in promise for the future, it compared most favorably with any of those that have gone before.

Prayer was offered by Rev. J. W. Sutton, of Baltimore; the address to the graduates was by John Allan Wyeth, M.D., LL.D., of New York; the conferring of degrees by Bernard Carter, provost of the university, and the address to the graduates was delivered by Francis K. Carey, a Baltimore attorney. The graduates in pharmacy are as follows:

Maryland—William Frederick Gakenheimer, Miss Augusta Kramer, Michael Moriz Marek, Ralph Arthur Nattans, Clarence George Noubauer, Robert Winder Pilson, William Harry Smith, George Alexander Stahl, John Benjamin Thomas, Jr., Henry Edward Wich, Lawrence Soper Williams and Edward Fayssoux Winslow.

South Carolina—Edward Cecil Frierson, Douglas William Brown, Leland McDuffie Kennedy.

North Carolina—Daniel Clyde Lisk, Frank Maner Salley.

Florida—Henrietta J. P. Haecke.

Virginia—George Henry Hinton.

West Virginia—Leahner Meade Kantner.

Massachusetts—George Keaton.

Delaware—Robert Lee Swain.

Bohemia—Jaroslav Jerry Toulka.

These were the prize winners:

Gold medal, offered by the Department of Pharmacy for general excellence in the entire course, Jaroslav Jerry Toulka; honorable mention, Robert Lee Swain, Henry Edward Wich, William Frederick Gakenheimer; Simon prize, for superior work in analytical chemistry, Robert Lee Swain; gold medal, for superior work in practical chemistry, Henry Edward Wich; gold medal, for superior work in vegetable histology, George Alexander Stahl; junior class awards, gold medal, for general excellence, Herbert H. Wilke; honorable mention, Waldo A. Werckshagen, Roy N. Bierley, Arthur G. Tracy, Nelson G. Dineuer and Edward A. Falrey.

## Pharmacy Students Receive University Degrees.

At the 155th commencement of Columbia University on June 2 seven candidates received the degree of pharmaceutical chemist and five the degree of doctor of pharmacy. The candidates were presented by Dr. Henry Hurd Rusby, dean of the New York College of Pharmacy Columbia University and the degrees conferred by Dr. Nicholas Murray Butler, president of the university. The students from the College of Pharmacy assembled in the library with the other candidates and the customary march was made to the gymnasium, where the exercises were held, before a large audience. The title of Dr. Butler's address was "Integrity, Moral and Intellectual." The Max J. Breitenbach prize of \$200 and the Kappi Psi prize, a gold medal, were both awarded to John Alfred Steffens, while the faculty graduation prize went to John Henry Hecker.

Those receiving the degree of pharmaceutical chemist were: Francis Leonard Bean, Ralph Crawford Jennings, Emile Frederick Kraft, Leon Jesse Lindsey, Kenneth Bruce Pryor, John Alfred Steffens, Miss Frances Ulanoff. The doctor of pharmacy degree was conferred upon: Augustin Blanco y Geigel, Ph.C.; Thomas di Giovanna, Ph.C.; Walter Robert Eimer, Ph.C.; Miss Asuncion Estrada, Ph.C.; John Henry Hecker, Ph.C.

Nearly 1200 degrees in all were conferred by the university at this year's commencement.

## Expense Repairs Authorized for N.Y.C.P.

At the trustees' meeting of the New York College of Pharmacy, Columbia University, held Tuesday evening of last week, the board passed upon an extensive specified plan of repairs and improvements to be made to the entire plant. The work will be commenced at once in order to have the institution in shape for the fall term. It is understood that a large sum was appropriated and that every little detail will receive attention.

A leave of absence was granted to William Mansfield, Ph.D., professor of pharmacognosy, and Dr. Mansfield left for Europe last Saturday, where he expects to pursue a course of study in Vienna during his stay abroad.

## DRUGGIST AND WOMAN FOR HEALTH BOARD.

Ohio Valley Association and Members of W.O.N.A.R.D.

Make Recommendations to Cincinnati's Mayor.

CINCINNATI, June 5.—The Ohio Valley Druggists' Association is using its every effort to persuade Mayor Markbreit to name a druggist as one of the members of the new Board of Health, and if possible to name a member of the O.V.D.A. The members of Queen City Chapter, W.O.N.A.R.D., are also trying to secure the appointment of a woman on the Board of Health. It is argued by the O.V.D.A. that there repeatedly come up for solution vital questions of health and that a druggist would be eminently able to solve many of these for the benefit of the public good.

The W.O.N.A.R.D. claims that a woman on the board could do many things toward maintaining the general health which a man, because of his sex, could not do. They claim a woman could better secure the attention and confidence of women in the poorer families and that their instructions as to hygiene and the prevention of disease or the treatment of illness would be more regarded and carried into effect with better grace than if given by a male health officer.

## Ohio Druggists Punished for Selling Cocaine.

CINCINNATI, June 5.—The Ohio State Board of Pharmacy has revoked the druggists' licenses of W. W. Mowrer and S. E. Vail, of Alliance, and has reprimanded A. J. Morris, a druggist of Alliance, on a charge of selling cocaine illegally.

George J. Dickinson, a druggist of Malta, Ohio, was cited to appear before the board at its October meeting to show cause why his license should not be revoked. He is charged with loaning his license to another. It appears that he left his place of employment and allowed his certificate to hang on the wall in a prominent place in the store, and the proprietor, who is said to have had none, is claimed to have continued to do business on the strength of it.

## Aristolochites Take in Ten Junior Pharmacists.

ANN ARBOR, June 5.—At their recent annual initiation the following men were taken into the senior pharmonic society, the Aristolochites: E. T. Maynard, B. E. Kuyers, A. W. Frame, H. R. Carey, D. H. Parr, A. F. Schlichting, A. W. Jones, E. L. Holden, R. P. White, and G. S. Jay. A banquet, at which President Fern L. Shannon presided as toastmaster, was given in honor of the new members. The following toasts were on the programme: "The School and the Society," Dr. J. O. Schöbterleck; "Mixers," W. D. Munz; "Aristolochia Serpentina," E. J. Kennedy, Jr.; "A Pharmaceutical Problem," Dr. A. R. Stevens; "College Organizations," C. F. Ramsay; "The Doings," the initiates.

## Drug Clerks of Norfolk Have Organized.

NORFOLK, June 5.—A meeting of the Virginia Association of Drug Clerks held at 9 Charlotte street recently was largely attended and it was agreed that a committee consisting of G. H. Snellings, chairman; S. D. Hope, Frank Colenda, Jr., H. H. Johnson, Harry Smith and A. S. Cross should call upon the proprietors and drug clerks and request their co-operation. It was decided not to form a permanent organization until a subsequent meeting, at which time the constitution and by-laws would be adopted.

## Prof. Avery New Chancellor of Nebraska University.

The successor of Dr. E. Benjamin Andrews as chancellor of the University of Nebraska is Prof. Samuel Avery, who has been the head of the department of chemistry since 1905. Chancellor Avery was born in an Illinois town in 1865, and he was educated at Doane College, the University of Nebraska and the University of Heidelberg. There are notable precedents for a chemist becoming the head of a university in the cases of President Eliot, of Harvard, and President Reussen, of Johns Hopkins.

## Examination for Chemical Assistant in Dairying.

On June 30 an examination will be held for chemical assistant in dairying to fill two vacancies in the Department of Agriculture. Applicants should apply for application form 394 and special form to the United States Civil Service Commission, Washington, D. C.

## MEMBERS GRADUATING CLASS PHARMACY DEPARTMENT TEMPLE UNIVERSITY, PHILADELPHIA.

## HIGH IDEALS ARE URGED BY DR. MAC ARTHUR.

At Annual Commencement of Temple University Degree of Doctor of Pharmacy is Given Dean Minehart.

PHILADELPHIA, June 5.—Twenty-seven graduates in pharmacy and six graduates in pharmaceutical chemistry this afternoon received the coveted sheepskins when the annual commencement exercises of Temple University were held in the presence of a large gathering at the Academy of Music. The conferring of the degrees was performed by the Rev. Dr. Russell H. Conwell, president of the university.

In his address to the graduates the Rev. Dr. Robert Stuart MacArthur emphasized the value of right living and stalwart bodies for professional men as well as the choosing of high ideals. A high ideal, he said, was vastly greater than a lofty idea, the former being the sum of all noble ideas. He said that while the ideal might not be attained, the result would be correspondingly high in proportion to the end sought for. The highest ideal of the human race, he said in closing, is Jesus Christ and he urged his hearers to lead clean, Christian lives.

Dr. John R. Minehart, dean of the department of pharmacy, awarded the prizes and made the announcements. The dean's gold medal for the highest general average in the senior class was awarded to Daniel Cubicciotti with honorable mention to John O'Neill Casey and Bernard Fishman. The permanent alumni membership for the highest average in pharmacognosy was won by John O'Neill Casey with honorable mention to Abraham Boonin. The degree of Doctor of Pharmacy was conferred upon Dean Minehart.

Graduates in Pharmacy.—James A. Alexander, Delaware; Abraham Edward Boonin, Pennsylvania; John Harvey Botwright, England; Franklin Irving Buffet, Maryland; Harry Clay Campbell, B.S., V.M.D., M.D., Pennsylvania; John O'Neill Casey, Pennsylvania; Daniel Cubicciotti, Italy; Samuel Austin Decker, Pennsylvania; Edna DeVoe, Michigan; Charles Clayton Eberly, Pennsylvania; Bernard Fishman, Russia; Louis Franklin Flinkman, Russia; Gertrude Greenburg, Pennsylvania; Gerald Joseph Harrigan, Pennsylvania; Harold Beacon Lane, Ohio; Frank Edwin Leutz, V.M.D., Pennsylvania; Maurice Valentine Medvene, Pennsylvania; Edmund Harrison Newton, Pennsylvania; Mollie Nichols, Pennsylvania; Edgar S. Nyman, Pennsylvania; Aaron Rosenblatt, Russia; Hyman Sobr, Pennsylvania; Otto Emil Teague, Pennsylvania; Samuel Mederman, Pennsylvania; Horace Wallace, New York; Sarah Catharine White, Pennsylvania; Charles Bitzer Winger, Pennsylvania.

Degree of Pharmaceutical Chemist.—Nathaniel H. Anthony, Pennsylvania; Max Polin, Pennsylvania; Roy Moulton Sellers, Pennsylvania; William Van Reed Seltzer, Pennsylvania; Otto Strook, Germany; Martha Young, Pennsylvania.

## Supper for Cleveland C.P. Graduates.

CLEVELAND, June 5.—A supper was recently given by the faculty of the Cleveland School of Pharmacy (Department of Pharmacy, Western Reserve University), at the Chamber of Commerce, to the graduates, who are Glenn Forest Coleman, John Anton Jarnuzewski, Charles John Slezek, of Cleveland; Omar Jose, of Ira, Ohio; Walter Howard Peake, of Oberlin, Ohio; Mark Emmet Treat, of Morgantown, W. Va. These gentlemen are the first students of the school to receive the university degree of pharmaceutical chemist, which will be conferred upon them at the university commencement on June 17.

The A.P.A. membership for best record in pharmacy, and the alumni medal for highest general average were both won by Glenn Forest Coleman.

## "GET MARRIED," DR. DEPEW TELLS GRADUATES.

Russia, Egypt and Italy Have Representatives in Big Class at the Medico-Chirurgical College.

PHILADELPHIA, June 5.—Graduates in pharmacy from the Medico-Chirurgical College showed by prolonged applause their appreciation of the words of wisdom as well as of the many witticisms which fell from the lips of Senator Chauncey M. Depew, of New York, when he delivered the doctorate oration today at the 29th annual commencement in the Academy of Music.

"Get married," was one of pointers which the speaker gave to the young pharmacists who occupied seats in the parquet before him. "Don't marry until you are ready, for it is wicked to ask any young woman to share your lot unless you can support her and yourself. But don't be misled by waiting until you get too much money. It is amazing what little a couple can live on with a fair amount of economy and still acquire that greatest of American institutions, a home.

"Don't waste your time, either. You will have plenty of time during the next few years. Put in your spare time in reading and studying in your professional line, but have a hobby, for they tell me that all brain cells have certain functions and like exercising muscles, if you stick too closely to one end and one aim, you will become narrow and useless.

"Don't hesitate to expose fraud in your profession not only for your own sake, but for that of your profession and of the public. Be courageous, stick, dig and save."

Senator Depew was interrupted by a wave of merriment when he declared that the graduates knew more today than they ever would know again and that for the next 30 years the world would be making them realize that they knew less and less until the time would come when it would be possible for them to give their hatters a standing order for hats of a size that would be the same for the rest of their lives.

The degrees were formally conferred by Henry F. Walton, president of the college. Dr. I. V. S. Stanislaus, dean of the department of pharmacy, made the announcements and awarded the prizes to the 49 graduates in his department. Dr. George H. Meeker, dean of the department of pharmaceutical chemistry, performed the same office in that department. In the former the prizes were awarded as follows:

Faculty gold medal for highest general average in senior class, Ernest Arthur Aston; Professor Stanislaus gold medal for highest average in pharmacy, Edmund C. H. Seidle; Professor Meeker prize, membership in the A.P.A., for highest average in chemistry, Ernest Arthur Aston; Alumni Association gold medal for the highest average in operative pharmacy, Edison C. B. Holland; Alumni Association certificate of life membership, Paul S. Pittenger; honorable mention, E. Arthur Aston, M. H. Cowperwaite, Harry L. Goldberg, William C. Kessler, E. C. B. Holland and E. C. H. Seidle.

Faculty gold medal for highest general average in the junior class in pharmacy, Michael Waschke, with honorable mention to William A. Bentz, M. W. Brenner, Max Baum, Edwin B. Blair, Samuel Ibrahim, M. Coteher, Benjamin B. Cook, Bruno B. Drapewski, Francis E. Eitner, M. Ginstburg, Samuel Freedman, C. Roy Johnson, Conrad C. Mayer, Morris R. Ost, L. A. Ruth, I. Spiers, John A. Simpson, John J. Shovlin, Elias Israelvitz, E. J. McCormick and Harry Farber.

The graduates in pharmacy are as follows:

Ernest Arthur Aston, Pennsylvania; Charles Albert Barron, Jr., Pennsylvania; Herman Howard Bram, Pennsylvania; Jacob Esleman Charles, Pennsylvania; John Armon, Cleveland, Pennsylvania; Carl Straw Cooper, Pennsylvania; Milton Harold Cowperthwaite, New Jersey; Robert John Deitcher, Pennsylvania; John Philip Dippie, Pennsylvania; Joseph Clinton

Dreibelbis, Pennsylvania; Arthur Henry Edwards, Pennsylvania; Frank Egeudorf, New York; Alfred Mellersh Evans, Pennsylvania; Mayer Feldman, Russia; David Franklin Fisher, Pennsylvania; Elmer Heller Geddis, Pennsylvania; Jacob Cook Gibbs, Pennsylvania; Earl Vincent Godfrey, New Jersey; Harry Leonard Goldberg, Russia; Samuel Joshua Goldberg, Pennsylvania; John Cell Grove, Pennsylvania; Robert Fields Harper, Pennsylvania; John Thomas Harrison, Pennsylvania; Edson Burns Clifford Holland, Pennsylvania; Amos Jones, Pennsylvania; Charles Albert Jones, Canada; William Conrad Kessler, Pennsylvania; Charles Henry Kline, Jr., Pennsylvania; Jacob Buren Leedy, Pennsylvania; Nathan Mayer Levey, Russia; Arthur Lewis, Pennsylvania; William Frederick Longendyke, Pennsylvania; Levi Hoffman Lukens, Pennsylvania; Joseph McAlister, Pennsylvania; Hudson Owen Mann, Pennsylvania; Joshua Eugene Marsden, Pennsylvania; Arnold Waldebrand Nidecker, Pennsylvania; Paul Stewart Pittenger, Pennsylvania; Edward Milton Reutschler, Pennsylvania; Clarence Gilbert Rott, Pennsylvania; Percy Horine Schultz, Pennsylvania; Milton Bailey Schwartz, Pennsylvania; William Harvey Scott, Pennsylvania; Calvin Dietrich Shuman, Pennsylvania; William Sherman, Pennsylvania; Thomas Roman Shatter, Pennsylvania; Edmund Charles Henry Steine, Pennsylvania; Columbus Irvin Whitaker, Maryland; Alvin Norton Wilcox, Pennsylvania.

Doctors of Pharmacy—Carl Svante Nicmar Hallberg, Ph.G., Illinois; William Wilson MacNeary, Ph.G., Ph.C., Ireland.

The gold medals for the highest general averages in the department of pharmaceutical chemistry were awarded to Elmer Washington Searle in the senior class and to William Hoy Stoner in the junior class. The graduates are as follows:

Graduates in Pharmaceutical Chemistry—William Lawrence Baker, Ph.G., New Jersey; Lew Reed Dunfee, Ph.G., Pennsylvania; Walter Ray Frazer, M.F., Pennsylvania; Samuel Miller Greenawalt, Ph.G., Pennsylvania; John Harper, Pennsylvania; Joseph Stanislaus McHale, Pennsylvania; Hadya Parry Prout, Ph.G., Pennsylvania; Christ Alphonse Roney, Pennsylvania; Elmer Washington Searle, Pennsylvania; Leon Semmel, Pennsylvania; De la Ray Signor, Pennsylvania; Lewis Booker Whitehead, Ph.G., Virginia.

Doctors of Pharmacy—Frederick Augustus Genth, M.S., Pennsylvania; Lorenzo Carlucci, Ph.G., Ph.C., Italy.

On Friday the graduates in pharmacy and chemistry with members of the alumni association of those departments as well as many prominent pharmacists of the city listened to an address by Prof. C. S. N. Hallberg, of Chicago, in the college amphitheater. Professor Hallberg was the guest of Dean Stanislaus the greater part of the week. The same evening, the alumni of all the departments participated in a banquet at the Bellevue-Stratford Hotel. Nearly 300 persons were present. Henry F. Walton, president of the college, presided, and those who made addresses were Governor Stuart, of Pennsylvania; Lieutenant-Governor Robert S. Murphy, Senator Depey, Mayor Reayburn, of Philadelphia; Col. Wm. Potter, president of Jefferson Medical College; Father Delurey, of Villanova College; Dr. Edmund, of the State College of Agriculture, and Professor Hallberg. It was the largest gathering of the kind that has ever been held in Philadelphia.

#### Pharmacy Degrees Conferred by Buffalo University.

BUFFALO, N. Y., June 5.—Degrees of bachelor of pharmacy were given to the following students at the annual commencement of the University of Buffalo this year:

Earle Riley Alderman, George Wright Annis, Frank Russell Belliotti, John Peter Boyle, James Coleman Cottrell, George P. Cunningham, Ernest Lewis Flala, Leo E. Frey, Martin John Gardner, Royal T. Goley, John Gerald Hart, Gilbert Bork Heckman, Henry A. Johnston, Edwin Kirby Maurice, John Francis O'Brien, Arthur John Owen, Daniel E. Skudwich, Clifton Palmer Smith, Ray A. Sprague, Homer A. Trotter, Harold Edwin Walters, David H. Weinstein and Nicholas Joseph White.

The honor roll was headed by Clifton Palmer Smith with a percentage of 92.25. Others mentioned were Earle Riley Alderman, Gilbert Bork Heckman, Daniel Skudwich and James Coleman Cottrell.

Richard F. Morgan was given a degree of doctor of pharmacy and Charles William Bullock, Henrietta F. Griggs, Claire Mildred O'Brien and Emma B. Wilson became analytical chemists.

#### Dishonest Clerk Sent to Prison.

MILWAUKEE, June 5.—Charged with "touching" the cash register at repeated intervals for the purpose of replenishing his own pocket, Stephen Eliaszewick, a new clerk employed at the pharmacy of Max Szarynski, has been sentenced to 30 days in the house of correction. He came from Chicago.

#### Potted Plants Sale as an Attraction.

A sale of potted plants that was unique in its way was carried on recently by the Johnson Creek Drug Company, at Jefferson, Wis.

## BOARD EXAMINATIONS

### Washington.

SPOKANE, June 3.—Following are the names of those applicants who passed at the recent examination held by the Washington State Board of Pharmacy:

J. W. Peterson, Toppenish, Wash.; Arthur C. Johnson, Spokane; H. Specht, Pomeroy; A. F. Kolenberg, Seattle; J. F. Goltz, Spokane; William E. Mortinde, Kennewick, Wash.; Robert C. Thompson, Spokane; W. F. Crowley, Spokane; E. C. Ramsdell, Spokane; Anton Ringe, Spokane; T. V. Saverin, Spokane; Don Francis, Everett; J. A. Dempsey, Sprague; J. H. Mundt, Chelan; R. M. Ayres, Spokane; A. A. Melzard, Spokane; J. M. Glasgow, Hunters, Wash.; C. V. Derilets, Spokane; E. E. Garlich, Centralia; Carl Strauss, Spokane; Joseph Hart, Spokane; James S. Ellis, Hillyard; George H. Retzer, Walla Walla; Charles Riney, Dayton; George A. Henton, Spangle; Robert L. Neal, Pomeroy; Henry Parker, Dayton; C. H. Gilman, North Yakima; O. C. Richards, Goldendale; P. L. Arthur, Tacoma; Mrs. Pwanda Saverin, Spokane.

### Oklahoma.

MUSKOGEE, June 3.—At an adjourned meeting of the Oklahoma Board of Pharmacy, held in Muskogee May 18, the following named persons made the required grade and were granted certificates as registered pharmacists: George M. Adams, Tishomingo, Okla.; J. M. Bartley, Pryor Creek; I. K. Garrett, Pauls Valley; J. C. Haffner, Frederick; C. A. Johnston, Byron; John J. Muhlherr, Orlando; John G. Miller, Cushing.

The following met the requirements of the board and were granted registration on diplomas: E. L. Aaron, Alexandria, La.; C. V. Aderhold, Douglasville, Ga.; E. H. Brown, Ada, Ohio; R. O. Billman, Tulsa; M. V. Decker, Kipton, Ohio; H. G. Farris, Moline; A. B. Hoxey, Leadville; A. J. Loughman, Oklahoma City; R. H. Patterson, Philadelphia.

The next meeting will be held in Enid on July 13-14. Applications for registration should be filed with the secretary, J. C. Burton, Stroud, Okla., at least ten days before the meeting. Application blanks furnished on request.

### Virginia.

RICHMOND, June 5.—The Board of Pharmacy of Virginia determined at its last meeting that it would hold hereafter quarterly meetings. Examinations will begin at 9 a. m. on the fourth Tuesday of April, July, October and January of each year at Richmond, Va.

### Arkansas.

LITTLE ROCK, June 5.—Governor Donaghey has appointed J. A. Gibson, of Little Rock, as a member of the State Pharmacy Board, to succeed W. L. Dewdney, of Pine Bluff, whose term expired May 26.

### New Liquor-Poison Law in Wisconsin.

ASHLAND, June 5.—Druggists here are complying with the State law by filing the list of sales of poison and liquor during the past year. Under the provisions of the law, the date, buyer's name, substance purchased, quantity purchased and for what purpose has to be filed. Report has it that the druggists of Ashland are offering the most complete data yet furnished by the druggists of northern Wisconsin.

### Mr. Dempster's Libel Verdict Reduced to \$20,000.

Samuel C. Dempster, the Pittsburg druggist who recently obtained a verdict for \$40,000 against *Toten Topics*, of New York, for libel, will recover only half that sum, the court having reduced the verdict to \$20,000 on the ground that the larger sum was excessive.

### Permit to Sell Liquor Revoked and Heavily Fined.

CENTRAL CITY, Iowa, June 5.—Judge Ellison, at Cedar Rapids, has fined M. J. Murray \$300 and costs and revoked his permit for violating an injunction which forbade him to sell liquors in his drug store.

# NEW DRUG LAW IN MISSOURI.

## Representative Hagenow's Co-operation With Physicians is Commended.

St. Louis, June 5.—The new pharmacy law recently approved by the Governor was introduced by Theo. Hagenow, one of the St. Louis representatives, who was active in securing its enactment. The new law is about what has been attempted at each session of the Legislature for 20 years, but this session is the first at which there has been a druggist member who has wholeheartedly supported advanced legislation. Mr. Hagenow has also acted with the foremost physicians of the State in promoting desirable measures and discouraging such objectionable legislation as came before the House. At a recent pharmacy banquet Dr. Nicholson, president of the St. Louis Medical Society, said that he regarded Mr. Hagenow's intelligent and active support of the physicians' interest one of the greatest advances toward closer fellowship between the professions of anything that had ever occurred in Missouri.

The law provides for registration of pharmacists and assistants, also that the board may license without examination men in villages of less than 500 persons to practice pharmacy in that village when no regular applicants appear for license from that community. It is made unlawful for any except these to fill prescriptions or sell inhibited drugs. Annual re-registration is provided. Diplomas from approved schools are recognized in lieu of examinations and restricted exchange of license with other States is provided.

A board of five members is created and it is provided that one shall be appointed each year from a list of five names recommended by the Missouri Ph.A. All shall be registered pharmacists and one shall serve as secretary at an annual salary, the other members receiving \$5 for each day actually engaged and their expenses. The secretary is made an agent for prosecution of violations.

The fees are: For examination as pharmacist, \$5; assistant, \$5; renewal of either license, \$1; application for village license, \$2.

Prescriptions are ordered preserved five years and physicians have access to copies of their own at any time, also persons for whom they were written, except on a contrary order from the physician. A poison register is also ordered. Holders of licenses are exempt from jury duty.

The bill as originally written contained a clause that was expected to stop the vendors throughout the country districts, but the pressure brought to bear upon representatives by these men and a class of country doctors was too strong and that section was dropped to save the rest of the bill. Mr. Hagenow believes, however, that the fight made this time has greatly strengthened the cause and a bill to that effect two years hence will be passed, if properly supported by the Missouri Ph.A. The peddlers seemed especially strong with the country representatives.

## Earthquake Damages Drug Stores in Wisconsin.

MILWAUKEE, June 5.—Considerable damage resulted to the drug stores of Wisconsin from the recent slight earthquake which passed over the eastern portion of the State. Reports from Beloit, Janesville, Racine, Kenosha, Elkhorn, Delavan and other points say that heavy losses were sustained by drug stores on account of bottled goods being knocked from the shelves. At the Horlick Malted Milk Company's plant at Racine the shock seemed to be especially strong and no little damage was done.

## Growth of German Potash Industry.

Consul-General Richard Guenther writes from Frankfurt that the potash production of Germany at present represents about 750,000,000 marks (\$178,500,000) of capital and employs 28,000 miners and work people. The yearly sales of potash are \$24,000,000, the trade being controlled by a trust.

# MEMBERS OF THE NEW IOWA STATE PHARMACY COMMISSION.

W. C. CLEMENTS, of Marengo, one of the new members of the Iowa State Pharmacy Commission.

DAVID E. HADDEN, of Alta, one of the new members of the Iowa State Pharmacy Commission.

## PROPAGANDA WORK IN NEW YORK STATE.

### Dr. Anderson Addresses Several Enthusiastic and Well Attended Meetings of Doctors and Druggists.

Three very enthusiastic and satisfactory joint meetings were held at Ithaca, Auburn and Corning on May 26, 27 and 28, respectively. Between 50 and 60 physicians and pharmacists were present at each and addresses were made by Dr. William C. Anderson, chairman of the propaganda committee of the New York State Pharmaceutical Association and dean of the Brooklyn College of Pharmacy. At all of the three meetings the physicians expressed desire for other meetings of the same nature and stated that they were perfectly willing to co-operate with the druggists for more ethical practices on the part of members of both professions.

At the Ithaca meeting practically all the physicians and pharmacists of the district were in attendance. The druggists gave the physicians a reception and luncheon preceding the discussion. Judson B. Todd, a member of the State Pharmacy Board, acted as toastmaster. The discussion was formally opened by Dr. Anderson, who delivered an address on "The Duties of the Physician and the Pharmacist." Response was made by Dr. I. M. Unger, president of the County Medical Society. John G. Brooks, chairman of the local propaganda committee, and his father, Arthur B. Brooks, also spoke. Before adjournment, which did not take place until 2 a. m., nearly every one in attendance had expressed himself on the subject. The physicians in particular took an active part in the discussion and seemed extremely favorable toward more ethical principles by the physician and a general observance of the rights and duties of members of both professions.

The Auburn meeting was held at the instigation of the physicians who invited the pharmacists to meet the members of the County Medical Society and participate in a discussion on general propaganda work. After the reading of a paper by Dr. Anderson, the physicians criticized quite severely the methods used by pharmacists in lending their recommendations to patent medicines by permitting their names to appear under these advertisements in the public press. The pharmacists asserted that they were perfectly willing to desist from this practice. Another point argued by the physicians was the refilling of their prescriptions handed from one person to another, and at times the discussion on this matter grew quite heated. Each side expressed confidence that points had been brought out beneficial to all and that a better understanding would prevail in the future, also that frequent consultations

or meetings be encouraged so that if any differences arose a consistent settlement could be made.

A banquet was given by the Corning druggists to the physicians at the City Club, and the local druggists had the satisfaction of entertaining a very large number of physicians, including several from some of the larger cities near Corning.

Owing to unfavorable conditions and the great extent to which dispensing is practiced in this section, there were serious forebodings as to the outcome of this meeting. Both the physicians and the pharmacists seemed to attend the meeting with a feeling of doubt as to its value, but following Dr. Anderson's address, however, and an extended argument on the course pursued by the physicians, the atmosphere suddenly cleared and results are expected to equal those of any meeting held during the year. The physicians freely acknowledged that they were going backward very rapidly from a professional standpoint and stated they would gladly accept a remedy to improve conditions. They applied numerous questions to Dr. Anderson and the other druggists present in reference to substitution, counter-prescribing and sale of patent medicines in drug stores, all of which were satisfactorily answered.

The Corning pharmacists decided, as did those of the other places where meetings were held, to present each physician in the locality with a manual of the U.S.P. and the N.F., published by the American Medical Association.

It was proposed by the physicians that steps be taken to either admit the local druggists into the County Medical Society or that an organization of the two professions be formed where frequent discussions could be had.

The guests included Clifford H. Calkins, of Elmira; A. S. Van Winkle, of Hornell, and a prominent physician friend of the latter, Dr. Parker. Mr. Van Winkle stated that he as well as Dr. Parker attended out of curiosity and with the belief that no good could result from any joint conference. However, assurances were given by both of these gentlemen that the evening's discussion had evoked a desire on their part to have a meeting in their territory and arrangements were at once begun between Dr. Parker and the County Medical Society to secure Dr. Anderson as speaker for the prospective meeting.

### COST \$20 TO BE KIND TO A STRANGER.

#### Boston Firm Disclaims Any Responsibility for Former Employee Who Borrowed Money of Druggist.

Edgar D. G. Foltz, employed with W. A. Shannon, of Philadelphia, Pa., is anxious to locate a traveling salesman, J. A. Murphy, who claimed to represent the Willis H. Lowe Company, Boston, Mass., to obtain repayment of a draft for \$18.50, with protest fees of \$1.54 added—a total of \$20.04. Murphy called at the pharmacy to sell goods, became acquainted with Mr. Foltz and borrowed various sums from him, as alleged, finally giving the draft in payment. The draft was "refused" by the Lowe company, according to the certificate of protest, dated April 8, made by the National Shawmut Bank, of Boston.

On April 29 the ERA received the following letter from J. A. Murphy in reply to a request for an explanation:

"It justice is to be done you will please wait until I see you in person, which I will do on Friday or Saturday" (April 30 or May 1). He did not appear, nothing has been heard from him since and a letter written subsequently to his last address was returned as undelivered by the postal authorities.

The Willis H. Lowe Company, under date of April 28, wrote as follows to the ERA:

"J. A. Murphy is not at present connected with us in any capacity. He has sold goods for us, in the past, on commission, paying his own expenses. We are in no way responsible for his financial transactions."

Meanwhile Mr. Foltz is apparently out \$20 for being accommodating to a comparative stranger; at least no other sequel to his acts of kindness is in sight after the expiration of two months.

#### Not So Sweet.

And the breast to heave and the soul to grieve  
Yes, parting is such sweet sorrow,  
For the eyes begin to fill  
When you part with your last dollar bill.

### MODEL MANAGERS OF MARYLAND PHARMACIES

#### In the United Drug Company's Southern Expansion Use is Made of Two Very Capable Pharmacists.

BALTIMORE, June 5.—Among the Baltimore drug stores that enjoy a large measure of prosperity are the Williamson & Watts pharmacies at Howard and Franklin streets and at Baltimore and Eutaw streets. Both stores were established upon a firm basis before they became a part of the United Drug Company's chain of establishments, the Eutaw street stand having been long devoted to the drug business and having enjoyed a wide reputation even before Williamson & Watts took hold of it.

The Howard street store was entirely the creation of Williamson & Watts, the place having been leased by them after the erection of the new building on that corner. Primarily, both places owe their success to the initiative and the progressiveness of the members of the old firm, but that this success has been continued and emphasized is due to the fortunate choice by Mr. Williamson of managers. Not being able to look after every detail himself, he looked around for capable young men to attend closely to the sales end of the business. For the Baltimore street store he selected Marion L. Elliott, who has managed the establishment since the firm opened there, 14 years ago. He is about 40 years of age and was born and raised in Baltimore. He got his first taste of the drug business with Mr. Hieronymus, at Gilmore and Lexington streets. He has a great faculty for making friends and enjoys a large measure of popularity, besides being a most capable and conscientious manager, who looks after details and keeps affairs well in hand. Mr. Elliott is a graduate of the Maryland College of Pharmacy. The Eutaw street store offers problems unlike few other pharmacies in Baltimore, but Mr. Elliott has shown the knack of mastering them and adopting methods which appeal particularly to the class of patrons who make up the large majority of purchasers there.

Mr. Williamson's choice for the Howard street store fell upon A. L. Litsinger, a young Baltimorean, not so many years out of the Maryland College of Pharmacy. Mr. Litsinger had given indications of special business ability in the employ first of Druggist Milby, in Fremont avenue, then as clerk for Moore & Copper, in Lexington street, between Park avenue and Howard street, whose name has since disappeared from the roster of drug firms, and still later in the Field pharmacy at Pikesville. The expectations entertained of him were found not to have been misplaced. In the larger field at Howard and Franklin streets, with a previously untried clientele to attract, and with theater audiences to look after, he proved his worth as a capable salesman. Mr. Williamson came to rely implicitly upon him. When, in February last, Mr. Williamson retired from Williamson & Watts and it became necessary to find some one to take care of certain details of the Lexington street store of the corporation and to fill the post of secretary of the company, Mr. Litsinger was chosen. He is about 34 years old and took charge of the Howard street store some six years ago. Wallace J. Smith, the new general manager brought here by the United Drug Company from Holyoke, Mass., has found his services of value in maintaining that continuity of method so essential to uninterrupted growth.

MARION L. ELLIOTT.

A. L. LITSINGER.

#### Contradictory, But True.

The Hairbrush—It is impossible to be in two places at once.  
The Alarm Clock—I can go off and stay right where I am.

## TRAVELERS WHO ARE HUSTLING TO MAKE A SUCCESS OF ENTERTAINMENT OF ILLINOIS PHA.

W. E. SCHMIDT,

with the Hechschild-Kelter Co., is a member of the parade committee of the Illinois Pharmaceutical Travelers' Association which will provide one of the big features at the convention in Quincy next week of the Illinois State Pharmaceutical Association.

JOHN A. MULDOON,

of Chicago, has been with the Fuller & Fuller Co. for twenty-five years and enjoys the distinction of being the pioneer salesman to use an automobile to call on his patrons, having started the custom eight years ago. He is on the I.P.H.T.A. hotel committee.

WALTER R. KREMS,

with the O. F. Schmidt Chemical Co., is the official artist of the Illinois Pharmaceutical Travelers' Association. He designs all of the convention covers and promises that the one for the "round-up" at Quincy, June 13-17, will eclipse all previous efforts.

## Banners for Quincy Parade.

CHICAGO, June 5.—The simultaneous meetings of the Illinois Pharmaceutical Association and the Illinois Pharmaceutical Travelers' Association at Quincy this month are exciting great interest among the trade. The banners which are to be carried in the parade at Quincy have been on display this week at the offices of Robert Stevenson & Son. The minstrel troupe of the Social Drug Club, of Chicago, will attend the meeting and give a performance.

## Chicago Notes.

—James Hirschfeld has bought the pharmacy of A. E. Fletcher at 62 Canal-port avenue.

—W. A. Rennan has purchased the drug business of the Heinemann Drug Company at 211 Webster avenue.

—A. E. Techter has succeeded the drug firm of Stoltz & Grady at 104 North Clark street.

—Central Chemical Manufacturing Company of Chicago has surrendered its papers of incorporation and gone out of business.

—O. J. Hartwig, Milwaukee avenue, is enlarging his store and the improvements will give him a frontage of 50 feet.

—Out-of-town druggists visiting Chicago during the week included the following: F. L. Bernard, of F. G. Bernard & Son, Chatfield, Minn.; J. M. Coryell, Union Mills, Ind.; M. R. Zaegel, Sheboygan, Wis.; C. B. Stizer, of Stiger & Crossman, Toledo, Iowa; W. F. Mangus, Moberly, Mo.; J. W. Evans, Clinton, Iowa.

## Druggist Halper is Honorably Acquitted.

Victor Halper, a druggist of 60 East 116th street, Manhattan Borough, New York City, who was recently accused of failing to keep proper records of sales of cocaine, was honorably discharged by the magistrate.

FRANK J. HOEY, of Chicago, with the Gazzolo Drug & Chemical Co., is secretary and treasurer of the Illinois Ph.T.A.

scription of physicians after the expiration of their government licenses June 30.

## Milwaukee Man Works Off a Forgery.

RACINE, Wis., June 5.—The Red Cross Drug Company was the loser to the extent of \$32.50 by the clever forgery of one C. V. Seerup, a resident of Milwaukee. Seerup, who had been employed and lived in Racine for a short time, made the check out to his own order and signed a fictitious name. Acquaintance with the clerks of the pharmacy made the rest easy and Seerup has disappeared with the cash. The police are hot on the trail.

## \$200,000 Suits Against A.M.A.

CHICAGO, June 5.—The Organic Chemical Mfg. Company, of Philadelphia, and its president, S. Lewis Summers, have brought suit for \$100,000 each against the American Medical Association. The suit is the result of controversies over certain pharmaceutical preparations made by the plaintiff company and because of certain articles published in the *Journal of the American Medical Association*, which it is alleged damaged the business of the company and the reputation of its president.

## Woman Druggist is Accused.

COLDWATER, Mich., June 5.—Branch County has the novel experience of having a woman druggist arrested on a charge of illegal liquor selling. Mrs. Tressa H. Paulson, owner of the Bronson drug store, is the accused person. Her husband, also a druggist, was previously arrested but was acquitted.

## Not Even on Prescriptions.

ITHACA, Mich., June 5.—At a recent meeting of the members of the Gratiot County Druggists' Association at Alma a formal resolution was adopted binding all druggists not to sell liquor even on prescription.

## MASSACHUSETTS MOURNS JOHN H. MANNING.

**Former President of State Pharmaceutical Association and Prominent in Professional and Civic Affairs.**

BOSTON, June 5.—John H. Manning, a prominent druggist of western Massachusetts, died recently at the Corey Hill Hospital, Brookline, after a brief illness. His home was in Pittsfield, and two weeks ago he was moved across the State for the purpose of receiving the most skillful surgical treatment. An operation was performed for gallstones, but the expected relief was not produced.

In 1885 Mr. Manning was appointed a member of the Massachusetts Pharmacy Commission, and he was reappointed in 1891. He was president of the Massachusetts State Pharmaceutical Association in 1887, and for most of the time since he had served on the committees on questions and papers, and on congressional legislation. He was twice a delegate to the American Pharmaceutical Association, and also twice to the American Pure Food and Drug Congress in Washington.

Mr. Manning was born in Ellington, Conn., July 23, 1846, and lived there until 1856, when his father, who was a physician, moved to Pittsfield, and bought the Old Corner Drug Store. The son attended the Pittsfield public schools and Wesleyan Academy, graduating from the latter in 1865. Meanwhile his father had died, in 1863, and his mother had continued the business herself. Upon graduation he joined his mother in the conduct of the store, and in 1872 bought it and conducted it for the next 38 years.

Mrs. Manning and three of the children survive him. The children are Mrs. George Hubbell, of Pittsfield; Mrs. Herbert P. Ward, of Springfield, and John P. Manning, of Pittsfield.

Mr. Manning was a communicant of St. Stephen's Episcopal Church and held membership in many fraternal associations, including the Masons, Red Men, Royal Arcanum and Sons of the American Revolution. He also held various civic offices, being a member of the Massachusetts Highway Commission at the time of his death.

### Reinhold van der Emde, Former Druggist.

Reinhold van der Emde, founder and president of the Yorkville Bank and active for years in charitable and philanthropic movements in New York City, died of heart failure last week at his country place, Bedford, Westchester County.

Mr. van der Emde was born in Germany in 1842, and in his youth studied pharmacy in Switzerland. He came to this country in 1869 and established a drug store at the Bowery and Second street, Manhattan Borough. He built a large business and soon went into banking. In 1893 he founded the Yorkville Bank, of which institution he was president until his death. The bank's new building at Third avenue and 85th street, which is generally looked upon as a model for banking houses, was designed under the direction of Mr. van der Emde.

Mr. van der Emde was a trustee of the German Savings Bank and an officer in several German charitable organizations. He was a director of the German Hospital, the Isabella Home and an officer in the Deutsche Gesellschaft and the German Liederkrauz. He was a member of the German Apothecaries' Society, and was always active in social affairs that were organized by leading members of German society in this city. He left a widow.

### Obituary Notes.

—HORACE GREELEY CHANDLER, formerly of Montfort, Wis., died recently in Mobile, aged 37.

—THOMAS A. JOHNSON, of the Cooper-Johnson Drug Company, Franklin, Tenn., is dead, aged 31. A widow and child survive.

—HENRY TANNER, 37, a drug clerk, is dead of pneumonia at his home, 1012 Saratoga street, Newport, Ky. He leaves a widow and one child.

—GEORGE T. MILLER, of Hillsboro, New Mexico, died on the 24th ultimo, leaving a widow who expects to continue the business under husband's name.

—HERBERT H. ARMSTRONG, a graduate of New York C.P., died recently at Kearny, N. J., aged 44, leaving a widow and two children. He formerly lived in Wilkes-Barre, Pa., but for a number of years was in the drug business in Newark, N. J.

J. J. SCHUBERT, president of the Schubert & Schneider

Drug Co., Kankakee, Ill., died on June 2, after a brief illness. He was one of the veteran druggists of the State and was well known throughout the fraternity, being a member of the Illinois P.H.A.

—WILLIAM C. YEISER, a prominent and popular druggist of Jacksonville, Fla., is dead, aged 45, leaving a widow and daughter. For a number of years he was connected with the Southern Drug Manufacturing Company, but recently went into business for himself.

—FRANK A. HENRY, JR., aged 52, is dead in Louisville, where he was a prominent druggist, having been for years of the firm of Renz & Henry and latterly at the head of the Henry Drug Company and the Henry Pharmacal Company. He leaves a widow and two daughters.

—EMILE T. DIEZ, for 17 years owner of a store at Magazine and Peniston streets, New Orleans, died recently at Withamsville, Ohio, where he had gone in the hope of recovering his health. He was a graduate of Tulane University. He leaves a brother, Leon B. Diez, a druggist of Magazine street and Louisiana avenue; one sister and a half-brother.

## NEW PURE DRUG LAW IN WISCONSIN.

**Referee Board Attacked in the Legislature Prior to Passage of Act by an Overwhelming Vote.**

MADISON, June 5.—The pure food bill which was recently passed in the Wisconsin Legislature has been signed by the Governor and has been published as a law. The Act amends Sections 4600 to 4601 of the Statutes relating to foods and drugs and aims to prevent anything in the nature of adulteration. In the way of definition, it is explained that in the case of drugs an article shall be deemed to be adulterated:

"First, if when sold, or offered or exposed for sale or had in possession with intent to sell, under or by any name recognized in the United States Pharmacopoeia or National Formulary, it differs from the standard of strength, quality or purity laid down in the latest edition thereof, current at the time when such drug is sold or offered or exposed for sale or had in possession with intent to sell; second, if its strength, quality or purity falls below the professed standard under which it is sold; third, if it contains wood alcohol except when intended for external use only and so labeled."

The law, which designates benzoate of soda as a substance deleterious to public health, was passed by the Assembly by an overwhelming vote. A sharp debate arose when an effort was made to postpone action.

"President Roosevelt told J. Q. Emery, Wisconsin Dairy and Food Commissioner, that the finding of the special committee that benzoate of soda was not injurious to health was the one time when he had been fooled by Standard Oil," said Speaker Hancock. "The finding of the committee was worthless, because the committee was packed. One of the three was a chemist from the famous kerosene oil university at Chicago, and another was from the corn syrup system which is dominated by Standard Oil."

### New York Chemists' Club May Build New Home.

The building of a handsome club house in the near future is under consideration by the members of the Chemists' Club, of 108 West 54th street, Manhattan Borough, New York City. Several weeks ago a large plot at 50 to 54 East 41st street, adjoining the southeast corner of Madison avenue, was sold to Mrs. Robert Hewitt, of Ardsley-on-Hudson. Later the property was ostensibly bought by Wesley Thorne, but it was learned recently that the purchase was made with a view of turning it over to the chemists. Members say that no action on the construction of the building will be taken until the return of Prof. Morris Loeb, of Columbia University, president of the club, who is now in London attending the International Congress of Applied Chemistry. Plans for the building, however, have been completed by Warren & Wetmore, architects.

### Jersey Delegate Elected to N.A.R.D. Convention.

MOUNT HOLLY, N. J., June 5.—At the quarterly meeting of the Burlington County Retail Druggists' Association, Frank S. Hilliard, of Vincentown, was elected delegate to the annual convention of the N.A.R.D., which will be held in Louisville September 6-11. E. R. Sparks, of Burlington, was elected alternate.

## PATENTS.

Granted June 1, 1909.

923,136—Reinhold Berger, Berlin, Germany. Making double-walled vacuum bottles.

923,201—Morris H. Petigor, New York, N. Y. Dispensing pump.

923,214—Swan Tevander, Toledo, Ohio, assignor to American Can Company, New York, N. Y., a corporation of New Jersey. Screw cap nozzle for cans.

923,232—Adolph Woolner, Jr., and Aladar Lászlóffy, Peoria, Ill., assignors to Woolner Distilling Company, Peoria, Ill., a corporation of Illinois. Process for making alcohol.

923,236—George T. Altenberg, Cincinnati, Ohio. Double-walled vessel.

923,387—Frank B. Turner, Ocala, Fla. Turpentine cup.

923,501—Edward Ermold, New York, N. Y. Bottle-labeling machine.

923,618—Samuel E. Blizard, Franklin, Ind. Liquid measure.

923,635—Ernst Erdmann, Halle-on-the-Saale, Germany, assignor to Actien Gesellschaft fur Anilin Fabrikation, Hain dye.

923,761—Oskar Boeters and Richard Wolfenstein, Berlin, Germany. Process of producing nitro compounds.

923,768—Arthur W. Clark, Conshohocken, Pa., assignor to Johnson & Johnson, New Brunswick, N. J., a corporation of New Jersey. Manufacture of surgical ligatures.

923,776—Samuel Danielewicz, San Francisco, Cal. Filtrative inhaler.

923,779—William H. Doble, Quincy, Mass. Package-filling machine.

923,781—William W. Dryden, Philadelphia, Pa. Prescription balance or scale.

923,791—Hubert Henn, Berlin, Germany, assignor to American Thermos Bottle Company, Brooklyn, N. Y. Double-walled vessel.

## TRADE MARKS.

Published June 1, 1909.

39,132—The Allen & Hanburys Co., Toronto, Montreal, Canada. Class 46. Infant's Milk Food, malted cereal food for infants, milk cocoa for invalids, a pancreatized milk and cereal food for infants and invalids, etc.

39,400—Marietta Stanley Company, Grand Rapids, Mich. Class 6. A cosmetic to remove tan, moth and sunburn and to beautify the complexion.

41,412—W. S. Ward, Camp Point, Ill. Class 6. A veterinary remedy.

41,430—Emergency Laboratories, New York, N. Y. Class 6. A remedy for eruptional skin diseases.

## Jury Verdict Upholds Proprietary Contract.

LITTLE ROCK, Ark., June 5.—The jury which heard the testimony in the case of the Hessig-Ellis Drug Company, of Memphis, against Read's Drug Store awarded the plaintiff a verdict of \$580.50, which was the full amount sued for. An appeal to the Supreme Court will probably be taken.

The suit involved the interpretation of a contract by which Mr. Read bought a proprietary remedy. The contract called for advertising in a certain way and the defendant claimed the selling company had not lived up to the spirit of the contract. The plaintiff contended that it had lived up to both the letter and the spirit of the contract.

## THE DRUG MARKETS

### ACTIVITY LACKING BUT DEMAND STEADY.

**Tendency Has Been Upward With Business Good in Jobbing Lots—Opium Firmer and Higher.**

**NEW YORK, June 7.**—Although no particular activity has been noted in the market for drugs and chemicals during the past week, there continues to be a steady jobbing demand without any discouraging features in the general outlook. Opium is firmer and higher. Asafetida scarce and tending upward. Balsam of Peru, Oregon, is held at higher figures. Glycerin is in a strong position, and a further advance in price is looked for. Citric acid is in demand with a very strong market at quoted prices. Camphor is active, but without any change in manufacturers' prices. Cantharides, Russian, is firmer in primary markets, but unchanged in our own. Jalap root is firm, and values are well sustained.

**OPICUM.**—The market is much firmer, and holders who have been offering at \$4.15 per pound are now holding at \$4.25 per pound, but powdered and granulated are unchanged. Primary markets report active buying with heavy sales for America at advancing prices, with important demands unfilled. The weather continues dry and a good percentage of the plants have dried up. The arrivals in Smyrna for the week ending May 14 amount to 2067 cases, against 1387 cases at the same period last year.

**QUININE SULPHATE.**—There is a steady market, but without any new features, and manufacturers' prices are unchanged on the basis of 1 lb. per ounce for 100-ounce cans. The sale of Amsterdam brand of quinine in Amsterdam on the 1st instant was without any change in value; 50,000 ounces were sold at florins 10.50, the same as at the previous sale. The bark shipments for the month of May amounted to 1,320,000 pounds.

**COD LIVER OIL, NORWEGIAN.** Cable advices give the result of the catch and production of oil to the 1st instant as follows: Total catch, 52,700,000 fish, producing 40,670 barrels of oil. The result in the year 1908 was as follows: 44,300,000 fish, producing 47,238 barrels of oil. The production during the past week has been only 300 barrels, which shows quite a falling off, and the total result as compared with last year shows a deficiency of 6568 barrels. Primary markets are quiet but firm, and lower prices are not looked for.

**GLYCERIN.**—Manufacturers have advanced their prices to 16c. per pound for the article in drums, 17c. in plain cans and 17½c. in patent cans. The tendency is upwards, and one of the largest manufacturers refuses to quote.

**CHAMOMILE FLOWERS, HUNGARIAN.**—There is a shipment on a steamer soon due to arrive. The lot is reported to be a prime one and will be offered at 38c. per pound, in cases of 110 pounds each. Advice received from different producing sources agree that only a small quantity will be gathered this season, hardly sufficient to meet the world's demand.

**CANTHARIDES, RUSSIAN.**—In the producing districts stocks seem to be greatly reduced, and are held at very much higher prices. However, some houses here have a good supply at present and still continue to quote at 60c. per pound in cases of about 200 pounds.

**ST. IGNATIUS BEANS.**—This article has been out of market for a long time, but an arrival of about 500 pounds is expected shortly by a local dealer. Subject to previous sale it will be offered at 50c. per pound.

**WORMSEED, LEVANT.**—Dealers expect to see an advance in the price of this article, as first hand stocks in primary markets are reported as entirely cleared up. One house which has a supply on hand is offering bales of 200 pounds at 6c. per pound; lots of 5 to 10 bales at 5½c., and lots of 25 bales at 5c.

**ASAFETIDA.**—Increasing firmness is shown, owing to light available supplies and continued absence of offers from primary markets. The small stock of U.S.P. in the local market is held at 50¢/60¢, per pound, as to seller, and still higher prices are predicted.

**BUCHU LEAVES.**—The short are firmer and some holders have advanced their quotations to 37c., although others are still willing to sell in a limited way at 35¢/36¢, per pound for large quantities. The outlook is considered favorable for

further improvement. Cables from London report resales of stocks there at the equivalent of 36c. laid down here.

**CAFFEINE.**—Manufacturers have reduced their prices and the market is easier than for some time. Bulk, as to quantity, is held at \$3.10¢/\$3.25 per pound, the inside figure being for 25-pound lots.

**BALSAM OF FIR.**—Prices are higher for Oregon owing to stronger primary markets. Local dealers have advanced quotations to \$1.10 in barrels and \$1.20 in cans.

## London Drug Market

**LONDON, May 29.**—This has been a quiet week and until the Whitsuntide Holidays are well over business will be practically at a standstill. Changes in value have been few, the most important being an advance of £5 per ton in the price of refined Glycerin which is now quoted at 78s. 6d. per cwt. for best quality in tins and cases and lower for large wholesale quantities. Citric Acid continues in quiet demand, but the market is steadier. For Buchu Leaves 1s. 6d. per pound is asked for the quality which sold in the last auctions at 1s. 3d. to 1s. 4d. Business has been done in Rio Ipecacuanha at 5s. 3d. per pound. Menthol is firmer at 7s. 4d. per pound after a small business at 7s. 3d. English Oil of Sweet Almonds is 2d. per pound dearer at 1s. 10d. per pound. Camphor is steady but quiet, refined Japanese being quoted at 1s. 9d. per pound for ounce tablets. American Peppermint Oil is quiet, but Japanese dementholized is rather dearer at 4s. 10d. per pound "spot." Essence of Lemon is lower at 3s. 3d. per pound. On the spot holders of Opium are firmer in their views, but buyers are not anxious to come forward at the moment. The position as regards Morphine and Codeine is unchanged.

### Anniversary Celebration of Enterprising Pharmacist.

Bernhard von Rappaport, who owns two drug stores, one at Notstrand avenue and Clarendon road, the other at Rogers and Leferts avenues, Flatbush, Borough of Brooklyn, New York City, last week celebrated his third business anniversary in gala attire and prosperous style. During four days of the week visitors to his stores were made to feel the success which has come to him by the enjoyment of some delicious dish or drink from his soda fountains or a delightful box of candy, free of charge. Each purchaser received a souvenir, choosing from a list which included boxes of confections, perfumery, soaps, toilet powders, etc.

Mr. Rappaport is a strong ERA man, perusing both its news and advertising pages each week in quest of helpful hints, new propositions and ideas in order that he might be able to supply every want of his large patronage and keep his stores fully abreast of the times.

### Fire Damages Plant of Milwaukee Drug Company.

**MILWAUKEE, June 5.**—The Milwaukee Drug Company suffered a loss of more than \$80,000 recently when fire badly damaged a stock of stationery and dry chemicals valued at \$15,000, which were stored in warehouses in the Seaman Building, 317-319 Milwaukee street. The loss was partly covered by insurance. The entire third floor of the building was used by the wholesale drug company as an overflow store-room and the drug company was the heaviest loser of all the occupants of the building. A new carload of tablets had just been stored in the structure by the company and it is said that this was a total loss. Considerable damage was done by water to the stock in the Milwaukee Drug Company's building adjoining and only the hard work of the fire department saved the structure.

### Pressed Too Hard by Their Creditors.

**CINCINNATI, June 5.**—The Globe Chemical Company and the Ohio River Chemical Company, which are engaged in the buying and selling of heavy chemicals, have been placed in the hands of Griffith L. Resor as receiver, on an order of the Superior Court. The appointment was asked for by Louis C. Grote, secretary and treasurer of the concern, who claims the companies are solvent but that because of money stringency and inability to realize on stock, the companies are unable to meet the pressing demands of creditors.

PUBLISHED EVERY THURSDAY

VOL. XLI.

NEW YORK, JUNE 17, 1909

No. 24

D. O. HAYNES & CO. - Publishers

90 WILLIAM STREET, NEW YORK

Telephone, 2457 John. Cable Address: "Era, New York."

Western Office:

Room 500, Dickey Building, 40 Dearborn St., Chicago  
Telephone, Central 5888

## SUBSCRIPTION RATES.

United States, Cuba, Hawaii, Porto Rico, the Philippines, and Mexico	\$2.50 a Year
To Canada, postpaid	3.00 a Year
To Foreign Countries in Postal Union	4.00 a Year
Single Copies	10 Cents.

ALL SUBSCRIPTIONS ARE PAYABLE STRICTLY IN ADVANCE

Published every Thursday at 90 William Street, Borough of Manhattan, New York, by D. O. Haynes & Co., a corporation; President and treasurer, David O. Haynes; vice-president, Ezra J. Kennedy; secretary, Edward W. Drew. The address of the officers is the office of this publication, and the title is registered in the United States Patent Office.

Entered at the New York Post-Office as Second Class Matter

## Re Photographs for "Era Album" Illustrated Section

Each subscriber to The Pharmaceutical Era is entitled to representation in this work, and is invited to send us his photograph. We do not require a subscription from each partner and clerk. If the firm or proprietor is a subscriber, the other partners and clerks may have their portraits included for \$1.50 each. To secure all of the Album sections one must be a subscriber to The Era in his own name.

In sending photographs be sure that each one is distinctly labeled with the name, address, business, profession or occupation of the person, written clearly on the back of your photograph. A good plan is to write it on a printed label and stick it on the center of the back of your photograph. Here is a good specimen:

### FOR ERA ALBUM.

Fred S. Rogers, Middletown, N. Y.

McMonagie & Rogers.

Ex-Pres. N. Y. State Pharm. Assn.

When additional photographs of partners and clerks are sent, each one should have written on it the name of the subscriber who sends it, as well as the name of the person in the photograph.

### Cabinet Photographs Only

The style of photograph we require is the so-called "cabinet" size, with the head about two inches long. If other sizes are furnished they interfere with our plans for keeping the faces uniform, also prevent us from classifying the cuts by localities.

In view of the great amount of work we are assuming, to have each of our subscribers properly represented in this Album, we feel that we are not asking too much when we request each subscriber to supply us with the size and kind of a photograph which will facilitate our work and best enable us to do him credit.

In forwarding photographs for the Album, see that they are distinctly addressed as follows:

THE PHARMACEUTICAL ERA.

For Era Album

90 WILLIAM ST., NEW YORK.

## DOCTORS NOW IN THE BENZOATE FIGHT.

Somewhat unexpected, but not altogether surprising, is the action taken by the American Medical Association in entering the benzoate of soda controversy and training its big guns against all preservatives in foods. The resolutions form a most emphatic endorsement of Dr. Wiley's position, the Referee Board of Experts is thoroughly discredited and moreover the presentation of the resolutions personally to President Taft by a delegation of prominent physicians is an indication that this powerful association does not propose to permit the sentiment adopted to rest dormant in its minutes. The resolutions are so terse, vigorous and striking that no room is left for comment:

Resolved, That the American Medical Association respectfully urges upon Congress the necessity of amending the National Pure Food and Drugs Act in the following particulars, viz.:

1. To prohibit absolutely and unqualifiedly the use of benzoate of soda and similar preservatives in the preparation and preservation of foods destined for interstate commerce.  
2. To provide for a system of Federal inspection of all establishments engaged in the preparations of foods destined for interstate commerce, such inspection having for its specific object (a) the prevention of employment in them of persons afflicted with contagious, infectious diseases; (b) the prohibition of the use of preservatives, such as benzoate of soda, and (c) the prevention of the utilization of unclean and offensive waste products, which now, by the use of such preservatives, are branded as foodstuffs and sent through the channels of commerce.

3. To provide that the interpretation and construction of the law shall rest with the courts of the country.

With such powerful influences now engaged in the anti-preservative campaign some interesting developments may be looked for when Congress convenes in regular session in December.

## "BURN THIS LETTER"—"BURN THE LEDGER."

Students of the diplomatic phases of political history in America will never forget the famous "burn this letter" which practically cost James G. Blaine the Presidency of the United States, to be elected to which high office he had in 1884 even a better apparent chance of election than some other representatives of his party who have been successful. In drudgery at the present time there may be a paraphrase of the Blaine episode in some of its aspects. In a lawyer's implied order to "burn that ledger" we find that the president of a successful chemical manufacturing concern loses practically in a moment an increase of salary amounting to \$50,000 a year, without his knowledge or consent, so far as the evidence now indicates. Moreover the stockholders who object to the burning of ledgers are trying to wrest the presidency from the incumbent who jumped from \$6000 a year to \$25,000 a year and quickly to a \$75,000 basis, figuring the last \$25,000 increase payable in \$10 shares at \$5 each as being what the trade would consider an equivalent in view of divi-

dends that have been declared by the corporation.

Elsewhere in this issue a remarkable story is told of the developments up to date in the Sanitol litigation. It will surprise thousands of druggists who have become stockholders in the company, it will enlighten those who have received invitations to transform their stock certificates into "mdse.", with the values carefully figured out in advance. It will interest particularly the stockholders who were informed that "no dividends were likely to be paid in the near future"—but of course they really would not expect it when it became necessary to jump the president's salary from \$6000 a year by quick stages to approximately \$75,000 a year. The trouble with so many people is that they are unreasonable. If they were not so, the Sanitol's lawyer probably would not have canceled the last salary increase, as the evidence seems to show. The company has had a reasonably successful career and the indications are that its future existence will be greatly benefited by the proceedings which are pending in St. Louis.

#### IMPORTANT DECISION AS TO LABELS.

On page 575 appears some account of a recent decision of importance to manufacturers of pharmaceutical preparations and to proprietors of patent and other remedies, including druggists who buy compounds in bulk and after receiving the same do the work of bottling, labeling and otherwise preparing the articles for the market. In the case in question the court held that it was not necessary to exhibit the alcoholic content on the container of the goods in bulk, so long as the labels on the smaller bottles or packages in which the goods were sold to the public were in conformity with the law.

The decision means that there will be no further Federal interference in cases of a druggist or other person having his medicines compounded and shipped to him in bulk by a manufacturing pharmacist in another State, provided there is no sale in bulk. The decision is a victory for the pharmaceutical manufacturers.

#### NEWS VALUE OF AN ADVERTISEMENT.

A fact which many advertisers overlook in preparing their copy for publication is the possible news value of the announcements. Persistent and continued publicity is an essential of success, but its aid is best invoked when the advertisements are given what may be called news interest. The advertiser may not have something new to sell, but the old story can be told in new phraseology, keeping the chief points well in the foreground and the effect cannot fail to be superior to that produced by mere duplication of previous statements concerning the wares to be sold.

It is for that reason that the ERA has pursued the policy of cordially inviting its advertisers to change their announcements, making no extra charge for resetting the type. The result is that our advertising pages are more attractive to our readers and they turn with more than ordinary interest to that department, a fact which benefits them and advances

the value of the advertising to those who make the announcements. The introduction of new advertisers to our readers is a further step in the direction of increasing the news interest in every department of the ERA and it appears to be greatly appreciated by all who are concerned.

#### PAYING THE DOCTORS BY THE YEAR.

In one of the discussions at the recent meeting of the American Academy of Medicine at Atlantic City the speakers favored the adoption of the contract physician, whereby families with small incomes, especially wage earners, could pay an annual fee of \$3 or \$5 for attention and also the adoption of some plan whereby the family could be insured for the amount of a physician's bill.

The growing practice of a family physician turning over a patient to a specialist and overcharging, the physician and the specialist dividing the fee, was condemned as professional grafting, as were also all fee splitting plans. The speakers recognized the burden of physicians' bills and also the objection of the average person to summoning a physician in the early stages of an illness because of the fear of exorbitant bills.

This is a recognition of the principle of Chinese civilization which is to pay the doctor while the person is in good health, but to stop doing so during illness. While the effect upon the drug trade of a similar custom in this country would probably be of small account, nevertheless it is likely that such a system would work very much to the benefit of the great mass of people who are either poor or in moderate circumstances, while it would provide the doctors with incomes of more stability and certainty.

#### PROGRESS OF STANDARDIZATION MOVEMENT.

Dr. Stewart's paper on the "Standardization of Materia Medica Products," which was read before the American Therapeutical Society and portions of which are reprinted on page 563 of this issue of the ERA, is an important contribution to the literature upon this important subject. The agitation in behalf of standardization, in which the doctor has been an earnest and effective worker, has been making rapid progress until the time has come when there ought to be a practical consideration of ways and means. How is it going to be done and who is going to do it?

Suggestions are made in this paper as to the courses which may well be pursued in the future development of standardization and they are commended to the attention of the various pharmaceutical associations. This is a matter which deserves a share of the time of the convention of the American Pharmaceutical Association at Los Angeles in August.

The man who is shrewd enough to sell ice in summer and coal in winter would run his fountain the year around and make it pay: if he was a druggist.

Educational in scope, informative in its results and wit sharpening in some of its puzzling queries, the Quiz Master's department of the ERA will be found of high value not only

to the younger generation in pharmacy, but to those who have been in the business for periods long enough to warrant an application of the freshening and brightening process. This week the Quiz Master will be found on advertising page 20.

Dr. Wiley must have felt highly elated when he heard of the hearty endorsement given to him and his work by the American Medical Association at Atlantic City last week. The growing strength and importance of the A.M.A. gives to the Father of the Pure Food and Drugs Law an ally of such force and power that his future efforts will probably be less hampered by obstacle throwers than heretofore.

The development of the slot machine idea has taken further strides in New York. Many of the big hotels and some of the larger drug stores have now installed slot machine typewriters. For 10 cents and a press of the button you are confronted with a standard typewriter and paper which can be used for half an hour.

The fact that a druggist in a "dry" town has a trade in fishing tackle does not justify him in selling distilled "bait."

Largely because of its geographical position, Los Angeles, Cal., is becoming one of the recognized centers of the wholesale distribution of drugs, and in connection with the annual meeting of the American Pharmaceutical Association which convenes in that city on August 16 it is very much in the public eye. Among the men whose aggressive action and vigorous efforts brought about the enthusiasm necessary to securing the meeting for the metropolis of the Southwest, was L. N. Brunswick, president of the Brunswick Drug Company. He has been identified with the wholesale drug business for the past 40 years and is among the best known men in the trade.

A native of France, he came to this country a youth—the architect of his own fortunes, and his career of successes has been so marked as to deserve chronicling in the commercial records of the Southwestern Empire. He first became a factor in the wholesale trade at Fort Worth, Texas, in 1877. Later he was a junior partner in the firm of Finley & Brunswick, of New Orleans, which change occurred in 1883. Assuming the management of the house, he added to its prestige and trebled the volume of its trade within a very few years.

In 1888 the firm determined to reach out for the business of the Pacific Coast and in conjunction with F. W. Braun, organized the F. W. Braun Company, of which Mr. Braun became resident partner. In 1894 Mr. Brunswick purchased the interests of his partner, Mr. Finley. This was subsequent to the incorporation under the laws of California, in 1903, of the F. W. Braun Company, which was composed of Mr. Braun and Mr. Brunswick, and was conducted as a close corporation.

In 1903 it became necessary for Mr. Brunswick to retire from active business for a period on account of his health, and he disposed of his interests in New Orleans, retaining only his connections in California. Late in the year 1904 Mr. Brunswick went to Los Angeles and divided the management of the business with Mr. Braun. In May, 1907, Mr. Brunswick purchased Mr. Braun's interest and changed the style of the company to its present name—The Brunswick Drug Company. This prosperous corporation is officered as follows: L. N. Brunswick, president; W. M. Gray, vice-president; C. M. Gair, secretary, and G. A. Champion, manager of the San Diego branch.

The Brunswick Drug Company is a representative distributor for the Pacific Coast and the Southwest. It has warehouse consignments from the principal manufacturers of patent medicines and specialties for many of the jobbing centers on the Pacific Coast and for points in Arizona and New Mexico, as well as the major part of the interior of California

and the mining regions of Nevada. It also controls a large and growing trade throughout the provinces of the Republic of Mexico.

The San Diego branch of the house handles the business of the southern portion of California, and of the province of Lower California, in Mexico. Within the past two years this company has completed and equipped an up-to-date laboratory, for the production and manufacture of such goods as are demanded by the retail pharmacists of the region. It has a full line of laboratory products, second to none in the country, including compressed hypodermic and triturate tablets, various granular salts, chemicals and pharmaceuticals, besides a very interesting assortment of toilet preparations and requisites. The company is the pioneer on the coast in the manufacture of hydrogen peroxide.

The house carries on an aggressive selling and promoting campaign throughout the enormous region of which Los Angeles is the natural center and the resultant increase of the business shows that it is most successful.

Mr. Brunswick will be a prominent personality at the coming meeting in Los Angeles, and his interesting experiences as a pioneer in the development of the distributing business of a region that is attracting the attention of the world will prove entertaining to the hundreds of men in the trade who have long known of his successes and will be gratified at the opportunity of forming an acquaintance, with one who combines the graces of the French with the bountiful hospitality of the great West.

L. N. BRUNSWIG,  
of Los Angeles, Cal.

"There is no telling what profit these cocaine vendors make after they have mixed the drug with sugar and other ingredients, though they will never get it up to the price at which it was originally sold by the trade," said a druggist of Richmond (Va.) recently in discussing the capture of two dealers in Manchester. "Cocaine can be bought today for about \$3.50 an ounce, wholesale. Back in the eighties when it was first discovered, it was about as costly as radium, for the price then was \$1.50 a grain, or about \$600 an ounce. One day a man came into my store with a physician's prescription for two ounces, and I promised to get it for him. Just before he went out, however, he remarked that it might be a good idea to get a line on the cost, the clerk informing him that the bill would be in the neighborhood of \$1000.

"I'm not ready to mortgage my home," he said, "and I guess I'd better not get it," and he did not. Later on the price decreased, but long before the drug came into popular use by fiends. The illegal traffic seems to have been pretty well broken up in Richmond, the new law having had a deterrent effect. Still the vendors who peddle it have to take long chances, and naturally they charge heavily. With adulteration the profits get up to that point where there is no telling what percentage is made.

The long suffering corner drug store clerk suppressed a groan when the customer who never bought anything but stamps, handed him a dollar bill and asked him for a one-cent stamp.

"What are you doing?" the customer asked presently, hearing much rattling of change. "Giving me all pennies in change?"

"Not quite all," he answered, as he handed her the change in pennies, with the exception of one lone and solitary nickel.

—New York Press.

The manufacture of a cough mixture from the blood of a sparrow got a coolie into trouble the other day, says the Shanghai Mercury. Sunday he was found in the Sinza district with a couple of poles, a tin of bird lime and ten sparrows in his possession. The man was brought up at the mixed court charged with having cruelly ill-treated the birds, and in the course of the case it transpired that the coolie was catching

the sparrows in order to sell them to medicine dealers. The reason he wished to keep them alive was that the medicine shops, who made a sort of cough mixture out of their blood, would not buy them if they were dead. The coolie was cautioned and his gear confiscated.

He—Well, I've found out one thing. You have no heart.

She—Oh, come now. How can a man without brains know anything about anatomy?

"I say that you should teach yourself to take things as they come."

"But I much prefer to knock them as they go."

Judge George F. Lawton, of the Middlesex Probate Court, told me a story the other day, relates a writer in the Boston *Herald*, of an American minister who was spending his sabbatical year traveling abroad. Arriving in London he made every effort to get an intimate view of the two branches of Parliament in session.

Of course, no stranger is allowed on the floor of the House of Lords, but the minister, not knowing this, and with the usual amount of American push, tried to make his way in. There is a rule, however, that servants of the various lords may be admitted to speak to their masters.

Seeing the minister walking boldly in, the doorkeeper asked:

"What lord do you serve?"

"What lord?" replied the astonished American, "the Lord Jehovah."

For a moment the doorkeeper hesitated and then admitted him. Turning to an assistant standing near by, he said:

"He must mean one of those poor Scotch lairds."

Ethel—You would hardly know Reginald since he got back from Europe. He lost all his money there and—

Elsie—Hardly know him? Why, I shan't know him at all.

It is always a mistake to hear things that are not necessary and have passed their usefulness, says a writer in the Rochester *Herald*. To sacrifice convenience to sentiment is wrong. The little bottle that Jack wore when he was a baby may have a sentimental association for the mother, but every time Jack sees it he feels grumpy and sore about it. The fact is that Jack has no further use for the thing.

There are so many women who cannot part with father's old uniform, if he ever had any; with the haircloth parlor furniture set that belonged to mother and which has been accumulating dirt and filth in the cellar or the garret for more years than the children can remember.

There are many ways of avoiding hoarding, than which there is no home practice more unsanitary. The best way is to start in to clean house with an eye only for the things you actually have use for. Gather everything else together and ship it away. Your house will be cleaner and your own health as well as that of all the other members of the family will benefit by your action.

She—Why is it a woman never looks at the man she's marrying when at the altar?

He—I do not know, but I do know she keeps her eye on him pretty well after the wedding.

"The ultimate consumer," the scapecoat of the tariff discussion in Congress, is being enlightened on many questions through the publication of facts brought out in debate. Some of this knowledge brings no joy to the heart of the "ultimate consumer," for he finds that in many instances he has been deceived.

Apropos of the discussion in the Senate regarding the necessity for protecting the American cotton seed oil industry, Special Agent Julien L. Brode, of the Department of Commerce and Labor, has sent information from Marseilles, France, that the American "ultimate consumer" has been using his own cotton seed oil for his salad dressing in the belief that it was "pure olive oil" from France. Mr. Brode adds, in a kindly spirit, that the French pure food law and the short crop of olives is going to boost the price of real olive oil for the "ultimate consumer."

Those Southern Senators who opposed the placing of a duty on cotton seed oil, contended that the industry needed no protection on the ground that there was no competition abroad;

but Mr. Brode gives a list of oils which he claims compete with the American oil. France imports about one-fifth of the cotton seed oil shipped out of the United States.

"The strict French pure food law," adds Mr. Brode, "which has been in effect for about a year, is having its effect on the market. Mixed oil was sold formerly as olive oil, but is not so sold now. This further curtails the supply and confines the demand more directly to the best grades of olive oil."

Just as soon as a druggist feels that he is making enough to properly support his family, fate brings twins or the measles.

One of the tiniest books in the world—a volume so small that it can and has been worn as a watch charm—is owned by Peter J. Collison, of 339 Adams street, Brooklyn. The book is an English dictionary, containing 364 pages and the definitions of 14,000 words. In a dispatch to the New York *Herald* recently it was announced that George Martin, of 243 Allen avenue, Columbus, Ohio, had found one of these dictionaries. It was believed to be the only one in the United States until Mr. Collison announced that he had come into possession of one of the volumes 20 years ago.

The dictionary was published by Robert Maclehose, of 153 West Nile street, Glasgow, and was dedicated to a Mrs. Kendal. The publisher stated in the preface that the work was undertaken "in appreciation of kindly encouragement given to the production of tiny articles, of which she has a unique collection."

The dictionary is less than one-third of an inch in thickness, is three-quarters of an inch in width and one and one-sixteenth inches in height. The volume is enclosed in a silver case, in the cover of which is a magnifying glass, as the print is too fine to be read by the naked eye. The book was published after photographic plates had been made of the 364 pages, which were set in large type.

In addition to being an extraordinary specimen of the art of printing, the book is of value because it contains many words that cannot be found in the average dictionary. Words with the meaning of which all are familiar have been omitted. In their places are printed words found in scientific and legal literature, as well as many words now obsolete.

"After looking in vain for the definition of some unusual word in the average dictionary, I have often found it in my watch charm dictionary," Mr. Collison said. "The book was presented to me 20 years ago by a friend, who picked it up while in Scotland. It is the only copy I ever saw and I doubt if there are many in this country."

Nearly 1000 dogs were on view at the two days' show of the Toy Dog Society at the Crystal Palace, London. The society offered a liberal list of premiums, the money value of which was about \$10,000. King Charles spaniels, pugs, Maltese and Yorkshire terriers and Pomeranians were the strong features of the show.

As a matter of imperative necessity, Postmaster-General Hitchcock has decided to discontinue the new green special delivery stamp and return to the familiar blue stamp showing a special delivery messenger boy mounted on a bicycle. In the great rush with which the mails must be handled, many letters bearing the new stamp have escaped treatment as special delivery matter because of its similarity in size and color to the one-cent stamp. In some instances delay in delivery of such letters has caused serious loss to the public and embarrassment to the Postoffice Department.

The old design with the boy on a wheel is distinctive and so well known to postoffice and railway mail clerks that it attracts instant attention and a letter bearing it is expedited by every employee. The issuance of the blue stamp will begin at once. The discarded stamp showing the winned hat of mercury entwined with an olive branch, is one of the most artistic ever printed, but the stamp is smaller than the old special delivery stamp, and this fact, with its green color, caused it to be mistaken for the regular one-cent stamp.

You cannot expect to make people climb on your soda water wagon if you run it like a brewery dray.

A clerk who makes himself look like a poison label should be kept in a dark poison closet.

## The Caution of Cummins.

By Emma Gary Wallace.

Cummins had a badly sprained ankle, and that was no trifling matter for a man of his avoirdupois. He fretted and fumed, had a telephone extension placed by the side of his couch and was absolutely certain that everything would go to rack and ruin in his enforced absence. It was bad enough to be laid up right in the golden spring days without the added knowledge that a new and undeniably attractive drug store was being opened up on the opposite corner below his own.

On the piazza roof outside his window an anxious mother-robin hopped to and fro eyeing him suspiciously. Best perchance he should cast envious eyes upon the sung little nest, she was building in an overhanging tree. After each return trip had added another hair or bit of grass to the walls of the tree-home, the bird would return to her shingly promenade to make certain that no immediate harm menaced the safety of her property. Cummins found himself watching the bird with nervous irritability.

"Wastes half her time watching me," he grumbled to his wife, "and the other half of the time, the little fool is too scared to do her work well. If she doesn't tend to her knitting and bind that nest more firmly to the crotch of the tree, the first hard storm will make a wreck of it. Like as not after the young birds are hatched at that, serve her right, too."

His wife laughed softly. She knew that the irritability was merely skin deep, and that the great heart of Cummins, tender as that of a woman, would truly grieve if the little home and its hopes were dashed to the ground.

"Do you know that bird reminds me of you, John," she declared gaily.

"Thanks, awfully," her partner in bliss acknowledged grimly, "so I am a fussy old bird, am I? Well, I can tell you this, if I were as lively as that robin, you'd see me hopping right along down to the store, to get things freshened up before that addle-pate across the way gets his sign out. I would have given any sane man with brains enough to run a drug store the credit for more practical common sense than to open another store where it is plain enough, there is barely picking for one, and here I am," he continued in an aggrieved tone, "shut up like a toad in a well."

Little Mrs. Cummins laid down her embroidery.

"John," she said firmly, "you certainly do remind me of that bird. You have spent half of the time for the last month watching that man down the street, and the other half you have been too scared and fretted to make plans for yourself. There certainly is a big territory here to draw from, and the new man had no way of knowing what a small percentage of the trade comes to the local merchants. It seems highly probable that the more of a business center it becomes, the more there is to attract people this way."

"Never mind the other man. He may be no more to be feared in a business way than you are to be feared by that mother-robin. Better tend to our own knitting and make some independent plans, not only to keep, but to increase our trade this summer."

John Cummins looked his amazement. If the Dresden china figure on the mantel had recited the Declaration of Independence he could not have been more astonished. In the eight years of their married life she had never before manifested the least concern as to financial conditions. It surely must be that her interest in the local Chapter work of the druggists' women folk was bearing fruit.

"What would you suggest?" he inquired cautiously.

"First of all," she returned promptly, "I'd forget all about that young chap across the street, unless I could help him in some way. He'll need it before he gets the experience you have had, and in the meantime," she added enigmatically, "I'd row with both hands."

Her companion looked at her inquiringly.

"You remember last summer at the lake, how hard it was for me to pull both oars at once, and that if I pulled on the right one steadily we went in a circle, and if I pulled on the left one steadily we also went in a circle. It was when I learned to pull a steady stroke *evenly* with both hands that we went straight ahead?"

"Last year, for six months you pulled the professional oar and not seeing immediate and overwhelming results, you decided you were traveling in a circle and after drifting for awhile you swung over to the commercial oar and have pulled ever since with considerable vigor on that one, and still you complain of not making any permanent advancement. What is the matter with pulling on both oars at the same time, and by all logic and precedent it ought to mean a straight ahead course regardless of the other craft about us."

Cummins drummed on the window sill. "It sounds logical enough," he said thoughtfully. "Can you suggest anything practical?"

"Possibly you will not consider it practical, but my idea of business competition is to compete directly for the trade you want to get and not to prepare to do battle royal with the other fellow. You have estimated that we do not get over 5 per cent of the trade of this neighborhood. Why not bid for 50 per cent, and if you could help the other fellow to get the other 50 per cent, it would be a long step toward driving undesirable rivals out of the business. It is because trade wanders so that we get so little."

Mrs. Cummins was called to the phone. Cummins was left to himself and as he reviewed the past two years he felt that the criticism he had received had been justified. He had failed to pull his oars together.

Perhaps he had been over-cautious as well. There had been a time when the store now occupied by his rival had stood vacant and some one had suggested that he rent it in order to control the nature of its occupancy, but he had hesitated, and while he hesitated the new man came and made a prompt decision. He had feared to spend much in advertising, regarding it in the light of a speculation. The various plans advanced by the local Association for increasing prestige and business he had usually waited to see tried out by some one else before he would consider them, if indeed he bothered with them at all.

Mrs. Cummins returned.

"It is the pioneer," she said, intuitively continuing his own line of thought, "who reaps rich rewards, and while it is wise to be conservative, it is well not to confuse timidity with caution. Real caution really is precaution—the preventing of undesirable results, and the securing of desirable ones. In our own case the wisest caution would be to increase our present patronage even at the expense of some suitable and telling advertising, and to regard the money so spent as an investment."

"What was Winters doing at the store when you called this morning?" her husband asked abruptly.

"Bottling vanilla, and it smelled perfectly delicious. If people knew how much superior druggists' vanilla is to the stuff ordinarily sold under that name, you'd have every woman who keeps house within reach of the store buying it for her cakes and creams."

Cummins looked at her reflectively. "Perhaps it can be brought about," he said.

There was plenty of time to figure and plan before he was able to hobble down to the store, and he held numerous consultations with Winters. The week that the new pharmacist announced for his opening changed to be the anniversary of Cummins' own business beginning in that neighborhood, and although he had never noted the occasion before, he determined to do so now.

Accordingly, he sent out neat announcements in the form of a personal letter, stating that the Tenth Anniversary of the establishment of the Cummins Pharmacy would be celebrated during the entire week of June 28. It called attention to the fact that ten years of faithful conscientious service were one-fourth of the business life of the average man and that the record for efficiency and reliability which had been established would be maintained. It invited inspection of the Prescription Department and solicited patronage. It called attention to the soda fountain and its perfect system of sanitary service. It asked for suggestions as to how any part of the store service could be improved to meet the needs

and wishes of the people. Each house-keeper calling during the week would be presented with a sample bottle of Cummins' Extract of Vanilla, sufficient to season a large cake and a dessert. Each gentleman would receive a trial tube of Cummins' Preservative Tooth Paste, and each young lady a dainty corsage sachet. Children accompanied by older persons would receive a Bubble Blower which would make bubbles without using soap at all. These gifts were to express the good-will of the store and to make the occasion one to be remembered and looked for each year.

Attractive notices of the Anniversary, in a more professional vein were sent to all physicians likely to be interested. These letters also asked for suggestions for improving the store's service, so as to better meet the doctor's and his patients' needs.

Special decorations were planned, extra values arranged where possible, and every one thoroughly imbued with the spirit of making each person so welcome that the visit would be soon repeated. There was a quiet dignity everywhere which gave confidence, and many new friends were gained.

Perhaps the "new man" profited by the crowds that came. Cummins did not have time to watch, for the weather was kind and the week proved a record-breaker. The added profit from the increased business of the first two days paid the additional expenses of the week, including the extra help. A registration book gave a reliable mailing list, and the frank suggestions made by customers and physicians gave the other side-of-the-counter viewpoint of some things. They revolutionized Cummins' own ideas of service in many cases and established a relationship with his public that he had never enjoyed before.

It was Saturday morning, and Cummins looked up from arranging some goods to find a manly, young fellow with a frank attractive countenance standing in front of him. He instantly recognized him as the "new man" from the corner below.

"Mr. Cummins, I believe?" he said courteously. "I have taken the liberty of calling to congratulate you upon your Tenth Anniversary and to hope that when I have been in business as long, that people will speak of, and feel as kindly toward me as they speak of and feel toward you."

John Cummins grasped his hand cordially. "Thank you," he returned in a voice strong with feeling. "Thank you, there is room for us both. Mr. Presmore, there is room for us both."

"I am so glad you feel that way, Mr. Cummins, and I wish to assure you that I deeply appreciate your kindness in sending me one of your splendid Announcements."

A puzzled look flitted over John Cummins' face, but the stranger did not notice it.

"I trust you will come down and see me soon," he said. "I should value your opinion highly upon my arrangement."

There was a few minutes more of friendly chat and both men felt when they parted that not only had cordial relations been established, but that each had discovered a sincere liking for the other. The week was proving an eye-opener to the man who had watched the robin so impatiently. He even watched his wife with a new interest as she came into the store.

"Did you send Presmore one of our Announcements?" he asked.

"I did," she replied. "Perhaps I ought to have told you first."

"You thought I'd object?"

She nodded.

"I am very glad you thought of it," he responded simply; "possibly I should not have felt that way then, though."

"And I have thought of something else," the little woman said with suspiciously misty eyes. "I believe the Angel of the Records has closed the ten-chapter volume of 'The Caution of Cummins,' and will entitle the new one just being opened 'The Courage of Cummins.' Isn't it fine to be able to see that as the years pass, we are growing broader and better. I'm proud of our Anniversary, John."

"So am I, so am I," agreed the blond giant behind the counter; "but I am prouder of the woman who has been the real inspiration of 'The Courage of Cummins.'"

#### Twin Marks.

"Death loves a shining mark."

"Yes, and the poor doctors hate to see him go, losing thereby an easy mark."—*Trenton Times*.

## Weighing a Stain.

By Joel Blanc.

Sometimes The Chemist permits me to look on while he is doing his wonder work. Of course, I have to keep quiet and avoid getting in the way and when I behave and remember that "those best do serve who only watch and wait" The Chemist sometimes adds wonder words to his wonder work.

A few days ago I was admitted to the laboratory while The Chemist was analyzing several samples of alcohol. He took a small, porcelain evaporating dish, washed it three times with warm water, then with distilled water and then,

like a wizard waving a wand, dried it above a Bunsen flame. Next, the dish was placed upon the balances, carefully weighed, then into it was poured 50 cubic centimeters of alcohol and placed above the flame to heat. As the dish became heated the alcohol rapidly evaporated. The sense of sight showed me that a change was taking place as the line of liquid sank lower and lower against the porcelain. At last there was nothing left in the dish but a trace of solid matter upon its bottom, only a small brown stain. All the power for either good or evil had passed, except a small brown stain that the ball of my thumb might have covered. Then The Chemist placed the dish upon the scales again and weighed the stain. It weighed one-half of one centigram. Then, looking at me with smiling face, he poured a few drops of distilled water upon the stain and said, "It's gone!" And gone it was. All the impurities of 50 cubic centimeters were washed away to be forever lost in a few drops of pure, cold water.

As I walked away through the leaf-roofed alley of trees, with no sound to disturb me except the tick-tap of my stick upon the path, my glance roved from one bowered window through which I saw the apparently moving apex of the Washington Monument to another leaf-bordered opening which disclosed the Liberty on the dome of the National Capitol where it seemed to float in the air above the cloud-toned stone. My thoughts still dwelt upon the tiny brown stain that my wonder-working friend had gathered from such great bulk, and which had been weighed and banished forever from the sight of man.

How much like the spirit distilled, is the spirit of man. How tiny the stains of trouble and injustice really are when we analyze them and then wash them away with a few drops of the clear water of reason. Because we know that the impurities are within and permeate through all the spirit, we allow ourselves to believe that all of life is darkened. We refuse to be self-analysts, we refuse to concentrate the impurities in a tiny stain and then wash it away—at least, some of us do.

However, there are men, many of them, who analyze the spirit of existence, just as the chemist analyzes alcohol. They are the men who are just, successful and happy.

We may meet one man who embarked in business when he was very young and failed, who has let the little stain of that failure impregnate his whole life and make of all his life a failure. Another man has experienced even a greater failure in his earlier years, but he has analyzed it, concentrated it to one small stain, studied that stain and after having gathered a lesson of profitable experience from it, washed it out of his life and commenced anew.

On one hand we meet a man who is crushed by the burden of physical affliction, who bemoans his fate and finds in sympathy only an added load, who grieves because he is forced to work. On the other hand, we find one of even greater physical afflictions, but who, through analysis, finds thinly veiled blessings within them. For him, sympathy is the strengthening tonic. In the necessity of labor he finds proof that his afflictions must be light or he would not be able to labor. Where one man grieves because a sense is dulled, another man suffers

ing the same affliction glorifies God for the divine law of compensation which takes the strength of a lost sense, multiplies it and adds it to another sense. Here is a man who bemoans the responsibility of parentage and yet, when the hand of suffering is laid upon one of his little ones, he would have his responsibilities troubled rather than that one of his little flock should pass away. The self-analytical father, seeing the dark stain of possible loss when its probability is remote, washes the stain away and is joyful in his parental burdens all the time.

Many of us who are self-analysts analyze wrongly. Instead of analyzing to find the impurities and eradicate them, we analyze to find, increase and preserve them. We are prone to look on the bright side of others' lives and the dark side of our own. If we were as quick to note the characteristics of the man who over-rides his deprivations and afflictions as we are of him who wastes his blessings, we would reap much happiness for ourselves. When we see a man who has had all the educational advantages and wasted them we flatter ourselves that we would have accomplished wonders, if such advantages had been ours. How much more would we profit if we would but note and study the man who, deprived of the education of schools, has wrung an education from borrowed books, from study of humanity and the teaching of nature through observation.

Dejectedly, we say that "tomorrow never comes." If we will but look backward in our own lives we will see that many joyful tomorrows have come and gone. Memory teaches us that the woes of childhood and youth were just as heavy and just as great at the time of their occurrence as are the sorrows of the maturer years. But that same memory also teaches us that the bright tomorrows did come; that in their light the troubles of youth were proved to be only tiny stains, and that a few drops of the water of courage from the fountain of time did wash them all away.

The happiest men I know are those who through failure and troubles of the younger years did learn to analyze themselves aright. I have known young men who were sympathized with so much that it made them mad and they determined to cease to deserve sympathy by ceasing to do that which appealed for it—and they succeeded. Those men carried 25 years of age as a back-bending load. Today they carry 40 years or more of youthful vigor and hope in the dimples of smiles.

It is almost ridiculous and yet it is a fact, that some men seem to find a sort of melancholy happiness in comparing themselves with the world's great failures. Others, those who realize how much spirit it takes to hold even a little human stain, glory in their little successes and line their quiet paths of life with laughter.

Even some of the best self-analysts make the mistake of doing all their analyzing on the highway, holding out to all the passers-by the evaporating dish of the soul and saying, "See how small my stain is." We should remember that the real minuteness of the stain is proven only by its weight. If we spread it where the public can judge of it only by the sense of sight it does not seem small, but large. The laboratory for self-analysis should be behind the double locked doors of conscience. Only there may the stains be properly weighed and speedily washed away.

The more we analyze ourselves the more we see the necessity of laboratory cleanliness. We see that in the majority of cases the substance of the stains is not of inherent impurities. Most of it is foreign matter put into the dish by our own carelessness, our own wrong thought.

So let us analyze our characters, our own sorrows and joys, our own souls, with the fearless fairness that we analyze a chemical substance. Let us condense the impurities to stains and then with the water of life wash them all away. When such an analysis is completed, the pure spirit of labor, hope, confidence and love may arise supreme within us and guide us onward and upward o'er a path of light.

#### Taking a Cheerful View of a Horror.

The knock of looking at the bright side of things was never developed to such perfection as in the case of a man who, after a railroad accident, telegraphed to his friend's wife:

"Your husband killed in railway accident; head, both arms and legs cut off."

But later this correction was received:

"First report exaggerated; your husband killed; head and legs cut off, but only one arm."—*Pink-Me-Up*.

## Original and Selected

### THE STANDARDIZATION OF MATERIA MEDICA PRODUCTS.\*

By F. E. Stewart, Ph.G., M.D., Philadelphia.

An important factor in materia medica standardization is the determination of the botanic identity of the species of medicinal plants employed in the manufacture of pharmaceutical preparations. Dr. H. H. Rusby, of New York, president of the American Pharmaceutical Association, and dean of the New York College of Pharmacy, Columbia University, in his lecture delivered before the Philadelphia Branch of the American Pharmaceutical Association, April 20, 1909, stated that a large part of the work represented by the United States Pharmacopoeia is valueless, owing to the failure on the part of investigators to identify the species of plants used in their researches.

For example, it has been ascertained that in a certain species of apocynum there resides a glucoside equal, if not superior, to digitalin as a remedy in the treatment of heart affections. Yet, because the discoverer of this principle did not describe the species of apocynum in which this glucoside resides, no one knows today just where to look for it. After citing a number of other instances to prove the enormous value of botanic standardization, he stated it probable that the next revision of the Pharmacopoeia would include methods for the botanical standardization of a number of the medicinal plants.

Owing to the development of microscopic methods, botanic standardization can be readily applied to powders, and adulteration may often be detected more readily in powders than in the drugs themselves. By microscopic means species can often be determined on account of peculiarities of cell structure and the presence or absence of crystals. At one time the presence of acicular crystals of calcium oxalate in certain amounts, was regarded as evidence of purity in belladonna root. Now it is known that the crystals came from poke root used as an adulterant, and the amount of crystals present is a measure of adulteration, not purity.

What do you suppose would be the therapeutic effect from a mixture like the following? Dr. Rusby related an instance where a lot of stramonium was submitted to him, which chemical assay demonstrated to contain 0.25 per cent mydriatic alkaloids as required by the Pharmacopoeia, but ocular inspection showed the presence of other than stramonium leaves. Botanic standardization of the powdered leaves then demonstrated that the stramonium had been fortified by using belladonna leaves; that the addition had raised the alkaloidal content of the mixture too high; then, to correct this, a poor lot of lycocyanus leaves was added, which brought the alkaloidal strength to the standard of the Pharmacopoeia. It is not necessary to say that the port of New York rejected the consignment.

I think that I have furnished you with sufficient evidence to prove that the subject of materia medica standardization includes a much wider field than is usually supposed to belong to it; that it embraces the fixing of standards for determining the identity, source or genesis, physical and chemical properties, physiological and therapeutic action, and the methods of preparing, dispensing and applying materia medica products in the practice of medicine and pharmacy; that it includes the application of these standards in the practice of the pharmacologic arts, namely, the arts of pharmacognosy, pharmacy, pharmacodynamics, and therapeutics; that it includes the study of methods of introducing new materia medica products to science and brands of the same to commerce; that it includes the protection of capital invested in materia medica commerce by patents either on products or processes, or both; that it includes the protection of the public from fraudulent substitution by the use of trade marks and brand names whereby the brands of manufacturers can be distinguished from each other and specified by physicians and pharmacists wishing to obtain the advantages of special skill in the pharmacologic arts; that it also includes a study of the

\*Portion of a paper read before the American Therapeutical Society, May 6, 1909.

advertising question in its relations with medical and pharmaceutical journals. For all of these subjects relate to the materia medica and have standards of their own, ethically, professionally, and commercially, and each subject dovetails into the other to such an extent that it is impossible to carry out any systematic plan of materia medica standardization without considering the subject from the broadest possible point of view.

The final question which we are to consider briefly is embraced by the question, Who is to do the work of standardization? Theoretically we have a profession of pharmacy consisting of retail druggists, graduates of colleges of pharmacy, having as its function the selection, preparation, preservation, compounding and dispensing of medicines to meet the demands of the medical profession for materia medica products, and also the legitimate demands of the public for domestic medicines. Theoretically the practice of pharmacy includes the selecting of all the crude material and manufacturing all the preparations of the same used in treating the sick, including what are known as chemicals, galenicals, and extemporaneous pharmaceutical preparations. Practically no such profession exists. For a long time retail druggists have not manufactured their chemicals, either inorganic or organic. Little by little the manufacture of galenicals has drifted out of their hands and into the laboratories of the large manufacturing houses. Extemporaneous pharmacy has dwindled down to small proportions. Ready-made preparations, such as pills, tablets, capsules, etc., have taken the place of the extemporaneous prescriptions. The retail druggist has thus become, to a great extent, a mere handler down of ready-made goods. This is due in part to a want of proper education of the medical profession in materia medica, therapeutics, and prescription writing. In part it is due to the development of standardization as applied to medicinal drugs, chemicals, and preparations of the same. While the future will doubtless show a decline in the use of ready-made prescriptions on account of the tendency of the profession to prescribe with greater accuracy, the time will never come when the ideal of a pharmaceutical profession of retail druggists will be realized. The subject of standardization will continue to develop, and as it does so the demand for skilled botanists, chemists, and physiologists will increase. To become really skilled in any one of these departments as a branch of pharmacology requires a preliminary university training and a post-graduate course in medicine, botany and pharmaceutical chemistry, with special training in the particular branch specialized.

Colleges of pharmacy are not turning out this class of men. The National Syllabus Committee, representing the colleges and boards of pharmacy, has issued a pamphlet containing their proposed course of study designed to fit retail druggists to practice the pharmacologic arts in a professional manner. The plan is ideal, but it is doubtful whether it can ever be realized to any great extent so far as the retail druggists are concerned, for reasons just stated, and because the manufacturing and standardization of materia medica products on a large scale can be effected with much greater economy than it is possible to secure when the practice is conducted on a small scale.

The large manufacturing houses have come to stay, and it therefore becomes important for the profession to investigate their methods of doing business. Is the practice of the pharmacologic arts to be carried on as a side line by great commercial houses engaged in the manufacture and sale of nostrums, under their own labels, under the labels of retail druggists, or under the labels of the large patent medicine concerns for which the said commercial houses are doing the work? Or is the practice to be conducted by graduates of medicine and pharmacy co-operatively associated with capitalists and conforming with scientific and professional requirements? These are important questions for the medical profession to decide. The Supreme Court, in its decision in the *Syrup of Figs* case, already quoted, has pointed out the way.

Who is to do the work of fixing the standards? Theoretically the medical and pharmaceutical profession assemble in congress every ten years to appoint a committee for revising the United States Pharmacopoeia, consisting of a list of medicinal drugs, chemicals and pharmaceutical preparations used by the medical profession for treating the sick, with formulae for their preparation, and standards for determining their identity, character, purity and strength. Invitation to this congress, known as a Pharmacopoeial Convention, has

recently been issued by Dr. Murray Galt Motter, secretary of the convention, which will assemble May 10 next year, at Washington, D. C. The following extracts from the constitution show the qualifications for membership:

"The members, in addition to the incorporators and their associates, shall be delegates elected by the following organizations: Incorporated Medical Colleges, and Medical Schools connected with Incorporated Colleges and Universities; Incorporated Colleges of Pharmacy, and Pharmaceutical Schools connected with Incorporated Universities; Incorporated State Medical Associations; Incorporated State Pharmaceutical Associations; the American Medical Association, the American Pharmaceutical Association, and the American Chemical Society; provided that no such organization shall be entitled to representation unless it shall have been incorporated within and shall have been in continuous operation in the United States for at least five years before the time fixed for the decennial meeting of this corporation.

"Delegates appointed by the Surgeon-General of the United States Army, the Surgeon-General of the United States Navy, and the Surgeon-General of the United States Marine Hospital Service, and by the organizations not hereinbefore named, which were admitted to representation in the Convention of 1900, shall also be members of the corporation. Each body and each branch of the United States Government above mentioned shall be entitled to send three delegates to the meetings of this corporation."

For the first thirty years of its history the National Convention for revising the Pharmacopoeia was a medical body. In 1850 colleges of pharmacy were first permitted representation. Decade by decade the pharmaceutical representation has increased, until in the Convention of 1900 it was slightly in the ascendancy over medical representation. The Committee on Revision, appointed by the last Convention, consisted of 26 members, 19 of whom represented pharmaceutical colleges, and only two of whom were practicing physicians. The pharmacopoeia resulting from the labors of this committee is acknowledged to be superior to almost any other pharmacopoeia in the world. Therefore no serious fault is to be found with the work of the committee. But the conditions existing demonstrate a great lack of interest in the pharmacopoeia on the part of the medical profession. The question is, How can the interest of the medical profession in the National Standard be stimulated? It is my belief that the way to stimulate the interest of physicians in the pharmacopoeia is through the medium of standardization of materia medica products, and the sending out of literature on this subject by the Committee for Revising the United States Pharmacopoeia, also by the various departments at Washington interested in the identification and standardization of drugs, by the Council on Pharmacy and Chemistry, and by the manufacturing houses engaged in the pharmaceutical and chemical industries.

I believe that the medical and pharmaceutical journals should take up this subject for discussion. It is evident that it would be unsafe to throw upon the educational channels of the medical and pharmaceutical professions to a discussion of advertised materia medica products without the establishment of a strong Central Committee, Board of Control, Bureau of Materia Medica, or Pharmacologic Society—call it what you please—representative in character, having as its function the co-operative classification and standardization of the newer materia medica, the censorship of advertising, the promotion of professional and commercial interest, and the protection of the public from dishonest commercial exploitation.

#### New York Ph.A. May Act on Slanders.

SYRACUSE, N. Y., June 12.—Druggists in this city are loud in their protests against a statement made by a drug company in circular letters to every doctor in the city, claiming that incompetency and dishonesty exist behind the prescription counters in many pharmacies.

George E. Thorpe, chairman of the State committee on trade relations of the New York State Pharmaceutical Association, has prepared a lengthy statement on the subject and will present it at the State convention, at Richfield Springs. The letters claim that in order to increase their profits druggists in filling prescriptions substitute cheaper preparations from containers bearing genuine labels. It is expected that the State organization will take action. The letter, it is alleged, was sent out because druggists preferred to patronize other manufacturers.

THREE ACTIVE WORKERS IN MAKING CONVENTION OF A.P.H.A. ENJOYABLE AND SUCCESSFUL.

W. R. DICKINSON, of Los Angeles, president of Los Angeles R.D.A. and chairman of executive committee which has the arrangements in charge.

T. W. JONES, of Los Angeles, local secretary of A.P.H.A. for coming convention; secretary of Los Angeles Retail Druggists' Association.

Mrs. FLETCHER HOWARD, president of the Ladies' Auxiliary which will help entertain the fair sex at the A.P.H.A. convention in Los Angeles in August.

QUESTION BOX

THE OBJECT of this department is to furnish our subscribers and their clerks with reliable and tried formulas, and to discuss questions relating to practical pharmacy, prescription work, dispensing difficulties, etc. Requests for information are not acknowledged by mail, and ANONYMOUS COMMUNICATIONS RECEIVE NO ATTENTION; neither do we answer questions in this department from non-subscribers.

In this department frequent reference is necessarily made to information published in previous issues of The Era. Copies of these may be obtained at 10 cents each, except a few issues which are out of print, for which we charge 25 cents each.

Lotion for Excessive Perspiration.

(C. A. W. and L. M. K.)—We cannot give you the formulas for the proprietary preparations. However, here are several formulas for lotions which have been recommended for external application in the treatment of sweaty hands and to correct the odor of excessive perspiration, etc.:

- (1)  
Solution of formaldehyde ..... 3 drams.  
Rose water, enough to make ..... 8 ounces.  
To be applied morning and evening and allowed to dry on.
- (2)  
Boric acid ..... 35 grains.  
Solution of formaldehyde ..... 20 minims.  
Alcohol ..... 2 drams.  
Rose water ..... 2 ounces.  
Water, enough to make ..... 8 ounces.
- (3)  
Boric acid ..... 2 drams.  
Distilled extract of witch hazel ..... 4 ounces.  
Rose water ..... 4 ounces.  
Use externally.

Purifying Common Wool Fat.

(W. B. C.)—How can I make the common wool fat, which is dark, light in color, and have it remain so?  
For the purpose of purification crude wool fat is treated

with weak alkali solutions and the resulting emulsion centrifuged, whereby an aqueous soap solution is obtained, on which a creamy layer of fairly pure wool fat is found floating. The creamy layer is removed and treated with calcium chloride, after which the fat is separated and dehydrated by fusing in the presence of unslaked lime. Acetone is employed to extract the pure wool fat from this mixture, and yields the same upon subsequent distillation of the solvent. Sometimes purification is effected by repeated treatment with water in a centrifugal machine. Unless you have a considerable quantity of wool fat to deal with it will not probably pay you to attempt any "purification" method.

Bottle Capping Mixture.

- (T. & S.)—
- (1)  
Soak 7 pounds of good gelatin in 10 ounces of glycerin and 60 ounces of water, and heat over a water bath until dissolved, and add any desired color. Pigments may be used, and various tints can be obtained by the use of aniline colors. The resulting compound should be stored in jars. To apply liquefy the mass and dip the cork and portion of the neck of the bottle into the liquid. It sets very quickly.
- (2)  
Shellac ..... 3 ounces.  
Venice turpentine ..... 1½ ounces.  
Boric acid ..... 72 grains.  
Powdered talcum ..... 3 ounces.  
Ether ..... 6 fl. drams.  
Alcohol ..... 12½ fl. ounces.

Dissolve the shellac, turpentine, and boric acid in the mixed alcohol and ether, color with a spirit soluble-dye, and add the talcum. During use the mixture must be agitated frequently.

Remedies for Drukenness.

(L. M. K.)—Some formulas and other information were published in the ERA April 20, 1905, page 447, which see. In the Alkaloidal Clinic some years ago the editor gave the following information in reply to a query "Is there anything which can be given to chronic drinkers, unknown to them, which will give them a distaste for alcohol?"  
"Hyoscyamine or atropine pushed to saturation will cause distaste for liquor, but the thing to do is to give apomorphine in the whisky and at the same time put the patient on atro-

pine or hyoscyamine until the throat is dry. Where a man will use no effort of his own to assist, it is practically impossible to cure the drink habit, but anyone can be cured promptly if he will place himself under medical care and desired to be cured.

"Fluid hydrastis, 5 to 10 drops, is often given in the patient's coffee and sometimes causes a distaste for liquor; chiefly by relieving the debility which causes the desire for stimulants. One of the most widely advertised 'secret remedies' consists of hydrastis. If you can push eliminative and tonic treatment and medicate with apomorphine such liquor as the patient does take (or give him straight liquor and a shot of apomorphine just after it), there is no difficulty in stopping the desire. Quassin, hydrastin and strychnine nitrate are the best tonics. Lupulin relieves the irritable stomachs of drunkards. Atropine, 1-500 grain, every three or four hours will make all liquor 'taste bad.'"

Of course, this information is for the physician and he alone should assume responsibility for treating these cases.

### Polish for Brass.

(T. & S.)—

Levigated tripoli	(1)	40 pounds.
Soft paraffin		8 pounds.
Japan wax		2 pounds.
Kerosene		1 gallon.
Oleic acid		½ gallon.

This mixture forms a paste. For a liquid polish the following is recommended:

Levigated silica	(2)	10 pounds.
Kerosene		5 gallons.
Oleic acid		2 gallons.
Stearic acid		2 pounds.

### Polishing Cream.

Denaturized alcohol	400 parts.
Spirit of sal ammoniac	75 parts.
Water	150 parts.
Petroleum ether	80 parts.
Red or white bole	50 parts.
Calcium carbonate	100 parts.

Add as much of the powders as desired. Oil of mirbane may be used for scouring.

Manufacturers of brass probably use different media for brightening their goods. However, it is stated that articles of brass can be polished, after pickling, in the lathe with employment of a polish consisting of shellac dissolved in alcohol, 1000 parts; powdered turmeric, 1000 parts; tartar, 2000 parts; oxgall, 50 parts, and water, 3000 parts.

### Root Beer Syrup.

(G. & G.)—Try one of the following:

Extract of root beer	(1)	5 ounces.
Soda foam		1 ounce.
Syrup to make		1 gallon.
Color with caramel.		

Fluidextract of false sarsaparilla	(2)	10 drams.
Fluidextract of pipsissewa		10 drams.
Fluidextract of wintergreen		4 drams.
Fluidextract of licorice		4 drams.
Oil of wintergreen		30 minims.
Oil of sassafras		15 minims.
Oil of cloves		8 minims.
Alcohol		10 ounces.

This makes a root beer extract which may be mixed with syrup, or it may be diluted with 9 gallons of water containing 1 gallon of refined molasses, and charged in a fountain. If it is preferred to use a fermented article, add the water and molasses, using warm water, also 1 quart of yeast, and keep in a warm place until fermentation is complete.

Sassafras	(3)	4 ounces.
Yellow dock		4 ounces.
Pimento		4 ounces.
Wintergreen		4 ounces.
Wild cherry bark		2 ounces.
Coriander seed		2 ounces.
Hops		1 ounce.

Reduce to powder and percolate with a menstruum composed of 3 volumes of alcohol and 5 volumes of water until 48 fluid-ounces of liquid have passed. Of this half strength fluid extract 2 fluidounces are sufficient to make 1 gallon of root beer. Or, exhaust the above drugs with the menstruum indicated, add enough water to make 6 gallons, and start fermentation with 1 pint of yeast.

### Hair Restorer.

(C. L. B.)—We cannot give you the formula of the proprietary article. However, here is a formula which is typical of many of the lead and sulphur preparations recommended for "renewing" the hair:

Lead acetate	1½ drams.
Milk of sulphur (calcareous)	3 drams.
Glycerin	½ ounce.
Heliotrope perfume	2 drams.
Water, to make	10 ounces.

Mix the powders intimately and rub up with the glycerin, gradually add the water, and lastly the perfume.

In commenting on this formula, the author of "Pharmaceutical Formulas" states that precipitated sulphur does not mix well with water, and for that among other reasons the calcareous variety is here ordered. But if it be preferred pure precipitated sulphur may take its place, using only half the quantity and "killing" it with spirit before adding the glycerinated water.

A formula for a "transparent restorer," taken from the same authority, is the following:

Lead acetate	1 dram.
Saturated solution of sodium hyposulphite, a sufficiency.	
Glycerin	1 ounce.
Rectified spirit	½ ounce.
Rose water, to make	20 ounces.

To the lead salt dissolved in 2 ounces of water, add the solution of hyposulphite until the precipitate formed is redissolved. Continue to add half as much more hyposulphite, then the rest of the ingredients.

This preparation should be bottled as soon as it is made, a drop of ether being put on the surface of the liquid in each a few seconds before the cork is put in. Blue or amber colored bottles should be used. The lead sulphide which is in solution is very prone to precipitation, even in the bottles, especially when these are exposed to air and sunlight, and it is advisable, therefore, to bottle it as directed, also to serve it as recent as possible.

### State Pharmaceutical Meetings This Month.

June 9, Alabama, Gadsden; 9, Florida, Gainesville; 8, Nebraska, Lincoln; 9, New Jersey, Lake Hopatcong.

June 14, Idaho, Boise; 16, Minnesota, Tonka Bay; 15, Illinois, Quincy; 15, Kentucky, Cerulean Springs; 15, Missouri, Joplin; 15, Texas, San Antonio; 15, Connecticut, the Shoreham, Morris Cove.

June 22, Massachusetts, Swampscott; 22, Indiana, French Lick Springs; 22, Michigan, Detroit; 22, New York, Richfield Springs; 22, Pennsylvania, Bedford Springs; 23, Colorado, Estes Park; 23, North Carolina, Greensboro; 22, Maryland, Ocean City; 22, Wisconsin, Elkhart Lake; 22, Vermont, Lake Bomoseen.

June 29, Maine, Portland; 29, New Hampshire, the Wiers.

### American Chemical Society at Detroit Next Week.

DETROIT, Mich., June 12.—The summer meetings of the American Chemical Society will be held here, June 20 to July 2, in Central High School. A complimentary smoker will be held at one of the clubs or hotels on the evening of June 29. A trip of inspection to the big laboratories of Parke, Davis & Co. will be another feature and there will be a moonlight boat ride under the auspices of the company, June 30. The convention will end with a trip to Ann Arbor and a banquet in Detroit in the evening.

### Washington Chapter Selects Delegates.

WASHINGTON, June 12.—At a called meeting of Washington Chapter, W.O.N.A.R.D., held at the residence of Mrs. R. W. Duffey on June 11, the following were chosen as delegates to the National Convention to be held in Louisville in September: Mrs. Charles J. Fuhrman, Mrs. W. S. Richardson, Mrs. Walter McDonald and Mrs. A. C. Taylor.

# ADVERTISING for DRUGGISTS

## Neglect of Staples in Advertising.

The advertising tendencies of the age go to two extremes. Advertising new goods and novelties exclusively, or using valuable advertising space and effort for bald statements that are common knowledge even with children. With druggists, the latter faulty extreme has been most common. Thousands of dollars have been wasted on "Drugs and medicines. Stationery and fancy goods. Prescriptions carefully compounded" advertising foolishness. Cutters and department stores have not only gone to the other extreme, but their extremely low margins of profit, coupled with their advertising of new goods

almost exclusively, has forced them to turn stock so rapidly and add new lines so continuously that the buying public finds it next to impossible to secure a duplicate of an article purchased a few weeks previously.

Within the last few months, prominent newspapers and magazines have contained a number of communications, editorials and news articles in which this difficulty of obtaining what one may desire has been most vigorously and rebelliously condemned.

## Insulting the Conservative.

The insolence with which the sales people say "We are out and won't have any more," "Aw, that's out of date," and similar expressions, are turning many of the very best class of patrons against the extreme advertisers.

Druggists may take advantage of this tendency to get back at those who have been their most bitter trade enemies. By this statement it is not intended to imply that new goods and novelties should be neglected, nor is any return to the easy methods of our daddies advised.

For instance, one may see drug store windows and drug

**PRESIDENT TAFT'S VISIT TO CHARLOTTE ENABLES DRUGGISTS TO WIN ERA'S CASH PRIZE OF \$5.**

In the ERA'S Cash Prize Competition this week the judges have decided to award the \$5 cash award to Contest No. 2 to Mr. Sheppard, at Woodall & Sheppard, at Charlotte, N. C. The handsome window which is herewith reproduced, Pharmacist Sheppard writes to the ERA as follows:

"Enclosed you will find photograph of a window that I made good" so far as sale of goods was concerned and at the same time caused considerable favorable comment here. The subject was planned, designed and executed by myself. The occasion calling for such a window was the visit of the President of the United States to our city on May 20, our Fourth of July in Charlotte. The people here declared their independence of the mother country a little over a year previous to the Philadelphia declaration. We believed with many visitors in the city that we would sell candy, soda water and cigars, and so planned our show windows and outside display cases for this line of goods.

"We send you both window displays, one of candy display at special prices for the occasion and the other for soda water display. A barrel of limes in the center of the window, with three saucers of imitation ice cream on a plate glass shelf are seen on one side. Ice cream representing three flavors, vanilla, chocolate and strawberry, was made of plaster paris and colored. The photograph of this window is poor but we send it with the other. We have recently opened up our new store room and have one of the handsomest stores in the South."

store advertisements almost daily in which fountain syringes are featured, and yet there is a large percentage among the patrons of every druggist, especially among the elderly folks, who prefer a bulb syringe and will never be persuaded to use any other as long as they live. Not long ago a patron asked a clerk in a large department store for a bulb syringe and was informed that, "We ain't got none. Them ain't no good. A fountain syringe is what you want."

Do you not think it would be to your advantage to make a window display of both fountain and bulb syringes and have a show card to read something like this? :

*Fountain syringes are considered the most modern of all forms; but there are many who prefer the older bulb style. What one has been accustomed to for years is often best. We carry a complete line of both bulb and fountain syringes. It is not our policy to endeavor to force new ideas upon our patrons.*

**WE TRY TO HAVE WHAT YOU WANT AND GIVE YOU WHAT YOU ASK FOR.**

As we must concede that the majority of patrons desire the new goods, we are confronted by the difficulty of profitably carrying old fashioned goods for a very limited demand. In fact, in commenting upon some line that is considered "dead," the druggist is often heard to say: "I must get rid of that stuff. I have one regular patron for it, but that is more of it than he will buy in five years." However, every druggist who has had drive sales of old, supposedly dead stock, knows that in many cases the purchasers of such old goods were former users of them and in connection with such sales it is not unusual to hear the remark: "I have not seen any of that for years," or "I tried all over town to get that," or similar remarks.

Advertise to increase the old as well as to make the new. The foregoing rehearsal of facts suggests the following as being the proper course to pursue: That for which there is a limited and conservative demand should be advertised just as vigorously as new goods are advertised. If there is a half dozen of an old remedy in stock for which you have one or two regular customers, keep it to the foreground where others who have used it in the past may learn that you have it and be tempted to return to the use of it. Much of the so-called "dead stock" would never have become dead if it had not been shoved into a dark corner as soon as the demand for it commenced to fall off.

#### A Conservative List.

Go over your stock and make a list of all the articles that are supposedly dead, of decreasing sale, or of which there is an article for corresponding use in new or improved form. Publish a partial or entire copy of this list as an advertisement in either newspaper, folder or flier. In connection with such advertising announce that these are staple goods, but that the bargain stores have largely abandoned their sale to force more profitable and less meritorious articles upon the public. Do not cut the prices or offer the goods as shop-worn or as bargains. See that your advertisements of them are so couched as to appeal to and do reach the elderly and conservative classes of people.

#### Old Time Drugs and Herbs.

In line with the foregoing a window display may be made that will be very attractive. In the window place samples of old-time articles such as flaxseed, mustard seed, Epsom salt, tansy, pennyroyal and so on. In connection with each, display some modern plaster or other proprietary specialty which may be and often is used in place of the "simple." Use a show card similar to following:

*We here exhibit old and new style goods intended for the same curative or other purposes. Whether the ready-made plasters, poultices, salves and teas are better than the old style home-made articles we do not know. We are inclined to think that they are not. At any rate, it is our business to provide what people want. Here are the goods, both old and new. And of both, the very best.*

Go slow in stocking new goods that depend upon your

advertising for their sale, even though they be semi-staples such as tooth preparations, liniments, plasters and rubber goods. It is far better to re-order goods for which there is already a demand. That demand, no matter how light it may be, shows that the public has found some merit in the goods and that finding saves you time in talking and explanation, as well as in direct advertising. Your own experience has taught you that the patron who knows what she wants and repeatedly wants and purchases the same goods is the most satisfactory of all around customers. While in one sense, variety is necessary to satisfy and thus hold trade, more trade is lost by a lack of stock of articles previously supplied than can ever be made by showing and pushing fads.

#### Be Careful of "Style."

Remember that not all people are slaves of fashion. There are many desirable customers who become disgusted when told that "something just as good" is "the latest style." This is especially true of the drug business. If the younger generation is willing to buy the goods that its parents bought, by all means encourage it in doing so. You can get better prices and profits with less talk and labor on the old line goods than upon any others.

### NEW ASSOCIATION FORMED IN VIRGINIA.

T. A. Miller, President of the State Board of Pharmacy, Presides—H. G. Whitehead Chosen President.

RICHMOND, Va., June 12.—The Virginia Pharmacists' Association was organized last month in the hall of the Medical College of Virginia. The organization has for its purpose the creating of good fellowship among the members of the profession, elevating pharmacy from a scientific standpoint, and encouraging the raising of the standard of the examinations for licenses. The movement originated with the graduates of the University College of Medicine and the Medical College of Virginia. Any druggist in Virginia holding a diploma is entitled to membership. Twenty-seven practitioners were present at the meeting.

T. A. Miller, of the State Board of Pharmacy, presided at the meeting as temporary chairman. H. G. Whitehead, of this city, was elected president; A. E. Dorsey, vice-president; W. F. Rudd, secretary, and Miss Maude Lambert, of Roanoke, treasurer, of the new organization. The executive committee is composed of R. B. Parker, N. Thomas Ennett and W. F. Rudd.

#### National College of Pharmacy Commencement.

WASHINGTON, June 12.—The 88th annual commencement of George Washington University, of which the National College of Pharmacy is a part, was held at the Belasco Theater, Washington, D. C., on the morning of June 9. The large auditorium was thronged with the relatives and friends of the graduates, the latter occupying seats on the center aisle of the orchestra, while the faculty and guests of honor were seated upon the stage. Music was furnished by the famous Marine Band.

After orations by two honor graduates and the president's address, the deans of the various departments conferred the degrees. Don Kalusowski conferred the degree of Ph.D. upon Irene Nellie Richardson, District of Columbia; Ray T. Bailey, District of Columbia; T. Quinn Jones, Missouri; E. V. Payne, Virginia, and Chancey C. Reese, Maryland.

The memorial scholarships of the National College of Pharmacy were awarded as follows: John A. Milburn scholarship to Edward V. Payne, William S. Thompson scholarship to Naomi Elizabeth Richardson and the Edward T. Frisbie scholarship to Willard Day Boyer.

In the evening the famous ball and reception rooms of Rauscher's were the scene of a reception tendered to the graduates and their guests by President Needham and the faculties. After the reception dancing continued to a late hour, only interrupted by the serving of a dainty buffet lunch in the assembly rooms.

#### Gratiot County Druggists Elect Officers.

ALMA, Mich., June 12.—Gratiot County druggists, at their annual meeting here recently, elected officers as follows: President, H. J. Crawford, Ithaca; secretary, Roy Cowdrey, Ithaca; treasurer, H. G. Gillico, Pompeii.

## PERSONAL MENTION

—B. S. MATHISON, Bromo Seltzer representative, called upon the Milwaukee trade recently.

—PHILO H. OZANNE, formerly of Somers, Wis., has purchased the Wakelin Pharmacy at Phoenix, Ariz.

—W. A. BABE, formerly in the drug business at Oshkosh, Wis., will soon go on the road for John Wyeth & Brother.

—STEWART LINDSAY, well known young druggist at New Holstein, Wis., was recently married to a young lady at Plymouth, Wis.

—FRANK ACKERMAN, formerly with a pharmacy at Madison, Wis., has become connected with the Charlesworth Pharmacy at Kaukauna, Wis.

—FRED C. FERNALD, secretary of the Dr. Miles Medical Company, Elkhart, Ind., called upon friends in the New York City drug trade last week.

—FRANK CUDDY, well known in the drug trade and New York City salesman for Parke, Davis & Co., was married last week to Miss Fannie Mulrean.

—NICHOLAS GRASSER, drug clerk at the W. H. Barr pharmacy, Milwaukee, recently met with serious injury as a result of a collision with his bicycle and an automobile.

—ALEX BLACK, of La Crosse, Wis., a recent graduate of Marquette University (Milwaukee Medical College), has resumed his position at the Lien Pharmacy at La Crosse.

—H. A. NOLTE, of Philadelphia, was a visitor at Wildwood, N. J., where he is preparing to open his drug store. Mr. Nolte also conducts stores in Philadelphia and Atlantic City.

—WARD GILBERT, formerly of Milton Junction, Wis., now proprietor of a drug store at Melrose, Wis., was in Janesville recently as a delegate to the session of the Grand Lodge, I.O.O.F.

—SECRETARY POITS, of the N.A.R.D., spent last week in St. Paul and Minneapolis, where he attended meetings in and out of the twin cities of local and State organizations of druggists.

—O. W. SMITH, manager of the New York branch of Parke, Davis & Co., left last Monday for Detroit and attended the annual outing of the employees of the concern which took place yesterday.

—O. P. ROSS and H. A. Somerville, representatives of Parke, Davis & Co. in central New York State and Albany, respectively, were visitors at the branch in New York City several days ago.

—CHARLES W. WHITTLESEY and A. D. de Bussy, president and secretary, respectively, of the Charles W. Whittlesey Company, New Haven, Conn., were recent visitors in New York City wholesale circles.

—W. S. MAYHEW, '06, University of Illinois School of Pharmacy, and Miss Bertha M. Gould were married at the residence of the bride's parents at Flora, Ill., on June 2. The young couple will reside at Forrest, Ill.

—HERMAN EMERICH, well known druggist of Milwaukee, will soon open a new pharmacy near Milwaukee-Downer College. A new building which is being erected for the new establishment is fast nearing completion.

—M. LEVY, representative of Brunen, Ritchey & Co. in Florida, has been recreating in New York City for the past few weeks while visiting the home offices of the house. Mr. Levy will return shortly to the fields of his endeavors.

—MR. and MRS. J. LEYDEN WHITE (Joel Blanc), of New York, were the guests of Mr. and Mrs. W. S. Richardson and their daughters at the reception of the graduates and families of George Washington University, held in Washington on June 5.

—RUSSELL T. BLACKWOOD, of Philadelphia, has sent out a neat announcement to the patrons of his store informing them of his intention to join the movement to less the hours of Sunday work in drug stores by closing from 1 to 6 on that day.

—JOHN FULTON, JR., who had been identified with the drug trade for many years, and recently with the National Supply Company, is now associated with the Archibald & Lewis Co., Borough of Manhattan, New York City, and will devote his attention particularly to the firm's drug department.

—FRANK W. SMITH, president of the Philadelphia Drug

Club, and representative of Eli Lilly & Co., and Walter V. Smith, of Val H. Smith & Co., of Philadelphia, were New York City visitors last week, en route home from Lake Hopatcong, where they attended the annual meeting of the New Jersey Pharmaceutical Association.

—PROFESSORS HALLBERG and Puckner, of the University of Illinois School of Pharmacy, attended the meeting of the American Medical Association at Atlantic City, taking an active part in the proceedings. Professor Puckner as secretary of the Council on Pharmacy and Chemistry, and Professor Hallberg as secretary of the Pharmacologic Section.

—WILLIAM O. FRAILEY, JR., son of William O. Frailey, of Lancaster, Pa., the well-known organization worker, was among the recent sight-seeing visitors to the National capital. Mr. Frailey was accompanied by his bride, their marriage having been solemnized in Lancaster on June 10. Mr. Frailey is a graduate of the Philadelphia College of Pharmacy, Class of 1905. He is associated with his father in business.

—EDWARD H. WOLFF, of the Wolff-Wilson Drug Company, St. Louis, and Mrs. Wolff will depart in a few days for Europe to be gone until September. Mr. Wolff, as part of the preparation for his trip, purchased a \$30,000 residence, which he will occupy on his return. The residence is at 4625 Lindell Boulevard, the show part of the city. Recently Mr. Wolff bought a building lot with intent of constructing a residence, but gave that up as too much trouble.

—SAMUEL E. DAVIS, a prominent Philadelphia druggist, with his wife, celebrated the third anniversary of their wedding at Seaside Park, N. J., where they are spending the summer months. Their guests on the festive occasion were their fellow members of the "Arkades," which organization has taken a large cottage at the shore and were as follows: Mr. and Mrs. Otto Kraus, Mr. and Mrs. Charles Rehlfuss, Miss Leonette Rehlfuss and Mr. and Mrs. L. H. Davis.

—ALBERT BOND LAMBERT, of St. Louis, was much disgusted with his part in the Indianapolis balloon race, although his craft, St. Louis III, made the creditable record of being in the air 24 hours and 10 minutes and traveling 325 miles. Mr. Lambert was compelled to land because his physical condition as a result of his recent illness made it impossible to remain in the air in the intense cold in high altitude another night, else he is confident he and his associate would have won out.

—RICHARD P. WINKLER, traveling in Latin-America for Parke, Davis & Co., has reached Panama and writes to a friend in New York City that the heat in the latitudes of the Isthmus is intense; also that reports coming in from Guayaquil, Ecuador, for which he intended to leave shortly, are to the effect that yellow fever and the bubonic plague are playing havoc with the population in the city. The medical authorities of the Isthmian Canal Commission, he states, have advised him to abstain under all circumstances against canvassing Guayaquil at the present time.

—MR. and MRS. WILLIAM H. MORRETTE, of Bridesburg, Philadelphia, were agreeably surprised a few days ago to receive a handsome dinner set, the gift of the party of friends who on April 29 last were their guests on a shad fishing party. Accompanying the gift was a card conveying the well wishes of Thomas H. Potts (secretary of the N.A.R.D.), George W. Fehl, L. H. Davis, D. J. Reese, H. A. Kalbach, W. A. Carpenter, N. S. Steltzer, N. A. Cozens, Z. T. Wobensmith, H. A. Netter, W. H. Sutton and N. F. Weisner. These friends all declare that Mr. Morrette's superior as druggist, host, sportsman and good fellow generally does not exist.

### Medicine Makers Fight Misbranding Charge.

CINCINNATI, June 12.—Deputy U. S. Marshal McGuire went to Dayton, Ohio, a few days ago and seized eight casks of medicine on the charge made by the Government that it was misbranded, the labels allegedly not showing the percentage of alcohol used in the liquid. The Prescription Products Company has served notice on United States Attorney McPherson that it will resist the seizure and confiscation of the goods.

### Divorce for Druggist Husband From Dentist Wife.

MILWAUKEE, June 12.—That his wife earns more than he does, is the contention made by Marcus Robbins, a Milwaukee druggist, who was granted a divorce recently from his wife, Marie, a dentist in New York. They were married in 1898 and separated the same year. Voluntary separation for five years was alleged and the wife interposed no defense.

# GEORGIA PHARMACISTS ENJOY BARBECUE ON HIGH BLUFF AT ANNUAL CONVENTION AT MACON.

T. B. RICE, of Greensboro, elected president of the Georgia State Pharmaceutical Association.

T. H. BRANNEN, of Atlanta, third vice-president Georgia Ph.A. and president Atlanta Ad. Men's Club.

J. T. SHUPTRINE, of Savannah, re-elected treasurer of the Georgia State Pharmaceutical Association.

MACON, June 12.—Druggists from all parts of the State were in attendance at the 34th annual meeting of the Georgia State Pharmaceutical Association last month. An interesting programme, including discussions of various questions important to pharmacists, was carried out and Ben S. Persons, of Macon, presided.

The concluding session was held at the plant of the Central Georgia Power Company at Lloyd Shoals, where the delegates had been invited by W. J. Massey, president of the power concern, to attend a barbecue and to view the construction of the big dam. Both feast and mammoth pile of cement were heartily enjoyed. In fact the barbecue was pronounced by all to be the best ever, and the Macon druggists who are accustomed to good barbecue, say they never tasted finer. It was served on the high bluff that towers 150 feet above the bed of the river on the west side. From this eminence there is a magnificent view of the river.

A number of addresses were made and the officers for the year were named. Athens got the next convention.

The officers chosen at the concluding session were Thad B. Rice, of Greensboro, president; Joel P. Walker, of Montezuma, first vice-president; John S. Montgomery, Jr., of Thomasville, second vice-president; Thomas H. Brannen, of Atlanta, third vice-president; Max Morris, of Macon, secretary, and J. T. Shuptrine, of Savannah, treasurer.

The names of five prominent druggists were submitted to be turned over to the Governor so that he may select a member of the State Board of Pharmacy to succeed S. E. Bayne, of Macon, whose term soon expires. These were S. E. Bayne, L. E. Pellet, J. Peacock, Cornelius Vason and John R. Parr.

The delegates to the N.A.R.D. Convention at Louisville are Messrs. Shuptrine, of Savannah, and George D. Case, of Millidgeville.

Malory H. Taylor and his associates on the arrangements committee worked assiduously and successfully to entertain the members. In addition to the barbecue and trip to the big dam, there was an evening at the Crump's Park Casino and an automobile ride for the ladies, besides liberal dispensations of true Macon hospitality for everybody.

JOEL P. WALKER, of Montezuma, first vice-president of the Georgia State Pharmaceutical Association.

MAX MORRIS, of Macon, re-elected secretary of the Georgia State Pharmaceutical Association.

## Doctors to Be Guests at Druggists' Outing.

WASHINGTON, June 12.—The regular monthly meeting of the District of Columbia Retail Druggists' Association was held at the National College of Pharmacy on Tuesday. Dr. F. P. Weller, chairman of the entertainment committee, reported that arrangements for the annual outing and field day at Marshall Hall had been made for Friday, July 9. The physicians of the city and their families will be invited as their guests that the day may be made a grand success. Mr. Adams, representing the National Association of Retail Druggists, was present and will be in the city for a few days in the interests of the National Association.

## Physician Fined \$80 for Selling Drugs.

CLEVELAND, June 12.—For selling drugs without being a legally registered pharmacist, Dr. John A. Vincent was this week fined \$20 each on four counts by a justice.

## HUNTING FOR A MISSING MILLION OF SANITOL MONEY.

### Sworn Statement in March Declares it Was Paid Up in Lawful Currency, but Protective Committee of Stockholders Fails to Find It.

### President's Salary Raised From \$25,000 to \$50,000, but Decreased on Advice of Counsel Months Later—Ledger Rewritten and Minutes Destroyed to Conceal the Act—Old Book Burned in Furnace—Sweeping Charges of Mismanagement and Waste are Made and Startling Evidence is Given by Present and Past Employees in Receivership Proceedings in Missouri.

A legal quest for a million missing dollars, a ledger burned in the furnace of a chemical laboratory to conceal an irregular \$25,000 a year salary increase, which by its alleged conditions would have given the president of a corporation a salary of practically \$75,000 a year (the \$25,000 increase being payable in stock at one-half of par), are a few of many startling features of a lawsuit which affects the \$900 druggists, dentists and others who are stockholders in the Sanitol Chemical Laboratory Company, of St. Louis. The Sanitol Company has been doing an excellent business, it manufactures articles that are in general demand among druggists and dentists for their trade and it has a large and well-equipped plant in St. Louis, with a branch in Toronto, for the Canadian trade.

The recent application for a receiver for the company, reported in the ERA of June 3, was not altogether a surprise to some of the stockholders, for there have been eruptions of dissatisfaction during the last year that culminated in Philadelphia last October in the formation of a stockholders' protective committee. The story of the development of the company in its recent relations to its stockholders, as shown in evidence already taken in the courts of Missouri, together with affidavits and statements of what is yet to come, is of sufficient interest to place it in the high finance series of Wall Street, where worthless railroads are unloaded on innocent purchasers at the rate of \$100,000 a mile or more, but Sanitol itself cannot be put in that class. If the statements that are being made in this case are true the New York wizards are in a back number class.

If the claims that are made are true the Sanitol goods which are so popular are not made in accordance with the formulas for which \$200,000 was credited as being paid, which valuation was afterwards raised as being an element of the good will to \$900,000. Nor does the expansion rest there, for at the stockholders' meeting last December an effort was made to increase this valuation to the neat sum of \$1,900,000, but this attempt appears to have been defeated temporarily at least by the efforts of the Minority Stockholders' Protective Committee, which was also successful in passing a resolution to have the books examined by an expert accountant.

That the present litigation was started and is being fought to a finish is due primarily to T. Franklin Gifford, D.D.S., of Camden, N. J., a prominent and respected dentist of the Philadelphia district, who left a large practice to enter the employ of the Sanitol company and who discovered later on that conditions were not just what he considered to be for the best interests of stockholders outside of those in control in St.

#### FUTURE OF THE SANITOL COMPANY.

"Mr. Morris," said an ERA man to the chairman of the Protective Committee, "what is the outcome to be, the disruption and windup of the company?"

"Not at all. We expect with the help of the courts of Missouri to place the company on a sound business basis, with men in control who will not raise their salaries at the rate of \$25,000 a year, who will not promote excessive increases of capital stock to decrease the value of the holdings of the \$900 druggists and dentists who have invested, who will not burn the books of the corporation and who will not jeopardize their liberty by violating the law against forgery. We propose to get for all of the stockholders what belongs to them and we shall compel restitution from those who have that which belongs to the stockholders. With the evidence so far taken there is no fear of the future, but we want the support of every druggist and dentist and we warn them against turning in their stock for merchandise. The safe and wise thing to do is to join the Protective Committee."

Louis. But the discovery, or at least the events following, came from the attempt to establish a market in Philadelphia for dealing in Sanitol stock. Mr. Gifford early in June of last year approached Henry S. Morris, a dealer in investment securities at 368 Drexel Building in that city, with a proposition to buy and sell Sanitol stock, which Mr. Gifford represented could be purchased at a low figure and sold at a higher figure.

Mr. Morris knew about the Sanitol preparations and Mr. Gifford's arguments seemed convincing, so that an agreement was made between the two whereby Mr. Morris was to supply the capital to purchase the stock and he agreed to pay Mr. Gifford 25 per cent of the net profits resulting from the transactions in Sanitol stock. Mr. Gifford furnished a list of the stockholders and Mr. Morris wrote to all of them offering to buy and sell the Sanitol stock.

The outlook seemed promising until on July 17 Mr. Morris sent to the Sanitol Company at St. Louis 77 shares of Sanitol stock which he asked to have transferred to his name. There was more than apparently necessary delay in replying and it was not until 14 days later that he was able to obtain the transfer certificate. This delay led Mr. Morris to ask for a copy of the company's by-laws, and while he was in the inquiring mood he supplemented the request with a further one in which he said he would like to have a financial statement of the company's affairs.

At first the request was answered by a letter stating that the by-laws and financial statement were being sent under separate cover, but the "separate cover" package never arrived and Mr. Morris fears that in the light of information given in the following letter on Sanitol stationery there never was any "separate cover" sent:

Mr. Henry S. Morris, Philadelphia,

DEAR SIR: \* \* \* we expect to make up a statement for you, but we are unable to send you an intelligent one until the end of our fiscal year, Nov. 30.

In regard to the condition of our business, will say it has been quiet during the last few months, but are

#### CORPORATION LAWS OF MISSOURI.

Sec. 2011. False entries in books of corporations, third degree.—Every person who, with intent to defraud, shall make any false entries, or shall falsely alter any entry made in a book of accounts kept by any moneyed corporation within this State, or in any book of accounts kept by any such corporation or its officers, and delivered or intended to be delivered to any person dealing with such corporation, by which any pecuniary obligation, claim or credit shall be or shall purport to be created, increased, diminished or discharged, or in any manner affected, shall, upon conviction, be adjudged guilty of forgery in the third degree. (R. S. 1889, Sec. 3643.)

pleased to state that since the 1st of August there has been a substantial increase. We are enclosing a copy of the by-laws.

Our Mr. Lynties will probably visit Philadelphia and will take this opportunity of forming your acquaintance. Yours very truly,

SANTOL CHEMICAL LABORATORY CO.,  
R. E. Desmond.

Mr. Morris opened his eyes very wide when he read the belated reply that an "intelligent" financial statement could not be given and decided to make an investigation before he went further in carrying out his contract with Mr. Gifford. He did not then know the reason for the refusal of information, but within this month evidence has been given in the Missouri proceedings to show that the company's bookkeeper was then actively at work in secret falsifying the general ledger and writing a new one, the old one being burned afterwards in the company's furnace. Without knowing this, Mr. Morris, in a thoroughly practical way wrote to the Secretary of State of Missouri for a copy of the company's charter and the reports on file made by its officers.

As already stated in the ERA the company was organized in 1897 with a capital stock of \$500,000, which was increased by easy gradations to \$1,000,000, until in March, 1908, it was increased to \$3,000,000. The company's president, Herman C. G. Lynties, as chairman of the stockholders' meeting, swore in the certificate that half of the increase, namely \$1,000,000, "has been actually paid up in lawful money of the United States and is in the hands of the board of directors of said company." This statement was sworn to, according to the Missouri records, on March 30, 1908.

That is the \$1,000,000 that the minority stockholders are using the courts to locate.

On July 14, 1908, R. E. Desmond, the secretary and treasurer of the company, swore to a report made to the Secretary of State in which he gave the amount of capital stock subscribed as \$3,000,000 and the amount of capital stock paid up as \$2,000,000, that being another trace of the now missing \$1,000,000.

#### Minority Prevents Passage of \$1,000,000 Increase in Valuation of Formulas, Etc.

At the annual meeting of the company in St. Louis on December 7, 1908, the minority stockholders were in evidence to the extent of having a resolution passed calling for a thorough examination of the company's books by an expert accountant and preventing the passage of a resolution increasing the valuation of the good will, formulas, trade marks, etc., from the previous \$900,000 to the sum of \$1,900,000. Just a jump of a clear million! This might be the missing million which appeared in the reports to the Secretary of State and failed to appear in the financial statement of November 30.

Analyzing the company's statement the Protective Committee undertakes to show that there is a deficit. The committee says:

#### WHAT THE COMPANY HAS.

All assets, including machinery and appliances, furniture and fixtures, equity in real estate and buildings, cash (\$3000), Canada branch, inventory of mdse., ins., etc., accounts receivable	\$313,377.26
Liabilities, including notes payable at bank, due for mdse., accounts payable	125,847.40

Balance ..... \$187,529.86

#### WHAT THE COMPANY SHOULD HAVE.

Paid into the treasury April 1, 1908, according to sworn statement of Mr. Lynties	\$1,000,000.00
Net earnings after dividends have been paid in 1907-1908	372,838.04
Total	\$1,372,838.04

Making an arithmetical calculation the committee figures "a deficit of \$1,155,268.18 for the years 1907-1908 only" and asks over the signature of Dr. E. Carlton Palmer, 1311 North Broad street, Philadelphia, Pa.: "Also, where are the assets of the past ten years and what have become of them?"

Dr. Palmer is one of the original Santol protectors, who became interested in the movement last October and signed the now famous endorsement of Dr. Gifford, after the latter had left the employ of the company, owing to the discoveries

made by Broker Morris and their effect upon the interests of Dr. Gifford's Philadelphia friends who had become interested in the company by the purchase of its stock.

Others signing that endorsement of October 17, 1908, were: Dr. C. L. Card, Dr. J. G. Lane, Dr. H. B. McFadden, Dr. J. E. Duvvody, Dr. W. B. Marratta, Dr. Clifford D. Beal, all of Philadelphia; Henry Curtis, of Camden; Harry B. Leeds and A. D. Cuskaden, of Atlantic City; Alfred S. Marshall, Frank Maier and F. L. Wilkins, Woodbury, N. J.; Charles Maier, Gloucester City, N. J.; William H. Gano, Philadelphia; Dr. Earl T. Beale, Souderton, Pa.; Dr. William Seaton and Dr. Robert F. Moore, Wilmington, Del.; Dr. S. Eldred Gilbert, Philadelphia.

These gentlemen, with one exception either druggists or dentists, formed the nucleus of the present Stockholders' Protection Committee, of which Mr. Morris is now chairman. The membership has increased to more than 150 and it is constantly growing. Druggists desiring to join the committee can write to Mr. Morris at his office in the Drexel Building, Philadelphia.

#### Twenty-nine Plaintiffs Holding 2239 Shares Seek Injunction Against Present Officers.

In the action for a receiver, which also seeks an injunction against the continuance in office of President Lynties, Secretary Desmond and Director Bowman, there are 29 plaintiffs. The names have already been printed in the ERA. One owns 858 shares, another 528 shares and all but four own more than 10 shares, running up to 197 shares. The total shares represented in the complaint number 2239 and a fraction.

The complaint sets forth a history of the organization of the company and alleges that the present directors are dummies, one of them being called a "puppet" of President Lynties. Mismanagement and misconduct are charged and specifications are given. For four "formulas or alleged trade marks" it is alleged that Mr. Lynties caused \$200,000 in stock to be issued to himself, the complaint declaring that "said formulas were of no value whatever and were shortly thereafter abandoned and other formulas substituted in lieu thereof."

The complaint charges that in connection with the increase of stock from \$500,000 to \$1,000,000 a false statement was made to the effect that 50 per cent of the increase had been paid into the hands of the board of directors, when such was not the case.

The complaint tells of the raise of President Lynties' salary on April 1, 1907, from \$6000 a year to \$25,000 and asserts that he did no more for the latter sum than for the former, the increase amounting to a "waste of the assets of the company." Next comes the charge that at an unknown date in 1907 Mr. Lynties "fraudulently induced and procured the minority of the directors to increase his salary from \$25,000 to \$50,000 per annum, and did during a portion of the time thereafter take stock of said company, at \$5 a share, on account of payment of his said salary, whereas at the same time he required other subscribers to said stock to pay \$10 in cash per share therefore; that the receipt of said \$50,000 per annum as salary by the said Lynties was excessive and beyond reason and constituted the wasting of the assets of the said company."

#### Old Ledger Destroyed to Conceal Fraud; Dividends Paid in Violation of the Law.

Next the rewriting of the ledger is cited and the destruction of the old book is mentioned as having been done to prevent the discovery of fraudulent entries. The directors are accused of paying dividends out of the capital in violation of the Missouri law.

The complaint refers to the missing million dollars next. The statement is made that in an affidavit filed with the Secretary of State on or about April 1, 1908, Mr. Lynties testified that 50 per cent of the increase of capital stock from \$1,000,000 to \$3,000,000 had been actually paid up in lawful money of the United States and was in the hands of the board of directors, when such statement was not true. The proposition to increase the valuation of the trade marks, good will, etc., from \$900,000 to \$1,900,000 is called "fictitious and intended to deceive the creditors and stockholders of the company."

On March 28, 1908, Mr. Lynties is accused of "fraudulently" inducing the directors to borrow from him \$50,000 and pledge all the bills receivable of said company for securing the pay-

ment thereof, "thereby depriving said company of the legitimate income from conducting its business."

The complaint charges that excessive prices were paid by the Sanitol Company to the Brotherhood Realty Company, in which Herman C. G. Luyties was largely interested, for real estate.

Mr. Luyties, it is next set forth, in 1907 and 1908 employed agents to sell the company's treasury stock, sharing in the commissions, that dividends were declared for the purpose of promoting sales of the stock and that he "caused said company to engage in a stock jobbing business in buying, selling and dealing in its stock." Another allegation is that in the first five months of 1909 Mr. Luyties and the directors "caused the company to purchase its own stock and did deliver merchandise belonging to said company in payment thereof."

The relief asked of the court is that a receiver be appointed and that the defendants, Herman C. G. Luyties, president; George A. Bowman, vice-president, and Robert E. Desmond, secretary and treasurer, be removed from those offices and enjoined from interfering with the management of the Sanitol Company. The complaint was verified by Augustus J. R. Muller, until a short time ago chief chemist for the company.

Jamison & Thomas are the attorneys of record and the action is pending in the Circuit Court of the city of St. Louis.

In fighting for what they consider their rights the members of the Stockholders' Protective Committee have had a strenuous time. Efforts to conduct their campaign through a firm of St. Louis lawyers proved unsatisfactory. Finally Mr. Morris jumped on a train and went to St. Louis where he took personal command of the situation, relieved the law firm in question from further connection with the case and retained Jamison & Thomas, who are pushing the suit.

It is a curious circumstance that the expert accountant engaged at the instance of the Protective Committee to investigate the books of the Sanitol Company is the same expert who helped or advised the Sanitol's bookkeeper when the latter rewrote the ledger to remove traces of the \$50,000 salary payments made on account of President Luyties. On that account the expert's report is awaited with much interest by the Protective Committee.

"This expert was recommended to the minority stockholders by their former counsel," said Mr. Morris, "and is making the investigation practically at their instance. President Luyties is reported to have been greatly pleased with the selection of the expert, remarking after the annual meeting: 'Arnstein is a wonder; he can do anything. He got the same man to examine the books who helped to fix them.' Mr. Arnstein is the counsel for Mr. Luyties and the other defendants."

## TAKING TESTIMONY IN THE SANITOL CASE.

### Bookkeeper Werbe Tells About Writing a New Ledger Which Was Made to Look Like an Old Book.

As a part of the proceedings for a receivership for the Sanitol Company depositions of witnesses are being taken by F. J. McMaster, as special commissioner, at his office in the Third National Bank Building, St. Louis. These depositions are taken in shorthand, afterwards transcribed and signed by the witnesses. The appearances are Jamison & Thomas for the plaintiff and Albert Arnstein for the defendant. The evidence so far taken is of extraordinary interest to the stockholders, but the St. Louis and other newspapers have published nothing concerning the hearings and very little about the suit, despite the fact that it concerns something like \$600 persons.

The first witness was H. A. Werbe, bookkeeper for the Sanitol Company, called, sworn and examined on the part of the plaintiffs. He is 49 years old and has been working for the Sanitol Company since August, 1906. He testified regarding his assistants, their names and duties. Personally he kept the pay-rolls, in addition to the general ledger. Accounts with customers were kept by the subordinates. The stock certificate book was kept by a woman, who was not under his control.

Q. Did you ever do any work on any of these books at any other place than in the general office? A. Yes, sir.

Q. Where at? A. I worked in Mr. Muller's office some time along August or September, 1908, for two or three weeks.

This opened the evidence regarding the ledger. Mr. Werbe answered questions categorically and volunteered nothing ma-

terial. The room was away from the general offices and was a part of the laboratory, in fact the work was done in Chief Chemist Muller's private laboratory, beginning while he was away in Canada. Paper was pasted over the glass partition to prevent observation by anybody except those who might know that Mr. Werbe was in this secluded part of the building. He testified that he was engaged in rewriting the general ledger of the company from December, 1906, to August, 1908. The old ledger was copied into the new one, the pages of which were the same.

Q. The entries of the accounts in the new ledger corresponded with those in the old ledger? A. With two or three exceptions. Q. With two or three exceptions. What exceptions were there? A. A couple of accounts that I wanted to alter.

Q. What accounts were they? A. Mr. Luyties' account, the stock account and the office pay-roll account.

Q. What Mr. Luyties? A. Mr. Herman C. G. Luyties.

Q. In what respect did you enter that account in the new ledger different from what it appeared in the old ledger? A. Well, it affected Mr. Luyties' account so far as salary was concerned.

Q. Well, what were the different changes that you made, what was the salary credited in the old ledger?

A. The salary credited in the old ledger up to that time had been on a basis of—that is part of the time, possibly four or five months, something like that—was on a basis of \$50,000 a year, and in the new ledger I credited it on the basis of \$25,000 a year.

Q. The last entry or credit for salary for Herman C. G. Luyties in the old book was \$50,000 a year? A. Yes, sir.

Q. And in writing it in the new ledger you changed it to \$25,000 a year? A. Yes, sir.

A. As I understood it, the salary was based on \$50,000 a year, with the understanding that he was to take a certain portion of that salary out in stock. \* \* \* I think it was about \$5 a share. That was my understanding.

Q. Is there anything in the new book to show that he had taken any stock at \$5 a share on account of his salary? A. No, sir.

Q. Did the old book show it? The old ledger? A. I think it did.

Mr. Werbe said that Secretary Desmond had instructed him to credit President Luyties with the \$50,000 a year salary about February, 1908, that in August, 1908, Mr. Desmond had instructed him to change it back to \$25,000 a year. In rewriting the book the stock charged to Mr. Luyties had been changed to a basis of \$10 a share. Witness admitted that the footings had been changed and the changed totals ran all the way through. Regarding the fate of the old ledger he said the last he saw of it he had handed it to Mr. Desmond.

Asked as to conversations with Chemist Muller about the changes about substituting the new for the old ledger, this is part of the testimony:

Q. Did you not state to him at that time that you would rub your hands over the pages so as to make it look like an old ledger? A. I might have.

Q. Then you did, did you, rub your hands over the pages and made it look like an old ledger? A. Yes, sir.

Mr. Werbe developed a poor memory regarding help which plaintiff's counsel sought to show he had received in fixing the books from Mr. Kribben, an expert accountant who afterwards became the official investigator. Nor did he remember if he had been present at the Sanitol plant one Sunday when Mr. Kribben, Mr. H. C. G. Luyties, Mr. Desmond and Mr. Arnstein were there at a time when he was finishing work on the ledgers.

On cross-examination by Mr. Arnstein, representing the defendants, the witness admitted further changes in the books.

Q. You also stated that the reduction of the credit for salary from \$50,000 to \$25,000 per annum in that stock account made a change in the stock account by pricing the stock from \$5 to \$10 a share. Did it not also reduce the number of shares? A. Naturally it would about one-half.

Q. So that it reduced the number of shares that were credited to Mr. Luyties' account? A. Yes, sir.

\* \* \* You see, for instance, he got 100 shares of stock at \$5 a share, instead of that he was given 50 shares, and the charge so far as money was concerned was the same.

Robert Emmet Desmond, the next witness, aged 40, testified that he had been secretary and treasurer of the Sanitol Company since December, 1906, and had been secretary for two years before that. He became a director when elected treasurer. Regarding the rewriting of the ledger he was unable to say who originated the idea.

Q. Whom did you take it up with before you took it up with

Mr. Werbe? A. I took it up when I found out that a statement had been made by Dr. Gifford that \$50,000 was being paid Mr. Luyties a year, took it up with Mr. Arnstein. Q. I asked him what about it? He wanted to know if Mr. Luyties had ever been voted a salary of \$50,000 and in looking over the minutes, no such record appeared, and the ledger showing that his salary was credited with \$50,000, a change had to be made.

Q. You took it up with Mr. Arnstein before you took it up with Mr. Luyties? A. Yes, sir.

Mr. Desmond admitted giving the order to the bookkeeper to make the change, but was unable to recall whether he talked with Mr. Luyties on the subject prior to that time. The witness admitted having signed the minutes of a meeting at which Mr. Luyties' salary was increased from \$25,000 to \$50,000. Mr. Luyties also had signed it, but Dr. Bowman did not sign it. Thereafter until the conversation with Mr. Arnstein, resulting from Dr. Gifford's statement, the \$50,000 was credited to Mr. Luyties. The order to Bookkeeper Werbe followed a conference with Mr. Arnstein. When the subject first came up Mr. Luyties was out of town.

Q. Do you remember seeing Mr. Luyties going into the private laboratory of Mr. Muller during the time that Mr. Werbe was doing the work of changing the books? A. I won't state positively that I saw Mr. Luyties going in there, but I believe he was in there quite a number of times.

Mr. Desmond said his salary had been \$5,000 a year for two years prior to that time it was \$3,000. Dr. Bowman, the vice-president, received \$35 a week. He visited the laboratory once a week, consulted with various people, but so far as witness knew took no part in the manufacture of the preparations.

The witness admitted burning the old ledger, which he had received from the bookkeeper, after a talk with Mr. Arnstein and Mr. Luyties, in the course of which it was decided that the "old ledger should disappear." No express directions were given to him but as the two announced their conclusion that the book should vanish he took the hint and burned it in the furnace.

Mr. Desmond testified that 50,000 shares of stock appearing in the minute book as having been sold to Mr. Smith had been paid for with \$500,000 in cash, but he could not remember what had become of the \$500,000.

More witnesses are to be examined and preliminary affidavits indicate that the testimony will be of even greater interest than that already given.

#### How the Spring Campaign to Eliminate Dissatisfied Stockholders Was Conducted.

One of the side-lights on the controversy is furnished by the active campaign of the Sanitol officers in attacking the opposition by endeavoring to purchase the stock held by dissatisfied stockholders. A letter was sent to Alfred S. Marshall, a druggist of Woodbury, N. J., who signed the endorsement of Dr. Gifford, written on Sanitol stationery and dated St. Louis, April 14, 1909, which read as follows:

"We have been led to infer that you desire to dispose of your Sanitol stock. You hold 102 shares.

"We are in a position to place a limited amount at \$5 a share. Or send an order for Sanitol mdse. \$673.20 at list prices, which at discount on that quantity nets \$510."

Another letter to Mr. Marshall dated St. Louis, April 27, 1909, after stating that business had been affected by the hard times, continued as follows:

"No Sanitol dividends have been paid so far this year and no date has been set for the payment of the next dividend. It is probable that no dividend will be declared in the near future."

About that time Sanitol stock (par value \$101), was selling in the Philadelphia market at \$2.60. Other stockholders, however, received letters making a similar proposition. These letters were printed and blanks and addresses were filled in by typewriter. In circular form the recipient is advised to push Sanitol goods and in one particular case, that of Dr. T. C. Edwards, of Gainesville, Texas, the blanks are so filled in as to offer him "a bill of goods of \$25.50 (sold to patients brings \$40.50). You can send check or if you desire to dispose of your 5.10 shares of Sanitol stock we could sell this for you at such a figure that the net proceeds realized will be sufficient to pay the amount due for the mdse." The recipient is advised to enclose check or stock.

These invitations to push Sanitol preparations seem to have been so arranged as to make a \$5 per share price on the stock

held by each individual and a great many are said to have taken advantage of these offers.

#### The Other Side of the Story.

In the ERA of June 3, page 531, were printed statements by Mr. Luyties in which both he and Mr. Arnstein, his attorney, made answer to the preliminary charges. ERA subscribers who are interested will find these statements in their files and they should read what both gentlemen have to say.

#### "ROOM FOR BOTH." SAYS PROF. REMINGTON.

Sees No Objection to Formation of Division of Pharmaceutical Chemistry by the A.C.S.

PHILADELPHIA, June 12.—Prof. Joseph P. Remington fails to agree with his fellow members of the local branch of the American Pharmaceutical Association who hold that the proposed division of pharmaceutical chemists in the American Chemical Society would tend to disrupt the scientific sections of the A.Ph.A. He says that both organizations are far too large and powerful and that their work is such that neither would interfere with the functions of the other in the step contemplated. He has communicated his views to the members of the executive committee of the Philadelphia Branch who last week declared against the proposition. He says:

"In my opinion, a great good may be accomplished now that the officials of the American Chemical Society are encouraging the formation of a pharmaceutical section. It does not necessarily mean the severing of the connection with the Philadelphia Branch of the American Pharmaceutical Association. The monthly meetings could be kept up as heretofore and much benefit will undoubtedly accrue by the establishment of friendly relations between the chemists of the American Chemical Society and the pharmaceutical chemists of the American Pharmaceutical Association.

"And aside from this, every movement which will aid in making a better United States Pharmacopoeia by meeting and discussing the various problems, can but result in good. The invitation to form a section in the American Chemical Society now comes officially from the secretary and, in my opinion, it would not be wise now to refuse co-operation. The analytical chemists in Philadelphia are active and enthusiastic and if they are willing, a practical way of aiding both associations can easily be found."

#### Winona School of Pharmacy's Commencement.

INDIANAPOLIS, June 12.—The fifth annual commencement of the Winona School of Pharmacy was held on the college campus. Dr. Paul H. Hanus, of Harvard University, delivered the address and dwelt on the importance of a thorough education. In the evening a banquet was held at the Grand Hotel, at which an alumni association was formed. Prof. J. H. Gertler acted as toastmaster and gave a short history of the school. Short talks were given by several of the old graduates. The following officers were elected: A. F. Haller, president; S. R. Barnett, vice-president; C. A. Stark, secretary; William Klamm, treasurer; C. H. Becker, publicity; Philip Little, Harlan Carter and Harry Wedd, constitution and by-laws. During the past year 135 students have enrolled in the school. (The list of the 1909 graduates was printed on page 504 of the ERA of May 27.)

#### Hegeman & Co. to Build Big Warehouse Uptown.

As soon as the frame building which now stands on the site of 66 and 68 West 132d street, Borough of Manhattan, New York City, is torn down, Hegeman & Co. will commence the erection of a six-story warehouse on the plot. The company recently secured a 21 years' lease of the property and work will be commenced very shortly. The building will at first be devoted entirely to storage, but the installation later on of a plant for the manufacture of ice cream for the up-town branches is also under consideration.

#### Ebert Tablet Replica for Lecture Hall.

The Chicago Veteran Druggists' Association has presented to the University of Illinois School of Pharmacy a bronze replica of the memorial tablet of the Ebert monument and it will be suitably placed in the pharmacy lecture hall of the school. The class of 1909 has contributed the remainder of the class funds amounting to \$35 to the Alumni Ebert Fund.

**SOCIAL DRUG CLUB FORMED IN NEW ORLEANS.**

**Expected to Fill a Long-felt Gap in Association Work. Officers Elected—Club House Later.**

NEW ORLEANS, June 12.—Another important organization of druggists was added to the existing organizations when the New Orleans Social Drug Club was formed at a well attended meeting in the rooms of the College of Pharmacy. The object of the new organization is indicated by its name. The other associations here exist principally for the purpose of working. This is to be purely a social organization, and the intention of the organizers is to have three or four social events annually. If conditions permit, these affairs will be given more frequently. Business meetings will take place every quarter, but special meetings may be held on the call of the president. During the interim between meetings the question of social affairs will be in the hands of the entertainment committee, which, thereby, is made one of the most important parts of the organization.

There were 75 druggists in attendance on the first meeting, and almost every line of business was represented. After forming a temporary organization a committee on constitution and by-laws was appointed. It reported shortly afterwards, submitting a constitution and by-laws following very closely the Chicago club. The constitution provides that any person interested in the drug business is eligible to membership. This leaves the doors open to retailers, wholesalers, prescription clerks, salesmen in retail stores, drug drummers and salesmen, and in fact every one interested in the business.

The election of officers resulted in the following being chosen: President, Joseph Iper; vice-president, H. Gonzales; treasurer, Paul Weilbacher; recording secretary, H. J. Bourgeois; financial secretary, Dr. N. Caire; sergeant-at-arms, E. B. Briggs; trustees, August Flash, W. E. Horter, R. Angel, R. F. Grace, F. E. Weilbacher; chairman of the entertainment committee, George S. Humphreys.

It is planned by the club, as soon as the membership permits, to secure rooms of its own. It is hoped to have a membership of several hundred.

**Sly Burglars Use Fly Paper.**

MILWAUKEE, June 12.—Fly paper as a part of their kit was used recently by ingenious burglars who broke into the drug store of J. E. Young, 1130 State street. The thieves, who robbed two saloons and a millinery store besides the pharmacy, have not yet been apprehended by the police. In all these robberies, a new trick in the gentle art of house-breaking was employed. The burglars used a sheet of fly paper in effecting entrances and so successfully did the trick work that two places on the same police beat were entered and not the slightest disturbance was effected. It has been found that the burglars pasted a sheet of the sticky paper on the glass of the upper half at the spot where the catch is fastened to the frame. Then a slight tap from a steel punch easily pokes a neat hole through the glass and the paper holds the broken particles together so that no noise is made. Then a wire hook is inserted, the catch is unfastened and the "fly paper" burglars find the rest of their work easy. About \$50 worth of razors and \$5 in cash was secured at the Young Pharmacy.

**Western Pennsylvania Druggists Elect Officers.**

PITTSBURG, June 12.—The annual election of the Western Pennsylvania Retail Druggists' Association resulted as follows: President, P. P. Knapp; vice-president, Peter G. Walter; secretary, B. E. Pritchard; treasurer, B. P. Welsh; directors, William G. Schirmer, William Dice, Louis Emanuel, Edward J. Kretz, Richard Mierzwa, H. L. Lohmeyer, R. W. Henderson, S. W. Correll, Clarence M. Dorsey, H. M. Thompson, W. S. Erskine, L. E. Hewitt, W. J. Forrest, S. A. Stright, F. J. Brehm, J. H. Phillips and L. B. Hughes.

The organization is in a prosperous condition.

**IMPORTANT DECISION AS TO DRUG SHIPMENTS.**

**Liquid Extracts, Etc., When Shipped in Bulk and Not for Sale, Need Not Declare Alcoholic Content.**

DETROIT, June 12.—Several of the large proprietors of patent medicines, dentifrices, toilet preparations, etc., instead of doing their own compounding, prefer to entrust their formulae to some manufacturing pharmacist who makes in quantities and ships in bulk, to be bottled, labeled and marketed in the warehouse of the proprietor as the demands of his trade require. This saves the proprietor quite an investment in apparatus and skilled labor which must lie idle the greater part of the time.

A shipment of this kind made from Detroit to Wheeling, W. Va., was seized at the latter place under the Federal Food and Drugs Act on the claim that it was misbranded, the casks containing the liquid bearing no statement of the alcohol content. The consignee intervened, and C. M. Woodruff, of this city, recently argued the matter before the Federal Court at Wheeling, claiming that under the Act of June 30, 1906, interstate shipments were subject to seizure only when introduced into another State for sale. Judge Dayton has just rendered an opinion sustaining this claim, the cause being entitled, "The United States of America vs. 65 Casks of Liquid Extracts."

The opinion will be of wide interest as settling the limitations of a section of the law in which, as the court records in this district will show, many of our citizens are interested. Judge Dayton says:

"The defense relied upon to the effect that this liquid extract was not shipped in these casks for the purpose of sale thus in bulk but was so shipped to the owner thereof from one State to another for the purpose of bottling into small packages suitable for sale and when so bottled it is admitted the bottles were labeled so as to express the content of alcohol and comply with the requirements of the Act. The language of the statute is, 'Any person who shall ship or deliver for shipment from any State or Territory or the District of Columbia to any State or Territory or the District of Columbia, or to a foreign country, or who shall receive in any State or Territory or the District of Columbia for any other State or Territory or the District of Columbia or foreign country, and having so received shall deliver in unbroken original packages, for pay or otherwise, or offer to deliver to any other person, any such article so adulterated or misbranded within the meaning of this Act, or any person who shall sell or offer for sale in the District of Columbia or the territories of the United States any such adulterated or misbranded food or drugs, or export or offer to export the same to any foreign country, shall be guilty of a misdemeanor.' (Sec. 2.)

"Again 'any article of food, drug or liquor that is adulterated or misbranded within the meaning of this Act, and is being transported from one State, Territory, District or insular possession to another for sale, or, having been transported, remains unloaded, unsold, or in original unbroken packages, or if it be sold or offered for sale in the District of Columbia or the Territories, or insular possessions of the United States, or if it be imported from a foreign country for sale, or if it is intended for export to a foreign country, shall be liable to be proceeded against in any district court of the United States within the district where the same is found and seized for confiscation by a process of libel for condemnation.' These provisions must be construed strictly in favor of the accused. So construed, I am persuaded, they must be held to mean that anyone owning an adulterated or misbranded food or drug product who ships to another in another State such product is guilty; that anyone having received such product so shipped from another State by the owner or seller thereof who shall in the State where so received deliver, or offer to deliver such product to another in the original package, for pay or otherwise, shall be guilty; that any person who has

F. A. CHIAPA, San Antonio, Tex., elected president of the San Antonio Pharmaceutical Association.

received such a product from any other State who sells or offers it for sale, whether in the original package or not in the District of Columbia, or the territories is liable.

"Congress has no power except in the District of Columbia and the territories to prohibit one from manufacturing adulterated food and drug products; it has no power to prevent one anywhere from personally consuming such products; it did have power to suppress the manufacture of such in the District of Columbia and the territories and by this Act has done so; it had the further power to restrict in the course of commerce transportation from State to State of such products and it has done so; it had the power after such product was received from another State to restrict its sale in the original package and it has done so; it did not, in my judgment, have power to restrict one from manufacturing in one State such product and removing it from that State to another for the purpose of personal use and not sale or for use in connection with the manufacture of other articles to be legally branded and so manufactured. \* \* \* It seems clear that the transportation of this liquid was solely to the bottles made in Wheeling instead of the transportation of the bottles to the liquid manufactured in Detroit, and that it was so bottled in Wheeling and properly branded before any sale or disposition of it was effected. Under such circumstances I am constrained to hold that the six casks must be surrendered to respondent and the libel dismissed."

### DUES OF CHICAGO R.D.A. MAY BE MADE \$25.

**Jobbers Called to Account for Infringing on Trade of Retailers—Brokerage Plan on Trial—Outing.**

Chicago, June 12.—The monthly meeting of the Chicago Retail Druggists' Association was held on the afternoon of June 8 at the Northwestern University Building. There was not only a good attendance of members but representatives of leading Chicago jobbing houses were present by invitation. These included the Fuller & Fuller Co., Morrison, Plummer & Co., Robert Stevenson & Co., Peter Van Schaack & Co. and Numiston, Keeling & Co.

The reason for the invitation extended to the jobbers was for the purpose of bringing to their attention the complaint of the druggists against the sale of drugs and sundries by the jobbers to certain people at retail. J. F. Cannon spoke for the druggists and stated that in their view it was not fair for the jobbers to enter to any character of retail trade. He felt that the wholesalers and retailers should get together and devise a plan that would divide the wholesaler from the retailer.

The representatives of the jobbers present each in turn presented their views showing the difficulties of the situation from their standpoint and assuring the druggists that it was a business that they did not want, but was one which was forced upon them by conditions over which they had no control and that the returns from it were not sufficient to warrant the trouble involved, but that it had been a business necessity.

Mr. Yeomans pointed out that large Chicago jobbers in other trades carrying many lines had rules that prohibited a buyer in one line of goods buying at wholesale in any other line.

After a very free exchange of opinions B. A. C. Hoelzer formulated the opinions of the retailers in stating that they felt the jobbers should eliminate small cash sales and should not sell to private individuals at all and also that sales to manufacturing consumers should be limited to their business requirements and not include goods for personal use.

In a general way the jobbers accepted this proposition but asked for further time in order to confer together and act unanimously on the question when action was taken. The jobbers will be heard from again at a later meeting.

Chairman Sandkoetter, of the legislative committee, reported as to the progress made at Springfield against the proposed free antitoxin bill and proposed certain further amendments to the present law. The committee will present to the Illinois Pharmaceutical Convention at Quincy next week its demand for college educational qualifications for full registered pharmacists.

Secretary I. M. Light reported as to the annual excursion and it was decided that the same should take the form of a boat trip to South Haven, Mich., on July 15.

President Yeoman's plan of buying and selling stores for

members on a brokerage basis was given a favorable vote, it being decided to give the project a trial.

Some proprietary questions were discussed and then the matter of establishing downtown headquarters was taken up, but the members felt that a change was not necessary at the present time.

On the question of membership dues the expression of the meeting was favorable to the project to increasing them to \$25 per annum after December 30, 1909, but a referendum will be taken on the question before the next meeting when it is expected that the matter will be finally decided.

### BALTIMORE VETERANS IN PHARMACY.

**Entertained at the Home of Dr. John F. Hancock, and May Form an Association.**

BALTIMORE, June 12.—It is seldom that so many of the leaders of pharmacy in Baltimore meet as were brought together Wednesday evening, June 2, at the home of Dr. John F. Hancock, in St. Paul street, where some 25 of the foremost druggists of the city assembled and were entertained by him. The idea came to Dr. Hancock to have the oldest and most prominent pharmacists, who have made signal contributions to science, as his guests at a sort of reunion, and he was prompt to act on the idea, no other incentive or special occasion being needed. Accordingly, invitations were sent out and found gratified acceptance.

The company included A. P. Sharp, one of the founders of Sharp & Dohme; Dr. Richard Sappington, perhaps the oldest pharmacist in active exercise of his profession here; H. A. Elliott, Charles E. Dohme, also of Sharp & Dohme; Dr. Charles Caspary, Jr., Dr. D. M. R. Culbreth, Dr. H. P. Hyndson, Dr. Daniel Base, John B. Thomas, of the Thomas & Thompson Co.; John G. Beck, general manager of the Calvert Drug Company; David R. Millard, of Morgan & Millard; J. Edwin Hargest, William M. Fouch, president of the Maryland Ph.A.; Charles H. Ware, Louis Schulze, Owen C. Smith, J. W. Westcott, of Hyndson, Westcott & Co.; Charles Morgan, of Morgan & Millard; Dr. H. A. B. Dunning, of Hyndson, Westcott & Co.; Eugene L. Hodson, and Dr. E. F. Kelly, manager of laboratories for Sharp & Dohme.

Some very interesting reminiscences of the early days of pharmacy in Baltimore were recounted by Mr. Sharp, Dr. Sappington, Mr. Elliott and Mr. Dohme, and the guests were entertained with substantial, for Hancock being assisted in doing the honors by his son, James E. Hancock, and his daughters, Misses Mamie, Dessie and Lillie Hancock. It is thought that the gathering will lead to the formation of a Veterans' Association, patterned after those in some other cities.

One of the most active men in the Maryland College of Pharmacy for many years, and until its absorption into the University of Maryland, the treasurer, Samuel Mansfield, was unable to attend the reunion, owing to pressure of business. He is still hale and hearty.

### Degree of Ph.Chemist Conferred on Four.

CHICAGO, June 12.—Simple exercises held at the University of Illinois School of Pharmacy marked the close of the first course leading to the degree of pharmaceutical chemist. The degree was conferred by Dean Goodman on four candidates, Charles Wesley Brown, Elmer Eldorado Cassin, DeLancey Thomas Gunning and Henry August Langenhau. Dean Goodman addressed the members of the class briefly calling their attention to the great field afforded the pharmaceutical chemist and expressing the hope that the members of this first class might fully grasp these opportunities and make a name for themselves and their class.

### Presidents Rusby and Elkin to Visit North Carolina.

RALEIGH, N. C., June 12.—Announcements containing the programme for the annual meeting of the North Carolina Pharmaceutical Association at Greensboro, June 23 to 25, have been sent out. The sessions will be held at the Benbow Hotel and Dr. H. H. Rusby, president-elect of the A.Ph.A., as well as W. S. Elkin, president of the N.A.R.D., are expected to be the guests of the association and make addresses. Max Payne is the local secretary. Special rates have been secured at the hotels in Greensboro, and regular convention rates will be granted by the railroads.

## PATENTS, TRADE MARKS, ETC.

## PATENTS.

Granted June 8, 1909.

923,822—Frank C. Dornett, Detroit, Mich., assignor by mesne assignments to Duff Remedy Company, Chicago, Ill., a corporation of Illinois. Atomizer.

923,846—Oliver P. Hurford, Chicago, Ill. Process of extracting nitrogen from air.

923,879—Emil Neugebauer, Weisbaden, Germany. Siphon.

923,895—Emmett P. Ryeburg and Walter T. Bryan, Kansas City, Mo. Closure for receptacles.

923,898—Adolph Schiller, Schöneburg, near Berlin, Germany. Bottle-blowing machine.

923,916—George C. Westry, Murray, Utah. Method of thionous precipitation.

923,967—Charles Glaser, Baltimore, Md. Process of producing camphene.

923,999—Andrew P. Riggs, Seattle, Wash. Hair tonic.

924,120—Jacob Barrow, Windfall, Ind. Can-labeling machine.

924,136—Gabriel A. Bobrick, Los Angeles, Cal. Process for the liquefaction of gases and separation of air into commercial oxygen and nitrogen.

924,137—Gabriel A. Bobrick, Los Angeles, Cal., assignor by mesne assignments to United States Liquid Air & Oxygen Co., Los Angeles, Cal., a corporation of California. Apparatus for liquefaction of gases.

924,138—Oscar A. Boehm, New York, N. Y. Vacuum-insulated bottle.

924,211—Sylvanus L. Wottring, Prospect, Ohio, assignor to Wottring & Sutphen Co., Prospect, Ohio, a firm. Fire extinguisher bottle closure.

924,230—James A. Horne, Oregon City, Ore., assignor of one-third to George C. Buonnell, Oregon City, Ore. Antifraud

bottle.

924,276—Alfred Rosch, New York, N. Y., assignor to Chas. J. Tagliabue, Brooklyn, N. Y. Bulb protector for thermometers.

924,289—Daniel Westcott, Salem, N. J. Non-refillable attachment for bottles.

924,304—Paul Askenasy and Martin Mugdan, Nuremberg, Germany. Process of making dichlorethylene.

924,319—Peter C. D. Castle, Bellington, assignor to Gum Tragacoll Supply Company, Ltd., Hooton, England. The extraction of gum.

924,333—Gustavus B. Fletcher, Philadelphia, Pa. Non-refillable bottle.

924,343—Samuel B. Goff, Camden, N. J. Device for affixing labels to bottles.

924,344—Samuel B. Goff, Camden, N. J. Bottle-filler.

924,359—Ellen Kearney, New York, N. Y. Hair tonic.

924,360—Georg Kirkegaard, New York, N. Y., assignor to Imperial Stopper Company, a corporation of Maine. Bottle-filling and capping machine.

924,367—Otto M. Morris, Spring Lake Beach, N. J. Suspensory bandage.

924,375—Jeremiah L. Peters, Allentown, Pa. Stopper-lock for bottles.

924,383—Ida Schikorra, Philadelphia, Pa. Douche or bed pan.

924,428—Georges M. A. Claude, Paris, France. Process of separating oxygen from air.

924,449—Cura Gentsch, Vohwinkel, near Elberfeld, Germany, assignor to Farbefabriken vorm. Friedr. Bayer & Co., Elberfeld, Germany, a corporation of Germany. New resin-like product.

924,494—Hugo Noerdlinger, Arnaldo Caroselli and Ludwig Berg, Florschim-on-the-Main, Germany, assignors to the firm of Chemische Fabrik Florschim, Dr. H. Noerdlinger, Florschim-on-the-Main, Germany. Process of preparing pure lactic acid.

924,496—Stylit Paulard, Paris, and Nicolas Grillet, St. Fons, near Lyon, France, assignors to Societe Chimique des Usines du Rhone, Paris, France. Closure for vessels charged

Copy of any PATENT or TRADE MARK, 10 cents.

Author of copyrighted work on Protective Trade Marks,

Food and Drugs Act, and Valid Patents.

G. H. DAVIS, Attorney, 908 G St., Washington, D. C.

with volatile liquids under pressure.

924,532—Robert Brown, Jr., Ilford, England, assignor to N. R. Capsule Syndicate, Ltd., London, England. Bottle stopper.

924,555—Charles F. Jenkins, Washington, D. C., assignor by mesne assignments to Single Service Package Corporation of America, a corporation of New Jersey. Method of making paper bottle closures.

924,595—James M. Blashfield, Kalamazoo, Mich., assignor of one-half to Peter V. Blashfield, Marshall, Mich. Appliance for relief of headache.

## REISSUE.

Granted June 8, 1909.

12,971—Heinrich Koppers, Essen-on-the-Ruhr, Germany. Process of obtaining ammonia and tar.

## TRADE MARKS.

Published June 8, 1909.

32,120—William Jackson Thurmond, Dallas, Texas. Class 6. A medicinal remedy for catarrh, ozena, bronchitis, catarrhal consumption, coughs, etc.

54,151—J. A. Folger & Co., San Francisco, Cal. Class 6. Cream of tartar.

59,055—Eleto Company, New York, N. Y. Class 6. Antiseptic and healing solution.

59,063—Eleto Company, New York, N. Y. Class 6. Sachet powder.

59,064—Eleto Company, New York, N. Y. Class 6. Cologne.

59,308—Van Scoy Chemical Company, Mount Gilead, Ohio. Class 6. Medicines for internal and external application for the alleviation of rheumatism and other muscular affections.

59,537—Josephine Dumas, North Fayette township, Allegheny County, Pa. A remedy for stomach troubles, sunstroke, headache, sore throat, colds, coughs, fever, la grippe, diarrhoea and dysentery.

59,780—Franz Fritsche, Hamburg, Germany. Class 6. Salves, ointments, powders and tablets for coughs and colds.

40,187—New Graciani Grocery Company, San Francisco, Cal. Class 46. Lucca olive oil.

40,355—Leroy S. Brown, Boston, Mass. Class 6. A medicine to counteract the effect of liquor on the human system.

40,914—Hessig-Ellis Drug Company, Memphis, Tenn. Class 6. A remedy for gripp, coughs, diphtheria, catarrh, sore throat, croup and scarlet fever.

40,971—Margaret Gavin, Herne Bay, Kent, England. Class 6. Face cream, toilet powder, tooth paste, liquid preparations for cleaning teeth, hair tonics.

41,940—Frederick Stearns & Co., Detroit, Mich. Class 6. Hemostatic, astringent and cardiac stimulants.

41,941—Frederick Stearns & Co., Detroit, Mich. Class 6. Scrums.

## Druggist Accused of Selling Morphine.

BALTIMORE, June 12.—Dr. A. C. Huthweller, a druggist at 218 North Greene street, was arrested tonight by several city detectives on the charge of selling morphine without a physician's prescription. Captain Pumphrey, chief of the detective force, had received several complaints about druggists violating the narcotic law and detailed the detectives on the case. They induced Estella Harris and Walter Wyatt to purchase the drug, which the detectives allege, they got, paying 50 cents for a bottle. Dr. Huthweller was released on bail for the action of the Criminal Court. He can be sent to jail on conviction under the city ordinance in question.

## New Cuban Law Requires Registration of Specialties.

Article 47 of the new Cuban Pharmacy Law requires that any specialty in order to be sold in the Republic of Cuba, must be previously registered in the office of the Secretary of Health and Public Welfare. The wholesale house of Jose Sarra, Havana, in a circular to the trade in the United States, announce that they shall be pleased to undertake the registration of products of firms who are willing to submit them a letter of authorization and a detailed descriptive list of the specialties affected by the law.

## NEW LIST OF TAXABLE ALCOHOLIC MEDICINES.

Internal Revenue Commissioner Issues New Schedule, Omitting Some Remedies on Account of Compliance by Maker With Official Requirements and Adding Other Compounds.

WASHINGTON, June 11.—T. D. 1505 relating to alcoholic medicinal preparations for the sale of which special tax is required was issued yesterday by Acting Commissioner of Internal Revenue Williams. It gives a list of alcoholic medicinal preparations, which have been examined and held to be insufficiently medicated to render them unfit for use as a beverage.

Special tax will be required for the sale of any of the preparations named, even though such sales are for medicinal use. The liabilities of dealers for sales for medicinal use of any of the preparations marked with an asterisk (\*) will, however, be held to date from and after the publication of this decision.

The names of most of the preparations heretofore published in Circulars 733 and 727 will be found included in this list, the only exceptions being those the manufacturers of which have revised their formulas to meet the Department's requirements. *Special tax will not, therefore, be required for the sale for medicinal use of any alleged medicinal compound not on this list until the Commissioner has been communicated with, and specific instructions given.*

It having been found in various instances that there are several preparations of the same name on the market, the names of the manufacturers of the preparations examined are given, and it should be understood that only the preparation as compounded by the manufacturer whose name is given is embraced in this list. The list follows:

### LIST OF ALCOHOLIC MEDICINAL PREPARATIONS.

- \*Abbott's Aromatic Bitters, C. W. Abbott & Co., Baltimore, Md.
- American Alimentary Elixir, American Drug Store, 1115 Canal street, New Orleans, La.
- Angostura Aromatic Tincture Bitters, E. R. Belders, St. Louis.
- Aromatic Bitters, Hanigan Bros., Denver, Colo.
- \*Aromatic Stomach Bitters, Pfeiffer Chemical Co., St. Louis, Mo.
- Aroma Stomach Bitters, J. S. Smith & Co., Burlington, Iowa.
- Arcus La Grippe Specific, Excelsior Medicine Co., Chicago.
- Angauer Bitters, Angauer Bitters Co., Chicago.
- Angauer Kidney-Aid, Angauer Bitters Co., Chicago.
- \*American Elixir, Beegs Manufacturing Co., Chicago.
- Beecher's Stomach Bitters, Lowrey Drug Co., Baltimore.
- Bismark Laxative Bitters, C. Lange & Co., Chicago.
- Bismark's Royal Nerve Tonic, R. A. Smith & Co., Panama, Ill.
- Blackberry, Carles Medicine Co., Aberdeen, S. C.
- Blackberry Cordial, International Extract Co., Philadelphia.
- Blackberry Cordial, Irondequoit Wine Co., Rochester, N. Y.
- Blackberry Cordial, Strother Drug Co., Lynchburg, Va.
- Blackberry & Ginger Cordial, Standard Chemical Co., Fort Black, Tonio, Albert Nigemann, St. Louis.
- \*Bleedine, Bleedine Corporation, Malden, Mass.
- Bonekamp Stomach Bitters, Geo. J. Fixmer, Springfield, Ill.
- Bonekamp Bitters, J. S. Smith & Co., Burlington, Wis.
- Botanic Bitters, F. E. Mayhew & Co., San Francisco, Cal.
- Bradenberger's Colicobids, Standard Chemical Co., Fort Smith, Ark.
- Brown's Utrine Tonic, A. E. & E. V. Brown Co., Mobile, Ala.
- Brown's Astringent Cordial Bitters, Chas. Leich & Co., sole agents, Evansville, Ind.
- Brown's Vin Nerva Tonic, Brown Chemical Co., Nashville, Tenn.
- Brod's Celery Pepsin Bitters, Jno. Brod Chemical Co., Chicago.
- Buckeye Bitters, Geo. Albert, Milwaukee, Wis.
- \*Butter's The Atlantic Vineyard Wine Co., Philadelphia.
- \*Carpathian Bitters, L. J. Sulak Land Co., West, Texas.
- \*Clarke's Rock Candy Cordial, Colburn, Birks & Co., Peoria, Ill.
- Clifford's Cherry Cure, Standard Chemical Co., Fort Smith, Ark.
- Clifford's Peruvian Elixir, Standard Chemical Co., Fort Smith.
- Cinchona Bitters, Morris & Dickson Co., Shreveport, La.
- Coca Star Jamaica Ginger, Gulf Mfg. Co., New Orleans, La.
- Coca Wine, American Drug Store, 1115 Canal St., New Orleans.
- \*Colombo Elixir, Colombo Elixir, Imported, Philadelphia.
- Cooper's Nerve Tonic, Muller & Co., Baltimore.
- Colasaya, Zwarts Pharmacy Co., St. Louis.
- \*Clayton & Russell's Stomach Bitters, Adams & Co., N. Y. City.
- Dandelion Bitters, Beegs Manufacturing Co., Chicago.
- \*Dandy Bracer, Dandy Bracer Co., Philadelphia.
- Dr. Brown's Blackberry Cordial, Texas Drug Co., Dallas, Texas.
- Dr. Brown's Tonic Bitters, Brown Chemical Co., Nashville, Tenn.
- Dr. Bouvier's Lichen Gin, Dr. Bouvier's Specialty Co., Louisville, Ky.
- Dr. Berzell's Magen Bitters, Imported, St. Louis.
- Dr. Fowler's Meat and Malt, Meat & Malt Co., Louisville, Ky.
- Dr. Gray's Tonic Bitters, Central Botanical Co., Cherry Creek, Colo.
- \*Dr. Robson's 3 Star Peruvian Tonic Compound, Pfeiffer Chemical Co., St. Louis.
- Dr. Hortenbach Stomach Bitters, Dr. Hortenbach, Minneapolis.
- Dr. Hopkin's Union Stomach Bitters, F. S. Amidon, Hartford.
- Dr. Hoffman's Golden Bitters, F. Traudt, St. Louis.
- Dr. Rattinger's Bitters, Rattinger's Medical Co., Sappington, Mo.

Dr. Sterki's Ohio Bitters, Dr. V. Sterki & Co., New Philadelphia, Ohio.  
 Dr. Worme's Gesundheit Bitters, J. D. Helmsath, Chicago.  
 DeWitt's Stomach Bitters, E. C. DeWitt & Co., Chicago.  
 Dubonnet Wine, Imported.  
 Dubonnet, Imported.  
 Duffy's Malt Whisky, Duffy Malt Whisky Co., Rochester, N. Y.  
 Duffy's Alimentary Bitters, Imported.  
 Elkhair of Bitter Wine, Piesens, Tonk Bitters Co., Chicago.  
 Elkhair of Bitter Wine, V. Bokk, Chicago.  
 Elkhair Calisaya, Reid, Yeomans & Cubitt, New York City.  
 Encalyptus Cordial, Zwartz Pharmacy Co., St. Louis.  
 Ferro China Bases (Manufacturer's name not stated; apparently imported).

\*Ferro-China Bitters, G. Citro & Co., Hoboken, N. J.  
 \*Ferro China Bissleri (Felix Bissleri), Imported.  
 \*Ferro China Universale, Imported.  
 \*Ferro China Bitters, D. P. Ross, San Francisco, Cal.  
 \*Fine Old Bitter Wine, Struzyński Bros., Chicago.  
 \*Folger's Aromatic Bitters, M. D. Folger & Sons, Grand Rapids, Mich.  
 \*F. Miller & Co.'s Stomach Bitters, Imported.  
 \*German Stomach Bitters, Geo. Kuerners, Granite City, Ill.  
 \*Gastrophil, Edward Rimsa, Chicago.  
 \*German Bitters, Evans Smith Drug Co., Kansas City, Kan.  
 \*Genuine Bohemian Malted Bitter Wine Tonic, Edward Rimsa, Chicago.  
 \*Gilbert's Rejuvenating Iron & Herb Juice, Gilbert Bros & Co., Baltimore.  
 \*Ginger Tonic, Lowmy Drug Co., Baltimore.  
 \*Ginseng Cordial, American Ginseng Medical Co., Syracuse, N. Y.  
 \*Glycerin Tonic (Elkhair Pepsin), W. P. Underhill, Concord, N. H.  
 \*Green's Chili Tonic, W. P. Green, Son & Co., Selma, N. C.  
 \*Green's Blackberry Cordial, Greiner-Kelley Drug Co., Dallas, Texas.

Harrison's Quinine Tonic, I. X. L. Chemical Co., Chicago.  
 Health Bitters, H. Bitzegeio, Chicago.  
 Herbs Bitters, Herb Medicine Co., Reading, Pa.  
 Herb Bitters, Otto E. Lenz, Petersburg, Ill.  
 Heribon, Hooper Medical Co., Hillsboro, Texas.  
 \*Hindu Tonic, Hindu Tonic Co., Chicago.  
 \*I. X. L. Bitters, I. X. L. Chemical Co., Chicago.  
 \*Indian Stomach Bitters, Dr. E. Vincedorfer, Hanna, Okla.  
 \*Iron Pepto, The Wm. Brooks Medicine Co., Russellville, Ark.  
 \*Jack Pot Laxative Bitter Tonic, J. B. Scheuer Co., Chicago.  
 \*Jaffe's Intrinsic Tonic, Jaffe Wine Co., Sacramento, Cal.  
 \*Jerome's Dandelion Stomach Bitters, Jerome Chemical Co., St. Louis.

\*Johnston's Cherry Elkhair, Parker-Blake Co., New Orleans.  
 \*Juniper Kidney Cure, Juniper Kidney Cure Co., Ft. Smith, Ark.  
 \*Juni-Kola, Bezugs Manufacturing Co., Chicago.  
 \*Karl's German Stomach Bitters, Natchez, Natchez, Miss.  
 \*Karl's German Stomach Bitters, Karl's German Bitters Co., Aberdeen, S. D.

Katarno, Katarno Co., New York City.  
 \*Kocher Stomach Bitters, Jos. Landshut, Pittsburg, Pa.  
 \*Kola Wine, Reid, Yeomans & Cubitt, New York City.  
 \*K. K. K. Morris & Dickson Co., Shreveport, La.  
 \*Kola and Celery Bitters, Milburn & Co., Baltimore.  
 \*Kreuzberger Stomach Bitters, Dr. E. Kreuzberger, Logansport, Ind.  
 \*Kudros A. M. Hellmann & Co., St. Louis.  
 \*Ko-Ca-Ama, The Wm. Brooks Medicine Co., Russellville, Ark.

\*Laxa Bark Tonic, Natchez Drug Co., Natchez, Miss.  
 \*Lee's Celebrated Stomach Bitters, Lee's Anti-Trust Medicine Co., Joplin, Mo.

Lemon Ginger, Ballard Snow Liniment Co., St. Louis.

Magen Bitters, A. J. Wahlersky, Chicago.

\*McCormick's Compound of Golden Seal, O. S. McCormick, Louisville, Ky. (Union, Mo.)

\*Meta Malt, Bernheim Distilling Co., Louisville, Ky. (Union, Mo.)

\*Mid Honey Wine, Struzyński Bros., Chicago.

\*Milburn's Kola & Celery Bitters, Milburn & Co., Baltimore.

\*Sirena Tonic, Sirena Manufacturing Co., New York City.

\*Smith's Bitters, Van Natta Drug Co., St. Joseph, Mo.

\*Steinkönig's Stomach Bitters, Adam Steinkönig, Cincinnati.

\*St. Ruel Quinquina, Imported.

\*Strauss Exhilarator, Wm. H. Strauss, Reading, Pa.

\*Tatra, B. Zeman, Chicago.

\*Toln Rock and Rye.

\*Triedand Bitters, F. R. Leonori & Co., New York City.

\*True's Magnetic Cordial, Standard Chemical Co., Ft. Smith Ark.

\*U-Go, Fritz T. Schmidt & Sons, Davenport, Iowa.

Udele Josli's Dyspepsia Cure, Dr. Worthington's Drug Co., Birmingham, Ala.  
 Warner's Stomach Bitters, Warner, Friday & Co., Sioux City, Ia.  
 Weiders & No. 1 Tonic, Weiders' Cooperative Co., Sacramento.  
 Westphalia Stomach Bitters, E. R. Bohlers, St. Louis. (Cal.)  
 Whites Dyspepsia Remedy, W. L. White & Co., Louisville, Ky.  
 Williams' Kidney Relief, Parker-Blake Co., New Orleans, La.  
 Zeman's Medical Bitter Wine, L. Zeman, Chicago.  
 Zien Stomach Bitters, Zien Bros. & Co., Milwaukee, Wis.  
 Zig Zag Walker's Tonic Co., Paducah, Ky.

## NEWS OF THE STATE BOARDS OF PHARMACY.

### L. W. Miller Elected by New York Western Branch—Eastern's Election Occurs in Brooklyn Next Week.

Warren L. Bradt, of Albany, secretary, has issued a call for the semi-annual meeting of the New York State Board of Pharmacy, to be held at the Earlinton Hotel, Richfield Springs, June 26 to 28. As will be noted the first session is on the Saturday preceding the regular meeting of the State Pharmaceutical Association.

President Felix Hirsman, of the New Yorker Deutscher Apotheker-Verein has issued a card notifying the Verein's Brooklyn members of the election for a member to the State Board of Pharmacy, in place of Frederic P. Tuthill, whose term expires December 31, 1909. The election will take place next Thursday, June 24, at the Brooklyn College of Pharmacy, 265 Nostrand avenue, Brooklyn. There are two candidates in the field, Dr. William C. Anderson, dean of the Brooklyn College of Pharmacy, nominated by the Kings County Pharmaceutical Society, and William T. Creagan, nominated by the Brooklyn Pharmaceutical Association.

Niagara Falls, June 12.—At a meeting of the druggists of Western New York, held at Buffalo Wednesday L. W. Miller of the Miller-Strong Drug Company of this city was elected as a member on the Western Branch of the State Board of Pharmacy. The term of office is five years. Mr. Miller's opponent was Mr. Cushing, of Lancaster.

### Appointments Made by Gov. Gillett in California.

SAN FRANCISCO, June 12.—Governor Gillett has completed his appointment of the Board of Pharmacy for the next four years. The members are as follows: E. T. Off, Pasadena; H. O. Baker, Fresno; C. B. Whilden, Alameda, to succeed A. L. Leber; J. O. McKown, Livermore; G. M. Sutherland, Alameda; E. J. Molony, San Francisco; H. J. Finger, Santa Barbara, to succeed R. S. Oakford.

As now planned the next meeting of the board for examination will be held in Los Angeles during the week commencing July 19 and in San Francisco during the week commencing July 24.

Mr. Whilden has been the very efficient secretary of the board, without being a member of it. His appointment by Governor Gillett is a recognition of his active efforts in behalf of pharmacy.

### Mr. Taylor Reappointed to District of Columbia Board.

WASHINGTON, June 12.—Through Secretary Hilton, of the District of Columbia Board of Pharmacy, the Commissioners of the District announce the appointment of Augustus Carrier Taylor, to serve five years from July 1, 1909. This is a re-appointment and is no surprise to the druggists of the District. There was no other candidate. In fact, in the popular usage of the word, Mr. Taylor was not himself a "candidate." His services had proven so eminently satisfactory to the public and pharmaceutical interests of Washington that no other name than his was mentioned. Mr. Taylor is president of the D.C.R.D.A. and active in Washington Branch, A.P.A.

### California Bride for Michigan Druggist.

CINCINNATI, June 12.—After 12 years of correspondence by mail, George W. Tyler, 62, a druggist of Paw Paw, Mich., and Josephine Adams, 63, of Auburn, Cal., were united in marriage June 3 by the Rev. Napoleon Carlisle, of Covington, Ky. They met in Columbus, Ohio, a few days ago, the bride-elect having journeyed from her home in California to wed Mr. Tyler there. They could not secure a license there because they are first cousins. Then they came to Cincinnati, and were refused a license here, but somebody informed them that being first cousins does not prevent marriage in Kentucky. They went to Covington, Ky., as happy as two birds, and were soon made man and wife.

# THE DRUG MARKETS

## DEMAND AND PRICES REMAIN STEADY.

**Business Shows No Material Increase While Only Fractional Price Changes are Noted.**

**NEW YORK, June 14.**—Business in drugs and chemicals shows no material increase, but some fractional price advances are noted. The demand for seasonal goods has been retarded by cool weather, but an improved demand is looked for with the approach of a warmer season. Opium is firm, but without any new feature. Glycerin is higher, menthol is advancing, quinine is unchanged, Norwegian cod liver oil is steady at quoted prices, Hungarian chamomiles are scarce, with an upward tendency, and angelica seed is very scarce and extreme prices are asked for the small lots obtainable. Ergot is dull with an easier market for Russian and Spanish. Jalap root maintains its strong position, but with values unchanged. Camphor is in fairly good demand for the season, but there is no change in prices.

**OPIMUM.**—There is some demand for single cases, and such orders are being filled at \$4.25 per pound. In primary markets there is no change, but the weather on the whole has been favorable, owing to more frequent showers in many districts. The arrivals in Smyrna for the week ending May 21 amount to 2065 cases, against 1387 cases at same period last year.

**QUININE SULPHATE.**—The market is in the same unchanged condition with the demand limited to actual requirements. Manufacturers' prices are unchanged on the basis of 14c. per ounce for 100-ounce cans.

The only feature of any interest has been the Amsterdam quinine bark sale which was held last Thursday, and which went off at a slightly lower basis; a considerable portion of the offerings, it was reported, being unsold. Cables give the sales as 17,500 kilos at 3.10 Dutch cents, this comparing with 3.20c. for the previous sale. The sale has had no effect on the price of quinine in the local market.

**COD LIVER OIL, NORWEGIAN.**—The primary markets are firm, but without any change in value. Manufacturers do not seem inclined to make any concessions, and it is believed that the lowest value has been reached. The total to 7th instant is 53,500,000 fish, producing 42,333 barrels oil. The result in the year 1907 to June 13 was 45,000,000 fish, producing 37,350 barrels oil, and in the year 1908 to June 9 was 44,500,000 fish, producing 47,645 barrels oil. This shows a falling off of 5300 barrels, comparing with the result of 1908, but an increase of 4385 barrels as compared with the result of the year 1907.

**CHAMOMILE FLOWERS, HUNGARIAN.**—The latest reports confirm previous ones that the crop will be small, and higher prices may be expected. New crop of good quality is still offered to arrive the latter part of this month at 35c. per pound in cases of about 110 pounds. On the spot 42c. to 45c. is the asking price for old crop, but not much of good quality is to be had at these prices.

**GLYCERIN.**—Manufacturers have again advanced their price to 16c. per pound in drums, 17½c. per pound in plain cans and 17¼c. per pound in patent cans.

**MENTHOL.**—This article is doing better in our market, owing to firmer markets abroad, and reports of a partial failure of the crop. This article has been selling at unprofitable prices for some time past, but it looks now as if price would advance still more, as the stock in the local market has been very much reduced, and is much smaller than it was on January 1.

**IPECAC ROOT.**—Rio and Cartagena high test are offered at \$1.35 per pound for the former and \$1.00 for the latter. The foreign markets are higher with a good demand, and the tendency seems to be toward higher values.

**ST. IGNATIUS BEANS.**—In a late report attention was called to a lot of about 500 pounds which was offered to arrive, at 50c. per pound. A portion of this lot has been sold, and now only 200 pounds remain, for which 60c. per pound is asked.

**CASCARA SAGRADA.**—There is a somewhat better inquiry and the tone of the market is firm with prices well sustained at 8½¢ a lb. per pound in large quantities, as to grade.

**ARNICA FLOWERS.**—On the spot prime flowers are held at

11¢ a lb. per pound and prices in primary markets for new crop for shipment are said to be advancing in view of the unfavorable weather conditions in growing sections.

**SENNA, TENNEVELLY.**—A good consuming demand exists and prices are firm at 7¢ a lb. 13½¢, as to grade and quantity. Several sales of prime broad leaves have been reported at even higher figures.

## London Drug Market

**LONDON, June 5.**—The Whitsuntide holidays interfered with the business of the week and consequently the dullness which has prevailed of late has been more pronounced than ever. English refiners of Camphor have reduced their prices one penny per pound, bells being now quoted at 1s. 11d. and flowers at 1s. 10d.; the market for crude Chinese is very quiet at 142s. 6d. per cwt. spot; Japanese refined also tends easier, spot price of 1-ounce tablets being 1s. 8½d. per pound and of 2½-pound slabs 1s. 7d. The prices of Ammonium and Sodium Bromides have been rearranged and are one half-penny per pound dearer but the price of Potassium Bromide is unchanged.

Notwithstanding that the principal consuming season for Citric Acid is with us, the demand is singularly dull and the prices of Citrates have been reduced by one penny per pound. Tartaric Acid, on the other hand, is in good demand at late rates. There are buyers of "Kobayashi" Menthol at 7s. 3d. per pound but no sellers below 7s. 4d., the stock being very low. American Peppermint Oil is very quiet at unchanged rates. Japanese Peppermint Oil is firm at 4s. 10d. per pound. Essence of Lemon is lower at from about 3s. per pound and business has been done at 16s. 9d. per pound for Essence of Bergamot but no more is offered at this figure. Oil of Star Aniseed is steady at 4s. 5d. per pound. Glycerin is firm at the late advance. Rio Ipecacuanha is now held for 5s. 6d. per pound, being three pence per pound higher. Opium is very quiet and Morphine and Codeine are unchanged.

## Mayor and Legislators Guests of Druggists.

**ST. LOUIS, June 14.**—At the June meeting of the St. L. R.D.A., Mayor Kriessman and the St. Louis delegation in the recent State Assembly will be guests of the association. This is a part of the legislative programme, the thanking of those who aided the passage of the bill for a new State law and the opening wedge for some city legislation.

The request from the city will be for a carbolic acid ordinance similar to that in force in New York and for an anti-vendors' act. The druggists of the city are very tired of the reflections cast their way when an epidemic of carbolic acid suicides is under way but at present they have no protection except that with which they surround themselves. Such sales do not necessarily go on the poison book.

The vendors' nuisance is becoming quite pronounced in the city. It is reported that the number of women peddling tablets for all sorts of ailments and of known and secret formulas is very large. Several of these women make heavy sales, as their purchase of money orders from the druggists show.

A dinner in honor of Mr. Hazenow and his associate legislators has been on the cards for some time, but this is the first good opportunity.

## Cost \$750 to Change Mind About Sale.

**NEWARK, N. J., June 12.**—A verdict of \$750 was returned by the jury in the Supreme Court that heard the trial of Edward C. Ranney's action for \$2500 for alleged breach of contract against George Temple and his wife, Mrs. Mae K. Temple, of 210 Clinton avenue. The jury exonerated the wife.

Temple is the owner of a drug store at the address given. On September 19, 1908, according to the story of the plaintiff, who is a New Yorker, he made an agreement to sell it and its contents to him for \$4500. After a certain amount had been paid down Temple backed out, and the suit was brought before Judge Heislery.

It was testified in the course of the trial that Temple did a business of \$1000 a month and that the property was worth nearly \$6000. The defense was that the Newark druggist, after having made inquiries about Ranney, decided, according to Edward Kenny, the local man's lawyer, to have a guarantee that the money would be all paid.

# THE PHARMACEUTICAL ERA

PUBLISHED EVERY THURSDAY

VOL. XLI.

NEW YORK, JUNE 24, 1909

No. 25

**D. O. HAYNES & CO.** - Publishers  
90 WILLIAM STREET, NEW YORK  
Telephone, 2457 John. Cable Address: "Era, New York."

Western Office:  
Room 500, Dickey Building, 40 Dearborn St., Chicago  
Telephone, Central 5888

## SUBSCRIPTION RATES.

United States, Cuba, Hawaii, Porto Rico, the Philippines, and Mexico	\$2.50 a Year
To Canada, postpaid	3.00 a Year
To Foreign Countries in Postal Union	4.00 a Year
Single Copies	10 Cents.

ALL SUBSCRIPTIONS ARE PAYABLE STRICTLY IN ADVANCE

Published every Thursday at 90 William Street, Borough of Manhattan, New York, by D. O. Haynes & Co., a corporation; President and treasurer, David O. Haynes; vice-president, Ezra J. Kennedy; secretary, Edward W. Drew. The address of the officers is the office of this publication, and the title is registered in the United States Patent Office.

Entered at the New York Post-Office as Second Class Matter

## Re Photographs for "Era Album"

### Illustrated Section

Each subscriber to The Pharmaceutical Era is entitled to representation in this work, and is invited to send us his photograph. We do not require a subscription from each partner and clerk. If the firm or proprietor is a subscriber, the other partners and clerks may have their portraits included for \$1.50 each. To secure all of the Album sections one must be a subscriber to The Era in his own name.

In sending photographs be sure that each one is distinctly labeled with the name, address, business, profession or occupation of the person, written clearly on the back of your photograph. A good plan is to write it on a printed label and stick it on the center of the back of your photograph. Here is a good specimen:

FOR ERA ALBUM.  
Fred S. Rogers, Middletown, N. Y.  
McMonagle & Rogers,  
Ex-Pres. N. Y. State Pharm. Assn.

When additional photographs of partners and clerks are sent, each one should have written on it the name of the subscriber who sends it, as well as the name of the person in the photograph.

### Cabinet Photographs Only

The style of photograph we require is the so-called "Cabinet" size, with the head about two inches long. If other sizes are furnished they interfere with our plans for keeping the faces uniform, also prevent us from classifying the cuts by localities.

In view of the great amount of work we are assuming, to have each of our subscribers properly represented in this Album, we feel that we are not asking too much when we request each subscriber to supply us with the size and kind of a photograph which will facilitate our work and best enable us to do him credit.

In forwarding photographs for the Album, see that they are distinctly addressed as follows:

THE PHARMACEUTICAL ERA.

For Era Album 90 WILLIAM ST., NEW YORK.

## THE NEW INTERNAL REVENUE LIST.

Druggists who do not possess Government tax stamps and who wish to avoid conflict with the Federal authorities should go over their stocks and ascertain if they are carrying any of the taxable alcoholic remedies listed in the latest circular on the subject issued by the Internal Revenue Department and published on page 578 of last week's ERA. One of two things must be done. If the druggist wishes to carry and sell these preparations he must pay his Government tax; but, if not, the quicker he discards the contraband the less likelihood will there be of arrest and fine.

It will be noticed that some remedies which appeared in previous lists are not given in this one, the manufacturers having changed their formulas to comply with the law. A similar policy will no doubt be pursued by other proprietors, although it is doubtful if all can be persuaded that this will be to their best interests.

## PROCRASTINATION AT WASHINGTON.

July is almost here and the tariff revision discussion is still dragging along in the Senate at Washington, with little prospect of a quick settlement, while side issues in the shape of income taxes and taxes upon the profits of corporations are being injected into the situation, to say nothing of inheritance taxes and other possibilities.

In all of this agitation to provide ways and means for running the Government the fact seems to be overlooked that there is room for a reduction of expenses in Nation, States and most municipalities. The country just at present is infested with myriads of taxeaters whose sole thoughts appear to be the despoilation of property owners. It would be a very welcome sight to the average citizen if some leader should appear who would cut down the public expenses, bring about conditions which prevail in private business establishments and give the taxpayers fair value for their money.

## UNAUTHORIZED USE OF PHOTOGRAPHS.

That the only safe way to use pictures of persons for trade or advertising purposes is by first obtaining the written consent of the subject is made evident by recent court decisions, a fact of which druggists, both wholesale and retail, as well as manufacturers, will do well to take notice. Restrictions as to the use of photographs for trade purposes without the consent of the owner are becoming more stringent and the tendency in that direction cannot be better shown than in the recent decision of the Court of Appeals

in New York State (*Wyatt vs. McCreery*) wherein the constitutionality of the statute is upheld. This law goes farther than some others in making the offense a criminal one, subjecting the offender to prosecution for misdemeanor. While that provision was not at issue in the litigation mentioned the view taken by the court practically sustained its constitutionality in conjunction with other questions which were affirmatively disposed of in the decision.

There are so many vainglorious people and other willing subjects for personal illustrations, both in and out of trade, that advertisers can afford to pass by probable trouble makers who refuse to give their written consent to the use of their pictures. By adopting this policy litigation can be avoided and unnecessary expense prevented, to say nothing of escaping the annoyances which come with controversies of this nature.

#### ERA 1909 PRICE LIST WILL SOON BE READY.

Thoroughly revised, reset in clean type and more complete than ever before, the ERA's 1909 PRICE LIST is now in press and copies of it will be ready for early distribution, unless some unexpected delay occurs. Great care and attention have been bestowed upon the work of preparation, with the object of confirming and continuing the reputation for reliability which has been won by this indispensable reference book.

The alphabetical arrangement of the proprietary goods in Part 2 has been made uniform throughout, with numerous cross references referring to the names and addresses of the manufacturers in Part 3, a feature which is not found in any other general price list issued for the drug trade and which gives the ERA PRICE LIST a practical value which is greatly appreciated by the buyers, as well as by the manufacturers.

Part 4 shows a gratifying increase in the number of price lists, affording evidence that the manufacturers are beginning to appreciate the importance of having their price lists in this section of the ERA's PRICE LIST. A special index of these manufacturers' price lists is published therein and reference is made under each firm's name in Part 3 for those whose lists are published in Part 4. Already stamped with the approval of the trade the ERA PRICE LIST needs no further introduction to the druggists of the country.

#### EDUCATIONAL TREND IN PHARMACY.

Somewhat surprising statements are contained in the annual report of the United States Commissioner of Education which has just come to hand. Comparing, as he does, education in pharmacy, medicine and dentistry, he finds that the former made a far better showing than the latter in 1908. While medical graduates dropped to 4802, below the number of fifteen years ago, and dentistry graduates were only 6519, a falling off of 2000 from 1902, there were 5567 graduates in pharmacy, a gain of 520 over the previous year. There was a decrease also in schools of medicine and dentistry, but an

increase of four schools of pharmacy, bringing the number up to 75. The commissioner is unable to determine the reasons for these unexpected conditions, but hazards the guess that the increase in pharmacy is more apparent than real, presenting his deductions as follows:

"Instead of young men depending entirely upon shop experience for their knowledge of pharmacy, as was the custom very generally not many years ago, it is probable that more of them now enroll themselves in schools of pharmacy, where they expect to receive systematic and valuable instruction in a much shorter time than when behind the counter. If this be the correct explanation of the increased number of students in pharmacy, there will probably be a more competent addition each year to the pharmaceutical profession, but only about the usual quota of new members."

We cannot agree entirely with the commissioner, for during the last twenty or thirty years since the enactment of pharmacy laws made school education essential, although not always obligatory, the growth in schools of pharmacy has been gradual and healthful, the year 1908 being far too late to offer in comparative analysis with the old conditions when pharmacists acted as instructors in their stores for students who also were their clerks. The present increase must be ascribed to the increasing demand for competent pharmacists and to the improvement of educational facilities which has been rapid and notable in recent years. With rare exceptions it is no longer possible to obtain the necessary education simply by attendance in a pharmacy and under the tuition of one man—although such experience is both desirable and necessary. The schools therefore are getting the full normal numbers of recruits in the profession of pharmacy and so it is likely to continue for years to come.

#### A DECADE WITHOUT ADVERTISEMENTS.

General Secretary Charles Caspari, Jr., has again issued the annual notice required by action of the American Pharmaceutical Association at the meeting at Put-in-Bay, September, 1899, "that no advertisements shall be solicited or accepted for any of the publications or programs issued in the name of the American Pharmaceutical Association."

During the ten years that this resolution has been in force the association has grown in membership, gained enormously in prestige and sustained an accession of prosperity that proves the wisdom of the course adopted by the members a decade ago. It is an example which all State associations may follow to their ultimate advantage and those that have already abandoned the solicitation of contributions and the annual canvass for advertisements are so well pleased with the results of the change that they will never return to the old system.

College commencement season is now at an end and several thousand new pharmacists have been given the sheepskins that make them members of the profession. They should not consider their education finished, but should view the future as offering greater opportunities for the acquisition of knowledge and for perfecting themselves in the duties of their life

work. One of the first duties should be to join the A.Ph.A. and the State and local organizations. The expense is small and the benefits intellectually and commercially are great.

Northern Ohio pharmacists have taken up the cudgels against the exploitation of proprietary medicines by advertisements of recipes couched in misleading language. In this they are co-operating with the doctors and with unity of purpose and plenty of energy they are likely to win their campaign.

American Medical Association, in its wonderful growth, furnishes an example which the pharmacists of the country should view with emulative effort. On May 1 last the A.M.A. had a membership of 33,335, a gain in numbers of 2392 within the year ending at that date. The American Pharmaceutical Association ought to be a close rival to the A.M.A. in size of membership. If you are not a member of the A.Ph.A., you can contribute your mite toward that glorious end by taking your pen in hand and sending for an application blank to some member or to Dr. Charles Caspary, Jr., general secretary, 109 Aisquith street, Baltimore, Md.

In pharmaceutical interest in Baltimore the recent dinner of veterans given by Dr. John F. Hancock has rarely been surpassed. Alpheus P. Sharp, one of the founders of Sharp & Dohme, was probably the oldest man there. He was born in Winchester, Va., 86 years ago and went to Baltimore when only 14 years old to enter the employ of Roberts & Atkinson, retail druggists, who were located where Baltimore and Hanover streets now cross, the pharmacy being located just across the way from the old Indian Head Tavern, one of the most famous hostilities of the time. He remained with this firm four years and then accepted a position with Charles Caspary, the father of Prof. C. Charles Caspary, the dean of the Department of Pharmacy of the University of Maryland and permanent secretary of the American Pharmaceutical Association.

Mr. Caspary, Sr., conducted a drug store in North Gay street, which ranked with the leading pharmacies of those days. In this establishment young Sharp spent the next five years, laying the foundation for those sterling qualities which were to lead on to great achievements in after life and forming that character destined to make a strong impression upon the history of American pharmacy. There he became acquainted with Louis Dohme and Charles E. Dohme, German youths, who were also making their way in the world from humble beginnings, and this acquaintance soon ripened into a fast friendship that has endured ever since and proved to be of the greatest moment in the lives of all three.

Young Sharp was the first matriculate of the Maryland College of Pharmacy, entering the institution away back in 1841. He applied himself to the studies with such avidity and exhibited such tenacity of purpose, such energy and extraordinary capacity that he received his degree in the following year. At the expiration of the five years with Charles Caspary Mr. Sharp opened a drug store on his own account on the southwest corner of Pratt and Howard streets, a move likewise fraught with momentous consequences. It was only natural that, having established himself, he should think of his close friends, the Messrs. Dohme, and soon they were prevailed upon to cast their fortunes with him. The rise of the young and exceedingly virile firm after that was rapid and steady. Not even the Civil War, with its unsettlement, could check the progress made. New ideas were promptly taken up when their utility had been demonstrated, but a sound conservatism marked the course of the firm, thoroughness and reliability being placed above other mere expediency. In course of time Sharp & Dohme became one of the leading manufacturers of pharmaceutical products in

the country, Mr. Sharp's untiring push being a most potent factor in the progress made and the phenomenal success attained.

About 20 years ago Mr. Sharp retired from active work, but he retained a large interest in the firm, which subsequently became a stock corporation, and up to the present time he shows a keen concern in its affairs. He has an office in the building and appears there as regularly as though he were still managing the establishment. There he receives his mail and goes over his various business matters. In spite of his 86 years he walks erect, with all of his faculties undimmed and keeping up with the developments of the period. He reads the papers carefully and is well-informed on a great variety of topics. He has never used glasses and his eye sight is wonderfully preserved.

Of exceptional pharmaceutical interest is the fact that Mr. Sharp read the first scientific paper submitted to the American Pharmaceutical Association at the fourth annual meeting, in 1855. This identical paper he read nearly fifty years later, in 1902, and it is preserved among the documents of the A.Ph.A., not only because of its historical value, but on account of its deep scientific worth.

Mr. Sharp still holds membership in the American Pharmaceutical Association. He became affiliated in the beginning with the Maryland Pharmaceutical Association, and gave his alma mater, the Maryland College of Pharmacy, his earnest support.

His busy life left him little time for social diversions, being made up largely of close application to the business of Sharp & Dohme and to keeping up with scientific pursuits. But he managed to gratify his love of country life, a reminder of his boyhood days, by acquiring a farm on the eastern shore of Maryland, where he spends part of the time. He is a student of the science of agriculture, and has contributed extensively to agricultural papers. Even now he sends articles to various publications devoted to farming and to the daily papers on topics that appeal particularly to him. He has also dipped extensively into the study of geology and shows a broad knowledge of earths and of geological formations.

Mr. Sharp's wife died fifteen years ago and he makes his home with his son, Hon. George M. Sharp, a judge of the Baltimore Supreme Bench, at 2105 St. Paul street. Another son, who was connected with a Philadelphia drug house, died years ago. The venerable octogenarian believes implicitly in the gospel of work and of water. He is a total abstainer and his views on the latter subject are as pronounced as those on artificial fertilizers and the use of nitrogen to enrich the soil. He enjoys the undivided esteem of all who know him, and may be regarded as the Nestor of the drug trade in Baltimore, being the oldest member. Of his class at the Maryland College of Pharmacy he is the sole survivor.

Another veteran at Dr. Hancock's dinner was Dr. Sappington, who is also over 80 years old, has been located in Gay street for 60 years and is still actively engaged in the exercise of his profession, his present location being at the southwest corner of Gay street and City Hall Plaza, where he can be found every day. Another guest H. A. Elliott, until a few years ago, conducted a pharmacy at Pine and Lexington streets, and has held high positions in the profession. He has served as vice-president of the Maryland College of Pharmacy, being one of the founders of the institution. Not far behind in age is Charles E. Dohme, one of the active members of Sharp & Dohme. Of late, however, his health has not been very good, in which respect he is at a disadvantage as compared with his older colleagues.

An Italian physician who exposed fresh vaccine virus to the emanations of radium for varying periods and then made use of it in vaccinating children found, says *Il Policlinico*, that

ALPHEUS P. SHARP,  
retired member of manufacturing house  
of Sharp & Dohme, Baltimore, Md.

there was no effect on the action of the virus produced by the exposure to the rays, but that the pustules produced by the virus were entirely free from any septic suppurative; there was no inflammatory area and no fever. He finds that this is an efficient method of purifying vaccine virus, but on account of the expense of radium not one that can be commonly followed.

Daughter—Mother, could I love two men at the same time?  
Mother—Not if one of them gets wise.

The quantity of helium present is thought by R. J. Strutt to bear a definite relation to the age of radio-active rocks. From the ratio of the helium to the uranium, says the *Cleveland Plain Dealer*, he has estimated the time necessary to accumulate the former—that is, the age of the stratum. His provisional results show an age of 225,000 years for the English Pliocene, 3,080,000 for the upper green sand of the Cretaceous, 3,950,000 for the lower green sand and 141,000,000 for the hematite covering limestone of the carboniferous.

Edith—Has she any accomplishments?  
Marie—Yes; one. She can blush without trying.

F. W. Ekstrand, of Salina, Kan., when he turned in the report of the liquor sales made by his firm to the probate judge for the month of May recently, announced that the druggists of Salina have of their own accord established a "black list" of certain persons whom they found to be regular customers of the various drug stores for liquor.

"We kept an eye open for the fellows who were regular visitors at the different drug stores, and as fast as we could catch one going from store to store to buy more whisky we put him on our 'black list,' every druggist in the city having such a list, and we had a good many of them on our lists, too."

"Did Mrs. Oglamug's husband leave her well provided for?"  
"He left her fabulously rich."  
"How do you know?"

"I see by the latest society news she is to be married again."

Plans for a "same Fourth of July in Chicago have been progressing quietly. About 300 applications for permits to sell fireworks have been received, but only one has been granted. Fire Marshal Horan said he was investigating each application to see that each place proposed for a stand for explosives meets the requirements of the ordinances. The one permit granted is for an open-air stand in Washington Heights, protected by a solid brick wall. Other localities might well follow Chicago's example.

Two letters from Swinburne to the American critic, Edmund Clarence Stedman, have been published in the literary supplement of the *London Times*. Referring to Browning's "cherished dogma" regarding the personal immortality of the soul, Swinburne wrote in 1874 that he thought Landor "would have agreed with me that any matter so utterly incognizable is one on which it is equally unreasonable to have or wish to have an opinion."

Speaking of his Greek and French poems he says, "The latter I do consider part of my serious work. . . . I confess that I take delight in the metrical forms of any language of which I know anything whatever, simply for the metre's sake, as a new musical instrument."

The fate of the celebrated Heine monument, which the late Empress Elizabeth of Austria erected to her favorite poet in the gardens of her estate "Achilleion," on the Island of Corfu, has at last been decided, and it will most probably find a home in Hamburg. When the German Emperor bought the palace after the tragic death of its original owner, it was at once made known that the Kaiser did not care to keep the statue on his grounds, and was looking for someone to buy it. The reasons for the step are that the Kaiser neither approved of Heine as a man, nor felt any sympathy or appreciation for him as a poet.

Herr Campe, the owner of a prominent publishing house in Hamburg, which has issued the most celebrated edition of Heine's works has bought the monument for \$2,500, and states that he is willing to present it to the city provided the

authorities offer a suitable location for it. The statue is now on its way to Hamburg.

A story is being told in England of the severely practical disposition of the Duchess of Connaught. It is to the effect that when the King conferred upon the Duke the rank of field marshal, and conveyed the intimation to him in an autograph letter addressed to the Duke, whose name was followed by the covered letters "F. M.," the Duke was highly delighted. The Duchess, however, asked if it meant any increase in pay, and on being told that it did not, remarked that she did not think much of a promotion that conferred no equivalent improvement in one's financial position.

Archaeological explorations near Pompeii have resulted in the discovery of a large Roman villa, containing pictures which are believed to be Roman masterpieces, some fine sculptures, and chests filled with gold and silver. The Government has ordered the suspension of the work of exploration, and troops have been sent to guard the discovery.

Hitt—Well, it's just this way. The man who can go out hunting day after day and not care whether he gets anything or not has the right stuff in him.

Witt—Yes, especially when he's hunting for work, eh?

The use of electricity in furthering the growth of crops has been practically demonstrated on numerous estates in the vicinity of Berlin by some prominent scientists, who are continuing the experiments made some thirty years ago, first by a Dane, Professor Lemstrom, and more recently by the English scientist, Sir Oliver Lodge. The improvements made by the Germans are concerned chiefly with apparatus of high voltage, by means of which the electric current is passed through the plowed field, without endangering or disturbing the farmer at his work. A field which is to be subjected to this new electrical treatment is provided with several telegraphic poles on either side, connected with wires. The air underneath these wires is heavily charged with electricity, resembling the condition of the atmosphere preceding a thunderstorm.

A comparison between a field thus artificially stimulated and one left to the ordinary run of nature shows a marked increase in the size of the individual plant, a more rapid growth, and a more abundant crop, as its product.

To detect a hostile fleet or single ship at sea on a dark night, especially when a great distance away, is no easy matter, even with searchlights. The French naval authorities now believe, according to a dispatch from Toulon, that they have discovered a precious auxiliary in a luminous shell recently invented, and with which experiments have been made with great secrecy. The shell, according to a description given, is fired at a high angle, and when it bursts it scatters luminous balls over a large part of the horizon, enabling one to discover a ship within a radius of sixteen or eighteen miles.

There recently appeared in the columns of the *New York Times* a statement that Prof. Voyle of Berkeley University had succeeded, by the removal of cyanamide in producing a non-intoxicating whisky. Believing that if such was the case it would be one of the greatest blessings conferred upon the human race, but that it was too good to be true, a reader wrote to Prof. Voyle, asking him if he had been misquoted and received from him the following reply:

"The papers used the word 'whisky' when it should have been 'alcohol.' Whisky of today is not the simple product of years ago, but a rectified, blended composition that may or may not respond to the reagents used on pure alcohol to remove the poison that intoxicates. When the cyanamide is removed from alcohol the 'alcohol' is then reduced to the strength of whisky and does not intoxicate, but has its full strength and beneficial effect, and is a rich, refreshing, exhilarating food, which is needed by many people; and all wines and liquors, when unadulterated, can be treated so as to reduce or remove the intoxicant. I intend to publish further information to correct errors."

An agriculturalist asserts that if castor beans are planted near and trained up the side of the house or verandas they will drive away the mosquitoes so that the house will be free from them all the summer.

## The Best Americanism.

By Emma Gary Wallace.

The best Americanism means the largest all-around service in every line of industry, and the best service calls for skilled workers with well-rounded personalities and the capacity for constantly looking ahead to bigger and better things. It calls for co-operation, and recognizes the dignity of work well done.

It distinguishes service from servility. It means a comfortable competence obtained through honorable channels for ourselves and for the dependent upon us. Its esoteric spirit is felt in the great wave of approval for right and disapproval for wrong that is sweeping over the land; in the earnest plea of the times for honest business methods, for quality goods, and for moral advertising. By these excellent fruits shall we be known.

America is demanding not only better service, but the best obtainable service everywhere, and Americans are responding by meeting the demands in full and by voluntarily raising the standards still higher. Perhaps there is no broader, more-promising field anywhere for the ambitious, than that of the chemistry of today and tomorrow. Its importance is becoming more widely acknowledged, and its future is full of promise.

### Wide Fields of Service.

Industrial chemistry searches for the hidden secrets of nature, and when they are found it makes practical application of them for the better service of mankind. The maximum illuminating power of glass, the possible by-products of waste materials, a more enduring enamel for steel than is at present known, the utilization of corn-stalks, an inexpensive means of manufacturing diastase so that a scientific fodder for animals may be produced commercially—these are but a few of the connecting links between science and commerce. Already the laboratory has changed the history of more than one concern from bankruptcy to opulence by better methods and by the transformation of waste materials into valuable assets. The knowledge—the know how—is not sufficient. We are constantly reaching still further, compacting knowledge, and then applying the principles gained in the laboratory, to every-day use. That is wisdom in its purest essence. As energy is more potent than theory, so is wisdom more powerful than knowledge.

Hygienic chemistry in the laboratory of the home kitchen or even the factory kitchen means an understanding of foods that build up and maintain the greatest working energy with the least waste. It means a nation of people physically fit and mentally unbothered. It has come to mean this and more, for the subject has speedily broadened itself until the names of Domestic Science and Household Economics are no longer sufficiently descriptive, and the more inclusive nomenclature of *Euthenics*—the art of right living—is taking its place. Civic sanitation, the nourishing of the growing body of the child, the influence of different foods upon work, and all other contributory influences to the happy and the healthy home are duly considered.

Analytical chemistry leads still farther into the realms of life and its mystic forces. It brings us face to face with the restless nitrogen atom, and with other marvellous elementary substances and their combinations. The nature of a combination that has been made once, may be foretold, but a new or chance combination may hold untold possibilities. From the success of chemistry in steadily increasing the list of synthesized products of nature, it is to be confidently expected that in time the problem of living matter itself will be solved, and that will mean the greater mastery of disease and its preventive treatment. Surely a splendid service even in its partial completeness.

The land of Chemistry contains the fairland of science. Here we meet strange infinitesimal forms of benevolent or malevolent import; sterile liquids whose crystals refuse to

wheel unerringly into place unless the crystallization germ is present. Catalytic forces, fascinatingly mysterious. No Arabian Nights ever presented such a series of marvels and the Chemist is the modern Munchausen.

### Social Service and Interdependence.

In a single school in New York City there are assembled the children of twenty-nine different nationalities. Here, side by side, these children are taught by a wise and generous government the fundamentals of real education, the value of efficiency and the necessity of honesty. They are taught their duty to themselves, to each other, and love for the glorious Stars and Stripes. Truly the best Americanism.

In boasting of our independence, we sometimes lose sight of our great interdependence, for truly "no man liveth unto himself." A famine in India changes the price of stocks in Wall Street. The condition of the Delta at the mouth of the River Nile affects our cotton crop. Much that contributes to our comfort and caters to our sense of the luxurious comes from foreign lands, the result of long and patient toil.

Any catalogue of oils, gums, balsams and barks will show how much we owe to our world-neighbors, and to the pioneers who have gone into the unexplored wilds of foreign lands—even our brave missionaries themselves, for they have given us valuable additions to our therapeutic drugs. It has been said, that the man who reads a primer wants a shirt and soon his wife will want a broom. Uganda, that powerful African monarchy that was exploited at such terrible odds, will soon import carpet-sweepers and other modern conveniences. Commerce is created and promoted. By the law of Compensation, an outflowing current of material blessings must inevitably result in starting in the opposite direction a counter current of equally good things.

If there was no higher motive than that of commercial gain, the \$7,500,000 spent annually on foreign missions pay far bigger dividends to our national prosperity than the \$15,000,000 spent yearly at home on chewing gum, or the \$1,744,747,672 spent on spirituous liquors. The same statistics tell us that \$27,500,000 spent on drugs are more than offset by the \$75,476,932 expended for patent medicines. Americans are ready to spend for their own needs, fancied or real, but they need education upon the science of Value Received.

We may say flippantly that it matters not to us, how our fellows about us spend their money, but that is a shallow evasion. It does matter. By the great law of Interdependence we are obliged to be in no small measure our brothers' keeper.

### The Unselfishness of Service.

It is the unselfishness of real service that is making us a great nation. One notable example of this is the case of that eminent scientist, Dr. C. W. Stiles, who has braved ridicule, discouragement and a trackless waste of uninvestigated conditions to prove that no less than two million of our American citizens are sufferers from a strange, and long-seated infection now known as the hook-worm and aptly called "the American murderer."

He has succeeded in showing that much of the apparent shiftlessness, inability to get ahead, and the general ill-health of the so-called "crackers," "sand-hillers," and the peculiar freakish tendency of the "dirt-eaters," are due to this infection, which saps vitality, ambition and finally life itself.

The agricultural and industrial loss in a single State is estimated at thirty million dollars every year. What must be the toll in human lives! Investigation has shown the fulfillment of the vast consumption of miscellaneous patent medicine and pointed out the remedy to be nothing more difficult than Epsom salts and thymol, and even these to be necessary for but a comparatively short time.

It is this same spirit of helpful, disinterested service that has led to the remedying of wide-spread evils, the while we learned to keep our own door-yards clean. It has led to reforms of all kinds, all the way from village improvement societies to the great anti-tuberculosis movement. The true American not only believes in doing, but he Does. His doctrine is one of faith and actual result-giving works. The is still much to be done and much to be learned, and such the disposition of the true American that whatever comes his hand to do, he will do with his might—that is if he is live, wide-awake American citizen.

He will unite himself, heart and soul with the onward movements of his calling, and partake of their spirit of progress and uplift. If there are conditions of which he does not ap-

prove he will do his utmost to improve them, even if that utmost is little. He will scorn to stand back and grumble at what others are honestly trying to do, and which might be more satisfactorily accomplished if he did not withhold his help and encouragement.

He, or she for that matter, will continually increase the present-day degree of serviceability, for only as efficient service is rendered in the most approved style and in the most conscientious manner, is it worthy of us, and the Best Americanism.

#### Big Time Expected at N. Y. State Association Meeting.

Arrangements are now all completed for holding the meeting of the New York State Pharmaceutical Association at Richfield Springs, beginning next Tuesday, June 29, and concluding July 2. From all reports the attendance bids fair to be large and it is expected that many interesting matters, especially of a legislative nature, will come up and be threshed through. M. R. Mandelbaum, chairman of the transportation committee, announces that he has arranged with the Delaware, Lackawanna & Western Railroad, which runs direct to Richfield Springs without change, for a rate of fare and three-fifths on the certificate plan. The full fare going from New York will be \$5.55 and by obtaining a trunk line certificate and having it validated by the agent at the meeting on either June 30 or July 1, visitors will be entitled to a return fare of \$3.25, or total transportation cost of \$3.90. This rate is available going June 25 to 30, inclusive, with return limit to July 6. By leaving the New York City terminals of the Lackawanna Railroad at either West Twenty-third street, Christopher street or Barclay street, on Monday, June 28, at 10 a. m., Richfield Springs will be reached by 6:50 p. m. On this train special coaches have been arranged for the exclusive use of the party and also a dining car serving meals a la carte.

The headquarters will be at the Earlington Hotel, where a special rate has been made at \$3 per day (American plan).

The local and ladies' auxiliary committees have prepared a fine entertainment program and features will be walks, boat and trolley trips, a card party and a dinner at Five Mile Point. The banquet is scheduled for Friday evening.

#### C. H. Packard President Massachusetts C.P.

BOSTON, June 19.—The annual meetings of the Massachusetts College of Pharmacy were held last week. The choice for president fell on C. Herbert Packard, of East Boston, former president of the Massachusetts State Ph.A., and the present head of the New England section of the A.Ph.A. Other officers elected were as follows: Linville H. Smith, of Jamaica Plain, first vice-president; Herman Heinrich, of Holyoke, second vice-president; Lyman W. Griffin, of Brighton, secretary; John G. Godding, of Boston, treasurer; Max Creamer, of Boston, auditor; Lyman W. Griffin, Max Creamer, and Frederick A. Hubbard, of Newton, trustees.

Thomas Doliber was elected a trustee of the trust funds for the term of five years, and Charles L. Davis, of Newburyport, was elected to the same board for three years, to fill the unexpired term of S. A. D. Sheppard, who resigned on account of ill health.

The Massachusetts College of Pharmacy is in a most excellent condition. It has assets of \$233,594 in excess of liabilities.

Mr. Doliber has been connected with the school since 1867, when he entered as a student, and was graduated in 1869. He was president in 1872-4, and was treasurer in 1881-2.

Resolutions were adopted on the resignation of Mr. Sheppard, which expressed regret at the loss of "a valued and earnest worker." Mr. Sheppard had been actively connected with the school since 1868.

#### Election of Cincinnati C.P. Alumni.

CINCINNATI, June 19.—Members of the Alumni Association of the Cincinnati College of Pharmacy have elected the following officers for the year: William Henry Gausz, president; William F. Schuchardt, first vice-president; J. Frank Gallagher, second vice-president; Fred Kotte, treasurer; M. Klaiher, Jr., secretary. The directors are Charles A. Appmeyer and Lewis Kettermann. Speakers at the meeting were Julius Greyer, Dr. John C. Otis, Prof. Charles T. P. Fennel, Prof. Charles Appmeyer, William Henry Gausz and Fred Kotte.

## Science at Hyena.

By Joel Blanc.

"Well," said the old miner, "I done told you-all how them sooty-neer postals of Mustard's give the civic pride of Hyena Slope some considerable setback. Us Hyenas ain't no more than reekered our dignity an' aplum than this here Doc Bullwinkle packs in from the cattle accommodation what puts him off at Jagers City, that same metropolis consistin' of a six-car sidin', a burro corral an' one s'loun. When this same Bullwinkle informs the welcomin' populace of the Slope that he have come for his health and furthermore, when he-all convinces us that

it are to avoid the steel-trust smoke of Pittsburg what was sulphurizin' his gizzard into the tuberculosis, we gives that medical sharp our honest, horny pams. Some previous to Bullwinkle the only invalids what seeks our peerless health resort was theen' from the sheriff, alimony or a lynchin' party, or some similar debilitatin' climatic conditions.

"This Bullwinkle havin' been a board of health in Okahump-kee or Perry Hut or some similar place an' got away with it, he says he are well fixed in dust an' that while he are in our midst a gettin' now pipes for his lungs from the surroundin' atmosphere, sand-storms an' other higienic advantages of our hell-baked desert, that he will devote hisself to the uplift an' general salvation of we-all Hyenas. This here bone tinker charters three out of the five bed-rooms of the Grand Colonnade Hotel and proceeds to unpack the machinery from his trunks as soon as Greazer Jose gets 'em packed over from Jagers City. When us common council an' other prom'nint citizens views them contraptions we-all don't know what them their tools is. Bateye Bings says he seen somethin' like them in the assay office over to Pheonix. Stutterin' Smith takes a half hour to ask if they ain't a new style far layout an' Mayor Lingo Driggers is some fearful that this here Bullwinkle party are a scientific Roossian Anarchist from Warsaw, Indiana, an' that them implements is some new-fangled bums to blow up the dignity an' pants of the reform administration of the Slope. The scientific lunger blasts Stutterin's hopes an' cams Lingo's fears by describin' the things as a Mike O'Scope (which are probable named after the inventor), a sentryfudge (what looks like a foldin' buzz-saw), an' other ag-cultural implements like what are used by a man named Kebler what are boss ranchman on Jim Wilson's farm in Washington, D. C.

"For the next week this here Bullswiggle party goes around town admirin' the populace an' other live-stock an' condemnin' everything else. He says we are fine specimens of nature's noblemen, queenly women an' mules an' that our worst enemy are Mike Robes. Whereat Pinkeye Peters gets a rope an' wants to know whereabouts at Mike are. Bullswiggle prognosticates that Mike Robes are merely the cognomen of various different worms that infests our bein's, our feed, drink an' plug terbacker here an' heretofore, an' that if we don't eradicate 'em some sudden they will also infest our hereafter an' that right preciously soon. Bullhiggle don't know how clost he are to the hereafter when he soliloquizes that our sewer system which are two foot deep an' open to the sun-lit heavings, ain't sanitary. An' when he says that the soda, chewin'-gum an' snake-oil linament at Mustard's Palace Pharmacy are popplyated by them Mike Robes our bon vivants are some prone to dessicate that there Bullpickle, because Mustard are the most popular man in Hyena Slope—ceptin' Parson Tom. But Bulljiggle do seem to have it in for Mustard an' Doc Pender, who, as you-all knows, are Mustard's side-pardner an' medical salvationist of the Slope. Bullwinkle says that Pender don't know nothin' about intoxicatigolgy, higien, theeryphewticks an' some sim'lar things an' that he couldn't write a prescription for Aurora Borealis an' Digitalis q's, to make twenty cubic gas meters to save his dust bag. An' this Bullbingle further says that Mustard

are only a druggist an' that all druggists is substitutes, crafters, igneramuses, short-card sharps an' claim jumpers. Doc Pender is for shootin' up this Bullwinkle some perforated, but Mustard restrains his professional enthusiasm. Little Mustard ain't no ice-foot an' we-all ain't seein' why he takes all the aboose so cam-like.

"Bullsprinkle tells us Slopeites we only needs a few things to make our metrop'lis a mart of commerce, centre of civilization an' fucher hub of the universe. He says that all we needs is a board of health, a tubercolossal sanitarium, a money-sipal charity hospital, a pest house, a free clinic, a free dispensary an' a public antitoxin stable an' free vaccine calf shed, so as folks can put a pail out with the milk pincine an' get their antitoxins an' virus by the quart, free gratis for nothin'. Bullriddle says that most of our citizenry was sufferin' from streptococci, cholera germs, leprosy, yellow fever skeeters, black plague, Mike Robes, ticks an' sleepin' sickness, an' don't know it. Bulldinkie says the air we breathe are freighted with dormant activity, that our drinkin' water ought to be biled to extract the fusel oil an' that its use for bathin' is likely to produce emui.

"In two weeks after that there savang above, most of us Slopers thinks we has apendixicitus, dyspepsy, scorbutic anemir, double sorosis of the liver, cyanide of the solar plexus an' triconometry. So when this student of our inner lodes an' levels announces that he are going to give a free lecture in the Grand Opry House over Ikey Greenstein's pants pressin' emporium, the vox populi hails the event with loud acclaim. When Bullchicle adds that he will give a moving picture show in which he will exhibit livin' Mike Robes dancin' the Salome dance an' all the seven thousand an' eighty two germs performin' in the greatest show on earth, we-all jest enthuses into the opry house.

"Bulltinkle have induced the Grand Colonade Hotel to wash its extry sheet an' that sheet he have stretched behind the foot-light candles. At the back of the room he have put a whisky barrel on a table an' atop of this fell tower he have a magic lantern with his Mike O'Scope sorto grafted on soze the light shines through Mike's spectickles. When the congerization an' poll-tax list are all assembled the lamps are put out an' the show starts. The things what Bulltinkle shows on that sheet are sure some horrible. He shows a piece of cheese what ain't got nothin' left but the holes an' the maggots an' he says it are the left aorta of the small-box. He shows us every sort of wizzlin' varmint from a box constructor to a Chink dragon. After the first picture he says we ought to make him the board of health at two thousand a year. After the second picture he is goin' to run our charity hospital for three thousand. After the tenth picture the whole congerization is moanin' with anguish an' agonizin' from bein' afflicted with at least sixteen kinds of worms an' by popular, dispairin' vote Bullbuzzer have been chosen for seven different offices at a total salary of eighteen thousand a year. Then Perfesser Bulltinkle says he will show his last picture an' that it are the chef doover of them all. By my old, scared soul, that sure was the chamber of horrors on a hotel sheet! They was worms, snakes, bugs, lizzards an' sea-serpents. They made the combined night-mare an' delicious tremendous look like a funeral procession. 'My sufferin' friends,' says Bullwaddle, 'what you-all sees are just the magnified reflection of one drop of whisky!'

"After I'm done dead I'll hear them shrieks of anguish what split the shingles on the roof an' the splashin' of tears upon the floor. Swigger Swanson bellered like a be-veal. Brownbottle Buggins keeled over in a dead faint. While my own heart seemed bustin' with anguish, remorse an' a forever-to-be-unsatisfied thirst, I seen Mustard an' Doc Pender a sneakin' through the gloom to'rds Bullbeagle. Sudden-like they are a crash an' Mustard yells 'Light the lamps!' When the lamps are lit Mustard are holdin' up a flat bottle an' it's full of livin' worms an' other varmints an' some of them are six inches long. The fell tower an' magic lantern are on the floor, Pender's foot are just follerin' Bullfucker's coat tails through the door an' Mustard says, holdin' up the bottle: 'That's the one drop of whisky what he done showed you!'

"We never seen that high scientist again, but I have always been a little s'picious of Mustard an' Doc Pender an' that bottle of worms."

The druggist who is always moaning about had luck would holler for the cops if good luck tried to get in.

## Original and Selected

### MISTURA RHEI ET SODAE. U.S.P.\*

By Thos. D. McElhenie, Brooklyn, N. Y.

At the last joint meeting of physicians and pharmacists at the Academy of Medicine in New York, one of the medical men in his remarks used the title "Mistura Rhei et Sodae sine Glycerinum." This expression was new to me. I have never seen a prescription written in that way but I have dispensed in the last 30 years many gallons of a mixture which might be regarded as answering that description, not because glycerin was left out, but because it was not put in. The formula, so far as I know, originated with my old friend and family doctor, the late Dr. Thos. M. Rochester. He never wrote "Mist. Rhei et Sodae," but always transcribed the formula in detail as follows:

R—Sodii bicarb. .... 5ij  
Tinct. rhei ..... f5ij  
Aq. cinnamomi ..... f5ij  
Aq. menthae pip. .... ad f5ij  
M.

The doctor's contention was always that the use of glycerin promoted acidity of the stomach, a condition which the mixture is intended to relieve.

The above formula has an excess of sodium bicarbonate and is always dispensed as a "shake" mixture. I make it up by the gallon and probably dispense five gallons of it to a half pint of the U.S.P. or N.F. mixtures. My practice is to drop on the bicarbonate in a gallon bottle the essential oils needed for the aromatic waters, but in somewhat smaller quantity, as none is lost by filtration. Then add gradually 7 pints of hot water and shake to dissolve the bicarbonate; when cool, add the tincture of rhubarb and enough water to complete the required volume.

For purposes of comparison I have brought samples of Mist. Rhei et Sodae, U.S.P., Mist. Rhei Comp., N.F., and Mist. Rhei et Sodae, "Dr.R."

If glycerin be objectionable in an antacid mixture, as I believe it is, I would propose that this formula replace that now in the Pharmacopoeia under the same title, leaving the N.F. formula to stand for those prescribers who want glycerin used. Worked out to the usual U.S.P. quantity of 1000 Cc, the formula would be as follows:

	1 Gallon.	1000 Cc.
Oil of caraway .....	20 minims	0.308 Cc.
Oil of peppermint .....	20 minims	0.308 Cc.
Sodium bicarbonate .....	10 2-3 ounces	87.5 grams
Hot water .....	7 pints	850.0 Cc.
Make a solution and add		
Tincture of rhubarb .....	10 2-3 fl. ounces	87.5 Cc.
Water enough to make ...	1 gallon	1000 Cc.

\*Read before the New York Branch, A.Ph.A., June 14, 1909.

### THE MORE RADICAL REVISION OF THE PHARMACOPOEIA.\*

Henry P. Hynson, Pharm. D., Baltimore.

At the May meeting of the Baltimore Branch of the A.Ph.A. there was offered and accepted, for future discussion, the following resolutions:

"Resolved, that it is the sense of the Baltimore Branch of the American Pharmaceutical Association, that the Ninth Revision of the U. S. Pharmacopoeia should not contain formulas for compound preparations and should present matter relating to simples and preparations of simples, only; that the National Formulary should contain only such formulas for compound preparations as are consistent with prevailing advanced knowledge of chemistry, pharmacology, pharmacy and therapeutics and that all titles therein contained should be true to content and in accord with accepted medical and pharmaceutical ethics." It is further

"Resolved, that the parent body be requested to consider

\* Read before the Philadelphia Branch of the A.Ph.A.

the advisability of publishing a General Receipt Book, with frequent supplements to contain all formulas dropped from the U.S.P. and N.F. and such other formulas as may be useful to pharmacists."

Probably, before discussing the resolution, it will be well to ascertain what effects would have been produced upon the present Pharmacopoeia, had the rule relating thereto been followed by the last Committee on Revision.

Certainly, "cataplasm of kaolin," "antiseptic solution" and "compound acetanilid powder" would not have been introduced and the old tinctures, "compound syrup of sarsaparilla," "compound mixture of glycyrrhiza" and "compound infusion of senna" would have been dismissed.

A broad construction and liberal following of the resolution would have suggested that slight changes be effected in a number of titles and formulas, whereby these might have been made to comply with this new rule. Two per cent of camphor would have been omitted from the cerate of lead subacetate. Solution of iodine in solution of potassium iodide, of sufficient strength, need not and should not have been called compound solution of iodine and, as it would not have occurred to any one that four-tenths per cent of potassium nitrate and thirteen per cent of citric acid enhanced or changed the medicinal value of a hundred per cent (so-called) solution of sodium phosphate, this might have been more appropriately styled "concentrated" solution. The mixture of freshly precipitated ferrous carbonate, containing myrrh, lavender and rose flavorings, did not need to be called compound iron mixture. It may be seriously wondered if the serpentaria would have been missed from the "compound" tincture of cinchona, which is aromatized by the orange peel. There are ten other articles whose formulas or titles might have been changed to their seeming advantage, leaving them more consistent with the practices of the times, namely: pills of iron and mastic; compound chalk powder, compound effervescent powder, the compound spirits of orange and of juniper; the compound tinctures of cardamom, gentian, gambir and lavender; troches of glycyrrhiza and opium; making fourteen that might have been so treated.

Besides the six articles cited, about thirty-two others would, undoubtedly, have been omitted. These are compound resin cerate; confection of senna; elixir of the phosphates of iron, quinine and strychnine; emulsion of cod liver oil with hypophosphites; compound fluidextract of sarsaparilla; glycerite of the phosphates of iron, quinine and strychnine; soap liniment; solution of iron and ammonium acetate; mixture of rhubarb and soda; compound powder of glycyrrhiza; powder of ipecac and opium; compound morphine powder; compound jalap powder; compound rhubarb powder; the syrups of iron, quinine and strychnine, phosphates; hypophosphites; hypophosphites, compound; squills, compound; rose water ointment; compound spirit of ether; the tinctures of: aloes and myrrh; benzoin, compound; ipecac and opium; opium, camphorated, with seven formulas for pills. This means that some forty or less additional titles and formulas would have remained in the National Formulary or would have found place therein and that there would have been three per cent less titles in the Pharmacopoeia.

Any one who has garbled a good sample of acacia understands the wonderful effect the removal of one or two per cent of objectional matter has upon the remainder, knows how greatly the product is improved by the slight loss which bears an infinitesimal relationship to the enhanced value secured. The question, whether or not there is really sufficient value in these articles to compensate for the detracting, retarding and confusing effects their presence in the Pharmacopoeia produces, should be carefully and truthfully considered. It does not appear wise to offer argument upon either side at this time. The whole subject, however, will be more clearly considered if we fix in our minds just what the Pharmacopoeia of today should be. Is it to be an authority as to standards, alone, standards of identity characteristics, standards of pharmacodynamic or adjuvant worth, standards of relative potency, or is it to be a book of both standards and suggestions? Its chemistry and pharmacy must be beyond reasonable question, but it can scarcely presume to establish therapeutic standards or even attempt to do so, when so little has been done to make such standards possible.

Contemplation of the more radical revision of the Pharmacopoeia brings to the front a number of most interesting questions. One broad and far-reaching in its effects would

seem to require earnest thought; it is: Will the admission or dismissal of an article depend upon its local use or disuse or even upon its national use or disuse? Would it not be more consistent with truth and progress that its place in the Pharmacopoeia should be dependent upon its proven pharmacodynamic value, whether used much or little?

The more radical revision of the Pharmacopoeia suggests the use of the English title as the chief title, putting the Latin title in the secondary place. Such a revision would also have placed under the matter relating to a principal article all its preparations, as sub-divisions, in alphabetical order. Physicians, teachers and students would surely approve this change, if manufacturers might not. An index of the text would then be useless and the omission of this would make it possible to utilize the thirty-four pages, now so used, for publishing as complete a list of synonyms as might be compiled.

One more effect of such a revision would be the removal of all matter, between the reverse of the title page and page 1, to the back of the book and make it and the proposed list of synonyms a part of the appendix. There would, necessarily, be an index to the appendix, but to this only.

To all these changes there may be very good objections and, mayhaps, insurmountable objections, yet, it is hoped they are of such a character as to claim, at least, the passing thought of today, which is often the treatment tomorrow consideration must receive.

## NOTES ON ESSENTIAL OILS.\*

### Aloe Wood Oils.

Moszkowski has published a few short notes on the subject of the Javanese scented wood *Kaju garu* (*Kaju gaharu*=eagle wood). In Sumatra the tree which yields the "eagle wood" is locally known as *Karas*, a fine tree, often reaching a height of 40 meters, with a smooth, grey bark and a splendid umbrageous crown. In general, Moszkowski's statements with regard to the wood and the method by which it is obtained agree with those of Boersma. On the other hand, Gilg, who examined a branch without blossoms or fruit gathered by Moszkowski, classifies the plant botanically as a new species of *Aquilaria* (*Aquilaria Moszkowskii*) which is stated to be most nearly allied to *Aquilaria malaccensis* Lam. and *Aquilaria grandiflora* (Lour.) Gilg, whereas according to Boersma the *Kaju garu* of Java is derived from *Gongystylus Miquelleanus* T. & B.

### Elemi Oil.

The name elemi, properly speaking appertains only to the balsam from *Canarium lucidum*, which is produced exclusively in the Philippines, and from which it is possible to obtain from 25 to 30 per cent of essential oil. Occasionally, however, the name is also applied to similar balsams of other derivation, the name of the country of origin being added in that case. Elemi from Southern Nigeria, of which the botanical origin is unknown, varies in color from white to pale yellow and yellowish green; and the samples examined at the Imperial Institute were of fairly solid consistency, and mixed with brown spots and vegetable residue. A sample gave 0.6 per cent of ash, acid no. 55.3, sap. no. 71.9, and the essential oil yielded amounted to 8.1 per cent. This oil was of a straw yellow color and contained ample proportions of phellandrene. A second sample gave 0.53 per cent ash, acid no. 37.8, sap. no. 46.2, and contained 4.4 per cent of essential oil.

Uganda elemi, from *Canarium Schimperianum*, also examined at the Imperial Institute, was white to pale yellow and contained a considerable admixture of dark spots and wood, giving it a dirty appearance. The resin contained 0.3 per cent ash, acid no. 29.4, sap. no. 44.8 (these data being determined from a clean, picked sample). Steam distillation of this sample yielded 11.2 per cent of a pale, straw-colored oil containing a large proportion of phellandrene. According to these data, African elemi generally resembles Manila elemi, but it yields a much smaller proportion of volatile oil than does the latter. Possibly, if African elemi were carefully gathered and treated, it might compete with Manila elemi, but as the demand is only small it might be difficult to find an outlet for large quantities, should they be brought to market.

\* Schimmel's Semi-annual Report.

# QUESTION BOX

THE OBJECT of this department is to furnish our subscribers and their clerks with reliable and tried formulas, and to discuss questions relating to practical pharmacy, prescription work, dispensing difficulties, etc. Requests for information are not acknowledged by mail, and ANONYMOUS COMMUNICATIONS RECEIVE NO ATTENTION; neither do we answer questions in this department from non-subscribers.

In this department frequent reference is necessarily made to information published in previous issues of *The Era*. Copies of these may be obtained at 10 cents each, except a few issues which are out of print, for which we charge 25 cents each.

## Rheumatic Elixir.

(H. B. McG.)—We cannot give the formula for the proprietary article. Why do you not put up a preparation of your own and exploit it as such? Here are three formulas:

(1)

Salicylic acid	640 grains.
Sodium bicarbonate	480 grains.
Glycerin	4 ounces.
Distilled water	4 ounces.
Make a solution and add:	
Potassium iodide	256 grains.
Fluidextract of cimicifuga	4 drams.
Fluidextract of gelsemium	4 drams.
Comp. spirit of orange	1 dram.
Alcohol	4 ounces.
Simple syrup, enough to make	16 ounces.

Mix.

(2)

Potassium bromide	240 grains.
Potassium iodide	240 grains.
Wine of colchicum seed	1 fl. ounce.
Syrup of orange	2 fl. ounces.
Compound spirit of orange	1 dram.
Water	5 fl. ounces.

Mix. Dose: A teaspoonful 3, 4 or 5 times a day.

(3)

Fluidextract of buchu	6 1/2 fl. drams.
Fluidextract of barberry bark	3 1/4 fl. drams.
Fluidextract of juniper berries	3 1/4 fl. drams.
Sodium salicylate	160 grains.
Simple syrup	1 fl. ounce.
Alcohol	1 fl. ounce.
Simple elixir to make	16 fl. ounces.

Mix all, let stand for 24 hours, and filter through purified talcum. Each fluidram contains 1 1/4 gr. sodium salicylate, and represents 3 grains of buchu, and 1 1/2 grains each of barberry bark and juniper berries.

## Greek Letter Fraternities.

(Interested Subscriber).—In reply to your query in the *Era* of May 6, 1909, page 422, requesting the names of Greek Letter fraternities in the United States whose membership is restricted to those following the chemical sciences, a correspondent calls our attention to the following information which appeared in a recent issue of *Science*:

"During the present school year, a council of Phi Lambda Upsilon, a national honorary chemical society, has granted three charters: the first, in Chicago, as the Chicago Alumni Chapter; the second in New York City, as the Columbia University Chapter, and the third in Ann Arbor, as the University of Michigan Chapter. The society was founded at the University of Illinois in 1899. It has for its fundamental object the promotion and investigation of all branches of pure and applied chemistry. Active membership is limited to graduate and advanced undergraduate students, except in the case of the student having the highest average grade of the sophomore year. The election of men is based primarily upon their scholastic standing and promise of research ability. Among the honorary members of the society are Professors W. A. Noyes, C. F. Chandler, S. L. Bigelow, Louis Kahlenburg, H. C. Sherman, E. D. Campbell, S. W. Parr, M. T. Bogert, H. S. Grindley, S. M. Babcock, R. H. Chittenden,

## ONE OF CALIFORNIA'S MANY BEAUTY SPOTS.

This is a view of the famous Magnolia Avenue, Riverside, California, one of the most attractive drives in Southern California. This double drive is seven miles long and is lined by palms, eucalyptus and peppers. Magnolias are planted at the street crossings and the glossy foliage and beautiful white flowers of these trees add much to the beauty of the Drive. Riverside is not far from Los Angeles and is described as one of the prettiest towns in America. There are six fine-looking pharmacies in Riverside and their owners expect to entertain a number of the delegates to the A.Ph.A. convention at Los Angeles in August.

C. G. Hopkins, A. P. Matthews, Drs. L. W. Andrews, A. G. Mann and T. J. Bryan."

## Moth Powder.

(S. Co.)—

(1)

Tar camphor	32 ounces.
Colocynth	8 ounces.
Saff	2 ounces.
Insect Powder	6 ounces.
Borax	4 ounces.
Filler	16 ounces.
Oil turpentine	2 ounces.

Mix all the powders well together, spread out on a sheet of paper and sprinkle the oil evenly over the whole. Then mix again and pass through a fine sieve. It should be put in a tight package, preferably the usual insect-powder cans. The "filler" is usually bran, sawdust, corn meal, etc. If desired, perfume can be added to this powder, oil of cedar being very appropriate, and also adding materially to its efficacy.

(2)

Camphor	4 ounces.
Benzoin	1 ounce.
Black pepper	2 ounces.
Cedar sawdust	5 ounces.

Mix after reducing the solids to a coarse powder.

(3)

Camphor	2 1/2 ounces.
Insect powder	2 1/2 ounces.
Naphthalin	1 ounce.
Carbolic acid	1/2 ounce.

Mix all together, the solids being in coarse powder, and pack in canisters.

## Moth Cakes

Cedar dust	1 ounce.
Camphor	1 ounce.
Cassia powder	1 ounce.
Orris powder	1 ounce.
Oil of lemon	10 minims.
Powdered myrrh	2 drams.
Powdered curd soap	2 drams.

Mix, adding sufficient rectified spirit to mass and press into cakes.

# LETTER BOX

## WOULD AID IN IMPROVING PHARMACOPOEIA.

Prof. Remington Writes Regarding Usefulness of Pharmaceutical Chemistry Division of the A.C.S.

*Editor of the Pharmaceutical Era:*

The article on page 526 of THE PHARMACEUTICAL ERA seems to call for a personal explanation, particularly owing to the following sentences:

"A feature of the discussion was upon the presence of the name of Joseph P. Remington on the committee. When the scientific section was organized, Professor Remington was one of its most ardent supporters and the local members are interested to know his reasons for apparently backing a movement which they believe to be detrimental to the A.Ph.A. and its affiliations in this city. Professor Remington is now in the West and his views on the question it was unable to secure at the time of the meeting."

I am always glad to give the ERA "a reason for the faith that is in me." I wrote to Professor Stevens before leaving for the West a letter from which the following is an extract:

"If such a division, while helping the Pharmacopoeia, will be friendly toward the chemists who are now interested in the A.Ph.A., I see nothing ahead but valuable co-operation. If the movement is hostile to the A.Ph.A. and the members are going to work against this association, I do not believe it would be to the best interests of either pharmacy or chemistry. I really believe that a spirit of co-operation between the two bodies could be fostered and in that case nothing but good would result."

Now I make to excuses, but stand exactly where I have always stood, i. e., for a better Pharmacopoeia.

The Committee of Revision are receiving help and suggestions from all sides and none which are more appreciated than that from the chemists of the United States. Many general chemists are now giving their attention and study to Pharmaceutical Chemistry, the Food and Drugs Act being a moving cause.

I do not believe that the scientific sections connected with the branches of the A.Ph.A. need be injured in any way by the forming of a division of Pharmaceutical Chemistry in the American Chemical Society.

The scientific section of the Philadelphia branch of the A.Ph.A. is a very active, able body of young men who are zealous and jealous for the success of the A.Ph.A. I honor them for it and it is true I have been one of its most ardent supporters and they all know now that I still continue to be, but I see no reason why I should not permit my name to be associated with a movement which will bring a great honor to American Pharmacy like the formation of a division of the American Chemical Society which seeks now to recognize Pharmaceutical Chemistry as an important branch of general chemistry, and I believe that it will be no hardship for the able and active members of the scientific section of the Philadelphia branch of the A.Ph.A. to belong to both organizations. In my opinion it need not be detrimental, injurious or destructive to either. The Philadelphia branch section can still continue to hold its monthly meetings and discussions and thus secure that personal contact and debate which is so helpful and still be able to furnish one paper annually to the American Chemical Society and this section will form a binding link which will greatly aid in the future in improving the Pharmacopoeia and increasing the respect for pharmaceutical attainments which will greatly uplift pharmacy. In fact I believe that I have more confidence in the ability of the chemists of the Philadelphia branch than they seem to have themselves. It is not a question of disloyalty whatever and there is, so far as I know, not the slightest intention on the part of the American Chemical Society to injure the American Pharmaceutical Association nor detract in any way from its usefulness.

Loupart, N. J.

JOSEPH P. REMINGTON.

## Potted Plants, Lobster Salad, Etc., in Pharmacies.

*Editor The Pharmaceutical Era:*

In your issue of June 10 we note an item entitled "Potted Plants Sale as an Attraction" by a certain drug firm, which

you describe as being unique. This sale of potted plants may have been unique in its way, but it certainly did not convey to the minds of the people who purchased from this firm or who noticed the display that pharmacy was a profession. This sale was probably quite as attractive as the sale of fake gold jewelry by the pharmacist.

Pharmacy is losing caste constantly and has no claim whatever to be classed among the professions. Recently in Norfolk I saw little tables in the center of an alleged pharmacy, from which chicken and lobster salads were sold at 10 and 15 cents, and there were signs all over the store about food, egg-nogg, cigars and all sorts of things. The druggist in selling postal cards, cigars, candies, jewelry, potted plants, etc., etc., encroaches upon the legitimate business of other concerns and absolutely destroys the confidence which the public might have in the druggists and the drug stores properly conducted and run in a dignified manner. It seems to us that the attention of the good druggist might be called to this matter, and that their time could be quite as well spent in doing something to take pharmacy out of the rut that it is rapidly getting into in making foolish formulas—nearly all of which are substitutes for old and well-known remedies.

It would be interesting to know how many pharmacists there are in this country who make their tinctures from drugs; it would be interesting to know how many pharmacists there are who make and dispense preparations under their own name, or who make anything. Perhaps the time will come when pharmacy will be regulated the same as in Germany—a pharmacist to a certain number of inhabitants; then he will not aspire to a larger clientele and be tempted to substitute and carry a stock of goods which have no business whatever in a drug store.

GRADUATE OF PHILADELPHIA C. P.

AND A RETAIL DRUGGIST FOR 30 YEARS.

(While all druggists naturally will not agree with the writer of the above letter, it is to be regretted that in expressing his ethical views he has not the courage to sign his name to the letter.—Ed.)

## Closes on Holidays—No Stamps on Sundays.

*Editor The Pharmaceutical Era:*

Having closed on Sundays for twenty-three years I have now added the five holidays to my list. As you will note on the enclosed folder I have also adopted another reform, that is, "no stamps on Sunday." If you wish to note these items for the encouragement of others I shall not object.

Philadelphia, Pa. Fraternally yours, C. E. KING.

Mr. King's announcement is as follows:

"P. S.—Store closed on Sunday, Memorial Day, July 4th. Thanksgiving, Christmas and New Year's Day, from 1 to 6 P. M. Store open Weekdays 7.30 to 10.30, Sundays, 8 to 1 and 6 to 10."

## Likes "The Antidote Factory."

*Editor The Pharmaceutical Era:*

I have just finished reading in the current number of your magazine "The Antidote Factory," and wish to express my appreciation. This is the most beautifully written, lovable little article I have read in many a many a day. Its writer is given to great understanding of human nature. In other words, to use the vernacular of the sunset people, she "Hyu cmntux." May other articles follow from the same author.

Very sincerely yours, THOS. H. ROGERS.

Dallas, Ore., June 13.

## Baltimoreans at the A. M. A. Meeting.

BALTIMORE, June 19.—Hardly arrived home from the annual meeting of the A. M. A. at Atlantic City, where he attended the meetings of the Section on Pharmacology and Therapeutics, Dr. Henry P. Hynson started for Omaha. He went at the invitation of the Nebraska Ph.A. to deliver an address at the annual meeting of that body. He was one of three Baltimoreans to attend the American Medical Association gathering. The other two were Dr. Charles Caspari, Jr., and Dr. E. F. Kelly, of Sharp & Dohme.

## Jumping at Conclusions.

"What a debt we owe to medical science," he said as he put down the paper.

"Good gracions!" she exclaimed. "Haven't you paid that doctor's bill yet?"

# ADVERTISING for DRUGGISTS

## Midsummer Advertising.

In this season of vacations, numerous holidays and long evenings the sale of periodicals is greatest. Every periodical that leaves your store should be a bearer of an advertising message from you. The more rubber-stamping of periodicals is of questionable advertising value. The following plan has proven successful many times: Prepare a circular of a size slightly smaller than the leaf of the smallest standard periodical which you sell. This should be printed on both sides, on good book paper, at least as good as the paper in the advertising pages of the magazines. Place one of these circulars between the leaves of each periodical as soon as a lot of publications is received. Do not merely slip the circular in, but touch the edge of each with a paste brush and then place it in the magazine so that the paste covered edge will adhere between the pages at the back of the periodical. Be careful of the location of the insert. Do not place it in the general advertising section of the magazine or between the pages over which runs the continuation of a single article. If it should be so placed the reader who is following the thread of a story will barely notice the circular and may resent its intrusion. Place each sheet so as to follow the end of a reading article.

## Paper Napkins.

In the season of picnics and outings, printed paper napkins are an excellent advertising medium. One may place them

conspicuously on sale at no cost and indirectly profit thereby. While it is well to sell them and have a publicly announced price, the enterprising druggist will find it profitable to present liberal quantities of them to churches, institutions and societies which are to hold open-air picnics or fairs. The druggist's advertisement should be printed upon the napkins prominently and in a color or colors and general design in harmony with the decorative printing already upon the napkins. It is best to have the printing done by the manufacturer or importer from whom the napkins are purchased.

## Advertising Fans.

Many of the cheap, crude, advertising fans that are offered to advertisers are comparatively worthless. It takes more than a rough stick and a piece of card to make a real fan. The advertising value of a fan depends upon its permanence and real utility. A printed fan is one of many advertising mediums that must be a "repeater" if it is to pay. While split bamboo and folding Japanese fans are seemingly expensive, they are, in the long run, the best fan advertising mediums.

## Going Away or Coming In.

If you are in a large place many of your patrons are going away for a little while at least. You should endeavor to induce them to take a liberal supply of their accustomed toilet and health requisites with them. Get up a plain, neat four-page folder that will slip into a six-inch envelope. On the front page print something similar to the following:

"Are you going away for comfort or inconvenience? Truly, 'there's no place like home' for the little things that make life easy. How aggravating it is not to be able to procure the soap, perfume, face preparation, hair dressing or other toilet requisite or even medicine to which one has been accustomed. Let us make up for you a little assortment of the things you will want while away and which very likely you will be unable

## PATRIOTIC WINDOW DISPLAY CAPTURES THE \$5 PRIZE THIS WEEK IN THE ERA COMPETITION.

The judges in the Era's Prize Competition have decided to award the \$5 Cash Prize this week to E. V. McAllister, of the West End Pharmacy, 1050 West State street, Rockford, Ill., for the photograph of a Memorial Day window display which he submitted in Contest No. 2. While the design is particularly adapted to Memorial Day, it offers suggestions which could be utilized for Independence Day and not many variations from the model would be required to make something like it of appropriate attractiveness for the Fourth of July. The card in the window bearing this legend, is timely and rhythmical: "Navigate the skies, do battle on land or sea, but get surgical supplies at West End Pharmacy."

to procure when you most desire them. Look over the remainder list on the other pages, check off what you desire and then bring this list to us as your purchasing memorandum. Of course, we have hundreds of staple needfuls and novelties that are not enumerated on this list. This is only a memory stimulator."

On the other pages of the folder print a list of the toilet requisites, medical staples and novelties for which you have the greatest demand. You will of course feature the good sellers among your own preparations. When preparing the list for mailing, try to remember some listed article or articles used by each individual and place a blue pencil mark against the names of such articles. Thus, if you are mailing a folder to Miss Kate Simpson and remember that she is a regular consumer of Onebudy's Massage Cream, Twobudy's Talcum Powder and Threebudy's Cough Syrup, place a blue mark against each of these items on the list. When she sees the marks she will be reminded that she needs these articles and also will be pleased with the proof that you remember her purchases and thus show appreciation of her patronage.

#### Transient Trade in Summer Resorts.

If you are located in one of the smaller places to which people come for their summer outings, then it is for you to go after the transient trade. If there is a resort hotel in or near your town it is well to make from the hotel register a list of the daily arrivals and addressed to names on such list deliver to the hotel, sealed envelopes or packages of advertising matter or samples, properly addressed for placing in the key boxes. There are few things that more directly appeal to summer visitors than souvenir postals of local views with the neat and short advertisement of the druggist printed thereon. Another "puller" is a ticket good for one glass of soda, mailed or delivered to each new arrival. A druggist in the Wisconsin lake region purchased a number of neat, quarter-pound candy boxes. On the cover was printed a local view and below this the words "M—'s welcome to Lake P—." One of these boxes, filled with choice candy and bearing a neat card with the words: "Compliments of S. F. M—, Druggist," was delivered to each new arrival at the big hotel.

#### For Stay-at-homes.

In this age of electrical rapid transit, thousands of towns have their "trolley parks" and other suburban resorts. The druggist may use them to advantage in the way of premium advertising. One druggist offered, for a certain number of days, a free ride on the resort merry-go-round with each can of his talcum powder. This proved so advantageous that during the season he offered with different specialties free tickets for every ration at the park. Druggists may arrange with the owners of park amusements to purchase tickets in quantities at a very liberal discount. It is best to have some distinguishing mark on the tickets so used or even better to have an especially printed and dated for use within a certain limit. By so doing the druggist need pay for only those tickets used and returned to him by the amusement proprietor.

#### Open Air Concert.

A Kansas druggist evolved an advertising scheme from which there were no direct returns, but which satisfied him as having paid liberally, indirectly. This plan is especially recommended to those who sell phonographs and records. A phonograph with a concert horn was mounted on a large toy wagon. At front and back there were uprights which held a muslin sign lettered thus: "We ask for no money. This concert is being given with the compliments of D—'s Pharmacy. All that a good drug store should have and also a fine line of phonographs and records." The druggist hired one of the town's handy men to pull this musical outfit around the streets of the town in the evening, when people were sitting upon their steps and porches. The wagon was stopped before the houses, a record adjusted and a short concert given.

It is suggested, that as a phonograph plays automatically when started, that the man in attendance might hand matter or samples to the listeners.

#### Automobile Injures Woman Pharmacist.

SYRACUSE, N. Y., June 19.—Miss Theresa Haas, pharmacist at William Muench's drug store in North Salina street, was knocked down by an automobile recently and had her collar bone broken, when the Knights Templar State convalesce was in progress.

#### ADDRESSED BY RHODE ISLAND'S GOVERNOR.

#### Largest Class Turned Out by College of Pharmacy and Interesting Exercises, Banquet and Dancing.

PROVIDENCE, June 19.—The Rhode Island College of Pharmacy and Allied Sciences held its commencement exercises at Roger Williams Park Casino. The class of '09 is the largest the college has graduated. President James O'Hare, Ph.C., presided and introduced Governor Pothier as the first speaker. Lawrence V. Calder acted as marshal.

Governor Pothier spoke briefly and confined his remarks to some solid advice in which he urged his listeners to strive for the best places in their field of endeavor.

Prof. John P. Sutherland, M.D., dean of the Boston University School of Medicine, spoke on the opportunities of young men, and his remarks were instructive and interesting.

Prof. John E. Groff, Ph.G., Ph.C., awarded the prizes. The William O. Blanding and Hall & Lyon Co. prizes of \$25 in gold each and the Daggett bronze medal for the highest general average, highest standing in operative pharmacy and highest standing in the theory and practice of pharmacy were awarded to Albert Whitman Claffin. Miss Lillian Gertrude Garrett received the George L. Claffin scholarship for a full tuition in the senior year for attaining the highest general average in the junior year. Degrees were conferred as follows:

Graduates in Pharmacy—Mrs. Bertha Lister Robinson and Albert Whitman Claffin, cum laude; Thomas Henry McKenna, William Shallcross, Amedee Mounsey, Jr., Charles Henry Flanagan, Ernest Albert L'Esperance, Olivia Joseph Arthur Dufault, Henry Irving Hough, Jr., John Raymond Hickey, John Bernard McGorty, Wilfred Charles Lambert, Albert Humbert Jackovny and James William Farron.

Pharmaceutical Chemist—Joshua Farron, Ph.G.; Albert Zurlinden, Ph.G.; William Leo Garrett, Ph.G.; Samuel Lewis Pearl, Ph.G., and Anthony Caesar Ventroux, Ph.G.; George Smith Morgan, honorary.

An informal reception was held by the graduates and faculty, followed by a dinner. Prof. Charles H. Daggett acted as toastmaster and Mayor Fletcher was the principal speaker. Others who spoke were: Edwin E. Calder, A.M., Ph.C., dean of the college; John E. Groff, Ph.G., Ph.C.; Francis M. Harrington, M.D., and Albert Whitman Claffin, president of the seniors. Dancing followed the banquet.

The officers of the class of 1909 are: President, Albert W. Claffin; vice-president, Thomas H. McKenna; secretary, Everett M. Posey; treasurer, Mrs. Bertha L. Robinson; class day committee, Albert W. Claffin, Ernest L'Esperance, Thomas McKenna, Mrs. Bertha L. Robinson and William Shallcross.

#### BOOK REVIEWS.

PROCEEDINGS OF THE AMERICAN PHARMACEUTICAL ASSOCIATION at the fifty-sixth annual meeting held at Hot Springs, Ark., September, 1908, also the constitution, by-laws and roll of members. 8 vo. 1203 pages. Baltimore: Published by the Association.

This volume is up to its usual high standard of excellence. The frontispiece is a portrait of the late Henry Martin Whitney, president of the association 1897-1898 and a member of the council from 1892-1895 and 1898-1901. According to the secretary the membership of the association to September 1908 was 2151, 206 new members having been elected since the 1907 meeting. Among the interesting features of the report are several papers and discussions relating to pure food and drugs and the section devoted to pharmaceutical education and legislation.

DESK BOOK OF FACTS FOR PHYSICIANS AND PHARMACISTS. Compiled by Ralph Walsh, M. D., Washington, D.C. 12 mo. cloth. 292 pages. Published by the author. \$1.50.

This little book contains a list of the newer remedies with doses, medicinal properties, etc., also tables of poisons with antidotes, the more important incompatibilities and other information to which the busy physician and pharmacist frequently wish to refer.

#### Graduating Class Washington State College.

PULLMAN, Wash., June 19.—At the recent commencement of the Department of Pharmacy of the State College of Washington the following class was graduated:

Ernest Oliver Crump, Clarence E. Goff, Lillie D. Kyllonen, Leon G. Little, George T. McMahon, Ray L. Price, Virgil Rodney Smith, E. H. Thompson, Hal E. Turneure, J. Roe Turner, Geo. Wash. Westcott, Thomas M. Wright, Jesse P. Laird.

## PERSONAL MENTION

—CHARLES E. VANDERKLEED, head chemist of H. K. Mulford Company, was a visitor in New York last week.

—H. K. MULFORD, vice-president of H. K. Mulford Company, has gone with his family to his camp in the Berkshires.

—WILLIAM P. RITCHEY, of Braun, Ritchey & Co., New York City, is spending a month in Canada with the hook and line.

—F. W. COOKE, druggist at Ripon, Wis., one day recently gave half of the proceeds from his soda fountain to the Woods Park Association.

—CHARLES E. HAYWARD, superintendent of the H. K. Mulford Company's laboratories, will spend the summer with his family at Ocean City, N. J.

—MILTON CAMPBELL, president of the H. K. Mulford Company, has bought an estate in Calvert County, Maryland, and moved there early in the month.

—PROF. JOHN URI LLOYD, of Cincinnati, took part in the thirty-ninth annual session of the National Eclectic Medical Association, June 18, at Chicago.

—JOSEPH HEALY, manager of H. K. Mulford Company's New York branch, left on Tuesday for a visit to the laboratories of that company in Philadelphia.

—LOUIS WEICHMANN, well known druggist at Wausau, is one of the incorporators of the Wisconsin Fire Insurance Company, recently organized at Wausau.

—D. G. WISE and his bride spent several days of their honeymoon in New York City last week. Mr. Wise is one of Sharp & Dohme's star Southern salesmen.

—GEORGE JUDISCH, of Ames, has been elected pharmacy lecturer and instructor in materia medica in the department of veterinary science at the Iowa State College.

—DR. GEORGE HARGREAVES, of Alexandria, Jamaica, W. I., sailed for London, Eng., Wednesday of last week. Enroute from Alexandria he visited several friends in the New York City drug trade.

—WILLIAM H. HEYL, of W. H. Heyl & Co., Bermuda, W. I., was a caller in New York City last week, passing through the city on his way to the Southern States, where he expects to spend several weeks.

—JAMES O'DONNELL, the Washington (D. C.) druggist, was an active member of the committee in charge of "Button day," the occasion being the sale of Taft buttons for the benefit of public play grounds.

—J. VICTOR HENKEL and Edgar J. Young, of Lancaster, Pa., were groomsmen at the marriage of their friend, Wm. O. Frailey, Jr., a fellow graduate of the class of 1908 Philadelphia College of Pharmacy.

—J. H. REHFUSS, president of the Brooklyn College of Pharmacy, and a prominent druggist, is spending his spare time in automobiling as he has recently purchased a commodious Franklin touring car.

—RICHARD MYERSTEIN, associated with the foreign department of Parke, Davis & Co., is to leave New York City shortly for Colombia, S. A., in which territory he will look after the interests of the house.

—DR. GEORGE D. ROSENBERG, vice-president of the Powers-Weightman-Rosengarten Co., of Philadelphia, has been elected a director of the Girard National Bank, one of the oldest financial institutions in that city.

—PROF. FRANCIS HEMM, of St. J.C.T., who has sold his store at Grand and Arsenal streets, St. Louis, to Theo. Becker, will spend the summer in the West traveling with his son, whose health demands a change of climate.

—H. D. HUTTON, of the firm of Hutton & Hilton, Washington, D. C., is enjoying a salt water trip along the Atlantic Coast. Starting from Norfolk, Mr. Hutton will visit points as far north as Halifax. Mr. Hutton's mother accompanies him.

—DR. J. A. ROSENHEIM, recently appointed sales manager for Goldsmith & Arndt, cigar manufacturers of Philadelphia, entertained members of the firm and the sales staff at a dinner at the Drug Club of Philadelphia of which he is an active member.

—GEORGE H. WHIPPLE, of Bridgeton, N. J., is receiving the congratulations of his many friends upon the recent marriage

of his youngest daughter, Miss Ada Whipple, to Henry Townsend, of the Cumberland Glass Co. The young couple are enjoying an automobile honeymoon.

—MRS. OTTO F. CLAUS, president of the St. Louis chapter of W.O.N.A.R.D., and her daughter Estelle, departed last week for a three months' tour of Europe. Both Mrs. and Miss Claus have been regular attendants of the Mo.Ph.A. conventions and were greatly missed at that gathering.

—AMONG the druggist visitors at the Milwaukee Drug Company this week were: R. C. Albers, manager of the North Side Drug Company, Sheboygan, Wis.; John Donploss and wife of Wausau, Wis.; John W. Berdelman, Amherst, Wis.; Dr. Borden, Plainfield, Wis.; W. Pierce, Plover, Wis.; Frank Adamski, Manistee, Mich.

—H. T. MERRIMAN, of the Milwaukee Drug Company, and A. M. Duesher, druggist at Birnamwood, Wis., are planning on a western trip which they will take in the near future. The Seattle exposition will be visited and San Francisco, Los Angeles, Salt Lake City, and Denver will be a few of the other points which will be visited.

—WILLIAM B. STRONG, vice-president and treasurer of the Milwaukee Drug Company, and L. A. Lange, of the Yahr & Lange Drug Company, have returned from the recent trip to Michigan taken with the Merchants' and Manufacturers' Association of Milwaukee. Both called upon the Michigan trade and believe that the junket was a valuable one.

—PROF. JAMES H. BEAL, of Scio, Ohio, a Pharmacopeial trustee and vice-dean of the Pittsburgh College of Pharmacy, was the guest of Dr. H. M. Whelpley, Saturday, and was met by a number of St. Louis pharmacists. Prof. Beal was to have been a guest of the Missouri Association this year but could not get away from home in time for the meeting. He has accepted another invitation for next year.

—OTTO KRAUS, who divides his time between his Philadelphia drug store, his carousel in Fairmount Park and his summer home at Seaside Park, N. J., on Monday celebrated the anniversary of his birth at the latter place. As usual, Mr. Kraus was the life of the party of friends who enjoyed the elaborate dinner prepared under the supervision of his good wife. Years apparently make no difference in this jolly Philadelphia druggist, who declares that a man is only as old as he feels.

—CHARLES LEEDOM, a prominent organization worker of Philadelphia, has been elected vice-chairman of the Philadelphia Association of Retail Druggists. He succeeds Joshua E. Marsden, who has sold his stores and is now spending some time at his old home at Towanda, Pa. Accompanied by Mrs. Marsden, Mr. Marsden expects to visit the Alaska-Yukon Exposition at Seattle and other points of interest in the West. He may decide to again embark in the retail drug business if he sees a good opportunity in the course of his travels.

### Marriage Mentions.

—F. C. HAUSER, of Covington, Ky., was married recently to Miss Lillian M. Brown, daughter of the late County Judge Martin Brown, of Newport, Ky.

—CHAS. H. DAWSON and Miss Pearl Hall were married at the home of the bride's parents, Hastings, Mich., by the Rev. Mr. Van Auken. The couple will live in Ann Arbor, where the bridegroom is a member of the firm of Dawson Bros., druggists.

—GEORGE W. STANGMANN, a well-known druggist of Mt. Auburn, Cincinnati, was married last week to Miss May Anna Dinkle, of Hamilton, Ohio. Rev. G. Z. Medding, of Hamilton, performed the ceremony. The bridal pair will reside in Harrodsburg, Ky.

—FRANK L. BLACK, a popular clerk in the drug store of Hyndson, Westcott & Co., Franklin and Charles streets, Baltimore, has entered the ranks of the benedictes, having married Miss Alice Evelyn Richter, on June 9. Rev. John B. Ensor, of Madison Avenue M. E. Church, performed the ceremony. Mr. Black is back again at work after a trip to Atlantic City.

—RUFUS G. HINTON, of New York, associated with the special formula department of Parke, Davis & Co., is to be married soon to Miss Caroline Clark, of Hartford, Conn., and daughter of President Clark of the Aetna Fire Insurance Company. A reception given at Miss Clark's home last week, to announce the engagement, was an event in Hartford society circles.

## FIGHTING FOR CONTROL.

### Affairs of Upjohn Co., of Kalamazoo, Mich., Taken to Court—Family Differences Said to be the Cause.

KALAMAZOO, Mich., June 19.—A bitter fight for control of the stock of the Upjohn Company, manufacturing chemists, has been temporarily held up by an injunction issued by Judge Knappen in circuit court.

Dr. J. T. Upjohn, treasurer of the company, and Dr. Frederick Upjohn, vice-president and New York representative, are lined up on one side, while Dr. William E. Upjohn, president of the company, constitutes the opposing force.

Family differences outside of business and involving social relations also are reported to have become so acute that the brothers have not spoken to each other for months beyond the necessary words of business.

Both sides, it is claimed, have for a long time exerted their efforts to secure supremacy in the company. The brothers have a controlling interest in the business since it was started. Some of the stock, however, has been in other hands and the present trouble is said to have begun when Dr. William E. Upjohn tried to secure a sufficient amount of stock, held in the treasury, to give him control of the concern.

When the two brothers learned of the efforts of Dr. William E. to overcome their supremacy, they took the matter into court for adjustment.

The injunction, it is said, prevented matters from reaching a crisis on the date when the annual meeting of the company was scheduled to be held, but which was adjourned for 30 days, when the injunction is returnable.

The Upjohns are reticent, but Dr. J. T. Upjohn is credited with the statement that through purchases of certain outstanding stock he and his brother, Dr. Frederick L., are now in control of the affairs of the company.

The injunction prevents voting the stock in any direction until after the present difficulties are adjudicated.

It is stated that the present troubles, which grew out of differences of long standing, will not result in a reorganization of the company, although a decision in favor of either side will likely result in the case going to a higher court for adjustment.

The company is on an excellent financial basis.

### Bride and Groom Escape in Automobile.

MILWAUKEE, June 19.—That "the best laid plans of mice and men gang 'aft astray" is the opinion of Ottmar T. Beck, well known Milwaukee druggist. For two years revenge had looked sweet to Mr. Beck, but just as he was about to grasp it, he was foiled. Alvin E. Peters, partner of Mr. Beck, was to have been the object of the revenge, but he foiled the well-laid plans by marrying Miss May Fogg 36 hours before the time originally set. Immediately after the ceremony, Mr. and Mrs. Peters slipped out of the city in an automobile on their wedding trip, leaving Mr. Beck a sadder but a wiser man.

Cause for Druggist Beck's thirst for revenge was due to the fact that Mr. Peters was the leader of a party of friends who two years ago kidnaped him from his bride of a few hours and kept him in dire captivity for two long days.

### Riker's Camera Man a Suicide.

SALAMA DU GHAN, an Arabian, 50 years old, who was at the head of the photographic department of Riker's drug stores in New York City, killed himself Sunday night in the darkroom of the Riker store at Eighteenth street and Fifth avenue, Manhattan, by taking cyanide of potassium. Du Ghan was once a guide in Egypt and was a skilled linguist. He was a lecturer, but this year he could get no engagements. He leaves a widow. She said that of late he had been despondent.

### North Dakota Dry for July Anyway.

FARGO, June 19.—Liquor cannot be sold legally in North Dakota during the month of July as all druggists' permits expire on July 1 and druggists cannot make applications for permits under the new law until after that date. As it takes thirty days to secure a permit under the new law, all druggists will be compelled to discontinue sales of liquor for a month at least.

## LIVELY CONTEST FOR STATE BOARD MEMBER.

Pharmacists in Brooklyn Borough Straining Every Effort in Election Which is in Progress Today.

The campaign for the election of a Brooklyn member to the State Board of Pharmacy, which takes place today at the Brooklyn College of Pharmacy, has been going along lively for the past week.

The campaign committees of the various pharmaceutical organizations in the borough have had several meetings and have also issued letters to every druggist setting forth the qualifications of the respective candidates.

Dr. William C. Anderson, dean of the Brooklyn College of Pharmacy is the choice of the Kings County Pharmaceutical Society and has the backing of a large following associated with the society and its college.

William T. Creagan is the candidate of the Brooklyn Pharmaceutical Association and is also indorsed by the Greater New York Pharmaceutical Society.

During the past few days members of the campaign committees have been making individual calls upon the eligible voters in their districts and listed those who need relief clerks or have limited time. All such will be provided with the necessary help, switched from place to place in automobiles in charge of the several committees and it is safe to predict that a large vote will be polled, while an exciting time also appears evident judging from the high tension and the activity displayed on both sides.

### Interborough Phar. Association Elects Officers.

The nominating meeting of the Interborough Pharmaceutical Association was held last Saturday in the New York College of Pharmacy. There was a very large and enthusiastic attendance. Following are the names of the officers voted upon and elected for the ensuing year at the annual meeting held yesterday: President, A. J. Bauer, Manhattan Borough; first vice-president, Dr. Thos. Raymo; second vice-president, Chas. Keale; third vice-president, H. B. Cook, all of Brooklyn; secretary, Dr. Curt P. Wimmer, Manhattan Borough; treasurer, G. F. Hammond, Brooklyn; directors, H. A. Herold, Manhattan Borough; Dr. Henry Goeckel, Manhattan Borough; William Hoberg, Brooklyn; Lawrence Zurlo, Brooklyn. An assessment of twenty-five cents was levied upon the members.

### Chemists Will Be Elaborately Entertained.

DETROIT, June 19.—The Society of Detroit Chemists has elected the following officers for the ensuing year: President, Dr. F. T. F. Stephenson; vice-president, L. D. Vorce; secretary, H. C. Hamilton; treasurer, W. D. Mainwaring.

The society has its plans well in hand for the reception and entertainment of the delegates to the national convention of the American Chemical Society, which will be held here June 28 to July 2. An attendance of nearly 400 is looked for, and something elaborate in the way of entertainment is planned. The local society has secured the use of the Central High School auditorium for the convention.

### Receiver for a Drug Store in Baltimore.

BALTIMORE, June 19.—A decree was signed last Thursday in the Circuit Court by Judge Heuveler, appointing Edward L. Ward receiver for the drug store of Christian G. Latterer. The petitioner in the case was Louis F. Franz, who alleges that he owns the store, but that Latterer, who is his brother-in-law, has taken possession of the place and refuses to surrender it. Mr. Franz says he bought the store on August 10, 1903, for \$3000, and put Latterer in charge because he is not a licensed druggist. Latterer, he avers, contributed only \$50 to the acquisition of the place.

### Misbranded Mineral Waters to be Exposed.

WASHINGTON, D. C., June 19.—The chemists of the Department of Agriculture are now devoting much of their time to the analysis of many so-called mineral waters. The progress thus far made shows that many of the widely sold and advertised waters do not contain the medicinal properties claimed for them. Others have been found which are entirely devoid of any medicinal substances whatever. So soon as the examinations are completed action will be taken under the misbranding clause of the Pure Food Law.

## GROUP PICTURE OF THE NEW JERSEY STATE PHARMACEUTICAL ASSOCIATION, LAKE HOPATCONG.

MOUNT ARLINGTON, N. J., June 19.—The thirty-ninth annual meeting of the New Jersey Pharmaceutical Association recently held at Lake Hopatcong, was one of the most successful in recent years and evidenced clearly the greater interest which pharmacists in general are taking in organization work, while the ethical and professional features were fully up to the standard of former years, there being a large number of very valuable papers submitted devoted to practical technical subjects. About 175 members and their friends attended the sessions which were held in Hotel Breslin.

President George H. Horning, in his address, commended

the propaganda campaign of the N.A.R.D., and recommended that the annual dues be contributed to aid in financing the work and also the appointment of a special committee to assist the N.A.R.D. contingent in covering the smaller local fields. The recommendations were adopted, as was also Mr. Horning's declaration against any increase in either the annual dues or initiation fees.

Secretary Frank C. Stutzlen announced in his report that the association membership was as follows: Active, 626; associate, 89; honorary, 17; total, 723; not included in this report but elected later were: 37 active, 10 associate, and 5

GEORGE H. HORNING, of Elizabeth, retiring president of the New Jersey State Pharmaceutical Association.

GEO. M. ANDREWS, of Woodstown, newly elected president of the New Jersey State Pharm. Assn.

FRANK C. STUTZLEN, of Elizabeth, for the twelfth time elected secretary of the New Jersey State Pharm. Assn.

honorary members. During the year 4 resignations were accepted and the deaths of 9 members recorded.

Treasurer James C. Field submitted a detailed statement showing total expenditures of \$1859.54 and a balance in assets amounting to \$1657.41, exclusive of about \$700 lost in the Monmouth Trust Co.

#### Would Co-operate With State Medical Association.

David Strauss, chairman of the legislative committee submitted a very complete report containing several important recommendations which were approved. Mr. Strauss requested that the committee be empowered to expend sufficient funds to keep every member posted on the various bills coming up in the legislature, contending that this method would bring results when required. Another important feature recommended in the legislative report and also adopted was that the committee be permitted to combine or confer with the legislative committee of the State Medical Association.

In the report of the trade interests' committee, the work during the year in connection with the agitation for the telephone slot-machine was well covered, and Stephen D. Woolley, chairman, advised that the campaign to make the slot-telephone more general, be vigorously continued and that it again be the principal task of the committee this year.

The committee on awarding the U.S.P. prize presented annually by the A.P.A., for the best paper presented at the State meeting announced Henry Schmidt of Elizabeth as winner. The title of Mr. Schmidt's paper was "Practical Application of the Propaganda for Reform in Using Ethical Preparations Instead of Nostrums," and was read at the meeting last year.

The report of the committee on free scholarship in the New Jersey College of Pharmacy announced that 9 men and 1 woman were candidates at the examination which was won by Edward Fotheringham with an average of \$42.5.

In the matter of adding a pre-requisite clause to the pharmacy law there was a spirited discussion and finally power was given the legislative committee to draft such a measure which will be submitted to the executive committee for approval. Instructions were given the committees to have the bill introduced at the next session of the legislature.

#### Interesting Lectures and Excellent Papers.

A very interesting feature of one of the sessions was the address of Dr. Clement B. Lowe, of Philadelphia, who was later elected to honorary membership, on "First Aid to the Injured and Hemorrhages." Dr. Lowe interspersed his remarks by practical demonstrations, showing how to apply bandages and check flows of blood; also dwelling at length on the use of antiseptics. The address was a very exhaustive one on the subject and covered many phases of special importance to the pharmacist in treating accident cases.

Following are the titles and the names of the authors of the papers presented at the regular sessions: "The Rapidity of Volatilization of Camphor," by Charles H. LaWall; "The Self-Adjusting Pill-Roller and Finisher," by Walter Ruch; "Syrup of Horehound," by George M. Beringer; and the following five by Dr. Philémon E. Hommel, "Should Phenolphthalein be Recognized by the U.S.P. as a Therapeutic Agent," "Linimentum Champhora," "Capsella Bursa Pastoris," "The Senna Syrup," and "Should Glycerium Umi Become Official."

The following papers, submitted to the committee on U.S.P. revision were also presented and read before the meeting: "Official Synonymy," by George M. Beringer; "Ointments and Cerates," by George H. White; "Troches That are Official and Some That Should Be," by George M. Beringer, Jr., and H. D. Kresze; "Compound Tincture of Gentian," by Bloomfield Hulick; "Some of the Syrups of the U.S.P. and the N.F.," by George M. Beringer and George M. Beringer, Jr.; "Notes on the Volatile Oils of the U.S.P.," by Charles H. LaWall; "Plasters of the U.S.P.," by Fred B. Kilmer; "Some of the Improvements Proposed in the Revision of the N.F.," by George M. Beringer.

The following were elected to honorary membership: Dr. A. B. Lyons, of Detroit, Mich.; Prof. Wm. M. Seabury, of San Francisco, Cal.; Prof. C. Lewis Diehl, of Louisville, Ky.; Dr. Clement B. Lowe, of Philadelphia, and Prof. Oscar Oldenberg, of Chicago.

The date and place of holding the next meeting were not definitely decided upon, but the matter was referred to the executive committee with power. Cape May seemed to have

the preference of the delegates and will probably be chosen if suitable arrangements can be made. The officers chosen for the ensuing year are:

President, George M. Andrews, Woodstown; first vice-president, T. S. Armstrong, Plainfield; second vice-president, Henry Schmidt, Elizabeth; secretary, Frank C. Stutzlen, Elizabeth; treasurer, James C. Field, Plainfield; executive committee, T. S. Armstrong, G. H. Whipple, E. R. Sparks, Edw. Ziegler, Chas. W. Holzhauser, legislative, H. A. Jordan, Lewis W. Brown, Stephen D. Woolley, Joseph G. Smith, David Strauss; trade interests, S. D. Woolley, John C. Gallagher, Jos. G. Smith; publication, George H. Hornig, Frank C. Stutzlen, E. J. Sayre, David Strauss, W. P. Rich; queries, Dr. P. E. Hommel, George M. Beringer, Jr., Henry Schmidt, A. F. Marqueler; U.S.P., Geo. M. Beringer, H. C. Field, C. H. LaWall; adulterations, S. M. Marqueler, Chas. F. Dare, George F. Deacon; U.S.P. prize, E. B. Jones, E. R. Sparks, George H. White; publicity, Frank C. Stutzlen, George M. Beringer, L. L. Staehle; memorials, H. A. Jordan, H. M. Smith, Edw. Ziegler; membership, P. Rich, Theo. Drake, Jos. G. Smith; delegates to the U.S.P. convention, George M. Beringer, H. J. Lohmann, G. H. White; alternates, E. B. Jones, Charles Holzhauser, Harry H. Deakney.

#### State Board of Pharmacy Report.

Secretary Henry A. Jordan reported on the doings of the Board of Pharmacy for the past year stating that the law had been vigorously enforced but the number of violations showed a decrease compared to the number of the previous year. Out of 578 applicants for licenses who were examined, 164 had been successful, bringing the total of registered men in the State up to 2425, of which 137 were qualified assistants and 2308 registered pharmacists.

Treasurer David Strauss reported receipts of \$4701.40 and disbursements amounting to \$3867.21, with a balance turned over to the State Treasurer of \$834.19.

The reorganization of the board for the ensuing year resulted in the election to the presidency of George H. White, of Jersey City, and the re-election of Henry A. Jordan, of Bridgeton, and David Strauss, of Newark, as secretary and treasurer respectively.

#### Organization of an Auxiliary by the Fair Sex.

The Women's Auxiliary was organized the evening previous to the calling of the meeting, with a membership of 30, and will act both as an adjunct to the State association and in connection with similar auxiliary bodies throughout the United States at the national conventions. The officers elected were: President, Mrs. George H. White, of Jersey City; first vice-president, Mrs. Henry A. Jordan, of Bridgeton; second vice-president, Mrs. Frank C. Stutzlen, of Elizabeth; secretary, Miss E. Areta Johnson, of Penns Grove; treasurer, Mrs. Stephen D. Woolley, of Ocean Grove. The ladies took a prominent part in the entertainment features during the meeting and demonstrated their ability to please in no little degree. Great enthusiasm was shown in the new organization and its success is undoubtedly assured.

#### Winners in the Sporting Events.

The prize winners in the various sports were as follows: Ladies' bowling, first prize, Mrs. Frank C. Stutzlen, second, Mrs. Louise L. Staehle; baseball, druggists, batting prize, David Strauss; fielding prize, F. C. Stutzlen; salesmen, W. N. Passapae, H. J. Edgar; standing board jump, first, Harry W. Crooks; second, W. P. Webber; third, R. S. Sherwin; fourth, W. N. Passapae; 100-yard dash, first, W. J. Coughy; second, W. P. Webber; third, W. N. Passapae; fourth, J. Pinkinson; putting 12-pound shot, first, Chas. W. Holzhauser; second, H. W. Crooks; third, F. M. Egger; fourth, W. S. White; pitching quoits, first, A. B. Crooks; second, H. W. Crooks; third, J. D. Case; fourth, R. S. Sherwin.

#### Druggists Decorate for Knights Templar.

SYRACUSE, N. Y., June 19.—Druggists were in no way outdone by other merchants in the way of decorating for the Grand Commandery of the Knights Templar this week. C. W. Snow, of C. W. Snow & Co., a member of Central City Commandery No. 25, was one of the active Sir Knights who served on the committees that made the event a big success. There were 4000 Knights Templar in the city and thirty visiting bands were in the parade. The druggists found the conclave a great boom to business. Almost without exception the stores were well decorated and in front of many of the pharmacies were large electrical designs in varied colored lights, showing different Knights Templar emblems. Thousands of people from the surrounding towns came in to witness the big parade and soda dispensers and drug clerks were kept busy waiting on them.

## ALABAMA STATE PHARMACEUTICAL ASSOCIATION DEMANDS MAKING OF NEW PHARMACY LAWS.

JOHN T. ROE, of Mobile,  
first vice-president of the Alabama State  
Pharmaceutical Association.

LEE WHORTON, of Gadsden,  
elected president of the Alabama State  
Pharmaceutical Association.

W. P. THOMASON, of Guntersville,  
second vice-president of Alabama State  
Pharmaceutical Association.

GADSDEN, Ala., June 19.—Samuel A. Williams presided at the recent 28th annual convention of the Alabama State Pharmaceutical Association which was well attended and proved very successful. The addresses of welcome were delivered by Mayor W. T. Murphree and W. P. Thomason of Guntersville, president of the Northeast Alabama Druggists' association. The response was made by J. T. Roe of Mobile.

Dr. C. L. Murphree of Gadsden read a paper on U.S.P. and N.F. preparations.

A discussion of the pharmacy laws of the state was precipitated over the appointment of a special committee, consisting of W. E. Bingham chairman, C. T. Roff and S. A. Williams, to draft a pharmacy bill which would incorporate the ideas of the druggists of Alabama.

Mr. Bingham scored the country merchant and physician for selling morphine, cocaine and their derivatives and the travelling salesmen who abetted the practice. He explained the trouble with the present law and the manner of its passage.

Decidedly the liveliest feature was the talk of P. C. Candious, of Mobile. All Mobilians lead up to the prohibition question no matter what the discussion and Mr. Candious was no exception. "In plain English," he said, "that legislature was a set of fools. They went to Montgomery with that prohibition business in their heads and never took the proper notice of other important matters." He wanted two bills, one a general pharmacy law and the other to cover the sale of poison.

Officers were elected as follows: Lee Whorton of this city, president; J. T. Roe, of Mobile, first vice-president; W. P. Thomason, of Guntersville, second vice-president; W. E. Bingham, of Tuscaloosa, secretary; F. F. Ravencroft, of Union Springs, treasurer. All of these gentlemen accepted the honors in brief speeches expressing their appreciation.

The naming of a delegate to the meeting of the N.A.R.D. at Louisville was left to the president. The 1910 meeting will be held at Mobile, in June, during the Confederate reunion.

The entertainment features were interesting and the visitors

F. F. RAVENCROFT, Union Springs,  
re-elected treasurer of Alabama State  
Pharmaceutical Association.

W. E. BINGHAM, of Tuscaloosa,  
re-elected secretary of Alabama State  
Pharmaceutical Association.

had a royal good time. There was an evening concert of the Alabama State Music Teachers' Association, a banquet and reunion, an outdoor entertainment at Elliott Park and a reception for the ladies of the association at the home of Mrs. E. H. Cross in Turrentine avenue. Lee Whorton was chairman of the local committee and was ably assisted by his fellow pharmacists.

#### W. C. Kirchgessner is Chosen President.

GRAND RAPIDS, Mich., June 21.—The Grand Rapids Drug Club, which now includes nearly every druggist in the city, has elected the following officers: President, W. C. Kirchgessner; secretary, William Tibbs; treasurer, Roland Clark; directors, John de Kruif, Henry Reichel, O. A. Fankboner. It was decided at the meeting to attend the annual convention of the Michigan State Ph.A. in a body, going to Detroit this week by special car via Michigan Central.

## DRUGGISTS UPHOLD OHIO STATE BOARD.

### Cedar Point and Los Angeles Meetings Are Discussed. Officers Nominated to Be Voted on in July.

CLEVELAND, June 19.—President Schmeurer presided at the June meeting of the Northern Ohio Druggists' Association which was held in the lecture room of the Cleveland School of Pharmacy. The members decided that all retail druggists should uphold the State Board of Pharmacy in ridding the calling of illegitimate and unfair competition.

The Cedar Point meeting of the Ohio association was discussed, and ways and means of getting a large delegation from Cleveland were considered. The annual outing was then taken up and the president was authorized to appoint a committee to take entire charge of the matter.

A letter from the Los Angeles R.D.A. contained an urgent invitation to partake of California hospitality at the meeting of the A.P.A. next August. It was agreed that every druggist who can do so should take this opportunity of seeing the great Westerland. Prof. J. H. Beal, it was stated, is gathering a carload from Ohio and Cleveland will probably be represented in the party.

Officers for next year were nominated as follows: For president, J. H. Sauer and J. G. Schmeurer; for first vice-president, A. L. Flammeyer and J. G. Reed; for second vice-president, Emil Petersilge; for secretary, H. V. Army; for treasurer, George J. Hoehn. Votes will be counted at the July meeting.

### Commencement of Cincinnati C.P.

CINCINNATI, Ohio, June 19.—A very successful graduation of the Cincinnati College of Pharmacy was celebrated at the Grand Hotel. Addresses were delivered by Professor C. T. P. Fennel, Professor John Uri Lloyd, Dr. F. B. Dyer, Superintendent of the Cincinnati schools; Dr. G. Strobach, Stanley Bowditch and Dr. John Otis. The graduates are:

Ellis Robert Bader, James Cleveland Blake, Alfred D. Conley, Amos F. Creager, John Luke Duffey, Harley H. Dunn, William Ed. Foertmeyer, J. Frank Gallaher, Albert Frank Haefner, Edwin James Hemmaway, Charles Bruen Johnson, John James Kennedy, Louis Kettmann, Mark Allen Kidd, Albert Paul Krause, Floyd Leroy Matthews, Erma Mabel Moore, Guy James Payne, Irl R. Pope, Stanley Ed. Roth, Edward C. Schaefer, William H. Schuchardt, George Sintz, Anna Smedley, Benjamin Franklin Steinko, Shelby A. Stirn, William Amos Todd, Tremer W. Tompkins, Gordon A. Triplett, Albert Curtis Welles, Jesse E. Welsheimer, and Judson T. Wilkes.

Matthias Klaiher, Jr., and Edwin N. Niederhofer were given the degree of pharmaceutical chemist. Erma Mabel Moore, of West Mansfield, Ohio, was awarded the prize in botany. Mark Allen Kidd, of Batavia, Ohio, was given the college medal, and other prizes were awarded to Louis Kettmann, of Cincinnati; Harley H. Dunn, of Morrow, Ohio; Shelby A. Stirn, of Ottsville, Ohio; Jesse E. Welsheimer, of Greenfield, Ohio; Albert Curtis Welles, of Latonia, Ky., and J. Frank Gallaher, of Franklin, Ohio. A college supper by the faculty to the graduating class was a feature of the evening.

### Enforcing Ohio Pure Drug Law.

COLUMBUS, June 19.—Druggists all over Ohio have received from the State Dairy and Food Commissioner a letter specifically setting forth what the department will recognize as the standard in certain drugs and articles of sale, and also calling attention to the misbranding of patent or proprietary medicines.

Regarding the matter of what shall be delivered when Hoffman's anodyne is called for, regarding which there has been much confusion and an inability to agree among druggists, the letter says that in the future this must be taken as meaning compound spirits of ether and nothing else, and druggists are warned that the department will recognize no other preparation.

Attention is called to the fact that druggists must keep in stock sweet spirits of nitre in accordance with the provisions in the eighth edition of the United States Pharmacopoeia and that it must be stored in small vials remote from light or fire.

### Ohio Travelers to Entertain State Ph.A. Members.

TOLEDO, June 19.—Secretary F. W. C. Diebel, of the Ohio State Ph.A., has sent out programmes of the entertainment prepared by that association for the annual meeting of the Ohio State Ph.A. at Cedar Point July 13 to 16. Judging

from the large increase in membership, this year's meeting will prove a record-breaker. The travelers are again giving the boat ride that proved so successful last year and those who were fortunate enough to take it are still talking about the fine ride. The boat will leave Cedar Point and pass up one side and down the other of all islands of any size, Put-in-Bay, Middle Bass, Famous Gibraltar, Ballast Isle, Sugar Island, Old Hen and Chickens, Pelee Island, and North Bass, a distance of 60 miles. A special feature of this year's entertainment will be the amusement furnished the children, one afternoon being given to them by the Cedar Point Company.

### Banquet and Election of Minnesota U.C.P. Alumni.

MINNEAPOLIS, June 19.—The fifteenth annual meeting of the Alumni Association of the College of Pharmacy, State University, was held at the college building. The following officers were elected: President, Nelson W. Root, '09; vice-president, Emily L. Lyman, '09; secretary, A. E. Lovdahl, '08; treasurer, A. G. Erkel, '02; delegates to the General Alumni Association, A. G. Erkel and Oscar Bloomo, '08; *Alumni Weekly* representative, Gustav Bachman; delegate to the Minnesota State Ph.A., Dean F. J. Wulling; toastmaster, Frederic K. Butters; poet, Theo. Fratzke, '09; sergeant-at-arms, Harry W. Speidel, '09. Resolutions were passed pledging support of the faculty in its endeavor to remodel and thoroughly equip the newly acquired Millard Hall.

The fifteenth annual banquet occurred at the Nicollet Hotel. About forty were present. A. G. Erkel acted as toastmaster. The speakers were Nelson W. Root, '09; Richard H. Puhl, '08; B. H. Nichols, '06, and W. F. Passer, '04. A. E. Lovdahl, '08, read a paper by Irving Robitschek, '05, in which the writer cited instances illustrating that the training students receive in the College of Pharmacy fits them for responsible, original and research work.

Miss Halverson and Miss Foster gave piano selections. Dean Wulling spoke on the future of the college.

### Minnesota University C. P. Commencement.

MINNEAPOLIS, June 19.—At the fifteenth annual commencement of the College of Pharmacy, University of Minnesota in the University Armory, Prof. Maria L. Sanford, who retires after thirty years of active service in the College of Science, Literature and the Arts, delivered the commencement address. She was introduced by President Northrop. She dwelt particularly upon the University as an important factor in the development of the State and its people. The exercises were interspersed with music by a military band. The names of the graduates appeared in the ERA of June 3, page 515.

### Vigo County Druggists Name Officers.

TERRE HAUTE, Ind., June 19.—Election officers for the ensuing year and hearing reports that showed the organization to be in a prosperous condition, claimed attention at the annual meeting of the Vigo County Retail Druggists' Association in the Commercial Club rooms. Officers elected were: Burton Cassidy, West Terre Haute, president; Otto Kadel, vice-president; Fred Black, secretary, and Bert Rines, treasurer. President Cassidy appointed C. Averitt and W. C. Buntin on the executive committee. Later the members went to a ball game in Athletic Park.

### State Prison Sentence for Perjury.

JACKSON, Mich., June 19.—John C. Berridge has been received at the prison from Van Buren County on a sentence of from eighteen months to five years for perjury in swearing to false reports to sales of liquor. Berridge is a druggist, the first to receive a State prison sentence for violation of the liquor laws.

### Burglars Stole Money and Metal.

BALTIMORE, June 19.—A. B. Glascock, who conducts a drug store at 3123 West North avenue, formerly the property of Harry Farrow, was robbed of \$27 in money and some weights on the night of June 15.

### Drawback Allowance on Pills.

WASHINGTON, June 19.—The Treasury Department has granted a drawback on pills and tablets manufactured by Sharp & Dohme, Baltimore, with the use of imported sugar.

## VALUE OF CLINICAL AND MEDICAL CHEMISTRY.

## F. E. Niece Urges Upon Pharmacists the Advantages of Adding This Specialty to Regular Business.

The subject of chemical and bacteriological analysis as an adjunct to the profession of pharmacy and especially adapted as a line for the retail druggist was discussed at the meeting of the New York Branch of the American Pharmaceutical Association of June 14. A paper, "The Pharmacist, the future Clinical Chemist," devoted to its consideration, was read by Frederick E. Niece, who supplemented his remarks with numerous demonstrations and experiments showing how some phases of the work should be done. He advised the pharmacists to make all haste in turning their efforts toward securing the necessary apparatus with which to do urine, sputum, milk and various other analyses, before this line of work was absorbed by the large commercial laboratories.

The value of clinical and medical chemistry, said Mr. Niece, was just becoming appreciated and was really an outgrowth of pharmaceutical chemistry, and would in time yield lucrative returns to the pharmacist who grasped the opportunity and secured a clientele of physicians, who as a class were more than willing to turn over this work to a careful pharmacist.

Ten plates containing cultures secured from candy, soda water, ice cream sandwiches, Croton water, air and various other sources, were shown and commented upon by Mr. Niece. From microscopical observation and subsequent determinations, Mr. Niece quoted figures showing a larger number of bacteria in distilled water than in Croton water, while in one quart of pasteurized milk, obtained from a large dealer in the Bronx, his calculation showed 50,015,000 bacteria. A stained slide of tubercular bacilli was also prepared and the specimens were viewed by those present through the microscope fitted with an oil-immersion lens.

Passing from the subject of bacteriology, various tests were carried out on samples of urine for albumin, urea, sugar, acetone, indican and blood. Besides the tests, the working of various apparatus, of which there was a tableful, was also explained by Mr. Niece and his assistant, W. A. Williams.

Both gentlemen were requested to appear before the branch again when their time permitted, and much enthusiasm was shown when a vote of thanks was given to them. The paper was ably discussed by Dr. Joseph Mayer and Otto Raubenheimer, who concurred with Mr. Niece that the time is ripe for the development of this branch of work by the pharmacist in conjunction with his other duties as a pharmaceutical chemist. An extended discussion was prevented by the limited time.

Thos. D. McElhenie read a short but very interesting paper on "Mistura Rhei et Sodae, U.S.P.," which appears on page 587 of this issue of the ERA. In the discussion of the paper, Mr. Raubenheimer objected to the preparation of this mixture by using hot water to dissolve the sodium bicarbonate.

Dr. George C. Diekmann, chairman of the committee on pharmacy, reviewed and criticized several articles from foreign journals and submitted a very complete report on the month's progress in pharmacy.

George H. Hitchcock reported on the recent joint meeting of the branch with the County Medical Society, and announced that the papers read at the meeting were scheduled to appear in the July issue of the *Journal of the New York State Medical Association*.

Dr. George C. Diekmann, Hugo Kantrowitz and Hugh Craig were appointed delegates to the N.Y.S.Ph.A. meeting.

## HOSPITALITY FOR N.A.R.D. DELEGATES

## New Features Planned to Make Louisville Convention of More Than Usual Interest—Big Crowd Expected.

LOUISVILLE, June 19.—Preparing for the annual convention of the National Association of Retail Druggists, to be held here the week beginning September 6, a meeting was held at the Commercial Club recently by the executive committee for the purpose of perfecting plans for the entertainment of the visitors.

The executive committee is formed of the chairmen of the various committees in this city. Those composing the committee are, Simon N. Jones, chairman; Charles P. Frick, E. H. Witselshofer, Horace Taylor, T. P. Taylor, E. G. Isaacs, Curt Krieger and Paul J. Kranz.

Entertainment is being outlaid, and the knights of the pestle and mortar expect to show the visiting members a fine time.

One example of Kentucky generosity will be the furnishing of elaborately engraved and quite expensive badges to each of the 1500 members expected to attend the convention, while in the case of other conventions the badges were sold to those attending conventions.

Twenty-eight booths occupied by manufacturing druggists' supplies will glitter in a blaze of illumination on The Seelbach roof garden, and the carnival festivities will be held there, besides other entertainments in the city.

In order that all exhibitors may have equal opportunities of displaying their goods to the best advantage, each of the booths will front upon a spacious aisle. The committee on exhibits has determined not to place any exhibits in the convention hall proper, and this has reduced the number of available spaces. The booths will be erected free of cost to exhibitors, except their own decorating.

Everything indicates that the attendance at the convention will be large, especially from the surrounding States and from points south of the Ohio River. Only one convention has been held in this territory—at Atlanta—and a great deal of effective organization work has been done by the N.A.R.D. during the last three years in the Southern States. Reports from such extreme points as Texas and Florida indicate an unusual representation from these sections.

The local hotel committee suggests to all members who contemplate attending that they communicate direct with the

several hotels and reserve their rooms as soon as possible. However, if upon arrival in Louisville they do not secure the kind of accommodations they desire, the local hotel committee will be in a position to take care of them in first-class boarding houses, apartments, etc. The official headquarters of the meeting will be at the Seelbach Hotel. All meetings of the association, ladies' auxiliary and exhibits will be held there.

The publicity committee of the L.A.R.D. announces that there will be many new features introduced which will detract from the usual monotony of conventions.

At the close of the convention there will be an opportunity of seeing the famous Mammoth Cave of Kentucky, which is a comparatively short distance from the convention city. There will be special railroad rates.

## Druggist Fined for Selling Cocaine.

BUFFALO, N. Y., June 19.—C. Eugene Clark, a Clinton street druggist who pleaded guilty to a charge of selling cocaine without a physician's prescription, was recently fined \$200 by Justice White in Criminal Term of Supreme Court. Clark paid the fine.

## Favors New Michigan Association

H. J. CRAWFORD.

of Ithaca, Mich., recently elected president of the Graftiot County R.P.A., is cashier of the Commercial State Bank, in addition to his pharmacy interests. The association has voted to take out no Federal liquor tax certificates after July 1, and to cut out its sale entirely.

President Crawford said recently: "The reorganization of the Graftiot County druggists is contemplated as a nucleus for a State organization of the retail druggists of Michigan. With all due respect to the State Pharmaceutical Association, what we need in Michigan is an organization of business men, men with energy and brains enough to protect themselves from such laws as our recent liquor measure."

## GALA DAY FOR PHILADELPHIA DRUGGISTS.

### Annual Outing and Field Day at "The Orchard" Proves to Be a Very Enjoyable and Successful Affair.

PHILADELPHIA, June 19.—The annual outing and field day of the drug trade—the joint effort of Chapter No. 6, W.O.N. A.R.D., the P.A.R.D., and the Drug Club—at Essington yesterday was quite the success anticipated. "The Orchard" at Essington along the Delaware River a few miles below Philadelphia is the summer home of the Athletic Club of Philadelphia and is famed for its beauty, its many enjoyable facilities and its cuisine. Needless to say the representatives of the drug trade enjoyed all of these attractions to their utmost and from the time the special train pulled out of the station at Twenty-third and Chestnut Streets at 10.15 a. m., until the last good nights were said there was not a dull moment.

Shortly after lunch, the game of ball between the retail druggists and the members of the Drug Athletic Association was announced. William A. Johnson marshalled the forces of the latter and Frank W. Fluck, president of the P.A.R.D., captained and pitched for the "pill rollers." Although there was some clever playing on both teams, from the standpoint of the spectators, the umpiring of Edward T. Hahn and C. M. Pletcher was the feature. "Eddie" opened the game by announcing in a clever speech that he wished to present to Captain William "Annianus" Johnson, a pair of gloves to wear during the game. The latter were of the kind worn by pall-bearers but they were accepted in the same spirit as marked the presentation. The superior training of the athletes was too much for the druggists and the latter lost.

Next came the turn of the ladies who showed no little skill and wonderful activity in the series of contests that had been arranged. In the potato race, Mrs. H. Ross won over a large field of contestants. Mrs. Frank W. Fluck took the egg and spoon race with an ease and grace which captivated the spectators. She was second in the potato race. Mrs. J. J. Kelly was second in the egg and spoon race and Mrs. Dobson was third. The latter won the candle race with Mrs. Brown second and Mrs. Fluck third. The race for misses, fifty yards, was an exciting event and was won by Miss Whisler with Miss Miller second and Miss Hahn third. A similar sprint for the married women was won by Mrs. Kelly with Mrs. Dobson second and Mrs. Miller third. Mrs. Brown won the shuffleboard match, with Miss Hahn second, Mrs. Hammoecker third and Mrs. Reid fourth.

Some of the matrons were backward in admitting their avoirdupois by entering the stout women's race. The ease with which Mrs. Fred R. Keller won over some of her lighter opponents provoked great applause. Mrs. George W. Fehr was second and Mrs. Philip Goll was a close third. Mrs. Fehr showed her muscle in the next event, the nail driving contest, winning by a fraction of a second from Mrs. Frank W. Smith and Mrs. Kelly. The courtesy race, in which couples had to "run a bit, smoke a bit and eat a bit" was very exciting as well as the most laughable. Charles Leedom was the dark horse and with Mrs. Osterlund as a partner he easily carried off first honors. J. H. Barlow and Miss Hahn were second, while Eddie Hahn with Mrs. Willis would have won had it not been for his well-known generosity. In this instance Mr. Hahn lost a few seconds by stopping to give an imaginary tip to a visionary waiter.

Then the men had an inning. In the fat men's race, Hammoecker galloped home in front of Landis and Pletcher. William Smith showed a clean pair of heels to O. W. Osterlund and C. S. Gill, his nearest opponents in the thin men's race. Barlow and Pletcher, who, it is said, had been practicing all spring in a narrow alley, won the three-legged race. Hammoecker left portions of his anatomy along the trail in the barrel race but won in convincing if not graceful style. Goll won the nail driving contest for the men, with Crawford second and Treasurer Fehr of the P.A.R.D. third. Harry C. Blair, president of the Philadelphia Branch of the American Pharmaceutical Association surprised the spectators by winning the prize for accuracy in throwing the baseball. His throw from center field to the home plate would have made any professional ball tosser envious. Frank Fluck demonstrated his hitting ability in the funco hitting contest, which he won with little trouble.

The judges were D. J. Russo, Frank W. Smith, J. H.

Barlow and C. S. Gill and their decisions were accepted without question. The sports consumed two hours and it was a tired and hungry bunch that gathered in the banquet hall of the club, where a big circular table fairly groaned with the good things which the menu contained.

After dinner Frank W. Smith presented the prizes. One of the busiest members of the party was D. E. Bransome, who in the capacity of chairman of the entertainment committee of the Drug Club as well as a member of the Athletic Club of Philadelphia had double duty to perform. In the evening there was dancing and it was with regret that the party heard the call of "train time."

## NEW YORK R.D.A. SUPPORTS STATE BODY.

### Members Insist that State Association Should Have a Voice in Selecting Pharmacy Board Members.

A special meeting called for the purpose of instructing delegates on various legislative matters likely to be brought up at the annual meeting of the New York State Pharmaceutical Association, was held by the New York Retail Druggists' Association last Friday evening.

The association pledged its unqualified support on legislative affairs to the State body and the delegates were instructed to bring notice of this action before the annual meeting next week. In regard to the selection of members to the State Board of Pharmacy, the delegates were instructed to express only their approval of such legislation in which the pharmacists would retain some control or supervision and to strongly oppose any efforts to bring about the election or appointment of members for the board in such a manner as might subject it to political juggling.

In view of the laws of some States that pharmacies can be owned only by licensed pharmacists and also the law recently signed by Governor Hughes relative to prohibiting corporations from doing a law business unless owned by lawyers, the association went on record as favoring legislation in this State, to permit the ownership of retail drug stores only by licensed pharmacists.

A resolution was also passed urging those not already members of the State association to join at once.

Peter Diamond submitted the final report on the present legislative session and dwelt at length upon the vetoing of the Brown Act, also giving a general review of the situation with regard to the future as well as the past.

Following are the names of the members appointed delegates to the New York State Pharmaceutical Association: Dr. Joseph Weinstein, chairman; Peter Diamond, M. Lucas, J. Goldblatt, M. Dlugash, L. B. Epstein, M. Zagat, H. Glassman, J. K. Bernhard, Ch. Brikovsky, A. Katzman, B. Miller.

Adam A. Moskiewitz was elected to membership and Dr. K. Rosahn elected to honorary membership.

Treasurer Weinstein reported a balance on hand of \$326, and \$75 was contributed to the State Association.

A lunch was served following the meeting.

### Officers Elected by Charleston R.D.A.

CHARLESTON, W. Va., June 19.—At the last meeting of the Charleston R.D.A. the following newly elected officers were installed: J. C. Hall, president; F. G. Klostermeyer, treasurer, and W. C. Price, secretary. Reports from the delegates who attended the meeting of the State Ph.A. at Morgantown were heard. Remarks were made by Messrs. Hall, Krieg and Price. The report of the committee sent before council to have the druggists' license reduced to the old amount of \$25, was received. The committee had been successful in its efforts. A resolution was adopted asking the co-operation of the physicians of the city.

### Boston Elects Delegates to N.A.R.D. Convention.

BOSTON, June 21.—John J. Tobin, of South Boston, J. Arthur Bean, of Somerville, and Col. John W. Low, of the Eli Lilly Company, were elected delegates from the B.A.R.D. at the annual meeting of the association at the Massachusetts College of Pharmacy the past week, to the N.A.R.D. convention at Louisville. One new member was elected. The committee on entertainment reported that the annual outing of the B.A.R.D. would be held on July 21, at some point to be announced later, but probably at Bass Point, Nahant.

## PATENTS, TRADE MARKS, ETC.

## PATENTS.

Granted June 15, 1909.

- 924,654—Arthur C. Fox, New York, N. Y. Alcohol lamp.  
 924,848—Charles O. Smith, Quogue, N. Y. Bottle.  
 925,120—Henry W. Manier, Rochester, N. Y., assignor to Taylor Instrument Companies, Rochester, N. Y., a corporation of New York. Thermometer.  
 925,135—Franklin Rudolph, Winnetka, Ill., assignor to American Can Co., New York, N. Y., a corporation of New York. Jacket can.  
 925,145—George C. Weber, Chicago, Ill. Opening device for receptacles.  
 925,178—Herbert V. Hardman, Belleville, N. J., assignor to Rubber-Bound Brush Company, Belleville, N. J., a corporation of New Jersey. Brush.  
 925,253—Norman L. G. Whitehouse, Lewisham, London, Eng. Process of making ammonia and chlorin or hydrochloric acid.  
 925,330—Sidney J. Graham and Albert E. Fowler, Trout Lake, British Columbia, Canada. Siphon.

## REISSUES.

Granted June 15, 1909.

- 12,974—Conrad Hubert, New York, N. Y. Closure for vessels.

## TRADE MARKS.

Published June 15, 1909.

- 13,220—Ednur Pharmacal Co., St. Louis, Mo., and Kampsville, Ill., assignor to Ednur Pharmacal Co., St. Louis, Mo., a corporation of Missouri. Class 6. A remedy for dyspepsia, biliousness and diseases of the liver.  
 34,591—I. H. Lewkowicz, Sharon, Pa. Class 6. Tooth powder, tooth paste and tooth wash.  
 34,860—Acme Remedy Company, Piqua, Ohio. Class 6. Ointment used as a remedy for tetters, piles, eczema, scrofulous ulcers, burns, scalds, cuts, etc.  
 35,917—William Cooper & Nephews, Berkhamsted, England. Class 6. A liquid disinfectant.

37,824—Blue Ribbon Remedy Co., St. Louis, Mo. Class 6. Poultry powder.

39,161—The Natona Co., Mobile, Ala. Class 6. Iron tonic, tablets for the treatment of dyspepsia and indigestion, cough syrup and antiseptic salve.

39,637—Mechling Brothers Manufacturing Company, Philadelphia, Pa. and Camden, N. J. Class 6. Hyposulfite of soda and sulfid of sodium.

39,786—Scott-Brown Manufacturing Co., Oakland, Cal. Class 6. Scalp remedy.

40,428—J. S. Merrell Drug Co., St. Louis, Mo. Class 6. Liniment.

40,556—William F. Page, Rogersville, Ala. Class 6. Salve.

40,922—Union Wholesale Liquor Co., Chicago, Ill. Class 6. Bitter wine tonic.

41,641—Crude Oil Products Company, Pittsburg, Pa. Class 6. Hair tonic and liniment.

41,938—Frederick Stearns & Co., Detroit, Mich. Class 6. Baby powder, perfumery, face powder and face cream.

42,028—Ogden Pharmacal Co., Ogden, Utah. Class 6. An ointment for topical treatment of inflammations generally, sore throat, headache, catarrh, earache, rheumatism, bruises, cold sores, chapped hands, piles, burns, etc., etc.

## American Medical Association's Officers.

Following is custom of selecting its president a year in advance of his installation, the A.M.A. at Atlantic City named Dr. William H. Welch, professor of pathology at the Johns Hopkins Medical School. The other officers chosen were: Vice-presidents, Robert Wilson, of Charleston; Charles J. Kipp, of Newark; Alexander Lambert, of New York, and Stanley P. Black, of Pasadena, Cal.; general secretary, manager and editor of the *Medical Journal*, George H. Simmons, of Chicago; treasurer, Frank Billings, of Chicago; trustees, M. L. Harris, of Chicago; C. A. Daugherty, of Indiana; William T. Councilman, of Harvard; C. E. Cantrell, of Texas, to fill vacancy caused by Dr. Happe's death.

## Will Have Branch 23 in Syracuse.

SYRACUSE, N. Y., June 19.—The Post Office Department will on July 1 establish Substation 23 of the Syracuse Post Office at Stolz Bros.' pharmacy, at 205 East Genesee street.

## BOARD EXAMINATIONS

### New York—Eastern Branch.

Following are the names of successful candidates who passed the May examinations held by the Eastern Branch of the New York State Board of Pharmacy, at the Brooklyn College of Pharmacy, Address, Borough of Manhattan, New York City, where not otherwise specified:

**PHARMACISTS.**—Maurice Ackerman, Otto Alpers, Isaac Altshuler, Pasquale Aquaro, Philip Barasch, Israel Bass, James J. A. Bauman, Maurer, N. J.; Francis L. Bean, Middletown, N. Y.; Frank J. Beck, Edward W. Benjamin, Brooklyn; Nathan Berner, Samuel Bernstein, Louis Borker, Brooklyn; Ernst F. A. Botcher, George I. Branower, Clarence J. Brett, Meyer Brizgin, Brooklyn; Abram Cohen, Brooklyn; Alexander Cohen, Abraham Cooper, Louis I. Cooper, John E. Denny, Brooklyn; Nathan Ellenberg, Brooklyn; George Erger, Brooklyn; Karl Faaland, Brooklyn; Jacob Feldman, David R. Fraser, Gerald Frucht, Victor Gayda, Vincenzo Giacalone, Jersey City, N. J.; Harry Gluckman, Max Golob, Joseph Gordon, Hyman Grodinsky, Joseph Guardi, Frank Gusman, Brooklyn; Lewis Gussman, Brooklyn; Carl A. Hansen, Herman Hasan, Keren A. Hayunga, David Herschberg, Samuel Hides, Alexander Holzberg, William H. Hulse, Yonkers, N. Y.; Charles G. Judge, Nathan Kantowitz, Brooklyn; Benjamin Karpman, Thomas P. Kerwin, Kurt B. Klebe, Yonkers, N. Y.; Mortimer V. Kleinman, Anthony M. Lacowara, Morris Lipschitz, Leon J. Lindsley, Corey, Pa.; Ralph P. Litchman, David Litvin, Morris Loew, Boris Malisoff, Brooklyn; Anthony Martoccio, Joseph M. Mindel, Noah Minkin, Brooklyn; Wilson B. Morrison, Herman S. Nishevitz, Edward B. Oates, Jr., Paterson, N. J.; Samuel Pearlman, Dominick Martocci-Piesulli, Philip H. Picher, Brooklyn; Constantine G. Psaki, Benjamin Queen, George C. Reed, Morris Regelson, Joseph Reifman, Yonkers, N. Y.; Michael Roenblum, Max Rosoff, Henry Rubinstein, Philip Rudy, Zachary Sagalowitz, Nicholas Salinitro, Henry Schwartz, Meyer Shepard, Benjamin Silberstein, Brooklyn; Marc Singer, Leopold Sisselman, Sister Mary Jeanette (Emma M. Jacke), Jamaica, L. I.; Sister Mary Mildred (Isabelle M. Bonden), Brooklyn; Max Sloane, Jacob Spector, Nathan Spector, Max Spitzer, Brooklyn; Louis Stemple, Brooklyn; Samuel Stoller, Leon Tartak, Nicholas Tow, Siegfried Tow, Meyer Truman, Brooklyn; Howe R. Turnbull, Brooklyn; Harvey Weinschenk, Flushing, L. I.; Frieda Westermayer, Port Chester, N. Y.; Benn Windt, Samuel Wolf, Moses I. Zellin, Brooklyn; John J. Mantte, Henry A. M. Ramsey.

**DRUGGISTS.**—Charles C. Becker, Stapleton, S. I.; Louis Bell, Solomon I. Branower, Lee W. Twigg, Ossining, N. Y.; Henry L. Vincent, Three Mile Bay, N. Y.

The following successfully passed the examinations held on June 16 and 17 at the New York College of Pharmacy:

**PHARMACISTS.**—LeRoy R. Adams, Plainfield, N. J.; Samuel Adler, Charles W. Ballard, Leonard DiNolfo, Nelson Y. Hull, Joseph H. Kaminsky, Brooklyn; John J. Kindergarten, Charles Lutz, Jr., Charles Parker, Moses Sobel, Elde F. Thode, Paul H. Wagner, Cornelius Zeisler, Wm. W. Geety, Theo. A. Jost, Mt. Vernon.

**DRUGGISTS.**—George Baer, Alexander M. Bell, David Rascoe, Jacob L. Seader, James P. McMannus, Caesar LaGambina, Frank Leverich, Peekskill.

### Ohio.

**COLUMBUS, June 12.**—The following passed the examination as registered pharmacists at the May examination held by the Ohio Board of Pharmacy: M. B. Kauffman, Frank H. Buck, Roscoe B. Johnson, Edward N. Webb, Arthur W. Block, Arthur C. May, Columbus; David Lesser, John F. Bartlett, Will Nikolaus, Walter J. Reis, Charles Slezak, George L. Bader, William Rigelhaupt, Walter F. Meyer, Mark E. Treat, Walter H. Penke, John A. Jarmuzewski, S. J. Sternicki, Glenn F. Coleman, Omar C. Joss, Cleveland; Frank J. Kelly, Wm. H. Schuchhardt, Floyd L. Matthews, Louis Kertmann, George Sintz, Guy J. Payne, J. Harry Bruker, Cincinnati; Walter Klappich, Charles E. Conn, Toledo; Glenn G. Arnold, Carl F. Sattler, Lewis D. Brady, Mansfield; Earl H. Reese, Lancaster; Thomas J. McRobert, Xenia; George A. Mercer,

Prairie Depot; J. F. Gallaher, Franklin; J. E. Welsheimer, Greenfield; Paul S. Shipp, Zanesville; Albert C. Wells, Latonia, Ky.; Benj. H. Covert, Loudonville; P. Rottman, Millersburg; D. S. Patterson, Weston; P. H. Ohly, Sandusky; Cecil V. Jones, St. Paris; Wm. C. Thatcher, Circleville; Clyde G. Byrd, Lima; A. Scheffel Herzer, McConnellsville; John R. Funk, Hamilton; C. M. Liggett, Cardington; Shelby A. Stirn, Ottoville; Wm. H. McElroy, Newcomerstown; Earl Richards, Beverly; Harley H. Dunn, Morrow; M. Morris, Paulding; Charles S. Geese, Alliance; Wm. W. Alexander, Letart Falls; John H. Lease, Salem; Arthur R. Davis, Jeffersonville; Milton B. Crafts, Chagrin Falls; Clyde E. Wager, Wauseon; Fred A. Saywell, Hudson; R. H. Chelneus, Piqua; S. J. Hannum, Salineville; Carl E. Schmidt, Canton; C. A. Wooley, Mountville; Wm. A. Foertmeyer, Milford; Loren L. Fogg, Zanesville; Joseph R. Bock, Chillicothe; H. R. Crabbs, Ada; Mark A. Kidd, Batavia; Roland Arnold, Bellaire; Judson T. Wilkes, Charleston, W. Va.; Allen J. Heuschling, Bellevue, Ky.

**SATISFACTORY ASSISTANTS.**—John W. Lee, Peter E. Kern, W. E. Duffie, H. D. Mathews, Edgar C. Austin, Glenn G. Howell, Columbus; Ford P. Silber, Amos F. Crazier, Cincinnati; Aubrey Goldrick, Stephen Gregus, Frank F. Deubel, Cleveland; Eva F. Robertson, Toledo; Roscoe C. Himes, Vera D. Hariman, George M. Swigart, Selma L. Schmidt, Dayton; Cecil C. Cole, Canton; Allen G. Piersol, Bellaire; Howard M. Bergert, Canton; Thomas G. McCormick, Mount Vernon; C. A. Warner, Windham; A. F. Scalover, Zanesville; H. F. Hosfeld, Tiffin; John M. Galbreath, Coshocton; K. E. Shauwecker, Canal Dover; A. W. Barton, Cumberland; M. K. Larkworthy, Galion; Otis Bradford, Aberdeen; Herbert Lucas, Circleville; Allen G. Piersol, Greenville; Leon P. Shinn, Huron; H. G. Metzger, Shelby; Anna H. Smedley, North Bend; Francis D. Davis, Newark; George H. Wilson, Steubenville.

The following made a grade high enough to entitle them to the assistant's certificate on their pharmacist examination, if they desire to accept the same: George E. Scanlon, W. F. Braunlich, Cleveland; F. M. Rockwell, Albert Haefner, Roy H. McClung, James C. Blake, Walter J. Fallon, D. L. Hawkins, I. H. Gerhard, Cincinnati; Louis A. Kief, G. Flickinger, Toledo; Ernal M. Moore, LaVerne English, West Mansfield; John R. Clark, Cambridge; C. F. Thomas, Springboro; H. Z. Brower, Farmersville; W. M. Dannemiller, Canton; Thomas E. Webb, Warren; F. M. Keely, Joliet, Ill.; R. B. Court, Mantua; F. C. Christofferson, Logan; Ellis R. Bader, Hamilton; C. E. Hudson, Canton; George W. Pike, Lisbon; Edw. C. Schaefer, Portsmouth; Benj. F. Steidle, Sidney; Lewis Myers, Columbus Grove; Carl C. Bechtel, Orrville; Claude G. Ranger, Morenci, Mich.; G. A. Triplett, Bellevue, Ky.

There were 162 applicants for registered pharmacist, 73 were successful, 39 passed as assistants on such examination and one was absent. There were 64 applicants for assistant examination, 35 were successful, 27 rejected and two absent.

### Illinois.

**SPRINGFIELD, June 19.**—At the May meeting of the Illinois State Board of Pharmacy, 15 out of a class of 43 applicants for registered pharmacist and 19 of the 25 candidates for assistant pharmacist passed successful examinations. Their names follow:

**REGISTERED PHARMACISTS.**—John E. Austin, John C. Borowski, George L. Detrick, George Eckhardt, P. Gonorovsky, Ralph M. Gray, Arthur W. Huff and Maurice Kogan, all of Chicago; Ernest C. Cazel, Wilmette; J. K. Elder, Murrayville; Earl W. Gsell, Evanston; Louis H. Ortzig, East St. Louis; Leon A. Philibert, Highland; H. J. Hearrington, Henning; A. C. Musgrave, Hutsonville.

**ASSISTANT PHARMACISTS.**—Oliver J. Adams, Grayville; Harry L. Deck, Girard; Otto Hohenstein, Carl W. Holz, Springfield; Ben J. James, Litchfield; Wm. E. Meyer, Quincy; L. Nierstheimer, Bloomington; Benj. H. Reiss, East St. Louis; John L. Tuscher, Springfield; Kurt H. Wendler, Nashville; C. D. Witter, Maple Park; Joseph J. Barrash, Robert H. Caldwell, Benj. Feldman, I. M. Kalanovske, Arthur D. Langdon, Felix J. Ratajick, Jerry E. Rimsa and Max Sime, all of Chicago.

The next meeting for the examination of assistant pharmacists will be held in Chicago on Tuesday, July 13. On the following day (Wednesday), July 14, an examination will be conducted for registered pharmacists. The next apprentice examinations throughout the State will be held July 2.

DELAWARE PHARMACEUTICAL SOCIETY HOLDS SUCCESSFUL ANNUAL MEETING AT WILMINGTON.

WILLIAM POOLE, Wilmington, retiring president of the Delaware State Pharmaceutical Association.

BENJ. H. MATTHEWS, of Milford, elected president of the Delaware State Pharmaceutical Association.

FRANK H. GRAY, of Wilmington, secretary of the Delaware State Pharmaceutical Association.

WILMINGTON, June 19.—At the recent 23d annual meeting of the Delaware Pharmaceutical Society, which was held in the parlors of the Clayton House, the attendance was large. Vice-President James T. Challenger, of New Castle, presided at the sessions in the absence of President William Poole, of this city. The Rev. W. G. Koons welcomed the delegates and opened the sessions by prayer. N. B. Danforth, of this city, responded. The reports of the officers showed the society to be in excellent condition.

Delegates were appointed as follows: To the meeting of the American Pharmaceutical Association at Los Angeles in August, H. K. Watson, of Wilmington; to the meeting of the revision of the United States Pharmacopoeia at Washington on May 10, 1910, H. J. Watson, of Delaware College; W. F. Dunn, of Smyrna; William Poole, of Wilmington; alternates, Thomas Donaldson, of Wilmington; J. O. Bosley, of Wilmington, and J. T. Challenger, of New Castle. To attend the meeting of the Pennsylvania Pharmaceutical Association on June 23, H. P. Brown, G. O. Hancock, and Erdman Hoffman, all of Wilmington. To the Philadelphia Pharmaceutical Association, J. M. Harvey, of Wilmington.

The following officers were elected: President, B. H. Matthews, of Milford; vice-presidents, F. J. Harmonson, for New Castle County; H. R. Jones, for Kent County, and W. F. Haines, for Sussex County; treasurer, J. O. Bosley, of Wilmington; secretary, F. H. Gray, Wilmington; executive committee, H. P. Brown, Wilmington; E. R. Allaband, Wilmington; W. R. Keys, Clayton.

Under the law, it is the duty of the society to nominate several members, one of whom is appointed by the Governor as a member of the State Board of Pharmacy each year, as a vacancy exists. This year the term of Dr. W. F. Haines, of Seaford, expires, and the society nominated R. M. Kauffman, Seaford; W. F. Dunn, Smyrna; Norman C. Downes, Wilmington; J. O. Bosley, Wilmington. These names will be forwarded to Governor Pennell.

After the meeting had adjourned, the members boarded

JOHN O. BOSLEY, Wilmington, re-elected treasurer of the Delaware State Pharmaceutical Association.

special electric cars and went to Brandywine Springs Park, where they spent a pleasant afternoon.

"What Is Whisky?"

WASHINGTON, D. C., June 19.—Your correspondent is reliably informed that the recent pronouncement from the Attorney General which assumed to state what whisky really is, is being met by a flood of protests which are being sent directly to President Taft.

These protests are largely from State and local officials and from others who have no financial interest in the controversy. Political leaders in the prohibition movement are also antagonizing the Attorney General's finding, for obvious and not necessarily unworthy reasons.

There is no probability of President Taft rendering the final decision until after the return of Dr. Wiley from Europe. The doctor is expected to reach Washington early in July.

Obituary Notes.

—JOHN W. F. WILLSON, who retired a few years ago from active work, after a career of more than 50 years as a druggist, with a store at Broadway and Dorchester street, South Boston, died recently at the age of 83. He was a native of Portsmouth, N. H., and his father was the founder of *Zion's Herald*, the organ of the New England Methodists. He was a graduate of Wilbraham Academy. He leaves three children.

—WM. H. SCOTT, oldest druggist in Richmond, Va., is dead. He had held public office and leaves three children.

—DR. W. T. BRYTHE, who for a number of years represented Sharp & Dohme, died on the 20th inst. at his home at Oak Cliff, Tex.

—JOHN BERRY, retired, Biddford, Me., is dead, of pneumonia. He had invented and patented laboratory apparatus. A widow and two children survive.

—JOHN J. GOODRAD, for many years a druggist in Jersey City, died recently at his home, 233 Fifth street. He was 57 years old, and was born in England. A widow and a daughter, Mrs. Douglas-Story, survive him.

## THE DRUG MARKETS

### PRICES FIRMER AND TENDING UPWARDS.

Business Continues of Average Volume, With Demand Limited to Meet Current Requirements.

NEW YORK, June 21.—General conditions of the market are unchanged, but business continues of about average volume, with the demand limited to small parcels to meet current requirements. The changes have been few and unimportant, with the exception of menthol and glycerin, which are higher. Opium, quinine and Norwegian cod liver oil are quiet but steady. Insect flowers and insect powders are tending toward higher values. Asafetida shows increased firmness.

**OPIMUM**—Primary markets continue firm with no indication on the part of the principal holders to make any concessions. Regarding the new crop, the news is that rain is required again in some districts, but there is nothing alarming in the situation, and, according to all accounts, the outturn will be about 6500 to 7000 cases, including 800 cases from the Salonica district. Jobbers continue to quote cases at \$4.25 per pound.

**QUININE SULPHATE**—In Batavia on the 17th instant, about 120,000 ounces of Java quinine realized florins 10.20, which is a slight decline, and the lowest point it has reached at any time in the past. The decline, however, is so slight it will not affect the price of the standard brands, which are held at 14 cents per ounce in 100 ounce cans.

**INSECT FLOWERS**—Advices from producing markets confirm to a great extent the general reports about a small crop, and in consequence prices for all the different qualities have rapidly advanced, and at the present time are held at high figures. Open flowers would cost today 25 cents per pound, half-closed 32 to 35 cents per pound, and closed 42 to 45 cents per pound. The prices for all grades were materially advanced last Thursday.

**GLYCERIN**—Manufacturers have again advanced their prices and now hold drums at 17 cents per pound, plain cans 18 cents per pound, and patent cans at 18½ cents per pound.

**DRAGON'S BLOOD**—This article in reeds has become quite scarce in this and foreign markets, and the price has been advanced to 70 and 88 cents per pound, as to quantity and quality.

**ASAFETIDA**—There is a good inquiry for this article, but spot stock of good quality is very scarce and none is being offered at the present time except in a small way. The demand for powdered is active, and dealers are behind in filling orders, owing to difficulty experienced in getting the substance powdered, as it takes time and the operation cannot be hurried without injuring the product. Jobbers announce that they have a good stock of whole asafetida at the mill, and hope in a short time to be well supplied with the powdered variety.

**MENTHOL**—The market continues to advance, and cases are now held at \$2.50 per pound. It would cost to import above this figure at the present time, and a still higher market may be expected. There is a continued good inquiry, together with stronger markets abroad, London cables recently reporting an advance there to 8s 6d. Dealers in the local market refuse to shade prices.

**COD LIVER OIL—NORWEGIAN**—Manufacturers are firm in their views, and there is not any probability of lower prices, but on the contrary, dealers look for a better market, and higher values later in the season.

**CHAMOMILE FLOWERS—HUNGARIAN**—The ruling quotation for prime quality is 45c. per pound in large quantities, and spot stocks are extremely scarce. New crop for shipment is firmly maintained at unchanged figures for No. 1 quality, but for second grade a slightly lower range of prices is named.

**CANTHARIDES**—Prices for Russian are firmer owing to cables of stronger primary markets, and spot quotations for prime flies have been advanced to 60 and 62 cents per pound as to quantity and grade.

**BALSAM FIR**—Oregon continues firm at \$1.25 to \$1.35 in large lots and as to style of package. Sales of barrels have been reported at the inside figure. Canada is quiet but steady

at \$7.00 to \$7.10 per pound, and advices from primary sources are to the effect that there is very little as yet obtainable in producing districts.

**CURACAO ALOES**—Quotations are maintained at 6¼ to 7 cents per pound and sales in a jobbing way are reported at the inside figure. There is a moderate consuming inquiry.

## London Drug Market

LONDON, June 12.—There has been an improved tone in the market this week which it is hoped will be maintained, for business has been exceedingly dull for a very long time. The main feature of the week has been the activity in Menthol, due to unfavorable crop accounts, considerable sales having been made at advancing prices up to 8s per pound having been paid for Kobayashi. Japanese demethylized peppermint oil has also been active and spot business has been done up to 5s per pound. On the other hand American peppermint oil is quiet. Camphor has been quiet and prices are nominally unchanged. Oil of Star Aniseed is 1 penny per pound cheaper at 4s 4d per pound spot. Cubebs are very scarce and after business at 105 per cwt.; holders are asking 115s. At the spice sales there were heavy offerings of Jamaica Ginger and 300 packages, about one-fifth of the offerings, sold at steady rates on the whole but slightly easier in some cases. Business has been done in Buchu leaves at 1s 5½d per pound for good round green.

Opium is steady on the spot but in view of crop reports from Smyrna there is a probability of a weaker tendency in morphine and codeine. Glycerin continues firm. Jalap is quoted high, good testing tubers being held for 2s per pound. Reports received here from the South of France are to the effect that the crops of Lavender and Neroli will be below the average. The reports to hand regarding the English medicinal crops are on the whole favorable.

### Chewing Gum Interests Merge With Large Capital.

The Sen Sen Chiclet Company was incorporated under the laws of Maine with a capital of \$6,700,000 last week, for the purpose of taking over the business of six of the largest factories of chewing gum in the United States and Canada. The interests merged are: T. B. Dunn Company, of Rochester, N. Y.; Frank H. Fleer Company, of Philadelphia, Pa.; C. R. Somerville, of London, Ontario; The After Dinner Gum Company, of Rochester, N. Y.; Grove Company, of Salem, O., and George B. Curtis Company, of Portland, Me. The officers of the new concern are: T. B. Dunn, of Rochester, chairman of the board of directors; F. H. Fleer, of Philadelphia, first vice-president; A. P. Leighton, mayor of Portland, second vice-president, and C. R. Somerville, of London, Ont., secretary. Announcement has been made by the New York brokers who brought about the merger, that there has already been a large subscription to the securities of the company by directors of the American Chiclet Company, but that there will be further offerings to the public.

### Mixture Explodes—Druggist Badly Hurt.

KANSAS CITY, June 19.—While compounding a prescription in his store at 15th street and Troost avenue recently, Harley High was badly injured by an explosion of the chemicals which he was mixing in an evaporating dish. His right hand was badly hurt, and powdered chemicals were blown into his face. Mr. High was suffering so greatly that he could not tell how the explosion occurred. No one else was near.

The injured man was treated at the residence of Dr. W. T. Singleton, Jr., directly across the street. It was found necessary to amputate the right thumb at the first joint. The great mass of powder which had been blown into Mr. High's face was picked out. He was taken to his home, 3214 Chestnut street. Fire which resulted caused \$900 loss.

### Orleans Magic to Advertise a Drug Store.

In Louisville, Ky., recently Frank Hertle resorted to Oriental magic to advertise his new drug store in the Seelbach Block. "A famous exponent of black art" did the demonstrating and the plan attracted large crowds to the new pharmacy.
